Plasma resonances, considering unbounded and bounded uniform and nonuniform plasmas and nonlinear effects

06 p1116 A70-17365

Transmission and emission of radiation from dense inhomogeneous finite laboratory plasma column in magnetic field with interpretation by cold plasma theory

06 p1116 A70-17367

Nonuniform plasma analyzed for parameters inhomogeneity effect on VLF propagation mode and instability

06 p1119 A70-17381

Linear transformation of waves in nonuniform magnetoactive plasma by solving wave equation with/without allowance for spatial dispersion

06 p1119 A70-17498

Variational ray path calculation method for HF electromagnetic wave in anisotropic inhomogeneous lossless ionospheric plasma

06 p1055 A70-17592

Symmetrical H mode wave propagation in inhomogeneous plasma filled circular waveguide solved by hypergeometric functions, noting use for microwave diagnostics and computer programs verification

06 p1009 A70-17825

Inhomogeneous plasma cylinder skin effect, surface impedance, radiation transport and mean noise temperature

07 p1347 A70-19107

Bogoliubov approach generalized and applied to unstable and inhomogeneous plasmas

07 p1347 A70-19108

Waves and differential equations for electromagnetic field in nonuniform magnetized plasma described for all orders in electron and ion temperature

07 p1350 A70-19823

Inhomogeneities in interplanetary plasma formation due to instability of electron flows moving along interplanetary magnetic field lines of force

08 p1570 A70-20845

Longwave and shortwave mode transformation in resonant layer of inhomogeneous plasma

08 p1550 A70-20847

Molecular cesium ion production by arc discharge in inhomogeneous cesium plasma, describing probable reaction mechanism

08 p1551 A70-20849

Interplanetary plasma inhomogeneity size, shape and spatial orientation and drift velocity and direction determined from radio telescope data

08 p1580 A70-21664

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability

08 p1554 A70-21819

Thermal radiative transfer in nonuniform anisotropic magnetoactive plasma, correcting term of Zheleznyakov equation

09 p1734 A70-22514

Effective noise temperature of planar aperture antennas in lossy inhomogeneous plasma slabs calculated by computer

09 p1646 A70-22704

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency

10 p1925 A70-25011

Thermal emission of inhomogeneous plasma sphere having dielectric constant as function of radius

10 p1925 A70-25012

Two fluid hydrodynamic model of heat conductivity and viscosity effects on drift laminar flow stability of dense inhomogeneous plasma

10 p1926 A70-25125

Radiation fields of sources in plane stratified plasma medium calculated for amplitude transformation coefficient

10 p1843 A70-25155

Stability of realistic inhomogeneous plasmas with sheaths, examining electron beam-stable Maxwellian plasma interaction

11 p2090 A70-26021

Electrostatic wave propagation and growth rate in electron beam-inhomogeneous plasma confined by magnetic field

11 p2091 A70-26460

Plasma resonance excitation by small pulsed dipole in weakly inhomogeneous plasma determined using WKB solutions and stationary phase approximations

12 p2777 A70-27188

Electrostatic wave modes in inhomogeneous adiabatic plasma, discussing waves with gamma-fold ion and electron drift velocity

12 p2280 A70-27783

Tonks-Dattner resonances in plasma columns, considering viscosity effect on radial oscillations in nonuniform plasmas

12 p2281 A70-27792

Inhomogeneous one dimensional plasma in electrostatic normal modes, considering interactions of waves and particles

13 p2460 A70-28638

Laser radiation interaction with hot nonuniform plasma, determining thermal and electromagnetic forces for various temperatures and densities

13 p2460 A70-28643

Electromagnetic waves extraordinary mode scattering by small diameter nonuniform plasma column in magnetic field

13 p2460 A70-28644

Nonlinear drift wave buildup in inhomogeneous plasma faster than in linear approximation

13 p2460 A70-28652

Cross coupling relations in Boltzmann equations solution for inhomogeneous plasmas, using spherical harmonics expansion and Laguerre-Sonine polynomial

13 p2464 A70-29539

Cylindrical antenna admittance during immersion in ionospheric plasma, noting influence of ion sheath and plasma anisotropy

13 p2371 A70-29922

Whistler mode wave packets propagation in hot inhomogeneous collisionless plasma immersed in nonuniform ambient magnetic field

13 p2468 A70-29931

Convective or absolute electrostatic instability in weakly inhomogeneous hot magnetoplasma, determining density and frequency for onset

14 p2622 A70-30695

Anisotropic plasma turbulence produced by two stream instability onset near light cylinder of rotating magnetic star for pulsar model

14 p2640 A70-30788

Em wave reflection and transmission at boundary between free space and semiinfinite anisotropic plasma 15 p2778 A70-31830

Particle acceleration by electrostatic waves propagation in inhomogeneous plasma in terms of phase velocity, magnetic field and wave amplitude 15 p2778 A70-31912

Inhomogeneous ion beam plasma LF instability, showing oscillations amplitude maxima in radial density gradient regions 15 p2780 A70-32193

Glass tube surrounded nonuniform plasma column interaction with TM microwave field of cylindrical cavity for electron density measurements 15 p2780 A70-32347

Born approximation limit for plane wave multiple scattering by inhomogeneous electron density distribution in plasma 16 p2957 A70-32981

Tonks-Dattner resonances in warm inhomogeneous plasma column, examining kinetic theory for waveform shapes and resonance location 19 p3475 A70-37534

Inhomogeneous plasma ellipsoid equilibrium in external HF field, assuming parabolic density distribution 19 p3479 A70-37739

Inhomogeneous nonequilibrium plasma stratification in magnetic field, investigating electrical conductivity 19 p3481 A70-38191

Nonuniform electron plasma trapped in one dimensional potential well, determining linear oscillations by normal mode approach 19 p3482 A70-38944

Electromagnetic waves scattering from dense turbulent plasma, calculating radar cross sections of inhomogeneous plasma for peak electron densities 20 p3586 A70-39459

Nonuniform finite amplitude plasma waves nonlinear decay and instability, discussing initial damping/or growth/ effect 20 p3678 A70-39660

Two fluid hydrodynamic model of heat conductivity and viscosity effects on drift laminar flow stability of dense inhomogeneous plasma 20 p3685 A70-40518

HF electromagnetic field effect on nonhomogeneous collisionless magnetized plasma stability, deriving dispersion equation for drift cyclotron oscillations 21 p3854 A70-40622

Microwave propagation in circular waveguide containing inhomogeneous gas discharge plasma 21 p3785 A70-40630

Cylindrical plasma inhomogeneities including meteor trains diffusion in presence of magnetic field, observing dependence on angle theta 21 p3886 A70-41060

Transport coefficients of inhomogeneous magnetized bounded and unbounded plasmas based on quasi-linear approximation 21 p3857 A70-41385

Electromagnetic wave propagation through cold slowly varying plasma layers in absence of external magnetic field 21 p3860 A70-42000

LF self excited oscillations in inhomogeneous afterglow magnetoplasma measured by Langmuir probe, noting dissipative drift instabilities 22 p4079 A70-42372

Plasma inhomogeneity and drift effects on synchrotron radiation from relativistic charged particles in magnetoplasma 22 p4082 A70-43254

EM wave second harmonic generation by plasma wave, discussing decay processes in inhomogeneous plasma layer 22 p4083 A70-43381

Interplanetary plasma electron density inhomogeneities formation explained by instability due to electron stream curvilinearity obtained from spacecraft data 23 p4240 A70-44070

LF drift-dissipative instabilities of HF skin layer in nonuniform plasma 24 p4383 A70-45119

NONUNIFORMITY

Power and location prediction at critical heat flux onset under nonuniform axial heating conditions, using local approach method 01 p0219 A70-11303

Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation 12 p2272 A70-27359

TV photograph image instability of stars, developing discontinuity and variability criteria as elementary approximate method for comparing nonuniformities 16 p2979 A70-34177

Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation 22 p4075 A70-43600

NONVISCIOUS FLOW

U TURBULENT FLOW

NOON

Critical sunspot dependence of F 2 region noon bite-out phenomenon at various equatorial latitudes, observing magnetic dip 08 p1492 A70-21837

NORADRENALINE

Sleep-wakefulness cycle regulation role of serotonin, noradrenalin and acetylcholine in CNS of animals 15 p2680 A70-31745

Intact femoral artery pressure-diameter relationship in man, discussing noradrenaline infusions effects 18 p3222 A70-37222

Human elbow induced forearm and hand vessels tachyphylaxis to angiotensin, noradrenaline and acetylcholine compared to vascular response of vasopressin 21 p3761 A70-40577

NOREPINEPHRINE

Rats sympathoadrenomedullary response to increased oxygen tensions, measuring catecholamines, norepinephrine and epinephrine in adrenal gland, hypothalamus, serum and urine 01 p0024 A70-10979

Ambient temperature effects on rats excretion of epinephrine, norepinephrine and major metabolites 02 p0232 A70-11714

Blood flow changes in portal vein and hepatic artery of anesthetized cats following intraportal and intrahepatic arterial administration of isoproterenol, epinephrine and norepinephrine 02 p0232 A70-11718

Oxygen tension and pressure effects on hyperbaric oxygenation induced depletion of brain norepinephrine and 5-hydroxytryptamine in mice 02 p0235 A70-11992

Brain norepinephrine synthesis rate in gonadectomized and control rats treated with alpha-methyl paratyrosine 03 p0416 A70-12987

Norepinephrine release associated with vasoconstrictor response during selective activation of arterial and venous sympathetic nerves in dog hindpaw 03 p0416 A70-13012

Norepinephrine-induced depolarization effects on brown fat thermogenesis in cold-acclimated rats determined from in vivo measurement of intracellular potentials 05 p0799 A70-16020

Time course of changes in rat brain norepinephrine levels after olfactory bulb lesions, discussing automatic and biological mechanisms 08 p1448 A70-21841

Norepinephrine synthesis inhibition effect on arousal triggering and maintenance in hibernating golden hamsters, examining sympathetic activity 23 p4148 A70-44874

NORMAL DENSITY FUNCTIONS

Mie scattering and polarization functions of atmospheric aerosols determined on basis of logarithmic Gaussian distributions 05 p0879 A70-16664

Convolution formulas for Cauchy and standard normal random variable distributions derived from geometry of circular symmetric distribution on plane 07 p1323 A70-18946

Distributional results pertaining to complex Wishart processes and time varying spectral estimators on null hypothesis of stationary Gaussian time series 07 p1323 A70-19028

Complex Gaussian processes with complex density functions, computing covariances and marginal distributions 10 p1915 A70-24057

Regression analysis of linear statistical model experiments with stationary Gaussian error of slowly varying spectral density 11 p2073 A70-26249

Fifty percent coverage problem /Circular Error Probable/ of general bivariate Gaussian distribution from viewpoint of navigation systems error analysis 16 p2948 A70-33451

Gaussian source model of image, deriving rate distortion function under mean square error criterion 17 p3049 A70-34857

Gaussian gravity field structure, calculating gravity correlation function using differential equation from density correlation function 20 p3617 A70-39075

NORMAL DISTRIBUTIONS

U NORMAL DENSITY FUNCTIONS

NORMAL FORCE DISTRIBUTION

U FORCE DISTRIBUTION

NORMAL SHOCK WAVES

Normal shock waves in frozen, partly frozen and equilibrium flow in gas-solid particle mixtures 01 p0065 A70-11100

Molecular velocity distribution function measured in normal He shock wave in low density wind tunnel by electron beam fluorescence technique 02 p0299 A70-12229

Vibrational energy exchange between molecules during collision behind normal shock front as function of wave velocity 03 p0468 A70-13873

Numerical integration of differential equations governing one dimensional flow of reactive gas, discussing flows of converging-diverging nozzle and normal shock waves 04 p0671 A70-14992

Flow fields construction for normal shock waves with nonequilibrium chemical reactions reflected from shock tube end wall [AIAA PAPER 68-732] 04 p0674 A70-15537

Gas dynamics theory with nonequilibrium radiative and collisional ionization applied to strong normal shock wave structure 05 p0831 A70-15870

Numerical results for perturbed downstream flow field resulting from entropy wave interaction with normal shock and oblique shock generated by wedge flow 05 p0835 A70-16788

Model sampling or Monte Carlo applied to normal shock, giving temperature and density profiles for Mach 10 shock 06 p1050 A70-18337

Normal hypersonic shock wave structure in diatomic gas, measuring density by electron beam fluorescence technique 06 p1050 A70-18341

Normal shock waves produced in argon and helium flow by holder with variable downstream porosity, measuring DC moments, component velocities and density 06 p1051 A70-18342

Normal shock wave structure in binary gas mixtures of chemically inert monatomic molecules, using kinetic theory moment method 06 p1051 A70-18343

Single component two phase pipe flow choking and shock phenomena, including flashing flow vibratory effects 13 p2386 A70-28846

Gas-liquid two phase flow dynamics, explaining behavior under normal and oblique shocks 16 p2893 A70-33684

Normal shock structure in thermally perfect gas, using perturbation methods 17 p3070 A70-35244

Plane normal shock front diffraction along free interface between half planes of homogeneous fluids at rest, using method of characteristics and Whitham technique 17 p3074 A70-35886

Normal shock waves structured by nonequilibrium radiative and electron-atom collisional ionization, using generalized radiation model 24 p4324 A70-45290

NORMALITY

Seminormality and upper semicontinuity of variable sets in optimal control 22 p4061 A70-42461

NORMALIZING [STATISTICS]

Quantum-electrodynamics renormalization for electron charge in metal environment, using solid state many-body techniques 14 p2619 A70-30476

Normalization of mechanical properties of aircraft engine components, increasing weight efficiency and reliability 19 p3490 A70-37254

NORMS

International norms establishment for direct TV broadcast by satellites 17 p3201 A70-35780

NORTH AMERICA

Cosmic ray latitude survey in North America in summer using neutron and muon monitors operating near sea level and on mountains 01 p0167 A70-10226

Noctilucent clouds in mesopause over North America, discussing ground stations network, intensity variations, structure and time distribution 07 p2173 A70-20267

GEOS 1 satellite short arc optical observations over North American network to improve survey coordinates of tracking stations 24 p4312 A70-45542

NORTH AMERICAN AIRCRAFT

NT B-70 AIRCRAFT

NT OV-10 AIRCRAFT

NT X-15 AIRCRAFT

NORTH AMERICAN MILITARY AIRCRAFT

U MILITARY AIRCRAFT

NORTH CAROLINA

North Carolina continental shelf discolored water origin, movement and dissipation from Apollo 9 photograph interpretation 24 p4329 A70-45361

NORTHERN HEMISPHERE

NT ARCTIC REGIONS

Lowell Observatory Northern Hemisphere proper motion survey, analyzing preliminary data for low luminosity stars 01 p0187 A70-11332

Soviet book on nonperiodic processes in Northern Hemisphere stratosphere, discussing seasonal temperature fields, geopotential and circulation formation 07 p1261 A70-18733

Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters

07 p1266 A70-19438

Atmospheric ground pressure seasonal changes after corpuscular flux arrival shown for Northern Hemisphere

08 p1487 A70-20554

Interhemispheric mass exchange as function of eddy transfer and meridional circulation

08 p1539 A70-21922

Hydrogen ion flux detected along earth magnetic force lines in Northern Hemisphere midlatitudes, determining flux magnitude

10 p1874 A70-24321

Long term ionospheric absorption measurements in Northern Hemisphere from IGY through IQSY, discussing annual and diurnal variations correlation with solar activity

12 p2226 A70-28060

F 2 layer ionization asymmetry for Northern and Southern Hemispheres during solstice periods due to electron density variations and aerodynamic conditions

14 p2569 A70-30206

Northern Hemisphere temperature atlas for SST cruise altitudes, estimating probabilities of enroute temperatures and risk increase

14 p2609 A70-30609

Magnetic activity intensity comparison in Northern and Southern hemispheres, noting correlation with solstices and equinoxes

14 p2580 A70-31260

Exospheric density at opposite hemispheres, showing variations from winter helium bulge

15 p2724 A70-31679

Northern Hemisphere radar aurora latitude variation, considering magnetic activity effects

15 p2697 A70-31770

Atmospheric ground pressure seasonal changes after corpuscular flux arrival shown for Northern Hemisphere

15 p2732 A70-32709

Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters

18 p3249 A70-36912

Global scale atmospheric circulation processes numerical simulation leading to long range weather forecasts for Northern Hemisphere

19 p3462 A70-38753

Atmospheric zonal kinetic energy balance for Northern Hemisphere, assuming frictional destruction due to stresses across horizontal surfaces

20 p3661 A70-39145

Geopotential fields forecasting on isobaric surfaces over Northern Hemisphere by linear four level nonadiabatic model, discussing eddy transport and heat flux equations

20 p3662 A70-39179

Atmospheric circulation indices in Northern Hemisphere on isobaric surfaces, comparing mean diurnal, monthly and climatic values

20 p3662 A70-39180

Solar activity effects on Northern Hemisphere atmospheric temperature, mapping gradients for 11 year solar cycle

20 p3662 A70-39188

Air circulation spring restructuring in Northern Hemisphere upper stratosphere, investigating summer stratospheric anticyclone evolution

22 p4066 A70-43378

F 2 layer ionization asymmetry for Northern and Southern Hemispheres during solstice periods due to electron density variations and aerodynamic conditions

24 p4330 A70-46281

NORTHROP AIRCRAFT

NT F-5 AIRCRAFT

NORTHROP MILITARY AIRCRAFT

U MILITARY AIRCRAFT

NORTON COUNTY ACHONDRITE

Neutron capture effects in Gd from Norton County meteorite by isotopic composition analysis

12 p2300 A70-27524

NOSE [ANATOMY]

Human nostril airflow resistance during supported sitting and lateral recumbency and crutch pressure, discussing ipsilateral nasal congestion mechanisms

08 p1448 A70-21874

NOSE CAPS

U NOSE CONES

NOSE CONES

NT ABLATIVE NOSE CONES

NT ROCKET NOSE CONES

Shock wave shapes in hypersonic flow past blunt conical nosed circular cylinders, using analogy with Savic perturbed hypersonic blast wave theory

02 p0277 A70-11862

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution

04 p0620 A70-15530

Porous matrix flow, surface liquid layer and hot gaseous boundary layer interactions at nose tip of reentry vehicle

06 p1037 A70-18028

Nose cone modifications for Meteor-1 meteorological sounding rocket used for wind velocity measurements

09 p1767 A70-23406

Photo-optical instrumentation for temperature estimates of nose cone in simulated reentries, using rocket monorail sleds and artificial rainfields for rain erosion effects

09 p1688 A70-23778

Transonic static and dynamic stability of large angle spherically blunted high-drag cones

[AIAA PAPER 70-564] 13 p2341 A70-29029

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection

[AIAA PAPER 69-706] 13 p2343 A70-29954

Blunt nose effects on drag of flared conical body in supersonic flow, considering pressure loss through shock layer during atmospheric near orbital entry at high altitudes, using finite rate chemistry

16 p2837 A70-33865

Atmospheric reentry nosetip shape changes supersonic flow, considering rough surface effects on heat transfer

[AIAA PAPER 70-827] 17 p3196 A70-35193

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature

18 p3208 A70-36694

NOSE INLETS

Pressure distribution about finite axisymmetric nacelle determined using Douglas Neumann program for cowl surfaces and inlet external surface

07 p1190 A70-20412

NOSE WHEELS

Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft

[AIAA PAPER 69-790] 13 p2344 A70-28514

Boeing 737 aircraft nose gear gravel deflector and engine vortex dissipator

[AIAA PAPER 70-912] 17 p3020 A70-35824

Large wheel and tire imperfection effects on nosegear parametric shimmy instability, using Mathieu equation

18 p3213 A70-36455

NOSES [FOREBODIES]

NT ABLATIVE NOSE CONES

NT NOSE CONES

NT ROCKET NOSE CONES

Vibrational relaxation effect on supersonic flow past nose section of blunted body

12 p2159 A70-28231

Viscous gas hypersonic flow past blunt nosed bodies based on Navier-Stokes equation

15 p2671 A70-31481

Supersonic nonequilibrium gas mixture flow past segmental bodies nose areas to simulate Venusian atmosphere, determining temperature, pressure and concentration distributions

15 p2796 A70-31483

Heat transfer and pressure drag of axisymmetric body in hypersonic flow, obtaining minimum energy nose and leading edge shapes by Pontryagin principle

[AIAA PAPER 70-825] 16 p3001 A70-33940

NOSTOC

Amino acid composition of protein in blue green algae *Stratonostoc Linckia*

14 p2540 A70-30158

NOTATION

U CODING

NOTCH SENSITIVITY

Stress distribution in vicinity of arbitrarily shaped slender notches as function of notch symmetry using photoelastic analysis

07 p1404 A70-19240

Ni-Fe base superalloy notch and rupture properties as function of thermal and chemical changes, using electron microscopy

13 p2437 A70-29829

Transient overloads effect on long term fatigue strength of notches and smooth steel samples, emphasizing heat treatment effect on notch sensitivity at high temperatures

15 p2814 A70-31546

Drop-weight tear test evaluation taking into account operator, test machine, specimen thickness, notch type and strength level effects

15 p2759 A70-32241

Glass fiber reinforced cross ply and quasi-isotropic plastics, considering notches effect on fatigue behavior for comparison with metals

19 p3455 A70-37951

Notch sensitivity dependence on plastic strain in Al alloy, heat resistant steels and Ni alloys under tensile tests at room temperature

24 p4360 A70-45827

NOTCH STRENGTH

Elastoplastic stress concentrations calculations in notched strips and shafts under tension, bending and torsion, using approximate method

01 p0211 A70-11425

Notch-bend strength of titanium, aluminum and copper base alloys, noting geometrical size effect

[ASME PAPER 69-MET-D] 04 p0705 A70-14878

Notched cylindrical shells of nonuniform thickness using two dimensional photoelastic models mounted on elastic foundations

07 p1249 A70-19239

Hypercritical crack growth resistance and notch toughness of aluminum alloys derived from fracture tests

11 p2064 A70-25331

Thin cut plate quasi-brittle breakdown under tensile stress, considering elastoplastic equilibrium under Tresca-St. Venant yield conditions

12 p2329 A70-28325

Strength and thickness effects on energy absorption criteria for transition temperatures in Charpy V-notch impact tests

15 p2819 A70-32234

Axial stress at notch root of shafts under axially symmetric loading, utilizing integrated birefringent patterns in transmitted light at room temperature

[SESA PAPER 1970] 15 p2821 A70-32315

Viscoelastic materials cut growth, discussing strain, fracture and modulus of elasticity dependence on temperature variations

17 p3146 A70-35220

Notch stress intensity factor representation as boundary traction weighted average, deriving weight functions from stress field boundary displacements

23 p4266 A70-44021

Brittle fracture of welded notched steels with different stress concentrations, using subzero tensile tests

24 p4347 A70-45732

NOTCH TESTS

NT CHARPY IMPACT TEST

Ultrasonic detection system for crack initiation and propagation in notched low cycle axial fatigue testing using surface and longitudinal waves

01 p0096 A70-10004

Stressed state of circular notched plane in tension under creep conditions

01 p0210 A70-11410

Elastoplastic zone and instability of precracked thin sheets under uniaxial loading applied to rectangular center-notched steel foils

03 p0598 A70-14239

Thermal stress concentration produced by cracks, notches and fillets in plates free from external loads measured photoelastically

03 p0600 A70-14310

Stress-strain spatial distribution in notched plate fatigue specimen of mild steel determined by finite element method, noting cyclic strain softening effect

[ASME PAPER 69-MET-C] 04 p0770 A70-14876

Hammer forces and specimen bending moment-time responses and fracture resistance during notched beam impact test

05 p0938 A70-16479

Analog to Burger model applied to rotating disk creep problem solution and stress-strain state of plane sample with hyperbolic groove

05 p0952 A70-17038

Corrosion cracking mechanism for notched metal surface in aqueous environment under tensile stress, discussing electron distribution and H ion concentration

07 p1310 A70-19737

Stress and strain spatial distribution in notched steel plate under cyclic loading determined by finite element method

08 p1590 A70-21315

Profile plane state of stress in wedge with and without external notch using combined photoelastic analysis and moire method

11 p2131 A70-25591

Mechanical notches and saltwater corrosion effects on flexural fatigue behavior of high strength structural alloys, investigating yield strength to density ratio

11 p2066 A70-26097

Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading

12 p2328 A70-28200

Contour notch position effects on stress concentration in taper section of dumbbell shafts, using photoelastic shaft models and cyclic tests

13 p2517 A70-29750

Charpy V notch and dynamic tear tests compared for fracture toughness characterization of Ni-Cr-Mo-V steel

14 p2596 A70-30931

Structural components strength calculation with design required functional notches, noting stress limit for ductile materials under static loads

15 p2815 A70-31874

Microscopic residual stress in crystals at fatigue crack tip in notched specimen in terms of flow stress and dislocation density

17 p3183 A70-34653

Stress concentration in notched flat samples under plane plastic deformation

18 p3340 A70-36570

Critical loads for notched square Al alloy rods under tension 18 p3343 A70-36718

Notched sheet failure prediction based on Dugdale crack model, including work hardening and finite width effects, strain fracture criterion and yield failure mechanism 19 p3548 A70-38624

Elastoplastic deformation in strip with symmetrical semicircular notches simulating stress strain-state on celluloid models by polarization-optical method 20 p3720 A70-39735

Low cycle notch fatigue tests on Inconel and low alloy steel, giving fatigue strength reduction factors for design 22 p4055 A70-43103

Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading 22 p4117 A70-43324

High strength Al alloys plate and welds, comparing tear notch tests at cryogenic and room temperatures 23 p4206 A70-44352

Moire technique application to fracture toughness tests on Zr alloys, measuring crack opening displacements and plastic flow beneath notch 23 p4208 A70-44914

German monograph on notched structural steels fatigue properties and crack propagation under tensile-compressive alternating loads 24 p4356 A70-45086

NOTCHED STEEL

U NOTCH TESTS

U STEELS

NOTCHES

Plastic strains at sharp notch roots in Perspex plates using interference patterns formed by gas laser monochromatic light beam for fracture initiation 11 p2131 A70-25594

Stress concentration factors determined for U-shaped and semielliptical edge notches in semiinfinite sheet under uniaxial tension parallel to edge 13 p2509 A70-28535

Al-Mg alloy nonpropagating fatigue cracks at roots of sharp notches, discussing cyclic strain hardening 14 p2598 A70-31299

Stresses in plate containing circular hole with notch under uniaxial tension, determining parametric coefficients by Fourier transforms 14 p2661 A70-31326

Half plane with stress-free surface deformed by protrusions or notches, deriving edge force or screw dislocation by linear elastic analysis 21 p3939 A70-42028

NOVAE

NT HERCULES NOVA

Nova Delphini 1967 emission line spectrum at 8400-9600 Å, using diffraction spectrograph attached to astronomical telescope 01 p0182 A70-10675

Binary system Nova WZ Sge model with nonequilibrium secondary component contribution to total light explaining W UMa type light curve 03 p0568 A70-13324

Nickel IV forbidden lines suggested from spectrum study of slow nova RR Telescopii 05 p0905 A70-15758

SS Cygni outburst origin in G type star indicated from radial velocity variations of hydrogen absorption lines during rising light 05 p0915 A70-16695

Nova Delphini 1967 brightness visual evaluations by amateurs, discussing effect of personal factors and instruments on accuracy 08 p1568 A70-20634

Stellar formation and explosions in compact gas clouds to explain quasar phenomenon, discussing temporary star concept 08 p1578 A70-21548

Celestial sources energy spectrum and absolute flux by rocket flights, attributing short lived outbursts to shock wave from nova expanding into circumstellar medium 11 p2113 A70-26297

Pulsars nature based on hypothesis for main energy of novae and supernovae bursts equaling gravitational energy of collapse 11 p2117 A70-26708

Nova Delphini brightness variations, observing absorption lines shift toward violet 12 p2306 A70-27860

Nova Ser 1970 and Aql 1970 luminous IR emission, discussing stellar brightness, grain formation and optical decay 20 p3701 A70-39004

Nova Vulpeculae 1968 Number 1 medium dispersion spectra, using radial velocity line identification and line profile reductions 21 p3889 A70-41152

Nova HR Delphini 1967 UVB photoelectric photometry, examining absolute magnitude, distance, response curves and spectra 21 p3889 A70-41154

Delphini and Serpentis Novae radio emission in microwave spectra, noting consistency with thermal radiation of expanding ionized gas envelopes 24 p4410 A70-45771

Novae and supernovae envelope properties, observing optical polarization and magnetic field for Crab Nebula 24 p4413 A70-46169

NOXIOUS MATERIALS

U CONTAMINANTS

NOZZLE COEFFICIENT

U NOZZLE FLOW

NOZZLE DESIGN

Nozzle throat ablative materials for controlled high regression rates in tactical rocket motors, primarily nylon reinforced thermosetting resins [AIAA PAPER 69-423] 04 p0713 A70-15428

Heat transfer to hydrogen calculated with reference to design of cooled rocket nozzles and combustion chambers 06 p1174 A70-17677

Analytical method for design of supersonic flow and maximum thrust nozzles for chemically reacting gases, noting surface geometry 06 p0971 A70-18108

Free piston compression with sonic flow outlet for determining orifice size by matching with bounce parameters 07 p1249 A70-19334

Approximation for axisymmetric hodograph equation for nozzle calculation 07 p1188 A70-19347

Mean flow and turbulent velocity over noise-producing regions of subsonic jet nozzle with and without delta wings 09 p1610 A70-22239

Harrier engine nozzle actuation system role in short ground takeoff run facility, discussing pneumatic system, air motor servo unit and pilot control 09 p1610 A70-22606

Three dimensional supersonic nozzle geometry optimization using Lagrange multipliers and iteration for solving variational problem 10 p1798 A70-24115

Nozzle source design for high intensity thermal energy molecular beam with small dispersion in velocity suitable for scattering experiments 11 p2086 A70-25973

Monograph on relaxation processes at high temperatures for thrust nozzle calculation and optimization covering real gas effects, reaction kinetics, heat transfer, etc 11 p2103 A70-26475

Monograph on nozzle design effect on starting process initiated by plane shock wave in reflected shock tunnel 15 p2672 A70-31692

Auxiliary inlet ejector and plug nozzle flight performance, describing design variation effects for high supersonic speeds [AIAA PAPER 70-701] 16 p2841 A70-33563

Maximum thrust nozzles design for rotational or nonequilibrium simple dissociating gas flows, including boundary layer effects [AIAA PAPER 70-707] 16 p2891 A70-33567

Close-spaced nozzles twin jet configuration, achieving low nozzle and total afterbody drag [AIAA PAPER 70-934] 17 p3149 A70-35844

Supersonic air intake unsteady buzz phenomenon, examining shear layer under cowling and boundary layer detachment at shock wave base for design improvement 21 p3744 A70-41262

Concorde downstream thrust reversal nozzle, noting weight saving by use of welded stainless steel honeycomb construction 22 p4092 A70-43213

Axisymmetrical nozzle aerodynamic shape design for conical to axially uniform flow conversion, using method of characteristics 23 p4136 A70-44991

NOZZLE EFFICIENCY

F-106B aircraft in-flight study of airframes installation effects on propulsion system performance at transonic speeds 08 p1437 A70-21732

Aerodynamic performance of axisymmetric body traveling at transonic Mach numbers for predicting installed nozzle flow fields and efficiency [AIAA PAPER 70-700] 16 p2835 A70-33562

NOZZLE EXPANSION

U GAS EXPANSION

U NOZZLE FLOW

NOZZLE FLOW

Nonequilibrium effect of expanding water vapor condensation on supersonic nozzle flows with or without inert carrier gas 01 p0063 A70-10806

Mach numbers, electron density and temperature in partially ionized frozen equilibrium flows of Ar in hypersonic nozzle 01 p0063 A70-10994

Air flow density measurements with interferometer in supersonic square Laval nozzle, showing flow core motion and wave structure 01 p0064 A70-11000

Heat transfer in turbulent boundary layer of airflow injected on smooth plate from nozzle in subsonic stepwise heated wind tunnel 01 p0216 A70-11001

Compressible swirling inviscid nozzle flows approximate solution showing changed choking at throat, axial velocity distributions and reversing in subsonic region 01 p0003 A70-11128

Supersaturated vapor condensation in supersonic nozzles, obtaining flow and droplet growth equations for local equilibrium condition 02 p0279 A70-12049

Swirling flow equations in converging nozzles, comparing analytical and experimental data 03 p0405 A70-12929

Laminar-turbulent transition in free axisymmetric viscous incompressible jet from shaped nozzle and long cylindrical tube 03 p0466 A70-13396

Turbulence in hypersonic nozzle due to two phase flow of ideal gas and solid spherical particles, discussing thermal and dynamic differences 03 p0407 A70-13494

Flow parameters of two interacting submerged turbulent jets from rectangular nozzles, determining total pressure profiles of coincident flow 03 p0466 A70-13504

Difference method for calculating one dimensional nozzle flow and expansion with allowance for relaxation, friction and heat losses, discussing fluorine-hydrogen mixture application 03 p0408 A70-13804

Chaplygin equation solution for wedge flows applied to Rethy flows, evaluating drag coefficient and approximate hodograph equations for subsonic and transonic regimes 04 p0614 A70-14613

Mass flow rate calculation of methane and natural gas mixtures through critical flow nozzles [ASME PAPER 69-WA/FM-4] 04 p0667 A70-14839

Supersonic nonequilibrium two phase flow in Laval nozzle from numerical solution of quasi-linear hyperbolic equations 04 p0617 A70-15229

Supersonic jet flow from diverging nozzle into space with given pressure or into supersonic slipstream, noting barrel shock formation inside jet 04 p0617 A70-15235

Mixed nozzle flows solution complex boundary value problem reducible to Cauchy problem for hyperbolic system with three dependent variables by applying flow stabilization method 04 p0617 A70-15236

Solar wind as one dimensional flow analogous to Laval nozzle flow, discussing rotation and magnetic field effect on model with heat conduction 04 p0754 A70-15352

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/ chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow [AIAA PAPER 69-469] 04 p0732 A70-15423

One dimensional steady adiabatic source nonequilibrium flow of thermally and calorically perfect gas in conical nozzle, considering exit divergence and nonuniform flow effects 04 p0619 A70-15427

Approximate solution for far downstream flow of condensation in hypersonic wind tunnels and nozzles for colloidal thrusters and EHD generators 04 p0621 A70-15600

Inert, oxidizing or reducing fluids wall injection into combustion gas boundary layer of variable composition noting effects on wall temperature 05 p0956 A70-15919

Acoustic intensity determined from time, length and velocity scales in mixing region of jet from nozzle with turbulent boundary layers 05 p0834 A70-16779

Acoustic radiation from underexpanded supersonic main jet flow from nozzle impinged upon by annular jet 05 p0835 A70-16784

Liquid flow through cylindrical slot of constant and variable thickness, calculating flow variations 06 p1034 A70-17630

Nonequilibrium excitation in recombining N plasma nozzle flows [AIAA PAPER 70-44] 06 p1122 A70-18061

Viscous core of incompressible swirling flow through nozzle using momentum-integral equations [AIAA PAPER 70-51] 06 p1038 A70-18079

Exhaust plume from underexpanded sonic and supersonic nozzles including boundary mixing analyzed by approximate model to predict Mach disk location [AIAA PAPER 70-229] 06 p0972 A70-18135

Particle density of jet plumes exhausting in vacuum calculated for He, Ar and N 06 p1052 A70-18388

Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow [AIAA PAPER 69-169] 07 p1249 A70-19310

- Skimmer interaction influences on nozzle beam production explaining intensity maxima, proposing model assuming normal shock across skimmer mouth
07 p1341 A70-20103
- Local heat transfer coefficients for unsteady conditions in tube determined by gradient method, noting use in reacting flow and jet nozzle protection
08 p1598 A70-21189
- Shallow water waves simulation method for studying aerodynamic noise of free jet emitted from nozzle with variable wall roughness
08 p1485 A70-21608
- Mean flow and turbulent velocity over noise-producing regions of subsonic jet nozzle with and without delta wings
09 p1610 A70-22239
- Aerodynamic characteristics of plane straight walled diffusers initial and stabilized flow segments, assuming incompressible fluid and turbulent boundary layer
09 p1659 A70-22430
- Axisymmetric nozzles flow regimes with subsonic ejection velocities analyzed by stabilization method, noting role of pressure in nozzle exit section
09 p1660 A70-22440
- Book on fundamental aspects of solid propellant rockets covering nozzle flow, solid propellants performance, ignition, combustion instability, etc [AGARDGRAPH-116]
09 p1743 A70-22635
- Relaxation time influence on mass output calculation errors for gases in small diameter sonic nozzles
09 p1604 A70-22841
- Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary gas injection into supersonic stream [AIAA PAPER 69-1]
09 p1733 A70-23217
- Dissociative-recombination rate coefficient measured for dissociative recombination reaction in inviscid nozzle flow of reflected shock tunnel, using high temperature and pressure nitrogen
09 p1737 A70-23225
- Injection induced swirl effect on thrust and mass flow through nozzle in spinning rocket, discussing internal and exhaust flow measurements and visualization
09 p1606 A70-23247
- Undried atmospheric air humidity effect on pressure and water vapor supercooling in supersonic wind tunnel nozzles
09 p1606 A70-23613
- Gas flow from nozzle into duct with enlarged cross section investigated for flow pattern and boundary conditions, noting oscillation behavior
10 p1799 A70-24123
- Asymptotic method for aeromagnetic flutter of plane MGD nozzle, discussing conditions of MGD nozzle stability
10 p1800 A70-24129
- External supersonic potential flow effects on turbojet engine ring and needle nozzle performance, considering gas overexpansion operation
10 p1930 A70-24286
- Compressible flow equations of motion applied to incompressible fluid flow through nozzle with eddies and springs
10 p1871 A70-24796
- Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique
11 p1976 A70-25974
- One dimensional compound compressible nozzle flow solution dependence on initial conditions and nozzle geometry, discussing applications to bypass turbojets and solid propellant motors
11 p1976 A70-26137
- Cavity pressure and velocities distributions of interfering two dimensional dual jets from parallel slot nozzles
11 p2037 A70-26419
- Rarefied gas stream density measurements with electron beam fluorescence experiment, determining pressures and densities behind plane shock wave and in supersonic nozzles
11 p2087 A70-26743
- Ducted propellers design with flow accelerating and retarding nozzle analyzed by impulse theory
12 p2155 A70-26876
- Oxygen cation electron dissociative recombination rate coefficient measurement during expanding oxygen flow in nozzle
12 p2276 A70-27802
- Convergent-divergent nozzle operation at low pressure ratios causing separation of internal flow, discussing stability and flow field
12 p2157 A70-28084
- Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate [AIAA PAPER 69-568]
13 p2473 A70-28510
- Numerical method of characteristics for three dimensional supersonic nozzle flow field calculations
13 p2338 A70-28512
- Apparent mass measurements of supersonic jet in incalculable flow regimes, determining dependence on Mach number at nozzle and on distance from exit
13 p2387 A70-28859
- Inviscid thermally nonconducting gas unsteady and steady motions in Laval nozzle of known geometry, obtaining solutions for subsonic, transonic and supersonic regions
13 p2391 A70-29756
- Carbon dioxide jet plumes condensation on model nozzle in vacuum chamber, noting particle size and growth rate
13 p2523 A70-29983
- Liquid metallic particles fragmentation in two phase flow injected into vacuum, noting atomization enhancement by sodium nitrate
13 p2391 A70-29994
- Pseudo one dimensional dissociational nonequilibrium nozzle flows, obtaining equilibrium and nonequilibrium solution through similar transformation of governing equations
14 p2527 A70-30264
- Flow disturbances and side forces in supersonic rocket nozzle due to gaseous secondary injection analyzed by semiempirical models
14 p2629 A70-30756
- Superradiant pulsed 5401 A neon laser for interferograms of gas flow through nozzles in shock tunnel
15 p2750 A70-31763
- Gas-particle efflux from nozzle at critical velocities, noting particle size and concentration effects on inlet pressure
15 p2721 A70-32136
- Steady state one dimensional nozzle flow of reacting inviscid gas mixtures, giving numerical solution procedure for hydrogen-oxygen reactions
15 p2694 A70-32269
- Stationary hydrodynamic equations of gas channel and nozzle flow with inlet tangential discontinuities
16 p2833 A70-33247
- Exhaust nozzle model tests at high subsonic Mach numbers, investigating differences in nozzle drag in contrast to engine conditions
16 p2967 A70-33573
- Flow and diffusion phenomena in rarefied gas mixtures associated with separation nozzle process, using molecular pressure probe and mass spectrometer
16 p2893 A70-33699
- Operation modes of nozzles with emerging pointed and central bodies, discussing external flow effects on internal performance
16 p2970 A70-33760
- Thin wire Langmuir probe measurements of electron temperature and density in transition and free molecular nozzle flow of short duration reflected shock tunnel
16 p2912 A70-33864
- Inviscid air nonequilibrium shock layer properties correlation based on plenum entropy, predicting composition of downstream converging-diverging nozzle expanding air flow [AIAA PAPER 70-866]
16 p2838 A70-33909
- ATS-C satellite rocket exhaust plume convective heating measurements of VHF whip antennas, discussing nozzle flow and heating rate [AIAA PAPER 70-843]
16 p3000 A70-33926
- Nonequilibrium combustion products and condensables containing reactive multiphase rocket nozzle flows and exhaust plumes characterization using generalized kinetics streamtube program [MGKS/ [AIAA PAPER 70-845]
16 p3001 A70-33928
- Boundary layer formation on walls of conical pressure nozzle during vortex flow
16 p2896 A70-34299
- Rocket chambers combustion products isentropic expansion effects within nozzle on dissociation degree, assuming shifting and frozen equilibria
16 p2963 A70-34341
- Low Reynolds number flow inside Delaval nozzle, examining gas density and rotational temperatures by electron beam techniques
17 p3065 A70-34454
- Vibrational nonequilibrium nozzle flow problems, obtaining similar solutions for various initial conditions and nozzle geometries [AIAA PAPER 70-804]
17 p3065 A70-34459
- Convergent-divergent nozzle flow under influence of friction drag, determining heat transfer rate as function of nozzle geometry
17 p3194 A70-34694
- Optimum nozzle geometry for minimum heat transfer to convergent-divergent nozzle wall from high enthalpy flow
17 p3196 A70-35238
- Nonequilibrium nozzle flows involving molecular vibrational energy relaxation and composition changes from gas phase chemical reactions respectively
17 p3071 A70-35469
- Conical expansion nozzles manufacturing errors effect on flow expansion considered for large Mach numbers
17 p3011 A70-35662
- Real gas effects in blowdown analysis of leakage through choked nozzle in air flask
17 p3073 A70-35670
- Steam-water jet discharge heat transfer features, examining critical region parameters from nozzle into submerged space with large counterpressure
18 p3345 A70-36117
- Compressible flow of two component two phase mixtures through convergent nozzles and orifices, determining initially or annular dispersed flow patterns
18 p3239 A70-36231
- Gas particle mixtures nozzle flow at high loading ratios
18 p3208 A70-36693
- Method of characteristics for two dimensional steady supersonic gas flows with foreign particles in plane and axisymmetric nozzles
18 p3210 A70-37228
- Noise spectra of two dimensional jet flowing from nozzle ejector, using dispersion equation
19 p3354 A70-38662
- Rocket attitude stabilization using exhaust gas flow spinning plug nozzle as gyroscopic mass [AIAA PAPER 70-67]
20 p3715 A70-39562
- Convergent-divergent nonequilibrium nozzle flow numerical solution by time dependent technique, investigating rapid vibrational nonequilibrium supersonic expansion of gas mixture with population inversion
20 p3609 A70-39655
- Ion concentrations in premixed propane-air two dimensional laminar nozzle burner flames with seeding, discussing dependence on temperature and equivalence ratio
21 p3772 A70-40880
- Perfect gas irrotational isentropic nozzle flow by solving partial differential equations set
21 p3744 A70-41240
- Axisymmetric jet plasma flow in magnetic nozzle, measuring electric potential, electron temperature and ion density and velocity
21 p3856 A70-41380
- Heat transfer and friction effects on flow parameters in nozzle with independent cooling
21 p3951 A70-41769
- Viscous gas flow through Laval nozzle, calculating velocity coefficient and pressure recovery in contracting and expanding parts
21 p3746 A70-41774
- Inviscid thermally nonconducting gas unsteady and steady motions in Laval nozzle of known geometry, obtaining solutions for subsonic, transonic and supersonic regions
21 p3811 A70-42074
- Two layer gas flows in supersonic axisymmetric nozzles, using method of characteristics
21 p3748 A70-42210
- Acoustic waves generation from decay region of pulsating supersonic jet expelled from nozzle
21 p3748 A70-42211
- Stagnation temperature of two phase nozzle gas jet containing solid particles on particle density and velocity
21 p3748 A70-42220
- LF acoustic disturbances effect on root portion of turbulent jet from conical nozzle
21 p3954 A70-42223
- Equilibrium sonic velocity in reacting gas mixture in nozzle flow for unlimited species and independent chemical reactions
22 p4074 A70-42753
- Nonequilibrium gasdynamic and thermodynamic properties of chemically reacting gas mixtures in high expansion subsonic and supersonic nozzles for selected rocket propellants
22 p3982 A70-42761
- Computerized nonequilibrium thermochemical gas dynamic solutions for nozzle, shock tube and stream tube flow with arbitrary species and kinetic reactions numbers
22 p3982 A70-42762
- Cavitation characteristics of jet nozzles, formulating relationship between pressure differential and fluid flow rate
22 p3965 A70-43369
- Wave drag due to swirling flow through convergent-divergent nozzle, deriving approximate solution for specified nozzle shape at various swirl ratios
23 p4179 A70-43971

NOZZLE GEOMETRY

- Monograph on aircraft aerodynamic nozzle asymmetry effects for pressure drag reduction in critical conditions
03 p0465 A70-13003
- Annular nozzle shapes established via method of straight line characteristics, noting flow patterns at various regions
03 p0409 A70-13872
- Ablative throat nozzle performance, plotting change in thrust, exit pressure and Mach number as function of ablated to initial area ratio
03 p0410 A70-14336
- Discrete components in noise spectrum of heated and unheated supersonic air jets, using axisymmetric and conical nozzles
04 p0618 A70-15247

Exit geometry effects on peripheral jet device lift, considering operating height, curtain thickness, base extension, etc

04 p0619 A70-15388

Free plane turbulent jet virtual origin using tests determining influence of upstream conditions and nozzle shape

04 p0674 A70-15554

Air inlet and exhaust nozzle form and location effect in afterburning turbofan engines, discussing stalling, afterburner blowouts and thrust losses prevention

05 p0895 A70-15807

Aerobell extendible nozzle rocket engine design and performance, cold flow and simulated hot flow test results

[AIAA PAPER 69-4] 06 p1129 A70-17168

Vortex refrigerators characteristics, examining configurations with cylindrical and conical hot ends with and without diffuser

06 p0988 A70-17855

Liquid propellant rocket nozzle configurations maximum stress and stability limits using computer program for composite ring-stiffened shells of revolution

[AIAA PAPER 70-138] 06 p1014 A70-18053

Circular nozzle contraction and Reynolds number effects on turbulent pulsation damping, measuring longitudinal and transverse components

07 p1259 A70-19830

Supersonic molecular beam source operation, discussing dominant degradation factors and nozzle beam generation intensities and energies improvement

07 p1341 A70-20104

Condensation start dependence on air humidity at inlet and nozzle geometry applied to supersonic wind tunnel using undried atmospheric air

09 p1606 A70-23614

Three dimensional supersonic nozzle geometry optimization using Lagrange multipliers and iteration for solving variational problem

10 p1798 A70-24115

Nozzle fuel and air system geometrical parameters to determine mean diameter of fuel droplets, dispersion angle and spectrum and flame jet shape

10 p1930 A70-24295

Interior ballistics for wide temperature throttling of solid propellant rockets by variable-throat-area nozzle, noting composition effect screening

11 p2103 A70-26154

Base pressure effects on cone angle of fixed length conical nozzle yielding maximum thrust

11 p1977 A70-26156

Rao optimization method for thrust nozzles at given length, analyzing control surface flow field conditions

12 p2158 A70-28202

Supersonic jet spoilers flow fields with various nozzle shapes to determine secondary jets penetration depth and mixing in wake

13 p2338 A70-28480

Configurations stress stability liquid propellant rocket nozzle analysis by BOSOR 3 digital program, describing mathematical model construction

13 p2508 A70-28509

Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement

[AIAA PAPER 69-570] 13 p2538 A70-28511

Forward inclined two dimensional circular arc slot nozzle jet flaps at hypersonic speeds, considering amplification and interaction processes

13 p2340 A70-29018

Auxiliary inlet ejector and plug nozzle flight performance, describing design variation effects for high supersonic speeds

[AIAA PAPER 70-701] 16 p2841 A70-33563

Operation modes of nozzles with emerging pointed and central bodies, discussing external flow effects on internal performance

16 p2970 A70-33760

Convergent-divergent nozzle flow under influence of friction drag, determining heat transfer rate as function of nozzle geometry

17 p3194 A70-34694

Optimum nozzle geometry for minimum heat transfer to convergent-divergent nozzle wall from high enthalpy flow

17 p3196 A70-35238

Constant chamber pressure thrust throttling of expansion-deflection rocket nozzle, calculating wall static pressure and thrust by characteristic method, discussing performance

[AIAA PAPER 69-435] 17 p3149 A70-35655

Nozzle geometry effects on turbine gas ejector characteristics

21 p3867 A70-41765

Plasma arc welding torches nozzle dimensions and shape dependence on thermal and electrical characteristics, optimizing energy output

22 p4042 A70-42378

Starting shock and contact surface measurement reflection nozzle, using HF spark camera and interference techniques

[SMPT PREPRINT 89] 22 p3959 A70-43064

Radial flow microturbines deflection and wave losses in circular nozzle ring oblique exit section

22 p3965 A70-43359

Nonuniform flow parameters for maximum thrust in nozzle, discussing specific impulse determination

22 p3960 A70-43366

Variable geometry radial inflow turbine performance estimation based on one dimensional flow theory

22 p3960 A70-43738

Two stream ejector type propelling nozzles for supersonic aircraft, investigating various configuration effects over range of secondary/primary air flow ratios

[ICAS PAPER 70-48] 23 p4133 A70-44145

Contoured nozzle shock tunnel condensation point, determining flow supercooling over specified pressure range

23 p4182 A70-44588

Radial inflow turbine optimum design geometry, calculating nozzle and rotor geometrical parameters efficiency

24 p4395 A70-46012

NOZZLE INSERTS

Low cost fabrication for solid rocket nozzles using carbon or graphite reinforcements in throat inserts

[SAE PAPER 700796] 24 p4349 A70-45897

NOZZLE THRUST COEFFICIENTS

Installed thrust vector for scarfed attitude control nozzles flush mounted with spacecraft cylindrical surface, predicting pressure distributions for internal thrust

06 p1154 A70-17167

Transonic flow in convergent and convergent-divergent conical nozzles with nonuniform inlet predicted by time dependent flow equations, discussing discharge and thrust coefficients

[AIAA PAPER 70-635] 16 p2834 A70-33548

Turbofan engine gross thrust dependence on nozzle pressure ratio and simulated flight Mach number, considering altitude chamber test data

[AIAA PAPER 70-612] 16 p2969 A70-33608

NOZZLE WALLS

Graphite rocket engine nozzles chemical erosion at various temperatures, comparing reaction and diffusion rates

03 p0516 A70-13619

Boundary layer formation on walls of conical pressure nozzle during vortex flow

16 p2896 A70-34299

Nozzle wall hypersonic turbulent boundary layers at free stream Mach number using pitot, hot wire, and wall fluctuation and static pressure measurements

[AIAA PAPER 70-746] 17 p3065 A70-34497

Real gas transonic flow transition through critical velocity in Laval nozzle, examining reasons for increment of viscosity and heat conduction effects

18 p3239 A70-36217

Jet flow reattachment to walls of various shapes, measuring undeveloped velocity profiles at nozzle exit

[ASME PAPER 70-FLCS-2] 22 p4008 A70-42429

U NRX REACTORS

U NUCLEAR ENGINE FOR ROCKET VEHICLES

NUCLEAR AUXILIARY POWER UNITS

NT SNAP

NT SNAP 8

NT SNAP 19

NT SNAP 27

NT SPACE POWER UNIT REACTORS

Guidebook on application of space nuclear power systems covering radioisotope and reactor systems, static and dynamic systems, power system suppliers and users, etc

01 p0140 A70-10942

Weights, sizes and costs of nuclear and nonnuclear spacecraft power systems with reference to mission duration

11 p2082 A70-26260

NUCLEAR BINDING ENERGY

Symmetry energy of infinite nuclear matter calculated for cases of constant density and minimum saturation energy by density variation, considering finite compressibility effects

01 p0148 A70-11105

Nonequilibrium and equilibrium schemes studies of nuclear symmetry energy of finite nuclei, discussing binding energy of nuclei with neutron excess

01 p0148 A70-11106

Thermal fluctuations effect on Josephson tunnel contact binding energy and external magnetic field dependence

24 p4388 A70-45203

NUCLEAR CAPTURE

NT ELECTRON CAPTURE

NUCLEAR CHEMISTRY

Reagent translational energy effect on dynamics of ionic and atomic reactions, using nuclear recoil and chemical accelerator methods

11 p1995 A70-26005

NUCLEAR ELECTRIC POWER GENERATION

NT NUCLEAR AUXILIARY POWER UNITS

NT NUCLEAR ENERGY

NT NUCLEAR POWER PLANTS

NT NUCLEAR POWER REACTORS

NT SNAP

NT SNAP 8

NT SNAP 19

NT SNAP 27

NT SPACE POWER UNIT REACTORS

Rankine cycle technology concerning high temperature, refractory alloy and liquid metal experience, showing applicability to nuclear Brayton and thermionic power systems

02 p0229 A70-12513

Nuclear converter with porous metal adsorption reservoir working with or without liquid cesium

10 p1915 A70-25039

Rankine 10 MWe nuclear electric space power system design, discussing reactor power, fuel, coolant, structural material, control system, shield, etc

11 p2082 A70-26123

Brayton, Hg, organic-Rankine and potassium-Rankine dynamic space power systems for use with nuclear energy sources

13 p2450 A70-29492

Spacecraft electric power supplied by isotope nuclear sources, discussing heat sources, energy converters and heat rejection systems

14 p2616 A70-31147

Nuclear space power three stage potassium turbine erosion testing in stainless steel loop with various contamination levels

21 p3756 A70-41005

Aerospace nuclear applications - Conference, Huntsville, Alabama, April 1970

22 p4069 A70-43177

Brayton, Hg, organic-Rankine and potassium-Rankine dynamic space power systems for use with nuclear energy sources

22 p4071 A70-43189

Space nuclear power system design and operation related to safety, discussing SNAP flights

22 p4071 A70-43192

NUCLEAR ELECTRIC PROPULSION

Performance boundaries of space propulsion systems containing nuclear electric stages

[AIAA PAPER 69-249] 01 p0196 A70-10839

Unmanned nuclear electric propelled spacecraft using reactor with liquid metal MHD power conversion system

20 p3566 A70-40016

NUCLEAR EMULSIONS

Cosmic ray electron spectrum above 200 Gev based on pure nuclear emulsion stack using horizontal sandwich assembly

06 p1135 A70-17473

Primary cosmic ray electron flux above 30 GeV, using nuclear emulsion plate chamber

19 p3504 A70-38110

Carbon isotopic composition in primary cosmic radiation by nuclear emulsions exposure in balloon flights

19 p3507 A70-38129

Upper limit to primary deuteron flux and path length in space, using emulsion stack exposed near geomagnetic equator during minimum solar activity

22 p4093 A70-42673

Electronographic camera for ultrahigh speed photography, using nuclear emulsion as recording medium

[SMPT PREPRINT 54] 22 p4033 A70-43039

Cosmic ray jet studies, evaluating nuclear emulsion technique

22 p4096 A70-43399

NUCLEAR ENERGY

Solar, nuclear, chemical and thermal energy sources for short and long duration exploration on moon

14 p2634 A70-30195

NUCLEAR ENERGY LABORATORIES

U LABORATORIES

U NUCLEAR RESEARCH

NUCLEAR ENGINE FOR ROCKET VEHICLES

- Air backflow in nuclear exhaust system duct for ground testing of NERVA engines, noting overpressure effect
[AIAA PAPER 69-325] 06 p1027 A70-17174
- NERVA nuclear rocket engine design for Saturn 5 third stage, comparing nuclear and chemical engines performance
12 p2270 A70-26871
- Nerva nuclear subsystem diagnostics and control instrumentation, discussing transducers
[AIAA PAPER 70-659] 16 p2949 A70-33551
- NERVA rocket engine program reliability, design, performance and managerial approaches
[AIAA PAPER 70-711] 16 p2950 A70-33568
- Vapor fraction dependence on liquid hydrogen propellant outflow during NERVA operation under stored gas or autogenous pressurization, using computer simulation
[AIAA PAPER 70-677] 16 p2950 A70-33578
- NERVA engine chamber pressure control, investigating replacement of TPCV with fluidic vortex valve
[AIAA PAPER 70-658] 16 p2970 A70-33620
- NERVA XE-Prime test series, discussing computer simulation, full power and high specific impulse operation and startup under varying initial conditions
[AIAA PAPER 70-709] 16 p2951 A70-33950
- NERVA flight engine operating characteristics and reliability requirements for missions, noting conditioning, startup shutdown, reactor cooldown, fuel consumption, etc
[AIAA PAPER 70-676] 16 p2951 A70-33951
- Multiorbit injection earth departure technique for optimal thrust-weight ratio in manned interplanetary missions using NERVA engine
[AAS PAPER 70-039] 17 p3175 A70-34780
- NERVA engine operational cycle and performance, discussing startup, thrust buildup and shutdown
17 p3135 A70-35653
- Post Apollo space research, discussing Saturn Workshop/Skylab, Nerva nuclear rocket engine and international cooperation
21 p3956 A70-41496
- NERVA nuclear rocket reactors, considering NRX and XE technology tests
22 p4069 A70-43178
- Mathematical model avoiding repetitive tests costs for Nerva nuclear rocket engine
22 p4070 A70-43179
- NERVA nuclear rocket engine design technology program, discussing probabilistic techniques for reliability engineering
[SAE PAPER 700801] 24 p4377 A70-45910
- NERVA reactor technology applied to closed Brayton cycle MHD power system
[AIAA PAPER 70-1225] 24 p4377 A70-45956
- ## NUCLEAR EXPLOSION EFFECT
- Shock and thermal metamorphism of olivine trachybasalt by nuclear explosion at Nevada test site
05 p0843 A70-16946
- Redistribution of geomagnetically trapped 55 Mev protons by Starfish nuclear explosion, discussing hydromagnetic wave interactions and multiple reflections from magnetic field inhomogeneity
06 p1137 A70-18531
- Nuclear environments determination methodology for ground military equipment hardening, considering personnel and equipment responses to detonation in atmosphere
12 p2271 A70-27097
- Electromagnetic pulse generator for simulation of EMP associated with nuclear explosions, describing electronic equipment vulnerability testing
12 p2208 A70-28135
- Artificial aurora generated by Starfish in northern conjugate region and afterglow spectra
14 p2578 A70-31245
- Solar constant measurements by high altitude balloon sounding, noting anomalous turbidity in upper atmospheric layers due to nuclear explosions and volcanic eruptions
20 p3703 A70-39375
- Quasi-periodic ionospheric oscillations associated with nuclear explosions, thunderstorms and quiet conditions
21 p3814 A70-40938
- Artificial injection of trapped electrons into geomagnetic field by low altitude nuclear explosions, examining electron flux and energy
21 p3816 A70-41086
- ## NUCLEAR EXPLOSIONS
- ### NT THERMONUCLEAR EXPLOSIONS
- Backscattering from rough surface of nuclear fireball measured by two way directive radar antenna on reentry vehicle
09 p1634 A70-22703
- Silicon monolithic integrated circuits technology for radiation environment near nuclear detonation
09 p1647 A70-23076
- Hydrodynamic energy flow down horizontal tunnel from nuclear explosive detonated underground, recording shock front luminosity and time of arrival
10 p1857 A70-23985

- Fireball role in N-N interactions at primary cosmic ray energies, using fireball model to explain particle production
13 p2476 A70-28913
- ## NUCLEAR FISSION
- Tektites age from fission track method, discussing elimination technique for strain caused spurious tracks
13 p2488 A70-28721
- Fission track uranium distribution studies of Apollo 11 lunar volcanic rocks, using Lexan plastic print method
21 p3900 A70-41537
- ## NUCLEAR FORCES
- ### U NUCLEAR BINDING ENERGY
- ### NUCLEAR FUEL ELEMENTS
- Thermal mapping vacuum chamber tests of nuclear fuel capsules for lunar surface experiments, using remote IR radiometric microscope
15 p2718 A70-32800
- Thermionic reactor program for electric propulsion, considering internally fueled flashlight concept
[AIAA PAPER 70-1108] 20 p3568 A70-40235
- ## NUCLEAR FUELS
- Precision machining and repair of radioactive Plum Brook Reactor core fuel grid
01 p0140 A70-10322
- Dimensional measurements of nuclear fuel cylindrical specimens by scanning neutron radiographic negative with microdensitometer, taking into account specimen geometry and neutron cross section
15 p2735 A70-31769
- Ground test reactor design based on colloid fueled reactor concept
[AIAA PAPER 70-688] 16 p2950 A70-33587
- Turbulent coaxial flow analysis predicting fuel volume fraction in gas core nuclear rocket reactor cavity, using free-jet computer code and eddy viscosity equation
18 p3290 A70-36560
- Optimum fuel utilization for Plum Brook Reactor, using criticality data for effects of neutron leakage and burnup uniformity in core point model
20 p3671 A70-39110
- Aeromechanical characteristics of colloidal fuel core nuclear reactor in relation to cavity geometry and propellant gas injection
[AIAA PAPER 70-1222] 24 p4377 A70-45958
- ## NUCLEAR FUSION
- ### NT CONTROLLED FUSION
- Three mode galactic age model for nucleosynthesis of solar radioisotopic material produced by r-processes
01 p0182 A70-10720
- Steady state deuterium-tritium fusion reactor approximate parameters prediction possibility based on interim assumptions of plasma confinement, model, etc
02 p0349 A70-12755
- Nuclear fusion reactions by focused Q switched Nd doped laser beam on deuterium target, discussing neutrons from flowing plasma, electron temperature and counter experiments
03 p0501 A70-13684
- Fusion reactions generation by high power laser beams focused on solid deuterium target
05 p0857 A70-15992
- He to carbon fusion reaction rate enhancement in dense matter by inelastic scattering processes, discussing C 12 deexcitation to ground state
05 p0885 A70-16934
- Soviet collection of papers on magnetic traps covering chamber walls effect on plasma heating, plasma in mirror trap and self sustained fusions
07 p1350 A70-19844
- Emission containment and working temperature reduction possibility in thermonuclear reactor by increasing plasma densities and introducing large atomic number contaminants
07 p1350 A70-19847
- Self sustained fusion reaction in dense deuterium-tritium plasma, considering large atomic number contaminants optimal concentration calculations
07 p1351 A70-19848
- Iron peak nuclei synthesis by charged particles under supernova mechanism conditions predicted by hydrodynamic conditions
09 p1749 A70-21994
- Preplanetary matter irradiation by solar particles, noting isotopic abundances for evidence of nucleosynthesis induced by proton and alpha bombardment
13 p2486 A70-28619
- Galactic cosmic ray actions on interstellar medium for origin of Li, Be and boron in stellar atmospheres and solar system
14 p2640 A70-30786
- O-Of stellar evolution yielding Wolf-Rayet type, considering spectral evidence and H-He interaction
15 p2800 A70-32202
- Galactic composition differences, considering stellar and galactic nucleosynthesis
16 p2976 A70-33791
- Nucleosynthesis in supernova models based on neutrino energy transport
17 p3153 A70-34529

- Laser applications in thermonuclear fusion, analyzing plasma acceleration under laser pulse action
18 p3265 A70-36110
- Heavy cosmic ray abundance attributed to thermal nucleosynthesis during silicon burning at high temperature and density
19 p3507 A70-38132
- Nuclear fusion realization by focusing from intense beam neodymium glass laser
19 p3447 A70-38167
- Laser beam and matter interaction models for positive energy balance in nuclear fusion, obtaining Lawson criterion
19 p3447 A70-38168
- Explosive nucleosynthesis as heavy nuclei source for stars
20 p3712 A70-40426
- Nuclear fusion reactor spacecraft propulsion system using ion rocket with charged deuterium nuclei fuel, emphasizing nuclear plasma confinement problem
21 p3867 A70-41498
- Stellar surface and solar system light element abundances, explaining formation by energetic proton flux nucleosynthetic effect
24 p4398 A70-46163
- Atmospheric composition of cool stars in relation to nucleosynthesis and galactic evolution
24 p4414 A70-46227
- ## NUCLEAR GYROSCOPES
- Unconventional gyros, discussing nuclear magnetic resonance, induction, cryogenic, electrostatic and laser technology
03 p0481 A70-12960
- Quantum gyroscopic theory for instrument design
16 p2927 A70-33229
- ## NUCLEAR INTERACTIONS
- ### NT ELECTRON CAPTURE
- ### NT SPIN-ORBIT INTERACTIONS
- Angular distribution of muon poor extensive air showers flatter than normal showers, discussing initiation by passive particles produced by cosmic ray atmospheric nuclei
02 p0357 A70-12079
- Cosmic ray nuclear interactions under paraffin and lead, using counter controlled multilayer cloud chamber
03 p0553 A70-12877
- Cosmic ray particles inelastic nuclear interactions mean free path in iron measured in Wilson chamber and ionization calorimeter
03 p0554 A70-13030
- Interacting meson systems effective masses with/without secondary proton measured, detecting heavy boson resonances and fireballs, considering proton nuclear interactions
03 p0472 A70-13031
- Pion and nucleon interactions with atomic nuclei at 200 Gev using Wilson chamber and ionization calorimeter, determining pion collisions characteristics
03 p0555 A70-13034
- High energy muon production and interaction, analyzing ionization burst spectra
03 p0555 A70-13037
- Light-gathering amplitude and intrinsic resolution of large-area flat scintillation detectors used for cosmic rays-nuclear interaction experiments at high energies
03 p0484 A70-13466
- Pionic transition in Ni isotopes to measure nuclear interaction effects, observing level shift and broadening
05 p0885 A70-16682
- Neutron and proton distributions rms radii in nuclei by optical model analysis of low energy pion-nucleus interactions
07 p1337 A70-19360
- Neutron formation multiplicity during capture of cosmic ray muons by Zn and Sb nuclei, noting agreement with one-third law
08 p1560 A70-20718
- Cross sections measured for symmetric p, 2p/ reactions on deuterium and He, discussing nonsymmetric p, 2p/ events in He
08 p1548 A70-21233
- Equation of state for cold matter at neutron star densities, deriving equilibrium equations for nuclear interactions among hadrons
09 p1764 A70-23606
- Neutron star models based on equation of state for cold degenerate matter, taking into account nuclear forces and clustering
09 p1764 A70-23607
- Cosmic radiation low energy positrons flux estimation compared with calculation from solar modulation models
10 p1932 A70-24537
- Rare earth energy band structure effect on RKKY magnetic interaction between atomic spins
13 p2472 A70-29799
- Th 232 and U 238 pionic X ray energies and widths, suggesting anomalous effect for interaction between high-Z nuclei and pion
15 p2776 A70-31738

Electrons lateral distribution in large air showers determining inelasticity of high energy nuclear interactions

18 p3305 A70-35947
Nuclear-electromagnetic cascades longitudinal development in glass, Fe and W absorbers, presenting Monte Carlo simulation

18 p3293 A70-36895
Galactic cosmic rays lifetime based on nuclei and matter interactions, discussing ionization losses effect

20 p3695 A70-38965
Muonic atoms nuclear excitation in Zn 66 and 68

20 p3674 A70-39221

NUCLEAR ISOBARS

Pion production characteristics during high energy nucleons interactions from data on production in upper atmosphere by gamma-quanta families /isobaric production/

03 p0555 A70-13032

NUCLEAR MAGNETIC RESONANCE

NT PROTON MAGNETIC RESONANCE

NT PROTON RESONANCE

Transient magnetic resonance technique for non-destructive testing of elements with nuclei having magnetic moment, considering cereal grains, propellants, metal powder and plastics

01 p0097 A70-10014

Sq data acquisition and analysis, noting automatic standard observatories using nuclear magnetometers and ionospheric current information from instrumented rockets

01 p0075 A70-10597

Flowmeter errors caused by nuclear magnetic relaxation decreased with increasing magnetic field strength of NMR sensor

01 p0091 A70-10981

Nutational NMR nonuniform magnetic field stabilizer for beta spectrometer, structural details and circuit schematic

03 p0485 A70-13467

Te nuclear magnetic resonance in amorphous semiconducting sample cycled between conducting and nonconducting states

08 p1557 A70-21697

Spin-lattice NMR and EPR relaxation time measurements, using train signals and free induction decays

09 p1679 A70-22995

Helium melting pressure curve to calibrate cerium magnesium nitrate or NMR low temperature thermometers

09 p1728 A70-22999

Shift in nuclear paramagnetic resonance frequency of ligand nuclei in ferromagnets above Neel temperature

10 p1928 A70-24826

Shift in nuclear magnetic resonance, investigating transferred hyperfine coupling near Neel temperature for magnetic and nonmagnetic systems

10 p1928 A70-24827

Precise sweep calibrations and simultaneous spectrum recording for high resolution nuclear magnetic resonance spectroscopy

11 p2052 A70-26375

High sensitivity magnetometers based on magnetic nuclear resonance with electronic pumping

13 p2414 A70-30039

Nuclear magnetic resonance magnetometers performance using dynamic polarization by electronic pumping

13 p2414 A70-30040

Microwave oscillator by transposing principle of spin oscillator at low frequencies in nuclear magnetic resonance in X band

16 p2877 A70-33413

Frequency locking and control of autodyne oscillating NMR detector for signal averaging

21 p3827 A70-41454

Drift reducing NMR stabilization of Hall regulated electromagnet, applying error signal to bias coil

21 p3827 A70-41456

NMR spin-spin coupling constants between vinyl protons in cyclopentadiene, 1,3-cyclohexadiene and 1,3-cyclooctadiene from spectrum analysis

21 p3780 A70-41704

Chondritic meteorites electron and nuclear magnetic resonance spectra at various frequencies

23 p4239 A70-43897

Al-27 NMR saturation effects on ruby electron cross relaxation and inversion

23 p4230 A70-43932

NUCLEAR METEOROLOGY

Induced nuclear processes role in radiogenic Ne-21 production in earth atmosphere

12 p2227 A70-28367

NUCLEAR PARTICLES

NT ALPHA PARTICLES

NT ANTINEUTRINOS

NT ANTIPARTICLES

NT BETA PARTICLES

NT BOSONS

NT HYPERONS

NT MESON RESONANCES

NT MESONS

NT NUCLEONS

NT PHOTONS

NT PIONS

NT POSITRONS

Cosmic ray protons, He nuclei and electrons solar modulation by betatron deceleration mechanism during interplanetary space passage

02 p0357 A70-12123

Fossil nuclear particle tracks in extraterrestrial matter using high voltage electron microscope and chemical etching

19 p3519 A70-38031

Rigidity spectra of primary cosmic ray nuclei groups from satellite-borne Cerenkov spectrometer

19 p3508 A70-38135

Nuclear particle tracks in Apollo 11 samples due to galactic cosmic rays and solar flares relationship to dynamic surface processes

21 p3914 A70-41648

NUCLEAR PHYSICS

NT BOHR THEORY

NT FIELD THEORY (PHYSICS)

NT PLASMA PHYSICS

NT QUANTUM THEORY

Symmetry energy of infinite nuclear matter calculated for cases of constant density and minimum saturation energy by density variation, considering finite compressibility effects

01 p0148 A70-11105

Instrumentation system for nuclear experiments on scientific satellites allowing highest priority event selection during telemetry sequence and periodic change of priority order

03 p0453 A70-13024

Matrix elements systematic calculation method in terms of inelastic transition densities to evaluate nuclear properties

04 p0723 A70-15634

Book on nuclear and astrophysical aspects of cosmic rays covering kinematics in collisions and decays, cascade theory, high energy interactions, origin, etc

07 p1368 A70-19666

Nuclear science and nuclear power systems engineering - IEEE Conference, San Francisco, October 1969

12 p2232 A70-27401

Cryogenics and nuclear physics, discussing particle beam handling magnets, superconducting accelerators, detectors, moderators, low temperature irradiation facilities, etc

14 p2616 A70-31014

NUCLEAR POWER

U NUCLEAR ENERGY

U NUCLEAR POWER GENERATION

U NUCLEAR ELECTRIC POWER GENERATION

U NUCLEAR POWER PLANTS

Aircraft impact against nuclear containment vessel and associated structures for dangers in vessel-nuclear power station collisions

11 p2144 A70-26683

Nuclear science and nuclear power systems engineering - IEEE Conference, San Francisco, October 1969

12 p2232 A70-27401

Cold working effects on Zircaloy tubes mechanical properties and hydride orientation, discussing tubes use in nuclear power stations

17 p3123 A70-34645

NUCLEAR POWER REACTORS

NT SNAP 8

NT SPACE POWER UNIT REACTORS

Nuclear power systems for manned orbiting space stations, noting Brayton aggregate and NASA objectives

13 p2450 A70-29493

Ground test reactor design based on colloid fueled reactor concept

[AIAA PAPER 70-688]

16 p2950 A70-33587

Nuclear power systems for manned orbiting space stations, noting Brayton aggregate and NASA objectives

22 p4071 A70-43193

NERVA Technology Reactor design integrated with Brayton cycle space power conversion systems, considering space bases and shielding analysis

[AIAA PAPER 70-1226]

24 p4377 A70-45955

NUCLEAR PROPELLED AIRCRAFT

Nuclear propulsion systems types, discussing relative capabilities and future roles in aerospace applications

11 p2082 A70-26055

Heat pipes in nuclear aircraft propulsion system, describing core, heat exchangers, and reactor to jet engine heat transport system

[AIAA PAPER 70-662]

16 p2950 A70-33623

High temperature liquid metal cooled nuclear reactor for military aircraft with long flight endurance and range

22 p4071 A70-43188

NUCLEAR PROPULSION

NT NUCLEAR ELECTRIC PROPULSION

Shield mass optimization of low thrust nuclear powered space vehicle for occupant shielding against reactor radiation

03 p0523 A70-13575

Ar plasma interaction with concentric cool hydrogen sheath for simulation study for gaseous core nuclear space propulsion system

03 p0536 A70-14375

Nuclear and electric propulsion systems performance, considering applications in future European space activities

05 p0897 A70-16898

Rankine cycle two loop Li boiling Ka facility for nuclear turbopump simulation, studying alkali metal corrosion for operation with and without hot traps

[AIME PAPER F-69-1]

07 p3104 A70-18809

Nuclear propulsion requirements for manned landing mission to Mars assuming Saturn 5-based operation

07 p1375 A70-18874

Book on spaceflight propulsion covering jet thrust, energy release, chemical, nuclear and electric propulsion, transportable and environmental systems

09 p1742 A70-22202

NASA future space programs, discussing space shuttle and station, nuclear propulsion, manned Mars landing, unmanned Venus-Mercury probes, etc

09 p1762 A70-23065

Algorithm for propellant flow rate increase of nuclear rocket in minimum time without exceeding maximum allowable stress in reactor core

10 p1914 A70-24870

Technological feasibility, economical and operational compatibility of subsonic aircraft nuclear propulsion /ANP/ compared with conventional propulsion systems

11 p2081 A70-26050

Interstellar transport vehicles design around thermodynamic propulsion plants, discussing weight, mission velocity, acceleration time and fuel costs

11 p2123 A70-26054

Nuclear propulsion systems types, discussing relative capabilities and future roles in aerospace applications

11 p2082 A70-26055

Nuclear pulse propulsion system for manned missions to outer planets of solar system, discussing energy and travel time requirements

11 p2082 A70-26059

Lunar and planetary exploration costs and technology, discussing role of nuclear propelled passenger vehicles

11 p2082 A70-26061

Rankine 10 MWe nuclear electric space power system design, discussing reactor power, fuel, coolant, structural material, control system, shield, etc

11 p2082 A70-26123

Optimal control of nuclear propulsion and energetic plants of space vehicle, considering thermionic generator

13 p2450 A70-28436

High temperature energy systems with plasma reactors and inductive MPD converters, discussing spacecraft propulsion and ground based pollution-free power generation

15 p2791 A70-32278

Reusable ferry spacecraft program, discussing space shuttles, cost reduction and nuclear propulsion for deep space missions

15 p2791 A70-32300

Fluid mechanics and engine dynamics and start-up experiments simulating thermal environment in nuclear light bulb engine

16 p2949 A70-33552

Nuclear orbital launch stages for interplanetary departure, comparing parallel and tandem spacecraft configurations

[AIAA PAPER 70-680]

16 p2950 A70-33580

Metal corrosion effects in Rankine cycle lithium-boiling potassium test loop simulating working fluids of spacecraft nuclear turbopump propulsion system

16 p2933 A70-34204

Reusable nuclear shuttle /RNS/ for space program providing low cost transportation beyond earth orbit

[AIAA PAPER 70-679]

17 p3174 A70-34512

Future manned planetary missions with reusable nuclear shuttles, comparing operating modes in terms of propellant requirement, costs, complexity, etc

[AAS PAPER 70-040]

17 p3155 A70-34781

Low thrust high impulse nuclear and electric space propulsion systems, discussing performance capabilities for space missions

18 p3290 A70-36566

Nuclear fusion reactor spacecraft propulsion system using ion rocket with charged deuterium nuclei fuel, emphasizing nuclear plasma confinement problem

21 p3867 A70-41498

Aerospace nuclear applications - Conference, Huntsville, Alabama, April 1970

22 p4069 A70-43177

Plasma accelerators for nuclear EM propulsion, considering power supply requirements and differences between plasma and ion engines

22 p4070 A70-43186

Nuclear electric space propulsion, emphasizing systems uncertainties and cost aspects

22 p4070 A70-43187

NUCLEAR RADIATION

NT BETA PARTICLES
NT FAST NEUTRONS
NT GAMMA RAY BEAMS
NT NEUTRON BEAMS
NT PHOTONEUTRONS
NT SPALLATION
NT THERMAL NEUTRONS

Radioactive nuclei alpha radiation investigation methods, discussing nuclear emulsions, scintillation spectrometry, ionization chambers, semiconductor counters and magnetic spectrographs

03 p0485 A70-13479
Nuclear environmental testing techniques, discussing radiation effects, measurements, instrumentation hardening, simulation source selection, dosimetry, noise sources and noise reduction, etc

03 p0523 A70-13540
Shield mass optimization of low thrust nuclear powered space vehicle for occupant shielding against reactor radiation

03 p0523 A70-13575
Nuclear and space radiation effects - IEEE Conference, Pennsylvania State University, July 1969

04 p0656 A70-14726
Gaging system utilizing nuclear radiation to obtain mass measurement of fuel quantity

05 p0880 A70-15832
[SAE PAPER 690673]
Elastic stress-strain states in spherical reservoir and thick walled tube during nuclear radiation induced phase transformations

10 p1894 A70-24513
Electropneumatic actuation systems for rocket engines in extreme environment applications involving high nuclear radiation levels and high and cryogenic temperatures

14 p2535 A70-31343
Calcium tungstate crystals, investigating electron paramagnetic resonance centers produced by neutrons and gamma rays to obtain information on lattice vacancies, defects, etc

16 p2961 A70-33963
Al single crystals hardening under low temperature reactor irradiation, emphasizing yield phenomenon associated with Luders bands

17 p3123 A70-34647
Nuclear irradiation effect on embrittlement of Ti and Ti alloys at cryogenic temperature, determining radiation damage threshold as function of tensile properties changes

18 p3278 A70-36567
Lead alloys as shielding materials in nuclear systems, discussing physical, chemical and metallurgical properties, fabrication and applications

19 p3469 A70-37833
Combined space and nuclear radiation effects in manned space flight

22 p3978 A70-43184

NUCLEAR REACTIONS

NT ALPHA DECAY

NT RESONANCE SCATTERING
NT SPALLATION
NT SPIN-ORBIT INTERACTIONS
NT THERMONUCLEAR REACTIONS

Cross sections of fragments emitted in spallation reactions of carbon and nitrogen nuclei emulsion with alpha particles

09 p1733 A70-23549
Cepheid type variable stars nuclear reaction and opacity pulsation excitation mechanisms

10 p1940 A70-24409
Induced nuclear processes role in radiogenic Ne-21 production in earth atmosphere

12 p2227 A70-28367
Wave properties of nuclear optical model for barrier penetration by charged particles, considering square well reflection, absorption and resonance

14 p2619 A70-30491
Nuclear reactions and elementary particle reactions in Friedman universe with positive lepton abundance and degenerate electrons, discussing prestellar helium synthesis

14 p2620 A70-30877
Electron capture involving iron nuclei in contracting iron stars treated as endothermic nuclear reaction

22 p4104 A70-42992
Solid core nuclear reactor engine variables, considering specific impulse, engine weight, operating life and engine thrust

22 p4070 A70-43181

Radiography using photo-nuclear reaction emulsion to improve picture contrast by eliminating scattered photons in sample

24 p4337 A70-45716

NUCLEAR REACTOR CONTROL

Forced cooling water flow temporary loss accident at Plum Brook Reactor, discussing inspection and corrective action

01 p0140 A70-10323
Material evaluation and selection for compact nuclear reactor control bearings operating at high temperature in vacuum
[ASME PAPER 69-WA/LUB-11]

04 p0697 A70-14765
Bearings for nuclear reactor control components in space environment, discussing sliding friction, compatibility and prototype assemblies tests

16 p2923 A70-34162
SNAP reactor control system mechanisms development for operation in space environment

16 p2951 A70-34163

NUCLEAR REACTOR MATERIALS

U REACTOR MATERIALS

NUCLEAR REACTORS

NT GAS COOLED REACTORS
NT GASEOUS FISSION REACTORS
NT HEAVY WATER REACTORS
NT HIGH TEMPERATURE NUCLEAR REACTORS

NT LIQUID COOLED REACTORS

NT NUCLEAR POWER REACTORS

NT PLUM BROOK REACTOR

NT SNAP 8

NT SPACE POWER UNIT REACTORS

NT THERMAL REACTORS

Steady state deuterium-tritium fusion reactor approximate parameters prediction possibility based on inter assumptions of plasma confinement, model, etc

02 p0349 A70-12755
Nuclear reactor surface temperatures probability calculations allowing for some uncertainties and MTR type test reactor application

03 p0523 A70-12997
Thermionic diode development for nuclear reactor systems

04 p0717 A70-14900
[ASME PAPER 69-WA/ENER-5]
Structural materials mechanical properties tests during neutron bombardment, discussing atomic reactors optimal parameters calculation

04 p0775 A70-15259
Emission containment and working temperature reduction possibility in thermonuclear reactor by increasing plasma densities and introducing large atomic number contaminants

07 p1350 A70-19847
Hydrogen, oxygen and carbon dioxide in off-gas stream from nuclear reactor experiment using on-line gas chromatography

11 p1994 A70-25615
Controllable thermonuclear reactor with free- floating HF discharge plasma in deuterium

12 p2271 A70-27351
Thermionic diode development for nuclear reactor systems

15 p2773 A70-31959
[ASME PAPER 69-WA/ENER-5]
Nuclear rocket engine testing, monitoring reactor and facility performance with real time digital computer

17 p3135 A70-35212
Turbulent coaxial flow analysis predicting fuel volume fraction in gas core nuclear rocket reactor cavity, using free-jet computer code and eddy viscosity equation

18 p3290 A70-36560
Open cycle gas core nuclear rocket reactor, evaluating critical mass for U isotopes

18 p3290 A70-36564
Neutron flux measurement in nuclear reactors based on logarithmic techniques and digital approach, discussing temperature effects compensation

19 p3427 A70-37939
Unmanned nuclear electric propelled spacecraft using reactor with liquid metal MHD power conversion system

20 p3566 A70-40016
Liquid metal heat pipes in magnetic fields of controlled fusion reactors, considering geometry, compound wick structure and vapor flow

21 p3946 A70-41046
Nuclear light bulb and coaxial flow gaseous core nuclear rocket reactors based on energy transfer via thermal radiation

22 p4070 A70-43182
Controllable thermonuclear reactor with free- floating HF discharge plasma in deuterium

22 p4084 A70-43595
Aeromechanical characteristics of colloidal fuel core nuclear reactor in relation to cavity geometry and propellant gas injection

24 p4377 A70-45958
[AIAA PAPER 70-1222]

NUCLEAR RESEARCH

Nondestructive tests and controls in metallurgy and nuclear technology - Conference, Saclay, France, June 1968

22 p4040 A70-43617

NUCLEAR RESEARCH AND TEST REACTORS

NT HIGH TEMPERATURE NUCLEAR REACTORS

NT NRX REACTORS

NT PLUM BROOK REACTOR

NUCLEAR ROCKET ENGINES

Nuclear light bulb engine critical fuel mass and design changes effects

01 p0140 A70-10835
[AIAA PAPER 68-571]
Optimal control for thermionic nuclear reactor space power plant utilizing state variable feedback with limited input simplifying computation

03 p0461 A70-14342
Nuclear rocket engine core thermal and neutronic transient and steady state dynamics digital simulation, showing advantages over lump model analysis

04 p0717 A70-14757
[ASME PAPER 69-WA/NE-3]
Gas core nuclear reactors feasibility based on gas core hydrodynamics, heat transfer and neutronics development, noting spacecraft weight and trip time reduction potential

04 p0717 A70-15639
Flow characteristics of curved porous wall gas core reactors for nuclear rocket engines, visualizing simulated fuel flow with air-smoke combination

06 p1104 A70-17509
Noise field from ground testing of nuclear rocket engines operated at various reactor power levels

06 p1133 A70-18234
Constant flux gas core nuclear rocket acoustic instabilities, presenting idealized physical model with gas dynamic field perturbed by wave phenomena

09 p1725 A70-23227
Reusable earth-moon and deep space return transportation, assuming extraterrestrial nuclear rocket propellant source

14 p2653 A70-30766
Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multi-orbit injection

14 p2616 A70-30767
[AIAA PAPER 69-535]
Nuclear light bulb reactor and coaxial flow reactor for gas core nuclear rocket engines

16 p2949 A70-33532
[AIAA PAPER 70-708]
Engine weight estimation for showing effect on thrust, specific impulse and uranium loss rate for open cycle gas fueled nuclear rocket engine

16 p2949 A70-33553
[AIAA PAPER 70-690]
Gas-core nuclear rocket engine simulation by induction coupled plasma torch, determining gas flow patterns

16 p2950 A70-33555
[AIAA PAPER 70-691]
Reusable nuclear shuttles (RNS) for interorbital and escape missions, discussing alternate stage configurations, radiation shielding, subsystem options, etc

16 p2950 A70-33579
[AIAA PAPER 70-678]
Nuclear rocket nozzle cooling passages, discussing heat transfer and friction correlations for single-phase hydrogen turbulent flow

16 p2950 A70-33622
[AIAA PAPER 70-661]
Nuclear rocket engine testing, monitoring reactor and facility performance with real time digital computer

17 p3135 A70-35212
Turbulent coaxial flow analysis predicting fuel volume fraction in gas core nuclear rocket reactor cavity, using free-jet computer code and eddy viscosity equation

18 p3290 A70-36560
Crew radiation dosage from fission fragments in plume from gas core nuclear rocket

18 p3224 A70-36562
Open cycle gas core nuclear rocket reactor, evaluating critical mass for U isotopes

18 p3290 A70-36564
Environmental surveillance associated with ground tests of nuclear rocket engine prototypes, determining statistical nature of radioactive effluent

19 p3470 A70-38013
Nuclear rocket engine fluidic chamber pressure control, discussing design concepts for static and dynamic subsystems

20 p3688 A70-39585
[AIAA PAPER 70-1010]
Noise field from ground testing of nuclear rocket engines operated at various reactor power levels

20 p3689 A70-39688
Thermionic reactor program for electric propulsion, considering internally fueled flashlight concept

20 p3568 A70-40235
[AIAA PAPER 70-1108]
Gas core nuclear rocket engine light and heavy species centrifugal separation by MHD-driven rotating flow, discussing fluid dynamic simulation results

20 p3671 A70-40256
Thermionic reactor electric propulsion for unmanned outer planets exploration, discussing spacecraft design, launch vehicle, weight factors, etc

20 p3717 A70-40524
[AIAA PAPER 70-1122]

Nuclear rockets for interorbit transportation, discussing reuse economics, propulsion system performance, etc 21 p3886 A70-40987

Nuclear rocket engines design and performance, discussing fission reactors, radiation leakage and shielding, heat transfer, etc 21 p3870 A70-42044

Nuclear rocket applications in Nuclear Flight Propulsion Module (NFPM) and Reusable Nuclear Shuttle (RNS) 22 p4070 A70-43180

Solid core nuclear reactor engine variables, considering specific impulse, engine weight, operating life and engine thrust 22 p4070 A70-43181

Nuclear light bulb and coaxial flow gaseous core nuclear rocket reactors based on energy transfer via thermal radiation 22 p4070 A70-43182

Operational safety of nuclear rockets in orbit-to-orbit transportation in regard to radiation doses from plume and reactor, including malfunction condition 22 p4070 A70-43183

Thermionic reactors for spacecraft auxiliary power and electric propulsion, discussing in-core conversion system and diodes 22 p4071 A70-43191

NERVA nuclear rocket engine design technology program, discussing probabilistic techniques for reliability engineering [SAE PAPER 700801] 24 p4377 A70-45910

NUCLEAR SCATTERING

NT NEUTRON SCATTERING

NT RESONANCE SCATTERING

Electron scattering from diatomic molecular systems including coupling of partial waves in fixed-nuclei approximation 06 p1114 A70-18633

Anomalous angular distribution and inelastic cross section of muon-nucleon interaction for penetrating underground cosmic ray particles 22 p4095 A70-43232

NUCLEAR SHIELDING

U RADIATION SHIELDING

NUCLEAR SPIN

Deep freezing of nuclear precession magnetometer elements for improving instrument characteristics accuracy 05 p0851 A70-16769

Rare earth energy band structure effect on RKKY magnetic interaction between atomic spins 13 p2472 A70-29799

Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field 14 p2582 A70-30218

Free nuclear precession sensor with rotating sample for performing measurements in nonuniform magnetic field 24 p4339 A70-46293

NUCLEAR STRUCTURE

Neutron and proton distributions rms radii in nuclei by optical model analysis of low energy pion-nucleus interactions 07 p1337 A70-19360

Inverted coexistence possibility of spherical and deformed states in Si 28 and S 32 nuclei 17 p3137 A70-34518

Primary cosmic rays nuclear transitions, determining fragmentation parameters 20 p3696 A70-39284

NUCLEAR SUBMARINES

U SUBMARINES

NUCLEAR WARFARE

System engineering process for survival enhancement of military aircraft to meet stringent requirements of general nuclear war [AIAA PAPER 70-893] 17 p3019 A70-35810

NUCLEAR WEAPONS

Radiation hardening of electronic systems for nuclear weapons using shielding, circuit design techniques and hardened components 04 p0657 A70-14738

UN treaty based on U.S.-U.S.S.R.-UK agreement banning nuclear arms in space and establishing international law covering space exploration 07 p1428 A70-19106

NUCLEAR-ELECTRIC MOMENTS

U ELECTRIC MOMENTS

NUCLEATE BOILING

NT LEIDENFROST PHENOMENON

Organic liquid nucleate pool boiling experiments determining stresses, surface tension, viscosity and gravitation relationships to bubble shape and microlayer formation 01 p0218 A70-11180

Microlayers evaporation contribution to vapor bubbles growth rate from heated wall in liquid near saturation temperature during nucleate pool boiling 01 p0218 A70-11181

Heat transfer during nucleate boiling, discussing transfer from heated surface to superheated liquid layer and exchange on gas-liquid interface 06 p1176 A70-17695

Initial vapor bubble growth on horizontal heated wall during saturated nucleate boiling using combined streak and high speed frame photography 08 p1542 A70-21584

Reduced gravity effect on nucleate boiling using drop tower method with high speed motion pictures and telemetry 10 p1969 A70-25096

Bubble dynamics in subcooled nucleate boiling, deriving mathematical model based on evaporation-condensation mass transfer mechanism 12 p2333 A70-28113

Nucleate pool boiling, calculating sinusoidal and square wave pressure variations effect on heat flux for comparison with measurements 14 p2616 A70-30254

Pt and Ag surface effects on LOX nucleate boiling heat transfer, considering embedded abrasives relationship to hysteresis 21 p3947 A70-41056

Nucleation role in boiling and cavitation - ASME Conference, Detroit, May 1970 21 p3948 A70-41201

Site activation in saturated nucleate boiling tests involving various fluids boiled on transparent oxide coated glass surface, correlating site density data with surface temperature 21 p3948 A70-41202

Heated surface orientation and reduced gravity effects on Freon 113 nucleate 21 p3948 A70-41204

Nucleation phenomena associated with boiling heat transfer in pure liquids at solid heating surfaces 21 p3948 A70-41205

Surface tension role in microliquid layer formation on solid surface with growing bubble in nucleate boiling, using optical method 21 p3953 A70-42089

Cryogenic fluids nitrogen, argon and carbon monoxide nucleate boiling from atmospheric to near critical pressure 23 p4279 A70-44359

NUCLEATION

NT CLOUD SEEDING

Ice nucleating properties of dust particles above 80 km compared with soil and AgI particles 01 p0081 A70-11296

Water vapor condensation by homogeneous nucleation measured for cluster number using laser light scattering compared with theory in condensing supersonic flow 02 p0279 A70-12048

Surface nucleation critical field for pure superconductors at temperatures outside Landau-Ginzburg region 06 p1125 A70-17218

Liquid nucleation in vapor condensation on wettable, unwettable, smooth, rough and cavitating surfaces, showing positive effect of roughness elements 06 p1177 A70-17838

Efferent and afferent fibers presence in optic nerves determined by unilateral and bilateral enucleation of dogs and cats 07 p1207 A70-19476

Vapor-liquid-solid nucleation mechanism of alpha-aluminum oxide filamentary single crystal growth, suggesting combination with suboxide condensation and disproportionation mechanism 07 p1313 A70-19890

Atmospheric condensation nuclei activity with rough surface with decreasing spherical hollows 09 p1718 A70-23172

Nucleation and heteroepitaxial GaAs film growth on sapphire using electrical measurements, reflection diffraction and electron microscopy 11 p2098 A70-26393

Tribonucleation emphasizing viscosity-velocity product in gas nuclei formation and cavitation 12 p2170 A70-27661

Molecular Markov processes application to vibrational relaxation and dissociation, small system kinetics, nucleation and droplet growth, thermalization kinetics and diffusion processes 14 p2619 A70-30615

Spall nucleating mechanism for Al, noting microcracks in embedded particles 16 p2991 A70-33894

Kinetic theory of fatigue crack propagation, discussing stochastic nucleation process and power exponent relation 16 p2992 A70-33968

Titanium hydride deformation assisted nucleation in alpha-beta titanium alloy, showing low strain rate embrittlement and stress corrosion crack propagation in aqueous environments 17 p3116 A70-34395

Fatigue crack propagation in solids in terms of nucleation theory, explaining temperature dependence of fatigue strength and size effect 17 p3191 A70-35464

Nucleation processes associated with thermal decomposition sites formation in ammonium perchlorate single crystals, using optical and electron microscopy 20 p3582 A70-39494

Water vapor homogeneous nucleation in simulated spacecraft debris clouds 22 p4110 A70-43115

NUCLEI

Dust growth, density distribution and collisions in interior of cometary head atmosphere, considering gravitational attraction to nucleus 07 p1379 A70-19039

Comet nuclei internal structure from photometric measurements, discussing gas emanation and free surface ice evaporation 19 p3514 A70-37640

NUCLEI [NUCLEAR PHYSICS]

NT ALPHA PARTICLES

NT DEUTERONS

NT EVEN-EVEN NUCLEI

NT HEAVY NUCLEI

NT TRITONS

Energy dependence of intensity ratio of Li, Be and B on C, N, O and F nuclei /L/M ratio in primary cosmic rays, analyzing data discrepancy 01 p0169 A70-10316

Nucleons and high energy pions inelastic interactions with complex nuclei involving external diffraction production of pions 03 p0526 A70-13029

Basis functions with harmonic oscillator radial dependence in Hartree-Fock calculations for light deformed nuclei 04 p0723 A70-15635

Experimental determination of solar neutrino activity from interaction cross section between neutrinos and target nuclei 05 p0900 A70-15965

Effective potential of electron screening of Coulomb nuclei field leading to thermonuclear reaction rate increase using self consistent field method 07 p1346 A70-20206

High energy electrons elastic scattering from 2s-1d shell nuclei based on Dirac equation solution in Glauber approximation 09 p1730 A70-22043

Cosmic ray particle abundance in upper atmosphere during minimum solar activity estimated by nuclear photographic emulsions on balloon flight 10 p1932 A70-24438

Electrostatic shielding of nuclei Coulomb field during thermonuclear reactions in degenerate gases of arbitrary densities 11 p2087 A70-26578

Nucleon spectra, particle multiplicities and radiochemical cross sections following stopped-pion absorptions by complex nuclei, comparing calculated and experimental data 14 p2618 A70-30341

Inverted coexistence possibility of spherical and deformed states in Si 28 and S 32 nuclei 17 p3137 A70-34518

Neutron core star models based on realistic nuclear matter calculations and hyperons equation of state 17 p3157 A70-34844

Warm fog clearing effectiveness by seeding with hygroscopic nuclei as function of fog droplet and seedling nuclei distribution 17 p3132 A70-35928

Superheavy nuclei origin in primary cosmic rays, proposing neutron stars/pulsars/ as sources 18 p3308 A70-36403

Residual solar modulation of relativistic cosmic ray nuclei in galaxy over eleven years, observing magnitude at solar activity minima 18 p3309 A70-37009

Primary cosmic ray He nuclei rigidity measurement with magnetic spectrograph 19 p3505 A70-38119

Galactic cosmic ray energy spectra of light and medium nuclei from IMP-4 satellite measurements, investigating L/M ratio 19 p3506 A70-38124

Cosmic ray nuclei charge composition of elements Ne to Ni, using emulsion stacks exposure in balloon flights 19 p3506 A70-38126

Cosmic ray nuclei chemical composition and energy spectra in 3-30 Z range by balloon flight and Pioneer 8 space probe, noting propagation models 19 p3507 A70-38131

Relativistic cosmic rays nuclei abundances from Gemini 11 flight 19 p3509 A70-38144

Cosmic ray nuclei transformation and propagation in interstellar space, considering diffusion equation, cross sections, solar modulation, etc 19 p3509 A70-38145

Geomagnetically trapped energetic nuclei Z greater than or equal to 3 in earth outer radiation zone, measuring intensity ratio to alpha particles 20 p3698 A70-39327

Relativistic cosmic ray LH nuclei abundance via Cerenkov scintillator telescope on polar orbiting OV1-10 satellite 24 p4397 A70-45522

NUCLEIC ACIDS

NT RIBONUCLEIC ACIDS

Biophysics research, discussing supramolecular biological structures, synthesis of proteins, nucleic acids and genetic codes, biological membranes, coding in nervous system, etc
03 p0420 A70-13491

Nucleic acid and protein synthesis dynamics in rat brain and heart during adaptation to high altitude hypoxia
07 p1209 A70-19518

Nucleic acids constituents reactions with singlet oxygen, determining oxidation mechanism in photodynamic processes
21 p3781 A70-42025

NUCLEON-NUCLEON INTERACTIONS
Pion production characteristics during high energy nucleons interactions from data on production in upper atmosphere by gamma-quanta families /isobaric production/
03 p0555 A70-13032

Charged particles distribution according to multiplicity during pion-nucleon and nucleon-nucleon interactions at high energies
03 p0555 A70-13033

Separable potential with hard core effects, treating short range repulsion in nucleon-nucleon interaction, generating I matrix for existing data
09 p1725 A70-22042

Pion and nucleon interactions, tabulating average multiplicity and inelasticity values for various primary cosmic ray energy levels
09 p1745 A70-22775

NUCLEONICS
Gaging system utilizing nuclear radiation to obtain mass measurement of fuel quantity [SAE PAPER 690673]
05 p0880 A70-15832

NUCLEONS
Cosmic rays nucleon component measurements interpretation in terms of geomagnetic field model
01 p0169 A70-10354

Inelastic muon-nucleon scattering implications on cosmic rays, studying equation validity for absorption cross section
02 p0359 A70-12702

Pion and nucleon interactions with atomic nuclei at 200 Gev using Wilson chamber and ionization calorimeter, determining pion collisions characteristics
03 p0555 A70-13034

Extensive air shower characteristics for inelasticity coefficient, nucleon-pion interaction cross sections and secondary particles, noting parameter interchangeability
05 p0898 A70-15946

Neutron and proton distributions rms radii in nuclei by optical model analysis of low energy pion-nucleus interactions
07 p1337 A70-19360

Nucleons split-up into quarks disregarded as energy source for quasars
08 p1547 A70-20583

Cosmic ray diurnal anisotropy, demonstrating two-solar-cycle variations for nucleonic component
09 p1746 A70-23478

Nucleon spectra, particle multiplicities and radiochemical cross sections following stopped-pion absorptions by complex nuclei, comparing calculated and experimental data
14 p2618 A70-30341

Three dimensional nucleon-pion cascade equations solution for cosmic ray extensive air showers by pion-links method
17 p3150 A70-34597

Solar cosmic rays emission spectrum for 23 February 1956 flare, taking into account nucleon diffusion coefficient dependence on particle rigidity and distance to sun
20 p3697 A70-39287

Automatic cosmic ray station for recording nucleon and meson components
20 p3629 A70-39314

Scale invariance models correlation with cosmic ray data, comparing neutrino- and antineutrino- nucleon scattering
23 p4210 A70-43800

NUCLEOSIDES
NT ADENOSINE DIPHOSPHATE [ADP]
NT ADENOSINE TRIPHOSPHATE [ATP]
NT ADENOSINES
Uridine phosphorylation by heating with inorganic orthophosphates achieved via nucleoside reactions
23 p4158 A70-44837

NUCLEOSYNTHESIS
U NUCLEAR FUSION

NUCLEOTIDES
NT ADENOSINE DIPHOSPHATE [ADP]
NT ADENOSINE TRIPHOSPHATE [ATP]
NT ADENOSINES
NT PYRIDINE NUCLEOTIDES
Nicotinamide adenine dinucleotide /NAD/ deamination and role of nicotinamide hypoxanthine dinucleotide /deamino-NAD/ in forming ammonia from amino acids in rats/rabbits brain and liver tissue
01 p0018 A70-10505

Thyroidin influence on RNA content and nucleotide composition in hypothalamus, cortex and phenolic fractions of cerebral hemispheres resulting in accelerated protein biosynthesis
01 p0019 A70-10511

Methylating agents and nitrosoguanidine actions on polynucleotides, including ribonucleic acid
03 p0440 A70-13550

Acid soluble nucleotides content in normal and gamma irradiated rat spleens, presenting table
06 p0995 A70-17799

Partial nucleotide sequences for fragments isolated from ribonuclease digests of tobacco mosaic virus RNA, suggesting genetic duplication possibility
13 p2363 A70-29798

Nicotinamide adenine dinucleotide phosphate /NADP/ specific isocitrate dehydrogenase /ICDH/ inactivation from obligate halophile at low NaCl levels
15 p2685 A70-32671

Burning program for sounding rocket to reach maximum altitude with given initial and propellant masses, discussing numerical parameter optimization technique
01 p0161 A70-10150

Textbook on applied numerical methods covering interpolation, approximation, integration, matrices, etc, with emphasis on digital computer algorithms
01 p0132 A70-11306

Book on numerical solution of partial differential equations, discussing methods for physical and chemical problems on digital computer
01 p0134 A70-11326

Physiological significance of myocardial fibers curvature in left ventricle wall determined by numerical solutions based on mathematical description
01 p0039 A70-11368

Dynamical systems with two degrees of freedom reduced to numerical investigation of quadratic area-preserving mapping
02 p0289 A70-11993

Numerically stable solutions existence for one dimensional monochromatic radiative transfer, using linear algebra including vector and matrix norms, convergence, etc
02 p0340 A70-12643

Numerical method for attacking-lifting problems of general three dimensional wing executing arbitrary motion in potential flow [AIAA PAPER 69-23]
03 p0405 A70-12930

Centrally clamped spinning circular disk free transverse vibration analysis within accuracy of numerical computations
03 p0584 A70-12931

Alternating direction implicit difference schemes for solving Laplace and biharmonic elliptic equations
03 p0518 A70-13026

Axisymmetric and three dimensional gas flow around blunt bodies using numerical methods, discussing finite difference algorithms for gas dynamic equations
03 p0410 A70-14251

Shell theory resolving equations transformation to second order partial differential equations suited for solution by numerical algorithms of network method
04 p0767 A70-14495

Computer programs for numerical analysis of shell structures, considering series expansion, numerical integration, finite differences and finite elements
04 p0768 A70-14787

Numerical methods of solving problems in mechanics of continuous media - Conference, Kiev, Ukrainian SSR, June-July 1966
04 p0669 A70-14956

Small parameter method applied to numerical solution of conformal mapping and viscous fluid motion problems
04 p0719 A70-14960

Perturbation technique for numerically sensitive nonlinear two point boundary value problems
04 p0713 A70-15045

Numerical analysis of nonlinear boundary value problems for ordinary differential equations, considering patch bases and monotone methods
04 p0714 A70-15046

Numerical method for calculating gust effect on wing of complex planform at subsonic speeds by converting continuous to discrete processes
04 p0618 A70-15242

Numerical solution of transient heat conduction with radiating surface, imposing Runge-Kutta type integration on surface
04 p0787 A70-15613

Numerical solution for differential equations describing nonlinear beam-plasma interactions based on dispersion relation analysis
05 p0886 A70-15799

Numerical analysis of cyclotron amplification of geomagnetic micropulsations in magnetosphere based

on dispersion relation for three component cold plasma beam system

05 p0838 A70-16284

Book on digital computer methods in engineering covering numerical and programming methods, algebraic and differential equations solutions, time-frequency domain analysis, etc

05 p0877 A70-16771

Stratified cloud transport and evolution, solving kinetic equations by numerical method

06 p1053 A70-17210

Numerical solution of nonlinear hyperbolic systems of differential equations using methods of differences, applying results to invariant cross section gas flow

06 p0964 A70-17236

Soviet collection of papers on numerical methods in rarefied gas theory

06 p1035 A70-17751

Numerical methods for solving Boltzmann gas kinetics equation, assessing various methods effectiveness

06 p1036 A70-17752

Numerical solution of control optimization problems by systematic search in initial costate space, using Newton-Raphson method

06 p1025 A70-17964

Seeding effects on isolated cumulus clouds, using numerical model of microphysics and dynamics factors, measuring rainfall amounts and duration

06 p1098 A70-18243

Numerical analysis of rarefied plasma flow interaction with charged conducting bodies of various forms and dimensions

06 p1123 A70-18298

Optimal control problem converted Cauchy problem for obtaining numerical solutions through invariant imbedding

06 p1027 A70-18508

Numerical methods for computing solutions in optimal control of variable lift reentry spacecraft, applying digital computer techniques

07 p1245 A70-19093

Numerical method of characteristics for unsteady radiation gas dynamics, discussing surface pressures and heat transfer rates

[AIAA PAPER 68-163]

07 p1256 A70-19314

Numerical analysis of low-g fluid flow and heating problems encountered with liquid propellant storage and supply

[AIAA PAPER 69-567]

07 p1394 A70-19719

Numerical calculation and applied mathematics - Conference, Tours, France, July 1965

07 p1326 A70-19781

Point matching technique for plane elastic problems extended to axisymmetrically loaded elastic body of revolution, developing general computer program

07 p1416 A70-20303

Numerical procedure for determining horizontal wind from geopotential height in barotropic model, discussing solutions for resultant simultaneous equations

08 p1540 A70-21968

Stellar evolution computations numerical instability due to coupling between hydrostatic equilibrium and thermal processes

09 p1755 A70-22508

Numerical algorithms for solving Liapunov matrix equation in nonlinear stability analysis and optimal systems design

09 p1641 A70-22959

Two dimensional numerical analysis of current saturation mechanism for junction field effect transistors with small and large length-to-width ratio values

09 p1740 A70-23110

Lebedev nomogram determination of climatic parameters dependability, considering underlying theory and temperature sums

09 p1718 A70-23171

Numerical analysis of magnetic frequency divider operation

09 p1649 A70-23338

Numerical methods of viscous liquid dynamics, considering unsteady flow in simply and multiply connected regions

10 p1866 A70-24110

Continuous media mechanics by applying fractional steps method to numerical solutions, outlining theoretical basis for computer algorithms

10 p1866 A70-24114

Three dimensional supersonic gas flow solution by numerical method of characteristics, discussing direct and inverse tetrahedral and semicharacteristic schemes

10 p1798 A70-24117

Hydrodynamic lubrication theory two dimensional problem, comparing numerical methods for elliptical nonlinear differential equations

10 p1893 A70-24164

Numerical method for linear differential equations extended to nonlinear ordinary differential equations, liquidating residuals by setting integrals equal to zero

10 p1909 A70-24419

Quasi-linearization extension to numerical solution of multipoint boundary value problems for ordinary

differential equations arising from state constrained optimal control problems

10 p1909 A70-24421

Monograph on numerical treatment method for harmonically oscillating wings covering pressure distributions, logarithmic singularity, etc

11 p1219 A70-25497

Stiffened cylindrical shells under internal pressure numerically analyzed based on C-5A fuselage material parameters

[AIAA PAPER 68-29]

11 p2135 A70-25961

Numerical techniques and solutions for compressible and incompressible laminar separated flows using time dependent finite difference equations

[AIAA PAPER 68-741]

11 p2035 A70-25972

Bidirectional reflectance of three dimensional surfaces described by diffuse triangular subareas network for spacecraft thermal design, giving numerical technique

11 p2084 A70-26354

Multidata and collocation methods compared for numerical Laplace transform inversion

11 p2074 A70-26639

Numerical solution for steady supersonic inviscid flow around smooth conical bodies by solving elliptic partial differential equations for conical flow

12 p2155 A70-27202

Aerodynamic coefficients from observed motion of body in flight, eliminating need for closed form solutions by employing numerical solutions to equations of motion

[AIAA PAPER 69-134]

12 p2156 A70-27824

Numerical quadratures application to integral equations for radiative heat transfer computations, discussing validity for parallel and adjoint plates

12 p2332 A70-27840

Numerical solution of satellite rotational damping by onboard motors using Euler equations, local variations and finite control time

13 p2505 A70-28963

Aircraft turbulence penetration performance numerical rating, applying concept to large subsonic jet transports

[AIAA PAPER 70-543]

13 p2347 A70-29074

Dilute gas transport properties calculation, investigating numerical techniques to minimize computation time to prescribed accuracy

13 p2441 A70-29089

Algorithms based on Newton formula for polynomial interpolation and numerical differentiation

13 p2441 A70-29100

First order node to node satellite orbital elements perturbations due to arbitrary zonal geopotential harmonic, determining computation methods and time

14 p2638 A70-30703

Eigenvalues of membranes and plates, comparing asymptotic and numerical values

14 p2600 A70-31223

Numerical solution to Laplace equation in spherical coordinates with axial symmetry, using Dirichlet method to obtain difference equations

15 p2767 A70-31751

Attitude dynamics of slowly spinning axisymmetric satellites under influence of gravity gradient torques, using analytical and numerical techniques

15 p2809 A70-31778

Automatic numerical analysis of velocity information from Doppler effect ultrasonic blood flow meter

15 p2691 A70-31920

Vector displacement numerical calculations for rectangular parallelepipeds of infinite and finite lengths

15 p2767 A70-32018

Nonparametric reliability application to numerical data involving failure distribution, using mathematical model

15 p2748 A70-32669

Second order hyperbolic partial differential equations solution by characteristic grid and continuous characteristic methods

15 p2768 A70-32818

Reference stress evaluated by numerical analysis techniques, discussing rectangular beam in pure bending

16 p2987 A70-32921

Variance reduction technique for hybrid computer generated random walk solutions of partial differential equations, comparing to analytical solution

16 p2942 A70-33731

Continuous space discrete time /CSDT/ method using initial value formulation for partial differential equations, discussing applications to one dimensional problem

16 p2943 A70-33736

Hypervelocity impact of spheres on thin targets using numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model

16 p2991 A70-33853

Radiation and conduction of open joint multilayer insulation systems, analyzing dependence on contact area by numerical methods

[AIAA PAPER 70-848]

16 p2939 A70-33915

Fluid mechanics phenomena numerical modeling, considering present methods three dimensional problems, turbulence treatment, etc

17 p3068 A70-34663

Numerical solutions for velocity and concentration profiles to nonsimilar isothermal diffusion laminar boundary layer equations for uniform injection of foreign gas

17 p3069 A70-34824

Method of characteristics for nonequilibrium flow fields analysis, reviewing theory, numerical methods and examples

17 p3071 A70-35470

Multistage solution algorithm for solving Navier-Stokes equations stationary problem, considering plane motion of incompressible fluid

18 p3239 A70-36216

Unsteady two dimensional gas flow calculation axisymmetric shock tube of variable cross section, using numerical method

18 p3240 A70-36275

Hypotheses concerning optimal methods of solving mathematical physics problems, choosing algorithms employable in digital computers

18 p3291 A70-36284

Numerical differentiation of analytic functions involving Cauchy formula and error estimation

18 p3282 A70-36362

Buckling problem numerical analysis by nonlinear programming and minimum energy formulation

18 p3339 A70-36495

Two dimensional turbulent film cooling, predicting initial region temperature distribution by solving finite difference form of thermal energy equation

18 p3346 A70-36497

Vlasov high temperature plasmas numerical analysis, using Hamilton variational principle

18 p3296 A70-36793

Laminar incompressible flow in arbitrary cross sectioned entrance region of ducts by numerical technique after transformation to boundary value problem

[ASME PAPER 70-GT-91]

18 p3243 A70-36878

Numerical ionospheric world mapping of plasma frequency, considering height, latitude, longitude and local mean time variations

19 p3380 A70-38403

Nonlinear acoustic absorbers behavior analysis, discussing spectral and temporal computation methods

20 p3672 A70-39237

Plane electromagnetic scattering from perfectly conducting bodies, comparing exact numerical solution with experiment

20 p3585 A70-39394

Nonstationary random processes prediction by numerical method

20 p3673 A70-39762

Plasma accelerator compressible turbulent boundary layers numerical calculation taking into account MHD effects, electron thermal nonequilibrium and finite rate ionization

20 p3682 A70-40017

Numerical solution for multilayer insulation system comprised of infinite parallel metallic films separated by optically thin dielectrics

21 p3947 A70-41054

Cantilever bending under gradual contact with cylindrical supporting surface compared with solution by elasticity theory

21 p3934 A70-41251

Bond stresses between fiber and matrix of fiber reinforced composite materials determined by numerical method based on superposition

21 p3934 A70-41252

Meteorological fields objective representation by numerical analysis, discussing statistical parameters and analytic errors checking

21 p3847 A70-41400

Atmospheric scattering governed by Rayleigh phase function with absorption, calculating radiative transfer by numerical solution of Chandrasekhar integral equations

22 p4072 A70-42340

Optimal design of electronic circuits, using mathematical methods for solving nonlinear multivariable function extremum

23 p4171 A70-43951

Plasma physics computational problems concerning controlled thermonuclear reactions, considering instability and equilibrium numerical calculations

23 p4224 A70-44181

Elastic continua structural optimization analysis decisions for maximizing calculation accuracy, insuring efficient complex numerical analyses

23 p4271 A70-44706

Numerical methods for mixed boundary value problem of axisymmetric shells of revolution, using truncated series expansion and finite difference expressions

23 p4272 A70-44712

Numerical solution of first boundary value problem of elasticity theory involving biharmonic stress function relating to rim loads

23 p4275 A70-44942

Statistical interpolation for numerical analysis of middle troposphere AT potential based on geopotential and wind observations
24 p4371 A70-45135

Numerical solutions of three dimensional static elasticity, using physical analogies
24 p4419 A70-45195

Numerical analysis of fuel combustion in supersonic stationary flows of hydrogen air mixture past bodies by two-component reaction kinetics model
[ICAS PAPER 70-52] 24 p4428 A70-45500

NUMERICAL CONTROL

Book on numerical control covering principles, electromechanical system using digital logic circuits, binary numbers and arithmetic, etc
10 p1854 A70-24023

Numerically controlled gas tungsten arc welding, discussing tape programming, fixture design and fabrication for various welded metal joint configurations
11 p2058 A70-25661

Economical inspection of numerical-control produced parts through critical dimensions determination and dimension measurement reduction
[SME PAPER IQ-70-710] 12 p2241 A70-27086

Numerically controlled N/C machines reliability program based on organized failure reporting and analysis system for cost effectiveness and downtime reduction
15 p2747 A70-32635

Asymmetric closed and cylindrical shells variable surface machining for desired wall thickness profile by chemical milling with digital computer numerical control
20 p3637 A70-39942

Programmable all-stored-logic numerical control system based on minicomputer, affording economy and adaptability in production tool applications
22 p3993 A70-42319

Digitally controlled milling machine for complex aerodynamic profiles and prismatic blades
22 p4046 A70-43117

Computerized air cargo clearing, discussing London Airport Cargo Electronic-data-processing Scheme
22 p4007 A70-43272

Computer-aided production engineering involving numerically controlled machines for Rolls-Royce aircraft engines manufacture
24 p4341 A70-45299

NUMERICAL INTEGRATION

NT RUNGE-KUTTA METHOD

Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle
01 p0134 A70-11483

Navier-Stokes difference equations numerically integrated by computer for viscous fluid flow along parallel flat plate at low Reynolds number
02 p0277 A70-11909

Unstable electron plasma initial value problem solved by numerically integrating Vlasov equation in one dimension
02 p0347 A70-12235

Second order ordinary differential equations solution extended to higher order or partial differential equations using numerical integration
02 p0324 A70-12280

Computer application to Navier-Stokes equations numerical integration for incompressible viscous fluid deflected flow with large Reynolds number
02 p0287 A70-12376

Numerical integration methods in electromagnetic theory, discussing scattering and radiation from thin wire structures
02 p0262 A70-12600

Carbon dioxide supersonic flows, describing numerical integration procedure for chemical and vibrational relaxation
03 p0440 A70-13743

Optimum numerical integration with application to real time digital simulation of continuous systems, deriving three step methods
03 p0455 A70-14173

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure
03 p0600 A70-14306

Numerical integration of differential equations governing one dimensional flow of reactive gas, discussing flows of converging-diverging nozzle and normal shock waves
04 p0671 A70-14992

Boundary layer along flat plate at zero incidence with homogeneous suction using momentum and kinetic energy integral equations through boundary layer velocity profile
04 p0615 A70-15052

Thin elastic shallow shell static problem solved using numerical integration of differential equation
04 p0778 A70-15558

Numerical integration of linearized two level forecast model to analyze behavior of accumulated error
05 p0878 A70-16153

Electron flux-atmosphere interaction solved by numerical integration on computer, discussing auroral ionosphere
05 p0842 A70-16755

Numerical integration of equations of motion of three dimensional laminar compressible boundary layers
[DVL-915] 06 p1033 A70-17229

Equations of motion for hypersonic friction layers integrated using quadrature procedures
[DVL-913] 06 p1033 A70-17230

Optimal quadrature formulae for numerical integration of 2 pi-periodic functions involving integrand derivative values at knots
06 p1093 A70-17582

Boltzmann equation direct numerical integration using successive iterations algorithm
06 p1036 A70-17755

Numerical method for field problems analysis using algorithm based on generalized Betti-Maxwell theorem
06 p1094 A70-17942

Navier-Stokes equations numerical integration in Eulerian coordinates, applying results to compressible and incompressible fluids steady flow
[AIAA PAPER 70-2] 06 p1040 A70-18113

Plane elastic-relaxing plastic shock wave yielding of Fe numerically integrated by two step stable difference scheme without pseudoviscosity
06 p1172 A70-18618

Integration by orthogonalizations of envelopes of revolution loaded asymmetrically, introducing boundary conditions and structure discontinuities
07 p1404 A70-19128

Penetrative thermal convection stability for statically unstable layer surmounted by statically stable layer from numerical integration of linearized equations of motion and heat conduction
07 p1269 A70-19947

Digital differential analyzers improved speed and accuracy by extended resolution on Euler integration for differential equations solution programming
08 p1467 A70-21756

Negative radix conversion results applied to logical design of serial converter
09 p1642 A70-22967

Numerical integration method for function and solution of differential equation, considering equations governing two dimensional motion of particle in air stream
10 p1910 A70-25099

One-step numerical integration of linear differential equations based on Labotto quadrature, including higher order applications and stability analysis
11 p2071 A70-25840

Spin stabilized satellite attitude and orbital maneuvers computation, considering required accuracy and computer time in numerical integration procedures
11 p2125 A70-26278

Coefficients for finite difference methods of numerical integration of products of Fourier and ordinary polynomials
11 p2074 A70-26848

Atmospheric hemispheric general circulation model numerical time integration with moist processes and uniform earth surface
12 p2262 A70-26882

Algorithm for integrating ordinary differential equations system determined for stability condition by trial-and-error procedure programmed on computer
12 p2262 A70-28030

Computerized numerical integration of nonlinear partial differential equations describing blast wave in ionosphere with finite electric conductivity under uniform magnetic field
12 p2227 A70-28212

Stability of single periodic symmetrical solutions of plane circular restricted three body problem, using digital computer for numerical integration of equations of motion
13 p2490 A70-28950

Beginning of table calculations using difference methods for numerical integration of ordinary differential equations
13 p2440 A70-28960

Numerical integration or quadrature technique for evaluating Fourier integrals in theory of infinite cylindrical antenna
13 p2440 A70-29088

Numerical integration of differential equations with widely separated eigenvalues, outlining solution stability and accuracy problems
13 p2441 A70-29213

Tesseral and sectorial harmonics effect on satellite perturbations using numerical integration
13 p2494 A70-29531

Differential equations stiff systems numerical solution by linear one step integration methods
14 p2599 A70-30645

Planetary motion zero-rank effects numerical integration, using Hill secular perturbation method and trace of dyadics
14 p2639 A70-30704

Thermoelasticity of incompressible solids, integrating linearized equations using Helmholtz solution
14 p2660 A70-31224

Hypersonic internal flow investigation by differential equation numerical integration, determining shock shape and surface pressure
16 p2838 A70-33881

Algebraic aspects of generalized Riemann invariants method of integration of quasi-linear partial differential equations
16 p2944 A70-34329

Differential equations numerical integration by one step method of high order accuracy
16 p2945 A70-34333

Fluid turbulence unified heuristic model, defining determinate solutions for Navier-Stokes equations numerical integration at high Reynolds numbers
17 p3074 A70-35884

Numerical quadrature of singular functional equations, tabulating integral functions, Cauchy principle values and integral transformations for optimal error function
18 p3280 A70-36219

Spherical gas lubricated sliding bearing with forced injection, determining pressure distribution by numerical integration
18 p3262 A70-36273

Linear differential equation integration method, using Eulerian technique for error reduction
18 p3282 A70-36358

Tropical circulation structure and energetics from numerical time integration of global atmospheric model with realistic orography
19 p3462 A70-38257

Numerical integration of finite difference analogs of nonlinear partial differential equations, investigating data smoothing, filtering and boundary effects on computational instability
19 p3459 A70-38417

Many body gravitational problem, computing evolution of two groups by numerical integration with two different computers
19 p3523 A70-38692

N body numerical integrator using virtual mass technique for computing trajectories with speed and accuracy suitable for spacecraft onboard computer applications
[AIAA PAPER 70-1057] 19 p3528 A70-38872

Linear homogeneous differential equations nonautonomous systems integration techniques, deriving finite forms of solutions
19 p3460 A70-38938

Aircraft and rocket guidance systems navigation error analysis, discussing numerical integration techniques and computer program
[AIAA PAPER 70-1004] 20 p3667 A70-39527

Finite difference numerical integration method for melting and freezing problems extended to free convection in liquid and unequal densities for phases
21 p3953 A70-42093

Interpolation method for nonlinear automatic control systems accuracy, discussing numerical integration optimal step and node number selection
22 p4003 A70-42886

Cloud droplet growth rapid computation using number density mean value for integrating stochastic coalescence equation into differential equation
22 p4064 A70-42910

Digital differential analyzers one step integration method with iteration procedure truncation to single step
22 p3996 A70-42921

Numerical integration of Orr-Sommerfeld equation for flat plate Blasius boundary layer transition
23 p4179 A70-43973

Shell analysis based on discretization into one, two and three dimensional configurations, comparing finite difference, numerical integration and finite element methods
23 p4272 A70-44715

Numerical integration of equations of motion from finite element analysis in structural mechanics, using computer program
24 p4420 A70-45278

Rapid satellite orbit prediction program by numerical integration including oblateness squared and radiation pressure effects over long time spans
24 p4406 A70-45528

Multidimensional integral Monte Carlo evaluation applying regression analysis to linear unbiased estimators
24 p4370 A70-46100

NUMERICAL WEATHER FORECASTING

Finite difference schemes compared for numerical weather prediction by application to shallow water equations on hemisphere, noting mesh spacing
01 p0135 A70-11064

Numerical forecasting scheme for hurricane and typhoon trajectories applied to 1967 Atlantic storm data
03 p0520 A70-13162

Weather prediction technique based on hydrodynamical equations, outlining atmospheric circulation models
[AAS PAPER 69-619] 04 p0714 A70-14646

Localized numerical weather forecasts via interpolation from primitive equation model outputs, analyzing winter season results in terms of snow prediction

06 p1098 A70-18241

Global atmospheric research program data requirements analysis based on two level numerical model

08 p1539 A70-21650

Global real data numerical forecasting with two layer NCAR /National Center for Atmospheric Research/ general circulation model, testing different data initialization schemes

09 p1713 A70-22303

Numerical weather forecasting for several weeks based on global meteorological satellite network observation

10 p1913 A70-25241

Shape and location error separation in deterministic predictions of meteorological scalar fields, considering air pressure system forecasting

13 p2445 A70-28995

Extratropical planetary high altitude frontal zones statistical analysis and position forecasting by eigenfunction expansion

13 p2445 A70-29673

Numerical weather prediction requirements for global satellite observing systems using atmospheric models

14 p2610 A70-31152

Dynamic numerical weather forecasting based on balanced model consisting of closed system of equations

18 p3284 A70-36232

Numerical scheme for weather forecasting, considering interaction mechanism between cyclonic and ultralong waves and climate

18 p3285 A70-36646

Simulation studies for first GARP global experiment, discussing data redundancy, measured and derived data, sampling, etc

18 p3285 A70-36785

Orography and friction effects on numerical forecast of atmospheric pressure variation

24 p4370 A70-45112

NUSSELT NUMBER

Forced convection of hot wire in hypersonic flow, determining Nusselt-Reynolds number relationship for hot-wire anemometers

02 p0223 A70-12101

Thermal entrance region effect on Nusselt number determination in asymmetrically heated rectangular duct with uniform heat flux

07 p1425 A70-20223

Thermal boundary layer thickness and Nusselt number approximations for heat transfer in laminar flow along flat plate with power law heat flux distribution

08 p1599 A70-21583

Single fluid theory for plasma laminar flow in field-free region of circular tube, obtaining friction factor and Nusselt number correlations

08 p1552 A70-21585

Heat transfer coefficient to gas in tube under unsteady heat flow conditions, studying Nusselt number dependence on Reynolds and Prandtl numbers

09 p1787 A70-22173

Local Nusselt numbers beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid

09 p1790 A70-23554

Nusselt numbers of nonstationary and stationary heat transfer between metal spheres and liquid flow, showing bulk heat and geometry dependence

12 p2330 A70-27288

Laminar flow heat transfer in annuli, discussing correlation of local Nusselt numbers

17 p3197 A70-35545

NUTATION

Rotational motion of self excited symmetric gyroscopes applied to attitude control and nutation damping of space vehicles

01 p0143 A70-10929

Inertial damper optimum parameter selection for achieving maximum nutation damping factor for gyroscopic stabilizer

01 p0091 A70-10985

Nutational NMR nonuniform magnetic field stabilizer for beta spectrometer, structural details and circuit schematic

03 p0485 A70-13467

Single degree of freedom nutation damper motion instability on dual spin stabilized spacecraft ascribed to parametric excitation by transverse angular rates

04 p0764 A70-15585

Liquid filled dampers for nutation damping of spacecraft with momentum wheel for attitude stabilization

06 p1154 A70-17163

Cross coupled rotational motions of free solid body carrying nutation-damping pendulums

07 p1335 A70-19808

Heavy solid body motion about stationary point at small nutation angle, estimating region of series convergence representing periodic solutions to motion equations

07 p1336 A70-20298

Earth free diurnal nutation parameters determination from latitude observations, establishing amplitude and phase time-independent variations

08 p1488 A70-21154

Nutation damping in gyrostabilization for multispin satellites in terms of energy momentum and damping torque arguments

11 p2119 A70-25357

TACSAT 1 communication satellite design, dual-spin stabilization principles and dynamic characteristics, noting nutation behavior

[AIAA PAPER 70-455]

11 p2120 A70-25447

Spin axis motion of n-body coaxially mounted cluster of differentially spinning bodies, considering combined precession and nutation

11 p2123 A70-26128

Fluid sphere gyro satellite nutation sensor

11 p2057 A70-26504

Dual spin satellite stability with four mass nutation damper

12 p2314 A70-27842

Nutation damper for dual-spin spacecraft, considering various two degree of freedom systems with two natural frequencies

14 p2655 A70-31367

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect

[AIAA PAPER 69-857]

15 p2812 A70-32508

Ball in tube nutation damper for spinning satellite, describing design, testing and fabrication techniques for achieving low friction level

16 p2985 A70-34136

Precession-nutation dependence on earth structure based on oscillations theory of ellipsoid with rotating fluid contained in rigid envelope

16 p2980 A70-34316

Dynamic behavior of eccentric annular mercury nutation damper, using variational principle of least viscous frictional power loss

17 p3023 A70-34770

Critique of Ruderman theory of Crab pulsar LF wobble as long wavelength oscillation of superfluid vortex lattice

19 p3522 A70-38604

Torque free spinning satellite with flexible appendages, investigating design parameters effects on nutational stability

[AIAA PAPER 70-1046]

19 p3534 A70-38861

Nutational stability and closed loop position control of dual spin spacecraft with despun platform

[AIAA PAPER 70-975]

20 p3715 A70-39554

Variable parameter nutation damper SAS-A dual spin satellite, discussing design and expected in-flight performance by digital simulation

[AIAA PAPER 70-972]

20 p3669 A70-39557

Dual spin bodies stability, controlling nutation by passive damper fitted to despun platform

22 p4110 A70-42486

Correctable gyroscope stability estimation by energy method taking into account nutation and precession motions

22 p4039 A70-43556

Rigid body rotation about fixed point under oscillatory precession and nutation due to noncentral attractive force, showing errors in Euler equations

23 p4247 A70-44792

NUTATIONAL OSCILLATION

U NUTATION

Heart rate change effect on myocardial oxygen consumption and nutritional circulation with constant coronary blood flow suggesting oxygen extraction independence of capillary surface

02 p0235 A70-11991

Dehydrated food effects on human functional state, noting published literature on food composition, preparation, caloric and nutritional values, digestibility, etc

03 p0435 A70-13703

Nutrition and atherosclerosis - Conference, Bad Ragaz, Switzerland, October 1968

03 p0430 A70-14276

Statistical data to demonstrate atherosclerotic diseases affected by cholesterol and saturated fatty acids in foods

03 p0430 A70-14277

Interactions between nutrition, blood coagulation and atherosclerosis by Duguid theory, emphasizing fibrinolysis, thrombosis and alimentary lipids

03 p0431 A70-14280

Chlorella seaweed hybrid strains containing larger amounts of amino acids than original parent species

04 p0630 A70-14573

Temperature and morphological changes of animals adipose tissue under various nutrition conditions, based on measurements by thermocouples implanted in fat deposits

04 p0640 A70-15514

Nutritive value of mycelium of *Cantharellus cibarius* mushroom on rats compared with eggs and fresh and sour milk

05 p0809 A70-17111

Dehydrated food effects on human functional state, noting food composition, preparation, caloric and nutritional values, digestibility, etc

11 p1989 A70-25503

Space diets with pure nutrition for balanced nutrition obtained through biological and physicochemical synthesis

23 p4157 A70-45027

NUTRITIONAL REQUIREMENTS

NT CALORIC REQUIREMENTS

Human capacity to discriminate between poorly and well balanced diets and liability to select amino acid imbalanced mixtures for deficient nutrient

01 p0028 A70-11314

Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation

04 p0630 A70-14578

Aircraft crews in-flight medically controlled feeding, discussing physiological and nutritive value of foods

06 p1001 A70-17669

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors

07 p1207 A70-19496

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure

09 p1623 A70-22088

Fasting and postprandial serum amino acid patterns of human males fed protein-free or protein-sufficient diets

09 p1621 A70-23399

Prolonged hypodynamia effect on human nutritional habits and protein metabolism, noting decrease in energy requirement and body weight

10 p1814 A70-24675

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure

15 p2693 A70-32684

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors

15 p2685 A70-32741

Dietary amino acids combination allowing maximum growth in rat

16 p2850 A70-34320

NUTS [FASTENERS]

Resilience coefficient of intermediate elements of threaded connection related to transverse and axial nut dimensions by least squares method

05 p0856 A70-17012

Nut and bolt locking, describing cotter pins, lock washers, elastic washers, prestressing, nut with lock nut and self locking nuts

06 p1075 A70-17436

NYLON [TRADEMARK]

Nylon 6 polyamide tensile stress cracking by metal thiocyanates in aqueous and nonaqueous solutions, comparing results with cracking by metal halides

10 p1907 A70-24300

Hypersonic wind tunnel testing of Plexiglas and nylon hemispheres instrumented with strain gages and thermocouples, comparing with calculated strain, temperature and ablation

13 p2520 A70-28727

Packable near weightless nylon cloth wings without rigid members for improved aeronautical efficiency in cargo delivery, powered flight and rocket and spacecraft recovery

[AIAA PAPER 70-880]

17 p3017 A70-34815

Phenolic nylon thermal decomposition, considering surface reradiation and physical parameters effects

17 p3196 A70-35242

Longitudinal tension impact tests on nylon tape and Apollo pilot parachute riser construction, determining wave propagation effects

[AIAA PAPER 70-1182]

21 p3843 A70-41831

NYLON RESINS

U POLYAMIDE RESINS

NYQUIST FREQUENCIES

Linear control circuits transfer function analysis, revising Nyquist criterion

07 p1328 A70-20212

Prelaunch dynamic response test parameter selection for control systems for space complexes with form of Nyquist locus

13 p2381 A70-28423

NYSTAGMUS

Astronaut vestibular fitness determined from threshold labyrinthine tests on isolated horizontal and vertical semicircular canals

03 p0437 A70-14059

Quantitative characteristics of central compensatory process, investigating nystagmus responses in guinea pigs subjected to bilateral labyrinthectomy

06 p0995 A70-17806

Postcaloric nystagmus clinical evaluation by analog computer measuring fast-phase eye displacement in Vestibular Function laboratory

08 p1448 A70-21942

Alcoholic beverages effect on positional nystagmus and Coriolis acceleration 11 p1993 A70-26520

Anatomical and physiological correlations between mathematical model components for vestibular nystagmus mechanisms 13 p2351 A70-29331

Gravity effect on positional alcohol nystagmus in man and rabbits, observing threshold value in weightless state 13 p2359 A70-29442

Vestibular nystagmic and electrical responses facilitation, inhibition and habituation, noting modulation by subcortical and cortical systems 14 p2538 A70-30909

Vestibular nystagmus evocation by conditioned reflexes technique after pure tone stimulation 14 p2538 A70-30910

Arousal effects on vestibular nystagmus in man, discussing forced alertness in mental arithmetics form 14 p2538 A70-30911

Ocular fixation index and vestibular stimulation by caloric tests, discussing central processes for nystagmic rhythm regulation 14 p2538 A70-30912

Pattern center hypothesis for habituation to centrifugal and linear accelerations in man, investigating aftereffects by nystagmography 14 p2538 A70-30913

Electronystagmographical responses comparison with electroencephalographic record during prolonged torsion swing vestibular tests under cortical and subcortical factors influence 14 p2539 A70-30917

Hearing loss thresholds and spontaneous and caloric nystagmus correlationship in test pilots 15 p2690 A70-31893

Vestibular stimulation by square wave acceleration, evaluating Ewald laws for nystagmus behavior 17 p3037 A70-35127

Nystagmic response to directional inert shift of endolymph in semicircular canals in frontal plane head subject rotation 18 p3220 A70-36635

Vestibular thermal stimulation method using distilled water injected into ear, discussing nystagmus appearance and duration 19 p3367 A70-37355

O

O RING SEALS

Ring seal elements structural parameters influence on fluid leakage at various shaft speeds and fluid pressures 07 p1294 A70-19123

O STARS

Radial velocities determined from prism spectrograms for O and B stars in Milky Way field in Scorpius 02 p0369 A70-12062

Catalog of faint Ob stars between Carina and Centaurus 02 p0370 A70-12075

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy 03 p0565 A70-13230

Color difference method for interstellar extinction laws applied to O stars study 06 p1140 A70-17641

O star red shift considering gravitation interpretation effects on stellar masses 07 p1391 A70-20465

O and B type stars neutral He lines, studying UV line blanketing effects on predicted departures from LTE 08 p1571 A70-20912

Von Zeipel 1128 O star spectrum analysis, discussing mass, He/H ratio, metal abundances, etc 08 p1571 A70-20913

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy 08 p1580 A70-21663

O-Of stellar evolution yielding Wolf-Rayet type, considering spectral evidence and H-He interaction 15 p2800 A70-32202

Luminosity criteria in O stars via narrow band photoelectric photometry suggesting VI Cygni proximity 15 p2807 A70-32804

Lyman alpha absorption by interstellar neutral hydrogen observed in O and B stars UV spectra 17 p3162 A70-34898

Observational evidence concerning validity of Saha and Boltzmann laws in O, B and A stellar atmospheres 17 p3170 A70-35387

O type stellar clusters hydrogen line observation revealing associated gas clouds 18 p3328 A70-37172

Carina spiral feature progress report covering O and B star distribution, optical and radio H 2 and H 1 sources and cosmic dust 18 p3330 A70-37185

O and B stars velocity dispersion, considering Oort terms and average residual radial velocity 18 p3330 A70-37188

O-B5 stars mean ages estimation by hyperbolic approximation based on distribution in stellar associations 19 p3524 A70-38762

OB star distribution statistical analysis in Southern Milky Way, discussing concentrations, relations and systematic deviations 22 p4100 A70-42854

Stellar ring 274 reality confirmed by photometric measurements of OB member stars, determining variable shell star P Cygni location 22 p4101 A70-42868

Of stars mean spectrophotometric gradients and Balmer jump data with corrections for interstellar absorption 24 p4409 A70-45632

OA O

NT OAO 2
NT OAO 3
NT OSO
NT OSO-B
NT OSO-1
UV photometry of stars and galaxies from OAO-2, discussing instruments and observational results 02 p0378 A70-12580

UV photometry from OAO, observing planets, gaseous nebulae, X ray source, quasars, Crab Nebula, extragalactic nebulae, etc 02 p0303 A70-12705

OAO thermal subsystem design to provide temperature control for experiments and spacecraft electronic devices 04 p0765 A70-15668

Monograph on OAO design, experiments, testing, mission operations and history 07 p1393 A70-19100

Lightweight mirror blanks of titanium silicate for OAO-4 providing thermal and dimensional stability 09 p1678 A70-22952

Modal expansion method applied to thin deformable primary mirror surface control for orbiting astronomical observatory 13 p2403 A70-28427

Celelescope TV photometer system operation on-board OAO by mathematical simulation 16 p2906 A70-33174

Solid lubricated contacts performance in Nimbus and OAO spacecraft, discussing slip ring assembly and noise problems in Ag-graphite brushes 16 p2920 A70-33810

Interstellar Lyman alpha observations with OAO, providing upper limit to neutral hydrogen column density 17 p3162 A70-34899

Multispectral UV sky mapping and heavenly body intensity measurement onboard OAO 2 satellite 17 p3179 A70-35264

Lunar based vs orbiting astronomical observatories, discussing limitations imposed by geocorona 22 p4108 A70-43630

OA O

UV photometry from OAO-2, describing Wisconsin instrumentation and equipment 20 p3624 A70-39009

Orbiting Astronomical Observatory II systems performance 21 p3928 A70-40980

OAO 2 for UV telescope sky mapping and spectrophotometric measurements of celestial bodies 23 p4261 A70-44666

OAO 2 satellite Telescope astronomical TV system, describing various developmental problems for future guidelines 24 p4415 A70-45824

OA O

Heat pipes in OAO 3 spacecraft for minimizing structural temperature gradients and validating thermal control approach 21 p3946 A70-41045

OA O

U OAO

OBLATE SPHEROIDS

Oblate earth gravitational field effect on ballistic missile trajectories, including body range determination and quadratures expressed by elementary functions 01 p0178 A70-10423

Earth oblateness effects on lunar and interplanetary trajectories, using algorithm based on orbital elements variations [AIAA PAPER 70-97] 06 p1146 A70-18203

Body surface curvature effect on surrounding laminar flow field, investigating oblate spheroids of various thicknesses 07 p1259 A70-19977

Solar oblateness and gravitational quadrupole moment related under assumption of magnetic and

OBSERVATION AIRCRAFT

velocity fields absence in surface layers, including rotation effects 08 p1570 A70-20902

Neptune and Pluto oblateness inferred from analogous similarities of mass, diameter and mean density with Uranus and Mars planets 09 p1750 A70-22096

Space probe trajectory near second order integration under influence of solar oblateness and gravitation 14 p2635 A70-30288

EM wave scattering and diffraction by acoustically soft and hard oblate spheroids 15 p2701 A70-32413

Prolate and oblate wave functions for EM radiation from spheroidal antenna in surrounding inhomogeneous medium 17 p3044 A70-35063

Plane wave incident on oblate spheroid or disk, deriving LF field scattering 18 p3335 A70-35974

Earth ellipticity in past, using hydrostatic equations based on density distribution and angular velocity to obtain oblateness 21 p3820 A70-41973

Solar rotation, discussing oblateness, solar wind torque, main sequence stars rotating core, gravitational quadrupole moments and Li and Be depletion 23 p4252 A70-44829

Nonspherical stars thermal stability, considering solar rotational models and oblateness problem 23 p4252 A70-44833

Solar oblateness calculation based on Stockly differential rotation law application to polytropes 23 p4253 A70-44835

OBLIQUE SHOCK WAVES

Oblique unsteady shock wave structure propagating at large Mach numbers in plasma cylinder under steady magnetic field, showing particle velocity profile discontinuity 01 p0064 A70-10999

Rocket nozzle originated oblique shock waves effect on near-field plume impingement flows, heat transfer and pressure distribution 04 p0737 A70-15421

Numerical results for perturbed downstream flow field resulting from entropy wave interaction with normal shock and oblique shock generated by wedge flow 05 p0835 A70-16788

Supersonic oblique shock wave reflection on turbulent boundary layer, considering layer separation and pressure effects 07 p1255 A70-19210

Oblique blast wave interaction with small bend along plane wall analyzed for diffraction using conformal transformation and complex variable techniques 10 p1869 A70-24524

Evolutionary hydromagnetic shock perturbation by incident small amplitude hydromagnetic wave calculated for diverging wave amplitudes and directions 11 p2036 A70-26017

Oblique shock initiated by 7 July 1966 proton flare in solar wind observed by satellite magnetometers outside magnetosphere 11 p2105 A70-26562

Gas-liquid two phase flow dynamics, explaining behavior under normal and oblique shocks 16 p2893 A70-33684

Shock waves and solitons structure propagating oblique to magnetic field in warm plasma based on two-fluid equations 21 p3857 A70-41382

OBSCURATION

U OCCULTATION

OBSCURATION

NT SATELLITE OBSERVATION

NT VISUAL OBSERVATION

Least squares adjustment of observation equations for hybrid systems solved by regarding constraints as observations with zero variances 02 p0289 A70-11798

Optimal control of continuous and discrete observations described by linear differential and recurrent algebraic equations in presence of random perturbations 03 p0447 A70-13341

Optimal control of continuous and discrete observations described by linear differential and recurrent algebraic equations in presence of random perturbations 14 p2561 A70-30717

Linear stationary systems observability with stochastic inputs for linearly independent row vectors, determining state vector components mean values 15 p2716 A70-32346

Linear systems simultaneous optimal stochastic control and observation strategies, assuming quadratic observation cost 16 p2886 A70-33346

Duality of optimal control and observation problems in cases of bounded coordinates and continuously acting perturbations respectively 21 p3801 A70-40605

OBSERVATION AIRCRAFT

NT CL-84 AIRCRAFT

NT G-91 AIRCRAFT

NT OH-6 HELICOPTER

- NT OV-10 AIRCRAFT
 NT RECONNAISSANCE AIRCRAFT
 T-63 gas turbine engine air induction system protection for OH-58A light observation helicopter against debris with minimum power loss and intake air distortion 01 p0164 A70-10681
 NASA operation of Convair 990 jet transport as airborne scientific research platform for optical observations 09 p1682 A70-23504

OBSTRUCTING

U BLOCKING

OCCIPITAL LOBES

- Electrical recording of retinal and occipital potentials in response to stimulation of human visual system used at levels from receptor to striate cortex 07 p1220 A70-19364
 Sensory deprivation induced EEG changes, discussing duration effect on poststimulation occipital alpha frequency 13 p2350 A70-29242
 Occipital migraine in flying personnel, discussing diagnosis and flight status disposition 24 p4297 A70-45344

OCCLUSION

- Acute coronary occlusion effects on adjacent unoccluded artery resistance, discussing responsible mechanisms in ischemic heart 04 p0637 A70-15473
 Occlusion training during hypodynamia with inflatable thigh cuffs to prevent unfavorable effects on cardiovascular system 10 p1816 A70-24689
 Methane and ethane hydrate number measurement, alleviating liquid water occlusion and evaluating pressure effect 13 p2362 A70-29212
 Steady flow of incompressible fluid through converging-diverging tube, considering implications in occlusive vascular disease 15 p2691 A70-31936
 Water and blood flow characteristics in converging-diverging plastic tube, considering implications in occlusive vascular disease 15 p2691 A70-31937

OCCULTATION

NT LUNAR OCCULTATION

NT SOLAR ECLIPSES

NT STELLAR OCCULTATION

- Venus atmosphere ionization distribution, temperature and pressure profiles determined from amplitudes and differential Doppler of radio signals to Mariner 5 during occultation 01 p0186 A70-11084
 Wilson effect in sunspot structure as penumbra foreshortening and disappearance or penumbra occultation by photosphere, analyzing intensity profiles on disk passage photographs 06 p1143 A70-18001
 Mariner 6/7 S band radio occultation probe of Mars atmosphere concerning surface pressure, temperature and existence of ionosphere 15 p2798 A70-31681
 S band occultation experiment for Mariner Mars 1971 orbiters, measuring atmospheric density and ionospheric electron density profiles 16 p2978 A70-34032
 Weather occultation satellite orbit determination by radio wave measurements between master and slave satellites, formulating mathematical model [AIAA PAPER 70-1067] 19 p3529 A70-38880
 Mars lower atmosphere vertical temperature distributions from Mariner 6 and 7 radio occultation data, using improved trajectory estimates 21 p3884 A70-40908
 Taurus A 21 cm radiation anomalous frequency decrease during occultation by sun attributed to particle streams propagating in solar corona 21 p3886 A70-41064

OCCUPATION

- Occupational and age composition of working population of U.S.S.R., comparing cardiovascular and respiratory systems 22 p3969 A70-42904

OCEAN BOTTOM

- Continental migration role in lunar maria formation, suggesting similarity with geological formation of earth ocean floor 09 p1765 A70-23797
 Oceanic ridge volcanic rocks alkali metal, alkaline earth, rare earth, nickel and major element content, observing partial melting 10 p1877 A70-24648
 Water depth determination by various remote sensing techniques, discussing bottom reflection, wave analysis, thermal anomalies and laser ranging by time difference 12 p2217 A70-26916
 Shallow water bottom biota, sediments and morphology determination by aerial and satellite photography 17 p3079 A70-35620
 Amino acid racemization as enantiomers in core sediment samples 21 p3781 A70-41896
 Electromagnetic variational soundings of ocean floor earth crust upper mantle near magnetic equator 23 p4189 A70-44066
 Ocean floor-spreading tectonic effects, considering Arabian Shield separation from African continent 24 p4332 A70-46408

OCEAN CURRENTS

- Circulation model of joint ocean-atmosphere system constructed with ocean and atmospheric models, discussing heat transfer by ocean currents 04 p0680 A70-15297
 Inertial Navigation System /INS/, geodetic reference and optimal data smoothing for estimating vertical deflection and ocean currents 22 p4069 A70-43665
 Ocean currents and sea surface temperature remote sensing by Nimbus 2 High Resolution IR Radiometer 24 p4332 A70-46400

OCEAN SURFACE

- Interaction between turbulent air flow and water surface based on Fourier analysis of finite intervals of field 11 p2042 A70-26775
 Microwave radiometer as passive satellite sensor for observing ocean surface properties 12 p2228 A70-26902
 Microwave radiometric temperature measurements generating curves relating sea state and surface temperature 12 p2215 A70-26903
 Sea and sea ice remote sensing by four-frequency radar /4FR/ system in EC-121 aircraft 12 p2215 A70-26904
 Sea roughness effect on bandwidth of radar backscatter, analyzing Doppler signals of eight millimeter aircraft navigation system 12 p2228 A70-26906
 Microwaves reflection, absorption and thermal emission at smooth air-water interface, tabulating calculated coefficients 12 p2183 A70-27169
 Laser profilometer for airborne ocean wave profile measurement 12 p2249 A70-28003
 Radar cross section sea clutter model based on slightly rough surface superposition on swell structure 13 p2366 A70-29215
 Motion equation derivation for incompressible fluid flow in baroclinic ocean, allowing for horizontal macroturbulent exchange 14 p2601 A70-30136
 Sun glitter on sea surface from space photographs, considering wind and sea conditions effect on shape and brightness of patterns 14 p2572 A70-30345
 UHF propagation measurement over sea for varying surface refractivity and meteorological conditions, noting diurnal variations 14 p2549 A70-30513
 Sea surface temperature and atmospheric moisture determination from satellite measurements of atmospheric thermal radio emission on quiet and cloudy windy days 15 p2770 A70-32069
 Anomalous dark areas in sunglint patterns from ATS photographs, considering water temperature effect on ocean surface conditions 16 p2897 A70-33725
 Sea water temperature and salinity effects on smooth ocean surface radiation in centimeter range 18 p3250 A70-36968
 Atmospheric layer attenuation of thermal radiation from water surface by airborne radiation thermometer measurements 18 p3260 A70-36969
 Autocorrelation functions of anomalous gravitational and magnetic fields for ocean lines, relating Mohorovičić boundary and Curie isotherm 19 p3408 A70-37318

- Forecasting air temperature over North Atlantic, analyzing atmospheric parameters informativeness 20 p3663 A70-39274
 Ocean swell wavelength and propagation direction measurements, using Fourier optical analysis of Apollo 7 space photography 22 p4029 A70-42766
 Sea surface temperature relationship with ocean currents, using bathythermograph data 22 p4014 A70-42768
 Ocean roughness determination from satellite photographs sunglint patterns, indicating surface wind speeds 22 p4014 A70-42770
 Airborne optical scanning gyro for measuring sea surface radiation emission 22 p4039 A70-43558
 Ocean wave spectra from bistatic radar scatter data, using time delay Doppler-frequency map 23 p4184 A70-43802
 Ocean currents and sea surface temperature remote sensing by Nimbus 2 High Resolution IR Radiometer 24 p4332 A70-46400
- OCEANOGRAPHY
 NT MARINE BIOLOGY
 Reworking of deep-sea sediments as indicated by vertical dispersion of Australasian and Ivory Coast microtektite horizons, implying years of deposition 01 p0178 A70-10474
 UHF radio telemetry system using pulse signal to measure and transmit sea waves amplitude and frequencies data to shore-based recorder 03 p0453 A70-14352
 Earth environmental satellite data for oceanography and hydrology, discussing sea surface temperature mapping, low level wind conditions, snow and ice mapping, etc 04 p0676 A70-14635
 Bottom topography effect on jets stability in baroclinic fluid, discussing two layer model 04 p0715 A70-15518
 Remote sensors for measurement and mapping of ocean color variations, discussing Widerange Image Spectrophotometer and Water Color Spectrometer 06 p1073 A70-18592
 Spatial resolution and repetition intervals for optimum utilization of space-derived remotely sensed data of ocean surface features 06 p1060 A70-18593
 Aerospace technology contributions to oceanography, discussing lightweight structures, electronics, automatic systems and submarine laboratory application 07 p1263 A70-19135
 Range positioning system as automatic indicator in oceanography, aboard land vehicles and aircraft 08 p1541 A70-21360
 Abstracts with references to literature sources on oceanography from space and aircraft 09 p1665 A70-22014
 Turbulence and internal waves in stably stratified atmosphere and ocean, proposing velocity and temperature spectral behavior model 09 p1716 A70-22370
 Internal waves breaking on sloping surface in two fluid system, studying interfacial shear instability by capacitance probe on-line computer system 09 p1717 A70-22371
 Microwave radiometric techniques for continuous all-weather remote sensing of sea conditions from satellites, discussing foam and surface ripple effects [AIAA PAPER 70-318] 09 p1677 A70-22869
 Satellite remote sensors for oceanographic applications, estimating resolution requirements for temperature, spatial interval, roughness patterns, wind speeds, etc 09 p1668 A70-22880
 Microwave radiometer as passive satellite sensor for observing ocean surface properties 12 p2228 A70-26902
 Passive remote sensing in microwave spectra for oceanographic applications including sea state, pollution and sea ice properties 12 p2216 A70-26905
 Aerial oceanographic photographic image enhancement by including blue spectral region, presenting Apollo 9 space photographs 12 p2217 A70-26917
 Oceanographic potential of spacecraft, discussing synoptic scanning, International Decade of Ocean Exploration, etc 12 p2225 A70-27746
 Spacecraft tracking methods applied to solid earth and ocean physics 15 p2809 A70-31685
 Oceanic volcanic rocks, discussing dispersed element characteristics to describe origin of magma types 15 p2731 A70-32100
 Oceanographic phenomena inference from satellite cloud photographs, developing seasonal cloud climatology for Peru Current area 16 p2897 A70-33713
 Fluidic technology applications to space and oceanography, discussing control, monitoring, sequencing and signal processing 16 p2845 A70-33714

- Aerial IR surveys of surface temperature patterns of Hudson Bay during ice free seasons
17 p3079 A70-35621
- Criticism of theory for cosmogenic tritium produced oceanic He 3 excess
21 p3920 A70-41883
- Earth orbital experiments synthesis in space programs methodology, discussing examples in astronomy, biology and oceanography research
22 p4097 A70-42500
- Ocean swell wavelength and propagation direction measurements, using Fourier optical analysis of Apollo 7 space photography
22 p4029 A70-42766
- Space and astronomic methods applied to solid earth and ocean physics
22 p4025 A70-43669
- North Carolina continental shelf discolored water origin, movement and dissipation from Apollo 9 photograph interpretation
24 p4329 A70-45361

- ### NT INDIAN OCEAN
- ### NT PACIFIC OCEAN
- Earth surface hydrology effect incorporated into atmospheric circulation mathematical model for climate, considering ocean as atmospheric moisture reservoir
04 p0680 A70-15296
- Earth rotational velocity irregularities and horizontal motions of continental blocks at expense of oceanic hemisphere, noting seasonal distance changes
04 p0681 A70-15477
- Sea surface sunglint pattern irregularities in earth orbiting satellite photographs, observing dark patches
05 p0838 A70-16152
- Ocean surface roughness time variation effect on incident laser beam, analyzing motion picture data by computer program
05 p0860 A70-16687
- Wave surface elevation and velocity fluctuations in ocean upper layer under wind waves, discussing correlation coefficients between vertical and horizontal velocity components
06 p1097 A70-17792
- Backscattered sun and skylight spectra from sea obtained from low flying aircraft as measure of chlorophyll concentration
09 p1666 A70-22250
- Oceanic wind and wave predictions by satellite radar radiometer using single receiver to determine wind velocity
09 p1668 A70-22877
- [AIAA PAPER 70-310] Survival on sea following air accident, based on medical and technical considerations, emphasizing life jackets
09 p1625 A70-23008
- Wastes dispersion discharged into sea analyzed by aerial photography, measuring diffusion
10 p1879 A70-24749
- ## OCTAHEDRAL RESEARCH SATELLITES
- ### U ENVIRONMENTAL RESEARCH SATELLITES
- ## OCTAHEDRITE
- ## U MINERALS
- ## OCTAHEDRONS
- Octahedral solid-solid phase transitions by differential thermal analyzer and scanning calorimeter module, discussing entropy change causes
21 p3784 A70-42264
- ## OCULAR CIRCULATION
- Binocular fundus refectometry and plethysmography in rabbits and man after dye injection and in patients with carotid occlusion
24 p4310 A70-46345
- ## OCULOGRAPHIC ILLUSIONS
- Illusory visual signals experienced by pilots ascribed to aerodynamic forces interference with normal functional relationships between sensory systems
09 p1627 A70-23131
- Pilot disorientation in dark night takeoff accident type, presenting illusory angular displacement of vertical, flight paths and sequential accelerations
13 p2359 A70-29441
- ## OCULOMOTOR NERVES
- Neurons and perineuronal glial cells quantitative relations in visual cortex from anesthetized dogs
01 p0025 A70-11030
- Eye movements during two dimensional tracking tasks, showing oculomotor system transfer characteristics function of target motion spectral content
03 p0427 A70-13948
- Human saccadic system properties, discussing eye movements and correction saccades with and without visual fixation points
03 p0427 A70-13949
- Efference role in eye tracking of moving targets, discussing oculomotor system role
03 p0439 A70-14345
- Non-specific influences on rabbits neurons reaction to nonvisual stimuli in central visual pathway using microelectrodes implantation in visual cortex
05 p0802 A70-16624
- Efferent and afferent fibers presence in optic nerves determined by unilateral and bilateral enucleation of dogs and cats
07 p1207 A70-19476
- Nonlinearity of human eye movement control system in two dimensional tracking tasks, explaining visual axis lags as time delays dependent on target motion
08 p1447 A70-21724
- Prolonged hypodynamia effects on visual analyzer, investigating functional weakening, fundus oculi appearance change and restoration after normal activity resumption
10 p1816 A70-24687
- Anatomical and physiological correlations between mathematical model components for vestibular nystagmus mechanisms
13 p2351 A70-29331
- ## ODESSA METEORITE
- Nitrogen content of Odessa and Canyon Diablo iron meteorites from thermal neutron activation, Kjeldahl distillation and alkali fusion methods
21 p3921 A70-41942
- ## ODORS
- Odor threshold levels for unsymmetrical dimethylhydrazine/UDMH/ and nitrogen tetroxides
18 p3224 A70-36227
- ## OFF-ON CONTROL
- Picosecond on-off light gate based on Kerr cell design, using optical pulses to induce birefringence in liquids
01 p0111 A70-10571
- Monolithic zero crossing AC trigger IC for thyristor power control systems operating in on-off mode
08 p1478 A70-20786
- Nonlinear control systems on-off oscillations with instants of commutation determined by simultaneous equations, noting feedback control
11 p2027 A70-26254
- Laser field transient properties in switching-on processes, discussing Q switching, detuning switch-off and pump power switch-on
11 p2064 A70-26843
- Performance cost functions for reaction-jet controlled spacecraft during on-off-on limit cycle
13 p2382 A70-29072
- Book on differential dynamic programming covering algorithms for continuous time control, bang-bang, discrete time and stochastic systems
14 p2560 A70-30631
- Initial condition sensitivity functions in bang-bang and optimal control, considering discontinuous functions, perturbation equations, iteration algorithms terminal states, cost functions, etc
16 p2885 A70-33325
- Bang-bang control of electrohydraulic servomechanisms, approximating optimal control by quasi-optimal controls
16 p2887 A70-33685
- Start-stop dynamics as cost effective method for computerized testing of digital modules and subassemblies, providing static and dynamic capability
17 p3062 A70-35504
- Performance cost functions of on-off limit cycle controllers for reaction jet controlled system
17 p3056 A70-35552
- Steady state off-on attitude control strategy for minimizing propellant consumption and thrust ignitions of satellite in presence of environmental disturbance torques
17 p3180 A70-35556
- Bang-Bang principle and vector functions at extreme points, considering Lebesgue measure and Liapunov theorem
23 p4176 A70-44237
- ## OGEE WINGS
- ## U VARIABLE SWEEP WINGS
- ## OGIVES
- Inviscid transonic approximation theory, calculating mixed flow field around nonlifting slender ogive body, accounting for shock wave generation, strength and location
06 p0972 A70-18132
- [AIAA PAPER 70-189] Pointed ogival body of revolution in supersonic flow field, investigating local pressure distributed by variational methods
23 p4136 A70-44992
- ## OGO
- ### NT OGO-A
- ### NT OGO-B
- ### NT OGO-D
- ### NT OGO-E
- ### NT OGO-F
- OGO spacecraft structures, thermal control systems, attitude control, weight and power supplies
15 p2810 A70-31782
- OGOs design evolution with respect to scientific mission requirements
17 p3180 A70-35303
- Complex impedance measurements for monopole antenna for electron densities in/out of OGO satellite wake in upper ionosphere
17 p3080 A70-35771
- OGO 5 observations of quasi-trapped electromagnetic waves in solar wind at 70 kHz
18 p3306 A70-36005
- Electron intensity long term variations above 500 MeV by OGO-5 satellite-borne cosmic ray electron detector, supporting diffusion-convection theory of solar modulation
19 p3497 A70-37522
- Extraterrestrial gamma radiation from Cygnus region of galactic disk, using OGO-5 observations
19 p3501 A70-38087
- Electron densities between inner edge plasma sheet and plasmasphere as function of geocentric radial distance from OGO-3 electrostatic measurements
23 p4236 A70-43834
- ## OGO-A
- Magnetospheric observations of whistler mode emissions by OGO 1 satellite over VLF and LF ranges
04 p0649 A70-15117
- Electron density profiles along OGO 1 orbit portions calculated by measuring harmonic radio beacon transmissions differential Doppler frequencies and Faraday polarization rotation angle
04 p0741 A70-15118
- ## OGO-B
- Micrometeoroid experiments on OGO 2 and OGO 4 satellites, measuring velocity, masses and particle orbits in earth dust cloud
01 p0086 A70-10444
- ## OGO-D
- Micrometeoroid experiments on OGO 2 and OGO 4 satellites, measuring velocity, masses and particle orbits in earth dust cloud
01 p0086 A70-10444
- GEOS A and OGO-4 satellite orbits and trajectory analysis using Definitive Orbit Determination System, discussing tracking stations error rate
24 p4407 A70-45536
- ## OGO-E
- OGO 5 satellite scientific observations, payloads, parameters and objectives
15 p2812 A70-32364
- Cosmic ray electron and positron differential energy spectra during solar quiet times from OGO-5 satellite observations in interplanetary space
19 p3502 A70-38096
- Interstellar cosmic ray electron spectrum flattening below 3 GeV from OGO-5 observations
19 p3504 A70-38106
- ## OGO-F
- Ionospheric electric fields variations in ELF-VLF, confirming OV-1 satellite measurements with OGO 6 data
13 p2403 A70-30082
- ## OH-6 HELICOPTER
- Inertial particle separator-type turbine engine air cleaner for OH-6A light observation helicopter, describing evolution
01 p0164 A70-10682
- ## OHMIC DISSIPATION
- Joule dissipation model for sunspot magnetic field, discussing field fine structure and lifetime
02 p0373 A70-12374
- Heat transmission by current carriers to cryogenic region, ascribing heat flux to Joule effect in conductor
05 p0881 A70-16025
- Heating rate of radio electronic equipment with variable power shown dependent on initial dissipated power
10 p1853 A70-25134
- Gravity wave attenuation in F region investigated for role of ohmic losses
10 p1885 A70-25264
- Ionosphere dynamo region thermal input by Joule heating and solar radiation and coupling to various thermotidal modes, observing semi-diurnal and semi-monthly effects
11 p2047 A70-26569
- Turbulence energy balance equations for conducting fluid flow in longitudinal magnetic field with Joule dissipation
12 p2282 A70-28227
- Infrasonic waves generated by pulsating aurora, using Joule heating and Lorentz force coupling
13 p2399 A70-29236
- Flat plate and cylinder with periodic Joulian heating from time dependent heat source, analyzing transient temperature distribution
14 p2664 A70-30269
- Ohmic dissipation in MHD plasma acceleration, demonstrating interaction with electric field and magnetic induction
14 p2621 A70-30296
- Compressible plasma flow in axisymmetric channels under EM body forces and Joule heating
23 p4228 A70-44934
- ## OHMMETERS
- Portable megaohmmeter for measuring insulation resistance of strain gauge ceramic installations
05 p0848 A70-16378
- ## OHMS LAW
- Ohms law of electromagnetohydrodynamics derived on basis of Lorentz hydrodynamic plasma model, considering plasma conductivity
05 p0890 A70-16852

Ion-acoustic instability effect on HF EM field penetration into plasma taking into account nonlinear Ohm law

11 p2089 A70-25715

Electron-neutral interaction parameters for Ohm law coefficients in multicomponent nonisothermal plasmas tabulated as function of electron temperature

22 p4081 A70-43015

OIL ADDITIVES

Potentiometric analysis for determining acidity and alkalinity in dark mineral oils with additives

05 p0810 A70-15898

Liquid and solid lubricants, discussing properties, temperature ranges, costs, environmental effects and outlook

07 p1316 A70-18953

OILS

NT CRUDE OIL

NT LUBRICATING OILS

NT MINERAL OILS

Purity requirements for oil in hydraulic systems of modern aircraft, discussing filtering devices and Swedish Air Force and SAAB specifications

01 p0130 A70-11359

Diffusivities of argon, krypton and xenon determined in olive oil by curve-fitting analysis of sorption curves

03 p0429 A70-14159

Vibration damping of oil hydraulic system using bladder type accumulator composed of rubber, measuring frequency response of shock absorber

06 p0988 A70-17140

Free incompressible oil jet interaction with mobile plate, discussing plate configuration, oil feed pressure and nozzle diameter, applications to electrohydraulic converter design, etc

09 p1613 A70-22825

Oil pollution remote sensing by aircraft, utilizing 9-14 micron IR mapper, 19.35 GHz microwave radiometer, aerial cameras and multiband video system

10 p1878 A70-24740

Pressure loss in tubulature of oil-hydraulic drive mechanism, allowing for viscosity changes associated with oil temperature and pressure increases

10 p1809 A70-25209

Proportional and flip-flop elements in hydraulic circuits using oils, noting cavitation effect on switching stability in digital elements

14 p2534 A70-30677

U.S. Coast Guard air delivered antipollution transfer system for oil, discussing deployment method, trajectory analysis, rigging techniques and full scale testing [AIAA PAPER 70-1205]

21 p3752 A70-41813

OLEFINS

U ALKENES

OLEIC ACID

Oleic acid concentration effects on electron work function during surface-active agent deposition on Fe, Ni, Cu, Al and steel surfaces

01 p0099 A70-10074

OLFACTORY PERCEPTION

Cortical induction phases estimated by retinal mobility index concerning activity of acoustic, olfactory and cutaneous analysors

08 p1443 A70-20735

Odor threshold levels for unsymmetrical dimethylhydrazine (UDMH) and nitrogen tetroxides

18 p3224 A70-36227

OLIVINE

Abundance levels of K, Rb, Sr and Ba in pyroxenes, olivines and garnets of ultramafic rocks for upper mantle composition

03 p0472 A70-13149

Shock and thermal metamorphism of olivine trachybasalt by nuclear explosion at Nevada test site

05 p0843 A70-16946

Shock wave compression of single olivine crystals and specimens from chondritic meteorites, observing planar deformation microstructures

07 p1391 A70-20353

Olivine and metal compositions of pallassitic meteorites by electron microprobe measurements, obtaining cooling rates

12 p2296 A70-26895

Plagioclases, pyroxenes and olivines in lunar soils and rocks, using X ray diffraction and Mossbauer effect

21 p3899 A70-41528

Apollo 11 lunar rock lavas and breccias, examining opaque minerals and olivine by reflection microscopy, electron probe and optical absorption measurements

21 p3899 A70-41530

OMEGA NAVIGATION SYSTEM

Mark III airborne Omega system designed as receiver-computer to demonstrate real time operation, discussing flight test results

01 p0136 A70-10302

Omega position location experiment applied to ship navigation, air traffic control and moving vehicle surveillance, noting daytime and night fixing accuracy

01 p0136 A70-10307

Satellite navigation efficiency compared with inertial and Omega navigation techniques

01 p0139 A70-11263

Omega position location equipment /OPLE/ experiment data analysis, obtaining quantitative measure of statistical performance of system

02 p0336 A70-12180

User problems in navigation methods, discussing Omega method, Navy Navigation Satellite System and VLF methods

03 p0522 A70-13603

VLF radio wave propagation variations occurring in earth-ionosphere waveguide contributing to errors in OMEGA position lines used to obtain worldwide navigational fixes

03 p0523 A70-13614

OMEGA frequencies propagation characteristics measured to estimate navigation errors from multiple waveguide propagation modes close to transmitter, comparing day and night errors

07 p1330 A70-19222

Earth-ionosphere waveguide propagation variations effects on Omega navigation system position errors

08 p1541 A70-21564

LSI Mark 3 airborne Omega system with computerized signal processing for navigation parameters, discussing system features and flight test results

09 p1719 A70-22190

Omega Position Location Experiment with synchronous satellite /ATS-3/ as radio relay for merchant shipping, air traffic control and moving vehicle location and communication

09 p1720 A70-22193

Omega Position Location Equipment /OPLE/ system, testing operational feasibility of centralized global meteorological data collection system

09 p1722 A70-23030

Signal format for eight station Omega network, considering integrating /DR/ receiver and concept combining time multiplex and frequency multiplex signals

09 p1722 A70-23031

Loran-C and Omega radio navigation systems, discussing hostile environment operation and hardware processing

11 p2081 A70-26507

Course deviation indicator /CDI/ display applicability to tracking Omega lines of position, providing reduction in weight, volume, cost and complexity

12 p2269 A70-27920

Decca, Loran C/D and Omega LF and VLF hyperbolic navigation systems

23 p4215 A70-43865

General aviation aircraft influences on federal airways systems, considering area and Omega navigation examples [AIAA PAPER 70-1314]

24 p4373 A70-45929

OMEGATONS

Omegatron for total and partial pressure measurement or mass spectrometer applications

12 p2231 A70-27262

OMICRON CETI STAR

Omicron Ceti [Mira/ spectrophotometry before, during and after 1969 maximum, noting TiO bandwidth variations

23 p4242 A70-44294

OMNIDIRECTIONAL ANTENNAS

NT MONOPOLE ANTENNAS

S-band omnidirectional antenna patterns measurement procedure and results for Apollo spacecraft configurations, tabulating measure gains

06 p1019 A70-17507

Design features and experimental results of E-fed cavity type suppressed omnidirectional antenna for VHF operation

06 p1022 A70-18020

Stacked, vertically polarized collinear arrays of independently fed omnidirectional antennas for flight testing Doppler radar aircraft warning system

12 p2199 A70-27968

Synthesis of vertically polarized omnidirectional pattern with cascade dipole antennas on conducting cylinder

15 p2697 A70-31832

OMNIDIRECTIONAL RADIO RANGES

VHF omnidirectional range /VOR/ receiver, considering noise reduction problem and active filter importance to signal improvement and system accuracy

22 p3992 A70-43586

Aircraft Doppler VHF omnidirectional range /DVOR/ performance test, noting improvement over VOR system

24 p4375 A70-46240

OMNIRANGE NAVIGATION

U VHF OMNIRANGE NAVIGATION

ON-LINE PROGRAMMING

On-line electronic integration of aortic flow during systole to provide beat by beat readout of stroke volume

01 p0038 A70-11044

Hardware-software integrated time sharing computer system for testing transmission control units and associated terminals on line

02 p0275 A70-12189

Computer program for on-line analysis of exercise ECG considered for improved diagnosis of ischemic heart disease

05 p0805 A70-16105

Display Oriented Computer Usage System /DOCUS/, discussing on-line display console management in multiaccess environment, display oriented language, compiler, etc

05 p0817 A70-16181

BR-90 visual analysis control as flexible and versatile display for command and control, discussing on-line data processing, maintenance, etc

05 p0827 A70-16182

Flight plans monitoring in real time with on-line computer for optimal route, fuel consumption and speed

05 p0817 A70-16362

On-line system transmitting experimental data from optical spectrometer to central computing facility for magnetic tape recording

05 p0818 A70-16846

On-line computer programs allowing for man machine interactions in linear circuits design

06 p1015 A70-18417

Computer-generated shaded flicker-free on-line digital video display, allowing superimposed vector graphics with light-pen interaction

09 p1640 A70-22033

Computer aided on-line test generation for prelaunch checkout, describing interpretive test language for rapid man machine information transfer [AIAA PAPER 70-384]

10 p1846 A70-24921

Space vehicle velocity-attitude optimal control for on-line trajectory control schemes

11 p2025 A70-26216

Spacecraft launch computerized simulator, discussing operational characteristics applicable to on-line real time process control

11 p2013 A70-26217

Space vehicle on-line tracking with impulsive thrust maneuver by sequential estimation scheme, reducing radius measurement error

11 p2008 A70-26237

On-line parameter updating for relationship between Martian atmospheric density and height above surface during spacecraft descent based on least squares approach

11 p2113 A70-26318

Computerized on-line industrial inspection involving automatic machine sequential control and product geometry error correction, discussing hardware and software requirements [SME PAPER IQ-70-712]

12 p2241 A70-27088

Suboptimal control of discrete input system with bounded state and control variables, developing algorithm for on-line computation

12 p2203 A70-27409

On-line reduction of nystagmic data during vestibular bithermal caloric testing by analog technique

15 p2685 A70-32570

On-line computer aided design of fixed point digital filters simulating direct, cascade and parallel bit representations

15 p2711 A70-32598

Filters design by on-line graphic interface computerized synthesis utilizing three screen CRT display

16 p2867 A70-33041

On-line optical data processing using CRT with electro-optic target crystal

16 p2903 A70-33132

Direct access on-line information retrieval system combining computer assisted instruction and bibliographic retrieval, using thesaurus for literature indexing

17 p3048 A70-34600

On-line final V/STOL Wind Tunnel Data Encoding and Evaluation System /WINDEE/ for complex powered models, using computer monitoring

17 p3049 A70-35494

On-line display of pulsed rocket engine performance data using hybrid computer

17 p3063 A70-35512

Computer driven on-line CRT graphics displays for data acquisition and reduction

17 p3063 A70-35513

Solid state display for on-line information retrieval using light emitting crystals, integrated circuits and hybrid packaging

17 p3063 A70-35514

Commercial air transport mission payload and range capability analysis, noting on-line flight planning computers [AIAA PAPER 70-899]

17 p3204 A70-35815

Data management methodology for test facilities, considering on-line analog/digital computers

19 p3383 A70-37922

Pulsar single pulse search at Jodrell Bank by on-line computer

21 p3923 A70-42102

ONBOARD EQUIPMENT

NT AIRBORNE EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

NT SPACECRAFT ELECTRONIC EQUIPMENT

Onboard radar self contained all-weather landing and taxiing /SALT/ system, discussing concept, requirements and results [AIAA PAPER 69-1053]

01 p0138 A70-10641

Si solar cells for powering artificial satellites onboard equipment, discussing fabrication and substitute materials

01 p0011 A70-11253

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation

01 p0198 A70-11518

Digital onboard telecommunications and tracking equipment based on Dioscures two satellite system for L band operation

03 p0442 A70-12990

Digital telemetry systems for geophysical satellites, describing onboard and ground systems design criteria and experimental results

03 p0451 A70-13837

Cockpit information transfer between pilot and flight control information displays improved by onboard data processing system

03 p0436 A70-14021

Optical approach navigation experiment on 1969 Mariner mission to Mars demonstrating accuracy potential of spacecraft-based measurement

[AIAA PAPER 70-70]

06 p1103 A70-18152

Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data

[AIAA PAPER 70-39]

06 p1146 A70-18186

Onboard and ground checkout systems for space station and space shuttle operations

[AIAA PAPER 70-245]

07 p1251 A70-20373

MADAR onboard maintenance system designed for C-5 aircraft monitoring line replaceable units in electrical, avionics, environmental, mechanical and propulsion systems

[AIAA PAPER 70-243]

07 p1195 A70-20375

Onboard automatic test equipment design, evaluating failure detection and reporting ability

08 p1470 A70-20667

Engine performance monitoring system (EPMS) for aircraft jet onboard operation analysis and failure detection

08 p1558 A70-20668

Built-in test equipment for automatic flight control systems, discussing testing programs and fail safe hybrid circuitry

08 p1471 A70-20670

Liquid helium cryostat for onboard satellite storing designed with allowance for overloads and vibrations during powered flight

08 p1440 A70-21220

Grand tour space probe optics for observation of objects on planet, considering atmospheric refraction indices effect

09 p1700 A70-23768

Multiple access technique for millimeter wave satellite communications, noting weight and size of onboard equipment

10 p1838 A70-24359

Onboard cargo loader to make aircraft independent of specialized ground equipment

10 p1862 A70-25330

Open magnetic electron multipliers (MEM) with continuous dynode and field strips for satellite-borne detection systems, emphasizing extreme UV detectors

11 p2049 A70-25628

Digital closed-loop inflight calibration system for spaceborne particle spectrometers, utilizing cesium iodide crystal and programmable photomultiplier dynode supply

12 p2232 A70-27405

Intercoms 2 equipment for measurement of positive ion concentration, electron temperature and energy distribution, electron concentration between satellite and ground reception points, etc

12 p2207 A70-27500

Checkout systems for shuttle and orbiting space stations, discussing shift from ground to onboard operation

12 p2208 A70-27691

Space navigation for Apollo 11 mission, emphasizing ground and onboard systems, interfaces with guidance and use in phases of lunar landing

13 p2447 A70-28547

Onboard navigational requirements for future planetary missions, discussing major subsystems

13 p2448 A70-28701

Spacecraft based data processing stages to perform navigation during outer planet missions

13 p2448 A70-28704

Spaceborne logarithmic variable prescaling counters for automatic compression of particle measurement data, discussing statistical error

13 p2406 A70-28931

Projectiles yawing and rolling over long flight paths, describing onboard solar aspect sensor and telemetry link to ground stations

13 p2406 A70-29005

Onboard automatic checkout systems for manned space vehicles, investigating data management development costs for thorough tradeoff studies

16 p2889 A70-33803

Nimbus weather satellites mechanical devices and subsystems, including solar array drive, fluid thermal

control sensors, horizon scanners and hydraulic dampers

16 p2921 A70-34105

Scan platform servomechanical actuator for Mariner Mars 1969 spacecraft, emphasizing gear arrangement and train dynamics

16 p2845 A70-34108

Spacecraft hydraulic timers design and qualifications testing, discussing oil selection and temperature dependence

16 p2914 A70-34112

Aircraft onboard maintenance recording system, discussing design and effectiveness

17 p3094 A70-35516

Engine vibration monitoring system for Boeing 747 aircraft, including piezoelectric transducer, transmission assembly and differential charge converter

19 p3426 A70-37898

Logic, arithmetic, control and instruction capacities of dedicated onboard telemetry preprocessor

19 p3383 A70-37904

Satellite electrometer for weak DC currents due to charged particle flux

19 p3428 A70-38485

Free air temperature by onboard satellite IR spectrometer (SIRS), measuring earth spectral radiance in carbon dioxide 15 micrometer band

20 p3660 A70-39077

Michelson IR interferometer spectrometer (IRIS)/design calibration and performance onboard Nimbus 3 satellite, demonstrating data reduction and inflight calibration

20 p3626 A70-39078

ATC by scanning beam ILS and onboard control systems, increasing airport capacity and terminal area safety

[AIAA PAPER 70-1033]

Onboard velocity sensors for VOR/DME navigation systems positional accuracy improvement, describing optimal and suboptimal data filtering

[AIAA PAPER 70-1024]

Medical monitoring system onboard Soyuz spacecraft, describing equipment design, data acquisition and analysis, telemetric recordings, etc

20 p3581 A70-40193

Medical support for long space missions based on space crews morbidity prediction, discussing onboard equipment and astronaut training

20 p3575 A70-40194

X ray astronomy instruments on sounding rockets, balloons and satellites, investigating sources distribution on celestial sphere

21 p3821 A70-40652

Baseline length and orientation of closely coorbiting satellites estimated by combined onboard sensor and ground tracking data

[AIAA PAPER 70-39]

Spacecraft radioisotope thermoelectric generator interference in onboard instrument operation, using analytical models to determine necessary shielding

24 p4375 A70-45175

C5 Malfunction Detection Analysis and Recording (MADAR) subsystem for onboard fault isolation including engines

[SAE PAPER 700820]

Aircraft onboard radar system with landing monitor perspective display of runway operating independently of ground based electronic equipment

[AIAA PAPER 70-1336]

Space shuttle onboard cost effective data management system, discussing checkout, fault isolation, redundant element switching and crew interaction

[AIAA PAPER 70-1293]

Onboard digital information processing, discussing applications to tactical missile guidance and manned vehicles

[AIAA PAPER 70-1230]

ONBOARD NAVIGATION
U NAVIGATION
ONE DIMENSIONAL FLOW

Steady one dimensional flow in gas filled cylindrical tube, studying shock induced compression wave generated by sudden piston acceleration

01 p0062 A70-10804

Relaxation in gas-particle flow, analyzing thermodynamic properties, interactions, single particles and one dimensional flow equations

01 p0062 A70-10805

Plasma unsteady one dimensional flow behind shock wave front in shock tube MGD channel, deriving differential gas dynamics equations

04 p0726 A70-14540

Numerical integration of differential equations governing one dimensional flow of reactive gas, discussing flows of converging-diverging nozzle and normal shock waves

04 p0671 A70-14992

One dimensional unsteady gas flows formation theories extended to include viscosity, heat conductivity, diffusion and chemical reactions effects

04 p0672 A70-15230

Solar wind as one dimensional flow analogous to Laval nozzle flow, discussing rotation and magnetic field effect on model with heat conduction

04 p0754 A70-15352

One dimensional steady adiabatic source nonisentropic flow of thermally and calorically perfect gas in conical nozzle, considering exit divergence and nonuniform flow effects

04 p0619 A70-15427

One dimensional unsteady heat conduction with variable boundary conditions solved by difference-differential method using rectangular and cylindrical coordinates

05 p0957 A70-16295

Burgers one dimensional model equation for homogeneous turbulence treated by Fourier transform in space and time, using Bogoliubov expansion method

05 p0833 A70-16331

Unbranched chain reaction in hydrogen bromide for studying laminar one dimensional flame propagation, determining temperature dependence, velocity and concentrations at fixed time

06 p1177 A70-17797

Interference between body and porous walls of water tunnels by one dimensional solution for usable length of tunnel

07 p1248 A70-19078

One dimensional steady neutral shock wave structure, using expanding Boltzmann equation distribution function in terms of Hermite polynomials

07 p1260 A70-19984

Numerical solutions of one dimensional expanding flow of dissociating gas initially in frozen state for variations in recombination rate

08 p1484 A70-21531

Plane one dimensional motion of shock wave with moving inner boundary investigated for given shock wave front position and gas mass and energy

09 p1659 A70-22432

Monatomic gas rarefaction wave structure in unsteady one dimensional flow from high to low pressure zones, describing numerical solution technique

09 p1604 A70-22449

Magnetic field and gas thermal conductivity effects in analysis of solar wind as one dimensional, steady and spherically symmetric flow

09 p1745 A70-22687

Finite plates impact flow field analysis from isentropic one dimensional flow equations solution through hodograph transformation

09 p1776 A70-22721

One dimensional flow field behind ionizing detonation wave in magnetic field using Chapman-Jouguet hypothesis, accounting for Alfvén speed

09 p1660 A70-22722

Steady and unsteady viscous incompressible one dimensional flows parameters in deformable cylindrical tube determined, solving continuity and motion equations by Galerkin method

09 p1664 A70-23715

Quasi-one dimensional motion of perfect compressible fluid through pipe, considering one dimensional schemes in aerodynamics

10 p1865 A70-24102

One dimensional Navier-Stokes equations solution for viscous heat conducting gas flow involving spherical sink for finite pressure at infinity

10 p1865 A70-24104

One dimensional fluid flows with shock waves described by constructing discontinuous solution for gas dynamic equations, using successive approximation

10 p1866 A70-24113

Radiating shock wave reflection from rigid wall studied for velocity and structural changes, assuming unsteady and one dimensional flow

10 p1867 A70-24140

Partial differential equation describing one dimensional heat transmission problems solved by eigenvalues for initial and boundary conditions

10 p1969 A70-25098

One dimensional compressible constant entropy flows stability, noting unstable regions with fluid particles undergoing compression

11 p2034 A70-25679

Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique

11 p1976 A70-25974

One dimensional compound compressible nozzle flow solution dependence on initial conditions and nozzle geometry, discussing applications to bypass turbojets and solid propellant motors

11 p1976 A70-26137

One dimensional compressible flow with heat addition in nonconstant area duct extended for friction addition, discussing critical thermal shocking

11 p2041 A70-26651

One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions

12 p2212 A70-28189

One dimensional steady state flows and discontinuities in radiation gas dynamics, neglecting radiation pressure, viscosity and heat conduction

13 p2387 A70-28937

Contraction coefficients for compressible discharge through axisymmetric sharp edged orifice, obtaining approximate analytical expression based on one dimensional theory

13 p2389 A70-29549

Unsteady one dimensional motion of reacting gas mixtures in presence of supercompressed detonation waves, discussing transformation into Chapman-Jouguet wave

13 p2522 A70-29772

One dimensional Alfvén fluctuation spectrum of magnetosphere in toroidal, crimping and twisting modes, using numerical integration

14 p2569 A70-30203

Pseudo one dimensional dissociational nonequilibrium nozzle flows, obtaining equilibrium and nonequilibrium solution through similar transformation of governing equations

14 p2527 A70-30264

Gas flow calculations application to gas turbines simulations, considering engine dynamics, one dimensional flow and program structure

14 p2629 A70-30990

Monograph on steady shock waves in one dimensional frictionless gas flows with thermodynamic relaxation, using continuum mechanics

16 p2891 A70-33294

Weak nonlinear one dimensional wave propagation in nonequilibrium flow, using governing system characteristics for reference coordinates

17 p3071 A70-35468

Viscous heat-conducting one dimensional piston driven gas flow, assuming sharp shock discontinuity

17 p3075 A70-35890

One dimensional steady gas flow, deriving algorithm for iterative solution of Boltzmann kinetic equation by statistical approach

18 p3241 A70-36285

Axisymmetric one dimensional compressible flow theory applications to compressible fluids ducted flow [ASME PAPER 70-GT-82]

18 p3243 A70-36882

Optimal control for one dimensional compressible gas flow, combustion and heat exchange, described by first order partial differential hyperbolic equations

19 p3402 A70-37240

Nonuniform one dimensional flow of slightly ionized gas in infinitely segmented MHD generator with imperfect walls

19 p3478 A70-37588

One dimensional channel flow theory for ram wings, deriving lift and drag laws for comparison with wind tunnel and free flight tests results

20 p3558 A70-39558

Perturbation method for nonlinear acoustic wave propagation in steady one dimensional flow through variable cross section duct

20 p3673 A70-39612

Alfvén critical velocity concept in MPD arcs analysis, obtaining exhaust velocity relationship from one dimensional flow model

20 p3683 A70-40240

One dimensional unsteady equilibrium flow stability of relaxing two phase medium consisting of perfect gas and incompressible liquid

20 p3613 A70-40295

Viscous magnetofluid dynamic one dimensional annular flow, reducing three dimensional field equation to coupled linear partial differential equations

21 p3855 A70-40889

Aerodynamic parameters of ionized Ar supersonic steady one dimensional nonviscous flow in thermodynamic equilibrium and subjected to Laplace accelerating forces

21 p3858 A70-41444

One dimensional supersonic flow of ideal conducting gas in linear channel under transverse magnetic field

21 p3861 A70-42228

One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions

22 p4012 A70-43314

Two phase liquid one dimensional motion in variable cross section tube, deriving mass transfer, motion and phase interaction differential equations

22 p4012 A70-43721

MHD equations for one dimensional plane steady flow, considering conservative difference schemes for approximation

23 p4226 A70-44307

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory

23 p4282 A70-44522

One dimensional collisionless electron-proton plasma, obtaining exact electrostatic shock solution to Vlasov and Poisson equations

24 p4382 A70-45107

One-dimensional propagation of elastic spherical waves in inhomogeneous unbounded medium under normal stress on cavity surface

24 p4424 A70-45631

One dimensional gas pressure as function of activity, using Poisson-type partition function for perturbation calculation of thermodynamic limit

24 p4430 A70-46269

One dimensional Alfvén fluctuation spectrum of magnetosphere in toroidal crimping and twisting modes, using numerical integration

24 p4330 A70-46278

ONISOTROPY

U ANISOTROPY

ONSAGER RELATIONSHIP

Book on rational thermodynamics covering homogeneous processes, internal dissipation, Coleman theorem, wave propagation in dissipative materials, diffusion, chemical reactions, Onsager relationship, etc

03 p0525 A70-14042

Onsager reciprocal relations experimental validity in irreversible processes application to metals, electrokinetics, isothermal diffusion, heat conduction, chemical reactions, etc

17 p3197 A70-35538

OPACITY

M dwarf stars model atmosphere construction taking into account molecular opacities in cool stellar atmospheres

01 p0190 A70-11348

Collective interactions effect on electron scattering opacity in stellar interiors, using Debye-Hückel radial distribution function and neglecting collisions

02 p0364 A70-11789

Sodium-titanium-boron-silicate glass opacity and fusibility increase during partial substitution of K for Na, noting phase composition changes

05 p0871 A70-16598

Opacity-probability distributions for CO, computing theoretical spectra of line absorption coefficient, discussing effects of temperature and/or turbulent velocity

05 p0919 A70-16938

Solar core opacity influence on revised photospheric iron abundances, discussing neutrino flux prediction doubling in solar models

05 p0905 A70-16985

Electrical conductivity and conductive opacity for relativistic electron gas in presence of ions taking into account ion-ion interaction

09 p1727 A70-22509

Free-free opacity of stellar interiors by ion correlations applied to red giant degenerate cores

09 p1755 A70-22510

Cepheid type variable stars nuclear reaction and opacity pulsation excitation mechanisms

10 p1940 A70-24409

Triatomic hydrogen ion role in solar photosphere opacity implied from limb darkening and specific intensity data

11 p2104 A70-25739

Thermal diffusivity of opaque materials by phase shift method, using modulated radiation beam from carbon arc to heat material

11 p2068 A70-25767

Rossland stellar opacity calculation allowing for photon absorption in spectral lines using non-relativistic dipole approximation

13 p2495 A70-29752

Venus atmosphere opacity law determination as function of wavelength, comparing interferometric and integrated brightness temperatures with model calculations for various atmospheric compositions

14 p2646 A70-31069

Massive homogeneous star pulsation stability, determining maximum mass by opacity formula

17 p3154 A70-34533

Magnetic field effects on Compton scattering and radiative opacity, considering longitudinal and transverse propagation with circular polarization

17 p3154 A70-34538

UV solar opacity observations, comparing solar model predictions

17 p3160 A70-34884

Plasma opacity measurements using CW He-Ne and Ar lasers as light sources

17 p3106 A70-35107

Continuous UV opacity effects on visual spectrum observations and predictions for solar photosphere

17 p3169 A70-35385

Solar core opacity, investigating individual heavy elements influence and effect of changes in abundances

18 p3317 A70-37005

Backscattering of collimated light beam emitted by pulsed point source into opaque medium

19 p3461 A70-37421

Smoke chamber measurements of opacity developed in polymer pyrolysis or combustion, including Materials Smoke Obscurity Index/MSOI

20 p3736 A70-39404

Plate illumination relation to opacity in photometry and spectrophotometry, using digital techniques

20 p3630 A70-39475

Opaque minerals in Apollo 11 lunar igneous and fragmental rocks, using reflecting microscope and electron microprobe

21 p3896 A70-41513

Quantitative optical and electron probe studies of opaque phases in Apollo 11 lunar rocks

21 p3902 A70-41552

Rossland stellar opacity calculation allowing for photon absorption in spectral lines using non-relativistic dipole approximation

21 p3923 A70-42072

Cool star atmospheric structure, discussing models with and without graphite particle inclusion opacity

24 p4410 A70-45765

OPENINGS

NT APERTURES

NT IRISES [MECHANICAL APERTURES]

NT PORTS [OPENINGS]

NT SLITS

Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method

[ALAA PAPER 69-92] 09 p1780 A70-23208

Natural vibration analysis of uniform cylindrical and cantilever rectangular tubes with cutouts

10 p1961 A70-25057

Coupled integral equations for cutouts in shallow shells

17 p3186 A70-34970

German monograph on stress concentration around doubly symmetrical cut-out in cylindrical shells subjected to symmetrical load, using elliptical cut-out theory

24 p4418 A70-45092

Cylindrical shells with unreinforced openings, determining limit pressures and deformation patterns

24 p4419 A70-45158

OPERATING SYSTEMS [COMPUTERS]

Computer simulation of automated ATC systems, discussing operational gaming and mathematical models

02 p0274 A70-11968

IBM System/360 Operating System submodel simulator for multiprogramming, discussing language and structure

02 p0266 A70-12281

Ground support real time operating system 360 for manned spaceflight, discussing system features and performance

13 p2375 A70-29937

OPERATING TEMPERATURE

Mass action law-polynomial optimization analogy, illustrating optimal temperature determination in chemical reactors in series

01 p0143 A70-10925

Thermal discomfort by changing operational temperature of human subjects environment found to follow power law

01 p0041 A70-11647

Solar cell array fabrication methods extending operating temperature by pulsed spot welding techniques and deletion of adhesives

02 p0228 A70-12080

Correlation function procedure applied to quartz clock rate analysis, noting operating temperature control

04 p0693 A70-15487

Workpiece temperature during asymmetrical plane polishing by wheel face, deriving temperature distribution formulas for maximum heat source intensity

07 p1291 A70-18828

Emission containment and working temperature reduction possibility in thermonuclear reactor by increasing plasma densities and introducing large atomic number contaminants

07 p1350 A70-19847

Creep and stability of perforated and unperforated turbine disks under operating conditions

09 p1779 A70-23097

Long time static strength, durability and thermal stability relations determined for heat resistant alloys at operational temperatures

10 p1903 A70-24238

Fuel cells with alkaline electrolyte consuming H and O and operating near ambient temperature, discussing electrodes composition and performance

12 p2163 A70-26993

Medium temperature hydrogen fuel cells design, operational characteristics and performance

12 p2163 A70-26996

Natural gas-air fuel cell battery with sulfuric acid electrolyte for low temperature operation

12 p2166 A70-27766

Superconducting bolometer operating temperature stabilization

13 p2412 A70-29868

Commercial aircraft brake temperatures under HF landing conditions, using energy input and heat transfer computer programs

14 p2532 A70-31341

Posterior electrode structural modification for reducing silicon photovoltaic cells absorptivity and operating temperature

19 p3358 A70-38492

Cryogenic pipelines cooldown to operating temperature, calculating cryogen flow rate limits due to thermal stresses in steel and Al alloys

23 p4280 A70-44368

OPERATIONAL CALCULUS

Operational calculus for semisimple complex Lie group 07 p1321 A70-18658

OPERATIONAL HAZARDS

Hazards due to nonohmic materials responsible for electrostatic failures in missile and space programs and ground equipment 01 p0141 A70-10088

Atmosphere classification according to fire hazard based on heat capacity per mole of oxygen, noting exponential growth rate 03 p0607 A70-14054

Detonator insensitive to highest level of electrostatic voltage on human body for precise synchronization 03 p0547 A70-14111

Preventive measures against fire and blast hazards in high oxygen concentration chambers 08 p1599 A70-21795

Solid rocket motors potential hazards explosive reactions and temperature and blast effects 14 p2629 A70-30782

Approximating hazard rate function parameters estimation from failure data, using computer program 14 p2592 A70-31113

Evolution and current status of Apollo crew safety, discussing hazard aspects, program approach and measures and activities incorporated in project [AAS PAPER 70-051] 17 p3176 A70-34790

Operational requirements for NASA space shuttle Survival and Flight Equipment, discussing protection during launch and ascent 23 p4258 A70-44484

OPERATIONAL PROBLEMS

Soviet book on operational maintenance of flight vehicles /civilian/, emphasizing maintenance under various climatic conditions 01 p0004 A70-10502

Three dimensional navigation and guidance system for transport aircraft to alleviate operational problems, noting application to STOL aircraft 02 p0334 A70-11983

Nonlinear operational equation iteration solution error estimation, discussing Banach space nonlinear operator equation 10 p1909 A70-24508

Report on 1969 London International Conference on digital satellite communication session on operational requirements covering circuit operation modes, demand-assignment control, etc [AIAA PAPER 70-466] 11 p1997 A70-25412

Low cycle fatigue problems, environmental influence of operational differences on component life, life limits and controls for safe operation of jet engines [SAE PAPER 700207] 11 p2102 A70-25879

Supply phase voltage loss detection failure by voltage sensors in industry 13 p2378 A70-29349

Accident prevention in laser operation emphasizing eye protection 13 p2361 A70-30018

Noise of large commercial V/STOL aircraft and effect on design and operation, predicting acoustic signatures 14 p2531 A70-30854

Solar furnaces in space for treatment of high purity products in space vacuum, discussing design and operational problems 15 p2717 A70-31802

Mirror damage problem with mode locked ruby laser system solved by rough stack mirror fabricated from microscope coverslips 15 p2753 A70-32546

Stable operating range of supersonic mixed compression inlet increase by air flow removal via throat bleed system 16 p2967 A70-33585

Gas turbine engine compressor rotor roller bearing operation conditions analysis by computer calculation of thermal regime 21 p3834 A70-41777

High voltage solar array operational problems in earth orbit environment, discussing conducting surfaces, power loss, plasma effects, leakage, etc 22 p3967 A70-43544

Geometry and ionosphere effects on radio beacon operation for distress signal monitoring at sea, comparing night performance to daytime 23 p4163 A70-44229

Cactus high sensitivity accelerometer flight tests, discussing operation and experimental conditions [ONERA-TP-875] 23 p4198 A70-44660

Space Station long term operations and logistics concerning inventory, configuration and cargo management [SAE PAPER 700757] 24 p4416 A70-45871

STOL aircraft operational constraints, considering economics, short haul market characteristics, community acceptance, speed, propulsion system, takeoff/landing performance and maneuverability [AIAA PAPER 70-1283] 24 p4374 A70-45972

OPERATIONS RESEARCH

NT CRITICAL PATH METHOD

NT DYNAMIC PROGRAMMING

NT GAME THEORY

NT LINEAR PROGRAMMING

NT MINIMAX TECHNIQUE

NT NONLINEAR PROGRAMMING

NT SADDLE POINTS [GAME THEORY]

N binomial events approximations to high probabilities of overall success for reliability situations and mission accomplishment, including operations research implications 01 p0134 A70-11475

Operations research in fleet planning, discussing forecasting, frequency planning, operation simulation, traffic and revenue forecasting, etc 02 p0401 A70-11745

Managerial practices of problem identification, discussing research study in operating division of large corporation 03 p0610 A70-14051

Experiment selection in orbital program planning based on broad system synthesis, discussing identification and grouping of objectives, critical issues and experimental equipment requirements [AAS PAPER 69-580] 04 p0749 A70-14652

Deterministic and stochastic simulation models for obtaining optimal solution in operations research by trial and error 08 p1464 A70-20579

Reliability model for analyzing operational phase test programs developed from R and D phase models, processing data according to test scope [AIAA PAPER 70-389] 10 p1896 A70-24916

System effectiveness apportionment for constraints existing on accountable factors using Lagrange multiple method 14 p2669 A70-31111

Operational analysis and real time computer simulation models in ATC development 19 p3468 A70-38637

OPERATOR PERFORMANCE

Task loading of human operator in terms of central capacity sharing model, discussing model implications for mental workload measurements 02 p0245 A70-12142

Vigilance of human monitors detecting additions and deletions of relevant and irrelevant signals presented on computer matrix display 02 p0246 A70-12377

Automatic inspection data collecting and processing by human operator using display devices and computerized mathematical reduction for real time evaluation 02 p0266 A70-12469

Psychological factors in training and education of pilots and astronauts for optimal matching between human operator and vehicle control system 05 p0809 A70-16967

Human operator dynamic properties working to maintain given process parameters, obtaining differential equations for closed machine operator system 08 p1449 A70-20696

Airborne sidescan radar for fix-point navigation at low flight altitudes involving computerized sensing evaluated for operator performance 08 p1541 A70-21563

Drug-alcohol and hypoxia effects on multiple task operator performance tested at altitude and pressure chamber treatments 08 p1448 A70-21939

Observation noise model for human controller remnant 10 p1823 A70-23893

Pilot model based on Kalman filtering and optimal control, investigating evaluation for time stationary conditions and sine-wave tracking 10 p1823 A70-23894

Human operator transinformation sensitivity to display gain and forcing function bandwidth in rate control tracking task 10 p1823 A70-23896

Human operator remnant data normalization noting observation noise spectral characteristics for compensatory tracking 10 p1824 A70-23899

Modified fast Fourier transform for hybrid computer program data processing of human operator describing functions 10 p1824 A70-23900

Hypokinesia effects on working capacity of subjects performing manual aircraft control assignments during bed rest 13 p2352 A70-29340

Mathematical models for human adaptive and optimizing characteristics in manual control systems regarding behavior phase 13 p2360 A70-29780

Human operator ocular tracking and decay time stimulation response measurements using information, statistical, point process and random analysis 14 p2537 A70-30388

CRT symbol generators design for high speed computer data display as function of electro-optical and human operator constraints 16 p2850 A70-33133

OPERATORS [MATHEMATICS]

Feedback analysis of learning and performance in hand-yoked, steering and stimulus tracking control of breath-produced visual target 16 p2852 A70-33660

Human operator and computer interrelations, noting sources of error 18 p3223 A70-36079

Radar consoles with various display components under different illumination levels to determine optimal operator performance, discussing push-button design recommendations 20 p3580 A70-39713

OPERATORS [MATHEMATICS]

Five dimensional rotations and representation of isomorphic spinor groups by boson operators calculus, expanding Gelfand states in Weyl patterns 01 p0147 A70-10521

Atomic variables elimination technique applied to Markovian laser master equation, resulting in integrodifferential equations for field statistical operator 01 p0112 A70-10884

Bounded region satisfying regularity necessary to Korn inequalities and Sobolev immersion theories, discussing plasticity theory operator monotony in Minty-Browder sense 02 p0387 A70-12109

Variational principles in dynamic viscoplasticity theory, based on operator approach combined with time independent variations in elasticity theory 02 p0391 A70-12818

Nonlinear gyroscopic navigation system intrinsic error derived as function of linear operator 03 p0522 A70-13373

Asymptotic behavior at infinity of mixed boundary value problem analyzed for Sobolev equation involving operator 03 p0518 A70-13433

Homogeneous waveguide solutions by finite element method using matrix operator and function minimization to assure rapid convergence to eigenvalue 03 p0457 A70-13936

Generalized transform theory for causal operators developed, using Gelfand theory for commutative Banach algebras 03 p0520 A70-14167

Plasma turbulence theory formulated using averaging operators, obtaining nonlinear dispersion relation for turbulent diffusion coefficients 03 p0537 A70-14377

Chaplygin equation algebraic classification with respect to ring admitted by equation, extending results to include lambda function tolerating second order symmetry operators 04 p0613 A70-14412

Euler-Lagrange linear operators in variational embedding with one dependent function 05 p0881 A70-16058

Stationarization problems involving nonlocal and null class Euler-Lagrange operators, considering vector spaces of function spaces 05 p0881 A70-16059

Nonlocal variational mechanics with one field variable, developing algorithm for Euler-Lagrange operator calculation 05 p0882 A70-16137

Nonlocal Euler-Lagrange operator nature and characteristics, discussing operation of class of all Lagrangian functions 05 p0882 A70-16138

Compressible fluid flow satisfying perfect gas equation in presence of thin foil, developing operators characterizing incompressible and compressible flows without Hall effect 05 p0790 A70-16158

Self adjoint boundary value problems with interior point boundary conditions using differential operator in Hilbert space 05 p0876 A70-16423

Green operator structure and eigenvalue approximation of boundary value problems regarding vibrations and buckling of clamped plates using orthogonal invariants 05 p0876 A70-16563

Dirichlet problem of biharmonic operator in boundary region containing infinite number of pieces 05 p0877 A70-16878

Multiplication theorem for Shtraus characteristic functions of quasi-Hermitian operators, including open systems coupling 05 p0877 A70-16880

Boundary value problems in closed spaces with fine grained Liapunov boundary described by second order elliptic differential operators 05 p0877 A70-16881

Fourier series localization conditions for fundamental system of Beltrami operator functions in arbitrary n-dimensional space 05 p0877 A70-16972

Existence and uniqueness, stability and asymptotic stability of nonlinear operator differential equation 05 p0878 A70-17098

Existence and stability problems of nonlinear operator differential equations containing linear operator with domain and range contained in real Hilbert space
05 p0878 A70-17099

Observation operators and cosmology, constructing equations for cosmological aggregates governed by Einstein field equations
06 p1105 A70-17529

Discrete spectrum of fourth order differential operator estimating number of eigenvalues in bounded interval of real line
06 p1094 A70-17740

Existence results for Cauchy problem for linear variable coefficient hyperbolic operators with multiple characteristics
06 p1094 A70-17898

Hilbert transform as operator in function space defined on harmonic analysis groups, noting application to noise stability, modulation and signal detection
07 p1235 A70-19644

Perturbations classes for self adjoint operator limit spectrum preservation
07 p1327 A70-19807

Self adjoint operator generated by differential expression and pseudodifferential boundary conditions, using Berezanskii procedure for operator eigenfunction expansion
07 p1327 A70-19809

Infinite order differential operator in S type spaces for Cauchy problem solution uniqueness
08 p1533 A70-20722

Characteristic equations for differential symmetry operators in homogeneous and nonhomogeneous Maxwell equations
08 p1544 A70-20990

Half space elasticity problems solved by operator method
08 p1586 A70-21013

Boundary value problem for linear elliptic differential operator degenerating on region boundary
08 p1534 A70-21119

Clock corrections smoothing by linear transformation operator, calculating operator transfer function and averaged errors deviations
08 p1574 A70-21155

Optical coherence theory functional formalism developed in radiation field probability functional terms, noting role of P representation of density operator
08 p1545 A70-21254

Volterra operators extension, considering structure of complete operators and invariant subspaces
09 p1711 A70-22146

Asymptotic distribution of operator eigenvalues for self adjoint elliptic boundary value problem in unbounded region using Green function
09 p1711 A70-22148

Nonlinear periodic oscillations problem solved by solving nonlinear operator equations, discussing iterative methods based on equations linearization
09 p1728 A70-22668

Nonlinear partial differential operators eigenvalue solution using modified Newton iteration method, noting advantages over perturbation method
11 p2074 A70-26423

Transfer matrix spectrum for lattice gas models with finite interaction, constructing stochastic operator as stochastic matrices limit
12 p2272 A70-27343

Operator representing anisotropic element in gas laser resonator, considering phase crystalline and rotating plates
13 p2424 A70-28593

Operator originated by Schroedinger equation having inhomogeneous boundary conditions on portion of boundary of Hilbert spaces orthogonal sum, defining region of self conjugation
13 p2442 A70-29514

Extremum conditions for optimal control with operator constraints using gradient algorithms
14 p2559 A70-30181

Operator form added to equations of state of continuous media in case of small and large deformations
14 p2656 A70-30473

Multichannel scattering variational bounds reformulation without using projection operators, calculating resonance-energy relations
14 p2619 A70-30490

Control system teaching based on preferred response data, discussing operator determination from purpose control function
15 p2716 A70-32449

Elliptic boundary value problems involving pseudodifferential operators on bounded manifold, examining solutions analyticity
16 p2941 A70-33269

Linear partial differential equations solvability, deriving necessary conditions for pseudo differential operator
19 p3457 A70-37677

Singularities of solutions of partial differential equations, discussing smallest convex set in manifold with differential operator
19 p3457 A70-37680

Sufficient conditions for local solvability of linear partial differential equations with operator on complex functions
19 p3457 A70-37682

Helmholtz equation initial value problem solution by integral operators
19 p3459 A70-38680

Perturbation calculation for linear ordinary differential operators, considering equivalence to eigenvalue problems
19 p3459 A70-38681

Simultaneous approximation of function and product with given operator, applying to boundary value problems of partial differential equations
19 p3459 A70-38682

Coordinate sequences for regions with complex geometries and various boundary conditions, using linear operators
19 p3460 A70-38940

Kinetic equations derivation for correlation functions and time dependent distribution functions of irreversible processes, using projection operators
20 p3672 A70-39588

Multichannel iterative servosystems operators for useful signals reproduction
20 p3603 A70-39836

Structures of linear field theories concerning constitutive equations and operators dual relationship
21 p3851 A70-42098

Dubovitskii and Milyutin formalism applied to optimization problems involving equality and operator constraints via mathematical programming in normed linear space
22 p4061 A70-42462

Coherent behavior associated with thermodynamic description projected from dynamical behavior of many body system, using relation between asymptotic operators
22 p4062 A70-42547

Whole operator with infinite defective numbers for Sturm-Liouville differential equation, describing spectral functions
23 p4210 A70-43977

Shooting method for computing eigenvalues of Hermitian differential operators
23 p4210 A70-44020

Approximate bounds for differential eigenvalues of self adjoint linear operators in Hilbert space
23 p4211 A70-44245

Integration operators for transient structural response in qualification tests for internal components of dynamically loaded structures
23 p4273 A70-44719

Cauchy problem for singular parabolic equation, establishing existence, uniqueness and representation theorem by integral operator techniques in conjunction with function-theoretic methods
23 p4212 A70-44895

Linear operator convex closed set, considering range-domain or output-input implications
24 p4369 A70-46023

OPERATORS [PERSONNEL]

NT AIRCRAFT PILOTS
NT PILOTS [PERSONNEL]
NT TEST PILOTS
Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking
16 p2851 A70-33340

OPHTHALMOLOGY

NT EYE EXAMINATIONS
Occupational and medicative hazards in ophthalmology - Conference, Amsterdam, June 1968
01 p0022 A70-10855
Space or atmospheric flight caused or aggravated ophthalmic lesions, noting retinal and conjunctival hemorrhages from barometric pressure fall and rapid acceleration and deceleration
01 p0022 A70-10858
Cine recording ophthalmoscope with TV monitoring for retinal photography during centrifugation
06 p1061 A70-17286
Ophthalmological treatment of severe thermomechanical eye injuries investigated on radiant-energy burned rabbit eyelids
09 p1617 A70-22473
Lasers for surgical applications, cancerous tissue treatment, ophthalmology and comparison with RF diathermy
24 p4308 A70-45569
Binocular fundus reflectometry and plethysmography in rabbits and man after dye injection and in patients with carotid occlusion
24 p4310 A70-46345

OPTICAL ABSORPTION

U ELECTROMAGNETIC ABSORPTION

U LIGHT TRANSMISSION

OPTICAL AMPLIFIERS

U LIGHT AMPLIFIERS

OPTICAL COMMUNICATION

Error probability, signal to noise ratio and average signal level for coherent heterodyne and photon limited laser communication systems, using Poisson distributions
02 p0255 A70-11914

Laser transmitter and optical superheterodyne receiver performance tests at 6328 Å, demonstrating aperture size effect and noncoherent operation superiority
03 p0450 A70-13675

Laser communication system for outer space, beam guiding and fiber optical guiding systems
04 p0649 A70-15038

Light signals frequency converters and amplifiers applied to detection problems
05 p0813 A70-16264

Information transmission capability of hologram without distortion, considering confocal resonator reconstructible transparencies for bounded hologram
05 p0848 A70-16265

Maximum likelihood receiver /MLR/ to detect pulsed signal propagated through turbulent medium, assuming optical propagation over long path in atmosphere
07 p1227 A70-19146

Laser and quasi-laser systems modulation for wide spectrum communications, discussing global potentials and application as low cost satellite links
08 p1459 A70-20802

Modal excitation and scattering in retinal receptors of human and insect visual systems investigated with dielectric rod uniform wave and irregularities
08 p1452 A70-21289

Narrow width pulse-position modulated optical communication system design, determining performance in terms of error probability and information rates
08 p1463 A70-21778

Injection lasers for multichannel optical communication using composite cavities to improve spectral output
09 p1698 A70-23359

Optical transmission technology for aerospace launch operations investigated on ground communication systems projects involving use of gallium arsenide lasers and diodes
09 p1640 A70-23776

Portable optical communcator for voice transmission combining pulse position modulation and low power gallium arsenide diode
10 p1840 A70-24530

Laser systems for deep space communications, considering high data rates, laser types, systems operation, earth atmosphere effects, hardware reliability, etc
11 p2005 A70-26036

Photodetector-electronic circuit matching channels for optical communication system, using minimum risk design criterion
12 p2237 A70-28153

Analog information transmission device using He-Ne laser radiation, discussing optical telemetric channel transfer characteristics for pulsed nanosecond analog signals
12 p2250 A70-28184

Injection lasers as logic elements in optical communication systems with time division multiplexing, examining optimal switching and pulse duration reduction
13 p2428 A70-29406

Lunar communications systems considering use of satellites, metallic particle belts, rockets, lasers and particle beams
14 p2634 A70-30196

Optical and quasi-optical transmission of EM wave beams of type in directional antennas Fresnel region, examining free space and waveguide modes
14 p2549 A70-30445

Satellite laser communication system using dual scan acquisition technique
14 p2552 A70-31197

Temporal dependence of photoelectron multiplier output waveform and focusing under photocathode alternating modulation, noting thresholds for optical reception
15 p2696 A70-31505

FM optical signals detection, using Fabry-Perot interferometer with air gap between mirrors
15 p2733 A70-31523

Atmospheric turbulence effects on optical communication systems in geosciences
16 p2900 A70-33019

Troposphere effects on microwave and optical signals, correlating refractive index and dispersion variabilities
16 p2862 A70-33020

Injection laser communication link for high data rate transmission, discussing design and construction of transmitter and receiver
16 p2862 A70-33139

Drosograph high brilliance display device for rapid line-pattern projections and optical signal processing
16 p2906 A70-33179

Deep space optical communications link, fabricating operational prototype of flight hardware for spaceborne terminal
16 p2863 A70-33190

HE sub 11 mode launching in optical communication system, considering fiber tapering effect on excitation efficiency
16 p2875 A70-33400

Optical spacecraft communication system, discussing size, weight, power, etc 16 p2864 A70-33484

GaAs injection lasers for optical communication, synthesizing high bit rate data link between synchronous relay satellites 16 p2865 A70-33710

Blinking warning lights for air navigation, signaling of obstacles and glider onboard marker lights 16 p2889 A70-34302

Fiber optics in functional electronic circuits, considering multichannel optical communication 18 p3290 A70-36235

Worldwide multichannel air communications system in 10 GHz to IR range by Quasi Laser Link modulation and satellites 19 p3378 A70-37855

Optical communications in space, considering multiple access low earth orbit-to-synchronous and synchronous-to-synchronous links 19 p3379 A70-37878

Information optical transmission parameters with electroluminescent GaAs diode as radiation source, calculating energy received over various distances 19 p3389 A70-38069

Light focusing glass fiber with variable refractive index using ion exchange process, discussing applications to laser communications and data processing 20 p3671 A70-39129

Planar thin film optical waveguides for integrated circuits, utilizing information carrying potential of laser light in optical communication 20 p3598 A70-40129

Deep space microwave and optical communications, describing grand tour requirements 21 p3784 A70-40546

Amplitude modulated optical band signal detection, comparing optimal direct photodetection and superheterodyne receivers sensitivities 21 p3785 A70-40633

Space-to-ground link wideband digital laser communications system design and performance tests 21 p3787 A70-41331

Carbon dioxide laser systems for various space communication links between ground, satellites and Mars probe 21 p3787 A70-41338

Optical communications system for transmission and detection of PCM word pattern at gigahertz rates, discussing optical and electrical modulation 21 p3788 A70-41339

Wideband high speed PCM/AM optical communication system using mode locked He-Ne laser, noting simultaneous signal transmission and bit rate 21 p3789 A70-41354

Optical communication in turbulent media, investigating error rate for binary single path fading channels by photocount detection 21 p3837 A70-41935

Optical communication waveguides with diffused boundaries, calculating modal propagation fields by perturbation theory 21 p3792 A70-42045

Atmospheric communication channel modeling for laser wavelengths, considering point, area, heterodyne and direct detection receivers, nonplanar and infinite plane wave propagations, etc 21 p3793 A70-42179

Optimal heterodyne receiver for laser signals element-by-element wavefront detection 22 p3987 A70-42558

Fluctuating light pulses detection and arrival time estimation for heterodyne reception 22 p3987 A70-42560

Light signals detection on noise background, comparing algorithms based on nonparametric statistics 22 p3989 A70-42569

Frequency modulated gas laser communication system, discussing Raman-Nath effect, Doppler shifting phase grating, monochromatic light, pseudostanding wave, optical heterodyne detector, etc 22 p3989 A70-42966

Ultrasonic light modulation using single crystal lithium niobate transducers in laser communication and information processing systems 22 p3992 A70-43734

Signal arrival time variance in optical communication system with high lag photodetectors, examining input, detection and amplification noise 23 p4196 A70-44410

OPTICAL CORRECTION PROCEDURE

Microscope objective effect on accuracy of optical systems modulation-transfer function based on corrected high speed lens measurements 07 p1334 A70-19147

Sunspot minimum intensity dependence on area, including correction for blurring or image motion, scattered light and line absorption 13 p2496 A70-29846

Foreground presence for computer generated and painted three dimensional photographic displays using fly eye lenslets 16 p2906 A70-33177

Automatic active optic control of alignment and figure of primary mirror of spacecraft-borne telescope with response time stability 16 p2907 A70-33189

OPTICAL COUPLING

Small signal opto-electronic wideband transformer with coupling element ensuring fast response and low sensibility to parasitic magnetic fields 03 p0459 A70-14266

Injection laser amplifier with emitting and amplifying diodes coupled by planar polyharmonic beam waveguide 04 p0702 A70-15292

Cylindrical confocal laser resonator with circular coupling aperture in center of mirror calculated for diffraction losses by numerical iteration 06 p1079 A70-17187

GaAs diode amplifiers and switching devices behavior, describing optical coupling between two GaAs lasers 07 p1241 A70-19399

Semiconductor laser signals coupling into thin optical platelet waveguides 07 p1301 A70-20019

Fabry-Perot resonator mirrors with local reflecting inhomogeneities within perimeter of single crystal wafer for application in optically coupled semiconductor lasers 13 p2427 A70-28884

Radiation coherent enhancement of single frequency emission fields in Q modulated coupled ruby lasers 14 p2593 A70-30152

Whisker diode coupling to polarized IR laser beam by orientation based on antenna theory 17 p3048 A70-35902

Radiation divergence from gas laser resonator with coupling aperture 20 p3642 A70-39752

Radiation coherent enhancement of single frequency emission fields in Q modulated coupled ruby lasers 21 p3839 A70-42076

Prism film device coupling laser beam into thin film dielectric light guides, discussing operational theory 22 p4030 A70-42947

Prism film device for high efficiency laser beam coupling into light guiding thin film, deriving operation theory by plane wave analysis 22 p4030 A70-42948

Helicons and transverse optical phonons coupling in degenerate polar semiconductors investigated from electromagnetic linear response theory and field method 24 p4390 A70-45603

OPTICAL DATA PROCESSING

On-line system transmitting experimental data from optical spectrometer to central computing facility for magnetic tape recording 05 p0818 A70-16846

Optical data processing systems with spatial filters for two dimensional signals detection, using film nonlinearities to record Fourier transform hologram 07 p1287 A70-20094

Optical information processing in noncoherent light, considering applicability to simulating antenna radiation patterns using field distribution in aperture obtained by Fourier transformation 08 p1494 A70-20971

Hologram data efficiency improvement by spatial offset removal, analyzing plane and spherical reference waves and plane and solid objects 08 p1500 A70-21787

Automatic photographic data processing system with transient reproducer to obtain digital format for computer analysis 09 p1673 A70-22030

Optical signal processing using circular array and spatial frequency filtering to yield azimuthal distribution of sources 09 p1678 A70-22969

Optical processing of signals from circular aerial arrays involving use of spatial filter 09 p1678 A70-22970

Compound semiopaque thin films quality control for thickness uniformity by observing fringe patterns generated by optical data processing techniques 09 p1687 A70-23765

Image processing for motion blur removal, discussing methods for measuring degradation and filter design for image restoration 09 p1688 A70-23773

Optical image processor using Fourier transform corrective function for image restoration 09 p1688 A70-23774

Computer texture analysis for two dimensional scenery pictures involving periodicity invariance under Fourier transform 11 p2014 A70-26251

Two dimensional remote sensing displays based on diffraction patterns generated by coherent light, discussing optical processing of photographs, drawings, maps, etc 12 p2229 A70-26944

Optical processing for measuring frequency spectrum of PM wave induced by turbulent medium in laser beam 12 p2249 A70-27756

Binary-valued digital pictures noise cleaning by propagation processes 12 p2188 A70-27937

Book on synthetic aperture radar imaging systems theory and design covering SNR, optical data processing, phase and motion errors, ambiguity function, etc 13 p2368 A70-29603

Sufficient statistics for optimal correlation function in classifying optical images in pattern recognition, using permissible transformations 14 p2553 A70-30421

Computerized control for beam scanning and optical data processing concerning symbols, letters and photographic images 14 p2553 A70-30424

Photoemission optical analysis from thin films with uniaxial anisotropy, discussing reflectance, transmittance and divergence of Poynting vector 15 p2774 A70-32012

Onboard IR receiver and ground photorecorder for Meteor satellite cloud tracking, using computer processed data 15 p2738 A70-32112

Data compression techniques, considering two dimensional image coding problem 15 p2705 A70-32558

Image processing and picture enhancement by computer, using fast binary log-antilog conversion 15 p2768 A70-32567

Radiograph images digital processing by linear and nonlinear position invariant techniques, obtaining contrast enhancement 15 p2706 A70-32569

Lunar color differentiation by computer image processing compared to earth based photoelectric photometry [JPL-TR-32-1472] 16 p2900 A70-33097

On-line optical data processing using CRT with electro-optic target crystal 16 p2903 A70-33132

Optical spatial phase modulator array using membrane light modulator for coherent optical processing and character recognition 16 p2904 A70-33147

Drosograph high brilliance display device for rapid line-pattern projections and optical signal processing 16 p2906 A70-33179

Coherent optical computer system driven by membrane light modulator (MLM), describing electro-optical properties and operating characteristics 16 p2871 A70-34055

Image distortion in reconstructions from phase only holograms, noting savings in collection and processing of acoustic holographic data 16 p2915 A70-34324

Human lung internal surface area automated measurement by computerized image processing techniques, grading emphysema 17 p3035 A70-34578

Light focusing glass fiber with variable refractive index using ion exchange process, discussing applications to laser communications and data processing 20 p3671 A70-39129

Automatic measurement of drainage networks for lengths and areas by copper plate etching or flying spot scanner on transparencies or radar images 20 p3633 A70-39794

Image detection in pattern recognition through bipolar correlation, discussing reference generating algorithms and digital simulation results 20 p3633 A70-39972

Digital optical storage for information system components 21 p3823 A70-40852

Two dimensional data array contour tracing algorithm for reduction of image coding bits number 21 p3786 A70-41327

Microwave antenna array irregularity location from hologram by optical signal processing, using far field spatial filter 21 p3792 A70-42048

Ultrashort time perceiving electron-optical conversion methods, discussing image quality and brightness, quantum yield and time resolution 22 p4038 A70-43424

Ultrasonic light modulation using single crystal lithium niobate transducers in laser communication and information processing systems 22 p3992 A70-43734

Line-by-line and two dimensional image processing performance, considering transmission rates and distortion 23 p4160 A70-43762

Integrated data processor-operation controller for stellar TV photometer systems in spaceborne observatory, considering limited channel transmission capacity 23 p4167 A70-44649

Electronic data handling and CRT display of ATS satellite cloud pictures 24 p4371 A70-46048

Seeding particles motion recording in fluid flow by holographic velocimetry, using optical matched spatial filtering to determine particle location 24 p4340 A70-46350

OPTICAL DENSITY

Energy distributions of emitted electrons from Si, GaP and ZnS semiconductors, determining relative core levels and Si valence band states optical density 03 p0537 A70-12879

Optical density measurements in high speed confined air vortex, discussing light deflection mapping of vortex density field at off axis positions [AIAA PAPER 68-694] 03 p0480 A70-12906

Plasma optical transparency criterion, estimating nonequilibrium plasma layer optical density limit 03 p0531 A70-13255

Stellar light absorption in optically dense cometary atmospheres 06 p1141 A70-17738

Optical density vs illumination amount characteristic curve determined for photometric calibration of astronomical photographs of celestial bodies 07 p1279 A70-19046

Polychromatic nonlinear light scattering in plane parallel layer solved by self consistent optical depths method 09 p1762 A70-23117

Aerial IR film optical density related to preharvest crop yield indicators in micro experiments with remote sensors 12 p2217 A70-26918

Quantitative analytic composite photography, performing image density point-to-point subtraction of two negatives 13 p2406 A70-28905

Photoemission from evaporated gold films, measuring quantum yield, photoelectric energy distribution curves and optical density states 14 p2626 A70-30481

Earth atmosphere transmission coefficients determination by relation between transparency and daytime sky brightness, noting limits of applicability 16 p2899 A70-34180

Atmospheric optical properties stability determination for various optical densities, assuming horizontally homogeneous medium with properties constant during observation 16 p2899 A70-34181

Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness 16 p2899 A70-34183

Optical density of valence and conduction states by UV photoelectric spectroscopy, outlining experimental techniques and inelastic scattering effects 19 p3471 A70-37711

Photographic images formation mechanism, examining streaks resolving power and total densities 20 p3632 A70-39747

OPTICAL EMISSION

U LIGHT EMISSION

OPTICAL EMISSION SPECTROSCOPY

Strontium fluoride crystals containing trivalent neodymium cations investigated for laser action and radiation characteristics by spectroscopy 10 p1899 A70-24253

Picosecond pulse frequency sweep measurement using time resolved spectroscopy 17 p3108 A70-35904

Gas lasers intensity expression derived by theory of double resonance spectroscopy, comparing results with He-Ne laser experimental data 19 p3445 A70-37672

Thin optically pumped pulsed CdSe platelet lasers, detecting mode jumping and tuning effects by time-resolved spectroscopy 22 p4049 A70-42946

Simultaneous X ray and optical observations of Scorpius XR-1, comparing rocket data from various flights 22 p4094 A70-42987

Interferometer for compressing linearly FM light pulses and analyzing spectra of picosecond pulses 01 p0111 A70-10670

Photooptical techniques in simulators - Conference, South Fallsburg, N.Y., April 1969 01 p0057 A70-10807

Motion perception sensitivity measurement in various portions of retina for operation accuracy of photooptical systems of simulation 01 p0036 A70-10820

Psychological aspects of unreliability sources in man machine systems for selection and training criteria of photooptical instruments users 01 p0036 A70-10821

Airborne cartographic azimuthal instrument with reflecting prism type optomechanical assembly and trihedral pyramid gyroscope for stabilization 01 p0093 A70-11269

Optical and radioastronomical observations of 1966 solar eclipse, discussing data and instruments 01 p0191 A70-11472

Low loss low sidelobe N-way microwave optical power divider for single plane electronically steerable Ku band phased array antenna 04 p0655 A70-14624

Optical facilities of Apollo 11 mission and NASA Manned Spacecraft Center noting Fاذow telescopes, lunar cartography, photometric surface analysis, etc 04 p0687 A70-14690

Apollo lunar mission optics concerning liftoff alignment theodolites, spacecraft atmosphere electro-optical sensor, helmet optical coating and laser experiment 04 p0688 A70-14693

Emission modulation in multifunctional injection laser-photodiode system used as optical memory, pulse generator, multivibrator and trigger 05 p0859 A70-16268

Visual simulation in Lunar Module Mission simulator provided by computer controlled infinity optics system 06 p1031 A70-18603

NASA three meter orbital telescope discussing configuration, optical geometry, launching, power supply, etc 07 p1280 A70-19150

Optical polygon calibration by interferometric method using He-Ne laser light source 07 p1287 A70-19227

Anamorphic optics to focus luminous wakes of hypervelocity projectiles onto focal plane of slitless spectrograph in free flight ballistic range launching 07 p1287 A70-20082

Axicon systems for spectroscopy of light emitted by foil-excited accelerator beams, discussing scattering contribution to spectral line widths 07 p1287 A70-20083

Detector for focus assessment of laser on target, scanning image by fiber optics 07 p1302 A70-20089

Low pass filter structure of focusing reflectors designed for quasi-optical system, noting energy absorption 08 p1476 A70-21287

Acousto-optic receiver and spectrum analyzer for electromagnetic signals in VHF-UHF range 08 p1463 A70-21780

Photo-optical instrumentation applications and theory - Conference, San Francisco, August 1969 09 p1672 A70-22029

Solar eclipse coronal polarization and intensity measurements, discussing equipment, calibration, photometric reduction and results 09 p1757 A70-22736

Stereo photographs conjugate image area matching, comparing automatic optical and electronic correlation techniques 09 p1680 A70-23067

Optical devices for enhancement of semitransparent photocathode quantum efficiency applied to TV camera tubes, image intensifiers and other imaging detectors 09 p1682 A70-23502

Optical equipment development at Jet Propulsion Laboratory, discussing flight TV systems and associated digital image processing laboratory, planetary spectroscopy, spacecraft guidance, etc 09 p1657 A70-23505

Marshall Space Flight Center optical research programs technology base for launch vehicle development support, discussing Apollo Telescope Mount 09 p1657 A70-23518

Lewis Research Center applications of optics to research in flight propulsion and space power generation, discussing gas density visualization, radiative heat transfer, etc 09 p1657 A70-23522

Photo-optical instrumentation - Conference, San Francisco, August 1969 09 p1684 A70-23751

Grand tour space probe optics for observation of objects on planet, considering atmospheric refraction indices effect 09 p1700 A70-23768

Holographic optical memory feasibility for digital data storage using Ar ion laser, acousto-optic beam deflector system, hologram storage plane and photodetector array 09 p1642 A70-23780

Laser Doppler velocimeter optics, noting minimal heterodyne alignment needs and stress and vibration stability 10 p1889 A70-24556

Orthophoto Attachment for A8 autograph to produce black and white and color aerial photographs on negative film 10 p1891 A70-24739

Holographic optical memory systems operational principles and potential advantages, discussing feasibility of 100 million bit memory capacity and one microsecond random access time 10 p1892 A70-25245

Transfer functions application to optical system specification, design and evaluation, calculating diffraction limited MTF 11 p2082 A70-25354

Spacecraft window cleaning with methyl alcohol and low pressure nitrogen providing filming control for Apollo optical experiments 11 p2051 A70-26143

Optical IR system as low cost pilot warning indicator providing audible and visual collision warnings to general aviation aircraft 12 p2234 A70-27647

Aperture field modal decomposition of optical system in terms of integral equation eigenfunctions during detection and estimation of incoherent objects 12 p2273 A70-28121

Ocular focus stimulator with provision for optical distance change between object and observer without brightness and visual angle variation 12 p2237 A70-28125

Soviet optical instrument industry development trend (1971-1975), considering spectral, test, measuring, reading and microscopic equipment 13 p2412 A70-29864

Quasi-optical power transmission in overmoded waveguides in interferometers, millimeter wave spectrometers, polarizers, etc 14 p2556 A70-30447

Astronomical telescope system design and construction, considering optical configurations, components, mounting, atmospheric limitations, etc 15 p2736 A70-31950

Passive optical crossed beam detection systems monitoring meteorological parameters in rocket or aircraft environments, noting real time display 15 p2736 A70-32032

Air cell optical phase shifter for holography based on refractive index variation with air pressure 15 p2741 A70-32439

Optical membranes design, discussing properties of materials and mountings 16 p2904 A70-33148

Holography techniques, discussing fringe pattern formation, various systems advantages and optical elements 17 p3084 A70-35002

Optical system of absorption tubes for planetary atmosphere spectra simulation 18 p3314 A70-36408

Contaminated optical surface investigation technique in near UV, visible and near IR range, investigating property changes of systems in transmission and reflection 18 p3292 A70-36786

Holographic interferometry applications in stress analysis of photoelastic resins, describing holographic interferometry assembly 18 p3262 A70-37209

Coherent light communication system quasi-optical lens line output field examination, using laser assembly to study parasitic, radiative and overall power losses 19 p3443 A70-37288

Inlet optics modification in Raman laser spectrometer, discussing high pressure gas storage and support plate enlargement 19 p3443 A70-37361

Membrane attachment for pressure transducer with help of holographic interferometry, describing optical system 19 p3427 A70-38453

Coherent light beam characteristics with Gaussian radial intensity variation during propagation along optical system axis, determining radius from diffraction theory 20 p3639 A70-39086

Encircled energy calculation in optical systems with central obstruction, observing focus error, spherical aberration and central stop effects on image contrast 20 p3627 A70-39088

Optical aperture tapering for attenuating sidelobe impairing LF signals detection 20 p3639 A70-39089

OPL astrolabe catalog corrections, discussing Danton prototype, color-magnitude effect, time and latitude values 21 p3887 A70-41111

Optical pulsar search instrument in radio pulsar fields, showing performance on NP 0532 21 p3826 A70-41156

Light modulator design based on Fabry-Perot interferometer controlled by electro-optical effect 22 p4026 A70-42507

Optical multilayer metal coatings vacuum deposition by cathode sputtering, using automatic apparatus 22 p4045 A70-42510

Low stiffness optical parts bulk vibration machining 22 p4045 A70-42512

Optical devices contaminated mirror surfaces restoration with atomic oxygen from RF plasma by noncontaminating nondestructive oxidation of polymer film 22 p4029 A70-42622

Prism film device coupling laser beam into thin film dielectric light guides, discussing operational theory 22 p4030 A70-42947

Prism film device for high efficiency laser beam coupling into light guiding thin film, deriving operation theory by plane wave analysis 22 p4030 A70-42948

Optical waveguides and resonators propagation modes detection and discrimination techniques evaluated for circular cylinder dielectrics/optical fibers 22 p4030 A70-42949

Low pressure supersonic wake measurement by differential interferometer in double pass polarized light [SMPT PREPRINT 95] 22 p4036 A70-43060

Two-component optical system for laser radiation collimation, calculating tolerances for fabrication and assembly 22 p4051 A70-43560

Optical read-write mass memory based on holographic storage and light addressable matrix array, discussing significance to computer design and usage 22 p3994 A70-43606

Optical system for read-write holographic memory capable of high storage density 22 p3994 A70-43607

Reflection echelon and Fabry-Perot interferometer with surface imperfections, comparing spectral resolution limit with Rayleigh limit 22 p4040 A70-43612

High dispersion stellar spectroscopy with echelle grating, discussing instrument design, operation and performance 22 p4040 A70-43613

Apollo TV cameras, detailing general characteristics, principal features, optical systems and operational requirements 23 p4195 A70-44382

OPTICAL FILTERS

NT INFRARED FILTERS

NT ULTRAVIOLET FILTERS

Semiconductors as optical limiters for Q switched lasers, reporting temperature values for nonlinear absorption coefficients of Si, CdSe, CdTe and GaAs 01 p0158 A70-10563

Metal film graded filter fabrication for schlieren photographic system with laser light source and framing camera, using vacuum evaporation 01 p0113 A70-10921

Optical spatial amplitude filtering techniques application to moire fringe patterns processing 01 p0058 A70-11060

Interference filter for photography of comet heads, tabulating filter characteristics 02 p0303 A70-12707

Collection of papers on optics covering dielectric multilayer filter synthesis, photographic image, light interaction with free electrons, laser radiation, optical echoes, etc 02 p0340 A70-12828

Longitudinal and transverse mode locking in laser with passive filter, discussing giant pulse development and duration 03 p0502 A70-13746

Laser pulse power effect on edge absorption of glass filter used for Q switching applications 07 p1299 A70-19855

Image processing for motion blur removal, discussing methods for measuring degradation and filter design for image restoration 09 p1688 A70-23773

Color schlieren photography with complete spectrum displayed in single photograph, discussing filter matrix 10 p1857 A70-23913

IR light dispersion filters of compressed mixed powdered crystals, discussing optimal preparation procedures, passbands temperature dependence and stability 10 p1915 A70-24256

Deformed grating frequency multiplication by filtering in Fourier plane of lens, forming moire pattern in image plane by mechanical interference 10 p1890 A70-24592

Blue haze hypothesis of Martian atmosphere using Mariner 6 and 7 blue filter photographs, reviewing topographic observations 10 p1943 A70-24841

Optical filtering applied to moire method for measuring small structural strains 11 p2131 A70-25595

Evaporated multilayer optical bandpass filters in solar radiation technology, discussing design and construction 13 p2411 A70-29665

Quasi-optical filters with bandpass and pseudohigh pass structures for millimeter wave and far IR frequencies 14 p2558 A70-31318

Bleachable dye filters selection for periodic undamped output power oscillations in laser 15 p2753 A70-32859

Ruby laser spatial and temporal characteristics improvement with bleachable dye filter, using local negative feedback 15 p2754 A70-32865

Book on holography covering principles, applications, spatial and temporal coherence, interference and diffraction theory and optical filtering 16 p2908 A70-33266

Optical filtering applied to aerial photointerpretation of oceanographic, archeologic and town planning data 17 p3081 A70-34620

Fabry-Perot interferometer series as tunable optical narrow passband filter with high spectral and angular resolution, discussing performance in solar magnetograph 17 p3097 A70-35872

Bandlimiting in coherent optical matched filtering for pattern recognition, eliminating confusion between cross correlations and autocorrelations 19 p3446 A70-37889

Thin films optical constants and thickness measurements and UV bandpass interference filters design 19 p3488 A70-38204

Self oscillatory operation of laser with bleachable light filters, solving power balance equations by computer algorithm 20 p3641 A70-39738

Sun photographs with violet interference filter, determining photospheric magnetic fields position by cospatial network 20 p3634 A70-40410

Corrective light filter performance evaluation by spectral transmittance normalization 22 p4072 A70-42503

Interference-polarization light filter, calculating phase shifter errors effects on transmittance by Poincare sphere method 22 p4072 A70-42505

Color filter schlieren photography for visualization of wind tunnel shock and pressures, liquid mixing and convection currents 22 p4036 A70-43065

Single mode ruby and Nd glass lasers axial mode selection by dye filters, noting radiation spectra and spatial coherence 24 p4352 A70-45462

Partially space coherent diffraction by slit aperture with apodizing filter, calculating tolerance and apodization coefficients for correlation interval numbers 24 p4354 A70-45814

OPTICAL GENERATORS

U LASERS

OPTICAL GYROSCOPES

Unconventional gyros, discussing nuclear magnetic resonance, induction, cryogenic, electrostatic and laser technology 03 p0481 A70-12960

Laser gyro status for major obstacles impeding exploitation, comparing biasing methods 04 p0704 A70-15659

Airborne optical scanning gyro for measuring sea surface radiation emission 22 p4039 A70-43558

OPTICAL HETERODYNYING

He-Ne laser heterodyne system evaluating dispersive effect in He-Ne laser, measuring dispersion as function of cavity loss, excitation level, etc 01 p0107 A70-10102

Chirped pulses observation by heterodyning single frequency Q switched carbon dioxide laser with stable CW local oscillator and beat signal display on oscilloscope 01 p0109 A70-10433

Error probability, signal to noise ratio and average signal level for coherent heterodyne and photon limited laser communication systems, using Poisson distributions 02 p0255 A70-11914

Signal to noise ratio for optical heterodyne with inhomogeneous partially coherent signal and local oscillator fields, using phase-quadrature description 02 p0255 A70-11915

Ar laser as suitable source for LF heterodyne anemometry experiments through noise spectrum suppression under optimum conditions 04 p0702 A70-15569

Optical heterodyne quantum detector response, calculating signal to noise ratios 06 p1008 A70-17524

Optical and electronic mixing in avalanche photodiode during variable amplitude signal demodulation in optical heterodyne receiver, considering conversion losses 07 p1243 A70-20282

Signal properties and measurement accuracy of noncontacting optical heterodyne velocity sensing method used in differential Doppler velocity measurements 09 p1678 A70-22926

Optical heterodyning of Doppler shifted signal with minimal instrumental spectral broadening and high SNR, applying to turbulence structure measurement by CW laser 11 p2062 A70-25630

Electronic heterodyne astronomical spectroscopy, using lasers for absolute monochromatic flux and polarization measurements on star-like objects 13 p2408 A70-29473

Laser Doppler heterodyning system for velocity measurements without directional ambiguity, employing incident beams of different frequencies through rotating diffraction grating or Bragg cell application 15 p2751 A70-31986

Optical heterodyne interferometer for stellar diameter measurements 16 p2925 A70-33025

Far field antenna patterns synthesis and steering for optical heterodyne receivers 16 p2866 A70-34261

Magnetized plasma electron density measurement by laser self heterodyne 17 p3141 A70-34996

IR heterodyne signal statistics, discussing receiver characteristics and design 17 p3105 A70-35096

Cryogenically cooled photoconductive IR radiation detectors, determining wideband optical heterodyne performance 20 p3627 A70-39085

Laser heterodyne system for nonsinusoidal vibration measurements, describing calibration and use 22 p4049 A70-42526

Optimal heterodyne receiver for laser signals element-by-element wavefront detection 22 p3987 A70-42558

Fluctuating light pulses detection and arrival time estimation for heterodyne reception 22 p3987 A70-42560

Light source spatial coherence measurement, verifying laser heterodyne interferometer theory 24 p4354 A70-45665

OPTICAL ILLUSION

Horizontal-vertical illusion and foreshortening of receding horizontal lines during visual observations 02 p0249 A70-12839

Human oculogyral illusion thresholds determined on Ames Man-Carrying Rotation Device to establish stimulus duration effect on angular acceleration thresholds 03 p0424 A70-13765

Illusions of rotation perception with oscillating trapezoid and oscillation perception with rotating trapezoid, correlating magnitudes 05 p0807 A70-16673

Perceptual selection and integration of sensory data conveyed to brain, explaining various optical illusions 10 p1827 A70-24766

Oculogyral illusion provoked by angular accelerations during flying stationary and spiral turns in jet aircraft, considering semicircular canals stimulation 11 p1992 A70-26512

- Visual effects in astronauts and pilots, discussing optical illusions and distance estimation errors due to accelerations, runway factors, lack of oxygen, etc
18 p3225 A70-36777

NT OPTOMETRY
NT PHOTOMETRY
NT POLARIMETRY
NT SPECTROPHOTOMETRY
NT STELLAR SPECTROPHOTOMETRY
NT TELEPHOTOMETRY
NT ULTRAVIOLET PHOTOMETRY
NT VISUAL PHOTOMETRY
- Optical measurements of mirrors reflectance and solar radiation transmittance to solve problems specific to solar energy engineering by standard optical equipment
01 p0010 A70-10765
- Pritchard photometer analyzed for in-focus and out-of-focus operation using radial weighting function
01 p0091 A70-10918
- Photochronographic measurements of high speed rotor vibrations, showing precision and nutation components
01 p0093 A70-11268
- CRT resolution measurements by double slit method, relating light spot response to slit width
01 p0093 A70-11278
- Optical scintillation measurements applied to turbulence diagnostics, inferring spatial spectrum of turbulent scatterers, using Monte Carlo numerical procedure
02 p0296 A70-11892
- Chemical kinetics in reaction zone of shock heated hydrogen-carbon monoxide-oxygen mixtures, measuring density field behind normal shock wave by optical interferometry
02 p0250 A70-12022
- CuCl single crystal refractive index measurement at room temperature using V-block refractometer
02 p0350 A70-12453
- Optical studies of deformational structures of minerals from meteorite craters and cryptoexplosion structures
02 p0292 A70-12510
- Photoelectronic measurement of distance from laser beam axis to reference plane, discussing applications to surveying, vibration measurements and atmospheric investigations
02 p0314 A70-12785
- Stress-optic law for orthotropic composites photoelastic stress analysis, investigating use of transparent filament-resin composites
03 p0481 A70-12956
- Lunar limb ellipsoid orientation and parameters based on Greenwich meridional measurements of visible lunar diameters, noting use for observation reduction for various librations
03 p0569 A70-13356
- Third harmonic generation detection for strongly absorbing media in reflection with neodymium-glass mode-locked laser, measuring nonlinear susceptibilities of semiconductors and metals
03 p0501 A70-13649
- Airborne optics control subsystem /AOCs/ in optical measurement program for radiation originating in reentry events in project PRESS /Pacific range electromagnetic signature study/
03 p0489 A70-13652
- Optical telescope spectrograph to obtain radiometric and spectrographic data on vehicles reentering atmosphere, discussing performance criteria and tests
03 p0489 A70-13653
- Strain distribution measurement in plastically deformed region around crack tip in metals using moire grid and optical interference
03 p0513 A70-14019
- Measurement method for second and third order photon intensity correlation functions, using optical field produced by gas laser operating near oscillation threshold
04 p0700 A70-14686
- Surface roughness measurements by coherent optics and interferometry, including theory and experimental verification
04 p0689 A70-15015
- Solid carbon dioxide measured for complex index of refraction at IR wavelengths
04 p0719 A70-15036
- Multiple optical properties measurement instrumentation for cellular specimens to classify biological cells, analyzing and displaying data by on-line computer
04 p0644 A70-15361

- Polarimeter for atmospheric radiation with three optical channels enabling precision measurement of polarization
04 p0695 A70-15573
- Temporal behavior of NP 0532 in radio and optical bands compared for second derivative of period
05 p0906 A70-15893
- Length shifts measurement with single 2-mode laser by observing beat frequency, obtaining frequency shift proportional to length shifts
05 p0859 A70-16356
- Optical crossbeam technique for remote sensing of wind speeds, relating light fluctuations to convective wind velocity by space-time correlation methods
05 p0850 A70-16688
- Optical surface degradation during measurements with high power laser, considering atmospheric dust and cleaning solvents
05 p0861 A70-16848
- Displacement measurement using single reflecting phase grating
06 p1060 A70-17148
- Displacement measurement to fractions of micron using laser interferometer
06 p1060 A70-17149
- Properties of unstable confocal resonator used with carbon dioxide-nitrogen-helium laser, using geometric models and measurements
06 p1079 A70-17188
- Optical approach navigation experiment on 1969 Mariner mission to Mars demonstrating accuracy potential of spacecraft-based measurement
[AIAA PAPER 70-70] 06 p1103 A70-18152
- Earth axis position and displacements measured by earth-moon laser telemetry
06 p1058 A70-18452
- Remote sensing of winds and atmospheric turbulence by cross correlation of passive optical signals, discussing results for power spectrum of fluctuations and winds
06 p1072 A70-18553
- Multiple beam interferometer coherence analyzer for temporal and spatial study of laser beams, emphasizing application to pulsed lasers, holography and nonlinear optics
07 p1297 A70-19145
- Wave numbers, intensity and half width of lines of vibration-rotation relative to carbon monoxide transition, noting band center displacement dependence on pressure
07 p1338 A70-19380
- Specular reflectivity measurement method for optical thin film coating in 10.6 micron IR region using carbon dioxide laser source
07 p1302 A70-20084
- Holographic system to obtain time-bandwidth product improvement in spectral analysis without sacrificing multichannel processing capability
07 p1288 A70-20098
- Quasi-optical beam splitter, using grid diffraction of plane wave at dielectric cylinder, suitable for millimeter and submillimeter wavelengths and thread measuring
08 p1496 A70-21219
- Microphotometric spectral reflectivity correlation to static Young moduli of carbon and graphite yarn filaments as optical testing method
08 p1497 A70-21350
- Quantum mechanical form of Cramer-Rao inequality used to determined error lower bound for radiating object parameter observed by quantum-limited optical system
09 p1694 A70-22072
- Polarization-optical studies of large deformations in nonlinear theory of elasticity and plasticity, considering procedures based on photoelastic coatings and transparent models
09 p1768 A70-22120
- Small-scale local flow velocity measurements with laser using differential Doppler method
09 p1694 A70-22125
- Plasma discharge absorption coefficients measurement using Q switched ruby laser
09 p1694 A70-22139
- Earth satellite orbit determined by small separated optical observations at two stations
09 p1751 A70-22162
- Real time hologram-interferometry application to optical aspheric surfaces testing explained by geometrical optics
09 p1676 A70-22717
- Compact unequal-path radial shearing laser interferometer designed for small angular aperture wave front testing
09 p1696 A70-22719
- Coherent optical beam propagation measurement of fine scale turbulent atmosphere structure, inferring microscale size and permittivity spectra
09 p1635 A70-22963
- Photo-optical processes and optical measuring techniques in research programs at Ames Research Center for aerodynamics, life sciences and space sciences
09 p1657 A70-23501

- NASA operation of Convair 990 jet transport as airborne scientific research platform for optical observations
09 p1682 A70-23504
- Optical tools in aeronautical and space research at Langley Research Center, discussing schlieren photography of aeronautical and space models in wind tunnels
09 p1657 A70-23510
- Optical research at NASA Electronics Research Center applied to air pollution measurement, pulse formation, pilot warning systems, star field mapper, etc
09 p1657 A70-23513
- Roof prism reversing-front Michelson interferometer for phase correlation measurements in turbulent atmosphere
09 p1684 A70-23535
- Atmospheric water vapor profiles remote measurements using Raman component of high powered Q switched laser backscatter
10 p1886 A70-23938
- Microwave surface acoustic delay lines properties, advantages, electron beam fabrication, optical probing for propagation loss measurement, etc
11 p2005 A70-26166
- Divergence measurement of beam emitted by ruby laser in relaxation mode as function of cavity length and excitation voltage
11 p2063 A70-26462
- Lunar limb ellipsoid orientation and parameters based on Greenwich meridional measurements of visible lunar diameters, noting use for observation reduction for various librations
11 p2118 A70-26721
- Electron concentration measurement range expansion in plasma by laser interferometer with optical signal phase modulation
12 p2278 A70-27328
- Stress concentrations and optimum shape minimum-weight reinforcement of circular holes in plates determined by polarization-optical technique
13 p2512 A70-28864
- Radar and optical meteor observations comparison, discussing luminosity function and angular velocity
13 p2490 A70-29042
- Vertical tropospheric turbidity distribution determination from intensity measurements of inclined searchlight beams
13 p2445 A70-29471
- Interferometric measurement of spatial correlation function of optical radiation fields propagating through turbulent atmosphere
13 p2454 A70-29825
- Spatial filters for ratio W/H measure in aerial mapping
14 p2581 A70-30144
- Air cell optical phase shifter for holography based on refractive index variation with air pressure
15 p2741 A70-32439
- Erroneous height correlation coefficients in physical optics formulation of rough surface scatter
16 p2859 A70-32938
- Spatial vectors determination by two laser measurements and one optical observation of artificial satellite
16 p2926 A70-33118
- Optical system and light source imperfection effects interference image contrast lowering in laser interferometer for length measurements
16 p2928 A70-33292
- Materials real time strain measurements by optical correlation techniques, noting sensitivity
16 p2913 A70-33980
- Optical system measurement of density and rotational temperature in gaseous plume simulating auxiliary propulsion and oxygen hydrogen burner of S-4B
16 p2913 A70-34023
- Jovian planets polar and equatorial diameters and lateral dimensions of Saturn rings by optical measurements
16 p2979 A70-34034
- Luminous emissions related to Apollo 12 mission observed in Belgium, discussing flight chronology, gas ejection, stage separation, etc
16 p2981 A70-34318
- Holodiagram for making and evaluating holograms for large objects dimension, deformation and vibration measurement
17 p3084 A70-35004
- Holographic interferometry measurements, including low frequency quartz vibration and relaxation effects in materials following strain or impacts
17 p3085 A70-35005
- Standards for measuring pulsed laser energy, CW laser power and HCN laser frequency
17 p3105 A70-35097
- Optical rectification /polarization/ and measurement of Q switched laser energy and time parameters, using crystals and parallel plate capacitor
17 p3105 A70-35098
- Plasma opacity measurements using CW He-Ne and Ar lasers as light sources
17 p3106 A70-35107

Clear air turbulence /CAT/ remote sensing feasibility by optical signal covariance measurement, taking into account refractive index fluctuations

17 p3132 A70-35723
Picosecond light pulse measurement by two beam overlap technique using nonlinear photoelectric effect

17 p3097 A70-35912
Optical observation of laminar convective flow caused by combined action of concentration and temperature fields

18 p3346 A70-36276
Optical observation of structure, composition, thermal spectra and aerosol layers of giant planet atmospheres

18 p3315 A70-36601
Integrating sphere theory with wall mounted specular sample in reflectance and transmittance measurements

18 p3284 A70-36776
Silicon elastic constant measurement by Debye-Sears effect, using He-Ne laser source

18 p3298 A70-36952
Atmospheric particle distribution spectrum by optical methods, estimating aerosol concentration from scattering coefficient

18 p3251 A70-36980
Daylight sky brightness at different wavelengths by airborne photometer, investigating statistical characteristics

19 p3460 A70-37419
Atmospheric scattering indicatrices from daytime sky brightness balloon measurements in presence of cloud cover

19 p3460 A70-37420
Atmospheric aerosols optical and microphysical measurements comparison, evaluating sample collection equipment, errors, etc

19 p3421 A70-37637
Transparent spherical rotor spin axis orientation by measuring Fresnel drag effect of optical beam inside ring laser cavity

19 p3445 A70-37669
Two photon absorption-fluorescence measurement of laser pulse width, using three level model of absorber

19 p3422 A70-37671
Laser aided frequency and amplitude analysis of vacuum test chamber vibration during alignment of orbiting UV spectroheliograph

19 p3396 A70-37877
High accuracy length measurement by fringe counting using laser interferometer

19 p3447 A70-38050
Thin films optical properties and measurements

19 p3487 A70-38197
Thin films optical constants and thickness measurements and UV bandpass interference filters design

19 p3488 A70-38204
Strain analysis by moire technique, using triangular and square root of 2 gratings

19 p3432 A70-38720
Earth continental drift and polar wandering measurements by laser ranging to two synchronous satellites

19 p3529 A70-38882
Pulse light amplification by stimulated thermal Rayleigh scattering measured as function of time, absorption coefficient and interaction length

20 p3640 A70-39114
Smoke chamber measurements of opacity developed in polymer pyrolysis or combustion, including Materials Smoke Obscurity Index /MSOI/

20 p3736 A70-39404
Small angle of rotation measurement of coherent radiation polarization plane, discussing technique for increasing sensitivity and accuracy

20 p3643 A70-39759
Extrasolar X ray source optical observations, discussing identification method and individual characteristics

20 p3700 A70-39930
He/Ne laser amplifier and oscillator threshold bandwidth measurement by double laser device

20 p3643 A70-40126
Optical reflection measurement at grazing incidence from shock front at Mach 1.94 in air at atmospheric pressure

20 p3674 A70-40167
Millimeter wave and optical astronomical refraction differential measurements, showing dependence on atmospheric water vapor

20 p3588 A70-40305
Turbulence characteristics determination by measuring light beam arrival angle fluctuation using photoelectric recording shadow devices

20 p3634 A70-40401
Optical photometric observations of nonsolar gamma and X ray sources WX Cen, NGC 5189 and GX3 plus 1

21 p3873 A70-40669
Optical thermal testing by IR radiation, reviewing thermistor bolometer, various detectors, radiometric microscopes, NDT equipment, etc

21 p3831 A70-40747

Bubble frequencies random distribution during boiling of pure liquids and binary liquid mixtures by optical measurement

21 p3941 A70-40775
Clear lower atmosphere meteorological parameters remote sensing for weather forecasting, comparing optical, radio and acoustic radar techniques

21 p3785 A70-40802
Fuel nozzle sprays mean droplet diameter based on computerized analysis of small angle forward scattered light profile

21 p3806 A70-40805
Photographic emulsions and photosensitive materials for holography, measuring noise spectral power density at high spatial frequencies by scattered light method

21 p3822 A70-40812
Integrating cavity spectroscopy for measuring absorption coefficient of material

21 p3822 A70-40817
F region radar and optical temperature measurements, discussing Doppler and backscatter ion temperature

21 p3818 A70-41103
Heat transfer measurements based on optical methods with temperature dependence of refractive index making temperature field visible

21 p3826 A70-41373
Quantitative optical and electron probe studies of opaque phases in Apollo 11 lunar rocks

21 p3902 A70-41552
Catalog 4C radio sources optical identification, determining distribution, coordinates and radio luminosity

21 p3922 A70-41978
Accurate tuning methods for laser mode locking device, using diffracted light measurement and photodiode with LF spectrum analyzer

21 p3838 A70-42047
Electron concentration measurement range expansion in plasma by laser interferometer with optical signal phase modulation

21 p3860 A70-42069
Optical solar observatory for investigation of solar activity and impact on earth environment, discussing site selection and equipment

22 p4005 A70-42349
Plasma diagnostics by two-beam optical interferometry and holographic techniques, discussing plasma parameter spatial distribution recording insensitivity to radiation and variable- sensitivity interferometry

22 p4079 A70-42382
Crab pulsar observations with refractor and on-line data acquisition, indicating optical pulse arrival times at variance with previously assumed 77 day periodic wobble

22 p4097 A70-42464
Three dimensional hologram diffractive efficiency measurement by spectrographic attachment

22 p4026 A70-42508
Optical glasses photoelastic constants measurement, tabulating results

22 p4072 A70-42509
Large collimator objectives lenses focal lengths measurement in vibrations and temperature gradients

22 p4073 A70-42511
Fiber optic components quality control by image transmission intensity distribution measurement

22 p4045 A70-42513
Single and crossed light beam techniques for optical measurement of fluid turbulence with refractive index fluctuations

22 p4011 A70-42694
Crab Nebula pulsar NP 0532 optical timing, measuring frequency, arrival times and pulse interval

22 p4102 A70-42936
Optical waveguides and resonators propagation modes detection and discrimination techniques evaluated for circular cylinder dielectrics /optical fibers/

22 p4030 A70-42949
High purity surface-free GaAs epitaxial layer carrier lifetime measurement by optical transmission and excitation technique

22 p4086 A70-43017
Ruby laser mode excitation, spatial coherence and free emission kinetics investigated by high speed camera scanning

22 p4051 A70-43461
Material transfer image recording using focused laser beam, discussing experimental setup and test results

22 p4040 A70-43605
Optical FM system with laser interferometer and sideband carrier circuit for measuring mechanical shock by Doppler shift

23 p4193 A70-43964
Laser applications in length measurement and holography, describing principles and techniques, modulated laser beams and pulse transit time

23 p4201 A70-43998
Microwave propagation in waveguides, investigating trapped and slightly leaky modes in multilayered or multiwave regions by ray-optical techniques

24 p4311 A70-45216

Laser sensors as alignment instrument for control and measurement of five degrees of freedom

24 p4351 A70-45383
Laser measurements in semidynamic space geodesy on D1-D satellite using Mediterranean stations

24 p4352 A70-45541
GEOS 1 satellite short arc optical observations over North American network to improve survey coordinates of tracking stations

24 p4312 A70-45542
Electro-optical light speed measurements with interference comparator using He-Ne lasers with light modulators

24 p4353 A70-45562
Mode locked neodymium-glass pulsed laser stimulated picosecond time resolved light emission observation by cross beam technique

24 p4354 A70-45647
D2A satellite optical experiments, examining atmospheric atomic H and solar and extraterrestrial 1216 A emission

24 p4339 A70-46094
Phosphorus and selenium oxychloride based liquid laser transmission loss measurement

24 p4355 A70-46265
Laser Doppler shift theory and applications to vibration and flow velocity field measurements

24 p4340 A70-46351

Real-world physical simulators application to tactical and strategical optical hardware

01 p0089 A70-10819
Turbulence intensity, light intensity fluctuations and frequency optical measurement in diffusion flames of city gas with air, deriving turbulence spectral functions

02 p0398 A70-12038
Gas pressure differences and diffusion rates recording using He-Ne laser interferometer, discussing aerodynamic applications and avionic instrumentation problems

02 p0299 A70-12272
Photo-optical instrumentation - Conference, Washington, D.C., August 1968, Volume 1

03 p0487 A70-13651
Laser velocimeter measurements on drag reducing polyacrylamide solution compared to water

03 p0502 A70-13821
Holographic method for measuring optical instruments transfer function, using laser light source and beams interference

03 p0493 A70-13946
Precision and accuracy evaluation of convergence angles for measuring vertical and horizontal components of space position applicable to geodesy and flight measurement

04 p0676 A70-14634
[AAS PAPER 69-605]
Prismatic astrolabe errors, analyzing focal plane displacement due to temperature, micrometer motor adjustment, instrument and personal errors

04 p0693 A70-15485
Cine recording ophthalmoscope with TV monitoring for retinal photography during centrifugation

06 p1061 A70-17286
Cosmic rays induced Cerenkov light pulses effect on stellar intensity interferometer from measuring correlated pulses

08 p1497 A70-21492
Signal properties and measurement accuracy of noncontacting optical heterodyne velocity sensing method used in differential Doppler velocity measurements

09 p1678 A70-22926
Optical signal processing using circular array and spatial frequency filtering to yield azimuthal distribution of sources

09 p1678 A70-22969
Single and clad glass fibers radii and refractive indices measurements on basis of laser light scattering

09 p1699 A70-23444

Mirror-grating system optical properties emphasizing coma-type aberration elimination

09 p1729 A70-23528

Aluminized epoxy integrating hemiellipsoidal reflector, discussing fabrication, focusing properties and selection of detector size

09 p1683 A70-23530

Instrument localizing-resolving powers relationship as function of luminous source coherence

10 p1898 A70-23911

Vacuum chamber for adjusting and calibrating spaceborne optical instruments used in studying UV radiations

10 p1860 A70-24479

Plate coordinate measurements obtained with Zeiss precision monocomparator at satellite observation station

10 p1889 A70-24501

Laser methods for industrial length measurements

11 p2061 A70-25355

Visible light sensors application in LES control system for circular near equatorial orbits

[AIAA PAPER 70-477] 11 p2107 A70-25432

Length shifts measurement with two mode laser, noting frequency shift proportionality to mirror displacement

11 p2062 A70-25632

Instrument for measuring and recording strains and birefringence in glasses and crystal under compressive, tensile or bending loads at low/high temperatures and in vacuum

12 p2237 A70-28161

Laser beam photography utilization in engineering for optical pointers, interferometers and holographic visualization of surface strain and vibration

13 p2406 A70-28914

Statistical estimation of resolvability of incoherently radiating object sampled at aperture field of observing optical instrument, using Cramer-Rao inequality

13 p2453 A70-29823

Atmospheric absorption, scattering and turbulence effect on visible and IR radiation propagation, discussing optical systems performance

14 p2583 A70-30399

Balloon-borne optical dew point hygrometer and radiosonde measurements of atmospheric range refractive index

14 p2585 A70-30573

Satellite attitude control via optical-inertial stabilization, using Bucy-Kalman linear statistical filtering

15 p2811 A70-32265

Servocontrolled laser strainmeter based on Michelson-Morley interferometer, determining dynamic characteristics dependence on feedback loop filter type

16 p2925 A70-33022

Optical heterodyne interferometer for stellar diameter measurements

16 p2925 A70-33025

Laser anemometer for fluid flow measurements, noting sample size restraint, frequency response and velocity range

16 p2926 A70-33141

Laser Doppler-shift velocimeter with self aligning optics, discussing performance parameters

16 p2926 A70-33143

Gas laser components optical properties determination, describing measuring apparatus and techniques

17 p3106 A70-35104

He-Ne CW laser emission line width measurement, describing apparatus and technique

17 p3106 A70-35108

Humidity measurement and calibration systems, considering automatic optical dew point hygrometry

17 p3089 A70-35172

Instrumental measurement of projection center coordinates for aerial triangulation with independent models

18 p3248 A70-36780

Photofragment spectrometer, describing vacuum chamber, molecular beam and light sources, mass spectrometer detector, data acquisition and display system, etc

18 p3261 A70-37094

Balloon-borne spectrophotometer with diffraction grating for upper atmospheric solar radiation attenuation measurement

19 p3422 A70-37639

Optimum laser beam deflection for instrument design, considering tandem, rotary mirror and analog methods

19 p3446 A70-37879

Optical hydrometer measuring water vapor content in vertical atmosphere column, using interference filters and thermoelectric sensitive element

20 p3625 A70-39027

Optical interferometry device for large amplitude vibration measurement

20 p3630 A70-39488

Agricultural crop identification, using optical Stokes parameters such as wavelength, geometry, and bidirectional photometric and polarization factors

22 p4014 A70-42769

Projectile velocity measurement, using laser and Fabry-Perot interferometer for Doppler shift determination

[SMPT PREPRINT 29] 22 p4034 A70-43046

Laser application to deformation and vibration analysis, discussing optical alignment, contactless measurement and holographic interferometry

23 p4201 A70-44335

Solar activity research, discussing optical facilities, photoelectric magnetographs, magnetic field measurement, solar cycles and flares, etc

23 p4256 A70-45034

OPTICAL METHODS

U OPTICS

OPTICAL MICROSCOPES

Microscope objective effect on accuracy of optical systems modulation-transfer function based on corrected high speed lens measurements

07 p1334 A70-19147

OPTICAL MODULATION

U LIGHT MODULATION

OPTICAL PATHS

Optical paths inequality of nonuniform power opposing waves in ring lasers

01 p0107 A70-10209

Holographic interferometry for determining optical path variations resulting from photographic plate emulsion thickness and refractive index changes during development

01 p0087 A70-10666

Interferential picture visibility in turbulent atmosphere measured at large path differences with Michelson-Twyman-Green interferometer using He-Ne laser radiation source

03 p0498 A70-12869

Light signals amplification efficiency, considering double-pass regenerative amplifier

04 p0702 A70-15225

Maximum likelihood receiver (MLR) to detect pulsed signal propagated through turbulent medium, assuming optical propagation over long path in atmosphere

07 p1227 A70-19146

Radiation focusing properties of gravitational bodies associated with curving light trajectories analyzed by geometrical and waveguide optics approximations

07 p1384 A70-19411

Laser beam trajectory equation in scanning ultrasonic cell for nonzero incidence angle, relating input and output beam divergence

07 p1300 A70-19865

Total optical field in inhomogeneous medium, questioning uniqueness of division into direct and reversed wave propagation

08 p1546 A70-21785

Atmospheric ray paths calculations applied to determination of optical air mass and twilight ray paths in earth atmosphere

10 p1873 A70-23830

Diffuse light transmission from point sources over horizontal paths in lower atmosphere, discussing effect of range

10 p1912 A70-24424

Composite cylindrical laser rods end region stress and optical pathlength change with thermal expansion or contraction between core and cladding

13 p2429 A70-29703

Aircraft clear line of sight probability data for various altitudes and view angles

14 p2608 A70-30595

Interferograms of window wave front deformations to measure angular deviations to line of sight

15 p2737 A70-32038

GaAs lasers with light propagation along curved junctions, discussing threshold current density variation with radius of curvature

18 p3269 A70-36738

Transmission line modal analysis for nonlinear polarizability in optical and quasi-optical waveguides

21 p3784 A70-40564

Numerical model of light diffraction on plane shock waves at optical phase jump region for shadow and schlieren techniques

[SMPT PREPRINT 97] 22 p4035 A70-43058

OPTICAL POLARIZATION

Icarus surface reflectivity estimated from reflected light polarization, combining estimate with inferred absolute magnitude to obtain radius

01 p0180 A70-10537

Stress concentration in optically active fiberglass reinforced plastics during static loading determined by optical polarization method

02 p0390 A70-12812

Optical rotatory power measurement for compensated cholesteric liquid crystal helical structure to observe thermally induced inversion and electric field perturbations

03 p0542 A70-14003

Polarimeter for atmospheric radiation with three optical channels enabling precision measurement of polarization

04 p0695 A70-15573

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns

06 p1063 A70-17643

Optical activity theory based on Kirkwood independent group model using scattering matrix

07 p1334 A70-19264

Thermal stress freezing during optical polarization study of perforated disk three dimensional thermoelasticity

09 p1780 A70-23105

Lower thermosphere dust particle layers correlated with polarization anomaly twilight fluctuations and noctilucent clouds frequency distribution

10 p1944 A70-24949

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns

13 p2405 A70-28726

He-Ne laser beam transmission through atmosphere, investigating intensity, spot size, polarization and power spectrum fluctuations

13 p2427 A70-29103

Optical polarization, discussing radiation intensity and state measurement by two beam interferometer

15 p2736 A70-32035

Optically active organic compounds origin on primordial earth, emphasizing role of asymmetric catalyst

17 p3024 A70-34700

Optically active alpha-amino acids synthesis from esters of alpha-keto acids by hydrogenolytic asymmetric transamination

17 p3041 A70-34749

Optical rectification/polarization/ and measurement of Q switched laser energy and time parameters, using crystals and parallel plate capacitor

17 p3105 A70-35098

Polarization optical determination of plane stress plastic region, using celluloid model

18 p3343 A70-36723

Carbon dioxide laser producing nearly 100 percent amplitude modulation of output by intracavity polarization modulation technique

18 p3270 A70-36747

Zodiacal light observations at elongation angles from sun, examining surface brightness, color index and polarization degree by balloon-borne instruments

18 p3318 A70-37012

Amino acid racemization as enantiomers in core sediment samples

21 p3781 A70-41896

Optical activity of nonenantiomorphous biaxial crystals with mirror planes, investigating polarization plane rotation

21 p3850 A70-41934

Interference-polarization light filter, calculating phase shifter errors effects on transmittance by Poincaré sphere method

22 p4072 A70-42505

Crab Nebula pulsar optical polarization compared with surrounding nebula and radio polarization

22 p4105 A70-43227

Holographic exposure and reconstruction processes, considering illumination beam polarization effects on image brightness

22 p4040 A70-43616

Novae and supernovae envelope properties, observing optical polarization and magnetic field for Crab Nebula

24 p4413 A70-46169

Optical solar polarization broadband measurement interpretation with depolarization factor due to elastic collisions or additional source

24 p4414 A70-46172

OPTICAL PROPERTIES

K factor analysis of target visibility, considering target size contrast, background luminance, glare, atmospheric scattering and optical sight parameters

01 p0142 A70-10420

Nonlinear optical properties of lithium niobate single crystals, considering optically induced index inhomogeneity and second harmonic generation

01 p0157 A70-10422

Flow velocity pulsations effect on frequency spectrum of flow optical fluctuations, discussing methods for separating turbulence characteristics

01 p0092 A70-10996

Venus atmosphere optical properties on basis of Venera 4 data, proposing models for measured rotational temperature and subcloud atmosphere radiative equilibrium

01 p0192 A70-11507

Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra

01 p0160 A70-11599

Diffuse isotropic light interaction with compact corn leaf, using transparent plate model with rough plane-parallel surfaces

02 p0338 A70-11893

Collection of papers on optical properties of planetary atmospheres

02 p0374 A70-12426

Intermediate air layer optical properties explained by assuming presence of small and large size aerosol particles

02 p0328 A70-12436

Aerosol induced light scattering optical properties in atmospheric boundary layer measured with three photometer setup with He-Ne laser

02 p0328 A70-12437

Two band Drude model validity for analysis of IR optical properties of transition metals obtained from experimental dielectric constant data

02 p0339 A70-12452

Optical properties changes of various transmitting materials under simulated micrometeoroid environment, using silicon carbide particles accelerated in shock tube

03 p0523 A70-13027

Displacement interferograms and schlieren pictures of optical inhomogeneities in transparent media obtainable from single exposure hologram, using non-monochromatic and laser light for reconstruction

03 p0483 A70-13258

Optical variations of quasars and other radio bright sources using photographic photometry, emphasizing highly optically violently variable (OVV) quasars properties

03 p0568 A70-13328

Quasi-optical propagation in frequency wave range above 100 MHz as user problem in VOR, ILS, navigation satellite and CAT detection and warning systems

03 p0523 A70-13613

Optical inhomogeneity of GaAs associated with current carrier distribution analyzed quantitatively using magnetooptical Faraday effect and transmittance method

03 p0541 A70-13726

Optical phonons in mixed sodium potassium tantalate crystals as function of temperature and composition, using IR and Raman spectra

03 p0542 A70-14002

Planetary nebulae with concordant and discordant radio and optical fluxes, discussing possible causes of discordances

04 p0747 A70-14516

Optical systems for coude focus spectroscopic telescopes, discussing advantages over Newtonian and Cassegrain foci

04 p0685 A70-14522

Optimum planetary image intensity at Tv camera cathodes, exemplifying with Saturn orthicon image

04 p0688 A70-14694

External optical phonon modes in ammonium and deuteroammonium halides phase transitions as function of temperature, using IR and Raman spectra

04 p0646 A70-14695

Surface coating optical and thermal properties investigated in preparation for HELIOS solar probe [DGLR-69-46]

04 p0762 A70-15163

Multiple optical properties measurement instrumentation for cellular specimens to classify biological cells, analyzing and displaying data by on-line computer

04 p0644 A70-15361

Optical, electrical and structural properties of transition metal dichalcogenides

05 p0890 A70-15755

Light collecting properties of polystyrene scintillator designed for counting particles of electron-photon showers generated by high energy cosmic ray particles

05 p0846 A70-15944

Elliptically shaped lenses to eliminate reflection losses by positioning obliquely in optical line

05 p0812 A70-16244

Photostability of Nd-activated glass elements as function of dopant concentration and laser mode operation

05 p0858 A70-16266

Diffuse far UV radiation analysis in connection with stars and dust grains distribution and grains optical properties

05 p0903 A70-16571

Beam transformation laws and matrices for Gaussian beams, discussing propagation, reflection and refraction in geometrical optics

05 p0883 A70-16773

Optical parameters of Martian surface and temperature, discussing brightness distribution along diameter in red spectral region, based on photoelectric cross sections

05 p0918 A70-16917

Yttrium-iron garnet optical properties at various wavelengths and temperatures, noting absorptivity decrease in IR region

06 p1126 A70-17767

Optical parameters effect on directional emittance near edge of two dimensional ceramic coating, using Monte Carlo techniques [AIAA PAPER 70-67]

06 p1106 A70-18138

Optical properties of Gabor holograms with pure reference beam, discussing image reconstruction using He-Ne laser

06 p1072 A70-18565

Basic equations governing optical properties of telecentric lens systems for moire analysis, discussing suitability for stress analysis

07 p1248 A70-19238

Solar installations optical properties selectivity increase by light-collecting surfaces mechanical treatment, describing plate grinding with abrasive powders

07 p1196 A70-19625

Elastic and optical properties anisotropy in fiberglass reinforced epoxy plates using photoelastic method

07 p1416 A70-20295

N-type InAs single crystals optical properties with various carrier concentrations at 1-6 μ m wavelengths and 300-78 K temperatures, studying absorption spectra

08 p1555 A70-20512

Optical suitability to pilot visual requirements in head-up displays, discussing telecentric viewed system permitting binocular disparity tests

08 p1449 A70-20675

Astronomical telescope performance at transfer process from object to image using optical transfer function and brightness standards

08 p1493 A70-20685

Optical parametric backward-wave instabilities in unbounded medium with stopband dispersion using Fourier-Laplace integral

08 p1552 A70-21595

Coherent light beams scanning and propagation direction control by acoustooptical method for laser applications

09 p1695 A70-22315

F-104 jet windshield components research concerning plate glass optical deviation problems to meet quality standards

09 p1691 A70-22571

Quasi-optical waveguide component (attenuator) in S-band measured for performance noting diffraction as limiting factor

09 p1647 A70-22711

Room temperature cholesteric liquid crystals retention of information on past electric field excitation by changes in optical transmission properties

09 p1740 A70-22924

Electrical narrowband noise model for laser speckle pattern, obtaining image intensity statistical properties

09 p1638 A70-23370

Mirror-grating system optical properties emphasizing coma-type aberration elimination

09 p1729 A70-23528

Optical properties of beta prime phase CoAl, CoGa and NiGa as functions of composition and photon energy

10 p1919 A70-23986

CW Nd-doped YAG laser rods, measuring thermal and optical properties before and during pumping with W lamps

10 p1900 A70-24942

Electrical analogs for optical systems based on linear system concepts and communication theory analysis

10 p1854 A70-25246

Macrodon elastic-plastic strain model, studying stress-strain relationship and optico-mechanical properties

11 p2128 A70-25385

Magneto-photoelasticity equations derived for photoelastic model in magnetic field, developing algorithm for optical phenomena for arbitrary stress distribution

11 p2131 A70-25588

Optical and radio homologues of solar flares, studying correlation from astronomical telescope pictures

11 p2105 A70-25747

Resonant oscillations of passive Fabry-Perot resonator in optically anisotropic medium, using parabolic equations for wave vector amplitudes polarized components

11 p2063 A70-25869

Piezo-rotatory coefficients R_{11} and R_{12} of isotropic non-enantiomorphic optically active crystals from fourth rank axial tensor, discussing stress effects

11 p2098 A70-26298

Quenched MnBi thin films measured for magnetic, magneto-optical and optical properties, noting Faraday rotation

12 p2284 A70-27246

Selective optical coatings of alternate Ni and silicon dioxide layers, describing optical and spectral characteristics of black mirror

12 p2272 A70-27307

Waveguide optical properties effect on injection GaAs laser threshold lasing and field distribution in near/far zones for various parameters of active region

12 p2246 A70-27365

Quasar optical properties, red shift and models

12 p2299 A70-27379

Field cotton leaves reflectance and transmittance measurement, predicting linear dimension related to cellular structure

12 p2273 A70-28122

Temperature dependence of electrical conductivity and optical properties of strontium titanate semiconductor single crystals doped with Ce and Nb

12 p2288 A70-28328

Nonoriented cadmium silicon arsenide single crystals optical properties, determining spectral distribution of IR absorptivity for various photon energies

13 p2470 A70-28883

Reflecting surface nonplane parallelism effects on Fabry-Perot interferometers superposition bands contrast and multiplied length measurement accuracy

13 p2408 A70-29366

Stimulated emission cut-off characteristics of laser based on crystals with Nd ions under UV irradiation

13 p2429 A70-29505

Thermooptical constant of laser neodymium glasses measured with interferometer

13 p2430 A70-29761

Polymer optical properties in terms of interaction matrix coupling monomers, applying to polypeptide alpha helix, beta sheets and polyproline helices

14 p2544 A70-30118

Continuous operation He-Ne lasers, discussing excitation, structural and optical design, mode selection and performance specifications

14 p2593 A70-30353

Atmospheric optical aerosol model based on vertical attenuation profile, particle concentration and size distribution and air conductivity

14 p2603 A70-30410

Wave properties of nuclear optical model for barrier penetration by charged particles, considering square well reflection, absorption and resonance

14 p2619 A70-30491

Lunar surface optical properties differences for lunar and planetary nature and evolution determination

14 p2645 A70-31063

Photoemission optical analysis from thin films with uniaxial anisotropy, discussing reflectance, transmittance and divergence of Poynting vector

15 p2774 A70-32012

Goddard Space Flight Center optical studies, noting UV and soft X ray regions, lasers and holography, vision, photography and testing

15 p2775 A70-32026

Glancing incidence extreme UV telescopes optical design in solar physics applications, employing surfaces of revolution

15 p2736 A70-32029

Shemakha observatory telescope main mirror spherical aberration, coma, astigmatism and light concentration, describing support system and adjustment and control mechanisms

15 p2738 A70-32203

Elastic and optical properties of polyurethane rubber under large deformation using natural stress concept derived from stress-strain linear relationship [SESA PAPER 1608]

15 p2821 A70-32319

Atmospheric optical properties at various altitudes, using lunar disk photometric observations at different wavelengths during eclipse

15 p2801 A70-32476

Composition dependence of optical energy gap and diffuse reflectance in MnSe-CdSe solid solutions

16 p2960 A70-33094

Mechanically heterogeneous and optically homogeneous solid/liquid mixed laser with active centers contained in Ne bathed in liquid

16 p2926 A70-33109

Beryllium mirrors optical performance, describing causes and effects of anisotropy and dimensional instability

16 p2904 A70-33146

Optical properties of electropolished cubic Nb-Ti alloys at cryogenic and room temperatures in visible and near IR spectral range

16 p2930 A70-33205

Tropospheric inhomogeneities properties and wind conditions in relation to lunar limb image deformations

16 p2979 A70-34178

Atmospheric optical properties stability determination for various optical densities, assuming horizontally homogeneous medium with properties constant during observation

16 p2899 A70-34181

Earth atmosphere transmission coefficient and optical stability based on solar aureole observation

16 p2899 A70-34186

Electronic narrow sweep antenna array active element number reduction, discussing optical considerations

16 p2866 A70-34266

Glass laser materials characteristics, discussing refractive index thermal coefficient, stress optical coefficients, spontaneous emission, etc

17 p3105 A70-35091

Gas laser components optical properties determination, describing measuring apparatus and techniques

17 p3106 A70-35104

InAs p-n junction laser electrical and optical characteristics during spontaneous and stimulated radiative recombination

18 p3269 A70-36739

Upper atmospheric dust composition and optical properties by crepuscular technique, using photometric measurements in 5200 Å region

18 p3251 A70-36978

Spiral structure definition in external galaxies, discussing optical form types, Messier 33 outer and inner parts and differences in arms

18 p3326 A70-37153

Galactic spiral structure, discussing gravitational theory, pattern origin, radio and optical structure and magnetic field effects

18 p3332 A70-37201

Cardioid condenser as radiometer mirror objective in low temperature radiometry, describing optical characteristics

19 p3420 A70-37261

Nd glass laser ultrashort light impulse optical rectification, presenting lower harmonics angular dependence

19 p3443 A70-37287

Trichroic IR absorption lines of triglycine selenate, computing optical and dielectric constants from transmission and reflection data

19 p3470 A70-37366

Soviet reference book on highly refractory elements and compounds covering crystalline, chemical, thermodynamic, thermophysical, electrical, optical and nuclear properties

19 p3451 A70-37470

Thin films optical properties and measurements

19 p3487 A70-38197

Antireflection titanium dioxide thin films for aerospace silicon solar cells

19 p3358 A70-38201

Thin films optical constants and thickness measurements and UV bandpass interference filters design

19 p3488 A70-38204

Optical system mtf measurement by photographic technique for comparing telescopic sight with simulator, discussing performance

19 p3428 A70-38511

Light characteristics and geometry of photoelectric photometer system measuring light attenuated by atmosphere, discussing error sources

20 p3625 A70-39030

Optical properties of system measuring atmospheric transmittance by recording light backscattered from atmospheric layers

20 p3660 A70-39033

Ronchi test interferometer for optical quality checking of laser crystals

20 p3627 A70-39094

Organic liquid scintillators with high transparency, describing optical and chemical properties

20 p3629 A70-39319

Solar flare parameters, statistical relationships and energy estimates from optical characteristics

20 p3699 A70-39465

Holographic recording in transparent bodies with optical characteristics changeable under intensive light

20 p3633 A70-39999

Temperature dependent anomalous optical absorption of thin yttrium films under static ultrahigh vacuum

21 p3862 A70-40816

Optical properties of off-axis multibeam resonators with spherical mirrors, discussing application to He-Ne lasers

21 p3836 A70-40914

Interstellar spherical dust particles from meteoritic silicates and dirty ice, calculating optical properties and scattering functions

21 p3889 A70-41147

Extended extragalactic bright radio sources with complex structure, comparing radio to optical field

21 p3892 A70-41189

Apollo 11 lunar fines, rocks and breccias luminescence, electron paramagnetic resonance and optical properties, discussing reflection spectra, heating effects and dipole resonance

21 p3914 A70-41654

Apollo 11 lunar powder optical and HF electrical properties, discussing reflectivity, polarization, absorption, differential mass spectrum and albedo

21 p3915 A70-41655

Apollo 11 lunar fines, investigating solar radiation effects on optical properties by standing and heating

21 p3915 A70-41660

Optical properties of amorphous polymers, considering one state calculations for flexible polypeptides in solution and disordered regions of films or proteins

21 p3780 A70-41702

Electro-optic device using ferroelectric bismuth titanate, discussing electrical and optical properties and matrix addressed display

21 p3830 A70-42114

Optical devices contaminated mirror surfaces restoration with atomic oxygen from RF plasma by noncontaminating nondestructive oxidation of polymer film

22 p4029 A70-42622

Liquid crystals as solid state organic material with physical properties of liquid, discussing electro-optical properties and applications

22 p4085 A70-42724

X ray sources identification with optical counter-parts, noting lack of radio and pulsar type emissions

22 p4094 A70-42929

Sources of variability in laboratory carbon arc weathering of light stabilized polyester resin

22 p4059 A70-43080

Solidified polyglycol maleinate resin optical and mechanical properties under tensile stress creep, using hereditary photoelasticity

22 p4121 A70-43723

Optical point characteristics of static spherically symmetric space-times of de Sitter universe, Einstein universe and exterior Schwarzschild field

23 p4239 A70-43821

Atmospheric optical properties at various altitudes, using lunar disk photometric observation at different wavelengths during eclipse

23 p4239 A70-43901

Holographic primary and conjugate images properties, considering applications in moving scenes recording and multiple images storage and retrieval

23 p4193 A70-43924

YIG single crystals piezo-optical effect and magnetic double refraction, describing stress measurement technique

23 p4230 A70-43931

Upper atmosphere optical properties sounding by twilight observation and successive brightness approximation

23 p4187 A70-44047

Spheroidal three mirror telescopes distortion involving dioptrics combination

23 p4194 A70-44213

EUV reflectance data for optical constants obtained in digital form directly on punched cards by data acquisition system

23 p4197 A70-44470

Optical permittivity and dielectric permeability of electron gas in magnetic field, considering application to ferromagnetic materials

23 p4221 A70-45051

Short and long term stabilized optical frequency standard of gas laser, using two absorption cells

23 p4202 A70-45057

Optical properties of terrain for optimal time charting of aerial mapping, considering seasonal variations and atmospheric transmittance

24 p4333 A70-45199

OPTICAL PUMPING

Spectral efficiency of coaxial flash lamp pumping gas laser, noting dependence on geometrical and physical parameters of source and active body

01 p0106 A70-10061

Combination absorption effect on Raman scattering and Stokes component gain in presence of pumping in antiStokes region, giving relation for radiation conversion

01 p0107 A70-10141

CW laser perturbation by coupled optical transition at strong pumping with incoherent and coherent perturbing radiation, considering disappearance of laser effect

01 p0108 A70-10231

Superradiant traveling wave laser emission observed with polymethine cyanine dyes pumped by mode locked ruby laser for picosecond duration pulse generation

01 p0110 A70-10564

Frequency control of ruby laser pumped lithium niobate singly resonant parametric oscillator by radiation injection of CW Nd-YAG laser

01 p0110 A70-10566

Raman effect liquid laser power as function of cavity length, using Q switched ruby laser beam focused by cylindrical lens for optical pump

01 p0111 A70-10674

Solar energy concentrator with truncated conical mirror and toroidal lens to illuminate cylindrical thermoelectric generators or radiation pumped lasers

01 p0010 A70-10760

Polarization level dependence of dye lasers emission on angles between direction of forced radiation and pumping laser resonator axis

01 p0113 A70-11037

Laser transitions to valence band or acceptor in low loss uniformly pumped crystal structure p-type GaAs at 77 K

01 p0113 A70-11168

Optical parametric oscillator pumped by continuously repetitively Q switched Nd:YAG laser output

01 p0113 A70-11171

CW visible ring cavity parametric oscillator, discussing pump depletion, conversion efficiency and improved stability resulting from optical isolation

01 p0052 A70-11173

High output neodymium glass laser with small emission divergence angle using four lamp pumping system

01 p0114 A70-11267

Soviet book on methods in laser design, Volume 2, covering pumping radiation in active rods, unsteady modes, ruby and Nd glass lasers

02 p0310 A70-11691

Light induced modulation of optical absorption of CdS crystals by chopped laser excitation, noting use for fast recombination center detection

02 p0310 A70-11846

Ballistic compressor performance as high intensity pulsed light source, discussing Xe gas heating and laser pumping

02 p0311 A70-11921

Kr, Xe and W-iodine lamps efficiencies for pumping Nd-doped YAG compared for use in high continuous power lasers

02 p0311 A70-11922

Book on ruby laser output power calculation as function of pumping efficiency, considering energy density distribution, absorption, induced emission and excited Cr ions

02 p0314 A70-12692

Resonant energy transfer of trivalent Yb into trivalent Eb for optical pumping improvement for fluorophosphate glass lasing

02 p0314 A70-12725

High intensity short pulse flash lamps using quartz envelopes and wire electrodes for pumping high energy organic dye lasers

02 p0314 A70-12741

Steady state inversion coefficient for active substance in quantum paramagnetic amplifier with push-pull pumping determined by nonstationary methods

03 p0455 A70-13088

Transverse mode controlled hydrogen Stokes laser oscillator optically pumped by pulsed ruby laser

03 p0498 A70-13153

Flash lamp-pumped organic dye scintillator lasers using coaxial Xe-filled lamp, tabulating blue-violet organic liquid lasers characteristics

03 p0499 A70-13161

Transient processes in ruby quantum paramagnetic amplifier during pumping, showing technique for saturation prevention and relaxation effects on population inversion

03 p0456 A70-13460

Pumping energy distribution over cross section of active ruby laser elements in relation to smoothly polished, roughly polished and dull lateral cylindrical surfaces

04 p0700 A70-14607

Optical effects in parallel glass fibers irradiated by He-Ne laser beam, studying resonance tunneling and periodic power repumping between fibers

04 p0702 A70-15215

Flashlamp pumped coumarin dye laser mode locked by intracavity loss modulation operating in blue region

04 p0703 A70-15622

Aminocoumarin derivatives and 2-hydroxyquinoline compounds for flash pumped organic lasers

04 p0703 A70-15624

Continuous wave chemical laser operation in carbon dioxide pumped by vibrational energy released from DF and HF molecular formation

04 p0704 A70-15686

Power output of gas laser pumped by laser contained in single resonator

05 p0858 A70-16259

Frequency shift in Rb-87 atomic frequency standards dependence on filter temperature interpreted for optical pumping radiation improvement

05 p0859 A70-16269

Parametric coupling between space-time harmonics of electromagnetic wave propagating in dielectrics modulated by pump wave

05 p0815 A70-16660

Pumping techniques, design and properties of pulsed and CW lasers based on Nd-glass, ruby, barium fluoride and calcium tungstate crystals

05 p0860 A70-16821

Flash lamp pumped tunable organic dye laser, using capacitor bank for reliable operation

05 p0861 A70-16845

Oscillatory discharge properties of capacitance power storage circuit used for pumping pulse lasers

06 p1081 A70-17768

Pumping light distribution in rectangular laser rods showing corner maxima and overall nonhomogeneity

07 p1300 A70-19871

Electro-optical shutter for optical pumping experiments using Kerr cell controlled by high voltage modulator

07 p1286 A70-19972

Dye laser stimulation by pumping with pulsed nitrogen laser line to obtain entire visible spectrum

07 p1301 A70-20016

Raman effect in liquid nitrogen resonator with light from Q modulated Nd laser pumped into resonator at small angle to axis

07 p1303 A70-20366

Optical pumping energy effects on lasing pulse duration during pulse excitation of alcohol solutions of rhodamine 6G

08 p1511 A70-20522

Neodymium glass laser stimulated by pinch discharge radiation in He and Kr, increasing power, energy and pulse repetition frequency by improved pumping energy coupling

08 p1512 A70-21213

Alkali seeded plasma electron density and temperature enhancement by laser resonance pumping

08 p1552 A70-21576

Double resonator ruby maser dynamic and static characteristics for centimeter band improved by pumping frequency modulation 09 p1695 A70-22188

Book on lasers, light amplifiers and oscillators covering optical resonators, optical pumping, pulsed lasers, etc 09 p1700 A70-23541

Laser pumped optical parametric oscillators (OPO), considering phase matching, threshold power, transient response, etc 10 p1898 A70-23999

Neodymium/YAG laser emission characteristics, studying spectral selection at various excitation energy levels and output-pumping power relationship 10 p1899 A70-24261

CW Nd-doped YAG laser rods, measuring thermal and optical properties before and during pumping with W lamps 10 p1900 A70-24942

He-Ne optical laser CW operation under DC excitation, considering output power, discharge current, total pressure, mixture ratio, etc 11 p2062 A70-25827

Giant Stokes radiation pulse generation during stimulated combination scattering, emphasizing pulses traveling counter to pumping wave 12 p2250 A70-28288

Dye laser small signal gain via pumping by UV nitrogen laser 13 p2426 A70-28811

Ruby laser output calculated as function of pumping power, taking into account pumping energy density spatial distribution and laser level depopulation 13 p2427 A70-28985

Solid state laser optical pumping energy density calculations for case of circular cylindrical image of pumping lamp formed in rod 13 p2429 A70-29476

Operation characteristics of flash, arc, incandescent and explosion type laser pump lamps 13 p2431 A70-29874

Parametric resonances at zero field crossing levels of optically pumped atoms on alkali vapors, noting applications to weak magnetic measurements 13 p2456 A70-30034

Crossing level resonances of magnetometer in optically pumped Rb87 atoms applied to weak field measurement 13 p2454 A70-30035

Optically pumped He 4 magnetometers, investigating magnetic resonance signal dependence on orientation for nonresonance technique construction 13 p2414 A70-30036

Magnetometer design based on Hg isotopes optical pumping, discussing sensitivity improvement 13 p2414 A70-30037

Optically pumped Rb laser theory, taking into account superfine and Zeeman structure of atoms 15 p2749 A70-31521

Luminescent line broadening effect on axial mode selectivity in pulsed neodymium lasers with Fabry-Perot resonator at above-threshold pumping power 15 p2749 A70-31554

CW nonspiking single mode ruby laser operation by end pumping ruby with CW argon ion laser output 15 p2751 A70-31981

Optically pumped cadmium phosphide laser, obtaining IR coherent oscillation from Q switched Nd doped YAG laser excitation 15 p2751 A70-31985

Optical resonator thermal deformations during pumping of circular cylindrical interferometer rods in illuminators, measuring thermo-optical constants of neodymium glass 15 p2754 A70-32863

Gas dynamic molecular laser with electrons in ground state, using incoherent optical pumping from stationary shock wave 16 p2927 A70-33255

Lasing action and reduced output without beam distortion from misaligned carbon dioxide lasers by DC-Tesla coil pumping 16 p2929 A70-33986

Light propagation-shift relationships in optically pumped atomic vapors, discussing susceptibilities, birefringence, conversion efficiencies, coupling, etc 17 p3103 A70-35000

Doubly pumped ruby maser operating in conjunction with superconducting magnet 18 p3265 A70-35953

Electron energy effect on output power and beam divergence of electron beam pumped GaAs lasers 18 p3269 A70-36740

Optically excited homogeneous bulk semiconductor lasers, examining quantum mechanical rate equations and monochromatic light field pump source 18 p3270 A70-36741

Power, energy and efficiency of emission from dye solutions pumped by incoherent light pulses, allowing for particle accumulation at metastable level 19 p3448 A70-38738

Nonactive absorption by silicate neodymium glasses at emission wavelength as function of pumping flash rate 19 p3448 A70-38739

Pulsed laser emission at IR transitions of xenon and neon under electron beam pumping 19 p3449 A70-38743

Solid state laser glass filters for absorbing UV light emitted by pumping tubes 20 p3641 A70-39739

Smooth periodic wavelength retuning in organic dye laser, using neodymium glass laser with YAG for pumping 20 p3642 A70-39742

Normal mode pulsed ruby laser system with Xe flash lamp pumping, trigger circuit and transistorized power supply 20 p3643 A70-40355

Flash lamp pumped organic dye laser intensity for dye solutions in contact with different argon-oxygen compositions, noting effect of oxygen partial pressure 21 p3834 A70-40569

Continuous wave laser action in chlorine, Ar and He gas mixtures, observing energy transfer between Ar and chlorine by pumping action 21 p3834 A70-40570

Carbon dioxide laser pulse shape, duration and power dependence on repetition rate during continuous pumping 21 p3835 A70-40634

IR microwave double resonance signals in systems of ammonia with nitrogen isotopes, using nitrous oxide laser 21 p3836 A70-41707

Magnetic field-independent optically pumped Rb 85 maser oscillator power output 22 p4049 A70-42334

Solid state laser optical pumping systems design and evaluation 22 p4049 A70-42514

Optically pumped magnetometers for low intensity magnetic fields measurement, reviewing atomic hyperfine levels splitting, magnetic resonance, Zeeman sublevels, etc 22 p4026 A70-42575

Thin optically pumped pulsed CdSe platelet lasers, detecting mode jumping and tuning effects by time-resolved spectroscopy 22 p4049 A70-42946

Optical parametric noise from barium sodium niobate crystal pumped at 4358 Å by compact source mercury lamp 22 p4074 A70-43022

Rhodamine 6G triplet lifetime under continuous pumping by Ar laser 22 p4050 A70-43225

Gas dynamic molecular laser with electrons in ground state, using incoherent optical pumping from stationary shock wave 23 p4201 A70-44284

Two-bulb switchable pulsed spectral lamp with Cs and Xe for optical pumping studies 23 p4197 A70-44478

Amplification factor time dependence of dye lasing under rectangular pumping pulse, noting threshold conditions and burnout time relation to material parameters and resonator 24 p4352 A70-45473

Nitrogen laser pumped exciplex 4-Methylumbelliferone and rhodamine 6G dye laser amplifier, measuring single pass power gain vs wavelength 24 p4355 A70-46088

Spectral anomalies due to inhomogeneous optical pumping in masked ruby laser, using mathematical model 24 p4355 A70-46264

OPTICAL PYROMETERS

Photographic pyrometry for surface temperature measurements on ablation models, discussing technique accuracy and limitations 04 p0694 A70-15536

Optically dense high temperature flame pyrometric diagnostics based on modified Kirchhoff formula 10 p1967 A70-24251

OPTICAL RADAR

Lidar technique using pulsed lasers as energy sources for operational type meteorological data collection including cloud height, visibility, thermal stratification, etc 01 p0042 A70-10081

Cirrus clouds signature analysis, discussing light scattering pertinent to lidar equation 01 p0076 A70-10913

Atmospheric density profiles based on laser radar return from ruby laser detected by photomultiplier 01 p0079 A70-11220

CW laser ranging systems power and signal to power ratio characteristics, finding possible advantages over pulsed systems 01 p0114 A70-11321

Lidar technique capabilities and limitations in meteorological applications, emphasizing data storage and display instrumentation 03 p0450 A70-13673

Carbon dioxide laser radar system for studying radar techniques application to IR, discussing automatic tracking capability provision 03 p0450 A70-13676

Lidar and IR radiometer mobile laboratory for atmospheric optics research, including construction details and support equipment 03 p0463 A70-13677

Raman backscatter of frequency doubled ruby laser beam by water vapor in atmosphere observed by optical radar, calculating water vapor mixing ratio profile 04 p0677 A70-14950

Depolarization factor measurements of clear atmospheric air by lidar techniques and laser light scattering 06 p1083 A70-18244

Short coherent laser radar detection of backscattered signal in measuring Doppler shift due to atmospheric temperature 07 p1297 A70-19368

Airport runway and slant visual ranges determination using single scanning lidar/laser radar/ 09 p1696 A70-22490

Lidar techniques for meteorology, discussing atmospheric density measurement, cloud structure and screening effect, pollutant tracking, etc 09 p1635 A70-23066

Lidar ground-based sensing of atmospheric density, temperature, moisture content, discussing scattering theory and technique 12 p2183 A70-26945

Pilot midair collision warning instrument based on optical radar MTI, discussing target cross section enhancement by passive retroreflector 12 p2234 A70-27646

Upper atmosphere probing based on light scattering from laser radar beam by atmospheric constituents 12 p2185 A70-27740

Upper atmospheric composition by nitrogen molecules radiative transition analysis, using laser resonance backscattering effect 12 p2227 A70-28267

Laser tracking system for space guidance, describing equipment and operations 13 p2447 A70-28529

Laser radar systems for atmospheric structure, conditions and processes, discussing clouds delineation, thermal stratification and smoke diffusion and transport 13 p2425 A70-28787

Threshold sensitivity of pulsed optical radar with discrete signal storage, considering different operating modes 13 p2370 A70-29871

Laser radar measurements for atmospheric scattering properties, observing aerosol content, atmospheric density and composition 14 p2550 A70-30746

Lidar for cloud height measurements from ground and meteorological satellites 14 p2611 A70-31155

Bistatic lidar/laser radar/ detection of atmospheric aerosol size distribution, using angular scattering measurements of polarization parameters 15 p2704 A70-32609

Atmospheric structure studies using lidar method to detect particulate content in clear air 16 p2862 A70-33014

Tropospheric turbidity detection and measurements by lidar, considering performance limitations and thickness resolution vs range curve 16 p2862 A70-33015

Lidar probing of stratosphere and mesosphere using automatic data acquisition system 16 p2862 A70-33016

Semiremote laser Raman spectroscopy application in pipes, reactors, hot cells, jet and rocket engines and air pollution studies, discussing LIDAR model for chemical analysis 16 p2926 A70-33161

Meteorological laser radar, discussing basis and techniques determining atmospheric radiation attenuation constant 17 p3045 A70-35106

Laser radar tracking systems, calculating atmospheric turbulence effects on angular errors 19 p3379 A70-37857

Atmospheric free Na atoms layer measurement during twilight and throughout night by laser radar 19 p3413 A70-37999

Lidar technique for remote detection and mapping of atmosphere based on weather radar and optical scattering concepts 20 p3660 A70-39079

Raman spectroscopy with lidar for remote mapping of air pollutants and concentrations 20 p3627 A70-39126

Pulsed laser lidar measurements of atmospheric turbidity, diffusion, pollution, visibility and cloud physics 20 p3584 A70-39127

Spectroscopic detection of sulfur dioxide and carbon dioxide molecules and concentrations in polluted atmosphere by laser-Raman radar technique 20 p3640 A70-39389

Book on molecular and aerosol backscatter measurement from stratosphere by means of ground based laser beams

20 p3623 A70-39925

Spurious photomultiplier response to short intense overexposure of atmospheric return using optical radar

21 p3828 A70-41474

Target velocity estimation by lidar, examining range measurements with time response and cross correlation technique

22 p3988 A70-42567

Pulsed laser radar tracking and ranging system for monitoring and directing TV camera at astronaut position on lunar surface

22 p3992 A70-43604

Optical laser radar for upper atmospheric density and aerosol concentration measurements

24 p4353 A70-45561

OPTICAL RANGE FINDERS

NT LASER RANGE FINDERS

Automatic aiming system for laser range finders using directional information carried by light beam transmission

[ONERA-TP-761] 03 p0450 A70-13637
Apollo 11 lunar laser reflector for earth-moon distance measurement

10 p1898 A70-23847

Phase modulated optical range finder with RF coaxial delay line

13 p2412 A70-29872

Modulation method for phase detection in electro-optical light modulator of optical range finder

16 p2914 A70-34213

Earth continental drift and polar wandering measurements by laser ranging to two synchronous satellites

[AIAA PAPER 70-1069] 19 p3529 A70-38882

Pulsed laser radar tracking and ranging system for monitoring and directing TV camera at astronaut position on lunar surface

22 p3992 A70-43604

OPTICAL REFLECTION

Disk-shaped Mo and Nb specimens solar radiation reflection and absorption characteristics observed for temperature effect

01 p0117 A70-10176

French laser reflectors for lunar telemetry functioning with ruby laser, discussing applications to lunar orbital parameters, continental drift, gravity constant secular variations, etc

04 p0700 A70-14609

Carbon dioxide laser resonator design and operation, discussing performance with dish reflector made of leucosapphire

05 p0859 A70-16272

Single crystal Ge surface etching characteristics using laser beam reflection pattern

05 p0860 A70-16656

Doppler shift of laser beam reflected from shock wave measuring velocity through optical mixing

05 p0852 A70-16993

Reflected light directional diagram effects on scintillating surface luminescence yield, considering scattering function gradient

12 p2231 A70-27310

Visual reflectance of wet soils, attributing darkening to internal reflection of radiation in water layer enveloping soil particles

14 p2577 A70-31236

Planetary atmospheric light diffuse reflection and transmission, applying anisotropic scattering theory

15 p2802 A70-32493

Attenuation, refraction and multiple reflection effects on light reflection from shock front at near grazing incidence

16 p2953 A70-34271

Spontaneous megawatt pulsing in ruby laser with output beam reflected back into cavity

17 p3108 A70-35909

First luminous lunar echoes obtained by laser telemetry of Pic Du Midi observatory

18 p3310 A70-35948

Contaminated optical surface investigation technique in near UV, visible and near IR range, investigating property changes of systems in transmission and reflection

18 p3292 A70-36786

Narrow band IR photometry of star alpha Orion, testing hypothetical correlation of emission peak with starlight-reflecting silicate dust

22 p4105 A70-43229

Planetary atmospheric light diffuse reflection and transmission, applying anisotropic scattering theory

23 p4240 A70-43915

Delta function approximation in diffuse transmission and reflection of light for phase function with sharp forward peak, using scattering compensation

23 p4214 A70-44034

Laser light pulse reflection by atmospheric boundary layer calculated on computer by Monte Carlo method, comparing results with full scale measurement

23 p4166 A70-45072

Light reflectance from optically inhomogeneous medium due to space charge near semiconductor surface

24 p4390 A70-45661

Interference fringes on gas laser beam reflected by total reflection prism

24 p4356 A70-46272

Binocular fundus reflectometry and plethysmography in rabbits and man after dye injection and in patients with carotid occlusion

24 p4310 A70-46345

OPTICAL RESONANCE

Difference frequency generation by resonant three photon process during optical mixing in ruby laser medium with simultaneous emission of optical transitions

01 p0108 A70-10350

Maximum power transfer theorem, discussing rotation symmetry with respect to optic axis and confocal optical resonators

02 p0339 A70-12454

G values of hyperfine components of OH radical molecular vibrational-rotational levels determined using optical RF double resonance

02 p0345 A70-12822

Optical resonator reaction to coupled laser frequency, attributing differences between theory and experiment to errors in mirror reflection efficiency measurement

05 p0859 A70-16354

Frequency reaction of optical resonator to coupled laser in mismatch case, measuring laser and resonator axes displacements

05 p0859 A70-16355

Tunable optical parametric oscillators including Gaussian beams amplification, threshold, tuning techniques, spectral output, etc

05 p0822 A70-16651

Properties of unstable confocal resonator used with carbon dioxide-nitrogen-helium laser, using geometric models and measurements

06 p1079 A70-17188

Polarization of interacting atoms resonance fluorescence and coherence transfer due to excitation exchange, considering electrostatic dipole-dipole and electromagnetic radiative interactions

08 p1548 A70-21341

Lyman alpha wing resonance broadening opacity effects on solar spectrum in 1500 A to 8000 A range

17 p3169 A70-35383

Resonant modes of GaAs junction laser beams with Hermite-Gaussian rectangular symmetry, using stripe geometry with lens-slit combination

18 p3268 A70-36732

Gas lasers intensity expression derived by theory of double resonance spectroscopy, comparing results with He-Ne laser experimental data

19 p3445 A70-37672

Periodic resonant reflector with thin air intervals for YAG-Nd pulsed laser for retinal safety

19 p3445 A70-37673

Gaseous media absorption coefficient and refractive index in field of two nonmonochromatic radiation streams quasi-resonant with combining atoms and molecules transitions

19 p3448 A70-38740

Short light pulse coherent absorption in homogeneously broadened resonant medium, discussing influence of input pulse area and atomic coherence on propagation properties

21 p3784 A70-40565

Narrow resonances in saturated absorption at molecular vibrational-rotational transitions in carbon dioxide laser

23 p4202 A70-45059

OPTICAL RESONATORS

U LASERS

OPTICAL SCANNERS

NT MULTISPECTRAL BAND SCANNERS

Flying spot scanner design and performance to generate images for visual flight simulation

01 p0089 A70-10816

Flying spot scanners evaluation as image processing devices, discussing scan patterns effect on video signal

01 p0089 A70-10817

Planetary film system /PFS/ camera-processor-scanner for scientific spaceborne applications, detailing design and performance

03 p0490 A70-13664

Repetitive scanner for wave velocity measurements in annular two phase gas or liquid flow using pivoted mirror

06 p1062 A70-17618

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field

07 p1296 A70-18765

Rapid scanning high resolution photoelectric spectrometer for sunspot spectra study

07 p1289 A70-20291

Coherent light beams scanning and propagation direction control by acoustooptical method for laser applications

09 p1695 A70-22315

Multiband high resolution spaceborne imagery telemetry with optical mechanical scanners from earth orbiting satellites in earth resource applications

[AIAA PAPER 70-314] 09 p1677 A70-22873

Real time wide angle multicolor scanned laser display for visual flight simulators, utilizing flying-spot camera and rotating optical polygons

[AIAA PAPER 70-361] 10 p1857 A70-24203

Scanning Fabry-Perot interferometer for plasma diagnostics, determining kinetic temperatures

12 p2231 A70-27215

Computerized control for beam scanning and optical data processing concerning symbols, letters and photographic images

14 p2553 A70-30424

Satellite laser communication system using dual scan acquisition technique

14 p2552 A70-31197

Linked and fiber optic components, describing applications as punched card and tape reading, geometrical converters and sensing and scanning probes

16 p2904 A70-33145

Optical scanners efficiency criterion based on geometrical factors including boundary losses overlap, holes, field of view, etc

16 p2904 A70-33151

Scanning celestial attitude determination system /SCADS/, providing triaxial information for earth stabilized satellites

16 p2946 A70-33159

Nd-YAG Q switched laser using feedback loss control to increase switching speed for digital scanning

18 p3270 A70-36744

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field

18 p3271 A70-37109

High speed three-frame electronic camera with storage tube, slow scanning and magnetic recording [SMPTTE PREPRINT 55]

22 p4033 A70-43038

Airborne optical scanning gyro for measuring sea surface radiation emission

22 p4039 A70-43558

OPTICAL SENSORS

U OPTICAL MEASURING INSTRUMENTS

OPTICAL SIGNALS

U OPTICAL COMMUNICATION

OPTICAL SPECTRUM

U LIGHT [VISIBLE RADIATION]

U SPECTRA

OPTICAL THICKNESS

Velocity distribution and optical depth of line formation in solar atmosphere using blue and red wing filtergram and numerical experiment

01 p0175 A70-10241

Jovian polar zones enhanced optical transparency causes, discussing thin clouds and difference in molecular optical depth between north and south poles

01 p0180 A70-10531

Albedo variations for single scattering in atmosphere of arbitrary optical thickness by linearizing transfer equations with perturbation technique

02 p0338 A70-11790

Radiation effects on postshock gas state, noting shock wave optical thinness dependence on radiative cooling and photon flight time

02 p0277 A70-11867

High resolution photometry near planetary limb yielding scale height and optical depth applied to Mariner 4 Mars observations

05 p0909 A70-16387

Unusual IR object IRC plus 10216 interpreted as galactic source surrounded by optically thick dust shells, noting resemblance to black body energy distribution

05 p0920 A70-16976

Laser radiation attenuation coefficient in artificial fog related to water droplet concentration, suggesting single scattering for given optical thickness

07 p1296 A70-18725

Step profile decay of initial perturbations of radiating gas as function of optical depth and Boltzmann number

07 p1255 A70-19212

Atmospheric pressure, optical thickness and Young particle size distribution of Mars atmosphere determined from polarization observations

07 p1385 A70-19421

Relaxation time calculation for ground and excited states of H atoms and H-like ions in optically thin and thick plasmas, considering electron density role

07 p1353 A70-20058

Diffuse radiation intensity determination in finite optical thickness atmosphere illuminated by parallel light beams

07 p1389 A70-20204

Spectral line intensities in hydrogen plasma, calculating relative intensities and Balmer line width for various electron temperatures and optical thicknesses in H alpha line

07 p1389 A70-20205

Optical hardness effect on dispersed particles spectrum determination accuracy by spectral transmittance

07 p1330 A70-20309

Radiant energy transport in plane semiinfinite atmosphere with scattering indicatrix and quantum survival probability as arbitrary functions of optical depth 08 p1564 A70-20548

Resonance radiation transport in optically thick layer, obtaining conservative light scattering solution 09 p1753 A70-22451

Solar IR Fraunhofer line damping constants empirical values and variation with optical depth, noting discrepancy with theoretical constants 09 p1757 A70-22726

Materials permittivity measurement at millimeter and submillimeter wavelengths based on phase shift or sample optical thickness 09 p1684 A70-23648

Resonance radiation transport in optically thick plane gas layer with two-level atoms 12 p2305 A70-27853

Atmospheric optical thickness from radio telescopic measurements of wave absorption at millimeter wavelengths, showing dependence on lower atmospheric moisture content 14 p2546 A70-30127

Atmospheric optical thickness in visual spectrum region relationship to meteorological characteristics, plotting vertical profiles of humidity and aerosol attenuation coefficient 14 p2603 A70-30407

Radiation effects on heat transfer in turbulent channel flow for small optical depths and optically thin limit 14 p2665 A70-30548

Radiant energy transport in plane semiinfinite atmosphere with scattering indicatrix and quantum survival probability as arbitrary functions of optical depth 15 p2796 A70-31457

Mars surface smoothness from photometric and space probe data for atmospheric optical thickness and surface barometric pressure 19 p3512 A70-37300

Luminous intensity profile of optically thick Sr artificial clouds in upper atmosphere, using Monte Carlo calculations 19 p3415 A70-38388

Ionization degree in moving stellar envelopes with large optical thickness 19 p3525 A70-38763

Resonance radiation transport in optically thick media, investigating complete frequency redistribution mathematical assumption 20 p3671 A70-39021

Optically thin plasma population and ionization equilibrium, taking into account heavy particle collisions 22 p4082 A70-43219

Atomic levels occupation numbers and ionization degree for optically thin hydrogen plasma with self consistent electron velocity distribution 23 p4227 A70-44932

OPTICAL TRACKING

Simulation technique to evaluate TV contrast trackers standard scan performance using video tape recording 01 p0058 A70-10812

Voluntary control over velocity of smooth pursuits, discussing saccadic and saccade free modes and switching during tracking 01 p0026 A70-11056

Antitank guided missiles guidance and control systems using optical tracking 01 p0139 A70-11261

Satellite orbital elements optical determination accuracy by differential corrections, presenting computations for data distributed along small arc 02 p0254 A70-11754

Automatic four axle satellite tracking camera design and operational principle, examining lens aberration 02 p0294 A70-11771

Laser position finding of satellites fitted with corner reflectors, discussing atmospheric attenuation and applications to global triangulation and gravitational field measurements 02 p0256 A70-12083

Laser range finding by mobile missile station compared with geodesic satellite telemetry by ground station 02 p0312 A70-12212

Earth satellites optical observations accuracy for geodetic purposes based on errors in station position determinations 03 p0445 A70-13183

Satellite optical tracking data in space geodesy, determining stations position from minimum number of stations and observations with time errors 03 p0446 A70-13195

Ruby laser experiment in illuminating satellites equipped with retroreflectors to determine satellite position in space from range and photographic data 03 p0450 A70-13674

Eye movements during two dimensional tracking tasks, showing oculomotor system transfer characteristics function of target motion spectral content 03 p0427 A70-13948

Visual prediction accuracy in estimating point coincidence of two moving targets as function of viewing opportunity and length of period 03 p0428 A70-14084

Missile impact location visual identification by marker system using pyrotechnic aboard to produce dense white smoke detectable to unaided eye, including flight test 03 p0582 A70-14104

Effence role in eye tracking of moving targets, discussing oculomotor system role 03 p0439 A70-14345

Monograph on probability of aircraft detection by ground visual observation using mathematical model based on Poisson process, considering laws of ocular physiology 05 p0794 A70-16558

Triaxial universal astronomic instrument for tracking artificial satellite path with eyepiece cross-wire, considering instrument errors 05 p0851 A70-16698

Optimal control of elevation and azimuth of automatic tracking device carrying pulse laser and receiving telescope [ONERA-TP-785] 06 p1011 A70-18469

Visual tracking of horizontally moving object, noting acuity dependence on target angular velocity and observation time 08 p1444 A70-20745

Target velocity and approach angle effects on accuracy of moving targets intersection estimation tested on human subjects 09 p1628 A70-23578

Pilot model based on Kalman filtering and optimal control, investigating evaluation for time stationary conditions and sine-wave tracking 10 p1823 A70-23894

Human operator transinformation sensitivity to display gain and forcing function bandwidth in rate control tracking task 10 p1823 A70-23896

IR electro-optical tracker Oculometer using human eye motions for pointing and tracking 11 p1989 A70-25352

Optimal linear estimation and control theory application to high precision optical spacecraft tracking systems design 11 p2028 A70-26302

Man machine eye-integration coupling in tracking task applied to helicopters, ocean-going craft and propeller aircraft 13 p2357 A70-28386

Laser tracking system for space guidance, describing equipment and operations [AIAA PAPER 69-870] 13 p2447 A70-28529

Human operator ocular tracking and decay time stimulation response measurements using information, statistical, point process and random analysis 14 p2537 A70-30388

Aircraft clear line of sight probability data for various altitudes and view angles 14 p2608 A70-30595

Sequential event tracking dependence on stimulus rate and simultaneously displayed information categories 14 p2538 A70-30900

Feedback analysis of learning and performance in hand-yoked, steering and stimulus tracking control of breath-produced visual target 16 p2852 A70-33660

Feedback delay effects on eye-hand synchronism in stimulus tracking and steering using self generated body movements 16 p2852 A70-33662

Receiver for artificial satellite transmission and optical tracking time signals, using crossed dipole directional antenna 16 p2867 A70-34303

ILS glide slope calibration using optically projected digital codes as reference 19 p3464 A70-37912

Visual target tracking with active head rotation, indicating independent eye response due to vestibulo-ocular reflex 22 p3979 A70-43492

Pulsed laser radar tracking and ranging system for monitoring and directing TV camera at astronaut position on lunar surface 22 p3992 A70-43604

Visual acuity during ocular tracking movements as function of field illumination density 23 p4147 A70-44777

Retinal image tracking movement effect on discriminatory perceptibility of orifice orientations of Landolt ring 23 p4147 A70-44778

Stroboscopic stereophenomenon, investigating depth shift of oscillating target motion binocularly viewed for interocular luminance differences 23 p4147 A70-44781

Human tracking performance as function of information precision in electrocutaneous display 24 p4308 A70-45508

Pilot hand-held and leg-mounted controllers for precision tracking from aircraft under buffeting tested in static and dynamic motion simulator 24 p4308 A70-45513

Human compensatory two dimensional visual display tracking performance with superimposed apparent vertical vibration, studying frequency dependent eye pursuit movements 24 p4309 A70-46078

OPTICAL TRANSITION

CW laser perturbation by coupled optical transition at strong pumping with incoherent and coherent perturbing radiation, considering disappearance of laser effect 01 p1018 A70-10231

Difference frequency generation by resonant three photon process during optical mixing in ruby laser medium with simultaneous emission of optical transitions 01 p1018 A70-10350

Solution crystallization method to obtain gallium indium phosphide semiconductor alloys, discussing optical absorption thresholds and transitions 01 p10158 A70-10661

Excitation cross sections for bound-bound transitions in optical levels in hydrogenlike atoms induced by fast charged particles 09 p1730 A70-22230

Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons 10 p1928 A70-25029

Upper atmospheric composition by nitrogen molecules radiative transition analysis, using laser resonance backscattering effect 12 p2227 A70-28267

Two-photon transitions effect on two-frequency generation threshold in media with line broadening, considering laser radiation effect on amplification in second channel 12 p2251 A70-28289

Optical transformation of field ion micrographs providing orthographic, gnomonic projections and perspective images of hemispheric metal surface 14 p2584 A70-30506

Gold impurity photovoltaic effect in silicon, determining optical cross section for transition 14 p2627 A70-30528

Optical charge transfer transitions in N-alkyl iodide salts, examining transient absorptions due to flash photolysis 18 p3226 A70-36765

Lasing transitions time delay in carbon monoxide laser under pulsed electrical excitation, attributing inversion to anharmonic decoupling 22 p4048 A70-42330

Carbon dioxide amplification coefficient measurement for lines in laser transition range, determining rotational temperature and upslon levels populations 23 p4201 A70-44204

OPTICS

Geometrical optics method for obtaining radar cross section of perfectly conducting sphere with inhomogeneous dielectric coating 02 p0262 A70-12599

Acoustooptical processing for amplification of weak radar echoes, describing design and operation of modulators, correlators, filters, etc 02 p0266 A70-12630

Collection of papers on optics covering dielectric multilayer filter synthesis, photographic image, light interaction with free electrons, laser radiation, optical echoes, etc 02 p0340 A70-12828

Optical and mechanical techniques for space experiment structures and metals satisfying space requirements 03 p0492 A70-13848

Kirchhoff wave scattering geometric optics theory accuracy, using multifrequency acoustic wave backscatter data obtained from rough surfaces 05 p0814 A70-16401

Modulation transfer function [MTF] of eye-visual system as spatial frequency filter 07 p1216 A70-18870

Optical coherence theory functional formalism developed in radiation field probability functional terms, noting role of P representation of density operator 08 p1545 A70-21254

Optical research at NASA Electronics Research Center applied to air pollution measurement, pulse formation, pilot warning systems, star field mapper, etc 09 p1657 A70-23513

Light storage by Venus machine using refractive properties of gas and involving fluid mechanical optics 11 p2114 A70-26575

Nonlinear optical effects in solids, gases and liquids with light from laser sources, discussing self focusing and absorption of light, translucidity, harmonics, etc 12 p2245 A70-27277

Acoustooptics materials selection guidelines, estimating lead molybdate figure of merit on basis of chemical composition and density

13 p2469 A70-28796

Goddard Space Flight Center optical studies, noting UV and soft X ray regions, lasers and holography, vision, photography and testing

15 p2775 A70-32026

Soviet collection of papers on atmospheric optics covering transmittance, sky brightness, dust component, etc

16 p2899 A70-34176

Geometrical optics laws, principles and procedures applied to microwave antennas design and analysis

17 p3044 A70-35067

Astrophotograph optical center coordinates and camera focal length calculations

18 p3260 A70-36992

Interference wave functions for diffraction on cylinder and sphere, including noninterfering waves of geometric optics

19 p3380 A70-38398

Soviet papers on actinometry, atmospheric optics and ozonometry

20 p3624 A70-39026

Diffraction theory relationship to ray optics for coherent light propagation through lens systems

21 p3829 A70-41929

Self focusing in nonlinear optics, discussing physical processes of wave propagation in dielectrics

22 p4074 A70-43207

OPTIMAL CONTROL

NT TIME OPTIMAL CONTROL

Optimization of distributed parameter control systems described by linear integro-partial differential parabolic equation with delayed argument, using dynamic programming

01 p0131 A70-10548

Dynamic programming for optimizing distributed parameter control systems described by parabolic linear integrodifferential equation with delayed argument

01 p0131 A70-10556

Aircraft optimal spin recovery by aileron, elevator and rudder control calculated using Pontryagin principle to minimize altitude loss

01 p0006 A70-10924

Differential equations of optimal degenerate problem reduced to autonomous form with multiple control, noting D-stationarity application for optimal motions

01 p0053 A70-11022

Optimal control problems concerning vector determination and trajectory of point motion toward target in n-dimensional phase space

01 p0053 A70-11028

Algorithm for L-shaped linear programs in optimal control problems and stochastic programming, outlining cutting hyperplane

01 p0047 A70-11069

Optimal structural design including service requirements on strength, buckling and natural frequency stated as optimal control problem

01 p0207 A70-11158

Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements

01 p0197 A70-11499

Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite

01 p0197 A70-11500

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust

01 p0197 A70-11502

Observation process optimization in system described by linear differential equations of motion reducible to optimal control problem

01 p0047 A70-11574

Optimal control synthesis in flight dynamics, solving Hamilton-Jacobi-Bellman equation by finite difference technique

02 p0336 A70-12403

Optimum angle of attack control for multistage rocket as function of phase coordinates and time by solving functional equation with finite difference method

02 p0381 A70-12407

Optimal control of aircraft angle of attack based on minimum terminal velocity during passive flight in spherical nonrotating earth atmosphere

02 p0227 A70-12409

Optimal control synthesis in Markov and determinate systems using solution reduced from second order nonlinear partial differential equation

02 p0272 A70-12411

Optimal linear controller synthesis with allowance for continuous perturbations effect, describing weighting factors selection

02 p0272 A70-12413

Analytical design of optimum linear multivariable control systems with randomly sampled stationary

random signals, evaluating matrix complex convolution integral using Laplace transforms

02 p0272 A70-12610

Optimal servocontrol via nonquadratic performance index and linear plant dynamics obtainable as nonlinear function of error between controllable states and input vector

02 p0273 A70-12732

Optimal strategies for controlled plant guidance into convex space assuming linear differential equations of motion

03 p0459 A70-13339

Control problem of linear system with phase coordinate constraints, discussing solution properties, boundary conditions and function minimization procedure

03 p0460 A70-13340

Optimal control of continuous and discrete observations described by linear differential and recurrent algebraic equations in presence of random perturbations

03 p0447 A70-13341

Optimal selection of subsystems, minimizing mathematical expectation of output losses considering malfunctions

03 p0460 A70-13429

Apollo program navigation processing using Kalman optimal linear computer, emphasizing position vector and error matrix and command and lunar landing extrapolation module navigation

03 p0522 A70-13604

Automatic aiming system for laser range finders using directional information carried by light beam transmission

[ONERA-TP-761]

03 p0450 A70-13637

Two point boundary value problem arising from Pontryagin maximum principle application in optimal control, describing solution based on combined existing methods

03 p0460 A70-13699

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios

03 p0413 A70-13859

Existence theorems for optimal control problems with multiple integrals

03 p0460 A70-14075

Closed loop nonlinear optimal control systems sensitivity to small parameter variations noting influence of feedback

03 p0461 A70-14171

Dual type method solving discrete optimal control problems with linear plants, convex cost and constraint taking into account dynamic structure

03 p0461 A70-14274

Optimal control for thermionic nuclear reactor space power plant utilizing state variable feedback with limited input simplifying computation

03 p0461 A70-14342

Optimal strategies for observation system subject to recognition using data transmission along symmetrical channel

04 p0647 A70-14401

Optimal space vehicle reentry control ensuring minimum scattering of landing points based on accelerometer and free pitch-angle gyroscope data

04 p0760 A70-14431

Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity

04 p0760 A70-14433

Optimal control of multidimensional distributed parameters plants described by linear or nonlinear partial differential equations, considering boundary conditions

04 p0660 A70-14551

Graphical solution of optimum trajectories for third order systems depending on single control function, including maximum error and switching time

[ASME PAPER 69-WA/AUT-6]

04 p0661 A70-14828

Pontryagin principle applied to minimum structural weight design problem in optimal control theory with state and control inequality constraints

[ASME PAPER 69-WA/AUT-1]

04 p0769 A70-14832

Optimal control of thrust limited minimum-propellant rocket-powered vehicle using expansion about optimal trajectory

04 p0750 A70-14928

Axial misalignment control of gimbal pivots and rotors in gyroscopes

04 p0692 A70-15282

Soviet monograph on optimal space flight trajectory control, covering vehicle CG trajectory and synthesis of automatic stabilization system using variational calculus

04 p0764 A70-15493

Optimal lift control of hypersonic lifting body during planetary entry, assuming exponential variation of atmospheric density

04 p0620 A70-15532

Analytic guidance and control for minimum fuel expenditure and optimal guidance corrections for low thrust vehicle in Martian orbit

[AIAA PAPER 68-862]

04 p0716 A70-15544

Terminal states and time specifications influence on optimum control systems, using Pontryagin principle for boundary value problems application

05 p0824 A70-15877

Optimization of control forces in rocket nozzle produced by multipoint secondary gaseous injection

05 p0923 A70-15887

Optimal stabilization of spinning body motion about dynamic symmetry axis by controllable gyroscope

05 p0923 A70-16222

Weighting function of optimal correctable gyroscope servosystem in random narrow band noise

05 p0880 A70-16222

Real time computer control system queueing model to optimize preemptible and nonpreemptible job priority assignment

05 p0817 A70-16414

Suboptimal stabilization of axially symmetric satellite angular velocity, using ionic propulsion system as control torque

06 p1155 A70-17554

Identification experiments and computational algorithms allowing synthesis of adaptive optimization process for real dynamic plants

06 p1023 A70-17634

Optimality conditions determined for control involving trajectory with singular component equations of motion

06 p1024 A70-17813

Closed form variational synthesis of optimally fast acting stabilization systems for rigid single axis gyroscopic platforms using integrating nonanalytic equations

06 p1103 A70-17860

Slack variable to transform optimal control problem with scalar inequality constraint on state variables into unconstrained problem

06 p1024 A70-17952

Optimal control generated by Kalman filter and least mean-squared predictor for linear systems with time delay

06 p1025 A70-17959

Suboptimal control to minimize quadratic cost functional for nonlinear systems, using Taylor series representation for feedback gain matrix

06 p1025 A70-17961

M measurement optimal feedback control algorithm for stochastic discrete time systems, considering nonlinear plant, constrained controls, nonquadratic cost and simulations

06 p1025 A70-17962

Numerical solution of control optimization problems by systematic search in initial costate space, using Newton-Raphson method

06 p1025 A70-17964

Control system employing adaptive modeler to estimate state, dynamics and future trajectory of unknown plant through performance index minimization

06 p1025 A70-17965

Separation theorem for nonlinear measurements, discrete-time linear systems and quadratic cost to achieve stochastic control without dynamic programming

06 p1026 A70-17967

Linear optimal stochastic control systems described by covariance matrix correlating errors and estimates of state variables, analyzing instability under parameter variations

[AIAA PAPER 70-36]

06 p1095 A70-18054

Optimum filter for aircraft inertial navigator and radio position fix data mixing using mathematical model of error propagation

[AIAA PAPER 70-35]

06 p1103 A70-18184

Optimal control of elevation and azimuth of automatic tracking device carrying pulse laser and receiving telescope

[ONERA-TP-785]

06 p1011 A70-18469

Growth conditions used in existence theorem for calculus of variations in optimal control problems

06 p1027 A70-18506

Iterative solution of nonlinear optimal control delineated for sufficient conditions for convergence

06 p1027 A70-18507

Optimal control problem converted Cauchy problem for obtaining numerical solutions through invariant imbedding

06 p1027 A70-18508

Optimal guaranteeing control for single switching representable in form of two different successive stages in time, ensuring invariance with respect to motion perturbations

07 p1332 A70-18664

Constraint optimization on phase coordinates and controls noting extension to functional spaces

07 p1330 A70-18683

Optimal nonparametric amplitude and phase methods for synthesizing signal detection systems invariant to noise distribution and noise-signal combination

07 p1226 A70-18684

Optimal control problem solution involving functional minimization along differential vector equation trajectories, considering manifold type constraints on phase coordinates

07 p1244 A70-18747

- Optimal control for distributed parameter systems described by biharmonic linear partial differential equation using dynamic programming
07 p1244 A70-18843
- Second order necessary conditions of optimality with straightforward application to nonlinear programming of optimal control problems
07 p1322 A70-18850
- Stochastic automata for parameter self optimization with multimodal performance criteria
07 p1244 A70-18861
- Suboptimal computational algorithm for terminal control of random linear dynamical system, noting increasing optimality with random variations degeneration to deterministic quantities
07 p1324 A70-19091
- Numerical methods for computing solutions in optimal control of variable lift reentry spacecraft, applying digital computer techniques
07 p1245 A70-19093
- Optimal control of dynamical systems with transport lag determined using differential-integral equations
07 p1245 A70-19094
- Optimal control of linear distributed parameter systems using functional analysis
07 p1245 A70-19096
- Multiplier and gradient methods in computing variational and optimal control problems
07 p1325 A70-19267
- Optimum systems synthesis in computation of programmed movements including dynamical programming methods, control under uncertainty and division problem
07 p1325 A70-19270
- Primal and dual algorithms for discrete optimal control incorporating antijamming procedures
07 p1245 A70-19271
- Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane
07 p1331 A70-19483
- Efficiency of terminal state control systems defined, relating efficiency, random parameters and reliability
07 p1246 A70-19528
- Book on optimal control and guidance theory covering state and transition equations and canonical forms of linear systems, systems stability, servo loops, etc
07 p1246 A70-19668
- Suboptimal attitude control system for Nimbus satellite using motor-driven inertia wheels as control torque source for three dimensional control
07 p1331 A70-20027
- Multidimensional Kiefer-Wolfowitz stochastic approximation algorithm modified to locate regression function minimum
07 p1247 A70-20028
- Quasi-optimum design of aircraft landing control system, performing worst case simulation for jet transport
07 p1195 A70-20405
- Optimal spare parts inventory determined for stochastically failing components using mathematical model
08 p1501 A70-20603
- Optimal control systems design involving time delays as functions of time and system state, considering stability constraints
08 p1478 A70-20779
- Optimal feedback control synthesis for linear system with time delay through error criterion minimization
08 p1478 A70-20780
- Phase space variations method proved not applicable to optimal control problems
08 p1479 A70-20856
- Linear differential controller equations for optimal automatic control system with disturbances
08 p1479 A70-20870
- Optimization of control of oscillatory process with deviating argument in maximum principle form, reducing solution to boundary value problem
08 p1544 A70-20954
- Conditionally optimal control coefficients for nonlinear plant obtained from weighting functions derivatives of conjugate linear model for plant
08 p1479 A70-20995
- Optimal control synthesis for flight vehicle in vertical plane involving digital and analog computers
08 p1479 A70-20997
- Optimal linear control system with multiple controls, determining stability margins with respect to phase, amplitude, oscillation index and cut-off frequency
08 p1480 A70-21015
- Variational problem of determining optimal heat transfer from gas flow to porous plate boundary layer
08 p1597 A70-21176
- Memory systems described by integrodifferential equations with distributed time lag, obtaining optimality condition in form of maximum principle
08 p1480 A70-21177
- Optimal control conditions for elastic aircraft motion with delayed wing downwash determined by hyperbolic partial differential equations with delay
08 p1480 A70-21178
- Optimal synthesis of linear steady multidimensional systems with common output ensuring minimum rms error in reproducing control action
08 p1480 A70-21497
- Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization
08 p1480 A70-21637
- Random perturbation procedure for control variable functions optimization using hybrid computer method for analog solutions and digital storage
08 p1467 A70-21783
- Optimal control mathematical modeling for dynamic systems under statistically indeterminate disturbances based on game theory and pattern recognition
09 p1653 A70-22141
- Decision rules for incomplete a priori data, deriving informational risk estimates for Markov processes and optimal control problems
09 p1653 A70-22144
- Optimality condition for singular control problems derived using differential dynamic programming to obtain expression for change in cost produced by control variation
09 p1653 A70-22345
- One dimensional Poisson production process under costly surveillance, considering maximum attainable income rate approximation
09 p1653 A70-22347
- Optimal amplitude modulated radio signal reception on white and narrow band background noise, using nonlinear filtration and phase locked control
09 p1633 A70-22416
- Optimum control law for minimizing mass point maximum deviation under given disturbance obtained by graph analytic method
09 p1727 A70-22534
- Optimum control for shock absorber of elastic body solved by graph analytic method
09 p1727 A70-22535
- Fourth order differential equation system with complex conjugate eigenvalues, deriving optimal control for fuel minimum
09 p1759 A70-22831
- Control system design for maximum weapon delivery missions effectiveness, discussing analysis and simulation methods
09 p1611 A70-23022
- Soviet book on aircraft control systems design covering optimal functional or function parameters, circuits controlling pitch, roll, yaw motions, human operator systems, etc
09 p1725 A70-23472
- Soviet book on new methods of variational calculus in aerospace vehicle flight dynamics covering controlled processes optimization theory analysis
09 p1767 A70-23473
- Soviet book on control and search for defects in complex systems, presenting statistical optimization methods, programmings for assumed Markov processes, etc
09 p1693 A70-23540
- Optimal control of distributed parameter systems, discussing necessary and sufficient optimality conditions based on functional analysis with emphasis on thermal processes
09 p1654 A70-23542
- Optimizing control system design using fluidic digital circuitry and FM type transducers
09 p1614 A70-23690
- Optimum coding of information for symmetric channel described by code word transformation probability
09 p1639 A70-23694
- Pilot model based on Kalman filtering and optimal control, investigating evaluation for time stationary conditions and sine-wave tracking
10 p1823 A70-23894
- Degenerate variational problem of optimum gliding along zero proximity line, determining number of control switchings and deviation during perturbed motion
10 p1854 A70-24277
- Optimization of controlled systems with allowance for failures of parallel connected elements dependent on control inputs and phase coordinates
10 p1854 A70-24279
- Mathematical model for determining optimal control of spacecraft reentry into atmosphere
10 p1940 A70-24318
- Quasi-linearization extension to numerical solution of multipoint boundary value problems for ordinary differential equations arising from state constrained optimal control problems
10 p1909 A70-24421
- Control synthesis method using optimization technique to design controllers making closed loop system behave as ideal system or model
10 p1855 A70-24450
- Discrete calculus of variations for optimal control involving use of discrete time sequence and functionals
10 p1910 A70-24702
- Linear control systems design with restricted number of feedbacks based on optimization criteria concerning responses to initial disturbance
10 p1855 A70-24703
- Stochastic predictor model for process control, discussing multivariable search techniques and effect of forcing function and noise
10 p1856 A70-24872
- Maximum principle optimality for nonlinear two group parameter control applicable to plants described by integrodifferential and delay equations
10 p1911 A70-25184
- Numerical solution of optimal control with dimensionality not exceeding phase space, using nonlinear programming and traveling wave method
10 p1911 A70-25185
- Final state vector norm minimizing in linear optimal control, using successive approximation and quadratic programming
10 p1856 A70-25188
- Optimal stochastic control investigated for linear systems with driving noise intensity proportional to control input
10 p1856 A70-25234
- Large angle suboptimal attitude control of rigid spinning spacecraft
10 p1856 A70-25236
- Fuel suboptimal attitude control of spin stabilized axisymmetric spacecraft
10 p1953 A70-25237
- Maximum principle condition of optimal control of monodimensional system described by nonlinear hyperbolic equations with time delay
11 p2021 A70-25340
- Low sensitivity optimal controls synthesis for gyrostatizer stabilization circuit using variable structure systems theory
11 p2048 A70-25580
- Soviet papers on complex control systems covering hierarchical structures, accuracy and stability analysis, optimal and self adjusting control, etc
11 p2022 A70-25601
- Optimal two level air traffic control avoiding conflict on runway and in flight and minimizing landing time deviations
11 p2077 A70-25603
- Control theory, Volume 1, covering linear, nonlinear, stochastic, optimal, adaptive and learning systems, sensitivity analysis, etc
11 p2023 A70-25771
- Space vehicle velocity-attitude optimal control for on-line trajectory control schemes
11 p2025 A70-26216
- Spacecraft stochastic optimal control, discussing design of least upper bound fuel optimal system with measurement uncertainty
11 p2025 A70-26222
- Algorithm for infinite dimensional optimal control problems associated with maximum deviation cost functionals distributed systems
11 p2073 A70-26234
- Linear systems optimal control problems with sensitivity considerations for restriction to linear feedback of output variables
11 p2026 A70-26235
- Air to air missile guidance to moving target via optimal feedback strategies
11 p2080 A70-26244
- Optimal fixed digital control for handling wide range plant parameters uncertainty involving random disturbances and measurement errors
11 p2026 A70-26248
- Optimal linear estimation and control theory application to high precision optical spacecraft tracking systems design
11 p2028 A70-26302
- Suboptimal nonlinear state estimation from noise corrupted measurements in ballistic trajectory, using simplified extended Kalman filter
11 p2028 A70-26303
- Quasi-optimum proportional navigation for attack situations with large missile and target maneuvers, showing advantage over linearized optimization
11 p2081 A70-26316
- Fuel-optimal retrothrust control in state dependent retarding force fields, taking into consideration synthesis for vertical trajectory system configuration
11 p2126 A70-26321
- Optimum transmitter strategy and receiver gain for linear feedback communication in nonstationary additive noise
11 p2011 A70-26328
- Rendezvous problems formulated as optimal control problems in combined state space, considering decomposition in optimality criteria and solution existence
11 p2127 A70-26331
- Environmental control of confined spaces and life support systems by Pontryagin maximum principle of optimal control theory, discussing cabins, heat exchanger, etc
11 p1991 A70-26363
- Markov nonlinear optimal filtration theory exact equations replaced by finite system of approximate differential equations
11 p2012 A70-26805

Suboptimal control of discrete input system with bounded state and control variables, developing algorithm for on-line computation 12 p2203 A70-27409

Computational methods for multiinput linear control systems applied to designing lateral and longitudinal autopilots for jet transports subject to gust loads 12 p2203 A70-27417

Optimal and suboptimal aircraft lateral directional stability augmentation applying optimal control and model-following techniques 12 p2162 A70-27812

Nonlinear rotating systems optimal control problems approximation by modified Krylov-Bogoliubov averaging technique 12 p2273 A70-28192

Optimization for control processes with first and higher order constraints on phase coordinates 12 p2205 A70-28195

Spacecraft optimal impulsive braking by onboard engine to ensure maximum angle of atmospheric reentry 12 p2310 A70-28253

Optimal control for processes with parameters and state variable inequality constraints using gradient projection method and maximum principle 12 p2205 A70-28337

Optimal control problems solution by maximum principle, describing variational formulation simplification 12 p2205 A70-28339

Man machine function distribution optimization in spacecraft closed-loop automatic control system 13 p2380 A70-28381

Stochastic optimal trajectory control for spacecraft reentry at supercircular velocity, deriving computer algorithm 13 p2499 A70-28382

Spacecraft rendezvous control at minimal propellant consumption, deriving algorithm 13 p2499 A70-28400

Self contained optimal control synthesis for spacecraft entering atmosphere at first cosmic speed, considering landing spots dispersion component decrease 13 p2500 A70-28407

Spacecraft orientation control system optimization by plotting controlled motion kinematic models 13 p2501 A70-28417

Suboptimal satellite attitude control using ionic microthrusters operating by large modulated amplitude impulses caused by electrostatic deflection of beam 13 p2501 A70-28426

Stochastic processes optimal control theory application to launcher attitude control under wind disturbance 13 p2501 A70-28428

Gauss-Newton nonlinear programming algorithm applications to optimization of optimal control law parameters and closed loop control system synthesis 13 p2381 A70-28435

Optimal control of nuclear propulsion and energetic plants of space vehicle, considering thermionic generator 13 p2450 A70-28436

Optimum filtering techniques for radio guidance of third stage of Europa 1 booster compared for effectiveness 13 p2381 A70-28437

Optimal space vehicle reentry control ensuring minimum scattering points based on accelerometer and free pitch-angle gyroscope data 13 p2503 A70-28456

Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity 13 p2503 A70-28458

Numerical solution of satellite rotational damping by onboard motors using Euler equations, local variations and finite control time 13 p2505 A70-28963

Optimal constant output feedback gains for linear multivariable systems, noting control vector as time invariant function of output vector 13 p2382 A70-29064

Optimal control of systems with time transitions described by finite state stationary Markov chain, noting resetting control 13 p2382 A70-29065

Optimal singular controls made nonsingular for decreasing epsilon values by adding integral quadratic functional of control to cost functional 13 p2382 A70-29066

Nonlinear control systems optimization applied to asymmetrical spacecraft 13 p2382 A70-29071

Training algorithms in designing multilevel quasi-optimal controllers for dynamic processes, using pattern recognition methods 13 p2383 A70-29581

Adaptive optimization methods involving minimization of unknown function, determining new input location via sequential search 13 p2383 A70-29583

Optimal policy for linearly distributed parameter control system, describing sufficient conditions 13 p2384 A70-29899

Terminal guidance by dynamic programming to obtain optimal feedback control law in nominal trajectory neighborhood for minimum energy consumption 13 p2449 A70-29963

Extremum conditions for optimal control with operator constraints using gradient algorithms 14 p2559 A70-30181

Optimal spatial discretization and brightness quantization of graphical symbols for pattern recognition, considering illumination and reflection coefficient 14 p2553 A70-30423

Optimal control of continuous and discrete observations described by linear differential and recurrent algebraic equations in presence of random perturbations 14 p2561 A70-30717

Sequential gradient restoration algorithm for optimal control requiring state, control and parameter to satisfy vector differential equation, initial and final conditions 14 p2561 A70-31099

Availability assurance using computerized spare allocation model for optimal selection of sufficient spares to achieve required protection against system failures 14 p2592 A70-31114

Time lag system performance index bounds determination and optimal feedback controller design based on min-max criteria 14 p2561 A70-31185

Optimum adaptive reception for binary sequences, using posteriori probability density function computing device synthesized from correlator, instantaneous nonlinearity and multiplier 14 p2552 A70-31188

Dynamical optimal control for infinite dimensional linear systems, examining Balakrishnan solution technique 14 p2562 A70-31201

Optimal control problems constraints and necessary conditions, deriving maximum principle 14 p2600 A70-31202

Pontryagin principle for thin vibrating plates under mixed boundary conditions, examining optimal control 14 p2660 A70-31205

Penalty functions for state-space constraints elimination in continuous optimal control problems 14 p2562 A70-31353

Aircraft optimal roll stabilization control system design using performance index with weighting matrix 14 p2532 A70-31395

Optimal manual control model of human compensatory tracking response 14 p2543 A70-31408

Model for pilots optimal manual control of hovering VTOL aircraft longitudinal position 14 p2543 A70-31409

Optimal control theory for system model dependence on state and control variables history 14 p2562 A70-31410

Dynamical systems optimal control approximation without solving differential equations, considering linear systems with quadratic cost functional 14 p2562 A70-31411

Robot motion optimal control in partially unknown environment, using dynamic programming and heuristic methods 14 p2543 A70-31413

Stochastic terminal optimal control for nonlinear dynamical systems with state independent noise 14 p2600 A70-31420

Synergetic plane change maneuver optimal control, combining aerodynamic and propulsive flight phases for efficiency 15 p2715 A70-31784

Optimal control theory of asymptotically stable closed systems synthesis regarding product requirements 15 p2716 A70-32473

Optimal control theory applied to oligopoly, considering economic problems and Nash equilibrium solutions 15 p2831 A70-32552

Optimal control stochastic problem with initial conditions treated as random variables, using matrix minimum principle 15 p2716 A70-32563

Sequential and combined gradient restoration algorithms for functional minimization in control theory 15 p2716 A70-32574

Real time computer algorithm for achieving optimal position of tracking antenna with nonlinear control system 15 p2703 A70-32575

Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane 15 p2813 A70-32728

Pursuit-evasion differential games involving two linear dynamic systems with state and control dependent thermal noise 16 p2881 A70-32985

Classical and modern approaches to tracking problem, discussing optimal control in frequency domain and time domain terms 16 p2882 A70-3303

Control strategy for linear system performance based on synthesis of optimal closed loop controller with both sensitivity and state feedback 16 p2882 A70-3304

Regularization techniques for optimal control problems in polynomial algorithms of data handling b groups 16 p2867 A70-3323

Optimal adaptive digital autopilot design for reentry vehicle flight path control 16 p2946 A70-3330

Minimum energy feedback control for electrically driven vehicles by dynamic programming 16 p2884 A70-3331

Optimal interceptor-target allocation and guidance for linear interception and rendezvous using real time and storage computer 16 p2947 A70-3331

Desensitized linear servo model following feedback control systems design using specific optimal control concepts 16 p2884 A70-3331

Optimal control surface location for flexible aircraft determined by matrix minimum principle and calculus of variations 16 p2840 A70-3331

Optimal linear filter analysis from singular optimal control viewpoint, considering white and correlated measurement noise 16 p2885 A70-33320

Controllability of nonlinear dynamic feedback systems based on Liapunov-like stability approach and optimal control theory 16 p2885 A70-33321

Output feedback control systems design, considering closed loop system sensitivity to plant parameters based on linear optimal control problem 16 p2885 A70-33324

Initial condition sensitivity functions in bang-bang and optimal control, considering discontinuous functions, perturbation equations, iteration algorithms terminal states, cost functions, etc 16 p2885 A70-33325

Optimal startup control of jacketed tubular reactor with first order reversible exothermic reaction, presenting distributed maximum principle for diffusional parameter system 16 p2885 A70-33330

Jacobi conditions for singular optimization problems by transforming singular accessory minimum problem into nonclassical nonsingular form, considering optimal control theory applicability 16 p2885 A70-33331

Constrained and constant coefficient optimal controls compared in optimizing performance criteria of vibrating beams 16 p2886 A70-33332

Suboptimal nonlinear feedback control synthesis for linear time-invariant system with convex cost functional 16 p2886 A70-33334

Optimal control in nonlinear systems, discussing conditions for analytical solutions for Hamilton-Jacobi equations 16 p2886 A70-33335

Distributed parameter feedback systems with quadratic cost criteria, obtaining optimal controls characterization 16 p2886 A70-33339

Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking 16 p2851 A70-33340

Optimal fixed-form pilot model computer program for VTOL longitudinal control hover task evaluation 16 p2851 A70-33341

Linear systems approximate minimum energy controller, suggesting algorithm for mathematical model evaluation 16 p2886 A70-33344

Linear systems simultaneous optimal stochastic control and observation strategies, assuming quadratic observation cost 16 p2886 A70-33346

Optimal distributed feedback surface temperature control of inertial grade floated rate integrating gyroscope, minimizing instrument degradation 16 p2908 A70-33347

Neighboring optimum feedback control scheme for aerospace vehicles to handle small disturbances from nominal trajectory with unspecified final time 16 p2887 A70-33438

Optimal open loop controller and suboptimal feedback law to minimize terminal error of entry vehicle 16 p2947 A70-33439

Optimal control solution for dynamic entry vehicle along planar trajectory, using hybrid computer simulation 16 p2981 A70-33443

- Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking situation, considering application to manual control system design 16 p2852 A70-33463
- Bang-bang control of electrohydraulic servomechanisms, approximating optimal control by quasi-optimal controls 16 p2887 A70-33685
- Optimal trajectory and control approximate solution by asymptotic expansion, considering Mayer variational problem solution 16 p2943 A70-33897
- Book on random processes, communications and radar covering optimum filtering, detection, information theory, ergodic theory, probability and integration axioms, parameter estimation, coding, etc 17 p3043 A70-34602
- Servosystems with random input signals, obtaining optimal transfer function by variational calculus 17 p3056 A70-34617
- Aircraft optimal operating procedure development by integral-variational performance analysis methods, discussing flight paths, fuel consumption, mission requirements, etc 17 p3016 A70-34812
- [AIAA PAPER 70-876] Optimal control problems solution using Cartesian product of space of right-hand sides of differential equations with Euclidean n space 17 p3129 A70-34868
- Optimal filter problem related to tracking, discussing mathematical formulation and reduction to variational problem 17 p3056 A70-34869
- Optimal control problems solution using epsilon technique to avoid solving dynamical equations 17 p3129 A70-34870
- Optimal control problem solution methods, comparing Euler-Lagrange equations, Pontryagin principle, dynamic programming and invariant imbedding 17 p3057 A70-35589
- Existence and uniqueness of optimal control for one dimensional linear system with distributed control parameter using input-output integral with quadratic functional 17 p3057 A70-35627
- Satellite optimal guidance, discussing gyroscope application for stabilization and orientation control 17 p3181 A70-35691
- STOL takeoff trajectory optimization for heavily loaded helicopter, using optimal control theory 17 p3021 A70-35841
- Stochastic processes with linear dynamics and quadratic control cost, considering application to aircraft landing approach path optimization 18 p3279 A70-35973
- Observation space transforming for synthesis of automatic optimization systems with memory tracking randomly walking extremum 18 p3234 A70-36073
- Optimum spectral control of nonlinear plant, using Newton iteration and linear programming 18 p3234 A70-36073
- Optimal orientation control of axisymmetric rotating space vehicle, using cyclic sliding mode theory 18 p3332 A70-36162
- Noisy stochastic pattern recognition system, determining optimal measurement sequence by discrete Pontryagin maximum principle 18 p3234 A70-36337
- Necessary and sufficient conditions for optimal control law existence for model following system, discussing applications to aircraft control 18 p3235 A70-36443
- Tangential descent direction determination for optimum control problems based on problem of moments 18 p3235 A70-36574
- Discrete automatic control theories, including linear, nonlinear, feedback, optimal and adaptive systems and bibliographies 18 p3235 A70-36626
- Optimal control for one dimensional compressible gas flow, combustion and heat exchange, described by first order partial differential hyperbolic equations 19 p3402 A70-37240
- Two stage turbine engine parts adjustment optimization in terms of fuel consumption or thrust control by linear programming techniques 19 p3489 A70-37241
- Merlons amplitude optimal value for open loop part characteristics in control systems design, obtaining global extremum of stipulation numbers 19 p3392 A70-37448
- Linear stochastic continuous feedback system with white noise and control input, investigating combined problem of filtering and optimal control 19 p3393 A70-37850
- Linear time varying systems optimal control through decoupling of boundary value problems 19 p3393 A70-37866
- Optimum stabilized variable frequency multiple input phase locked oscillator in mutually synchronized systems 19 p3389 A70-37969
- Geometrical interpretation of controlled evolution of optimal systems with mixed state constraints, using Pontryagin and variational methods 19 p3542 A70-38056
- Boron and boron carbide coatings formation on graphite by vapor deposition, determining optimum parameters for reaction control 19 p3455 A70-38250
- Control error effect on performance index in Pontryagin principle calculation of optimum control 19 p3394 A70-38501
- Multidimensional decision models for optimal control, using piecewise constant functions 19 p3394 A70-38679
- Optimal control systems sensitivity analysis, discussing trajectory tracking 19 p3394 A70-38716
- Sufficient condition for optimal control with continuous nonlinearities, using Pontryagin maximum principle 19 p3394 A70-38717
- Optimal control of processes with lags, including linear analytical regulator problem 19 p3395 A70-38718
- Control moment gyro /CMG/ for spacecraft attitude control, determining optimal gimbal angle rate for desired torque 19 p3433 A70-38857
- [AIAA PAPER 70-1042] Launch vehicle injection error sensitivity minimization by trajectory shaping using excess booster capability 19 p3534 A70-38889
- [AIAA PAPER 70-1078] Spacecraft fuel optimal controls for out-of-plane motion about translunar libration point based on phase plane methods 19 p3530 A70-38890
- [AIAA PAPER 70-1079] Book on optimal control covering optimization, estimation, dynamic and linear control systems, programming, probability and random processes, environmental influence, etc 20 p3600 A70-39124
- Optimal control of distributed parameter systems via functional analysis 20 p3600 A70-39136
- Thor launch vehicles steering filters design using automated method of optimizing large order linear stochastic systems control 20 p3600 A70-39543
- [AIAA PAPER 70-986] Satellite-based air traffic control system for North Atlantic, applying stochastic optimal control theory 20 p3669 A70-39563
- [AIAA PAPER 70-966] Saturn 5 suboptimal continuous guidance design, eliminating discontinuous control encountered in SA-502 flight 20 p3600 A70-39564
- [AIAA PAPER 70-965] Highly constrained optimal control problems, using nonlinear programming in mathematical model for trajectory optimization 20 p3600 A70-39565
- [AIAA PAPER 70-964] Sensitivity optimization for linear optimal control systems design, describing aircraft lateral-directional control case study 20 p3600 A70-39567

- [AIAA PAPER 69-945] Optimal control problems with moving ends in presence of phase constraints, deriving difference approximation stability condition 20 p3601 A70-39730
- Dynamic plants optimal control, deriving algorithm for determining a posteriori probability density of generalized state vector 20 p3604 A70-39907
- German monograph on satellite orbit synergetic plane change maneuver optimal control by entry into denser atmosphere 20 p3705 A70-39924
- Monograph on estimation and optimal control with quantized measurements covering linear, nonlinear and time varying systems 20 p3658 A70-40024
- Linear feedback control system with quadratic penalty function, deriving lower bound on optimal performance for suboptimality evaluation 20 p3604 A70-40116
- Jacobi-type conditions for singular optimization problems obtained by transformation to nonsingular form adaptable to linear quadratic optimal control theory 20 p3659 A70-40262
- Duality of optimal control and observation problems in cases of bounded coordinates and continuously acting perturbations respectively 21 p3801 A70-40605
- Satellite steady state motion and relative equilibrium position optimal stabilization by additional forces application 21 p3849 A70-40606
- Optimal terminal control stochastic synthesis for linear systems by Bellman second order nonlinear partial differential equation 21 p3801 A70-40607
- Optimal and conventional good control systems relationships, considering open and closed loop characteristics, cost functions, etc 21 p3926 A70-40781
- Conventional closed loop controller design treated as particular formulation of optimal control problem through gain and integration derivations 21 p3927 A70-40783
- Computer algorithm for optimal linear impulse corrections to satellite orbit under inequality type constraints 21 p3801 A70-40828
- Optimal control of composite spacecraft propulsion system incorporating high thrust-weight ratio chemical engine and low thrust ion engine 21 p3865 A70-40831
- Book on theory of optimal control and mathematical programming covering linear, nonlinear, quadratic programmings, etc 21 p3845 A70-40891
- Optimal control problem for plant including dynamics and input constraints parameters treated by calculus of variations and Pontryagin maximum principle 21 p3801 A70-40899
- Apollo program navigation processing using Kalman optimal linear computer, emphasizing position vector and error matrix and command and lunar landing extrapolation module navigation 21 p3848 A70-41127
- Inequality constrained optimal control problems by function space method, using integral equation representation of second variation 21 p3802 A70-41266
- Control processes and optimization problems solutions by stochastic differential equations, discussing dynamic models and programming, linear filtering and optimal feedback 21 p3802 A70-41275
- Control space properties of pareto-optimal and cooperative solutions for static continuous and differential games involving vector cost criteria 22 p4061 A70-42460
- Seminormality and upper semicontinuity of variable sets in optimal control 22 p4061 A70-42461
- Optimal control of coordinate space cells inspection order during search for unknown number of objects 22 p3999 A70-42552
- Maximum principle for discrete systems of recurrence equations, applying Pontryagin principle 22 p4073 A70-42696
- Oscilloscope design involving optimum bandwidth and input sensitivity, reference measurement and second time base 22 p3996 A70-42820
- Statistically optimal nonlinear automatic control systems synthesis in presence of random perturbations, using gradient or steepest descent methods 22 p4003 A70-42889
- Optimal self adaptive control systems with incomplete input information, ensuring minimum error dispersion 22 p4004 A70-42890
- Optimal nonlinear filtration for continuous automatic data transmission with radio signal under white, narrow band and Markov noise 22 p4004 A70-42891
- Nonlinear rotating systems optimal control problems approximation by modified Krylov-Bogoliubov averaging technique 22 p4004 A70-43317
- Optimization for control processes with first and higher order constraints on phase coordinates 22 p4004 A70-43320
- Stochastic processes control optimization, selecting elastic aircraft stabilizer planform 22 p4004 A70-43352
- Two stage gas turbine engine optimal tuning for RPM, thrust, fuel rate and gas temperature, describing automated bench tests 22 p4092 A70-43361
- Stochastic optimal control for nonlinear dynamical systems under noisy observations, designing suboptimal state estimates and feedback controls 22 p4063 A70-43429
- Suboptimum extraction of pattern features from continuous measurements, assuming different Gaussian random classes 22 p3991 A70-43493
- Modulation transfer function applied to optimal holographic nondestructive testing systems, using edge gradient analysis 22 p4039 A70-43520
- Gyrostabilizer design based on composite optimal controls with respect to different regional criteria 22 p4040 A70-43559
- Optimal transducers distribution for estimating random field values in presence of additive noise 22 p4005 A70-43562
- Linear control plant identification by solving integral equation obtained from input and output signals 22 p4005 A70-43565

Stochastic control optimization, examining self organizing approach for performance adaptive controller with asymptotic optimal properties 22 p4005 A70-43733

Discrete systems with and without time lags, deriving necessary conditions for singular optimal control 23 p4176 A70-44301

Linear programming problems in optimal control numerical analysis, discussing iterative solution 23 p4177 A70-44303

Schedule theory problem with redundancy and technological constraints reduced to optimal control problem by penalty function, making maximum principle applicable 23 p4177 A70-44304

Optimal control of magnetic torque for bias momentum removal from attitude controller, discussing applications to Skylab 23 p4258 A70-44503

Optimal adaptive digital autopilot design and operation, discussing linear differential equations of motion, algorithms, etc 23 p4215 A70-44504

Unilateral and minimax control with functional restrictions, including pursuit and evasion games 23 p4177 A70-44906

Relaxed minimax control with functional restrictions by Uryson integral financial equation 23 p4213 A70-44907

Singular and nonsingular optimal control problems, deriving sufficient conditions for nonnegativity of second variation 23 p4213 A70-44908

Optimal asymptotic stability laws of control systems with unstable plant, using piecewise coordinate functions 24 p4321 A70-45494

Closed loop synthesis algorithm and comparison to sensitivity of open loop system, noting applicability to optimal control 24 p4322 A70-46013

Optimum finite memory model for sequential minimum-mean-square-error estimation of random variable in added noise 24 p4317 A70-46052

Optimum pulse radar signal-receiver design, considering implementation errors for maximum target detectability in clutter 24 p4313 A70-46055

Algebraic structure convolutional codes using minimal encoders with feedback-free delay-free inverses 24 p4313 A70-46058

Optimal noiseless linear information feedback estimation for additive white Gaussian noise channels, applicable to digital transmission 24 p4313 A70-46064

Suboptimum sequential algorithm for recovery decoding errors in convolutional codes, using Hamming distance criterion 24 p4314 A70-46066

Optimal temperature control for confined spaces and life support systems, using mathematical models of environmental control systems 24 p4295 A70-46373

OPTIMIZATION

NT FLIGHT OPTIMIZATION

NT OPTIMAL CONTROL

NT TIME OPTIMAL CONTROL

NT TRAJECTORY OPTIMIZATION

Optimum R and D organization in aircraft engine production illustrated on turbofan engine 01 p0161 A70-10080

Optimal damping of flexibly mounted rotor by providing system with additional degrees of freedom and applying damping to additional masses 01 p0199 A70-10121

Optimal coercive force selection of residual inductance and energy of magnets for generators with star shaped rotors 01 p0008 A70-10192

Four dimensional optimal interpolation for maximum wind velocity components, calculating spatiotemporal correlation functions 01 p0135 A70-10205

STOL aircraft configurations optimization including cost effectiveness, considering propulsive lift systems [AIAA PAPER 69-1131] 01 p0162 A70-10609

High temperature solar energy converter cavity absorbers geometry, considering absorption parameters of radiation reflected by concentrator 01 p0010 A70-10761

Optimal steady state thermal design for fin-tube single and double surface space radiators, including meteoroid protection and pumping power weight penalties 01 p0215 A70-10829

Functional optimization within partial differential equation solutions class by choosing optimum boundary values 01 p0131 A70-10922

Mass action law-polynomial optimization analogy, illustrating optimal temperature determination in chemical reactors in series 01 p0143 A70-10925

Minimum fuel consumption criteria applied to design of manned spacecraft attitude control system, using reaction jets for lateral and directional controls 01 p0196 A70-10950

Trigger scaling circuits with pulsed and blanking feedback analysis for minimizing number of couplings 01 p0047 A70-10984

Inertial damper optimum parameter selection for achieving maximum nutation damping factor for gyroscopic stabilizer 01 p0091 A70-10985

Accelerated memory gradient method for minimization of functions with unconstrained variables, investigating generalization of Fletcher-Reeves algorithm 01 p0132 A70-11194

Runge-Kutta method with position dependent optimal parameter alpha for initial value problem solution to minimize total error 01 p0134 A70-11364

Redundant components optimal quantity determination for maximizing reliability of series system subject to multiple resource restrictions 01 p0104 A70-11383

Optimal moments for trajectory parameters measurements determined by linear analysis to minimize error for initial conditions 01 p0094 A70-11478

Optimal dynamic design of system consisting of elastic cantilever rod with two concentrated masses subjected to harmonic vibrations under force at free end 02 p0384 A70-11739

Minimum microwave path clearance establishing procedures, considering relation to inverse beam bending in microwave propagation 02 p0253 A70-11746

Airborne secondary surveillance radar transponders performance and system optimization for automatic altitude reporting, separation standards maintenance and automatic plot extraction 02 p0267 A70-11990

ALGOL Dynamic Display System for debugging and optimizing computer source language program, providing real time portrayal of static and dynamic block structure, etc 02 p0264 A70-12128

Wing design optimization for steady and unsteady supersonic flow through computerized simulation and study of leading and trailing edge shape 02 p0223 A70-12208

Expected values optimal measurement, given auxiliary conditions between measured value number and quantization 02 p0299 A70-12400

Optimal fuel consumption for climbing, cruising and landing flight conditions for medium range subsonic, high supersonic and hypersonic aircraft 02 p0227 A70-12404

Optimization potential selection in control system design by analytical method 02 p0272 A70-12412

Optimum balance between program and functional organizations to promote technology transfer 02 p0403 A70-12637

Optimal lift-drag ratio of cascades dependence on optimal pitch of cascades calculated for axial flow turbomachinery 02 p0356 A70-12750

Signal waveform algorithmic construction with optimal autocovariance properties, using isosum integer partitions, applied to clustered multipath distribution measurement 02 p0263 A70-12773

Optimal redundancy for maximizing systems reliability of mixed series and parallel network consisting of N modules including I module with specified reliability cost function 03 p0585 A70-12995

Pulse signals optimal filtration in superregenerative receiver and resulting SNR effect 03 p0456 A70-13203

Optimal selection of centralized communication network of combined radial and linear structures minimizing disconnected peripheral points 03 p0446 A70-13238

Optimal nonlinear correcting of vertical gyro obtainable with correction containing nonlinear elements with variable linearized coefficients 03 p0483 A70-13363

Optimal stabilization of free solid body equilibrium state with gyroscope, using solution of three flywheel system stabilization 03 p0484 A70-13364

Optimal radar resolution of objects during detection and measurements, giving diagrams of resolution characteristics vs echo signals parameters 03 p0448 A70-13453

Microwave circuits automatic analysis and design using digital computer in batch mode, describing analysis-optimization program 03 p0457 A70-13562

Optimal synthesis and design of distributed parameter system for waveguides using gradient technique

with devised algorithm to overcome convergence problem

03 p0449 A70-13563

Shield mass optimization of low thrust nuclear powered space vehicle for occupant shielding against reactor radiation 03 p0523 A70-13575

Optimum estimation equations as simple averaging extension, considering application to Kalman filtering in integrated space navigation system 03 p0522 A70-13608

Wide strut analysis for determining weight minimizing cross sectional dimensions of panels having unflanged integral stiffeners 03 p0596 A70-14145

Generalized approach for optimal corrector in mean squared sense for predictor-corrector filter structure, illustrating signal modes with nonlinear and linear dynamics 03 p0520 A70-14170

Optimum numerical integration with application to real time digital simulation of continuous systems, deriving three step methods 03 p0455 A70-14173

Aircraft structural weight optimization for given fundamental vibration frequency obtained by aeroelastic constraints 03 p0598 A70-14231

Optimization problems computing methods - Conference, San Remo, Italy, September 1968 03 p0461 A70-14338

Optimal nonlinear filtering for nonlinear dynamic system subjected to additive white Gaussian noise with corrupted observations, using successive linearization scheme 03 p0461 A70-14340

Optimum planetary image intensity at Tv camera cathodes, exemplifying with Saturn orbicon image 04 p0688 A70-14694

Algorithm for optimal decoding of convolutional codes confirmed using error probability upper bound 04 p0654 A70-15067

Integral-criterion optimization of transient processes in mechanical systems synthesis with favorable dynamic and damping characteristics 04 p0720 A70-15218

Radar signals optimal synthesis characterized by ambiguity surfaces minimized over predetermined regions of ambiguity plane, noting weighted error criterion role 04 p0651 A70-15328

Wiener-Hopf equation development and Kalman filter derivation using Leibnitz equation for differentiating integral 04 p0660 A70-15338

Solar powered communications spacecraft weight, electrical power and communication capacity models for optimizing size and launch vehicle fractionation 04 p0763 A70-15347

Energy state approximation for supersonic aircraft performance optimization with extension to maximum range problems, noting comparison with complex dynamic models 04 p0623 A70-15376

Analog computer schemes for solving dynamic plants identification reducible to optimizing parametric problem of many variables function 04 p0654 A70-15435

Automated modeling and structure optimization of linear dynamic systems and circuits, using hybrid computer techniques and time-domain test data 04 p0654 A70-15452

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas [AIAA PAPER 69-73] 04 p0663 A70-15586

Optimized compressor blades, examining Le Foll boundary layers theory possibilities as design method 04 p0621 A70-15667

Fighter aircraft design combining optimal qualities with economy 05 p0793 A70-15902

Radar signals synthesis using steepest descent for minimizing Hermitian form 05 p0812 A70-16247

Shape optimization of elastic rod compressed by force directed toward point on undeformed rod axis, deriving optimal bending line 05 p0937 A70-16373

Algorithm for constrained optimization problems providing rapid convergence 05 p0877 A70-16714

Optimal strategy for searching for object hidden in box involving use of optimal return function 05 p0877 A70-16715

Assignment problem for finite set elements pairing, discussing probabilistic formulations and applications to satellite communications problems 05 p0815 A70-16716

Optimal electron bunching in two cavity klystron by varying parameters and nonlinear one dimensional approximation 05 p0823 A70-16888

Mathematical model of optimal partially closed life support system consisting of man, recycling unit, storage unit and waste disposal outlet
05 p0809 A70-17110

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] 06 p1172 A70-17180

Optimum signals for phase locked or delay locked loops determined as function of signal to noise ratio
06 p1023 A70-17523

Optimal quadrature formulae for numerical integration of 2 pi-periodic functions involving integrand derivative values at knots
06 p1093 A70-17582

Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc
06 p1093 A70-17650

Unconstrained minimization techniques efficiency in mathematical nonlinear programming, discussing gradient and variable metric types
06 p1094 A70-17968

Hybrid NASAP program module for direct design of linear dynamic circuits using simple optimization without sophisticated computer programming
06 p1015 A70-18422

Nonlinear system theory for optimal linearization in holography, discussing generalized method for photographic emulsion and first order amplitude transmittance
06 p1072 A70-18521

Direction finding characteristics of nonlinear antenna, including current determination and optimal angle for sidelobe level
06 p1023 A70-18561

Optimum compression ratio defined for Markov sources for compression algorithm efficiency and data compression schemes
06 p1013 A70-18624

Clutter symmetry as indication of matching optimum signal filter pair, comparing mismatched and matched systems
06 p1013 A70-18626

Optimal signal detection with random phase on Gaussian noise background, estimating error probabilities
07 p1226 A70-18685

Optimal scale selection for aerial surveys by analyzing aerial photography data
07 p1278 A70-18690

Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtration of Gaussian noise
07 p1226 A70-18760

Energy optimal osculating elliptical transfer orbit from low eccentricity orbit constructed for prolonged circling in equatorial plane of axisymmetric planet
07 p1374 A70-18774

Paraboloidal- and spherical-reflector antennas efficiency optimization obtained from optimum combination of amplitude and phase of hybrid modes propagating in guide
07 p1240 A70-19220

Computing methods in optimization problems - Conference, San Remo, September 1968, Volume 2
07 p1324 A70-19266

Necessary and sufficient conditions for constrained extrema without use of Lagrange multipliers
07 p1325 A70-19335

Sequential gradient-restoration algorithm for minimization of function subject to constraint
07 p1325 A70-19355

Minimum weight design of elastic sandwich beams with deflection constraints using n-dimensional space of discretized bending stiffness
07 p1407 A70-19358

Sufficient conditions of optimality for strategic couple in theory of quantitative differential games
07 p1245 A70-19379

Optimal localized heat treatment of welded products, analyzing temperature fields and stresses during heating and cooling of ferromagnetic materials
07 p1294 A70-19477

Integrated switching circuits design optimization by ALGOL program, analyzing circuits transient behavior
07 p1242 A70-19752

Self sustained fusion reaction in dense deuterium-tritium plasma, considering large atomic number contaminants optimal concentration calculations
07 p1351 A70-19848

Automatic control system identification with respect to optimality criteria, mathematical models, computing techniques and input signals
07 p1247 A70-20029

Optimal distance between satellite communication system ground stations for surface network cost equivalent, analyzing economic efficiency for various cases
08 p1456 A70-20569

Discrete analog filters circuits for optimal noncoherent processing of phase manipulated signals
08 p1456 A70-20571

Frequency characteristics optimization of symmetrical octupole bridge networks based on relationships between electrical parameters functions and impedance matrices eigenvalues
08 p1468 A70-20572

Discrete process max-min problem, using dynamic programming to obtain upper and lower bounds
08 p1533 A70-20604

Parallel wire antenna arrays analysis and design, emphasizing directive power gain maximization and sidelobe reduction
08 p1471 A70-20789

Gain-to-noise temperature ratio (G/T) optimization by dish antenna shaping for nonuniform aperture field distribution
08 p1471 A70-20790

PSK demodulation by optimal carrier and bit synchronization methods based on nonlinear filter theory, relating error probability to signal to noise ratios
08 p1458 A70-20795

Frequency locked loop optimization, showing advantages in frequency shift keying detection and FM signal demodulation
08 p1460 A70-20808

Optimal linear antenna synthesis, determining current distribution resulting in specified radiation pattern for superdirective antennas
08 p1472 A70-20972

Controllable microwave phase shift varactor diode circuit parameters design optimization using digital computer for transmittance matrix coefficients calculation
08 p1474 A70-21230

Optimal inextensional buckling of uniformly loaded simply supported arches with large opening angle
08 p1589 A70-21310

Minimization of motion deviation from prescribed motion as differential game of converging motions using equations of motion
08 p1546 A70-21626

Tunnel diode parametric phase locked oscillators as memory elements, considering optimum subharmonic pumping frequencies determination
08 p1477 A70-21642

Matrix method for maximizing radar antenna directive gain and simultaneously placing nulls in far field radiation patterns
08 p1477 A70-21758

Conjugate direction procedures for function minimization compared for convergence, recommending modified conjugate gradient procedure
08 p1535 A70-21875

Electronic equipment optimal design variant selection method, based on relative characteristics of feasible versions, widening weighting coefficients determination basis
09 p1643 A70-22129

Apportionment optimization of reliability and maintainability by Lagrange multipliers and dynamic programming, discussing maintainability cost model and computerized simulation
09 p1792 A70-22211

Optimizing shape of elastic bar compressed by polar force obtained by determining functional extremum representing volume of bar at constant critical force
09 p1769 A70-22252

Minimum weight design for two dimensional bodies with given load system determined by variational method
09 p1771 A70-22400

Quasi-linear estimator algorithms to achieve both optimal nonlinear filtration and signal interpolation resulting in significant gain of estimate accuracy
09 p1633 A70-22408

Optimal adjusting of laser with instantaneously increasing Q without pumping and relaxation effects during pulse, using nonlinear differential equation
09 p1695 A70-22412

Optimal deformation and minimum wave drag for wings with supersonic leading and straight trailing edge, solving variational problem by Ritz method
09 p1604 A70-22444

Shock absorbing forces for absorber with one degree of freedom optimized for given acceleration during periodic disturbances by variational method
09 p1727 A70-22537

Nonlinear complexing problem in measuring random signal, proposing optimal data processing algorithm with minimum error variance criterion
09 p1654 A70-22542

Optimal inertialess nonlinear filters synthesis with various optimality criteria for signal distributions differing from normal
09 p1654 A70-22543

Thermo-elastic analysis and optimum start-up in power plant, discussing transfer function for thermally loaded bodies with restricted boundary temperature
09 p1774 A70-22584

Liapunov stability conditions for critical point of ordinary differential equation, determining optimal criterion
09 p1727 A70-22664

Weight function minimization of multiweb box beam in pure bending
09 p1777 A70-22769

Fault finding strategy optimization in systems with single defective element
09 p1693 A70-22974

Temperature fields in cylindrical shell under axisymmetric heating, ensuring optimal stressed state
09 p1778 A70-23081

Combined gyromotors optimal starting and operating conditions, considering size and weight characteristics
09 p1680 A70-23146

Optimal construction of microwave filters with TWT and ferrite direct gain receivers
09 p1648 A70-23166

Prestressing in minimum weight design of statically indeterminate structures
09 p1781 A70-23231

Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability
09 p1743 A70-23248

Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc
[AIAA PAPER 69-1007] 09 p1767 A70-23262

Wedges calculated for lift-drag ratios at hypersonic speeds to find optimum surface geometry
09 p1606 A70-23282

Parameter optimization of V and rhombic antennas with sloped wires, determining radiation angle from radiation pattern
09 p1649 A70-23336

Optimal decomposition of nth order filter into cascaded second order sections
09 p1650 A70-23367

Reactance filters for matching circuits design with optimum transforming performance
09 p1650 A70-23404

Single-pass multimode carbon dioxide laser amplifier power gain optimization
10 p1897 A70-23815

Optimization in epiphydrostatics and epiphydrodynamics, discussing liquid in rectangular tank, electro-magneto-epiphydrodynamics and thermal instability
10 p1866 A70-24108

Three dimensional supersonic nozzle geometry optimization using Lagrange multipliers and iteration for solving variational problem
10 p1798 A70-24115

MHD generators optimum load selection by method of stepwise approach, noting agreement with pressure and density distributions to yield maximum power
10 p1923 A70-24156

Digital satellite communication system using multiphase modulation optimized for phase positions number to maximize transmission capacity
10 p1835 A70-24334

Communication satellite PSK modulator-demodulator /mode/ implementation requirements and design for optimal performance
10 p1835 A70-24336

Analytic function integration optimal rate, discussing weighting function
10 p1909 A70-24509

Optimal trusses design, considering minimal volume /weight/ and elastoplastic stability in compressed and stretched bars
10 p1958 A70-24514

Optimal MHD generator with constant channel area, assuming small Reynolds numbers and ideal inviscid gas with arbitrary electrical conductivity
10 p1807 A70-24570

SIMCON digital simulation control system optimizing man machine interaction, noting capability to generate solutions with minimum computer memory
10 p1860 A70-24654

Dynamic programming successive approximations optimization technique involving system state variables reduction with convergence proofs
10 p1845 A70-24871

Optimal data filtering techniques and hardware for centrifuge testing of missile inertial platforms
[AIAA PAPER 70-405] 10 p1861 A70-24901

Avionics test station optimum design by computerized simulation involving iteration of computer run, analysis and model change
[AIAA PAPER 70-398] 10 p1861 A70-24907

Time-optimal testing sequence for system failure detection, considering maintenance and reliability data
10 p1896 A70-25048

Iterative numerical method for determining optimal mass distribution in complex frameworks, maintaining dynamic response level
10 p1960 A70-25053

Airborne side-looking radar antenna optimum directional characteristics analysis from viewpoint of maximum surveillance range
10 p1843 A70-25139

Generalized control theory, discussing optimization and table classifying control theory fields
10 p1856 A70-25238

Optimal efficiency of axial turbomachines limit loading of blade root and hydrodynamic criteria
11 p1975 A70-25791

Missile radome design optimization, considering compromise between conflicting aerodynamic, thermal and structural aspects

11 p2134 A70-25862

Ram wing tube ground transportation vehicle, analyzing optimum lift-drag ratio and induced power requirements

11 p1975 A70-25966

Constrained complex optimization method for synthesizing distributed-lumped-active networks

11 p2024 A70-26204

Optimal pulse compression time-invariant filter for signal reception with sidelobe constraints under white noise in radar and communications systems

11 p2025 A70-26218

Sufficiency conditions and Lagrange multipliers in maxima and minima theory with results restricted to ordinary extremal points, considering constrained optimization

11 p2073 A70-26232

Mariner-type spacecraft telemetry system optimization, considering channel capacity

11 p2008 A70-26239

Optimal strategies for game with nature and two-automata zero sum game under finite memory constraints

11 p2073 A70-26241

Optimum symbol sequence interleavers realization taking into account storage capacity and encoding delay

11 p2014 A70-26246

Satellite communication systems optimal utilization achievable through supervisory control system

11 p2009 A70-26261

System configuration requirements and detectability performance characteristics analysis for optimizing array reception of multipath

11 p2018 A70-26264

Computerized tradeoff analysis for planetary landing vehicle entry capsule and lander design optimization, emphasizing weight allocation for Mars 1973 missions

11 p2126 A70-26320

Flat-top airfoil determined for lower surface shape to maximize lift drag ratio at hypersonic speeds using calculus of variations

11 p1977 A70-26397

Optimal phase-manipulated signals synthesis from autocorrelation function using algorithm

11 p2012 A70-26804

Nonlinear equations systems iterative solution convergence by extending classical algorithm with optimization process

11 p2074 A70-26850

Optimum binary digital detector of radar targets, using confidence ratio as criterion of target presence

12 p2182 A70-26890

PAM-FM modulation system optimal receiver derivation, assessing threshold performance assuming uniformly distributed modulating signal

12 p2183 A70-27155

Dynamic systems absolute stability, optimality and passivity algebraic criterion in terms of real even polynomial coefficients

12 p2261 A70-27412

Composite resonator for semiconductor laser to increase single mode power generation, determining optimal length of passive part

12 p2247 A70-27484

Optimal linear band limited time invariant data transmission systems, discussing pulse interference tolerance based on eye parameters as quality criteria

12 p2185 A70-27688

Optimum distribution over circular aperture in ground plane for best mean square approximation to specified radiation pattern

12 p2197 A70-27952

Redundancy optimization based on partial failure modes effect on system reliability to reduce cost

12 p2243 A70-28010

On-line optimization of maintenance and verification schedules for complex system safety insurance

12 p2244 A70-28013

Rao optimization method for flow nozzles at given length, analyzing control surface flow field conditions

12 p2158 A70-28202

He-Ne laser optimal mixture component ratio for generating IR radiation at two wavelengths

12 p2251 A70-28293

Molding procedure to orient filaments relative to loads for optimizing structural component (compressor blades) of filament reinforced composite

13 p2417 A70-28663

Inertial hybrid navigation system optimization, discussing performance curves and numerical filters synthesis and error elimination

13 p2448 A70-28747

Noise stability of optimal binary detection receiver of rectangular-pulse and discrete pseudorandom signals under nonideal synchronization

13 p2364 A70-28869

Elastoplastic continuum under specified rates of body forces, surface tractions and displacements, formulating minimum principle for solving boundary value problem

13 p2513 A70-29154

Differential equations of controller providing optimum transient response for plant with indeterminate parameters, allowing for nonadditive random noise

13 p2382 A70-29278

Multilens quasi-optical transmission lines construction by determining lens profile for optimal conversion of source field into specified field at receiver end

13 p2366 A70-29403

Light transmission losses in optical resonators partially filled with inhomogeneous dielectric, specifying optimal geometrical parameters

13 p2378 A70-29404

Penalty function algorithm for linear/nonlinear programming optimization problems subject to equality/inequality constraints, discussing feasibility determination capability

13 p2373 A70-29462

Minimum weight structural member size and configuration simultaneous optimization using computer program

13 p2516 A70-29550

Stochastic analog approximation method minimizing criterion functions and for recovering functions from noisy measurements of values in learning systems

13 p2442 A70-29585

Centrifugal pump design optimization, assuming one dimensional throughflow of viscous fluid as driving force

13 p2391 A70-29748

Cylinders and airfoils drag tests and simulation in two dimensional sheared flow, considering shapes optimization

[AIAA PAPER 70-576]

13 p2342 A70-29893

Amplitude-frequency characteristics selection for minimum phase channel allowing for intersymbol interference and smooth noise during data transmission, calculating mean error probability

14 p2547 A70-30150

Parameters optimization of nonlinear electric servo actuator on basis of statistical criteria

14 p2559 A70-30157

State-space synthesis of multiport passive reciprocal networks with minimum number of resistors, using Gauss factorization procedure

14 p2556 A70-30516

Meteorological parameters measuring instruments optimal design, presenting formalized procedure flow chart and examples

14 p2607 A70-30568

Size and cost of Al mirror IR photometric telescopes optimized for scientific information acquisition

14 p2586 A70-30896

Optimum diffusion welding temperature for Ti-6Al-4V alloy determined from tensile and creep tests

14 p2591 A70-30934

Civil aircraft design optimization, considering operating and seat mile costs, speed, wing and fuselage, engine location, etc

14 p2531 A70-30941

Optimum alkali metal vapor humidity for turbine equipment estimated from energy output

14 p2535 A70-31008

Quality control variables optimization for maximum net revenue, using computerized simulation

14 p2592 A70-31105

Optimum interleavers realization procedure for reordering contiguous symbols sequence to satisfy minimum distance requirement for improving communication system performance

14 p2554 A70-31121

Rank order statistics for optimum detection of binary pulsed signals in white noise and DC drift

14 p2551 A70-31122

Analytical solutions to optimum orbit modifications including atmospheric maneuver

14 p2649 A70-31171

High speed dynamic systems synthesis with optimal damping of elastic vibrations, using gradient method

14 p2617 A70-31354

S band transmitters frequency deviations optimization enabling designer to determine optimum value within constraints of associated receiving equipment

14 p2559 A70-31373

Aircraft design optimization by multisearch programs, considering mathematical model role

14 p2532 A70-31400

Optimal search algorithm for stationary object hidden in one of N regions with a priori probability

15 p2767 A70-31843

Optimal design for composite material structure, considering internal and external reinforcement

15 p2816 A70-32005

Gyroscopic navigation systems errors as function of sensor errors in terms of arbitrary operators requiring optimization

15 p2773 A70-32155

Optimal questionnaires characteristics and design algorithms

15 p2705 A70-32450

Multistage rocket weight optimization for payload and velocity at burnout, considering specific impulse, drag, etc

15 p2813 A70-32519

Phase locked loop damping characteristics optimization based on input rms error rate minimization and transient error integral square value limitation

15 p2704 A70-32604

Human element in system development to achieve optimum tradeoffs among reliability, cost and other system criteria

15 p2693 A70-32629

Optimum reliability programs, suggesting simulation to provide cost effectiveness basis for systems design configurations evaluation as alternative to demonstration testing

15 p2831 A70-32631

Computerized optimal redundancy analysis, considering cost, size, weight, volume, etc

15 p2712 A70-32642

Multihorn array antenna performance improvement by shaping beam for optimum earth coverage from stabilized synchronous satellites

16 p2860 A70-32952

Airborne electro-optical imaging sensor subsystems performance optimization, comparing mathematical and graphical methods for providing maximum SNR

16 p2906 A70-33172

Discrete signals optimal reception by lowering synchronization requirements for communications or radar purposes

16 p2863 A70-33242

Dynamic systems control and guidance by man in light of anthropotechnics, treating approaches to man machine systems optimization

16 p2850 A70-33263

Ballistic missile instrument orientation optimization based on CEP criterion, considering acceleration induced errors

16 p2947 A70-33317

Aircraft stability augmentation systems design by parameter optimization techniques and feedback selection

16 p2840 A70-33342

Dynamic structures design optimization subject to shock spectrum, describing conversational type computer program

[ASME PAPER 70-DE-28]

16 p2989 A70-33501

Fixed and variable sweep wing structure computerized design optimization

[ASME PAPER 70-DE-41]

16 p2869 A70-33506

Reliability-cost model to determine optimum failure rate for minimization of systems total life cycle cost

[ASME PAPER 70-DE-43]

16 p3004 A70-33507

Maximum thrust nozzles design for rotational or nonequilibrium simple dissociating gas flows, including boundary layer effects

[AIAA PAPER 70-707]

16 p2891 A70-33567

Lunar flying vehicle propulsion system optimization, discussing weight, performance, engine life, reliability, etc

[AIAA PAPER 70-605]

16 p2969 A70-33602

Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method

16 p2991 A70-33854

Antenna reflectors of evolution and double curvature optimization by iteration method

16 p2866 A70-34267

Linear system under ergodic random processes, determining optimal dynamic characteristics by approximation of spectral density by Laguerre series

16 p2944 A70-34280

Optimization - Conference, Toronto, June 1968

17 p3181 A70-34542

Mathematical techniques for optimal design of single purpose structures under dynamic deflection

17 p3182 A70-34544

VTOL aircraft power plants optimization for future helicopter missions without restrictions of limited off-shelf inventory

17 p3147 A70-34708

V/STOL 5000 hp engine design optimization, considering component arrangements, rotor design, blade cooling method and fuel control

17 p3147 A70-34709

Spatial filter properties of antennas, discussing system performance optimization and incoherent source transfer functions

17 p3045 A70-35077

Optimal receiving systems for satellite broadcasting, considering costs, power requirements, service area, etc

17 p3046 A70-35272

Digital self optimizing distortionless filter for hybrid navigation system

17 p3054 A70-35281

Single gap klystron output resonator optimization, showing maximum electronic efficiency during bunched beam excitation

17 p3055 A70-35681

Optimal filters design predicting electronic systems parameters, preventing equipment failure due to wear and aging

17 p3055 A70-35744

- Receiving antenna for ionospheric scatter lines, calculating input power versus height and energy flux density spreading for position optimization
18 p3230 A70-36094
- Astatic gyroscope subjected to steady random translational vibration, optimizing parameters by mathematical model
18 p3257 A70-36136
- Constraint optimization in state coordinates by variable structure system flexibility, using mathematical model
18 p3281 A70-36353
- Nonlinear approximation under auxiliary conditions in normed space involving minimum solution
18 p3282 A70-36363
- Turbofan engine performance optimization by closed form solution of operating cycle parameter functions
[ASME PAPER 70-GT-65] 18 p3303 A70-36840
- Boundary layer optimization for high turning axial flow compressor blades, using flow theory and conformal mapping
[ASME PAPER 70-GT-88] 18 p3209 A70-36879
- Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtration of Gaussian noise
18 p3229 A70-37104
- Discrete signals synthesis optimal with respect to given criterion, determining ambiguity function extremum
19 p3374 A70-37270
- Optimization model for evaluating information management systems for handling control functions of long duration space station missions
19 p3532 A70-37851
- Book on optimization and probability in systems engineering covering mathematical models for reliability, repair, availability, Markov techniques and queueing
19 p3553 A70-37928
- Quadratically convergent algorithms for function minimization, discussing unified method and applications to quadratic and nonquadratic functions
19 p3458 A70-38302
- Minimum weight design of sandwich beams with elementwise constant cross section for prescribed compliances under alternative loads
19 p3543 A70-38303
- Slender hypersonic airfoil shape optimization for maximum lift to drag ratio for given profile area, chord and free stream conditions
19 p3352 A70-38304
- Optimum attention allocation, discussing distraction resistance and multiple task performance
19 p3362 A70-38316
- Optimum reliability level in terms of economic benefits and external constraints
19 p3554 A70-38595
- Optimum fuel utilization for Plum Brook Reactor, using criticality data for effects of neutron leakage and burnup uniformity in core point model
20 p3671 A70-39110
- Uncertainty principle in optimum communication theory, discussing existence and value of minimum product of pulse duration in terms of calculus of variations and differential equations
20 p3584 A70-39161
- Cost and time optimization for complex aircraft development projects via network planning
20 p3740 A70-39644
- Soviet book on flight vehicle optimal design algorithms, covering mathematical theory of variational method, multistage spacecraft, etc
20 p3716 A70-39898
- Analog communication optimal nonlinear modulation scheme design for large SNR through transformation into inner product functions
20 p3587 A70-39973
- Cylindrical or tapered composite shell structures optimal design with closed circular or elliptical cross section under combined bending and torsional loads
20 p3730 A70-40043
- Structural synthesis concept in optimal design of composite material structural systems, considering failure modes of rectangular fiber composite plate
20 p3731 A70-40044
- Discrete parameter stochastic optimization problems necessary conditions, deriving maximum principle
20 p3659 A70-40107
- Aircraft engine design combining turbojet and ramjet features to ensure optimum performance
20 p3690 A70-40148
- RF ion source for electrostatic spacecraft propulsion, discussing RIT-10 performance optimization and development
[AIAA PAPER 70-1102] 20 p3692 A70-40236
- Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability
20 p3659 A70-40261
- Shape factors for weight prediction and design optimization of structural members requiring given area moment of inertia
[SAWE PAPER 828] 20 p3732 A70-40354
- Structural weight design optimization by computer aided geometrical programming technique
[SAWE PAPER 822] 20 p3733 A70-40357
- Fuselage frames minimum weight analysis by automatic iterative method
[SAWE PAPER 826] 20 p3733 A70-40370
- Mathematical techniques for optimal design of single purpose structures under dynamic deflection
20 p3733 A70-40381
- Elastic beams optimal design for multipurpose loading, considering compliance and minimum cross section constraints
20 p3733 A70-40382
- Optimum calibration intervals determination for obtaining instrument maintenance quality level at low cost
20 p3634 A70-40452
- Free vibration optimization analysis by reducing stiffness and mass matrices
21 p3933 A70-40587
- Lifting reentry vehicle two dimensional motion optimization with inequality constraints explicitly containing control by perturbation method
21 p3845 A70-41265
- Transfer function optimization for linear follow-up frequency filter with controlled resonance, analyzing noise band performance
22 p3985 A70-42402
- Dubovitskii and Milyutin formalism applied to optimization problems involving equality and operator constraints via mathematical programming in normed linear space
22 p4061 A70-42462
- Optimal weight design of axisymmetric rotating elastic disks for specific edge radial displacement
22 p4112 A70-42463
- Optimal binary and ternary signal system synthesis by information divergence procedure for communication channels with colored Gaussian noise
22 p3985 A70-42491
- Optimum pressure distribution and airfoil profiles for maximum lift without separation in incompressible flow determined by second order theory
[AIAA PAPER 69-739] 22 p3959 A70-42704
- RLC networks and microwave components design by applying optimization technique
22 p3997 A70-43175
- Spacecraft magnetic radiation shield optimization based on thickness criterion and system mass consideration
22 p3979 A70-43390
- Matrix transformations and minimization of computation algorithms for arbitrary linear equations systems, using direct methods
22 p4063 A70-43479
- Discrete decision variable models formulated as linear integer programs, deriving shrinking boundary algorithm for optimization
22 p3994 A70-43497
- Air transport system technical and operational functions optimization
22 p3962 A70-43532
- MOS transistor trigger circuit design parameters statistical calculation and optimization by Monte Carlo method using computer
23 p4171 A70-43957
- Signal shape optimization by minimizing dispersion in temporal position estimates for radio pulse in presence of additive white noise
23 p4161 A70-43961
- Linear phased arrays computer aided design, discussing search algorithms in multivariable optimization program
23 p4172 A70-44015
- Minimum weight structural design within given stress limits due to different loads or natural frequency vibrations, using finite element method for structural analysis
23 p4268 A70-44226
- Optimal algorithm for searching extremum of single variable unimodal function satisfying Lipschitz condition based on maximum possible error criteria
23 p4177 A70-44305
- Microwave frequency light modulators waveguides, examining optimal cross sections to increase modulator efficiency
23 p4196 A70-44409
- Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics
23 p4270 A70-44562
- Optimal design of minimum weight bar and beam structures under static loads, comparing computer time with nonlinear programming methods
23 p4271 A70-44702
- Gradient minimization and higher order discrete elements application to shell buckling and vibration eigenproblems, using 48 degree of freedom Bogner cylindrical panel element
23 p4271 A70-44705
- Elastic continua structural optimization analysis decisions for maximizing calculation accuracy, insuring efficient complex numerical analyses
23 p4271 A70-44706
- General Optimization Software Package for Electrical network and system design, noting application to engineering problems and education
23 p4177 A70-44750
- Optimum input pulse signal synthesis for transmission through lossless homogeneous isotropic plasma, using matched filter theory
23 p4228 A70-44962
- Parameter optimization of gravity gradient stabilized satellite in circular orbit, considering minimum transition time and eccentricity oscillation
23 p4264 A70-45014
- Boron and boron-carbide coatings formation by vapor deposition, determining optimum thermodynamic parameters from experiment
24 p3466 A70-45241
- Optimality criterion selection for asynchronous microelectric motor design by computer
24 p4293 A70-45470
- Combinatorial optimization problems design on permutation set, considering applicability of variants successive analysis method
24 p4321 A70-45472
- Planning criteria for optimum metropolitan airport system considering operational, physical, social and economic factors
[AIAA PAPER 70-1266] 24 p4430 A70-45921
- Computer optimization program for solid state components and integrated circuits design with conversational system for man machine dialogues
24 p3417 A70-46321
- Satellite launch vehicle guidance equations for programmed optimization applied to Eldo inertial guidance system
24 p4375 A70-46359
- OPTIMUM CONTROL**
U OPTIMAL CONTROL
- OPTIMUM THRUST PROGRAMMING**
U THRUST PROGRAMMING
- OPTOMETRY**
Servocontrolled IR optometer providing electrical signal proportional to refractive power of human eye
12 p2237 A70-28123
- OR-GATES**
U GATES [CIRCUITS]
- ORBIS**
NT ORBIS CAL SATELLITE
- ORBIS CAL SATELLITE**
Ionospheric ducting of satellite beacon signals observed on Orbis Cal satellite experiment
20 p3591 A70-40495
- ORBIT CALCULATION**
Solar motion effects on planetary orbits, discussing preferred coordinate systems of scalar theory of gravitation
01 p0186 A70-11104
- Orbital charts development for space navigation, discussing cartography and orbital navigation
01 p0138 A70-11251
- Satellite orbital elements optical determination accuracy by differential corrections, presenting computations for data distributed along small arc
02 p0254 A70-11754
- Secular and short period perturbations calculation of satellite orbital elements under action of solar radiation pressure
02 p0362 A70-11763
- Orbital period determination for satellite from single station visual observations, assuming known orbit inclination, ascending node length and node precession
02 p0254 A70-11765
- Cosmos 44 quasi-draconic period analytical and graphical determination, comparing moments of meridian intersection with INTEROBS observations
02 p0363 A70-11767
- Satellite 1965-11-4/Cosmos 54 rocket/braking, rotation periods and revolution from INTEROBS and SPIN observations, comparing K-index and solar activity parameters
02 p0363 A70-11768
- Lunar gravitational field determination from analysis of Lunar Orbiter spacecraft tracking data
03 p0562 A70-12915
- Midast 4 satellite osculating orbital elements determined on basis of optical tracking data
03 p0443 A70-13177
- Orbits computation from double lined spectra of eclipsing binaries 31 Men and 9 Cha, emphasizing systemic velocity and mass ratio derivation method
03 p0565 A70-13268
- Earth satellite orbit parameters determination from angle measurements using computer program and least squares estimation technique
03 p0573 A70-13843
- Geocentric orbital elements of lunar particles expelled into space by meteorite impact, using spheres of influence method
03 p0574 A70-13880
- Generalized Keplerian orbits for large cylindrical satellites noting orbit stability
03 p0578 A70-14252

Orbit determination program for launching and stationkeeping of 24 hr geostationary satellites, using azimuth and elevation of single autotrack antenna
03 p0578 A70-14339

Singularity-free universal orbit calculation satisfying two position vectors and time interval
04 p0750 A70-14930

Orbit determination simultaneous optimal strategy and useful information set selection, discussing Mars transfer trajectory
04 p0750 A70-14940

Navy navigation satellite passes predicted by equations for rise and set times, elevation and azimuth in plane circular polar orbit about spheroidal earth
04 p0764 A70-15431

Hybrid system for allocating domestic synchronous communication satellites in concentric circles within inclined elliptical synchronous orbits
05 p0906 A70-15801

Ionospheric air density profiles revision based on satellite orbits analysis
05 p0839 A70-16287

Error analysis of resonant orbits for geodesy, discussing high order geopotential coefficient recovery by resonance and gravity model errors
05 p0909 A70-16341

Satellites and space probes orbital parameters calculation, considering circular and elliptical trajectories and rendezvous maneuver example
06 p1140 A70-17583

Second order secular perturbations formulas of distant earth satellite motion valid for nearly circular orbits with small inclination to ecliptic plane
06 p1141 A70-17823

Manual onboard orbit determination assuming electronic equipment failure, discussing geometric in-plane orbital parameters and safe orbit check
[AIAA PAPER 70-159] 06 p1144 A70-18033

Apollo translunar and transearth orbit determination and navigation using ground and onboard systems
[AIAA PAPER 70-27] 06 p1103 A70-18124

Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems
[AIAA PAPER 70-160] 06 p1158 A70-18177

Translunar Apollo orbit analysis from elementary equations relating to elliptical and hyperbolic orbits in inverse square force field
06 p1148 A70-18397

State transition matrix computation method with efficient algorithm for orbit prediction in n-body gravitational field
06 p1095 A70-18497

Satellite orbit using analytic partial derivatives of perturbed motion based on state transition matrices
07 p1381 A70-19301

Maximum probability estimates for satellite orbital plane, reducing computational labor by eliminating use of maximum likelihood principle in differential formulation
07 p1386 A70-19486

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time
07 p1393 A70-19497

Computer scheduling model and timeline plot for Apollo Telescope Module /ATM/ experiments using orbital trajectory simulation
07 p1394 A70-19572

Moon perigees and apogees for years 1-3000, tabulating parameters for calculations
08 p1568 A70-20635

Orbit analysis of hypothetical comets formed by Jupiter surface eruptions using Lagrange origin hypothesis
08 p1573 A70-21012

Earth satellite orbit determined by small separated optical observations at two stations
09 p1751 A70-22162

Spherical coordinate intermediaries for calculating satellite orbits
09 p1760 A70-22914

Periodic orbits in highly perturbed dynamical systems, studying characteristic curves of various families in galactic-type potential
09 p1760 A70-22916

Orbit determination from two position vectors and periaips radius, introducing polar equation for conic to obtain solution
09 p1760 A70-22932

Satellite orbital characteristics selection techniques, tools and methods for mission objectives and constraints
[AAS PAPER 68-136] 09 p1761 A70-22937

Center of mass small displacement effects on satellite orbits by solving variational equations for scalar potential function employing matrix formalism
09 p1761 A70-22938

Polynomial force model supplementing reduced gravity model in determining accuracy of near equatorial, near synchronous and near circular satellite orbits
09 p1762 A70-23256

Short arc method and spatial fitting of orbit in satellite triangulation, establishing sequential order between methods
09 p1670 A70-23440

Satellite orbit prediction formulas for Vinti dynamic model with three coordinates expressed in terms of independent variable
10 p1939 A70-24188

Geopotential resonance effects on low altitude satellites orbit determination, analyzing GEOS 2 orbit variations to determine even-degree coefficients
10 p1939 A70-24189

Parameter estimates effectiveness from independent discrete and continuous navigation measurements of circular orbital plane
10 p1914 A70-24303

Minimal characteristic velocity of single impulse transfer between coplanar elliptical orbits with allowance for thrust action finite time
10 p1940 A70-24304

Satellite orbit prediction using computer program based on first order secular node-to-node drag perturbations
10 p1943 A70-24822

Short period hypothetical orbits distribution formed by flaring on Jovian satellites
11 p2109 A70-25925

Mars imaging mission and astrodynamic interaction, discussing arrival geometry and orbit size effects
[AIAA PAPER 69-127] 11 p2112 A70-26130

Spin stabilized satellite attitude and orbital maneuvers computation, considering required accuracy and computer time in numerical integration procedures
11 p2125 A70-26278

Comet-asteroid evolutionary relationship based on Hidalgo orbital analysis
11 p2114 A70-26472

Light pressure induced secular effect contributing to planetary satellites and lunar orbits evolution calculated by numerical integration
11 p2118 A70-26777

Errors in determining controlled satellite rotation periods, proposing scheme for corrected trajectory calculation of small eccentricity orbits
11 p2118 A70-26779

Satellite motion initial phase vector estimation for calculating satellite motion from selection of complete or increasing volume of measurements
11 p2118 A70-26781

Vinti potential with spheroidal coordinates for equations of motion in earth satellite orbit computation
13 p2486 A70-28503

First order node to node satellite orbital elements perturbations due to arbitrary zonal geopotential harmonic, determining computation methods and time
14 p2638 A70-30703

Synchronous satellite orbits determination using mathematical model for simulating gravitational perturbations induced by terrestrial globe and foreign bodies
14 p2651 A70-31279

Orbit calculation based on first integrals of two body problem in spherical coordinates
15 p2797 A70-31620

Restricted three body problem taken for intermediate orbit in constructing analytical trigonometric motion theory for resonance asteroids, calculating perturbations by Bogoliubov method
15 p2803 A70-32498

Matrizant of two body problem or integrable dynamic system for applications to computing perturbations and differential correction of orbits with observations
15 p2768 A70-32611

Maximum probability estimates for satellite orbital plane, reducing computational labor by eliminating use of maximum likelihood principle in differential formulation
15 p2805 A70-32731

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time
15 p2813 A70-32742

Satellite equations of motion in noninertial instantaneous astronomical system, taking into account perturbation equations terms
17 p3155 A70-34684

Quasi-linearization /generalized Newton-Raphson process/ in orbit determination, comparing with differential correction method
17 p3168 A70-35235

Scientific satellites orbit determination and improvement procedures for tracking system based on Doppler frequency and angular measurements
17 p3046 A70-35280

Interplanetary probes trajectory optimization for minimum energy expenditures, neglecting solar and terrestrial perturbations within earth sphere of influence
17 p3168 A70-35366

Echo 2 satellite orbital elements from optical observations covering last passages over Milan before orbital decay
17 p3172 A70-35628

System analysis to determine orbital parameters influence on mission scientific objectives under engineering constraints, using value function
[AIAA PAPER 68-1052] 17 p3172 A70-35648

Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission
[AIAA PAPER 69-918] 17 p3172 A70-35649

Intermediate orbit calculation, allowing for spacecraft large gravitational perturbation during motion near planetary sphere of influence
18 p3312 A70-36166

Satellite path geometry along Keplerian elliptical orbit, taking earth flattening into consideration
18 p3312 A70-36167

Intermediate elliptical orbits for planetary satellites with small inclination to equatorial plane
18 p3312 A70-36174

Artificial satellite orbital motion numerical integration, computing spherical harmonic terms for earth gravitational potential
18 p3334 A70-37063

Plane galactic orbits near spiral field particle resonance, calculating numerically for ring orbits librating near maxima at Lagrangian points
18 p3331 A70-37193

Optimal three dimensional impulsive orbit transfer at cuspidal point of primer locus in terms of three parameters to facilitate computation and tabulation
[AIAA PAPER 70-1037] 19 p3527 A70-38852

Manned space station orbit selection, considering ground truth sites, sensors, film resolution, ground swaths, etc
[AIAA PAPER 70-1063] 19 p3529 A70-38877

Mariners 6 and 7 orbits determination by weighted least squares estimation based on common surface features in overlapping TV pictures
[AIAA PAPER 70-1066] 19 p3529 A70-38879

Weather occultation satellite orbit determination by radio wave measurements between master and slave satellites, formulating mathematical model
[AIAA PAPER 70-1067] 19 p3529 A70-38880

Orbit determination accuracy in synchronous satellite tracking analysis, using weighted least squares method
[AIAA PAPER 70-1068] 19 p3529 A70-38881

Galilean satellites touring by Jupiter spacecraft, discussing orbit calculation and encounter geometry
[AIAA PAPER 70-1070] 19 p3530 A70-38883

Visual binary stars orbits computation catalog from data obtained in 1939-1969 period
19 p3530 A70-38895

Computer algorithm for optimal linear impulse corrections to satellite orbit under inequality type constraints
21 p3801 A70-40828

Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems
[AIAA PAPER 70-160] 21 p3931 A70-41861

Solar eclipse calculation and prediction, discussing relationship between possible forms and earth-moon orbital configurations
21 p3924 A70-42173

Restricted three body problem taken for intermediate orbit in constructing analytical trigonometric motion theory for resonance asteroids, calculating perturbations by Bogoliubov method
23 p4240 A70-43919

Interplanetary periodic orbits and flyby dates for multiple earth-Venus swingby missions, describing various iterative solutions for trajectory
[AIAA PAPER 69-931] 23 p4243 A70-44508

Practical stability of highly eccentric orbits quasi-normal to ecliptic, discussing lunar effects on orbital lifetime
23 p4243 A70-44510

Doppler effect simplification to classical Laplacian orbit determination, deriving equations in perturbed gravity field for initial point determination
23 p4246 A70-44697

Minor planets, comets and natural satellites positions and motions, discussing orbit and ephemerides calculation, Icarus asteroid, etc
23 p4256 A70-45038

Orbital elements from secular acceleration in motion assumption, proving Comet Harrington identity with Comet Wolf
23 p4257 A70-45045

Rapid satellite orbit prediction program by numerical integration including oblateness squared and radiation pressure effects over long time spans
24 p4406 A70-45528

Satellite orbital element values and perturbation parameters from incomplete element system, using maximum likelihood principle
24 p4406 A70-45529

Satellite orbital elements calculation using ellipsoidal harmonics for geopotential representation
24 p4406 A70-45531

Solar and terrestrial perturbations on lunar satellite calculated by Brown theory
24 p4407 A70-45534

- GEOS A and OGO-4 satellite orbits and trajectory analysis using Definitive Orbit Determination System, discussing tracking stations error role 24 p4407 A70-45536
- Error analysis of satellite orbits obtained by synchronous satellites range and range rate measurements 24 p4407 A70-45539

- Earth orbital parameters estimation in manned flight by manual space navigation sensors and computer 13 p2446 A70-28406
- Navigation for lunar parking orbit with time varying osculating orbital elements, using Apollo 11 Doppler tracking data 14 p2613 A70-30457
- Churimov-Gerasimenko 1969h comet photographs and preliminary orbital characteristics 15 p2800 A70-32146

Maximum probability estimates for satellite orbital plane, reducing computational labor by eliminating use of maximum likelihood principle in differential formulation

15 p2805 A70-32731

Meteor orbit parameters and incident particle flux measurements by radio methods, eliminating backscatter radar sensitivity limitations

15 p2807 A70-32814

Secular variations in osculating orbital elements of particle in Saturn ring gravitational field, considering motion in both external and internal space

16 p2973 A70-33226

Periodic comet Slaughter-Burnham improved ephemeris for 1970-71, based on 1958-59 and 1969 orbital elements

17 p3158 A70-34863

System analysis to determine orbital parameters influence on mission scientific objectives under engineering constraints, using value function

[AIAA PAPER 68-1052] 17 p3172 A70-35648

Solar quadrupole moment effect on secular perturbations of planetary orbital elements

18 p3313 A70-36325

Leonid meteoroids orbital elements mean values from photographic observations

19 p3526 A70-38776

Orbital elements of photographic meteors brighter than first magnitude, tabulating dates, solar longitudes, corrected radiants, velocities, major axis, etc

19 p3526 A70-38787

Planetary orbiter parameters long term variations under central body oblateness, solar and atmospheric drag perturbations

[AIAA PAPER 70-1055] 19 p3528 A70-38870

Orbital and physical parameters of calibration satellites launched into right circular cylinder and right circular cone

19 p3382 A70-38894

Binary stars dynamical parallaxes, masses, absolute magnitudes and provisional orbits, fitting deduced masses into empirical visual mass-luminosity relations

19 p3531 A70-38896

SERT 2 measurements for spacecraft and ion beam potential as function of thruster and orbital parameters, using hot wire emissive probes

[AIAA PAPER 70-1127] 20 p3691 A70-40218

Radiant dispersion, position, areas and orbital axis in meteor showers by double-station photographic observations, noting Apollo group detection

21 p3884 A70-40875

Comet Bennett basic characteristics, discussing orbits, periods and observational summaries of other comets

21 p3890 A70-41164

Terrestrial satellites ground tracks by FORTRAN IV computer program, investigating orbital parameters effects

21 p3892 A70-41325

Neptune orbit residual, discussing recently discarded Lalande prediscovery

21 p3922 A70-41986

Orbital elements from secular acceleration in motion assumption, proving Comet Harrington identity with Comet Wolf

23 p4257 A70-45045

Satellite orbital element values and perturbation parameters from incomplete element system, using maximum likelihood principle

24 p4406 A70-45529

Satellite orbital elements determination by differential correction procedure, considering observation stations distribution influence on accuracy

24 p4406 A70-45530

Satellite orbital elements calculation using ellipsoidal harmonics for geopotential representation

24 p4406 A70-45531

Geophysical parameters from artificial earth satellite orbital elements evolution data, discussing atmospheric density and zonal harmonics

24 p4330 A70-45551

Echo 1 and PAGEOS 1 orbital elements variations, determining perturbing effects of earth albedo radiation pressure

24 p4409 A70-45558

Short period hypothetical and real comets in Jupiter sphere of influence distributed according to orbital elements

24 p4409 A70-45637

ORBITAL LAUNCHING

Osculating transfers between two prescribed trajectories without considering optimization problem, obtaining in-space launching point of artificial cosmic bodies

03 p0575 A70-13972

Optimum second stage sizes for Blue Streak first stage for maximum payload injection into various orbits, tabulating sizes and payloads

05 p0924 A70-16589

Orbit-to-orbit shuttle for launch in earth-to-orbit shuttle vehicle, discussing design requirements

[AIAA PAPER 70-268] 07 p1399 A70-20397

Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multibit injection

[AIAA PAPER 69-535] 14 p2616 A70-30767

Scramjets for recoverable booster transporting payloads into earth orbits

15 p2811 A70-32258

Nuclear orbital launch stages for interplanetary departure, comparing parallel and tandem spacecraft configurations

[AIAA PAPER 70-680] 16 p2950 A70-33580

Light weight integrated spin-up launch mechanism for rocket propelled payload

16 p2845 A70-34113

Multiorbit injection earth departure technique for optimal thrust-weight ratio in manned interplanetary missions using NERVA engine

[AAS PAPER 70-039] 17 p3175 A70-34780

Black Arrow launch vehicle for inexpensive and reliable payload injection into low polar orbits

17 p3178 A70-35255

ORBITAL MECHANICS

NT KEPLER LAWS

Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient

01 p0197 A70-11481

Optimum orbital transfer of material point subjected to reactive force with minimum mass loss, discussing Kepler motion kinematics

01 p0192 A70-11514

Conditionally periodic orbits existence in restricted problem of three bodies, using similarity transformation

02 p0369 A70-11997

Three-body gravity gradient satellite orbital plane motion analysis, studying transient damping of proposed tethered orbiting interferometer (TOI)

02 p0383 A70-12781

Optimal two impulse transfer through 180 degree range angle between Keplerian noncoplanar orbits, minimizing impulse by transfer plane optimal orientation

[AIAA PAPER 68-93] 03 p0562 A70-12914

Tidal disturbing functions developed with amplitude factor and lag angle expressed as sums of zonal spherical harmonics, discussing lunar formation and orbit evolution

03 p0576 A70-14083

Phobos motion observational results compared with Sharpless determination of secular acceleration

04 p0743 A70-14399

Satellite motion in earth gravitational field under additional forces using Stokel theorem

04 p0760 A70-14432

Stationary and periodic solutions for commensurable cases of mean motions in restricted three body problems by expanding disturbing functions

04 p0745 A70-14474

Singularity-free universal orbit calculation satisfying two position vectors and time interval

04 p0750 A70-14930

Orbit mechanical investigations for increasing Europa 2 booster rocket payload to place German-French communications satellite Symphonie into 24 hr orbit

04 p0754 A70-15153

Predictor-corrector algorithm for continuing analytically families of periodic orbits beyond collision trajectories in restricted three bodies problem

05 p0908 A70-16333

Resonance effects on satellite orbits due to tesseral harmonics in potential field

05 p0908 A70-16335

Motion near collision singularity in perturbed two body problem, applying method to boundedness proof for Sperling cluster energy

05 p0909 A70-16339

Critique of solar system resonant structure hypothesis based on planetary orbital frequencies errors

05 p0910 A70-16394

Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques

[AIAA PAPER 70-95] 06 p1146 A70-18202

Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit

07 p1386 A70-19484

Pulsar formation effect on orbits of preexisting planets and postformation planets effects on pulsar period and phase residuals

08 p1570 A70-20898

Periodic solutions with moderate eccentricities and high inclinations for three dimensional restricted three body problem by expanding disturbing functions by high speed computer

09 p1759 A70-22773

Periodic orbits in highly perturbed dynamical systems, studying characteristic curves of various families in galactic-type potential

09 p1760 A70-22916

Stability characteristics of near periodic orbits using variational equations, with results applied to phase space and stability problems

09 p1760 A70-22917

Triangular Lagrangian equilibrium points stability in planar restricted problem of three bodies at order two mass ratio using two variable expansion method

10 p1939 A70-24184

Periodic orbits for reduced problem of conservative Hamiltonian system with two degrees of freedom, discussing emergence from resonant equilibrium

10 p1939 A70-24187

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc

10 p1950 A70-24641

Evolution discontinuities and genealogy of long period orbit families at Lagrangian equilibrium point of restricted three body problem

10 p1945 A70-24958

Motion of negligible mass body near large mass body affected by larger third body applied to Phoebe-Saturn-sun system

10 p1945 A70-24960

Dynamic orbital mixing in self gravitating spherical stellar system using water bag model

10 p1945 A70-24965

Book on quasi-linearization and nonlinear fluid and orbital mechanics covering ablating wall, electrostatic probe, laminar boundary stability, pipe flow and optimum bang-bang transfer

11 p2072 A70-26225

Coplanar transfer orbits optimal trajectories in central Newtonian gravitational field, using Krotov sufficient criteria

12 p2310 A70-28252

Nomogram construction for graphical solution of two body problem using radius-vector and velocity components applied to solar system

12 p2311 A70-28310

Satellite motion in earth gravitational field under additional forces using Stokel theorem

13 p2503 A70-28457

Variational equations from Herrick variation of parameters method for Icarus encounter with earth

13 p2488 A70-28823

Bright sporadic fireballs and faint photographic meteors orbits, discussing clustering in diagram of geocentric velocity vs inclination

13 p2490 A70-29040

Harmonic functions defining geopotential and gravity derived from satellite orbit dynamics, applying to earth shape parameters

13 p2398 A70-29208

Lunar spring board effect to minimize impulses for given velocity at great distance of earth-moon system, discussing nonimpulsive grazing passage

14 p2635 A70-30289

Artificial satellite around Venus, investigating orbital lifetime based on atmospheric drag effect on periapsis height

14 p2637 A70-30563

Analytical solutions to optimum orbit modifications including atmospheric maneuver

14 p2649 A70-31171

Third integral of stellar dynamics, considering Contopoulos galactic system model separability

14 p2651 A70-31288

Book on celestial mechanics covering perturbation methods, two body problems, astronomical coordinates, orbital mechanics, satellite rotation, gravitational effects, etc

15 p2799 A70-31998

Jet assisted orbital spacecraft trajectories equations derivation, considering Kepler trajectories and orbital velocities

15 p2800 A70-32260

Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit

15 p2805 A70-32729

Periodic solutions close to commensurabilities in three body problem, considering restricted and planar nonrestricted problems

17 p3172 A70-35561

Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques

17 p3172 A70-35666

Low thrust station keeping guidance scheme for gravity gradient stabilized 24-hour satellite, solving equations of motion for near circular equatorial orbit

18 p3289 A70-36676

Minimum-fuel multiple impulse orbital fixed time rendezvous in circular orbit vicinity

18 p3289 A70-36682

Circular orbit stability in stationary axisymmetric space-times dependence on angular momentum per unit mass increases outward from symmetry axis

18 p3317 A70-37004

Iterative Hansen method of general perturbations programmed for digital computer, evaluating major and minor planetary theory

18 p3320 A70-37060

General potential function in triaxially ellipsoidal coordinates for Laplace equation, examining near earth satellites and Vinti potential

18 p3334 A70-37064

Satellite orbit theory error bounds and initialization, investigating first order von Zeipel method in axisymmetric force field

18 p3320 A70-37067

- Bestser comet 1946k-1947I orbit, showing original and future orbits as long period ellipses
19 p3515 A70-37931
- Burnham-Slaughter 1958e-1959I comet orbit, showing nearly parabolic ellipse
19 p3516 A70-37933
- Humason 1960e-1959X comet hyperbolic orbit, indicating solar system permanent membership
19 p3516 A70-37934
- Periodic collision orbits in plane elliptic three body problem of infinitesimal mass under gravitational field of two finite masses
20 p3705 A70-39603
- Global geoid sections determined by satellite orbit dynamics, using best fitting ellipses
21 p3812 A70-40591
- Titius-Bode law conclusions regarding solar system planetary distances numerical relations, considering planetary evolution
22 p4101 A70-42863
- Jupiter perturbations on short period comets during close approaches, discussing orbital distribution
23 p4241 A70-44252
- Moderately elliptic reference orbit perturbed motion, applying linearized perturbation equations for circular orbit
23 p4244 A70-44590
- Three body elliptic restricted problem triangular points, deriving second order expression for transition curves and characteristic exponents
23 p4244 A70-44595
- Restricted osculating two body orbit with time derivative of eccentric anomalies difference position as independent variable in perturbation differential equations
23 p4244 A70-44635
- Orbital mechanics of transfer orbits under small horizontal thrust, reducing second order differential equation to linear inhomogeneous equation
23 p4245 A70-44691
- Celestial mechanics covering two body problem, orbital improvement, perturbation theory and dynamics, planetary and satellite theory, lunar motion, etc
23 p4255 A70-45032
- Balloon satellite perturbations in orbital period involving air drag, lunar gravity and solar and terrestrial radiation pressures
24 p4414 A70-45358
- Resonant satellites geodesy, determining orbit perturbation and gravity constant via mean Kepler elements high speed analysis
24 p4408 A70-45540
- ORBITAL MOTION**
U ORBITS
ORBITAL RENDEZVOUS
NT EARTH ORBITAL RENDEZVOUS
NT LUNAR ORBITAL RENDEZVOUS
Optimal rendezvous between satellite and spacecraft, determining power and time optimal coplanar rendezvous in circular orbit
01 p0139 A70-11479
- Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite
01 p0197 A70-11500
- Medium duration optimal rendezvous between near circular noncoplanar orbits with close orbital planes, analyzing six impulse solutions
03 p0571 A70-13639
- Orbital rendezvous for inspection, rescue, etc, discussing launch bases number, warning time and alert status effect on reaction time
06 p1027 A70-17173
- Rendezvous control law for spacecraft moving in central gravitational field along trajectory representing target vehicle Keplerian orbit
08 p1582 A70-21636
- Optimal longitude rendezvous for geostationary satellite by using inertially fixed orientation thrust for performing final positioning
10 p1941 A70-24541
- Soviet book on rendezvous in orbit, flight dynamics and control of spacecraft covering trajectory synthesis, optimization and control for approach stage
10 p1950 A70-24656
- Satellite rendezvous programmed control with allowance for thrust limitation by free trajectories method, determining impulse duration, magnitude and time
12 p2314 A70-28257
- Earth-pointing satellites joined by tether, discussing reel back and drag brake orbital deployment techniques and dynamic behavior
15 p2799 A70-31776
- Automatic control of Cosmos spacecraft docking maneuvers in two successive encounter phases
23 p4264 A70-45016
- ORBITAL SIMULATORS**
U SPACE SIMULATORS
ORBITAL SPACE STATIONS
NT EOSS
NT ORBITAL WORKSHOPS
Long life subsystems design and testing for orbital space station programs, considering nuclear genera-
- tion, electromechanical equipment, positive expulsion of fluids, instrumentation, etc
[AIAA PAPER 69-1080] 01 p0103 A70-10626
- Communications subsystem configuration for orbital manned space station, describing data rates and processing, multiplexing and associated modulation methods
[AIAA PAPER 69-1079] 01 p0043 A70-10627
- Manned space station system analysis for identifying control subsystem functions/weight penalties/and system characteristics to minimize penalties
[AIAA PAPER 69-1078] 01 p0194 A70-10628
- Orbital space station operations requirements and interactions, considering experimentation, support vehicles, ground support and follow-on growth
[AIAA PAPER 69-1062] 01 p0195 A70-10636
- Reusable airbreathing launcher for manned space station ferry operations, considering nozzles, intakes, thrust, acceleration, flight plan, weight analysis, etc
02 p0381 A70-12502
- Manned space station system design requirements, discussing logistics interaction and station autonomy
[AIAA PAPER 69-1063] 02 p0382 A70-12528
- Support facilities requirements and goals for manned and unmanned solar and stellar orbital astronomy
[MDAC-WD-1258] 05 p0847 A70-16074
- NASA three meter orbital telescope discussing configuration, optical geometry, launching, power supply, etc
07 p1280 A70-19150
- Modular earth orbiting space station design, configuration and operation
08 p1568 A70-20688
- Earth resources program function of early orbital manned space station in remote sensing
09 p1687 A70-23760
- Materials and processing technology roles in NASA programs involving manned space stations, service spacecraft and unmanned space exploration
10 p1902 A70-23855
- Soyuz 6, 7 and 8 group flight as step in Soviet space program to place manned station in earth orbit
11 p2121 A70-25623
- Manned space flight role in earth orbital space astronomy, examining long range program
12 p2297 A70-26997
- Checkout systems for shuttle and orbiting space stations, discussing shift from ground to onboard operation
12 p2208 A70-27691
- Manned space stations size, crew, orbit, lifetime, resupply requirements, etc
12 p2313 A70-27742
- Meteorological research potential of manned orbiting spacecraft, discussing electromagnetic sensing instrumentation development, specialized observing programs, etc
12 p2225 A70-27744
- Lunar spaceports for military uses from legal viewpoint, considering Space Treaty
12 p2336 A70-27774
- Nuclear power systems for manned orbiting space stations, noting Brayton aggregate and NASA objectives
13 p2450 A70-29493
- Maintenance vs redundancy for manned space station economy, considering costing structure and time increase for maintenance
15 p2713 A70-32666
- Outer space exploration and utilization, analyzing 1967 UN treaty provisions from standpoint of war potential inherent in space stations existence
16 p3003 A70-33100
- Experiment space module combined with space station and serviced by shuttle for low total cost and maximum flexibility in funding and scheduling
[AAS PAPER 70-034] 17 p3175 A70-34777
- Manned planetary flight systems engineering, discussing feasibility, objectives, propulsion, transplanet injection via geospace shuttle station, energy requirements for various synodic modes
[AAS PAPER 70-037] 17 p3155 A70-34778
- Space shuttle-manned space station integration, discussing design and operation, crew rotation, station resupply, docking, etc
[AAS PAPER 70-051] 17 p3176 A70-34789
- Manned planetary spacecraft and space stations as ecological systems, considering common features
[AAS PAPER 70-023] 17 p3176 A70-34799
- Ten year NASA manned space station in low earth orbit, grouping experiments in functional program elements/FPE/
[AAS PAPER 70-033] 17 p3156 A70-34802
- NASA ten year space station operational concepts, discussing mission planning, crew scheduling and management
[AAS PAPER 70-031] 17 p3176 A70-34804
- Orbiting space stations and interplanetary flights, discussing spacecraft design, facilities, Mariner probes, etc
19 p3533 A70-38487
- Manned space station orbit selection, considering ground truth sites, sensors, film resolution, ground swaths, etc
[AIAA PAPER 70-1063] 19 p3529 A70-38877
- Skylab scientific space station, discussing crew living quarters and supplies, artificial atmosphere and manned solar observatory
20 p3713 A70-39481
- Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters
[AIAA PAPER 69-919] 20 p3716 A70-39678
- Parameterized design data and selection criteria of biowaste resistojet system for orbit keeping and control moment gyro desaturation of manned space station
[AIAA PAPER 70-1132] 20 p3567 A70-40213
- Planetary probes, orbiting space stations and manned spacecraft in interplanetary flights, discussing Mariner, Gemini and Apollo reentry and Venus landing
22 p4109 A70-42313
- Nuclear power systems for manned orbiting space stations, noting Brayton aggregate and NASA objectives
22 p4071 A70-43193
- Geolunar space development with transportation based on shuttle stations, discussing communication, orbits, logistics, etc
22 p4108 A70-43628
- Attitude and orbit control electric propulsion systems for long term space stations, discussing resistojets and electron bombardment and contact ionization ion thrusters
22 p4092 A70-43654
- Attitude control of artificial gravity mass-unbalanced axisymmetric orbital space stations
23 p4258 A70-44502
- Rotating cable-connected orbital space stations deployment dynamics, considering cable mass and motion equation
23 p4258 A70-44529
- Earth orbital space station electrical power systems, discussing power sources, effect on structural configuration, environmental control and launch and resupply operations
[MDAC-WD-1461] 23 p4143 A70-44605
- Free flight remote controlled teleoperator system applications in manned orbital space station/space shuttle program
23 p4260 A70-44644
- Orbital space station utilization planning as international laboratory, discussing industry role, experiment program goals, etc
23 p4260 A70-44650
- Manned earth orbital space astronomy instruments, facilities and research objectives
24 p4415 A70-45825
- Orbital space station program, discussing common module design, support, space shuttles and objectives
[SAE PAPER 700755] 24 p4415 A70-45852
- Space station design, discussing existing technology base for earth orbital operations program implementation
[SAE PAPER 700756] 24 p4416 A70-45872
- Free-flying modules interface and operation in conjunction with space station for orbital research into manned space program
[AIAA PAPER 70-1300] 24 p4417 A70-45950
- Earth-orbiting manned space station design, describing shuttle support and experimentation in attached and free-flying modules
[AIAA PAPER 70-1299] 24 p4417 A70-45951
- Systems and design requirements for NASA Manned Space Station, discussing projected experiment program for applications and science
[AIAA PAPER 70-1298] 24 p4417 A70-45952
- ORBITAL TRANSFER**
U TRANSFER ORBITS
ORBITAL VELOCITY
Growth test vehicle /GTV/ flight test program for development of hypersonic flight to orbital speeds, discussing design, costs, capabilities, etc
03 p0582 A70-14188
- Hodographic determination of required velocity changes for space vehicle transfer orbit, involving only launching point and trajectory plane
08 p1577 A70-21505
- Minor planets orbits coordinates and velocities data at osculation time
09 p1756 A70-22654
- Jet assisted orbital spacecraft trajectories equations derivation, considering Kepler trajectories and orbital velocities
15 p2800 A70-32260
- Radio meteor orbit velocity and radiant measurements by pulse diffraction technique
18 p3315 A70-36603
- Nomograms for meteor geocentric velocity and trajectory with correction for zenith attraction and radiant
18 p3315 A70-36605

- Position and velocity of geodetic drag free satellite in near circular orbit, including lunar- solar gravitational effects and zonal and tesseral harmonics [AIAA PAPER 70-1054] 19 p3528 A70-38869
- Optimal fixed-time impulsive transfer trajectories minimizing characteristic orbital velocity, determining sufficient conditions 23 p4255 A70-45015
- Interorbital optimum trajectories with specified transfer angle in inverse square gravitational field, examining minimum velocity increment 24 p4412 A70-46003
- ORBITAL WORKERS**
- Orbital zero and low g environment utilization for space manufacturing processes and related operational and tooling requirements 16 p2919 A70-33718
- ORBITAL WORKSHOPS**
- Expandable space hangar with composite wall for orbiting maintenance shelter, providing radiation and meteoroid protection for occupants 02 p0380 A70-11934
- Spent Saturn S-4B stage conversion into orbital workshop in Apollo Applications Program 11 p2122 A70-26044
- Saturn IB Orbital Workshop solar array thermal and performance analysis for various vehicle orientations and orbital conditions, emphasizing modeling and data handling 11 p2127 A70-26357
- Solar X rays observation from manned orbiting workshop of Apollo Applications Program, describing telescope/camera assembly and X ray event analyzer 11 p2057 A70-26506
- Atmospheric density variations and functional dependence of aerodynamic moment coefficient on incident angle from Saturn Workshop flight experiment 14 p2528 A70-30559
- Space manufacturing in weightless environment, discussing unique processes, potential materials, product groups, planned experiments for Skylab Orbital Workshop mission, etc 16 p2888 A70-33716
- Materials preparation processes and improvements in space weightless environment, considering metals and ceramics melting, solidification, electromagnetic process control, etc 16 p2919 A70-33717
- Candidate products for manufacturing on space station, emphasizing liquid solid transformations, bubbles and droplets, polymerization, and cost effectiveness [AAS PAPER 70-036] 17 p3041 A70-34791
- Parabolic solar furnace for chemical manufacture of impurity sensitive materials in orbiting spacecraft 21 p3804 A70-41001
- Skylab Orbital Workshop fabrication experiments under space environment conditions, discussing weightlessness and vacuum effects on various manufacturing techniques 22 p4046 A70-43075
- Orbital laboratories and international cooperation, discussing national and foreign viewpoints 22 p4128 A70-43631
- Manned orbital laboratories, discussing need for international cooperation 22 p4128 A70-43634
- International earth orbital space laboratory program, discussing objectives, management, stations, shuttles, tugs, tracking, communication, data distribution network, etc 23 p4262 A70-44687
- Saturn Orbital Workshop experiment for testing chemically rigidized expandable materials and structures for space applications, discussing resin impregnated glass fiber cloth 23 p4264 A70-45012
- Skylab mission in 1972, describing orbital workshop configuration and three man crew integration for operational experiments [AIAA PAPER 70-1328] 24 p4417 A70-45939

- Faye comet motion and secular orbital evolution of short period comets 07 p1379 A70-19048

ORDER-DISORDER TRANSFORMATIONS

- Long range order formation kinetics in lithium ferite octahedral sublattice after stepwise annealing and quenching in water, using X ray analysis 03 p0537 A70-12867
- High temperature heat treatment effects on Mo, W, Ta and Re crystal surface order and faceting observed by electron diffraction, noting contamination role 03 p0538 A70-13097
- Atom ordering and effects on alloy properties - Conference, Kiev, Ukrainian SSR, 1969 03 p0505 A70-13101
- Interstitial atoms ordering effects on low and high temperature phase transformations in alloys with bcc lattice 03 p0505 A70-13102
- Two phase theory of ordered to disordered state transition in ternary alloys with fcc lattice, constructing phase diagrams 03 p0505 A70-13103
- Strain hardening on single crystals of aging Ni-based alloys with ordered separated phase 03 p0505 A70-13104
- Mechanical properties of ordered Ni-Cr alloys, establishing hardening effect of annealing 03 p0505 A70-13105
- Microdeformation resistance in Ni alloys with ordered phase diagrams related to strain level, analyzing Bauschinger effect 03 p0505 A70-13106
- Neutron bombardment effect on ordering and disordering state of alloys phase diagrams, noting temperature dependence 03 p0506 A70-13107
- Two phase transitions existence in Hubbard model of interacting electrons using one particle Green function solution 05 p0884 A70-16099
- Gamma prime phase structure ordering effect on critical shear stresses of aging Ni-Al alloys and nimonic 09 p1707 A70-23195
- Order-disorder transition temperatures for Ni-Cr alloys determined by neutron diffraction, discussing homogeneous ordering of atoms 09 p1707 A70-23196
- Cleavage fracture of Ta-Mo bcc alloys, investigating short range ordering and size effects by X ray diffraction 09 p1708 A70-23573
- Initial value problem of macroscopic disorder-order transformation in random thermal convection phase of fluid heated from below 09 p1791 A70-23679
- Minimum entropy production at microscopic level, obtaining stationary state by Pauli master equation 14 p2616 A70-30654
- Electron paramagnetic resonance of viscous nematic liquid crystal, investigating order as function of temperature 16 p2960 A70-33058
- Fe ion, Mg order-disorder in natural orthopyroxenes as function of temperature 16 p2896 A70-33087
- Kinetic simulation of atom rearrangements in order-disorder transformation for point defect movement in Ti alloys, considering vacancies and interstitials properties 17 p3115 A70-34381
- Ti alloys martensitic transformations, metastable beta-phase decomposition and alpha-phase ordering 17 p3118 A70-34403
- Cesium films structure and work function on W /011/ face, discussing order-disorder transition 19 p3487 A70-37817
- Liquid crystals orientational ordering molecular field theory examined by cluster variation method, predicting first order transition 22 p4085 A70-42485
- Neutron diffraction of ordered atomic oxygen structures in titanium suboxides, noting compositional dependence of physical properties 22 p4053 A70-42735

- Short range order and Fermi surface effects in copper-rich Cu-Al alloys single crystals from X ray scattering measurements 23 p4204 A70-43886

ORDINATES
U COORDINATES
ORDNANCE

- Ordnance circuit RF filter in backshell of standard connector, discussing design, physical- electrical specifications and tests 03 p0494 A70-14113
- Neutron radiography for visual nondestructive failure analysis and production inspection of ordnance components compared with X ray radiography 03 p0494 A70-14122
- Statistical control charts for evaluating instrumentation performance during ordnance devices testing, discussing evolution, interpretation and application 03 p0494 A70-14126
- Harrier armament system design for ordnance carriage to full combat load factors, describing Weapon Control Panel 10 p1807 A70-24848
- Ordnance flight dynamics, considering trajectory analysis and inaccuracies due to projectile wobble [AIAA PAPER 70-533] 13 p2506 A70-29001
- Agenda D vehicle self destruct charge ordnance component, discussing design, performance and tests 16 p2963 A70-34126
- Apollo ordnance systems design and reliability, stressing redundant components role 17 p3179 A70-35263
- Air to air armament selection effect on aircraft configuration [AIAA PAPER 70-939] 17 p3021 A70-35848
- Nonlinear equations of motion approximate solution, determining ordnance weapons aerodynamic stability coefficients from angle of attack [AIAA PAPER 69-135] 23 p4133 A70-44515
- OREGON**
- Earth magnetic field transition recorded in basaltic lavas in southeastern Oregon 07 p1276 A70-20351
- ORES**
- U MINERALS
- ORGANIC ALUMINUM COMPOUNDS**
- Physicochemical properties of monomer and associated aluminokalks, determining heats of combustion 22 p4124 A70-42677
- ORGANIC CHEMISTRY**
- Organic synthesis by electrical discharge in simulated Jovian atmosphere, noting appearance of orange-red cyanogen-ammonia polymer nonvolatile fraction 01 p0179 A70-10529
- Book on chemical evolution of life covering molecular paleontology, prebiotic chemistry, membrane structures, molecular evolution and structure, etc 02 p0230 A70-11685
- Carbonaceous complex use as indicators of geothermal history and high temperature organic geochemistry 17 p3042 A70-35331
- ORGANIC COMPOUNDS**
- NT ACETIC ACID
- NT ADENOSINE DIPHOSPHATE [ADP]
- NT ADENOSINE TRIPHOSPHATE [ATP]
- NT ADENOSINES
- NT AMINO ACIDS

- NT PYRIDINE NUCLEOTIDES
- NT THYROXINE
- NT TRYPTOPHAN
- Electron mobility in single component aromatic hydrocarbons, considering crystals structures and electrical properties, energy dissipation and fluctuation, etc 01 p0158 A70-10517
- Pressure effects on burning rate of magnesium mixtures with solid oxygen containing organic compounds, determining charge density effect on mass velocity 01 p0218 A70-11021

- Apollo lunar module descent engine exhaust organic combustion products, estimating ion intensities of various species in all mass spectra 02 p0356 A70-12693
- Low molecular weight organic semiconductors photoelectron UV emission spectra, studying electron energy distribution and optical ionization, dark bulk conductivity, etc 03 p0541 A70-13728
- Activated carrier mobility confinement in organic solids 06 p1004 A70-17325
- Organic compounds synthesis by electric discharges in simulated primitive atmosphere, considering mechanism for biologically significant molecules formation 07 p1225 A70-19104
- Pueblo de Alameda chondrite unextractable carbon content using meteorite pyrolysis, obtaining aromatic hydrocarbons 07 p1380 A70-19204
- Extrema behavior in nonlinear absorption of organic compounds under high power laser radiation interpreted by triple absorption molecular energy level models 07 p1302 A70-20100
- Free radical destruction by gamma irradiation in organic solids at low temperature measured by electron spin resonance spectroscopy, noting dosage relationship 07 p1225 A70-20324
- Bonds strength involving metallic, organic and ceramic adhesives at various temperatures, considering metallic additives effect 08 p1504 A70-20891
- Thermal conductivity for organic compound gases at atmospheric pressure 08 p1597 A70-21026
- Organic compounds chemical reactions during burning in laminar diffusive flames, describing technique for pyrolysis and combustion products sampling 09 p1787 A70-22107
- Conditions for life in universe, analyzing evolutionary stages of matter to determine steps producing complex organic compounds 09 p1762 A70-23121
- Organic substrates effects on *Hydrogenomonas eutropha* autotrophic and heterotrophic metabolism 10 p1817 A70-24700
- Carbonaceous chondrites composition by gas chromatography for light hydrocarbons and carbon, discussing origin of organic matter 10 p1949 A70-25327
- Nitrogenous compounds from Colorado Green River Formation oil shale using high resolution mass spectrometry 11 p2047 A70-26620
- Organic adhesives for bonding continuous surface and core-to-face joints, discussing strength, environmental resistance, producibility and reproducibility 13 p2419 A70-29118
- Biogeocenosis applicability to artificial closed ecological systems consisting of plants creating organic matter and heterotrophic organisms 13 p2353 A70-29501
- Electron impact promoted phenyl migration of trans phenylacetalone, considering mass spectrometry and stereochemistry 14 p2544 A70-30189
- Organic solutes diffusion in stagnant blood plasma and red cell suspensions, using models from transport theory 15 p2686 A70-32847
- Organic molecules topology, discussing Hamilton circuits, DENDROL applications, etc 16 p2855 A70-33298
- Organic compounds detection and identification on Mars surface for living systems existence or evolution 16 p2857 A70-33977
- Atmospheric oxygen history, using primeval anoxic terrestrial atmosphere simulation to show organic molecule formation by abiogenic process 16 p2898 A70-33990
- Optically active organic compounds origin on primordial earth, emphasizing role of asymmetric catalyst 17 p3024 A70-34700
- Product distribution of organic nitrogen compounds plasma sources computed by assuming high temperature limited thermodynamic equilibrium 18 p3226 A70-36764
- Solid-solid phase transitions in molecular crystals of organic tetrahedral substances, using differential scanning calorimetry 19 p3373 A70-38193
- P32 labeled organic phosphate esters in water extracts of soil 20 p3615 A70-38979
- Apollo 11 lunar fines examined for organic compounds via solvent extraction, vacuum crushing, programmed heating and hydrofluoric acid etching 21 p3778 A70-41619
- Apollo 11 lunar fines carbon compounds, examining chemical state of porphyrins, fatty and amino acids, purines, pyrimidines and carbohydrates, etc 21 p3779 A70-41625
- Apollo 11 lunar samples organic compounds analysis by mass spectroscopy, gas and liquid chromatography and nuclear magnetic resonance 21 p3779 A70-41629
- Apollo 11 lunar fines organic compounds detection and identification by mass spectrometry 21 p3780 A70-41632
- Organic solvent extracts of Apollo 11 bulk fine sample examined for porphyrins using spectrofluometry 21 p3780 A70-41635
- Organic spiropolymers synthesis for thermal stability by condensation of aliphatic spirotetraamines and aromatic dianhydrides 21 p3782 A70-42128
- Carbonaceous chondrites isomeric alkanes identification by mass spectrometry and gas chromatography 24 p4402 A70-45378
- ORGANIC FLUORINE COMPOUNDS**
- U FLUORINE ORGANIC COMPOUNDS**
- ORGANIC LASERS**
- Superradiant traveling wave laser emission observed with polymethine cyanine dyes pumped by mode locked ruby laser for picosecond duration pulse generation 01 p0110 A70-10564
- Frequency locking of flashlamp pumped Rhodamine 6G dye lasers to D lines of Na vapor by Faraday rotation, noting doublet splitting 01 p0110 A70-10568
- Polarization level dependence of dye lasers emission on angles between direction of forced radiation and pumping laser resonator axis 01 p0113 A70-11037
- High intensity short pulse flash lamps using quartz envelopes and wire electrodes for pumping high energy organic dye lasers 02 p0314 A70-12741
- Threshold energy value of organic laser emission from coronene in methyl-cyclohexane-isopentane at 100 K 03 p0498 A70-12878
- Flash lamp-pumped organic dye scintillator lasers using coaxial Xe-filled lamp, tabulating blue-violet organic liquid lasers characteristics 03 p0499 A70-13161
- Flashlamp pumped coumarin dye laser mode locked by intracavity loss modulation operating in blue region 04 p0703 A70-15622
- Aminocoumarin derivatives and 2-hydroxyquinoline compounds for flash pumped organic lasers 04 p0703 A70-15624
- Flash lamp pumped tunable organic dye laser, using capacitor bank for reliable operation 05 p0861 A70-16845
- Laser emission from organic molecules under neodymium laser harmonics excitation, describing absorption and photochemical inversions effects and emission spectra characteristics 07 p1300 A70-19866
- Dye laser stimulation by pumping with pulsed nitrogen laser line to obtain entire visible spectrum 07 p1301 A70-20016
- Optical pumping energy effects on lasing pulse duration during pulse excitation of alcohol solutions of rhodamine 6G 08 p1511 A70-20522
- Retunable lasers with organic dye dispersive resonators, studying space-angular, spectral and energy emission characteristics 08 p1511 A70-20538
- Pulsed nitrogen gas laser to obtain continuously tunable dye laser action to 3550 Å with output at 3771 Å in UV 08 p1513 A70-21553
- Dye laser tuned to sodium D line used for measuring ionospheric atomic sodium 08 p1492 A70-21757
- Organic dyes investigated for amplification characteristics of Raman emission stimulated by Q switched ruby laser 09 p1694 A70-22134
- Potassium iodide and paratoluidine fluorescent quenching effect on lasing threshold in rhodamine 6G alcohol solutions 09 p1696 A70-22487
- Green light laser using sodium fluorescein pumped by xenon pulse tubes, describing output power spectral characteristics 12 p2246 A70-27316
- Dye laser small signal gain via pumping by UV nitrogen laser 13 p2426 A70-28811
- Flashlamp-excited organic liquid UV lasers 13 p2427 A70-29141
- Organic dye lasers output bandwidth and tunability extension by acidification of solution 19 p3445 A70-37675
- Smooth periodic wavelength retuning in organic dye laser, using neodymium glass laser with YAG for pumping 20 p3642 A70-39742
- Organic laser spectral and energy characteristics, discussing practical operation principles, low generation threshold and harmonic energy 20 p3642 A70-39754
- Flash lamp pumped organic dye laser intensity for dye solutions in contact with different argon-oxygen compositions, noting effect of oxygen partial pressure 21 p3834 A70-40569
- Excited state complexes laser action in coumarin dyes indicated from stimulated fluorescence time dependence 22 p4048 A70-42328
- Rhodamine 6G triplet lifetime under continuous pumping by Ar laser 22 p4050 A70-43225
- Low threshold laser action of Nd-containing chelate in host media consisting of polymethyl methacrylate and organic liquid 23 p4201 A70-44869
- Laser excited atoms quenching by iodine molecules from light pulse induced photodissociation of perfluoropropyl iodide active media 24 p4352 A70-45467
- Amplification factor time dependence of dye lasing under rectangular pumping pulse, noting threshold conditions and burnout time relation to material parameters and resonator 24 p4352 A70-45473
- Nitrogen laser pumped exciplex 4-Methylumbelliferone and rhodamine 6G dye laser amplifier, measuring single pass power gain vs wavelength 24 p4355 A70-46088
- Laser gain coefficient increased via organic compounds addition to rhodamine 6G aqueous solution 24 p4356 A70-46273
- ORGANIC LIQUIDS**
- Organic liquid nucleate pool boiling experiments determining stresses, surface tension, viscosity and gravitation relationships to bubble shape and microlayer formation 01 p0218 A70-11180
- Gas chromatography based on sampling gas-vapor phase at liquid surface for determining volatile oxygen containing compounds in biological media 04 p0646 A70-14580
- Film properties of organic liquids squeezed between two solid flats using order liquid model, discussing applications to boundary layer lubrication 08 p1508 A70-21601

- ORGANIC NITRATES**
NT CELLULOSE NITRATE

ORGANIC PHOSPHORUS COMPOUNDS

Peroxyacetyl nitrate decomposition products under continued and discontinued irradiations determined by IR spectral analysis
22 p3983 A70-42944

ORGANIC PHOSPHORUS COMPOUNDS

Benzoyl cyanide deoxygenation, describing reaction kinetics and products
17 p3041 A70-34750

Carbon dioxide content of dialyzed human hemoglobin measured at specific pressure and varying pH values as function of 2,3 diphosphoglycerate
19 p3364 A70-38367

ORGANIC SEMICONDUCTORS

Organic semiconductor electrodes for electrochemical generators, discussing redox association with ion and electron conductivity in polyanilines
10 p1830 A70-24463

Thermoresistor parameters of organic semiconductor polymers with conjugated bond system, plotting temperature and EV characteristics
20 p3595 A70-38966

ORGANIC SILICON COMPOUNDS

Silicon organic binding materials properties, assessing ethyl silicate-50 perspectives in fabrication of precision castings
08 p1506 A70-21144

Gas-liquid chromatographic separation applied in derivatization chemistry of protein amino acids as N-trimethylsilyl/TMS/ esters
09 p1629 A70-22337

Lunar fines hydrochloric acid hydrolyses examination by gas-liquid chromatography indicating presence of organosiloxanes
21 p3779 A70-41627

ORGANIC SULFUR COMPOUNDS

Sulfur trichloride-Al tetrachloride complex ionic structure from Raman spectra and nuclear quadrupole resonance data
21 p3772 A70-40912

Aromatic polysulfone thermomechanical behavior by torsional braid analysis, discussing structure, synthesis, thermal stability, radiation effects, etc
21 p3783 A70-42134

ORGANISMS

Amino acid stability in pyrolyzed Pleistocene Mercenaria shells, comparing decomposition rates for aqueous solution
03 p0472 A70-13150

Radiation damage recuperation process in living organisms and justified risk dose in prolonged space flights using Blair model
03 p0423 A70-13705

Gravitational effects on organisms - Conference, Warsaw, March 1969
07 p1200 A70-18784

Radiation damage recuperation process in living organisms and justified risk dose in prolonged space flights using Blair model
11 p1985 A70-25505

Acceleration effects on human organisms, describing centrifuge, rocket sleds and catapult simulators
22 p3979 A70-43528

Living organisms physiological death as biological problem, discussing hypotheses, theories and facts
23 p4145 A70-44225

Organism reactions to gravity forces, discussing experimental zero and hyper g simulation studies with frog and nematode eggs
23 p4146 A70-44630

ORGANIZATIONS

NT TEAMS

Aerospace laboratories organization concepts, discussing dependence on product, size, location and technological trends
03 p0612 A70-14313

Earth resources data exploitation, describing potential organizational structures for data handling and various political, economic and technological problems
09 p1793 A70-22859

Integral systems management, discussing application and organizational prerequisites
10 p1970 A70-24595

European company for providing and operating European application satellite systems /EUROSAT/, discussing organization, tasks and financial structure
12 p2335 A70-27469

Quality control role in configuration management, considering quality assurance organization of aircraft manufacturer
14 p2669 A70-31104

Project authority relationship concerning manager authority and influence in five organization models
15 p2828 A70-31571

Management organization of European operational application satellite systems, concerning interurban telecommunication and air traffic control
22 p4127 A70-43502

European Space Research and Technology Center space science department, examining cosmic ray, ionospheric and surface physics divisions
24 p4323 A70-46356

ORGANIZING

Correlations between organizational factors and individual engineer performance, analyzing stability of relationships and time lags in measurement
02 p0246 A70-12378

Machinery for management of Sea Dart missile development using managerial concepts of planning, organizing, commanding, coordinating and controlling
08 p1601 A70-21036

Complex organization-processing system of experimental production, noting work specialization in machine shops
11 p2060 A70-25936

Technology relevance to organizational structure, discussing planning models based on problem solving and performance
23 p4284 A70-43995

ORGANOMETALLIC COMPOUNDS

NT CARBOXYHEMOGLOBIN

NT CHLOROPHYLLS

NT FERROCENES

NT HEMOGLOBIN

NT ORGANIC ALUMINUM COMPOUNDS

NT OXYHEMOGLOBIN

Refractory oxides synthesized using metal alkoxide thermal decomposition, comparing thermophysical properties with conventional ceramics
07 p1320 A70-19891

Fe and Al impurities in bis-ethylbenzene chromium /BEBC/ and in chromium films obtained by thermally induced decomposition of metal organic compound
18 p3297 A70-36463

ESR spectrum of gamma irradiated cycloheptatriene silver perchlorate, indicating free radicals and trapped electrons
19 p3374 A70-38272

Hydrostatic and anisotropic piezoresistance in organometallic crystals, noting iridium and platinum complexes with maximum metal-metal interaction
22 p4086 A70-43021

ORGANS

NT BLADDER

NT ESOPHAGUS

NT KIDNEYS

NT LIVER

NT LUNGS

NT OVARIES

NT PITUITARY GLAND

NT SPLEEN

NT STOMACH

NT TESTES

Corticovisceral interrelations concept, summarizing contributions in form of diagram showing interactions between cortical and nervous activity of organs
01 p0029 A70-11463

Temperature variations in organs of man and animals performing physical work as physiological base of metabolic processes and for daily activity timetable development
04 p0638 A70-15502

White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen
07 p1207 A70-19503

Vascular and dystrophic disturbances in rat parenchymatous organs in hyperbaric pure oxygen atmospheres, observing increased tissue eosinophilia
07 p1207 A70-19504

White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen
11 p1987 A70-26102

Intense deceleration effects on mice and rats, including internal organs damage and enzyme activity increase
17 p3025 A70-35132

Respiratory activity of internal organs and skeletal muscles in rats exposed to long term heat and cold
18 p3220 A70-36546

Gravity effects on perinatal organ growth in chicks
24 p4297 A70-45342

ORGUEIL METEORITE

Orgueil C 1 carbonaceous meteorite mineral content, describing pyrrhotite identification by electron microprobe
24 p4411 A70-45792

ORIENTATION

X ray diffraction method to determine degree of orientation of crystallites in extruded graphites
03 p0517 A70-13964

Stiffener inclination effect on pressurized cylinder instability under pure bending
04 p0769 A70-14868

Catalog systems orientation based on major and minor planets observation, discussing zero points corrections
08 p1574 A70-21152

Spacecraft orientation control system optimization by plotting controlled motion kinematic models
13 p2501 A70-28417

Disk elements perpendicular mounting by rotation on vibrating shaft, obtaining orientation by centrifugal force
15 p2733 A70-31580

Optimum fiber orientation for minimum weight boron/epoxy shear panel design
17 p3182 A70-34562

Optimum filament orientation for maximum strength in composite with combined normal and shear stresses
17 p3183 A70-34563

FK4 catalog system equinox and equator point corrections from lunar transit circle observations, discussing validity of moon for orientation
21 p3922 A70-41985

Orientation detectors in human visual cortex, suggesting mutual lateral inhibition
23 p4144 A70-43813

ORIFICE FLOW

Statistical model equations to predict discharge coefficients for concentric orifice plates as function of line size, diameter ratio and Reynolds number
04 p0667 A70-14837

Actively participating bounding surfaces effect on free molecule flow through slit or annular orifice situated in wall separating different pressure regions
04 p0668 A70-14906

Helmholtz resonator associated flow field analysis in nonlinear regime, considering external pressure, mean flow, velocity fluctuations and orifice flow
06 p1038 A70-18065

Orifice effect investigated for sharp flat plate in hypersonic rarefied flow, measuring surface pressure
06 p0982 A70-18366

Pipe orifice conductance for rarefied gas flow measured for specific Knudsen numbers and pressure ratios
06 p1052 A70-18370

Very small diameter laminar flow orifice coefficient calculation as function of Reynolds number
08 p1484 A70-21321

Turbulent jet injection from circular opening into unbounded transverse shear flow, determining velocity distribution along axis
09 p1659 A70-22427

Near-free molecular flow through orifice measured for velocity distribution dependence on Knudsen number and angular position using time-of-flight technique
10 p1918 A70-23969

Flow structure around incurved lateral jet issuing from narrow orifices, determining interaction zone geometry with main current by hot wire technique
10 p1868 A70-24165

Turbine flow meters dynamic calibration employing sinusoidally perturbed orifice flow
12 p2236 A70-28033

Contraction coefficients for compressible discharge through axisymmetric sharp edged orifice, obtaining approximate analytical expression based on one dimensional theory
13 p2389 A70-29549

Jet flow through rectangular orifices in cylindrical wall using conformal mapping for potential, velocity, volume flow rate, viscosity, etc
14 p2567 A70-31359

Hydraulic characteristics of flow through miniature slot orifices for rocket engine injectors, observing stability of effluent liquid streams
16 p2891 A70-33566

Upstream wear of small metal orifices under large pressure drops in phosphate ester hydraulic fluids due to current driven electrochemical corrosion
16 p2919 A70-33629

Kinetic energy correction factor for nonuniform flow at Vena Contracta, using experimental data and modified Bernoulli equation
16 p2892 A70-33639

Shock tube orifice effect on gas flow velocity and pressure drop, using pressure probes and Jenny friction formula
17 p3069 A70-34699

Air jets from sonic orifice, investigating three zones of isochor families by visualization and density measurement
17 p3070 A70-35046

Orifice length-to-diameter ratio effect on spray mixture uniformity from unlike impinging jets
17 p3073 A70-35671

Compressible flow of two component two phase mixtures through convergent nozzles and orifices, determining initially or annular dispersed flow patterns
18 p2329 A70-36231

Knudsen effusion in free molecular flows in supersonic jet during expansion through circular orifice, discussing power and heat transmission
18 p3346 A70-36379

Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas
21 p3745 A70-41742

Supersonic air flow interaction with transverse gas jet from plate orifice
21 p3749 A70-42222

Vortices growth in vortex sheets bounding jets flowing from two dimensional slit and circular orifice observed by computer experiments
24 p4327 A70-46244

ORIFICES

At thermofluid pressure corrections in tubes and at orifices for errors in gaseous pressure measurements by temperature gradients
06 p1113 A70-18371

Orifice diameter for low Reynolds number flowmeter dependent on pipeline diameter tolerances
08 p1482 A70-20684

Liquid rocket engine injector elements design criteria, using noncircular orifice geometry to predict efficiency [AIAA PAPER 70-704]
16 p2967 A70-33565

ORIGINS

Free plane turbulent jet virtual origin using tests determining influence of upstream conditions and nozzle shape
04 p0674 A70-15554

ORION CONSTELLATION

Multicolor photometry of Orion flare stars in U, B, V and R, constructing diagrams confirming flare stars scattering about main sequence
03 p0567 A70-13317

Nebular variables and flare stars in Orion aggregate
03 p0567 A70-13319

Psi Orionis light variations, using photoelectric photometry, indicating ellipsoidal variability
03 p0570 A70-13552

Radiative excitation in planetary and Orion nebulae by solving transfer equations for Lyman line and continuum radiation, using normalized on-the-spot [NOS] approximation
04 p0758 A70-15700

Nonstellar 5 micron source in Orion nebula, noting intensity nonvariance and energy distribution calculation of temperature
08 p1575 A70-21375

Sigma Orionis E hydrogen-deficient atmosphere, using grid of constant-flux model atmospheres to determine abundances of five elements
09 p1755 A70-22504

Orion Nebula region search, giving characteristics and locations of flare type variable stars
10 p1949 A70-25249

Model for FU Orion irregular variable to determine turbulent convection characteristics in atmosphere at optical transparency level
11 p2115 A70-26580

Orion Nebula photographed at H alpha line with half angstrom filter
15 p2807 A70-32805

Orion stars far UV intensities, considering photometric data and electronographic spectra from rocket sounding
17 p3160 A70-34882

Orion nebula core radio recombination line intensities, showing variations in mean electron temperatures and physical conditions
18 p3313 A70-36329

Orion arm local structure and kinematics, discussing outward or inward motion to galactic center and component direction
18 p3329 A70-37177

BM Orionis eclipsing binary spectra, determining radial velocity curve
21 p3890 A70-41161

Orion nebula H alpha/forbidden N II ratio measurement using wide field multislit spectrograph
22 p4101 A70-42857

Narrow band IR photometry of star alpha Orion, testing hypothetical correlation of emission peak with starlight-reflecting silicate dust
22 p4105 A70-43229

Hydrogen I region anomalous alpha lines recombination in Orion B spectrum, identifying carbon emitter by measured frequency separation
24 p4410 A70-45773

ORIONID METEOROIDS

Microparticle collection experiments during 1966 Orionid and Leonid meteor showers accomplished by Luster and ALARR /air launched-air recovered rocket/instruments
08 p1575 A70-21393

Upper atmospheric ion composition during Orionid meteor shower activity by rocket-borne RF mass spectrometer
18 p3247 A70-36183

OROGRAPHY

Friction and orography influence on wave motions in real atmosphere, discussing planetary boundary layer and propagation in free atmosphere
09 p1718 A70-23331

Earth orography shape effect on cyclogenetic properties of atmosphere noting mountain height, slope, and mass thermal properties, etc
10 p1913 A70-25196

Atmospheric pressure variations as function of vertical movements caused by friction and orography, considering numerical forecasting
11 p2076 A70-26073

Nonlinear orographic waves in atmosphere, investigating influence of meteorological parameters, temperature jump, incident flow and ridge geometry on flow patterns
12 p2263 A70-27517

Computer plotting of flow patterns and orographic cloud over/in lee wave flow, including rotors, blocking and high level turbulence
12 p2264 A70-27722

Tropical circulation structure and energetics from numerical time integration of global atmospheric model with realistic orography
19 p3462 A70-38257

Nonlinear orographic waves in atmosphere, investigating influence of meteorological parameters, temperature jump, incident flow and ridge geometry on flow patterns
21 p3846 A70-41165

Wind directions in free atmosphere and on ground, discussing deflections by orographical factors in Upper Rhine plain
22 p4065 A70-43245

Orography and friction effects on numerical forecast of atmospheric pressure variation
24 p4370 A70-45112

ORRERIES

U ASTRONOMICAL MODELS

ORTHICONS

NT IMAGE ORTHICONS

ORTHO HYDROGEN

Thermal separation of ortho and para hydrogen and deuterium, discussing kinetic theory of nonspherical molecules in terms of rotational collision numbers
22 p3983 A70-43154

ORTHOGONAL FUNCTIONS

Orthogonal polynomials in three dimensional contact problems without friction, discussing construction of kernels over finite and seminfinite intervals
08 p1594 A70-21634

Book on information transmission by orthogonal functions covering mathematical foundations, direct signal transmission, carrier transmission, statistical variables, etc
09 p1636 A70-23125

Simultaneous singular integral equations approximate solution in orthogonal polynomials
10 p1909 A70-24603

Orthogonal expansion of multivalued functions for weights in threshold function realization
15 p2767 A70-31838

Generalized spectral analysis method implementing orthogonal transformations through Kronecker product representation and matrix factorization
15 p2767 A70-32099

Soviet book on statistical analysis of meteorological elements based on expanding natural orthogonal functions covering horizontal, vertical and time distributions including applications
15 p2772 A70-32842

F 2 region critical frequency diurnal variation forecasting, using series expansion of natural orthogonal components
19 p3409 A70-37327

Geomagnetic Sq variation examination, using field expansion into natural orthogonal component series
23 p4188 A70-44063

ORTHOGONALITY

Orthogonality of aircraft natural vibration modes by calculating complete matrix of generalized masses [DGLR-69-59]
04 p0774 A70-15150

Perturbation effects on elastic material deformation due to nonorthogonality of curves defining curvilinear aeolotropy, with application to circular cylindrical tube
05 p0929 A70-16065

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field
07 p1296 A70-18765

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field
18 p3271 A70-37109

Orthogonality of eigenmodes of aircraft vibrations based on F-104G ground measurements
23 p4274 A70-44766

ORTHOGRAPHY

Universal Automatic Map Compilation Equipment /UNAMACE/ for terrain altitudes determination on uniform and dense grid in stereo model to obtain orthophotographic projection
11 p2051 A70-26042

ORTHONORMAL FUNCTIONS

Trigonometric interpolation of polynomials by Lagrangian type orthonormal functions, noting satellite geodesy applications
10 p1909 A70-24185

Three dimensional elasticity by Ritz method, using coordinate system orthonormalized in energy metric of operator to avoid precision loss
10 p1957 A70-24511

ORTHOPHOTOGRAPHY

Optimum image scale and longitudinal overlap in continuous orthophoto map production regarding

ORTHOTROPIC CYLINDERS

sheet dimensions, instrumental ranges, flight path tolerances and ground relief
13 p2407 A70-29165

ORTHOSTATIC TOLERANCE

Ventilation function, pulse rate and blood pressure measured for adaptation to vertical upright and head-down positions
07 p1201 A70-18794

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia
07 p1209 A70-19513

Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion
07 p1209 A70-19517

Antigravitation suit effects on rheoencephalography changes during Valsalva maneuver and horizontal-passive orthostatism transition in humans
07 p1212 A70-19738

Human physiological responses to lower body negative pressure /LBNP/, studying presence or absence of change for orthostatic tolerance as function of time
07 p1222 A70-19933

Orthostatic tolerance in humans increased by lower limb muscles electrostimulation, correlating subjective feelings with heart and pulse rate measurements
09 p1615 A70-22089

Orthostatic tilt tolerances in young men and women noting heart rates and blood pressure
09 p1627 A70-23454

Amphetamine, caffeine and securinine effects on hypodynamic syndrome in subjects during orthostatic tests and transverse G-forces under prolonged hypokinesia
10 p1817 A70-24690

Electrocardiac activity, myocardium and hemodynamic disorders in subjects after prolonged hypodynamia with or without physical exercises and during orthostatic test
10 p1817 A70-24692

Cardiovascular reactions and orthostatic stability during hypodynamia determined from ECG, seismocardiograms, phonocardiograms, sphygmograms and tachy-oscillograms
10 p1817 A70-24694

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia
11 p1988 A70-26112

Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion
11 p1988 A70-26116

Incremental lower body negative pressure as assay method for human orthostatic tolerance
11 p1992 A70-26518

Physiological reactions of humans to orthostatic heat tolerance and natural acclimatization in summer and winter using tilt-table test and bicycle ergometer
12 p2169 A70-27656

Nine-alpha-fluorohydrocortisone preventing bedrest induced orthostatism, considering plasma volume decrease effects on cardiovascular performance
13 p2358 A70-29433

Position dependent variations in intrapericardial, pleural and esophageal pressures and cardiac output in thorax of dogs
13 p2356 A70-29946

Orthostatic tolerance in humans increased by lower limb muscles electrostimulation, correlating subjective feelings with heart and pulse rate measurements
15 p2685 A70-32685

Minnesota Impedance Cardiograph method evaluated by applying to cardiac output measurements in postural stress studies
17 p3031 A70-35431

Orthostatic tolerance increase in animals by application of hyperoxic and hypercapnic gas mixtures
20 p3574 A70-40185

Orthostatic stability reduction in experiments with simulated weightlessness, investigating functional compensation mechanisms
23 p4149 A70-45025

Syncope prevention in orthostatic heat test by inflating cuffs around legs and lower abdomen
24 p4306 A70-45331

ORTHOTROPIC CYLINDERS

Strain rates and stresses relations in plasticity theory for consolidatable orthotropic bodies having three elastic planes of symmetry
02 p0389 A70-12686

Axisymmetric problem analysis for cylindrically anisotropic elastic bodies with restricted orthotropy based on Love-Lekhnitsky stress function generalization
03 p0601 A70-14327

Elasticity theory of orthotropic materials applied to steady rotation of long cylindrical tubes of filament reinforced plastics
03 p0602 A70-14331

Thin orthotropic composite circular cylindrical shells buckling under axial and radial loads, satisfying

end boundary conditions for clamped and simply supported shells
[ASME PAPER 69-WA/APM-21]

04 p0771 A70-14910
Material coupling in two layered orthotropic cylindrical shell subjected to normal external pressure

04 p0778 A70-15547
Thick walled orthotropic cylinder subjected to internal pressure analyzed for stress distribution and creep rates, using constitutive equations and Norton law

07 p1416 A70-20234
End plugs bending moment and shear loads reduction during compression tests of composite orthotropic cylinders

08 p1594 A70-21889
Eccentrically stiffened orthotropic cylinders with intermittently attached stiffeners under bending and axial load, analyzing instability and buckling

13 p2518 A70-29966
Anisotropic axisymmetric elastic shell theory including transverse stress effects, with application to orthotropic cylinder

19 p3545 A70-38337
Stress distribution at hole in orthotropic cylindrical sandwich shell under internal pressure

20 p3734 A70-40440
Orthotropic fiberglass-reinforced plastic cylindrical shell with allowance for material creep, calculating stress-strain state during bending under external pressure

21 p3842 A70-40649

ORTHOTROPIC PLATES

Buckling of orthotropic sandwich plates derived for sixth order governing differential equation by variational theorem

01 p0204 A70-11139
Clamped skew plates of orthotropic material under transverse load analyzed by stationary potential energy method and compared with isotropic case

01 p0205 A70-11140
Strain rates and stresses relations in plasticity theory for consolidatable orthotropic bodies having three elastic planes of symmetry

02 p0389 A70-12686
Frozen stress techniques for photoelastic analysis of orthotropic plate on nonlinear foundation, providing results to compare with future finite element analysis

03 p0480 A70-12952
Stability analysis of orthotropically symmetric strip under uniformly distributed compressive forces applied to shorter ends, deriving critical load formula

03 p0590 A70-13402
Stress-strain relations for rigidly sealed orthotropic planes with finite number of slits

03 p0592 A70-13447
Natural oscillation frequencies lower bounds of orthotropic plates determined as coupled elastic systems

03 p0592 A70-13451
Boundary value problems for orthotropic half plane and infinite orthotropic plane with cuts, considering loads at various points

03 p0593 A70-13497
Shear testing and data reduction based on torsion analysis to obtain elastic shear constants of thin orthotropic Be sheets

04 p0664 A70-15552
Shear wave and plate velocity expressions derived for orthotropic elastic plate with shear coupling, considering propagation direction

07 p1412 A70-19961
Temperature and stress fields in orthotropic plate with partial surface insulation, examining boundary conditions

09 p1777 A70-23078
Bending of homogeneous orthotropic rectangular plate of variable thickness supported on opposite edges, obtaining solution as Fourier series

10 p1955 A70-24083
Thermal stress concentration in constant thickness orthotropic plate with rounded square hole

12 p2323 A70-27338
Glass fiber reinforced thin rectilinear orthotropic plastic plates bending using finite difference method with allowance for creep

12 p2324 A70-27531
Orthotropic plates bending with shallow and sharp fillets, determining normal stresses

12 p2325 A70-27533
Iteration procedures for boundary value problem of orthotropic rectangular plate under bending loads, discussing convergence of procedures

12 p2325 A70-27552
Shear buckling and uniaxial compression dependence on mechanical properties of clamped orthotropic plates, using Ritz method to compute bifurcation type loads

12 p2326 A70-27817
Finite element displacement method for elastoplastic bilinear strain hardening orthotropic plates and shells, comparing initial and tangent stiffness

14 p2660 A70-31136

Clamped orthotropic rectangular sandwich plates bending using approximate solution

14 p2661 A70-31429

Homogeneous orthotropic cantilevered rectangular plate with reinforcing ribs, calculating flutter in supersonic gas flow

18 p3336 A70-36140

Buckling of fiber reinforced composite orthotropic plates

18 p3343 A70-36706

Elastic bending, vibration and buckling of simply supported thick orthotropic rectangular plates and laminates

22 p4116 A70-43205

Transverse bending of orthotropic glass fiber reinforced plastic plates under uniformly distributed loads

22 p4120 A70-43720

Elastic orthotropic plates vibration analysis by finite strip method via eigenvalue matrix, obtaining natural frequencies and modal vectors by small computer

24 p4423 A70-45579

ORTHOTROPIC SHELLS

NT CYLINDRICAL SHELLS

Natural oscillation frequencies of closed circular orthotropic cylindrical shells having freely supported end faces, particularly with stringers

01 p0210 A70-11413

Strain rates and stresses relations in plasticity theory for consolidatable orthotropic bodies having three elastic planes of symmetry

02 p0389 A70-12686

Orthotropic cylindrical shell with initial deflection under long term effect of external hydrostatic pressure, solving bending problem

02 p0390 A70-12809

Elastic orthotropic fiberglass reinforced plastic shells stability under axial compression, analyzing shear modulus influence

04 p0712 A70-14490

Orthotropic axially compressed conical shell stability, evaluating lower critical load and postbuckling state

04 p0772 A70-14921

Orthotropic sandwich cylinders buckling under axial compression, presenting linear theory approximate design equations

04 p0776 A70-15381

Heated isotropic shallow shells results extended to solving nonlinear problem in bending theory of orthotropic shallow shells clamped, heated and under pressure

05 p0927 A70-15993

Geometrically linear anisotropic shell deformation under transverse shear applied to stability analysis of orthotropic shells of revolution sustaining axisymmetric stresses

05 p0933 A70-16212

Stress-strain state of circular orthotropic shells under bending, considering distributed loads applied to shell center

05 p0934 A70-16217

Stability analysis of deflected shallow thin walled elastic noncircular conical and cylindrical orthotropic shells using straight lines method

06 p1167 A70-17865

Shallow orthotropic shell of rectangular planform with edges under dynamic load, studying forced vibrations by anisotropic shell theory

07 p1403 A70-19057

Natural vibration frequencies and mode shapes for laminated orthotropic shells of revolution using finite element method

07 p1411 A70-19951

Multilayer orthotropic conical shell cyclic deformation equation obtained in hypergeometric functions

09 p1777 A70-23079

Axisymmetric free vibrations of orthotropic cylindrical shell loaded on ends by constant axial force, investigating nonlinear elasticity

09 p1785 A70-23625

Solutions existence for nonlinear partial differential equations describing orthotropic and nonlinear shallow shells under loads and temperature effects

10 p1954 A70-24019

Finite deformations of flexible inelastic orthotropic shells of revolution for generalized plastic flow and deformation theories

10 p1955 A70-24079

Truncated, structurally orthotropic and round conical shell oscillations taking into account reinforcing ribs eccentricity

10 p1964 A70-25195

Clamping edges effect on critical parameters of cylindrical orthotropic shell under axial compression using undetermined Lagrange multipliers

11 p2130 A70-25567

Transient bending and shear stresses at clamped support of orthotropic circular cylindrical shells

11 p2135 A70-25985

Stability analysis of ring-stiffened orthotropic, multilayered shells of revolution under axisymmetric torsionless loads by digital computer

12 p2320 A70-27143

Pressurized orthotropic cylindrical membrane shells free and forced vibration, considering dynamic response dependence on internal pressure

12 p2326 A70-27815

Strain induced in laminated orthotropic fiberglass plastic cylindrical shell by normal concentrated load, using equations free from rectilinear normals hypothesis

12 p2328 A70-28279

Linear compressive orthotropic stability theory for shallow-stiffened cylinders

13 p2518 A70-30022

Finite element displacement method for elastoplastic bilinear strain hardening orthotropic plates and shells, comparing initial and tangent stiffness

14 p2660 A70-31136

Composite orthotropic cylindrical shells linear thermoelastic equations solution for fixed end boundary conditions, noting heterogeneity effects on stress distribution

17 p3184 A70-34909

Long orthotropic pressurized circular cylindrical shell under radial line loads along equally spaced generators, analyzing stresses and deflections by linearization

19 p3545 A70-38338

Structurally closed orthotropic circular cylindrical reinforced shell stability, developing approximate method to obtain various boundary conditions

20 p3727 A70-39886

Orthotropic shells under arbitrary loads, deriving approximation equations

20 p3734 A70-40436

Circular cylindrical orthotropic fiberglass-reinforced shell buckling under longitudinal impact, assuming initial surface imperfections

22 p4117 A70-43347

Curved element approximation of orthotropic axisymmetric thin shells under axial loads

24 p4419 A70-45152

ORTHOTROPISM

Constitutive equations for orthotropic bilinear elastic materials in plane stress case, discussing unidirectional composites

03 p0587 A70-13127

Book on analysis of laminated composite structures covering orthotropic materials stress-strain relations, laminated composite shells, plates, beams and columns

05 p0938 A70-16467

Deformation theory for small elastic-plastic strains in orthotropic material and discretization and iterative solution techniques

11 p2144 A70-26684

Strength conditions for orthotropic Hooke law materials with complex elasticity, giving elastic potential boundary values in tensor form

12 p2325 A70-27560

Orthotropic fiberglass reinforced plastic deformation during stretching with allowance for binder breakdown in transverse layer

12 p2259 A70-28283

Nonlinear electromagnetic constitutive equations with coupling to thermal gradients for holohedral and hemihedral materials, extending analysis to orthotropic media

19 p3552 A70-37786

Yield condition and Bauschinger effect in transition conditions for isotropic and orthotropic bodies

19 p3542 A70-38061

Equations of state in quadratic viscoelasticity for orthotropic media, deriving tensors of creep and relaxation centers

22 p4119 A70-43711

Incremental complementary energy method of stress analysis of orthotropic nonlinear materials having different behavior in tension and compression [AIAA PAPER 69-119]

23 p4270 A70-44563

OSCILLATING CYLINDERS

Natural oscillation frequencies of partially liquid-filled cylindrical shells determined by resonance method

03 p0592 A70-13444

Stationary and vibrating circular cylinders for boundary layer separation point, determining vortex excited oscillation range

04 p0670 A70-14988

Periodic drag of vibrating cylinders as function of excitation amplitude and frequency, noting similarity to nonlinear oscillator subjected to forced vibration

04 p0691 A70-15148

Interaction of infinite shallow draft cylinder oscillating at free surface with train of oblique waves

04 p0618 A70-15321

Transverse oscillation periods of cylinder containing flowing fluid obtained by solving nonlinear partial differential equations describing transverse and longitudinal motion

08 p1592 A70-21480

Acoustic radiation produced in response to harmonically oscillating circular cylinder rotating in viscous fluid solved within Lighthill-Curle formalism for aerodynamically generated sound

09 p1726 A70-22391

Oscillating infinite cylinder as acoustic waves source in homogeneous viscous medium, deriving scalar and vector potentials 12 p2274 A70-28240

Unsteady aerodynamic forces on oscillating circular cylinder, using wind tunnel two dimensional dynamic model 14 p2529 A70-31050

Unsteady flow and heat transfer in viscous incompressible fluid due to infinite porous cylinder oscillations about axis with suction at surface 19 p3406 A70-38445

Two dimensional boundary layer growth with suction for oscillating circular cylinder, considering stream functions and phase angles 24 p4326 A70-46002

OSCILLATING FLOW

Inviscid surface pressures calculated on slender wedges and cones at low frequencies and large oscillation amplitudes in hypersonic flow 01 p0003 A70-10854

Pulsation frequency affecting boundary layer separation from channel wall in incompressible fluid flow calculated by equation 03 p0466 A70-13399

Incompressible viscous fluid rectilinear flow along arbitrary cross section duct under pressure gradients oscillating at large frequencies 03 p0468 A70-14147

Pulsatile flows in living animals and model arteries, discussing flow profiles, instability and wall shear 03 p0430 A70-14244

Instantaneous heat transfer from oscillating wire in free convection in still air as function of time [ASME PAPER 69-WA/HT-15] 04 p0783 A70-14819

Inviscid flow through staggered airfoil cascades in oscillatory and distorted flow simulating axial flow compressor [AIAA PAPER 70-131] 06 p0969 A70-18049

Supersonic wind tunnel flow discontinuities effect on oscillatory pressures 07 p1257 A70-19338

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method 08 p1485 A70-21632

Natural oscillation frequencies of subsonic gas flow past plate array, solving eigenvalue problem by splicing method 09 p1603 A70-22117

Nonlinear equations for large fluid oscillations in axisymmetric rotating cavities with radial partitions 09 p1660 A70-22438

Gas flow from nozzle into duct with enlarged cross section investigated for flow pattern and boundary conditions, noting oscillation behavior 10 p1799 A70-24123

Plane Couette oscillating flow stability to small disturbances under composed unsteady velocity at high Reynolds number 10 p1868 A70-24197

Viscous incompressible flows nonlinear stability theory, considering perturbed flows tending toward stationary or flow periodic in time [ONERA-TP-802] 10 p1869 A70-24542

Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique 11 p1976 A70-25974

Three dimensional periodic boundary layer flow noting successive approximations method, noting steady streaming in first order cross flow 11 p2037 A70-26296

Aerodynamic loadings on planar wings in oscillatory subsonic flow determined by collocation for performing Gaussian quadrature integration of pressure and kernel functions 12 p2155 A70-27102

Incompressible two dimensional and axisymmetric oscillating laminar boundary layer flows approximated by momentum integral equation, discussing flow along flat plate 12 p2158 A70-28205

Free convection flow and heat transfer from semi-finite horizontal flat plate with time-oscillating temperature, using successive approximations process 13 p2522 A70-29537

Oscillatory flow in porous channel with suction and injection, using Laplace transform technique 13 p2389 A70-29538

Interfacial and free surface mode instabilities of time periodic flows of viscosity and density stratified fluids at various Froude numbers 14 p2566 A70-31026

LF oscillatory convection characteristics in polytropic atmosphere in strong magnetic field based on sunspot theory 15 p2802 A70-32487

Admittance calibration of short HF through flow pneumatic lines, using hot-wire anemometer [ASME PAPER 70-FE-10] 16 p2891 A70-33628

Compression and expansion characteristics of steady supersonic flow passing along yawing slender body of rotation, linearizing differential equations 18 p3207 A70-36382

WKB method for asymptotic oscillatory solutions of nonlinear equations of relativistic fluid mechanics 19 p3403 A70-37587

Unsteady incompressible planar gas jets with stable vortex street, investigating near flow field region to establish oscillatory component 19 p3404 A70-37799

Boundary layer oscillatory flow interaction with nonuniformly rotating lamina, calculating velocity distribution and transitional frequencies 19 p3406 A70-38443

Sound field produced in uniform moving ideal fluid stream by nonuniform oscillating elastic wall 19 p3353 A70-38657

Oscillatory flow in turbulent boundary layer modeled by eddy viscosity distribution, deriving mass transport velocity induced by progressive and standing waves 20 p3608 A70-39358

Wedge angle large amplitude slow oscillations in hypersonic and supersonic flows, examining attached bow shock 20 p3559 A70-40288

Elastoviscous incompressible electrically conducting oscillating free stream flow along infinite porous plate with suction in transverse magnetic field 20 p3685 A70-40508

Resonance tube fluid dynamics, examining oscillation start and growth by wave diagram and gas-speed/sound-speed diagram 21 p3807 A70-41244

Rectangular wing with oscillating control surface, measuring induced unsteady pressure field for comparison with computations based on lifting surface theory 21 p3935 A70-41407

Maxwellian fluid oscillating flow in thin walled elastic circular tube as function of tube dimensions, elastic properties, oscillation frequency, etc 21 p3810 A70-41963

Forced harmonic vibrations of clamped circular plate in inviscid fluid, calculating radiation pressure and power distributions 22 p4073 A70-42646

Thermal boundary layer near stagnation point in three dimensional fluctuating incompressible flow, using Lighthill method 22 p4124 A70-42685

Time-mean velocity and skin friction of laminar boundary layer near two dimensional stagnation point with oscillating oncoming flow 22 p4010 A70-42686

Expiratory gas flow oscillations during forced vital capacity maneuvers in atmospheres of various composition and pressure 22 p3981 A70-43702

Thermal-acoustic oscillations in forced convection, giving time delay analog for perturbation feedback 23 p4280 A70-44369

Cryogenic fluid heat exchanger flow oscillation automatic feedback control, discussing design and simulation 23 p4280 A70-44370

Oscillatory flow measurements by directionally sensitive laser velocimeter, discussing concept, design and construction 23 p4197 A70-44473

Oscillating viscous conducting fluid laminar flow between parallel nonconducting infinite porous flat plates under suction in transverse magnetic field 24 p4383 A70-45146

OSCILLATION DAMPERS

Single degree of freedom nutation damper motion instability on dual spin stabilized spacecraft ascribed to parametric excitation by transverse angular rates 04 p0764 A70-15585

Liquid filled dampers for nutation damping of spacecraft with momentum wheel for attitude stabilization 06 p1154 A70-17163

Cross coupled rotational motions of free solid body carrying nutation-damping pendulums 07 p1335 A70-19808

Active and passive geomagnetic rate dampers for attitude control systems of geomagnetically, gravitationally or spin stabilized spacecraft 09 p1766 A70-22936

Dual spin satellite stability with four mass nutation damper 12 p2314 A70-27842

Nutation damper for dual-spin spacecraft, considering various two degree of freedom systems with two natural frequencies 14 p2655 A70-31367

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect [AIAA PAPER 69-857] 15 p2812 A70-32508

Book on passive gravity gradient libration dampers covering design, flight experience, evaluation criteria, performance monitoring, failure prevention, etc 16 p2983 A70-33954

Spacecraft gravity gradient stabilization by damping out oscillatory motions by energy dissipation, using combined eddy current and hysteresis dampers / Combination Passive Damper/ 16 p2985 A70-34133

Ball in tube nutation damper for spinning satellite, describing design, testing and fabrication techniques for achieving low friction level 16 p2985 A70-34136

Dynamic behavior of eccentric annular mercury nutation damper, using variational principle of least viscous frictional power loss 17 p3023 A70-34770

Surface oscillations energy and attenuation in damped spectral region of semibounded degenerate electron plasma 18 p3293 A70-36143

High speed and long life bearings and dampers for future jet engines, considering design factors [SAE PAPER 700318] 18 p3263 A70-36800

Gravitational effects on impact damper performance, discussing dynamic stability and kinematically viable periodic motion and resonant conditions 20 p3717 A70-38975

Variable parameter nutation damper SAS-A dual spin satellite, discussing design and expected in-flight performance by digital simulation [AIAA PAPER 70-972] 20 p3669 A70-39557

Aircraft vertical gyro with hydraulic damping device, calculating ballistic deviations limitation conditions 20 p3632 A70-39733

Magnetic damper motions in rapidly spinning satellite 21 p3927 A70-40833

Dual spin bodies stability, controlling nutation by passive damper fitted to despun platform 22 p4110 A70-42486

Electronic damped plasma oscillations eigenfrequency in presence of external electric field 22 p4082 A70-43253

Sliding mass and damper boom damping mechanisms for gravity-oriented satellites, using method of characteristic roots coalescence 22 p4110 A70-43436

Automatic control systems small oscillations suppression by nonlinear correcting elements 22 p4005 A70-43564

Large amplitude high phase velocity oscillations anomalous damping in electron-ion plasma resulting from MHD instability 24 p4387 A70-46091

Mathematical pendulum oscillations under clockwise and counterclockwise impact impulse, deriving differential equations describing trajectories 01 p0141 A70-10153

Soviet book on oscillations of quasi-linear time lag systems, emphasizing asymptotic methods in nonlinear oscillation theory 02 p0340 A70-12826

Random function theory for determining influence of system oscillation characteristics on load distribution 02 p0324 A70-12852

Liquid film stability relation to angle of attack oscillations during reentry body deceleration 03 p0406 A70-12939

Nonlinear systems periodic oscillations with resonance from differential equations solutions 04 p0720 A70-15258

Earth bow shock and magnetopause oscillatory motions with respect to positions assumed under quiet solar wind conditions, discussing satellite observations 05 p0840 A70-16586

Illusions of rotation perception with oscillating trapezoid and oscillation perception with rotating trapezoid, correlating magnitudes 05 p0807 A70-16673

Resonant oscillations of coupled physical pendulums, investigating phase trajectories by Struble method 08 p1544 A70-20964

Radiative relaxations of chromospheric oscillations generated by granule, assuming isothermal atmosphere and linearizing equations of motion 08 p1576 A70-21395

Human biological organism analysis based on physiological determination of regulating and control functions dependence on oscillatory properties 08 p1452 A70-21460

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode 08 p1485 A70-21633

Oscillatory transverse and longitudinal magnetostriiction in single crystal Bi, obtaining deformation potentials 08 p1557 A70-21838

Magnetothermal oscillations in pressure-annealed pyrolytic graphite, relating period with angle between magnetic field and crystal c axis 08 p1557 A70-21839

Relaxational oscillations produced by interaction between rarefaction wave in external two dimensional supersonic flow and turbulent near wake 09 p1603 A70-22426

Nonlinear periodic oscillations problem solved by solving nonlinear operator equations, discussing iterative methods based on equations linearization 09 p1728 A70-22668

Si avalanche diodes oscillations external current waveform measurement using coaxial current monitoring assembly with negligible phase error 10 p1849 A70-24234

Hertzian differential polarimeter-clipsonometer with single detector designed for multiwave oscillations analysis 10 p1888 A70-24477

Oscillations of longitudinal magnetostriction in silver and copper single crystals at low temperature 11 p2098 A70-25619

Initial parameter conditions influence on sustained unstable oscillations of attitude control system for large space vehicle, calculating stable region by nonlinear method 11 p2124 A70-26149

Nonlinear control systems on-off oscillations with instants of commutation determined by simultaneous equations, noting feedback control 11 p2027 A70-26254

Hydraulic piston-valve-type slave mechanism oscillations with rigid feedback and inertial load at actuated shaft, using harmonic linearization method 12 p2167 A70-28340

Limit cycle oscillations in satellite attitude control system, producing control moment by pulse modulated controller 13 p2502 A70-28430

Soviet book on theory of oscillations of linear and nonlinear time lag systems 13 p2450 A70-28699

Oscillatory perturbed motion of elastic body in general relativity space time, discussing energy tensor, unitary speed vector and density 13 p2451 A70-28954

Multiple period oscillations in nonlinear systems, using nonautonomous differential equations and Hammerstein operator 13 p2443 A70-29745

GaAs junction lasers output oscillations, analyzing time dependent equations for low temperatures 14 p2593 A70-30335

Oscillations and stability of rotating masses for axisymmetric equilibrium configurations with toroidal magnetic field based on virial equations 14 p2642 A70-30886

GaAs Gunn devices oscillatory modes under various operating conditions 14 p2557 A70-31158

Monograph on nonlinear oscillation equations resonance solutions and solution stability, considering Green matrix, differential equations reduction to integrodifferential equations, etc 14 p2618 A70-31417

CW oscillation in carbon monoxide chemical laser 15 p2748 A70-31432

Semiconducting gallium arsenide LF oscillations, considering domain behavior and illumination effects 15 p2783 A70-31972

Difference schemes approximating boundary value problem for heat conductivity and oscillation equations, considering brute force method stability 16 p2951 A70-33245

Oscillatory and wave processes in nonlinear distributed systems by asymptotic method analogous to Bogoliubov concentrated systems 16 p2951 A70-33252

Pisarenko generalized equations for hysteresis loop contour applied to oscillations of one degree of freedom system 17 p3137 A70-35710

Current oscillations of GaAs Gunn diodes over wide voltage range, discussing diode behavior dependence on polarity and applied voltage 18 p3230 A70-36197

Oscillations of rigidly clamped elastic liquid filled hemispherical shell with gas bubble 18 p3242 A70-36583

Large scale galactic oscillations, discussing observational evidence and theoretical modal calculations 18 p3330 A70-37191

Algorithm for steady state oscillations in irregular waveguide structures with conducting walls 19 p3470 A70-37427

Quasi-static thickness-shear approximation of radiation of electromagnetic energy accompanying oscillation of piezoelectric crystal plates 19 p3487 A70-37945

Oscillations of nearly nonlinear systems with conditions for main amplitude equations 19 p3472 A70-38726

Resonant oscillations of coupled physical pendulums, investigating phase trajectories by Struble method 20 p3672 A70-39386

Quasi-periodic ionospheric oscillations associated with nuclear explosions, thunderstorms and quiet conditions 21 p3814 A70-40938

Vertical oscillations in solar temperature minimum suggested as acoustic-gravity waves modes dependent on height at chromosphere-corona interface 21 p3926 A70-42196

Thermally induced oscillations and negative resistance in seminsulating oxygen-doped GaAs double injection devices via heating beyond critical temperature 22 p4084 A70-42326

Striations due to mechanical oscillations in fast wire explosions, using dispersion for elastic waves in solid cylinders 22 p4074 A70-43002

Low gravity fuel sloshing in axisymmetric rigid tank, calculating oscillations by modified Galerkin method 24 p4324 A70-45292

Hough eigenfunctions of lunar diurnal and semidiurnal atmospheric oscillations using matrix and group methods 24 p4328 A70-45351

Delay times elimination in pulse operated X band Gunn effect oscillators, using RF power injection 01 p0050 A70-10463

Microwave circuit for increasing Gunn oscillators injection locking capabilities and reducing FM resulting from bias-voltage fluctuations 01 p0050 A70-10783

Self excited oscillators zero crossing times distribution for Markov process formulated as boundary value problem involving Kolmogoroff backward equation 01 p0143 A70-10891

Random vibration of interconnected systems, analyzing power flow and energy levels in linear oscillator interacting with environments, using Thevenin-Norton representations 01 p0207 A70-11161

He isoelectronic sequence 3d-nf transitions, determining UV wavelengths and oscillator strengths 04 p0739 A70-14601

Equivalent circuit for acoustoelectric oscillator providing practical device analog, discussing oscillation suppression and resonant frequency changes under reactive load 04 p0656 A70-14719

Fluidic oscillator use as volume flowmeter, discussing effects of setback, aspect ratio, splitter distance and feedback location on oscillation frequency [ASME PAPER 69-WA/FM-3] 04 p0688 A70-14840

Fluid oscillators for sensing and missile control, discussing performance, design, frequency variation and applications [ASME PAPER 69-WA/FLCS-8] 04 p0626 A70-14845

Kinetic, potential and dissipative energies computed in systems of randomly excited coupled oscillators, using Liapunov stability method 05 p0821 A70-16407

Phase, frequency and amplitude fluctuations in avalanche diode oscillators, studying noise origin 05 p0823 A70-16883

Inertial parameters and functions of dissipative and restoring forces in quasi-linear oscillatory system determined from free motion characteristics 05 p0884 A70-16951

Analytical expressions for amplitude and frequency modulation characteristics of bias modulated tunnel diode oscillator on steady state mode 06 p1022 A70-17836

Equivalent scheme for tunnel diode oscillator operating mode and parameters effect on LF modulating signal phase correlations 07 p1241 A70-19287

CW high power operation of transferred-electron oscillators realized by low thermal resistance, describing fabrication 07 p1241 A70-19300

Millimeter wave CW Gunn oscillators construction by packaging free from spurious resonance, using sapphire ring and Au cap 08 p1468 A70-20482

Wideband tunable CW Gunn effect oscillator design, discussing microwave circuit effects on performance 08 p1471 A70-20788

Ti I spectrum oscillator strengths, determining formula for relative-absolute values transition 08 p1569 A70-20832

TRAPATT oscillator circuit characteristics determined from measurements and equivalent circuit calculations 08 p1475 A70-21277

Microstrip oscillator circuit design for operating with high power/efficiency avalanche diodes, describing low pass filter tuning section role 08 p1475 A70-21278

Circuit allowing direct combining of power from several avalanche diodes, discussing CW power output, single and multiple diode oscillators, etc 08 p1477 A70-21295

Oscillator strengths of Fe II lines and solar iron abundance measured by arc burning in Ar with iron chloride admixture 08 p1576 A70-21398

Monograph on normal frequency generator serving devices measuring differential Doppler effect, discussing generator design for ionospheric research satellites frequencies 09 p1645 A70-22531

Ferrimagnetically tunable transistor oscillator in common collector configuration 09 p1645 A70-22603

X band Gunn oscillators amplitude modulation by pulse signals from another Gunn diode 09 p1646 A70-22707

Fabrication effects on current instability during injection and breakdown of p-n junctions in GaAs oscillators 09 p1740 A70-23351

Amplifier properties and oscillator mode structure of multipath carbon dioxide laser 09 p1699 A70-23538

Book on lasers, light amplifiers and oscillators covering optical resonators, optical pumping, pulsed lasers, etc 09 p1700 A70-23541

Born approximation used in calculating wave functions of helium atom for determining generalized oscillator strengths in first ionized continuum of helium 10 p1919 A70-24072

Gunn oscillator current noise correlation with frequency modulation noise 10 p1848 A70-24230

Oscillator strengths relative values determined from flame atom absorption line sensitivity measurements 10 p1828 A70-24259

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator 11 p1996 A70-25349

Forced oscillations of oscillator matched to transistor as active element, obtaining stability conditions by Liapunov first method 11 p2018 A70-25945

Maxima increases without limit in damped linear oscillator response to random wideband excitation interpreted by heuristic explanation 11 p2085 A70-26694

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators 11 p2020 A70-26819

Dynamic behavior and moments of oscillatory systems under steady perturbations using linear differential equations 12 p2261 A70-27555

Gunn oscillator voltage supply influence on domain capacity, considering frequency stability 13 p2377 A70-29302

Self excited cavity oscillators with tunnel and parametric diodes and nonequilibrium medium, noting single and multimodes, energy capabilities and frequency interactions 13 p2366 A70-29405

Oscillators frequency instability and spectral purity relations [ONERA-TP-829] 13 p2383 A70-29637

Frequency synchronization of far spaced high stability oscillators with aid of meteor trails, discussing signal retranalysis and duplex methods 14 p2636 A70-30321

HF backward wave oscillators with emphasis on limiting factors in millimeter waves generation, discussing ohmic and circuit imperfection losses 14 p2555 A70-30430

Bulk n-type InP single crystal transferred- electron oscillators, investigating current instabilities 14 p2556 A70-30686

Equivalent linearization for random vibration, considering stationary statistics of bilinear hysteretic one degree of freedom oscillator response 14 p2661 A70-31428

Matrix analysis of discretized dynamical system with constraints, considering case of damped oscillators 15 p2774 A70-31697

Voltage-frequency conversion technique using FM principle and RF oscillator beating with crystal oscillator output 15 p2705 A70-32705

Frequency instability of oscillator perturbed by internal thermal noise [ONERA-TP-838] 16 p2872 A70-33105

Univibrator analysis with glow discharge thyatrons, increasing time lag for equal R and C values 16 p2873 A70-33237

Self excited systems limiting states with traveling wave, analyzing oscillator moving along string under tension 16 p2990 A70-33781

Fluidic oscillator molecular weight of flowing mono- and polyatomic gases, discussing frequency dependence on pressure drop and temperature 17 p3081 A70-34515

Hysteresis effects during retuning of n-type GaAs Gunn oscillator with bias source and LCR circuit, showing range of domain damping by low field 17 p3055 A70-35689

Equivalent radioelectric plan of ammoniac maser marginal type oscillator 18 p3265 A70-35946

Equivalent circuit of Gunn oscillators for quenched domain mode operation, noting optimal working conditions 18 p3229 A70-36668

Giant pulses in passively Q switched laser oscillator, calculating time constant of light flux exponential increase 18 p3270 A70-36953

Random vibration first threshold crossing probability density function for linear oscillator 19 p3427 A70-38038

Axiomatic approach to homeostasis, discussing living systems as oscillators with input-output and transit variables in duration and elongation 19 p3365 A70-38411

Matrix condenser for tuning hybrid thin film self excited quartz oscillator with common base transistor configuration, discussing electrical properties and fabrication 20 p3597 A70-39257

Transistorized quartz oscillators, testing frequency and amplitude stabilities and functions of input and output capacitances, supply voltage and feedback 20 p3597 A70-39258

Voltage programmed RF oscillator (VPO) for spaceborne quadrupole mass spectrometer, describing transistorized circuitry 20 p3630 A70-39487

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator 20 p3589 A70-40461

Magnetic field-independent optically pumped Rb 85 maser oscillator power output 22 p4049 A70-42334

Parametric phenomena in oscillatory system with unlimited number of degrees of freedom, illustrating segment of long line loaded at one end 22 p3995 A70-42395

Fluidic oscillators frequency stability evaluation, noting analog circuits superiority over digital [ASME PAPER 70-FLCS-20] 22 p3963 A70-42407

Gunn diode oscillators in domain suppression mode, showing dynamic I-V curve shape relationship to donor concentration and crystal thickness 22 p3997 A70-43128

Frequency dependence of Gunn oscillator maximum negative conductance 23 p4172 A70-44198

Stable clock precision timing systems, discussing quartz crystal, rubidium, cesium and hydrogen oscillators 23 p4195 A70-44289

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators 24 p4318 A70-45191

Jet interaction type proportional fluid amplifier as feedback oscillators, measuring frequency response 24 p4292 A70-45291

OSCILLOGRAMS

U OSCILLOGRAPHS

OSCILLOGRAPHS

Pulse characteristics of scintillator-photomultiplier-cathode ray tube channel for oscillographic recording

of nanosecond pulses from neutron, gamma or X ray sources 08 p1496 A70-21218

OSCILLOSCOPES

General purpose automatic test system (GPATS) for electronic equipment fault location, discussing software and hardware for integrating programmable oscilloscope 08 p1470 A70-20656

Optically bistable crystal applications, discussing photochromaticity, catochromatic tubes, oscilloscopes, computer storage devices and laser systems 19 p3446 A70-37860

Oscilloscope polar coordinate displays for multidimensional analog signals, noting human detection capability 21 p3823 A70-40853

Adaptive AC null detector with tuned compression amplifier used for oscilloscope display drive 21 p3828 A70-41469

Oscilloscope design involving optimum bandwidth and input sensitivity, reference measurement and second time base 22 p3996 A70-42820

OSCULATIONS

U DOUBLE CUSPS

OSCULATORY INTERPOLATION

U ORBIT CALCULATION

U ORBIT PERTURBATION

OSEEN APPROXIMATION

Hydrodynamic fields of revolution around sphere in unbounded fluid governed by Oseen equation, emphasizing streamlines and attached vortex 05 p0832 A70-16157

Plane flow of electrically conducting fluids around oscillating plate, using equations linearized by Oseen method 09 p1734 A70-22316

OSMOSIS

Food ingestion initiation, investigating role of hyposmotic solutions from observation of rats under water deprivation 13 p2353 A70-29495

Turtle bladder walls osmotic properties, discussing transmembrane water flow transient acceleration by sodium transport inhibition 21 p3762 A70-41223

OSMOTIC PRESSURE

U OSMOSIS

OSO

NT OSO-B

NT OSO-1

NT OSO-3

NT OSO-4

OSO 1-6 spacecraft design, payloads and performance for continuous solar observation, discussing instrumentation and Delta launch vehicle characteristics 14 p2638 A70-30691

Orbiting solar telescope design for solar disturbances location and monitoring in H alpha line 16 p2907 A70-33188

OSO-B

Nighttime lightning activity observations by orbiting solar satellite OSO-B, determining thunderstorms positions by optical radiation detection 20 p3623 A70-39978

OSO-1

EUV solar spectrometer in orbiting solar observatory (OSO-1), describing satellite, optics and detector, data coding, etc 15 p2736 A70-32027

OSO-3

High energy gamma ray flux enhancement towards galactic plane from OSO-3 particle telescope observations 19 p3501 A70-38089

OSO-4

X ray bursts rise and fall observed by spectrometer onboard OSO-4 15 p2792 A70-31670

OTOLITH ORGANS

Cerebello-otolith system represented by axons of Purkinje cells, studying inhibitory vestibular efferent system relation to cerebellum in frog 01 p0014 A70-10352

Vestibular sensing system role in providing information concerning vertical, linear and angular head movements to central organs 02 p0246 A70-12191

Motion sickness causes and prevention during prolonged space flights, discussing vestibular system and characteristics of visual-inertial and canal-otolith incongruities 03 p0421 A70-13542

Vestibular analyzer and otolith apparatus disturbances and normalization under prolonged hypodynamia, noting pathological effects of repeated caloric testing 10 p1816 A70-24686

Mammalian utricle macula design, considering microelectrode data and information from light and electron microscopy, behavioral experiments and computer simulation 11 p1988 A70-26231

Semicircular canals-otoliths interactions for antagonistic and synergistic information 22 p3976 A70-43704

Spatial disorientation of human subjects in centrifuge, examining otolith role in reorientation and eye sensory mechanisms 22 p3976 A70-43707

OTOLOGY

Otoneurology - Conference, Basel, 1969 14 p2538 A70-30908

OUTER PLANETS EXPLORERS

Outer solar system exploration, discussing planetary data, interplanetary environment, atmospheric models, data acquisition, etc 11 p2112 A70-26062

Thermal analysis of deployable parabolic antenna for Outer Planetary Explorer program, discussing spacecraft spin and radioisotope thermoelectric generators effect 11 p2127 A70-26359

Spacecraft based data processing stages to perform navigation during outer planet missions 13 p2448 A70-28704

Course correction requirements for ballistic grand tours and outer planet missions, considering trajectory disturbances by random nongravitational forces 13 p2448 A70-28707

Operational and environmental factors constraining onboard navigation system design for outer planet flyby missions 14 p2614 A70-30467

Thermally powered reciprocating piston pump for temperature control fluid transport on Thermoelectric Outer Planet Spacecraft (TOPS) 17 p3101 A70-34757

Jupiter swingbys and multiplanet Jupiter swingby trajectory modes for outer planet missions, comparing in terms of passage conditions 19 p3530 A70-38884

Thermionic reactor electric propulsion for unmanned outer planets exploration, discussing spacecraft design, launch vehicle, weight factors, etc [AIAA PAPER 70-1071] 20 p3717 A70-40524

RF requirements of deep space-outer planet spacecraft communications for Jupiter, Saturn, Uranus and Neptune flyby missions 21 p3791 A70-41369

TOPS /thermoelectric outer planet spacecraft/ project integrating R and D for specific space missions 21 p3920 A70-41793

Scientific motivation for outer planets exploration covering solar system clues, atmosphere comparisons with earth, radiation and planetary radii measurement, etc 21 p3920 A70-41794

Thermoelectric outer planet spacecraft (TOPS) /flight environment, systems design and Titan 3D/Centaur launch vehicle with Burner II upper stage 21 p3930 A70-41795

Thermoelectric outer planet spacecraft (TOPS) data subsystems for 12 year missions compared with Mariner subsystem 21 p3795 A70-41796

Mariner 1969 communication system modified for thermoelectric outer planet spacecraft (TOPS), noting X band addition to S band and associated problems 21 p3791 A70-41797

Trajectory correction propulsion subsystem (TCPS), attitude propulsion subsystem (APS) and pyrotechnic subsystem of thermoelectric outer planet spacecraft (TOPS) 21 p3868 A70-41800

Thermoelectric outer planets spacecraft (TOPS) /attitude control subsystem providing accurate antenna pointing and trajectory correction engine thrust vector orientation 21 p3930 A70-41801

Thermoelectric outer planet spacecraft (TOPS) /solar-independent power subsystem 21 p3760 A70-41802

Thermoelectric outer planet spacecraft (TOPS) /structural problems associated with high gain antenna and electronic equipment 21 p3930 A70-41803

Automated mission requirements for outer planets, discussing flyby spacecraft, orbiters, atmospheric entry and grand tour missions [AIAA PAPER 70-1246] 24 p4411 A70-45919

Long life spacecraft design and reliability based on marine practices and advanced system technology project, considering grand tour outer planets mission [AIAA PAPER 70-1247] 24 p4412 A70-45964

OUTER RADIATION BELT

High latitude capture region boundary for electrons in upper radiation belt determined relative to current electrojets in ionosphere from satellite observations 01 p0172 A70-11516

Explorer observations of large temporal variations of midlatitude outer zone energetic electron intensities interpreted as redistribution during geomagnetic disturbances 03 p0560 A70-13989

Solar proton latitude profiles relation to outer radiation zone electron measurements by Alouette 2 satellite

- lite charged particle detectors during quiet magnetic conditions
04 p0740 A70-15105
- Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations
05 p0843 A70-16765
- Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations
07 p1367 A70-19498
- Extraterrestrial ring current proton intensities asymmetric increases in outer radiation belt during magnetic storms
09 p1747 A70-23490
- Low energy protons omnidirectional intensity contours in outer radiation zone at magnetic equator
09 p1747 A70-23491
- Low energy protons in outer trapping region, discussing time variations and source and transport mechanisms
13 p2484 A70-30095
- Outer belt electron intensity variations related to geomagnetic activity indices, using Elektron measurements
14 p2630 A70-30201
- Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations
15 p2795 A70-32743
- Book on dynamics of geomagnetically trapped radiation, covering radiation belts control, adiabatic theory, trapped particle diffusion, etc
16 p2972 A70-34300
- Acceleration and precipitation of Van Allen outer zone energetic electrons, using correlation experiment between magnetosphere and auroral zone
18 p3306 A70-36010
- Geomagnetically trapped energetic nuclei Z greater than or equal to 3 in earth outer radiation zone, measuring intensity ratio to alpha particles
20 p3698 A70-39327
- LF electrostatic instability of Van Allen belt in outer trapping zone causing electric field in plasmapause
22 p4099 A70-42786
- Outer zone electrons radial diffusion coefficients and lifetimes determined as functions of magnetic shell parameter, based on satellite measurement following geomagnetic storm
23 p4236 A70-43831
- High altitude outer radiation zone boundary region electron energy measurement by satellite Injun 3, noting angular distribution dependence on local time, latitude, etc
23 p4236 A70-43833
- Outer belt electron intensity variations related to geomagnetic activity indices, using Elektron measurements
24 p4398 A70-46276
- OUTGASSING**
- Lunar mascon origin theories, discussing mass transfer by excess pressure generation due to rapid cooling crust and densification by water outgassing
02 p0379 A70-12779
- Air sample removal from hermetically sealed cavities during studies of toxic gas emanations from polymeric materials
07 p1221 A70-19516
- Volatile toxic products outgassed by polymer construction materials, discussing physico-chemical classification of outgassing reduction methods
09 p1709 A70-22085
- Silicone products with low outgassing characteristics for spacecraft applications, discussing fluids, compounds and elastomers
10 p1906 A70-23914
- Air sample removal from hermetically sealed cavities during studies of toxic gas emanations from polymeric materials
11 p1991 A70-26115
- Outgassing pressure variation with time near perigee in satellite-borne pressure gages, using Langmuir model of surface adsorption
13 p2408 A70-29202
- Volatile toxic products outgassed by polymer construction materials, discussing physico-chemical classification of outgassing reduction methods
15 p2766 A70-32681
- Lunar luminescence phenomena, examining gas eruptions from volcanic activity, solar radiation and color
21 p3886 A70-41070
- OUTLETS**
- Coaxial energy outlets satisfying vacuum maintenance requirements of dielectric waveguide windows in dismountable prototype microwave devices
09 p1652 A70-23647
- OUTPUT**
- NT LASER OUTPUTS**
- NT MASER OUTPUTS**
- Output autocorrelation properties of ideal limiters driven by binary deterministic signal plus stationary zero-mean Gaussian noise
06 p1013 A70-18625
- Optimal constant output feedback gains for linear multivariable systems, noting control vector as time invariant function of output vector
13 p2382 A70-29064
- OV-1 SATELLITES**
- High sensitivity particle spectrometer for onboard OV-1-18 satellite measurements of precipitating protons, electrons and alpha particles during PCA events
12 p2232 A70-27402
- Ionospheric electric fields variations in ELF-VLF, confirming OV-1 satellite measurements with OGO 6 data
13 p2403 A70-30082
- OV-3 SATELLITES**
- Ionization measurements by OV-3-6 satellite cold cathode ionization gage of Redhead inverted magnetron type in near circular polar orbit
15 p2723 A70-31660
- OV-10 AIRCRAFT**
- OV-10A forward air control and light attack aircraft design, specifications and performance [SAE PAPER 700837]
24 p4290 A70-45883
- OVARIES**
- High speed fluorescent cell sorting system for sorting mouse spleen cells from Chinese hamster ovarian tumor cells
02 p0240 A70-12695
- OVERCAST**
- U CLOUD COVER**
- OVERESTIMATION**
- U ESTIMATING**
- OVEREXPOSURE**
- U RADIATION DOSAGE**
- OVERPRESSURE**
- Sonic boom overpressures generated by aircraft level rectilinear flight at supersonic speed in temperature and wind stratified atmosphere, calculating atmospheric correction factor
05 p0794 A70-16411
- Air shock tube driven by exploding mixture of propane and oxygen investigated for shock overpressure variation with distance
10 p1863 A70-23992
- Shock impedance definition consistent with acoustic limit, considering use of impedance mismatch to reduce sonic boom overpressure
10 p1805 A70-24522
- Overpressure, rise time and wave period of sonic boom signatures at ground level from unaccelerated supersonic overflights
14 p2530 A70-30608
- Supersonic transport sonic boom theory and effect reduction, discussing Whitham rule, bow shock, overpressure, engine and aircraft design and shock wave control
16 p2843 A70-34263
- Lower bounds for sonic boom, considering negative overpressure region in configuration tailoring
18 p3241 A70-36456
- Combustion velocity in high pressure chamber, determining fire mechanism in overpressure environment
24 p4393 A70-45447
- OVERTONES**
- U HARMONICS**
- OVERVOLTAGE**
- Thermal loads on semiconductors in solid state converters during short circuit and overload
15 p2709 A70-32205
- OXALATES**
- Second and third harmonic simultaneous generation in ammonium oxalate crystals achieved by three frequency interactions
10 p1901 A70-25159
- OXAZOLE**
- Cyclization of N-allylamides to disubstituted-2-oxazolines, giving melting points, yields, picrate melting points and NMR spectra
02 p0249 A70-11681
- OXIDASE**
- Histochemical detection of L-gulonolactone-phenazine methosulfate oxidoreductase activity in mammals with emphasis on vitamin C synthesis in primates
04 p0647 A70-15753
- OXIDATION**
- NT ELECTROCHEMICAL OXIDATION**
- NT PHOTOOXIDATION**
- Mass loss rate of evaporating liquid droplet with vapor reacting with oxygen of atmosphere in combustion front [DFVLR-SONDR-16]
01 p0216 A70-10932
- Artificial hypobiosis state maintenance in animals exposed to cooling after administering lytic mixtures for suppressing oxidation
01 p0029 A70-11464
- Be oxidation in carbon dioxide at high temperatures, explaining observed kinetic discontinuity in terms of oxide morphology
01 p0124 A70-11638
- Reactor surface and propylene role during vapor phase partial oxidation of propane in continuous flow tubular reactors
02 p0250 A70-12017
- Titanium thin films prepared in ultrahigh vacuum to determine low temperature/pressure oxidation kinetics, using electron microscopy and X ray diffraction
02 p0317 A70-12316
- Co-Cr alloy oxidation behavior at high temperatures and various oxygen pressures
02 p0319 A70-12720
- Initial oxide film on Cr-Ni steel at high temperatures observed by electron microscope, noting Ni role
04 p0708 A70-15311
- Particle removal in ablation of artificial graphite linked to oxidation, using high speed motion pictures in analysis
04 p0787 A70-15610
- Chromoluminizing process protecting alloys for gas turbines against oxidation at high temperatures by diffusion mechanism
04 p0711 A70-15683
- High temperature Hf oxidation in air and oxygen using thermogravimetry, X ray diffraction and electron microscopy
05 p0863 A70-16522
- Ni-Cr alloys oxidation dependence on temperature and Cr concentration
06 p1087 A70-17609
- Thermal emittance of Cu measured in vacuum in spherical enclosure by calorimetric method to investigate oxidation effect [AIAA PAPER 70-66]
06 p1180 A70-18139
- Oxide transformation during oxidation of Nb in terms of O diffusion
07 p1305 A70-18967
- Oxidation behavior of metals concerning oxide plasticity role in connection with oxide film macro- and microstresses
07 p1305 A70-18968
- Oxidation, hot corrosion resistance and mechanical properties of aluminate coated superalloys, discussing failure analysis instruments and methods
07 p1305 A70-18969
- W oxidation kinetics as function of ribbon temperature and absorption time using flash technique with sweep pulse mass spectrometer
07 p1306 A70-19275
- Low temperature oxide film effect on porous titanium carbide impregnation by liquid steel
07 p1311 A70-19805
- Al alloys melting in flame furnaces, studying oxidation and various sources of metal losses
08 p1505 A70-21131
- Transition kinetics during linear to parabolic oxidation of Cr in water-hydrogen gas mixture measured thermogravimetrically
08 p1521 A70-21558
- LEED pattern and germanium surface conductivity during oxidation indicating electron states annihilation
09 p1738 A70-22215
- Time, temperature and composition dependent regularities in Ni-Al and Ni-Nb alloys oxidation processes, discussing Oxygen ion migration and Ni ion diffusion
09 p1704 A70-22752
- Thermochemical predictions for high temperature oxidation of Mo and W, discussing oxide films or scales, reactant gases flow rate, etc
09 p1630 A70-22943
- Dual photon emission from chemiluminescent S-O reaction, proposing two step emission mechanism
09 p1630 A70-23001
- Al alloys fatigue properties dependence on surface oxide cracking in moist and dry air, investigating oxidation and kerosene processing
09 p1707 A70-23206
- Mars biological activity suggested from metabolic energy cycle based on oxidation of carbon monoxide [NGL-07-004-043]
09 p1765 A70-23798
- Two body collisions reaction mechanisms with small heats of reaction for Be and Al gaseous oxidation, noting low free energy properties of polymerization
10 p1928 A70-24089
- Electrodes oxidation processes involving fuel cell molecules or derived adsorbed intermediates reacting with anodically generated surface oxide, considering Pt electrochemical reduction
10 p1830 A70-24465
- Electrocatalytic activity of oxides in redox reactions without adsorption, noting application to hydrogen oxidation in acid medium
10 p1831 A70-24470
- Oxide transport and water vapor effects on flash-heated beryllium droplet combustion
10 p1969 A70-25042
- Pyrolytic graphite oxidation kinetics as function of temperature, air velocity and surface area
11 p0270 A70-25809
- Gas mixture composition effect on bacteria growth oxidizing methane and propane, establishing proportional biomass concentration to hydrogen and oxygen in mixture
11 p1991 A70-25938
- Acetone formation mechanisms during neopentane oxidation when added to slowly reacting molecular hydrogen and oxygen
11 p1995 A70-26379

Methane oxidation behind reflected shock waves between 1350-1900 K, measuring pressure, chemiluminescence and 3067 Å absorption of OH radical
11 p2150 A70-26380

Powdered titanium oxycarbides, carbonitrides and oxynitrides oxidation by X ray phase analysis, determining titanium dioxide as final product
12 p2254 A70-27285

Temperature and metallic contact effects on composition and structure of solid phase deposits during reactive fuel oxidation
12 p2289 A70-27493

Solid tar deposits from hydrocarbon fuels oxidation during prolonged storage
12 p2289 A70-27494

Anaerobic and aerobic oxidation efficiency in muscular work performance before and after achieving oxygen steady state consumption
12 p2169 A70-27658

Surface oxidation effects on thermionic work functions of Be determined by visual observation and X ray diffraction patterns analysis
12 p2288 A70-28004

Alloy oxidation at high temperatures emphasizing binary and ternary alloys
12 p2257 A70-28005

Low temperature oxidation of metals, discussing logarithmic kinetics of slow growth of oxides
12 p2257 A70-28006

Vacuum annealing treatments effect on oxidation rate of Co-Cr alloy at high temperatures
12 p2257 A70-28007

Phenolic aldehydes generated from lignin in fossil woods and carbonaceous sediments by oxidative degradation
13 p2361 A70-28911

High temperature kinetics of pyrolytic silicon carbide oxidation and nitridation in dissociated gases
13 p2361 A70-29077

Molar growth yields from chemostat cultures of *Hydrogenomonas eutropha* on succinate and on fumarate, noting equivalence to ATP via oxidation
13 p2350 A70-29113

High temperature oxidation of Ni-Cr alloys and stainless steels in molten salt, observing grain boundary corrosion with electron probe
15 p2757 A70-31875

Linear regression rate of spherical solid hybrid fuel grains oxidized in reducing gas flow
15 p2786 A70-32263

Graphite oxidation on exposure to high temperature flow field based on surface coupled model [AIAA PAPER 70-823]
16 p2940 A70-33941

Oxidation dependence on physical nature of Ti surfaces obtained by thin film techniques under ultrahigh vacuum conditions
17 p3098 A70-34364

Ti alloys crack formation during oxidation under stress, considering annealing and recrystallizing effects
17 p3114 A70-34374

Oxidized alpha Ti crystals strain analysis based on X ray divergent beam, discussing hardening effects
17 p3115 A70-34387

Sodium sulfate induced accelerated oxidation of Ni and superalloys, investigating thermodynamics and reaction mechanism
18 p3272 A70-36037

Carbon monoxide oxidation by molecular oxygen in incident shock waves, accounting for chain branching in shock tubes
19 p3374 A70-38271

Oxide dispersed Cu alloys preparation by surface oxidation of powders, considering structural stability and stress rupture properties
20 p3646 A70-39103

High temperature Ni, Co and Fe alloys for gas turbines, examining sulfidation-oxidation corrosion test methods
20 p3651 A70-39971

Ni base alloys sulfidation kinetics, examining roles of sodium/sulfur compounds-substrate interactions in accelerated oxidation
20 p3651 A70-40072

Spacecraft wet oxidation for human waste processing, discussing temperature and gas pressure effects, catalyst types, pump requirements, etc
21 p3769 A70-40997

Metal phthalocyanin catalyzed oxidation by oxygen of vanadium and iron couples in externally regenerated redox fuel cell cathode
22 p3966 A70-43536

Oxygen pressure effects on Ni oxidation kinetics at high temperatures
23 p4208 A70-44920

Convective diffusion limited oxidation of Mo, measuring kinetics up to 2000 K by rotating disk method
24 p4358 A70-45233

Thermodynamic equilibrium analysis of metal oxidation and thermal dissociation of oxides in vacuum, noting decreased affinity by evaporation
24 p4361 A70-45835

Al and liquid Al-Mg alloys oxidation at high temperatures, noting Mg content effect
24 p4361 A70-46174

Anions and cations diffusion during oxidation of Ni-V-Ti alloys, using chemical and electron microprobe analyses
24 p4364 A70-46335

Metal layer and absorbed oxygen quantities in reactive oxidation deposition of aluminum
24 p4365 A70-46354

OXIDATION RESISTANCE

Annular metal specimens protection against oxidation during high temperature relaxation testing by covering specimens with Al powder thinned with alcohol
01 p0121 A70-11109

Silicide, aluminide and boride coatings transition temperature holdability, considering nitridation/oxidation protection for Cr alloys
01 p0122 A70-11241

TD-Ni low cycle fatigue properties at high temperature, discussing grain morphology, thoria particles role and oxidation resistant coating effect
01 p0123 A70-11245

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance
01 p0124 A70-11621

Tungsten metal oxidation retardation by W-F bonds
02 p0249 A70-11651

B-C alloys chemical composition effect on high temperature stability in pure oxygen
03 p0514 A70-12978

Oxidation resistance of mixed silicon nitride and silicon carbide refractory materials at high temperatures
03 p0514 A70-12979

Oxidation and sulfidation resistant diffusion coatings for superalloys, discussing processing methods, composition, properties and application [SAE PAPER 690479]
03 p0509 A70-13266

Free radical antioxidant reactions in lipids from blood, liver, spleen, brain and intestines of rats exposed to ionizing radiation
03 p0419 A70-13309

Ni-Cr alloy oxidation resistance dependence on small amount of Al at high temperatures, noting role of protective oxide layer
03 p0514 A70-14315

Oxidation behavior of TiC base alloys containing Mo
04 p0708 A70-15312

Polymers with high temperature oxidation resistance, discussing problems caused by aromatic heterocyclic structures and manufacturing methods
05 p0873 A70-16604

Strength and plasticity of Mo and Nb sheet in oxidizing medium at high temperatures and pressure range
05 p0865 A70-17029

Metals mechanical properties with inorganic heat resistant coatings between 1900-2300 K in oxidizing medium, describing facility based on solar furnace
05 p0875 A70-17069

Ni-Cr alloys effects of grain size and surface deformation on oxidation properties at high temperature
06 p1088 A70-17610

Ni influence in high temperature oxidation of austenitic Fe-Cr-Ni alloys investigated thermogravimetrically, metallographically and by electron probe microanalysis
07 p1305 A70-18965

Fe-Cr-Ni alloys for use in high temperature oxidizing environments
07 p1305 A70-18966

Al-Mg oxidation resistance and kinetics, studying Zr, Ce and Be additives effects on oxide films mechanical properties
08 p1517 A70-21130

Co-based alloy mechanical properties and physical parameters at high temperatures, discussing oxidation and hot corrosion resistance
09 p1700 A70-22025

Nondestructive tests for diffusion-formed refractory alloy coatings used as oxidation protection for hypervelocity spacecraft and reusable systems
09 p1692 A70-22679

Ni-Nb-O system state diagram by reduction equilibria and X ray analysis, discussing oxidation resistance based on metal surface protective layers makeup
12 p2253 A70-27158

Commercial Co base superalloys oxidation and hot corrosion resistance under controlled environments, examining role of various alloying elements [ASME PAPER D-8-21-5]
12 p2256 A70-27974

Phosphorus compounds inhibition effect on oxidation and wear of graphite lubricants
13 p2437 A70-28854

Preoxidation treatment alleviating silicide pest in protective coatings for refractory metals, discussing effectiveness against high temperature oxidation
13 p2434 A70-29082

Aliphatic diesters as high temperature lubricants, discussing viscosity range extension, oxidation inhibition and thermal stability
13 p2438 A70-29125

High temperature scaling of Ni, investigating role of oxide microstructure and growth stresses
15 p2762 A70-32388

Ta oxygen concentration effects on corrosion resistance to NaK in SNAP 8 boilers
16 p2932 A70-34202

Ti-Al-Nb system creep strength, oxidation resistance, density, forging and rolling
17 p3120 A70-34426

Oxidation and atmospheric contamination protective coatings for high temperature materials, using burner ring tests
17 p3127 A70-34519

Surface degradation by oxidation, temperature fluctuations and hot corrosion of Ni- and Co-base superalloys in gas turbine engines
22 p4057 A70-43574

Graphite fiber oxidation prevention in metal matrix composites, examining various thermodynamic parameters
22 p4126 A70-43676

German monograph on use of Ge as oxidation resistant refractory materials alloy component covering base materials, test samples processing methods and apparatus, etc
24 p4367 A70-45525

Oxides and silicates universal equations of state based on experimental data including elastic properties, density, mean atomic weight relations and geophysics interpretations
02 p0294 A70-12778

Negative O, NO and nitrous oxide ions formation by electron impact on nitrous oxide as function of pressure
03 p0441 A70-14007

Mars surface reddish color due to carbon suboxide suggested based on spectral reflectivity measurements and matching in laboratory
04 p0743 A70-14423

High melting point oxides effects on niobium alloys recrystallization temperature and grain growth
07 p1303 A70-18741

Excitation energy transfer processes in oxide glasses containing trivalent Tb ions in combination with other rare earth activators
09 p1738 A70-22137

Refractory oxide submillimeter spherical particle preparation by focused emission from carbon dioxide laser
09 p1697 A70-22984

- Cyclohexene oxide mass spectral fragmentation by means of deuterium labeled analogs
09 p1630 A70-23397
- Epitaxial magnetic oxide films grown by chemical vapor deposition
11 p2099 A70-26626
- Fuel cells with solid oxide electrolyte, principles, advantages and drawbacks
12 p2163 A70-26994
- Gaseous monoxides dissociation energies and free energy functions tabulation for calculating partial pressures
14 p2545 A70-30902
- Oxide film and liquid effects on friction coefficient, surface relief and dislocation density along depth related to plastic deformation
15 p2743 A70-31638
- High temperature reaction kinetics between oxygen difluoride and CO in shock tube, discussing carbon dioxide formation
16 p2855 A70-33010
- Pressure effects on quantum yields of carbon trioxide formation in gas phase ozone photolysis with carbon dioxide
16 p2856 A70-33653
- Oxides compounds heats of formation isocomponent and primary product composition relationship in binary systems
22 p3982 A70-42679
- Perovskite type oxide lanthanum manganate magnetic properties, explaining ferromagnetism by spin Hamiltonian formalism
24 p4389 A70-45601

OXIDIZERS

- NT FLOX
NT LIQUID OXIDIZERS
NT LIQUID OXYGEN
NT ROCKET OXIDIZERS
- Hydrogen reactions with nitrogen dioxide, oxygen and mixtures of oxygen and nitric oxide in adiabatic flow reactor measured as function of temperature and pressure
02 p0250 A70-12020
- Condensed fuel mixtures and oxidizers combustion rates as function of pressure and particle size
09 p1786 A70-22104
- Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants [AIAA PAPER 69-175]
12 p2332 A70-27804
- Reaction rates temperature dependence for artificial carbon-graphites of various densities in oxidizing gas media
13 p2519 A70-28577
- Thermal decomposition mechanism of inorganic oxidizers, discussing reactivity of alkali and alkali earth salts
18 p3299 A70-36240
- Chemical kinetics effect on combustion rates of fuel plate in turbulent oxidizer flow, deriving conservation equations in boundary layer and diffusion equation
18 p3346 A70-36245
- Hybrid rocket engine with solid oxidizer, noting applications as apogee or perigee motor
18 p3301 A70-36655
- Anomalous substrate oxidizing specificities among red brown and green algal peroxidases and land plants
19 p3360 A70-37773
- Combustion rate as function of oxidizer molecular refractivity in perchlorates and nitrates of aliphatic and aromatic mono- and polyamines explosives
21 p3783 A70-42241

OXIMETRY

- Continuous blood oxygen analyzer standardized with atmospheric air, demonstrating on dogs during occlusion of left anterior descending coronary artery
21 p3772 A70-42162

OXYFLUORIDES

- Carbon oxyfluoride IR radiation from boundary layer formed by arc-heated air passing over Teflon surface
10 p1968 A70-24475

OXYGEN

- NT HIGH PRESSURE OXYGEN
NT LIQUID OXYGEN
NT OXYGEN ATOMS
NT OXYGEN ISOTOPES
NT OXYGEN 18
NT OZONE
NT OZONIDES
- Iron group nuclei abundance relative to oxygen determined for solar cosmic ray event of 2 September 1966
01 p0167 A70-10042
- Oxygen molecules dissociation by molecular and atomic collisions in shock tube from measuring molecular O concentration behind shock wave front
01 p0149 A70-11632
- Reaction analysis of acetylene-oxygen flames with known concentrations and temperature profiles, integrating one dimensional flame equations numerically
02 p0251 A70-12035
- Diurnal variations of intensity and height profile of diatomic O concentration from photometric rocket measurements compared with balloon data
02 p0297 A70-12066

- Nimbus 3 satellite observations of near UV solar flux intensity and variability, describing instrumentation and measurement of radiation producing molecular oxygen photodissociation
02 p0291 A70-12295
- Low energy electron diffraction structures due to Re crystal surface interaction with CO and molecular oxygen at high temperatures
03 p0440 A70-13098
- Nb-Mo alloy interstitial oxygen concentration determined by measuring internal friction (Snoek) peak
03 p0512 A70-13763
- Fire prevention problems in closed oxygen-rich environments, discussing ignition temperature and flame propagation rate
03 p0607 A70-13961
- Temperature and hemoglobin concentration effect on oxygen solubility in blood, constructing table for Bunsen solubility coefficients
03 p0428 A70-14156
- Tensile tests on alpha Ti containing oxygen and hydrogen at various temperatures and strain rates to determine deformation and fracture
04 p0706 A70-15133
- Polymorphic transformation effects on oxygen diffusion rate in alpha and beta phases of Ti, considering temperature effects and activation energy
04 p0707 A70-15211
- Threshold oxygen concentration for corrosion determined for Ta specimens subjected to low pressure contamination in NaK
04 p0709 A70-15628
- Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates
04 p0682 A70-15733
- Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states
04 p0684 A70-15750
- Pressure wave formation induced by absorption of radiation in oxygen, noting wave driving after radiation pulse decay by frozen dissociation energy
05 p0833 A70-16306
- Quasi-equilibrium treatment of heterogeneous reactions applied to evaporation rate/desorption/ computation for volatile species formed in oxygen reactions with W, Mo and graphite
06 p1004 A70-17330
- Quasi-equilibrium treatment of heterogeneous reactions applied to flash desorption data for oxygen reaction with tungsten surface, discussing species desorption dependence on adsorption temperature
06 p1004 A70-17331
- Slow electron attachment to O molecules forming stable O⁻ ions, discussing formation rate constant
06 p1109 A70-17488
- Electrically discharged O effect on N first positive band emission in surface catalyzed excitation
06 p1109 A70-17489
- Earth oxygen atmosphere age estimated from sulfur isotope composition of geological phlogopite and lazurite deposits from South Baikal region
06 p1056 A70-17798
- Absorption cross sections for single and double molecules of oxygen and in UV region noting disagreement with Beer law
06 p1114 A70-18632
- Oxygen content influence on Nb-Mo alloy mechanical properties at ambient temperature in air and hydrogen
07 p1307 A70-19374
- Photodissociation of diatomic O and N molecules in far UV
07 p1338 A70-20052
- Altitude profiles and absolute intensities of far UV emission features in aurora measured by filterwheel photometer in Aerobee rocket, determining molecular oxygen densities
08 p1489 A70-21384
- Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance
09 p1614 A70-22082
- Critical review of paper on molecular oxygen microwave spectrum analysis
09 p1732 A70-22829
- Stainless steel corrosion rates in flowing liquid Na from mechanism based on thermodynamic partitioning of oxygen
09 p1706 A70-22942
- Oxygen pressure, volume and temperature data and derived thermodynamic properties presented in tabular form
09 p1788 A70-22956
- Oxygen index flammability test for polymeric materials, showing general applicability in quality control and research
09 p1710 A70-23346
- Blood carbon dioxide and oxygen content determined by respiration mass spectrometer using carrier gas
09 p1629 A70-23584

- Oxygen solubility in liquid Mo in presence of volatile oxides, determining equilibrium constant of dissolution reaction
09 p1709 A70-23784
- Oxygen-kerosene combustion product composition and characteristics in engine thermodynamic design allowing for intermolecular interaction forces
10 p1968 A70-24284
- Charge transfer reactions of negative ions with oxygen investigated for energy dependence, yielding evidence on oxygen electron affinity
10 p1919 A70-24402
- Oxygen reduction reaction mechanism and catalysis, considering metal electrode surfaces and substrates, hydrogen peroxide role, adsorption, metal-oxygen bonds, etc
10 p1829 A70-24452
- Oxygen electrode ring and disk currents analysis, studying oxygen reduction on platinum via peroxy intermediates
10 p1829 A70-24453
- Oxygen reduction in sulfuric acid with phthalocyanine-carbon catalysts
10 p1829 A70-24456
- Oxygen-hydrazine interactions on partially immersed metal electrodes, studying conjugated electrochemical reactions
10 p1830 A70-24457
- Specific intensity production from photolysis of ozone-oxygen mixtures at 2537 Å, investigating mechanism
10 p1831 A70-24565
- Oxygen diffusion in presence of hemoglobin taking into account chemical kinetics, showing approximate and computer solutions
10 p1819 A70-24772
- Critical oxygen supply of cerebral mitochondria and intercapillary oxygen transport
10 p1821 A70-25080
- Partial oxygen pressure in hyperaemic earlobe capillary blood under hypoxic conditions, noting correlation with age and body weight
10 p1822 A70-25088
- Light scattering, turbulent disturbances and absorption by binary oxygen complexes in atmospheric layers
10 p1843 A70-25126
- High energy oxygen positive-ion reaction with molecular nitrogen, presenting semiempirical model with assumed crossing of potential energy surfaces
10 p1920 A70-25146
- Oxygen sticking coefficients and desorption kinetics on tungsten crystal by step desorption/ reflection technique, postulating formation and decomposition of surface oxide phases
10 p1832 A70-25147
- Hydrogen, oxygen and carbon dioxide in off-gas stream from nuclear reactor experiment using on-line gas chromatography
11 p1994 A70-25615
- Fatigue life of Ni vibrated in reversed bending at 300 C in oxygen and in water vapor at various pressures
11 p2067 A70-26098
- Styrene-oxygen copolymer preparation methods, discussing burning rates for rocket solid propellants mixtures with ammonium perchlorate
11 p2100 A70-26146
- Al and B particles combustion in methane-oxygen system, considering reaction zone models, energy release rate, particle kinetics, instabilities, etc
11 p2149 A70-26284
- Ionic composition of Class I auroras based on 1965 CIRA atmospheric model atomic/molecular oxygen ratios, noting ion loss rates
11 p2046 A70-26565
- Tensile strain rate and oxygen concentration effects on peaks of niobium hardening zones involving interstitial atoms
12 p2252 A70-27001
- N and O ions electron impact ionization rates calculated from approximate cross sections
12 p2275 A70-27173
- Oxygen adsorption on W(110)/ surface determined for coverage as function of exposure by Auger electron spectroscopy
12 p2180 A70-27253
- Oxygen and hydrogen diffusion coefficients in aqueous potassium hydroxide electrolyte solutions at various temperatures and concentrations
12 p2181 A70-27575
- Oxygen interaction on rhodium filament, considering sticking probability as function of temperature
12 p2181 A70-27677
- Gold alloys electrocatalytic activity in cathodic reduction of oxygen in potassium hydroxide
12 p2182 A70-27760
- Hydrogen oxygen fuel cell investigated for oxygen transfer to Pt cathode surface
12 p2166 A70-27848
- Oxygen diffusion facilitation in vivo and nonsteady state conditions under physiological circumstances, emphasizing hemoglobin in red cells and myoglobin in muscle
12 p2171 A70-28024

- Quenching efficiency of molecular oxygen relative to nitrogen, carbon monoxide, carbon dioxide and argon, involving photolysis of gas mixtures
13 p2361 A70-28498
- Predawn forbidden OI 6300 Å airglow seasonal variations by isophoto maps, discussing photoelectron precipitation
13 p2395 A70-28944
- Postdusk and predawn seasonal variations of forbidden OI 6300 Å airglow, discussing photoelectron precipitation
13 p2395 A70-28945
- Oxygen motion velocity effect at various pressures on heatproof and heat resistant steels and alloys ignition, noting minimum ignition temperature
13 p2434 A70-29168
- Molecular oxygen positive ion density in upper ionosphere as function of photoionization, ambipolar diffusion velocity and altitude effect
13 p2399 A70-29233
- Earth atmosphere formation and oxygen-carbon dioxide balance mechanisms, including water vapor photodissociation, photosynthesis, fossil fuel burning, etc
14 p2572 A70-30350
- Atmospheric molecular oxygen photometric absorption spectral bands, calculating growth curves
14 p2572 A70-30403
- Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates
14 p2575 A70-30817
- Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states
14 p2576 A70-30834
- V-N and V-O solid solutions magnetic, electrical, crystallographic and mechanical properties as function of gas concentration
14 p2596 A70-30842
- Nonequilibrium dissociation effect on supersonic oxygen flow past inverted blunted cones at angle of attack, considering thermal fluxes and aerodynamic forces
15 p2671 A70-31496
- Oxygen interlayer diffusion effects on wear change during gliding friction of normalized steel samples
15 p2743 A70-31636
- Electron mobility, diffusion, drift velocity and attachment in oxygen, determining Townsend primary ionization coefficient
15 p2776 A70-31969
- Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance
15 p2685 A70-32678
- Oxygen-hemoglobin reaction rate constants in red cells obtained by applying in vitro blood data to solutions of differential equations describing intracellular oxygen transport
15 p2686 A70-32846
- Diffusion coefficient of dissolved oxygen in blood proteins aqueous solutions
15 p2686 A70-32848
- Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation
[AIAA PAPER 69-136]
16 p2894 A70-33858
- Long term helium-oxygen atmosphere effects on rats and mice, investigating biochemical and metabolic changes
16 p2849 A70-33996
- Molecular oxygen role in photolytic decomposition of ozone by intermediate quantum yield method, presenting rate constants
16 p2858 A70-34009
- Inelastic energy losses in oxygen ion beams collisions with neutral molecules, determining vibrational transition probabilities
16 p2955 A70-34011
- Refractory metals penetration by liquid alkali metals along grain boundaries and crystallographic planes, considering threshold oxygen concentration
16 p2932 A70-34203
- Refractory alloys Li corrosion resistance, examining effects of oxygen contamination during welding
16 p2924 A70-34205
- Liquid metal corrosion of heat pipe refractory alloys at high temperatures, noting oxygen role
16 p2933 A70-34208
- Homogeneity of commercially pure Ti and Ti-Al-V ingots, discussing oxygen distribution uniformity over cross section
17 p3112 A70-34353
- Phase transformations and equilibrium diagram of titanium-oxygen alloys, using electron and optical metallography
17 p3119 A70-34413
- Ultrahigh strength alpha-beta titanium alloys, examining carbon and oxygen effects on mechanical properties
17 p3121 A70-34429
- Hypersonic flow of chemically reacting binary mixture of oxygen atoms and molecules past blunt body, presenting viscous shock layer equations - slip boundary conditions
[AIAA PAPER 70-805]
17 p3005 A70-34458
- Oxygen, nitrogen and argon plasma total radiation measurement at various wavelengths and temperatures
17 p3139 A70-34547
- Aluminum spherical particles nonautonomous and autonomous combustion in O with N or Ar initiated by HF induction heating
17 p3145 A70-35042
- Combustion efficiency and rate in oxygen enriched spacecraft atmosphere
17 p3177 A70-35210
- Shock tube flow of dissociating oxygen with chemical relaxation using Lax method
17 p3070 A70-35243
- Oxygen dilute solutions in liquid Fe-Ni-Co alloys, investigating thermodynamic properties by hydrogen-water vapor equilibrium
18 p3272 A70-36033
- Oxygen pressure effect on stainless steel cyclic hardening during vibration tests at resonant frequency
18 p3273 A70-36042
- Oxygen absorption coefficients at Lyman alpha line and other transmission windows, verifying dependence on pressure source line width and doublet separation
18 p3293 A70-36753
- Oxygen solubility in Nb-Hf alloys at elevated temperatures, using isothermal sections for Nb-rich part
19 p3453 A70-38708
- Flash lamp pumped organic dye laser intensity for dye solutions in contact with different argon-oxygen compositions, noting effect of oxygen partial pressure
21 p3834 A70-40569
- Turbulent mixing effect on vertical distribution of ionospheric atomic and molecular oxygen, using equations of motion and continuity
21 p3813 A70-40907
- Molecular oxygen density and vibrational distribution in lower atmosphere, observing solar UV radiation absorption by satellite OSO-4
21 p3816 A70-41066
- Hydroxyl atmospheric airglow secondary production processes, discussing vibrationally excited oxygen molecules and rapid quenching by atomic O and HO sub 2
21 p3816 A70-41068
- Collision induced dissociation of nitric oxide and molecular oxygen ions at low kinetic energies, noting internal ionic excitation effects
21 p3773 A70-41398
- Apollo 11 lunar rocks and fines oxygen, Si and Al content determination by neutron activation analysis
21 p3774 A70-41566
- Nucleic acids constituents reactions with singlet oxygen, determining oxidation mechanism in photodynamic processes
21 p3781 A70-42025
- Oxygen diffusion coefficient of alpha-Ti from oxidation of saturated and unsaturated beta phase in 932-1142 C range
22 p4053 A70-42731
- Diffusion effect on hydrogen and oxygen constituents height distributions in atmosphere and lower thermosphere, solving diffusion and continuity equations
22 p4020 A70-43160
- Room temperature oxygen adsorption on tungsten surfaces
22 p4087 A70-43235
- Solid solutions properties in Nb-oxygen system, examining atomic bond nature by elastic modulus measurement
22 p4056 A70-43345
- Interdiffusion coefficients for hydrogen-carbon dioxide and oxygen-carbon dioxide systems at low temperatures
22 p4076 A70-43393
- Hydrazine-oxygen fuel cell design and operation, discussing efficiency, electrolyte space, etc
22 p3966 A70-43541
- F1 region positive nitric oxide and oxygen ions concentrations ratio and conversion rates from rocket data and theoretical formulas
23 p4189 A70-44075
- Diurnal variation symmetry of upper atmosphere molecular oxygen concentration in terms of ozone photodissociation
23 p4190 A70-44083
- Autoionization theory application to partial solar photoionization cross sections for production rates of vibrationally excited positive molecular oxygen ions
23 p4222 A70-44785
- Blood oxygen, carbon dioxide and pN during hypothermia induced by He-oxygen mixture and cold exposure in hamsters, comparing with hibernation state
23 p4147 A70-44787
- Photosystem II and oxygen evolution kinetics
24 p4305 A70-46411
- OXYGEN AFTERGLOW**
Chemiluminescent reaction rates measurements for emission of diatomic oxygen molecules Herzberg bands in oxygen and oxygen-inert-gas afterglows
03 p0440 A70-13579
- Photoelectric intensity measurements on emission bands of oxygen Herzberg I system excited in argon-oxygen afterglow
03 p0528 A70-14350
- Hydronium ion formation mechanism for D region, obtaining experimental support from mass spectrometer observation of ion production in oxygen glow discharge
09 p1671 A70-23500
- Flowing afterglow system below 300 K for rate constants of certain gases association with helium third body, investigating oxygen cluster ions formation and reactions
10 p1920 A70-25144
- OXYGEN ANALYZERS**
Continuous blood oxygen analyzer standardized with atmospheric air, demonstrating on dogs during occlusion of left anterior descending coronary artery
21 p3772 A70-42162
- Atomic oxygen height profile measurements in upper atmosphere by sensor consisting of thin silver film on small pyrex rod permitting molecular transport
24 p4329 A70-45359
- OXYGEN ATOMS**
Atomic oxygen reaction with carbon dioxide and carbon dioxide dissociation in shock waves, using nitrous oxide decomposition for oxygen source
03 p0440 A70-13578
- Ionospheric inhomogeneities motion and vertical profile of atomic oxygen concentration associated with solar particle absorption in upper layer
04 p0681 A70-15724
- Atomic oxygen and chlorine attack on refractory materials studied for kinetics of chemical reactions of free radicals and atoms
07 p1313 A70-19903
- Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals
07 p1342 A70-20117
- Bromine monoxide formation by atomic oxygen-bromine reaction in flash photolysis of bromine-nitrous oxide and bromine-nitrogen dioxide mixtures
08 p1455 A70-21342
- Vacuum UV atomic nitrogen and oxygen lines contribution to energy transfer in high density plasma, noting f values and Stark half widths
09 p1730 A70-22229
- Neutral atomic oxygen auroral and nebular emissions in twilight airglow, suggesting photodissociation of molecules by sunlight
10 p1873 A70-23832
- Atomic oxygen IR emission in earth atmospheric models, using reduction factor for comparison with optically thin atmosphere
10 p1875 A70-24439
- Thermal diffusion effects on F2 region ion densities, deriving diffusion coefficients for partially ionized atomic oxygen plasma
13 p2398 A70-29232
- Ionospheric inhomogeneities motion and vertical profile of atomic oxygen concentration associated with solar particle absorption in upper layer
14 p2575 A70-30808
- F1 layer formation and ion production rates related to F layer stratification, atomic oxygen, zenith angle and solar activity periods
15 p2730 A70-32086
- Nitrogen deactivation by ground state atomic oxygen resulting in metastable oxygen atom as auroral green line source
17 p3080 A70-35770
- Atomic oxygen beams interaction with various surfaces at low pressure, discussing reflection probability and recombination reactions
18 p3225 A70-36187
- Total cross sections for production of free electrons in collisions of low energy negative atomic oxygen ions with molecular nitrogen
18 p3292 A70-36188
- Positive atomic oxygen ion reactions with carbon dioxide detected using ion cyclotron and double resonance methods
18 p3225 A70-36189
- Carbon dioxide-atomic oxygen reaction rate constant to investigate Martian ionosphere, discussing reactions involving oxygen, nitrogen molecular ions and NO
21 p3886 A70-41067
- Atomic oxygen density and temperature diurnal variation determination by F region incoherent scatter measurements, using nonlinear regression analysis
21 p3817 A70-41096
- Optical devices contaminated mirror surfaces restoration with atomic oxygen from RF plasma by noncontaminating nondestructive oxidation of polymer film
24 p4029 A70-42622

Neutron diffraction of ordered atomic oxygen structures in titanium suboxides, noting compositional dependence of physical properties

22 p4053 A70-42735

Ionization rates in auroras detected by atomic oxygen and nitrogen lines

22 p4024 A70-43308

EPR method for elementary reaction kinetics of vapor phase oxygen atoms interacting with molecular hydrogen

22 p3983 A70-43349

Oxygen atom catalytic recombination and flame inhibition mechanism literature survey

23 p4157 A70-44002

Solar spectrum O I, obtaining high resolution UV line profiles from rocket-borne spectrograms

24 p4410 A70-45766

OXYGEN BREATHING

Cardiac output and coronary blood flow during steady state hypoxia, considering room air and different oxygen concentration breathings

01 p0014 A70-10360

Dynamic testing instrumentation for oxygen breathing equipment emphasizing demand regulators and masks, connecting hose, helmets and individual components

01 p0041 A70-11458

Noble gases breathing effects on free amino acid pool increase in rat brains, considering O mixtures with He, Ar and Ne

04 p0632 A70-15086

Electrocardiographic changes during positive headward acceleration of normal human subjects after oxygen breathing and propranolol administration

05 p0808 A70-16675

Vigilance time degradation, studying effects of breathing gas mixtures with varying oxygen and carbon dioxide content

06 p1000 A70-17293

Respiration behavior of men during inhalation of various gas mixtures, observing spontaneous changes in breathing rates

07 p1206 A70-19471

Vital capacity measurements made preflight and postflight on jet fighter aircrew breathing pure oxygen at various G forces

07 p1222 A70-19934

Rats acute hypoxia and altitude tolerances after prolonged exposure to hyperoxic atmospheres

08 p1446 A70-21437

Dogs breathing air or oxygen during slow and rapid decompression, measuring intraocular and cardiovascular pressure changes and retinal responses

09 p1621 A70-23460

Prolonged hyperbaric oxygen breathing effect on human physical performance at rest and during severe exercise

19 p3364 A70-38369

Human and animal tolerances to hyperbaric oxygen, discussing response variation, toxicity modification, etc

22 p3976 A70-43701

Systolic and diastolic pressure in central artery of retina in deep-sea divers during oxygen inhalation at atmospheric pressure

23 p4150 A70-45081

Oxygen breathing effects in exercise on respiration, circulation and metabolism during high altitude acclimatization

24 p4303 A70-46110

OXYGEN COMPOUNDS

Reduced Nd ion absorption in matrices of fluorides, fluoride mixtures or oxygen-containing compounds with various ion concentrations, analyzing optical centers statistical properties

01 p0107 A70-10210

Vibrational spectra and structure of oxalyl chloride in crystalline and fluid states, discussing molecular and space group symmetry

16 p2857 A70-34006

OXYGEN CONSUMPTION

Oxygen uptake increase following sodium L-lactate isomer infusion into anesthetized dogs

02 p0233 A70-11721

Polarographic method for determining cat capillary muscle oxygen consumption used to investigate Fenn effect involving afterloaded and isometric contractions

02 p0234 A70-11726

Heart rate change effect on myocardial oxygen consumption and nutritional circulation with constant coronary blood flow suggesting oxygen extraction independence of capillary surface

02 p0235 A70-11991

Endtidal oxygen and carbon dioxide partial pressures, oxygen uptake and carbon dioxide after apnea and during apneic diving

02 p0235 A70-12089

Oxygen consumption, lactic acid production and mechanical performance of anesthetized dog gastrocnemius muscle with increased blood flow

02 p0235 A70-12090

Physiological equivalents of air with rare gases and H substitutes for nitrogen in inhaled gas mixtures providing normal oxygen intake

02 p0249 A70-12798

Altitude changes effect on brown fat content and metabolism in deer mice, noting oxygen consumption and heat production limitation by hypoxia

02 p0242 A70-12865

Arterial counterpulsation effect on mechanics of left ventricular contraction and myocardial oxygen consumption in normal and abnormal animals

03 p0416 A70-13009

Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges

03 p0425 A70-13891

External work and energy expenditure relations of heart, including myocardial oxygen consumption

03 p0426 A70-13940

Oxygen consumption and body temperatures during acute hypoxia in man, based on low oxygen mixture breathing tests

03 p0439 A70-14291

Perfusion pressure effect on myocardial oxygen consumption and coronary flow in stable nonworking rat heart

07 p1202 A70-18865

Oxygen uptake increase phenomena in passively hyperventilated anesthetized and paralyzed dogs

07 p1205 A70-19293

Carbon dioxide effect on oxygen uptake during hyperventilation in normal man

07 p1205 A70-19294

Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion

07 p1209 A70-19517

Physical training effects on sedentary men with stable activity pattern, recording heart rates and oxygen uptake

07 p1215 A70-20171

Oxygen uptake by brain as function of oxygen tension in rats using venous outflow method and blood gas analysis

08 p1446 A70-21436

Esophageal, rectal and quadriceps muscle temperatures, oxygen uptake, weight changes, skin conductance and skin evaporation during thermal transients caused by bicycle exercise

10 p1810 A70-24006

External respiration, hemodynamics, oxygen transport and consumption in lungs during static load tests

10 p1822 A70-25176

Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion

11 p1988 A70-26116

Cyclic strain energy method determining oxygen consumption rate of intact working human left ventricle by closed chest measurements

12 p2167 A70-27018

Brain tissular respiration and oxygen consumption in rats during hypothermia

12 p2168 A70-27345

Anaerobic and aerobic oxidation efficiency in muscular work performance before and after achieving oxygen steady state consumption

12 p2169 A70-27658

Initial period of muscular energy expenditure in athletes performing exercises on velocometer, considering oxygen consumption

12 p2172 A70-28313

Maximum oxygen uptake correlation to age of subjects performing physical and sedentary work

13 p2350 A70-29112

Human respiratory responses to gas mixtures with different oxygen content under rarefied atmospheric conditions

13 p2353 A70-29521

Maximal oxygen intake, pulse heart rate and lactate levels variations with physical activity in middle aged man free of cardiovascular disease

13 p2356 A70-29826

Hot environment and hyperthermy effects on oxygen consumption in subjects performing muscular exercise

13 p2360 A70-29947

High oxygen pressure effect on consumption rate constant for in vivo tissues

15 p2679 A70-31608

Metabolic Rate Monitor for measuring continuous oxygen consumption during changes in work in real time

15 p2741 A70-32540

Hybrid computer simulation of steady state oxygen transport and consumption in capillary-tissue system

15 p2694 A70-32845

Heart rate variations due to influence of body position rapid changes, emphasizing oxygen consumption in crouching position

17 p3024 A70-34591

Arterial pH change effects on circulation and oxygen consumption in dogs, discussing respiratory

acidosis heart rate, cardiac output and arterial blood pressure

17 p3024 A70-34593

Oxygen uptake capacity, ventilation, heart rate and acid base values during bicycle ergometer exercise

17 p3036 A70-34594

Tissue respiration measurement with membrane-covered oxygen electrode, discussing effects of electrode deterioration and diffusion artifacts on accuracy

17 p3026 A70-35186

Body temperature-maximum oxygen intake relations in hot humid air

17 p3038 A70-35424

Oxygen uptake and cardiac output in males during submaximal and maximal treadmill and bicycle exercise

17 p3039 A70-35428

Analog computer for continuous recording of oxygen consumption of muscular area in canine foot via blood flow rate and oxygen saturation

19 p3367 A70-37354

Psychotropic drugs radioprotective effects in mice, noting oxygen consumption and body temperature decrease after X ray exposure

19 p3367 A70-37558

Coulometric microrespirometer for long term numerical recording of oxygen consumption in respiratory chamber under sterile conditions

19 p3371 A70-38372

Oxygen pressure effects on tracking control training for stable reactions, investigating muscles bioelectrical activity changes during elevated pressure breathing

20 p3581 A70-40291

Oxygen uptake at alveolar capillary membrane, investigating ventilation variability at exercise onset

20 p3577 A70-40331

Liver blood flow in dogs during increased oxygen consumption

20 p3577 A70-40448

Turtle bladders isolated mucosal and serosal fractions histological and physiological properties, discussing ion transport and oxygen consumption

21 p3762 A70-41224

Body position effect on oxygen saturation of regional pulmonary venous blood and arterial-venous shunts in intact dogs

21 p3766 A70-42153

Fatigue effects on relationship between oxygen consumption, electromyographic activity and isometric contraction in human leg muscles

21 p3766 A70-42159

Muscular activity influence on energetic processes and functions in aging organism, relating oxygen consumption to aerobic metabolism

22 p3968 A70-42895

Body oxygen control under muscular activity in aging individuals

22 p3969 A70-42899

Oxidative phosphorylation and oxygen intake during circulatory hypoxia in mitochondria of liver and brain in rats subjected to acute ischemia

23 p4145 A70-44315

Oxidative phosphorylation and oxygen consumption during hyperoxia in mitochondria preparations and tissue homogenates from white rat liver

23 p4146 A70-44316

Human cardiovascular compensatory responses to environmental cold stress, relating heart stroke to increased oxygen consumption

24 p4302 A70-46103

Oxygen transport, arterial resistance and consumption in normovolemic and hypovolemic dogs in hemorrhagic shock

24 p4302 A70-46106

OXYGEN DEFICIENCY

U HYPOXIA

OXYGEN DETECTORS

U OXYGEN ANALYZERS

OXYGEN FLUORIDES

Oxygen difluoride-diborane reaction measured for pressure-temperature relationships and gas composition dependence on time, noting possible applications as hypergolic rocket propellants

11 p1995 A70-26138

Oxygen difluoride-diborane reaction kinetics and boron fluoride formation rate [WSCI PAPER 70-11]

13 p2362 A70-29611

Oxygen difluoride/diborane propellant thrust chamber and injector technology, discussing engine duty cycles and performance

16 p2962 A70-33550

Gelled space-storable oxygen difluoride and diborane analysis, including particle preparation, yield stresses, viscosities and storability [AIAA PAPER 70-609]

16 p2962 A70-33607

OXYGEN ISOTOPES

NT OXYGEN 18

Correlation between O isotope ratios and composition of tektites investigated for origin of tektites

05 p0917 A70-16840

Bowen levels of O III radiative lifetimes and transition probabilities measurements by beam-foil spectroscopy

10 p1936 A70-23909

Carbon-nitrogen-oxygen isotope bi-cycle function in solar evolution, noting first cycle role in solar energy release and neutrino production

20 p3698 A70-39306

Apollo 11 lunar rocks oxygen isotope ratios, examining relationship to terrestrial basalts

21 p3776 A70-41596

Oxygen isotope fractionation and formation temperature of minerals from Apollo 11 rocks, including plagioclase-clinopyroxene-magnetite concordancy diagram

21 p3776 A70-41597

Apollo 11 lunar rocks and minerals oxygen 18- oxygen 16 ratios

21 p3777 A70-41609

OXYGEN MASKS

Closed circuit respiration studies on subjects at rest and work, demonstrating potassium superoxide as oxygen source in breathing apparatus

15 p2688 A70-31500

Continuous flow requirements in aircraft passenger oxygen systems using phased dilution principle, discussing breathing mask efficiencies

23 p4141 A70-44483

OXYGEN METABOLISM

Patients with/without coronary heart disease inhaled various gas mixtures to induce arterial hypoxemia and hyperoxia, noting O availability for myocardial metabolism

01 p0016 A70-10440

Positive Na and K ion effects on mitochondrial respiratory control, O uptake and adenosine triphosphate activity in rat liver

01 p0026 A70-11063

Humans and dogs breathing CO in closed system, discussing distribution on blood, body stores and oxygen metabolism

02 p0234 A70-11727

Stimulated thyroid gland temperature variations and oxygen metabolism in decorticated dogs and anesthetized rabbits and rats

04 p0639 A70-15511

Equation describing atmospheric oxygen conductance to human tissues compared with experiments, ascribing discrepancies to inhomogeneity in diffusion/perfusion relationships

06 p0993 A70-17434

Protective ability of various compounds against hyperoxia at 5, 7, 9 and 11 atmosphere of pure oxygen

08 p1441 A70-20629

Prolonged hypodynamia effect on human external respiration, arterial blood oxygenation, circulation rate and gas exchange under various physical stress conditions

10 p1814 A70-24674

Aerobic metabolism of heart muscle cells and oxygen utilization of coronary artery blood

10 p1821 A70-25081

Hypoxia diagnosis based on excess lactate determination as indicator of oxidative metabolism changes

10 p1822 A70-25084

Pure oxygen effect on amino acids uptake and metabolism of *Pseudomonas saccharophila* stationary cells

14 p2536 A70-30343

Metabolic Rate Monitor for measuring continuous oxygen consumption during changes in work in real time

15 p2741 A70-32540

Hematology of sea level and high altitude native Sonoran deer mice, correlating hemoglobin electrophoretic patterns with oxygen affinity

15 p2686 A70-32835

Sodium oxybutyrate effects on brain tissue oxidation during hypoxia in mice

15 p2686 A70-32851

OXYGEN PRODUCTION

Atmospheric water vapor photodissociation and resulting O evolution recalculated for determining O abundance in absence of biological activity

01 p0081 A70-11294

Water electrolysis module long term operation in providing oxygen for life support systems

05 p0804 A70-15843

Space stations life support systems for air purification, water reclamation and oxygen recovery

08 p1449 A70-20630

Hill reaction color sensitivity in red and blue light during chloroplast disintegration, considering oxygen evolution capacity

15 p2684 A70-32548

Atmospheric oxygen history, using primeval anoxic terrestrial atmosphere simulation to show organic molecule formation by abiogenic process

16 p2898 A70-33990

Carbon dioxide electric discharge dissociation producing oxygen molecules

17 p3138 A70-35588

Solid oxygen generator for oxygen gas production from sodium chlorate decomposition, discussing reliability, safety and maintenance

18 p3225 A70-36211

Unicellular hot spring acidophilic alga *Cyanidium cadarium* cultured in pure carbon dioxide, examining

packed cell volume, oxygen production and growth rate

20 p3572 A70-39492

Prototype electrolyzer for generating oxygen from water vapor under various atmospheric conditions, noting spacecraft cabin application

20 p3564 A70-39696

Integrated Life Support System hardware tests, discussing oxygen and water recovery, contaminant control, personal accommodations and failure detection

21 p3833 A70-40989

OXYGEN RECOMBINATION

Nighttime recombination model of O ion plasma in upper ionosphere, showing temporal behavior and variation of electron concentration

07 p1265 A70-19432

Auroral green line rocket measurements, showing roles of atomic and molecular oxygen dissociative recombinations

10 p1874 A70-24432

Recombination in hydrogen-oxygen reaction studied by monitoring IR emission from water vapor formed by shock initiated combustion

11 p1995 A70-26377

Oxygen cation electron dissociative recombination rate coefficient measurement during expanding oxygen flow in nozzle

12 p2276 A70-27802

Atomic oxygen beams interaction with various surfaces at low pressure, discussing reflection probability and recombination reactions

18 p3225 A70-36187

Nighttime recombination model of O ion plasma in upper ionosphere, showing temporal behavior and variation of electron concentration

18 p3249 A70-36906

Hydrogen-oxygen flames recombination rates measurements analysis, taking into account reverse reaction rates

20 p3583 A70-40470

Winter predawn enhancement of 6300 A airglow at higher midlatitudes, considering roles of oxygen dissociative recombination and photoelectrons production at magnetically conjugate point

22 p4019 A70-43110

Oxygen atom catalytic recombination and flame inhibition mechanism literature survey

23 p4157 A70-44002

OXYGEN REGULATORS

Commercial flight crew oxygen system using mask mounted diluter demand regulator

06 p1002 A70-17715

OXYGEN SENSORS

U OXYGEN ANALYZERS

OXYGEN SPECTRA

Oxygen collisional quenching rate in F region determined by comparing nightglow intensities with intensities calculated from electron density profiles

01 p0070 A70-10403

Predawn O I 6300 A airglow enhancement, observing time variations and suggesting mechanism

02 p0289 A70-12120

Variable atmospheric attenuation of 5 mm wavelength band, considering oxygen absorption spectrum and attenuation for reference atmosphere

02 p0260 A70-12570

Atmospheric oxygen A band individual rotational lines intensities and half widths measurements

02 p0344 A70-12656

Transition probabilities for diatomic oxygen Schumann-Runge bands determined from shock tube emission studies

02 p0344 A70-12658

Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates

04 p0682 A70-15733

Vertical air density profile from satellite measurements of atmospheric oxygen radio emission at 40-70 km altitudes

06 p1056 A70-17788

Predawn enhancement of emission rate of 6300 A forbidden O I line in nightglow spectrum, discussing onset time

07 p1275 A70-20286

Molecular oxygen concentration determined by absorption spectroscopy of solar hydrogen Lyman alpha line

08 p1490 A70-21390

OI 6300 A airglow intensity decrease at dawn ascribed to scattered solar radiation

08 p1492 A70-21720

Excitation and layers heights for 5577 A and O2 bands of atmospheric and Herzberg systems in night airglow estimated, suggesting Chapman reaction for emission

08 p1492 A70-21755

Hydroxyl emission during auroras, noting absence of correlation with O I brightness fluctuations for IBC II-III aurora of 1 November 1968

09 p1671 A70-23496

IR oxygen emission transmission characteristics in atmosphere compared with ground-based observation

10 p1876 A70-24538

Seasonal changes in thermospheric composition in middle latitudes, investigating molecular oxygen density and solar activity effects

10 p1881 A70-24817

Vertical air density profile from satellite measurements of atmospheric oxygen radio emission at 40-70 km altitudes

10 p1882 A70-25020

Auroral enhancement of IR oxygen band at 1.27 micron compared with molecular nitrogen band intensity

12 p2222 A70-27185

Auroral green line decay of atomic oxygen measured photometrically from multiple exposure spectra of meteor wakes

12 p2304 A70-27713

Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates

14 p2575 A70-30817

5577 A /OI/ airglow emission diurnal variations during IGY by normalization method, observing seasonal effects

14 p2578 A70-31239

Excitation and radiative transport of 1304 A triplet of atomic oxygen for dayglow and aurora

14 p2578 A70-31241

Atomic oxygen 1D excitation state obtained by metastable He atoms collision with ground state oxygen molecules in O-He discharge

14 p2579 A70-31248

Nightglow OI lambda 6300 line width measurements during magnetic storm, discussing temperatures and intensity variations

14 p2579 A70-31250

Molecular oxygen emissions in airglow, inverting calculation to determine ozone distribution from observed altitude profiles

14 p2580 A70-31265

Night sky atmospheric continuum, zodiacal light and OI line observations with photoelectric color telescope

14 p2581 A70-31268

Electron impact excitation cross sections of oxygen ion first negative bands, considering relationship to oxygen ionization cross section

14 p2620 A70-31363

Triply ionized oxygen atom spectrum between 500-8000 A, determining energy levels and ionization limit

15 p2777 A70-32428

Near IR electronic emission spectrum of positive column in flowing oxygen electric discharge, noting vibrational temperature

16 p2955 A70-33981

Telluric lines seasonal variations, discussing oxygen and water vapor photoelectric recordings in solar spectrum

16 p0000 A70-34185

Spectrophotometric airglow intensity measurements of OH, O I 6300, hydrogen H alpha and oxygen Herzberg I bands by airborne laboratory

17 p3080 A70-35769

Tropical UV nightglow, considering oxygen ion-ion neutralization reaction as primary source

18 p3244 A70-36015

Direction and time variations of O I 4368 A emission following evening twilight

18 p3245 A70-36026

Vertical distribution of upper atmospheric 7600 A oxygen glow, discussing 8645 A band and nitric oxide data

18 p3251 A70-36977

Interstellar hot low density intercloud medium in H I region, estimating diffuse emission in forbidden lines O I at 6300 A and N I at 5200 A

18 p3310 A70-37020

Night airglow oxygen red lines predawn enhancement calculations, confirming role of photoelectrons from magnetic conjugate ionospheric

19 p3414 A70-38380

Auroral enhancement of IR oxygen band, considering electric field excitation mechanisms

19 p3414 A70-38383

Evening twilight airglow oxygen IR band ground based observation by two-channel photometric technique

19 p3415 A70-38385

Pi sub u states of positive ionized diatomic oxygen by photoelectron spectrometry

19 p3474 A70-38488

UV oxygen nightglow observation by OGO-4, examining ion-ion neutralization and radiative recombination production mechanisms

20 p3621 A70-39344

Anomalous IR auroral emission observation during rocket flight, indicating unknown energy sources of oxygen excitation

20 p3621 A70-39350

Decay lifetimes and electron impact cross sections of vacuum UV O I and O II emission multiplets, using pulsed electron beam in low pressure gases
21 p3852 A70-40718

Auroral optical emission measurements, examining oxygen atmospheric and IR bands by rocket sounding
21 p3817 A70-41092

Predawn enhancement of O I 6300 Å line, considering magnetically conjugate photoelectron effects on atomic oxygen excitation
22 p4095 A70-43113

Auroral spectrophotometer measurements from 1968 NASA airborne expedition, discussing oxygen and nitrogen spectral lines
23 p4186 A70-43855

Molecular oxygen ions 1Ng band and molecular nitrogen 1Pg band relative intensities in normal and type B auroras
23 p4191 A70-44408

Doubly excited antiferrodielectrics absorption spectrum band and bound states, discussing zero approximation 0-0 transitions of alpha oxygen molecules and permeability tensor
24 p4392 A70-46362

OXYGEN SUPPLY EQUIPMENT

NT OXYGEN MASKS

Chemical and physical adsorption of gaseous oxygen contaminants to maintain purity for respiratory purposes, noting trichlorethylene and carbon tetrachloride
01 p0031 A70-10236

Dynamic testing instrumentation for oxygen breathing equipment emphasizing demand regulators and masks, connecting hose, helmets and individual components
01 p0041 A70-11458

Physiological training programs and equipment for life support in transports, discussing changes in protective helmet and quick donning harness
06 p1002 A70-17708

Fleet evaluation program of AOH-1 helmet for replacement of standard flight helmet, oxygen mask retainer kit and oxygen regulator
06 p1002 A70-17709

Commercial flight crew oxygen system using mask mounted diluter demand regulator
06 p1002 A70-17715

Physiological and environmental factors influencing oxygen breathing system design and use for passengers and aircrews of high flying aircraft
06 p1003 A70-17716

Oxygen equipment design for USN patrol and attack aircraft, considering masks, regulators, helmets and hoses
07 p1191 A70-19005

Personnel protection against accidental decompression in transport aircraft at high altitudes, recommending flight stations with capsule to achieve ground level oxygen equivalent
09 p1627 A70-23459

Supercritical pressure system heat transfer characteristics for cryogenic space oxygen storage and supply
14 p2667 A70-31342

Portable contingency transfer life support system for crewman of Apollo missions providing oxygen and cooling
20 p3580 A70-39441

NASA aircrew oxygen system, describing carbon dioxide control and oxygen generation subsystems
21 p3768 A70-40990

Life support systems oxygen generation mode selection based on mission parameters, including duration, crew size, resupply, vehicle leakage, etc
21 p3768 A70-40991

Oxygen-nitrogen generation for long manned space flight based on liquid center dual matrix electrolysis cell
21 p3768 A70-40992

OXYGEN SYSTEMS

U OXYGEN SUPPLY EQUIPMENT

OXYGEN TENSION

NT HYPOXEMIA

Rats sympathoadrenomedullary response to increased oxygen tensions, measuring catecholamines, norepinephrine and epinephrine in adrenal gland, hypothalamus, serum and urine
01 p0024 A70-10979

Hyperbaric oxygenation (OHP) effect on left ventricular function evaluated by measurement on anesthetized dogs of myocardial contractility
02 p0230 A70-11701

Oxygen tension and pressure effects on hyperbaric oxygenation induced depletion of brain norepinephrine and 5-hydroxytryptamine in mice
02 p0235 A70-11992

Oxygen and carbon dioxide partial pressures bloodless determination in mixed venous blood, using platinum electrode and IR carbon dioxide meter
02 p0236 A70-12091

Co-Cr alloy oxidation behavior at high temperatures and various oxygen pressures
02 p0319 A70-12720

Dithiols protective effect against ionizing radiation in mice, noting oxygen pressure drop role
03 p0420 A70-13311

Time varying blood flow in pulmonary capillaries affecting overall diffusing capacity and alveolar-arterial oxygen tension gradient
03 p0421 A70-13570

Increased oxygen partial pressure effects on cerebral bioelectric activity from EEG recordings on unanesthetized dogs
03 p0422 A70-13690

Hyperbaric oxygenation effects on metabolism, comparing protective agents for rats exposed to 5 absolute oxygen pressures
04 p0631 A70-14681

White single-comb Leghorn chick embryonic development at increased pressures at various hyperbaric gas mixtures for ten day periods
06 p0991 A70-17296

Oxygen tension change effects on rats smooth vascular muscles electrical and contractile properties
07 p1198 A70-18715

Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights
07 p1220 A70-19502

Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation
07 p1208 A70-19505

Automatic control theory found effective in studying arterial blood saturation with oxygen during ascent to 4000 m in pressure chamber
07 p1210 A70-19523

Oxygen uptake by brain as function of oxygen tension in rats using venous outflow method and blood gas analysis
08 p1446 A70-21436

Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights
11 p1991 A70-26101

Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation
11 p1987 A70-26104

Tissue oxygen partial pressure measurement in resting skeletal gracilis muscle of cat, using microelectrode
11 p1989 A70-26664

Compression effects in air-oxygen mixture on male mice, observing no adversity on mortality, growth and nitrogen content
13 p2353 A70-29436

Oxygen and carbon dioxide effects on airway smooth muscle following pulmonary vascular occlusion in dogs
13 p2356 A70-29943

Wustite partial oxygen pressure measurements using emf in zirconia solid electrolyte
16 p2961 A70-33965

White rats adaptation to multiple high temperature exposures, examining oxygen tension in skeletal muscles
18 p3220 A70-36549

Hypercapnia effect on oxygen tension in ischemic myocardium in dogs using polarographic method
24 p4300 A70-45843

Adrenocorticotrophic hormone effect on oxygen tension in rabbit kidney
24 p4301 A70-45845

OXYGEN TOXICITY

U HYPEROXIA

OXYGEN 18

Sagittarius sources A and B2 O18H absorption lines measured at microwave frequencies, determining oxygen isotopes abundance ratios
10 p1936 A70-23907

Oxygen 18 concentration in Greenland ice core correlation to solar activity index, indicating earth temperature control by solar activity
13 p2489 A70-28909

OXYGENATION

Oxygen tension and pressure effects on hyperbaric oxygenation induced depletion of brain norepinephrine and 5-hydroxytryptamine in mice
02 p0235 A70-11992

Elastic interaction energy involved in Ti solution hardening by oxygen determined using anisotropic elasticity, presenting atomistic calculations and chemical bonds breaking role
05 p0862 A70-15906

Hyperbaric oxygenation effects on cellular membrane permeability, analyzing rat plasma behavior of transaminases GOT and GPT and K and Na cations electrolytes
05 p0802 A70-16493

Hyperbaric oxygenation treatment physiology and techniques, discussing limitations of equipment
09 p1620 A70-23017

Physiology of oxygen transport in human organism and genesis of tissue hypoxia, discussing pulmonary functions, blood transport properties and tissue blood flow and diffusion
10 p1821 A70-25077

Physiology and pathophysiology of oxygen transport in human blood, discussing fluctuations in O2 capacity and affinity
10 p1821 A70-25079

Oxygen transport after cardiopulmonary resuscitation from asystole and ventricular fibrillation in dogs
10 p1822 A70-25085

Brain oxygen supply during cerebral edema, examining venous and arterial blood gases, circulation, oxygen uptake, blood volume and pressure and EEG
10 p1822 A70-25087

Long term weightlessness effects on cardiovascular system of rats using miniaturized pump oxygenator
16 p2854 A70-33999

Benzoyl cyanide deoxygenation, describing reaction kinetics and products
17 p3041 A70-34750

Rene 41 ductility reduction by environmental oxygen promoting intergranular cracking at high temperatures
18 p3277 A70-36524

Oxygen role in crack initiation and growth in Ni alloys postwelding heat treatment
18 p3277 A70-36525

Temperature dependence of anisotropic reaction kinetics of oxygen with pyrolytic graphite
19 p3373 A70-37709

Interstitial oxygen effect on properties and precipitation processes in pure V and V-Ti alloys, using electron microscope
19 p3454 A70-38812

Niobium yield stress at room temperature for various nitrogen and oxygen concentrations
19 p3454 A70-38814

Rats brain oxygenation during hyperventilation with air or oxygen-nitrogen mixture, measuring creatine phosphate concentration and lactate/pyruvate ratio
21 p3762 A70-41225

OXYHEMOGLOBIN

Oxygen diffusion in presence of hemoglobin taking into account chemical kinetics, showing approximate and computer solutions
10 p1819 A70-24772

Mossbauer spectrum of submolecular changes of oxyhemoglobin in animal blood exposed to microwave irradiation
23 p4144 A70-43788

OZONE

NT OZONIDES

Vertical ion concentration profile in troposphere and stratosphere from ozone distribution satellite measurements using aeronautical reactions
02 p0291 A70-12389

Soviet collection of papers on radiation fluxes and ozone in atmosphere covering concentration, UV radiation scattering, etc
03 p0473 A70-13293

Mean and extreme atmospheric ozone concentration calculated as function of altitude and seasons in Northern Hemisphere
03 p0474 A70-13294

Temporal autocorrelation functions of ozone content and autocorrelation from data of Soviet and U.S. stations, obtaining statistical stability
03 p0474 A70-13295

UV radiation scattering and rocking instrument error source in vertical ozone profile determination with optical ozone probes
03 p0557 A70-13296

Atmospheric absorption anomalies of UV sunlight near 50 km altitude in rocket-borne radiometer determination of ozone distribution
03 p0478 A70-14197

Statistical model of ozone absorption bands for calculating intensity, rotational line position and transmission functions of complex spectral regions
04 p0680 A70-15252

Vertical profile of angular mass distribution of atmospheric water vapor and ozone as gas proportion function
06 p1097 A70-17794

Atmospheric ozone content and mass effect on solar radiation flux measured during total solar eclipse of 22 September 1968
07 p1275 A70-20310

Atomic bond rupture rate in rubber subjected to uniaxial tensile strain in ozone environment monitored by electron paramagnetic resonance measurements
08 p1527 A70-21454

Ozone formation in presence of nitrogen oxides and hydrocarbons during long wave UV irradiation, noting energy yield
09 p1629 A70-22328

Aeronomic neutral reaction rates, describing ozone excited state photochemistry
10 p1872 A70-23824

Downward ozone transport from troposphere to atmospheric boundary layer by turbulent diffusion calculated by model, estimating annihilation rate
10 p1875 A70-24486

Specific intensity production from photolysis of ozone-oxygen mixtures at 2537 Å, investigating mechanism
10 p1831 A70-24565

Vertical profile of angular mass distribution of atmospheric water vapor and ozone as gas proportion function
10 p1913 A70-25025

Atmospheric absorption by ozone of solar radiation measured by balloon-borne spectrometer in 9-10 micron region
11 p2045 A70-25627

IR absorption in ozone band, including atmospheric inhomogeneity effects on accuracy of transmittance calculations
12 p2223 A70-27515

Lower stratosphere ozone formation, suggesting origin in cosmic rays absorption
13 p2400 A70-29472

Middle stratospheric circulation in Southern Hemisphere, associating temperature changes and ozone content with planetary wave passage in Antarctic polar vortex
14 p2568 A70-30123

NO and nitrogen dioxide influence on ozone concentration and production rate in stratosphere
14 p2568 A70-30125

Mesospheric daytime/nighttime ozone abundance vertical profile diurnal variations
14 p2568 A70-30130

Winter stratospheric circulation quasi-geostrophic model based on joint radiative-photochemical equilibrium, investigating ozone cycle and warming
16 p2945 A70-33250

Pressure effects on quantum yields of carbon trioxide formation in gas phase ozone photolysis with carbon dioxide
16 p2856 A70-33653

Molecular oxygen role in photolytic decomposition of ozone by intermediate quantum yield method, presenting rate constants
16 p2858 A70-34009

Ozone content effect on presunrise fall in LF radio waves amplitude from Radio Tashkent to Delhi, noting UV light role
17 p3077 A70-34947

Flux emissivity tables for water vapor, carbon dioxide and ozone based on wavelength dependent absorption coefficients and flux transmissivities
17 p3081 A70-35927

Ozone concentration in San Francisco Bay Area, discussing temperature inversion, air pollution, destruction rate and distribution patterns of oxidants
18 p3284 A70-35945

Mars UV reflectivity, examining spectrum, absorption features, planet albedo and ozone content by rocket-borne instruments and atmospheric models
18 p3317 A70-37011

Atmospheric ozone longitudinal variation in lower middle latitudes of Southern Hemisphere
18 p3256 A70-37117

Rhodamine C chemiluminescent material for atmospheric ozone measurements, describing preparation and luminescence spectrum
19 p3373 A70-37638

Ozone effect on stratospheric electricity based on numerical calculations of ion densities
19 p3413 A70-38005

Atmospheric ozone remote sensing by high resolution IR interferometer spectrometer /IRIS/ aboard Nimbus 3 satellite
19 p3414 A70-38262

Ozone concentration variations in upper atmosphere during solar eclipses
19 p3418 A70-38906

Anomalous seasonal variation in worldwide ozone above 40 km from Umkehr measurement, considering turbidity effects
23 p4187 A70-44037

Noctilucent clouds blue color and rocket sounding results explained by ozone model of mesospheric clouds formation
23 p4188 A70-44048

Diurnal variation symmetry of upper atmosphere molecular oxygen concentration in terms of ozone photodissociation
23 p4190 A70-44083

OZONIDES
Peroxides, superoxides and ozonides applications in industrial chemistry, semiconductors and rocket motor fuels, discussing chemical structure and properties and nomenclature
05 p0810 A70-15768

OZONOMETRY
Network ozonometer compared to ozonometers with narrow interference filters, finding fictitious day lapse in data
06 p1064 A70-17791

Arcas rocket-borne chemiluminescent ozonesonde for measuring ozone concentration after deployment above stratopause level
07 p1396 A70-20263

Photochemical calculations on mesospheric ozone for oxygen only, oxygen-hydrogen and oxygen-hydrogen-nitrogen atmospheres
07 p1273 A70-20268

Umkehr observation days selectivity effects on calculated mean ozone distributions in layers 2 and 3
08 p1492 A70-21970

Ozone measurement from satellite by direct beam and scattered light methods employing UV sunlight attenuation
10 p1890 A70-24639

Network ozonometer compared to ozonometers with narrow interference filters, finding fictitious day lapse in data
10 p1892 A70-25023

Gravity waves structure simultaneous determination from airborne ozone and temperature sensors and satellite observations data
11 p2076 A70-26072

Atmospheric ozone vertical distribution measurement based on luminescence of solid organic substances, noting chemical and optical methods
14 p2573 A70-30409

Stratospheric and mesospheric ozone diurnal variation by rocket-borne ozonesonde in January 1968
14 p2577 A70-31170

Molecular oxygen emissions in airglow, inverting calculation to determine ozone distribution from observed altitude profiles
14 p2580 A70-31265

Soviet papers on actinometry, atmospheric optics and ozonometry
20 p3624 A70-39026

Atmospheric ozone content during May 1966 solar eclipse, noting solar disk darkening effect on measurements
20 p3615 A70-39031

Aerosol correction for atmospheric ozone content measurements using direct sunlight
20 p3615 A70-39032

Ionospheric transition and ozone correction from D region sunrise auroral rocket flight
21 p3814 A70-40935

Vertical atmospheric ozone distribution according to direct solar radiation received on ground, using UV and IR observations
22 p4023 A70-43296

Ozone vertical distribution from satellite IR data, discussing Fredholm equations for radiation transfer
23 p4191 A70-44269

OZONOSPHERE
Umkehr observation days selectivity effects on calculated mean ozone distributions in layers 2 and 3
08 p1492 A70-21970

Ozonosphere heating between 20-60 km during high solar activity, determining positive heating rate gradient directions and maximum heating altitude
12 p2223 A70-27514

Solar radiation absorption by atmospheric ozone observations by ground stations for meteorological data
13 p2400 A70-29642

P

P WAVES
P wave changes in serial ECG in patients with acute myocardial infarction
01 p0013 A70-10272

Right and left atrial polarization time sequence as guide to p wave origin in heart diseased patients following electrical stimulation of atria and ventricles
01 p0015 A70-10437

P wave and P loop changes during transvenous pacing of specific locations in coronary sinus and left atrium in dogs and man
08 p1445 A70-21266

First order scattering formulae for s- and p-light reflected and transmitted by rough plane surface using perturbation theory
11 p2086 A70-26840

Upper critical field dependence on s- and p-wave scattering of Frenkel effects in electron irradiated niobium
13 p2471 A70-29535

Seismic refraction profiles of ash flow in Valley of Ten Thousand Smokes, Alaska, obtaining P wave velocities
14 p2573 A70-30493

Circadian rhythms from electrocardiogram and cardiachogram of patient with human heart transplant, noting P waves relationship between donor and recipient tissues
20 p3570 A70-39166

Apollo 11 lunar sample elastic wave velocities at high pressures, examining P and S waves, Q value and geophysical implications
21 p3916 A70-41666

P-I-N DIODES
U DIODES
U P-I-N JUNCTIONS
P-I-N JUNCTIONS
High efficiency oscillator using avalanche square wave diode, considering case of silicon p-i-n diode
05 p0819 A70-15815

Current carrier motion and diffusion capacity in p-i-n junctions with highly doped regions under large variable signal
05 p0892 A70-16197

Broadband two way switch obtained by p-i-n diodes deposited on alumina substrate
05 p0821 A70-16526

Negative resistance and cut-off voltage of doped Si p-i-n diodes subject to deep acceptor levels
10 p1849 A70-24274

Nonequilibrium charge carriers transient accumulation in p-i-n diode at superhigh injection levels
15 p2714 A70-32908

Microwave p-i-n diode RLC equivalent circuit parameters experimental determination
23 p4171 A70-43956

Variable microwave attenuator using p-i-n diodes and three-port hybrids built in stripline technique
24 p4318 A70-45222

P-N JUNCTIONS
Electrical properties of Si-doped GaAs p-n structures obtained by liquid phase epitaxy, considering charge buildup
01 p0155 A70-10132

Current-voltage characteristics of p-n junctions in cadmium telluride, discussing spectral sensitivity bands
01 p0160 A70-11596

Gradual linear p-n junctions characteristics, including diffusion voltage value and temperature coefficient, space charge zone thickness and junction capacitance
02 p0268 A70-12493

Semiconductor injection laser modes, considering inhomogeneous lasing action levels over p-n junction area
03 p0499 A70-13410

P-n junction and microplasmas voltage temperature coefficients during avalanche breakdown
03 p0541 A70-13729

P-n heterojunction diode strain sensor fabricated by vacuum evaporation onto substrate, investigating mechanical input and output impedance characteristics
03 p0495 A70-14192

Neutron induced defect clusters in high field space charge region of Si p-n junctions, noting rate of volume damage dependence on electric field strength
04 p0730 A70-14728

Bifurcation frequency and nonlinear distortions determined in nonlinear semiconductor circuit with series-opposed connections of p-n junctions operating in forced oscillation mode
04 p0659 A70-15206

Equivalent conductances and resistances vs pumping oscillation modes of p-n junction in parallel and series-connected three-frequency parametric circuits
04 p0659 A70-15209

Gas discharge avalanche breakdown in Si semiconductors, analyzing microplasmas, ionization coefficients, p-n junction voltage, electron and light emissions
04 p0731 A70-15494

P-n-n structure dynamic I-V characteristics at high injection levels mathematically determined, showing rectifying capability decrease with increasing harmonic signal frequency
05 p0892 A70-16196

Minority current carriers diffusion in heterojunctions and p-n junctions in AlAs- GaAs, using X ray microanalyzer performing electron beam scanning
06 p1126 A70-17816

P-n junction depth in semiconductors, using electron beam of scanning electron microscope
06 p1127 A70-17820

GaAs p-n junction lasers operating properties under ideal and thermal conditions
07 p1298 A70-19396

GaAs lasers fabrication, discussing p-n junctions formation, laser die mounting, low resistance electrical contacts, optical cavities, etc
07 p1298 A70-19398

Electrical properties of Si-doped GaAs p-n structures obtained by liquid phase epitaxy, considering charge buildup
08 p1556 A70-21408

P-n junction avalanche and bulk Gunn effect microwave oscillators, analyzing IMPATT and TRAPATT modes
09 p1644 A70-22224

Fabrication effects on current instability during injection and breakdown of p-n junctions in GaAs oscillators
09 p1740 A70-23351

Natural oscillation mode in symmetrically graded p-n junction using Missawa small signal equations for avalanche diode
09 p1653 A70-23804

GaAs light amplifier p-n junction gain and output noise determination for wide photon energy ranges, studying input noise levels effects on sensitivity
10 p1928 A70-25167

Ionization gage with reverse biased silicon carbide p-n junction hot electron emitter as source
12 p2231 A70-27263

Emission field and Fermi quasi-levels distribution in injection laser with n-p heterojunction, determining frequency and threshold current temperature dependence
13 p2426 A70-28876

Modulation phase distribution over emitting surface of p-n junction GaAs laser at micron wavelength
13 p2431 A70-29866

Photodetector properties influence on opton transfer functions achieving light conversion by separating photocarriers with p-n junction

14 p2555 A70-30161

Iodide concentration effects on epitaxial GaAs p-n junctions growth characteristics

14 p2625 A70-30171

Regenerative semiconductor parametric amplifier saturation in forward current mode, assuming harmonic voltages /signal, pumping and difference frequencies/ action at p-n junction

15 p2708 A70-31522

Diffused p-n junction devices impurity profile from capacitance-voltage measurements

15 p2710 A70-32562

High voltage photoelectric generator containing semiconductor plates with series- and parallel- connected p-n junctions forming solid circuit for super-high light flux concentrations

16 p2843 A70-33201

Solar cells based on homogeneous diffusion p-n junctions in epitaxial GaAs films grown on Ge single crystal substrate

16 p2843 A70-33202

Indium arsenide p-n junctions fabrication and electrical and photoelectric properties

17 p3143 A70-35120

Photosensitivity and electroluminescence spectra of GaAs-indium gallium arsenide p-n heterojunctions at room temperature

17 p3144 A70-35708

Visible light-emitting p-n junctions formed in AlAs via Zn diffusion into single crystal n-type vapor grown AlAs layers

18 p3297 A70-36316

InAs p-n junction laser electrical and optical characteristics during spontaneous and stimulated radiative recombination

18 p3269 A70-36739

P-n junction photovoltaic cell excitation by two photon absorption with low bandgap energy

19 p3446 A70-37764

Current carrier mobility under dynamic regime in p-n junctions by computerized method, emphasizing transitory phase

19 p3487 A70-38169

Photovoltaic effects in p-n junction semiconductors, discussing conduction and electro- optical mechanism in thermal equilibrium

19 p3488 A70-38476

Impurity distribution in diffused p-n junction in thin epitaxial film, calculating space charge region width and junction capacitance

20 p3685 A70-38967

Nonlinear LC circuit with p-n junction capacitance, examining relaxation vibrations during automatic biasing

20 p3596 A70-38970

Degenerate p-n diode junction capacitance calculation, taking into account quantum and temperature effects

20 p3596 A70-39117

P-n junction dependent FM noise spectrum of UHF transistor power oscillator at transit frequency

23 p4161 A70-43789

Current twisting in double injection ohmic contact long p-n diodes with S-shaped current-voltage curve, showing unstable density at negative resistance segment

23 p4176 A70-45061

P-n junction conductance at superhigh frequencies in breakdown region with simultaneous tunneling and impact ionization

23 p4232 A70-45064

GaAs injection lasers, calculating effect of active region displacement from p-n junction waveguide on wave generation

23 p4203 A70-45074

Cu and Ni doped n-p and p-n silicon solar cells, examining radiation damage and isochronal annealing properties

24 p4294 A70-45810

P-N-P JUNCTIONS

Germanium p-n-p transistor frequency oscillation dependence on emitter current, noting forced air cooling effect

09 p1741 A70-23354

UHF Si p-n-p transistors with low noise and high gain for small signal applications

14 p2557 A70-31161

P-N-P-N JUNCTIONS

Conducting state propagation in p-n-p-n structure involving minority carrier diffusion between regions

23 p4232 A70-45068

P-TYPE SEMICONDUCTORS

Edge luminescence effect in doped p-GaAs single crystals with various hole concentrations, determining band structure at liquid nitrogen and room temperature

01 p0154 A70-10097

Laser transitions to valence band or acceptor in low loss uniformly pumped crystal structure p-type GaAs at 77 K

01 p0113 A70-11168

Autoelectron and autophotoelectron emission from Fe-doped p-type GaAs cathodes in vacuum, noting I-V and emission characteristics dependence on light flux

03 p0538 A70-13067

Resistivity, temperature and injection level dependence of minority carrier lifetime in neutron irradiated p- and n-type Si

04 p0730 A70-14729

N-type layer formation with ion implanted nitrogen or Sb in p-type alpha-SiC, evaluating electrical characteristics, discussing junction devices formed

04 p0732 A70-15685

Ohmic contacts to n- and p-type semiconductors obtained by ruby laser, noting linear current- voltage characteristics

07 p1299 A70-19797

Cu doped GaAs n- to p-type transition after fast reactor neutron irradiation, measuring Hall effect and photoconductivity to determine Cu electrical activation

12 p2287 A70-27490

Active region characteristics of double injection laser employing electron-hole plasma in p-type indium antimonide

12 p2247 A70-27491

N-type Te-doped gallium antimonide conversion to p-type by electron irradiation, noting thermal conductivity variations

13 p2470 A70-29167

Parallel and perpendicular negative magnetoresistance measurements as function of magnetic field in p-type GaAs at 77 K

13 p2471 A70-29374

P-type GaAs laser diodes spontaneous emission power temperature dependence, considering radiative recombination mechanism

13 p2378 A70-29545

Photoconductivity relaxation kinetics of low resistivity n- and p-type GaAs, showing nonradiative recombination

17 p3143 A70-35703

Electron momentum distribution function of p-type semiconductor with arbitrary band structure under electric and magnetic fields

17 p3144 A70-35704

Temperature and bias voltage dependence of zero bias tunneling structure in p-type GaAs-Au Schottky junctions

21 p3863 A70-41917

Electron tunneling through p-type GaAs point contacts on Pb single crystals at liquid He temperatures

21 p3864 A70-42017

Intraband absorption in p-type GaAs associated with carrier transitions between heavy and light hole in valence band

23 p4232 A70-45066

Mossbauer effect analysis of Fe impurity atoms in n- and p-type semiconductor compounds with wide and narrow forbidden gaps

24 p4388 A70-45204

P- and n-channel MOS transistor instability during superbreakdown voltage application to drain electrode

24 p4319 A70-45811

PACIFIC ISLANDS

NT JAPAN

PACIFIC OCEAN

Pacific ocean equatorial trough zone disturbances structure, discussing organized convective downdrafts role in rapid structural decay

06 p1101 A70-18578

LOF observations of long distance transequatorial step frequency radio circuits in Pacific Area during sunspot minimum period

07 p1232 A70-19174

PACKAGES

NT APOLLO LUNAR SURFACE EXPERIMENTS PACKAGE

PACKAGING

NT ELECTRONIC PACKAGING

Refuelable Mg-air battery anode, electrolyte and packaging materials selection from standpoint of cell voltage, metal consumption and sludge formation

02 p0253 A70-12721

Equipment container with sandwich type structure for packing delicate parts

10 p1852 A70-24899

Polymers industrial applications in textiles, building materials, furniture, aviation, automobile industry and packaging

19 p3455 A70-38700

PACKING DENSITY

Conductive heat transfer coefficients of densely packed electronic subassemblies

01 p0051 A70-10990

Spacecraft electronics packaging methods, discussing mechanical engineering aspect of high density component packing in single housing

06 p1017 A70-17337

Miniwire method of packaging high density electronic equipment shown in photographs, including OAO applications

24 p4320 A70-46247

High density packaging of micrologic flatpacks using high interconnection method for two-side use of double-sided card in space flight applications

24 p4320 A70-46248

PAD

Hydrodynamically lubricated rectangular taper-land bearing pads, analyzing geometry, viscosity, load capacity, friction and operating temperature conditions

13 p2418 A70-28740

PAGEOS SATELLITE

Spatial direction Riga-Cairo determined using simultaneous photographic observations of Pageos A satellite

06 p1054 A70-17550

Pageos I satellite characteristics, design, structure and orbital elements

10 p1941 A70-24585

PAINTS

Airline aircraft finishes for protection against corrosion, air pollution, discussing paint application and polyurethane technology

03 p0497 A70-14053

Paint technology findings and recommendations for airline aircraft surface finishes emphasizing use of polyurethanes

05 p0869 A70-16106

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion

06 p1172 A70-17180

Corrosion resistant paint systems for aircraft structural parts under severe environmental conditions simulated in carrier test stand

14 p2598 A70-31292

Photochromic paint nondestructive testing for survival equipment, detecting bond defects and sandwich water

23 p4197 A70-44490

PAIR PRODUCTION

Electron-positron pair formation in electromagnetic field created by coherent laser light focused into vacuum with ideal lens

08 p1513 A70-21411

Photon bremsstrahlung from relativistic hydrogen plasma determined by studying electron-positron pairing effect on plasma radiation intensity

09 p1735 A70-22986

Electron-hole pair creation in semiconductors /Zener effect and impact ionization/ defined from qualitative study of electron-phonon collisions

10 p1928 A70-24624

Low density collisionless plasma sheath in planar and cylindrical geometry under weak magnetic field, considering ion-electron pair generation

14 p2624 A70-31040

Average triton energy required to produce electron-hole pair in silicon measured, describing precision charge calibration of amplifier system

15 p2784 A70-32396

Energy loss of high energy cosmic rays traversing isotropic radiation field of arbitrary energy spectrum in pair producing collisions with ambient photons

17 p3150 A70-34598

Simultaneity in optical photon pairs parametric production, verifying quantum mechanical description of fluorescence

17 p3143 A70-35187

PAKISTAN

Report to COSPAR on space research in Pakistan, covering rocket, satellite and ground based investigations, etc

15 p2830 A70-31718

PALEOMAGNETISM

Cyclonic convective cell fluctuation and nonuniform core rotation effects on reversal of geomagnetic field, investigating fossil magnetism

04 p0676 A70-14600

Earth magnetic field transition recorded in basaltic lavas in southeastern Oregon

07 p1276 A70-20351

Archeomagnetic measurements showing westward drift of geomagnetic intensity and correlation of magnetic earth moment with radiocarbon production

11 p2044 A70-25599

Australasian and Ivory Coast deep sea microtektites fission track ages compared to deposition ages from paleomagnetic data

12 p2310 A70-28021

Vredefort Ring origin, discussing paleomagnetic evidence to choose between meteorite impact or terrestrial cause

16 p2899 A70-34050

Cretaceous rock paleomagnetism from Israel lava fields, determining original magnetization directions

19 p3413 A70-38034

Paleomagnetic reversal in 1350 year increments, measuring declination of deep sea sediment cores

21 p3820 A70-41885

PALEONTOLOGY

Amino acid stability in pyrolyzed Pleistocene Mercenaria shells, comparing decomposition rates for aqueous solution

03 p0472 A70-13150

Apollo 11 lunar dust and microbreccia micropaleontological examination, discussing biological morphology 21 p3778 A70-41620

Palaeogeophysics - Conference, University of Newcastle-upon-Tyne, England, April 1968 21 p3921 A70-41969

Biology of fossil genus Kakabekia and living species Kakabekia barghoorniana Siegel cultured from Alaskan soil samples 24 p4304 A70-46232

PALLADIUM

Rhenium powder sintering activated by palladium additions producing low porosity 01 p0117 A70-10158

Au-Pd films boundary structure during diffusion annealing, noting polymerized oil vapor effect originating from vacuum pump 15 p2758 A70-32121

PALLADIUM ALLOYS

Palladium alloy transmodulator for gas chromatograph, demonstrating sensitivity gain for thermal conductivity and ionization cross section detectors 03 p0442 A70-14325

PALLADIUM COMPOUNDS

PdH system electrical resistivity, studying hydrogen concentration role 12 p2282 A70-26900

Cellulose ion exchanger palladium catalysts preparation and applications in asymmetric hydrogenation reactions 17 p3042 A70-35125

PALMGREN-MINER RULE

Miner rule for cumulative fatigue damage, obtaining upper and lower bounds on load cycle number to failure 24 p4426 A70-46024

PAM [MODULATED]

U PULSE AMPLITUDE MODULATION

PANEL FLUTTER

Curved cylindrical panel flutter in presence of uniform compressive load, taking into account relationship between actual and ideal shape 01 p0202 A70-10946

Transfer matrix method analysis of dynamic behavior of beam structures applied to single rows of aircraft panels 01 p0209 A70-11200

Rectangular clamped panel flutter characteristics at various oncoming flow angles of attack 03 p0590 A70-13382

Rib-reinforced rectangular plate flutter in gas flow, considering shell stability, rib torsional rigidity, etc 03 p0593 A70-13498

Radiation from and panel response to supersonic turbulent boundary layer, emphasizing panel mode coupling to acoustic field 04 p0615 A70-15081

Liapunov second method extension to dynamical systems stability, illustrating wing torsional divergence and panel supersonic flutter 05 p0941 A70-16564

Aerodynamic forces for boundary layer profiles of flexible plate under transient motion in shear flow using computer programs [AIAA PAPER 70-76] 06 p0972 A70-18122

Panel flutter theory applied to aeroelastic stability of flat unloaded plates and cylindrical shells 11 p2134 A70-25951

Wind tunnel interference effect on fluttering airfoils and panels supersonic speeds, studying pressure distributions for various tunnel aspect ratios and roof conditions 12 p2155 A70-27103

Nonlinear panel flutter for random excitation and linear/nonlinear aerodynamic loading, using Rayleigh-Ritz approximation to Hamilton variational principle 12 p2316 A70-27105

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc 12 p2327 A70-27823

Circular cylindrical shells with clamped ends, investigating supersonic panel flutter by two mode approach and Galerkin method 17 p3184 A70-34695

Supersonic panel flutter of circular cylindrical shells at critical dynamic pressure 17 p3188 A70-35227

Probability theory of stresses during random vibrations of flat panel in acoustic field of jet engine exhaust 18 p3301 A70-36301

Flutter design charts for isotropic panels stressed to verge of buckling for tropical values of structural damping 18 p3338 A70-36446

Infinite elastic plates traveling wave flutter in compressible flow, investigating viscous damping effects on critical flow velocity 18 p3343 A70-36701

Thin plates and thin walled cylinders aeroelastic stability in fluid flow, analyzing panel flutter 19 p3546 A70-38342

Elastic panel nonlinear free vibrations, analyzing small amplitude phenomena 20 p3672 A70-39493

Skew panels supersonic flutter and vibration calculated by matrix displacement method 21 p3933 A70-40586

Circular cylindrical shell supersonic panel flutter nonlinear analysis, using averaging and numerical integration methods 22 p4112 A70-42275

Thin circular cylindrical panels in supersonic gas current parallel to generatrices, calculating heterogeneity effect on flutter 22 p4113 A70-42603

Fluttering isotropic rectangular flat plate fatigue life estimation, taking into account stress, dynamic pressure, frequency, Mach number and plate thickness 23 p4270 A70-44577

Aeroelastic and aerothermoelastic development of winged interorbital space shuttle concerning panel flutter, stability and nonstationary lifting surface theory 23 p4273 A70-44760

ONERA calculations in aeroelasticity including lifting surface optimization, control surface vibration, pressure fields, aircraft transfer functions and panel flutter 23 p4274 A70-44762

PANELS

NT CURVED PANELS

NT RECTANGULAR PANELS

NT WING PANELS

Wide strut analysis for determining weight minimizing cross sectional dimensions of panels having unflanged integral stiffeners 03 p0596 A70-14145

Fatigue life of stiffened skin pannels under acoustic loading of wideband frequencies to achieve structural resistance optimization [DGLR-69-63] 04 p0774 A70-15140

Pseudosound field wall pressure correlation obtained to predict response characteristics of aircraft panel mounted along jet wake 05 p0835 A70-16785

Stability equations of three layer panels with allowance for rigid filler transverse deformations 07 p1415 A70-20186

Sound energy transmission and radiation into room by flexible structural panels subjected to acoustic excitation using wave equations 10 p1964 A70-25224

Core shear deformations effects on stress, deflection and buckling load calculations for sandwich panels 15 p2815 A70-31931

Optimum fiber orientation for minimum weight boron/epoxy shear panel design 17 p3182 A70-34562

Core flexibility effects on deformation of uniformly loaded clamped parallelogrammic sandwich panels using linear theory 17 p3185 A70-34920

Sandwich panels geometrically and physically nonlinear theory, obtaining equations of motion and boundary conditions consistent with strain displacement relations 19 p3547 A70-38360

PANORAMIC CAMERAS

Holocamera holographic system for wide angle panoramic view, discussing dual laser beam illumination, side and top view diagrams, etc 16 p2913 A70-33984

PANORAMIC SCANNING

Panoramic vertical sounding method of ionosphere, noting drawbacks 18 p3255 A70-37040

Celestial sphere scanning by spinning symmetric satellite with open loop magnetic control of precession 23 p4216 A70-44524

PAPERS

Photographic paper as emulsion film substitute in industrial radiography, evaluating sensitivity and image contrast 24 p4337 A70-45715

PARA HYDROGEN

Far IR spectra of liquid hydrogen at para concentrations, noting absorption coefficient variation consistent with composition 04 p0718 A70-14696

Viscosity and thermal conductivity of dilute gaseous para and normal hydrogen at various temperatures 19 p3551 A70-37710

Solid para hydrogen IR and Raman spectra frequency analysis, examining lattice vibration effects 21 p3853 A70-41721

Thermal separation of ortho and para hydrogen and deuterium, discussing kinetic theory of nonspherical molecules in terms of rotational collision numbers 22 p3983 A70-43154

Thermodynamic properties, tables and equations of state of liquid para hydrogen from liquid-gas and liquid-solid phase equilibria 23 p4220 A70-44434

PARABOLIC BODIES

PARABOLAS

Stagnation point position and entropy at surfaces of supersonic paraboloids in perfect gas 12 p2160 A70-28250

PARABOLIC ANTENNAS

Satellite mounted mm wave parabolic dish antenna for tracking communication satellite in synchronous orbit 02 p0392 A70-11933

Far field radiation pattern determination particularly suitable for large parabolic antennas, detailing measurement errors 02 p0267 A70-12399

Analytic solutions for focal plane electric field components in parabolic reflector antennas 03 p0457 A70-13697

Aerodynamic damping measured for parabolic satellite communication antenna with pronounced flexibility in azimuth drive, simulating by scaled wind tunnel models 05 p0938 A70-16455

Geometrical and electrical characteristics of two mirror parabolic antenna for tropospheric radio relay communications lines in centimeter band, analyzing radiation patterns 07 p1240 A70-19125

Rotating parabolic mirror /antenna/ ou multisupported suspension analyzed for static rigidity, determining elastic deformation under mirror weight 08 p1586 A70-21055

Rotating parabolic mirror /antenna/ cantilever suspension rigidity with emphasis on rigidity of central bushing 08 p1586 A70-21056

Statistical analysis of model parabolic mirror rigidity on multisupported suspension under symmetrically distributed load represented by mirror weight 08 p1586 A70-21057

Multisupported radially symmetrical suspension systems designs for parabolic antennas, assessing performance in terms of maximum rigidities 08 p1586 A70-21058

Parabolic antenna for automatic tracking compared for characteristics between multimode and four horn feed systems 10 p1847 A70-23920

Parabolic antenna radiation pattern synthesis under laboratory conditions with space limitations obtainable by defocused antenna method 10 p1853 A70-25132

Thermal analysis of deployable parabolic antenna for Outer Planetary Explorer program, discussing spacecraft spin and radioisotope thermoelectric generators effect 11 p2127 A70-26359

Far field radiation patterns of Cassegrain, offset paraboloid and horn reflector antennas by stationary phase approximation method 11 p2019 A70-26659

Deformed parabolic mirror antenna equivalent geometrical parameters based on known points coordinates on real profile of reflector 14 p2563 A70-30147

UHF ground communication dish antennas transmit and receive gains calibration by communication satellite repeater 16 p2872 A70-32967

Aerodynamic admittance of paraboloid dish aerial in scaled atmospheric turbulent boundary shear layer simulated in wind tunnel by vortex generators 16 p2878 A70-33766

Computation and measurement methods for parabolic antennas design with high front to back ratio 18 p3231 A70-36666

Parabolic antennas for satellite communications network and radio telescopes, investigating surface utilization coefficient 19 p3395 A70-37267

Experimental model for random phase errors caused by surface irregularities in paraboloid reflector antennas 19 p3388 A70-37927

Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A 20 p3589 A70-40323

Optimum performance of corrugated waveguide feed horns for paraboloidal reflector antennas via radiation pattern shaping with digital computer 24 p4320 A70-46222

PARABOLIC BODIES

Hyperboloids and paraboloids in flow of Reynolds number 22-65000 and Mach number 10, discussing viscous interactions effects on pressure, drag and skin friction [AIAA PAPER 70-182] 06 p0976 A70-18240

Elastic paraboloid of revolution under axisymmetrical and nonaxisymmetrical loads, using Bessel functions of real and imaginary arguments with trigonometric functions 08 p1587 A70-21165

Singularities of boundary layer conditions on parabolic cylinder in homogeneous incompressible

viscous flow with leading edge, using Weyl integral equation 12 p2210 A70-27559

Hypersonic gas flow characteristics incident on elliptic paraboloid and triaxial ellipsoid at arbitrary angles of attack 15 p2672 A70-31647

Wave diffraction by parabolic cylinder, solving boundary value problems for two dimensional wave equations via separation of variables 15 p2700 A70-32408

Convex infinite paraboloid of revolution, describing geometry and applications to electromagnetic wave scattering and antennas 15 p2701 A70-32415

Thermal constriction resistance between contacting metallic paraboloids applied to instrument bearings [AIAA PAPER 70-857] 16 p2998 A70-33902

Paraboloid of revolution, examining mixed axisymmetric buckling problem 20 p3727 A70-39892

PARABOLIC DIFFERENTIAL EQUATIONS

Optimization of distributed parameter control systems described by linear integro-partial differential parabolic equation with delayed argument, using dynamic programming 01 p0131 A70-10548

Stochastic processes providing exposition of differential-integral calculus for Brownian motion paths, with applications to diffusion processes and related parabolic partial differential equations 01 p0133 A70-11322

Summary representations method to analyze finite difference schemes for integrating parabolic equations with constant coefficients, solving boundary value problems 03 p0518 A70-13078

Spatial amplification criteria for hyperbolic wave equations extended to include parabolic equations, discussing convective and absolute instabilities 03 p0519 A70-13522

Boundary layer on sharp flat plate in low density flow computed by continuum approach, obtaining parabolic partial differential equation system [DVL-914] 06 p1034 A70-17250

Positive time-periodic solutions to parabolic problems with Stefan-Boltzmann boundary conditions using straight lines method 07 p1333 A70-18748

Existence and uniqueness theorem for boundary value problem solution for parabolic equation in domain with singular points on boundary 07 p1322 A70-18853

First boundary value problem for quasi-elliptic and quasi-parabolic equations, discussing solvability and boundary behavior near characteristic points 07 p1322 A70-18854

Nonuniqueness of Cauchy problem for parabolic equation of order 2b with rapidly increasing coefficients at infinity 07 p1322 A70-18855

Toupin and Knowles elasticity theory applied to spatial decay estimate for parabolic heat equation used in diffusive temperature field 07 p1409 A70-19565

Cauchy-Dirichlet problem for linear inhomogeneous polycaloric /polyparabolic/ equation with constant coefficients under certain boundary conditions 08 p1597 A70-21006

Alternating direction implicit method for solving parabolic equation with variable coefficients in two space dimensions with mixed derivative 09 p1711 A70-22284

Integral relations describing laws of conservation and Sobolev theorem used in deriving a priori estimates for nonlinear parabolic equations first boundary value problem 10 p1908 A70-23924

Mixed boundary value problem for linear parabolic equations with discontinuous coefficients, proving solution existence and uniqueness by functional method 10 p1911 A70-25304

Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation 12 p2272 A70-27359

Linear and nonlinear parabolic boundary value problems with first boundary conditions solved by method of lines, estimating error 12 p2262 A70-28031

Mixed boundary value problems for pseudoparabolic partial differential equations solved in Hilbert space, demonstrating solution existence and uniqueness 14 p2599 A70-30635

Finite difference schemes for systems of elliptic and parabolic equations, using brute force algorithm 16 p2941 A70-33246

First boundary value problem solution for parabolic equation by differential invariant method 17 p1311 A70-35340

Incompressible laminar boundary layer, vortex and axisymmetric wake/jet flow parabolic equations solution by weighted residuals method, describing use of exponentials 17 p3074 A70-35883

Monotonic difference schemes for parabolic differential equations with nonlinear boundary conditions, discussing convergence and stability 18 p3282 A70-36361

Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation 22 p4075 A70-43600

Cauchy problem solution for parabolic equation with variable coefficients, using differential invariant method and Volterra integral equation 23 p4210 A70-43979

Cauchy problem for singular parabolic equation, establishing existence, uniqueness and representation theorem by integral operator techniques in conjunction with function-theoretic methods 23 p4212 A70-44895

Nonlinear parabolic initial value problems, including Navier-Stokes equations 24 p4370 A70-46414

PARABOLIC FLIGHT

Human factors research with simulated reduced gravity conditions by parabolic flight technique with aircraft [AMRL-TR-69-16] 01 p0037 A70-10962

Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle 01 p0134 A70-11483

Burnham-Slaughter 1958e-1959f comet orbit, showing nearly parabolic ellipse 19 p3516 A70-37933

PARABOLIC REFLECTORS

NT PARABOLOID MIRRORS

Monograph on radio telescopes covering developments from simple parabolic reflectors to computer based image forming instruments 01 p0046 A70-11250

Field pattern near paraboloid reflectors focus for low f/D ratios, considering vectorial character of electromagnetic field 02 p0268 A70-12474

Analytic solutions for focal plane electric field components in parabolic reflector antennas 03 p0457 A70-13697

Electrical and mechanical characteristics and specifications of second parabolic reflector antenna at Pleumeur-Bodou space communications center 05 p0819 A70-15982

High gain paraboloidal reflector antenna with horn feed for satellite and terrestrial microwave links 06 p1022 A70-18022

Paraboloidal- and spherical-reflector antennas efficiency optimization obtained from optimum combination of amplitude and phase of hybrid modes propagating in guide 07 p1240 A70-19220

Gain-to-noise temperature ratio /G/T/ optimization by dish antenna shaping for nonuniform aperture field distribution 08 p1471 A70-20790

Parabolic reflectors profile error compensation by means of multielement feed array with controllable phasing 09 p1644 A70-22236

Monograph on analysis of reflector antennas covering electromagnetic field equations, computer aided design, etc 13 p2367 A70-29600

Asymmetric phase error in antenna circular apertures, emphasizing beam squint resulting from distortion of paraboloidal reflector 16 p2859 A70-32942

Paraboloidal reflectors aperture fields from stereographic mapping of feed polarization pattern, illustrating electric and magnetic dipoles and Huygens sources 16 p2871 A70-32962

Paraboloidal and spherical reflectors focal region fields matching over corrugated waveguide open end propagating hybrid modes 16 p2861 A70-32966

Axially symmetric parabolic reflector with incident linearly polarized plane wave, determining Poynting vector behavior 17 p3043 A70-34615

Physical and electrical sizes in large antennas, discussing paraboloid reflectors, arrays, slot antennas, etc 17 p3053 A70-35079

Parabolic reflector microwave antenna flared horn primary feeds design for maximum aperture efficiency based on electric field matching 21 p3800 A70-41946

Monopulse tracking antenna beam broadening by feed displacement defocusing in parabolic reflector 23 p4165 A70-44956

PARABOLIC VELOCITY

U ESCAPE VELOCITY

PARABOLOID MIRRORS

Projector with paraboloid mirror solar radiation condensing lens for studying heat resistant materials mechanical properties at high temperatures 01 p0055 A70-10179

Direct solar radiation concentration by paraboloid mirrors, analyzing energy transport and distribution functions, based on statistically distributed imperfections of reflecting surfaces 01 p0010 A70-10762

Radio astronomical antenna structure synthesis based on excitation of unshaded mirror surfaces with symmetrical caustics and virtual sources outside of focal axis 07 p1239 A70-18758

Telescopic paraboloid mirrors optical distortion from surface deformation due to gravity loads 07 p1281 A70-19254

Statistical analysis of model parabolic mirror rigidity on multisupported suspension under symmetrically distributed load represented by mirror weight 08 p1586 A70-21057

Cassegrain antenna with parabolic mirror and switch designed for broadband transhorizon radio relays, using antenna scale model to determine parameters and electrical properties 11 p2020 A70-26823

Deformed parabolic mirror antenna equivalent geometrical parameters based on known points coordinates on real profile of reflector 14 p2563 A70-30147

Radio astronomical antenna structure synthesis based on excitation of unshaded mirror surfaces with symmetrical caustics and virtual sources outside of focal axis 18 p3233 A70-37102

PARABOLOIDS

U PARABOLIC BODIES

PARACHUTE DESCENT

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics 01 p0197 A70-11495

Functional state changes in organism awaiting and performing parachute jump using orthostatic test, respiration retention and Howard step test 03 p0420 A70-13477

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data 06 p1155 A70-17897

Three dimensional motion of nonrigid parachute and payload system analyzed for dynamic stability [AIAA PAPER 70-209] 06 p0987 A70-18062

Opening distance and inflation time prediction for parachutes deployed supersonically based on subsonic performance 07 p1394 A70-19725

Parachute wind sensors used in Arcas and Loki sounding rocket systems for stratospheric sounding, describing position data acquisition via radar tracking 07 p1395 A70-20259

Heart frequency profiles of persons during parachute jumps measured by electrocardiograms recorded directly and telemetrically to investigate psychical and physical stresses 09 p1626 A70-23010

Flat circular parachute stress analysis in steady vertical descent, using computer program for design change effects on shape, drag and stress 14 p2531 A70-30863

Free fall sport jumping with parachute, discussing exercises for changing positions 16 p2842 A70-34175

Buoyant Venus station balloon for deployment and inflation during parachute descent into Venus atmosphere tested with scale model balloons in wind tunnels 17 p3063 A70-35658

Significant terms in equations of motion for parachutes inflating in free air and in wind tunnel experiments [AIAA PAPER 68-924] 18 p3213 A70-36449

Aircraft-borne and descent systems performance and weight optimized for midair retrieval [AIAA PAPER 70-1201] 21 p3751 A70-41805

Optimum drogue gun firing angle of stabilization times for MEW /Minimal Envelope and Weight/ ejection seat system, considering zero and high velocities [AIAA PAPER 70-1208] 21 p3751 A70-41810

Pilot airborne recovery device /PARD/ midair rescue system, discussing buoyancy, midair pickup, seat ejection energy absorber, homing avionics and human factors [AIAA PAPER 70-1206] 21 p3752 A70-41812

U.S. Coast Guard air delivered antipollution transfer system for oil, discussing deployment method, trajectory analysis, rigging techniques and full scale testing [AIAA PAPER 70-1205] 21 p3752 A70-41813

Extraction parachute deployment for airdropping multiple loads from C-5A aircraft [AIAA PAPER 70-1203] 21 p3752 A70-41814

Parachute decelerator towline energy absorber shock attenuation characteristics, discussing drop test results
[AIAA PAPER 70-1202] 21 p3752 A70-41815

Attached inflated BALLUTE /balloon-parachute/ for stabilization and retardation of aircraft stores, high altitude descent devices and planetary entry vehicles
[AIAA PAPER 70-1200] 21 p3752 A70-41816

Ballistic trajectory, packageability, deployment and flight stability of attached ram air inflatable decelerator for high speed/low altitude store delivery
[AIAA PAPER 70-1199] 21 p3752 A70-41817

Stress distribution and shape in arbitrarily shaped gore parachute under unsteady pressure distribution during inflation and descent
[AIAA PAPER 70-1197] 21 p3752 A70-41819

Gliding parachute air cargo systems using nonproportional and proportional automatic manual control, estimating wind effects on ground track and impact computer simulation
[AIAA PAPER 70-1193] 21 p3753 A70-41823

Reefing systems for Parawings, Sailwings, Paraflyers, Paraplanes and Volplanes, discussing performance tests
[AIAA PAPER 70-1192] 21 p3753 A70-41824

All-flexible parawing as primary descent system for large spacecraft landing, discussing configuration, structural arrangement, multistage reefing and L/D performance tests
[AIAA PAPER 70-1187] 21 p3754 A70-41828

Basket weave fabrics for gliding descent decelerators with polyurethane and nylon coatings for tearing strength and pressure packing
[AIAA PAPER 70-1180] 21 p3843 A70-41833

Parachute decelerator system for 1975 Viking Mars Lander mission, discussing configuration selection, design factors, trajectory simulation, weight and mass analysis, etc
[AIAA PAPER 70-1162] 21 p3931 A70-41849

Solid cloth personnel parachutes opening forces, discussing loading conditions, flight path shock parameters, mass ratio variations and elasticity of system
[AIAA PAPER 70-1167] 23 p4137 A70-43992

Parachute trajectory and opening load prediction based on inflation process and added mass, determining drag area as function of distance
[AIAA PAPER 70-1168] 23 p4137 A70-43993

PARACHUTE FABRICS

Heat transfer coefficients for mesh simulating porous parachute cloth, measuring Nusselt number as function of sonic Reynolds number
01 p0004 A70-10292

Mission sequential environment effects on Dacron parachute material mechanical properties
[AIAA PAPER 69-1018] 14 p2563 A70-30770

Euler buckling of inflated toroidal drag bodies, including packaging and load deflection tests for Mylar, dacron-neoprene and stainless steel-silicone fabrics
[AIAA PAPER 70-1198] 21 p3938 A70-41818

Longitudinal tension impact tests on nylon tape and Apollo pilot parachute riser construction, determining wave propagation effects
[AIAA PAPER 70-1182] 21 p3843 A70-41831

Parachutes lightweight coated fabrics air permeability under axial tensile loading and load cycling at room temperatures
[AIAA PAPER 70-1178] 21 p3843 A70-41835

Stretch fabric materials for personnel high speed escape parachute systems
23 p4141 A70-44482

PARACHUTES

NT DRAG CHUTES

NT RECOVERY PARACHUTES

Parachute inflation dispersion studied by plotting dimensionless products characterizing incompressible flow process
01 p0006 A70-10849

Parachute design for decelerating upper atmosphere rocket probes at high altitudes, using high drag coefficients in Stokes flow regime
[AIAA PAPER 68-949] 04 p0624 A70-15410

Parachute altitude wind sensor /PAWS/ project for real time wind profile determination, using modified HASP I sounding rocket
14 p2585 A70-30577

Flat circular parachute stress analysis in steady vertical descent, using computer program for design change effects on shape, drag and stress
14 p2531 A70-30863

Small rocket systems research programs, discussing Apollo-Pacemaker and planetary entry parachute flight tests
17 p3177 A70-35203

Spacecraft parachute stress analysis, using finite elements with nonlinear elastic properties to obtain shape and load distribution
[AIAA PAPER 70-1195] 21 p3753 A70-41821

Drag prediction for Ballute and parachute trailing decelerators at supersonic speed and zero angle of attack, using flow field computations
[AIAA PAPER 70-1177] 21 p3746 A70-41836

Parachute canopy surfaces transient aerodynamic pressures during unsteady processes, using piston theory
[AIAA PAPER 70-1175] 21 p3754 A70-41838

Continuous surface of revolution parachute for supersonic/hypersonic speeds, performing wind tunnel tests
[AIAA PAPER 70-1173] 21 p3754 A70-41840

Reefed and unreefed disk gap band parachutes tested in supersonic and subsonic wind tunnels to determine stability and performance
[AIAA PAPER 70-1172] 21 p3754 A70-41841

Three body problem for parachute system dynamics during inflation
[AIAA PAPER 70-1170] 21 p3755 A70-41843

Tethered parachutes vibration modes, determining fundamental frequencies from canopy/lines mass ratio and materials elastic properties
[AIAA PAPER 70-1169] 21 p3755 A70-41844

Parachute flexibility as performance parameter, discussing stiffness-weight index, inflation process, squidding, etc
[AIAA PAPER 70-1166] 21 p3755 A70-41845

Parachutes for low density atmospheres, describing low and high altitude test results
[AIAA PAPER 70-1164] 21 p3755 A70-41846

Para-foil application programs and test results, discussing flight and glide performance, turn control, deployment inflation, etc
22 p3961 A70-42706

Testing laboratory for safety, survival and life support equipment concerning parachutes, aircrew protective helmets and maintenance manuals
23 p4141 A70-44488

Parachute opening load amplification due to suspension line elasticity, using two-body spring-mass model
23 p4142 A70-44531

PARACHUTING

U PARACHUTE DESCENT

PARACHUTING INJURY

Temporary or permanent visual field injury in test parachutists compared to control group
07 p1223 A70-19943

PARADOXES

Sleep biphasic paradoxical stage in cats, correlating brain structures electroencephalographic data with various somatic and vegetative signs
12 p2173 A70-28345

PARAFFINS

Cosmic ray nuclear interactions under paraffin and lead, using counter controlled multiplate cloud chamber
03 p0553 A70-12877

PARAGLIDERS

NT FLEXIBLE WINGS

NT PARAWINGS

Hi-glide personnel canopy /Para-Foil, Parawing, Sailwing, Volplane/ technology capability requirements identification from performance parameters tradeoffs
[AIAA PAPER 70-1194] 21 p3753 A70-41822

Static and dynamic longitudinal stability of semirigid parafoil gliding descent system in pitching motion
[AIAA PAPER 70-1191] 21 p3753 A70-41825

Parafoil flight performance predictions and test results based on wind tunnel data and manned free flight
[AIAA PAPER 70-1190] 21 p3754 A70-41826

Para-foil application programs and test results, discussing flight and glide performance, turn control, deployment inflation, etc
22 p3961 A70-42706

PARALLAX

Visual simulation limitations, discussing parallax error correction in display system, wraparound system, image generation, TV and motion picture film systems
01 p0036 A70-10813

M dwarf stars spectroscopic, spectral and photometric parallaxes calibration based on trigonometric measurements
01 p0188 A70-11333

HR diagram calibration based on proper motions and radial velocities, deriving absolute magnitudes and statistical parallaxes
06 p1149 A70-18456

Geodetic satellite positional problems taking into account parallax refraction
09 p1765 A70-22653

Binary stars dynamical parallaxes, masses, absolute magnitudes and provisional orbits, fitting deduced masses into empirical visual mass-luminosity relations
19 p3531 A70-38896

PARALLEL PLATES

Dipolar fluid effect on back flow between parallel plates, considering generalized Couette flow
01 p0062 A70-10545

Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics or fluid jet amplifiers
01 p0011 A70-11569

Radiative transfer in nongray gas between parallel walls, solving heat flux and temperature distribution
02 p0392 A70-1907

Navier-Stokes difference equations numerically integrated by computer for viscous fluid flow along parallel flat plate at low Reynolds number
02 p0277 A70-11909

Polarization diversity provided to parallel plate antennas in airborne radar applications by orthogonal vector processing
03 p0452 A70-13967

MHD laminar flow between parallel porous disks for large suction Reynolds number, solving equations of motion with singular perturbation technique
03 p0469 A70-14181

Conducting fluid laminar flow between parallel planes in traveling magnetic field, integrating Maxwell and Navier-Stokes equations
04 p0726 A70-15452

Radiative heat transfer through dust clouds in radiative equilibrium and isothermal conditions between parallel plates measured with heat flowmeter
[ASME PAPER 69-WA/HT-41] 04 p0781 A70-14802

Radiative heat flux between two parallel copper disks at cryogenic temperature, showing dependence on emitter temperature and spacing
[ASME PAPER 69-WA/HT-7] 04 p0784 A70-14823

Radiative transfer between two infinite parallel metallic surfaces separated by nonconducting thick film ideal dielectric based on electromagnetic wave theory
[ASME PAPER 69-WA/HT-6] 04 p0784 A70-14824

Rarefied H, He, air, carbon dioxide and water vapor flow rates between parallel optically flat glass surfaces measured, giving flow equation describing channel flow
05 p0833 A70-16525

Parallel plate TEM waveguides radiation pattern slope diffraction analysis
06 p1021 A70-17570

Laminar steady radial flow of simple fluid of U memory between two parallel disks, demonstrating relation to Newtonian fluid
06 p1037 A70-17915

Unsteady nonlinear molecular flow problems concerning plane Couette flow, heat transfer between parallel plates and density discontinuity propagation solved by Monte Carlo method
06 p1113 A70-18321

Plane Couette flow and heat transfer between parallel plates problems treated by generalizing BGK model and applying variational principle to linearized Boltzmann equation
06 p1048 A70-18323

Monte Carlo method applied to Boltzmann collision integral in solving heat transfer between plates at different temperatures in elastic spheres gas
06 p1183 A70-18324

Rarefied gas flows and heat transfer between parallel plates, concentric cylinders and spheres in presence of fractionally accommodating boundaries
06 p1049 A70-18330

Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem
07 p1252 A70-18669

Flow velocity distribution near boundaries of model of plates of parallel faces, obtaining Laplace equation solution
07 p1258 A70-19378

Temperature gradients, viscosity and conduction measurements in air stream between parallel plates, investigating limiting value of total Prandtl number
07 p1260 A70-19999

Transient phenomena accompanying heating of fluid situated between heat conducting plane horizontal plates, using interferometry and streak photography
08 p1596 A70-20592

Fluid motion convective stability between vertical parallel plates with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations
08 p1482 A70-20952

Laminar radial flow between parallel disks, estimating static wall pressure distribution perturbation caused by characteristic time
08 p1484 A70-21377

Symmetrical laminar distorted velocity profiles between flat parallel plates, analyzing decay using integral method
08 p1433 A70-21325

Forced convection heat transfer between two parallel plates analyzed numerically for effect of constant heat transfer coefficient boundary condition
08 p1598 A70-21425

MHD flow between two parallel plates, noting pressure gradient and skin friction coefficient
08 p1554 A70-21774

Open-sided shielded stripline and other parallel plate waveguide structures propagation modes
09 p1634 A70-22712

Digital wavemeter description using interferometer with parallel plates and automatic frequency readout for submillimeter band
09 p1652 A70-23658

Velocity profile and volume flow rate for rarefied gas flowing isothermal parallel plates, solving linearized Boltzmann equation by BGK model
11 p2037 A70-26168

Parallel isotropic flat plates vibration and flutter in supersonic/subsonic flow over one surface, observing plane loadings and elastic medium stiffness effects
12 p2316 A70-27104

Radiative energy transfer in hydrogen plasma having uniform heat source and bounded by parallel black plates
12 p2278 A70-27695

Numerical quadratures application to integral equations for radiative heat transfer computations, discussing validity for parallel and adjoint plates
12 p2332 A70-27840

Coupling between parallel plate waveguides excited in TE modes using integral and differential equations, noting dielectric plug loading effect
12 p2198 A70-27954

Semiinfinite parallel plate waveguide modes reflection coefficients with propagation constants near cut-off and excited at open end for microwave-optical frequency range
12 p2198 A70-27959

Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem
15 p2718 A70-31461

Linear integral equations for radiative transfer between parallel plates, using least squares method
15 p2826 A70-31822

Finite parallel plate waveguide arrays edge effects, comparing element radiation patterns and reflection coefficients vs scan
16 p2860 A70-32953

Thermal conductivity along parallel radiation shields, proposing calculation method for energy transport
[AIAA PAPER 70-847] 16 p3000 A70-33914

Lateral heat transfer along parallel conducting and radiating plates spaced by absorbing and isotropically scattering dielectric
[AIAA PAPER 70-849] 16 p2939 A70-33916

Hydrodynamic entry length for laminar flow between parallel porous plates, using finite difference theory for flow equations
17 p3069 A70-34983

Variational principle for turbulent shear flow between parallel plates, taking into account isothermal flow and Malkus theory
17 p3073 A70-35595

Critical height phenomenon for vertical jet exhausting into horizontal parallel plates channel simulating aircraft surfaces
18 p3243 A70-36709

Fluid motion convective stability between vertical parallel planes with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations
20 p3608 A70-39377

MHD nonsteady Beltrami flow between two infinite parallel walls with transverse magnetic field, calculating velocity, skin friction and induced magnetic field
20 p3678 A70-39610

Surface roughness effects on thermal radiant energy interchange between opaque interacting surfaces formulated for unequal temperature adjoint plates
21 p3944 A70-41018

Radiation heat transfer from parallel plates with grooved surfaces for direction dependent radiation properties
21 p3944 A70-41021

Interface interaction of colliding plates of different materials, reducing flow problem to differential equation via hodograph transformation
21 p3747 A70-41962

Incompressible Newtonian fluid laminar radial flow between parallel stationary disks, obtaining integral solution for Navier-Stokes equation
22 p4007 A70-42302

Plasma-air junction problem in parallel plate waveguide, obtaining discontinuity admittance expression
22 p3994 A70-42350

Ray theory of diffraction from open-ended parallel plate waveguides, using Wiener-Hopf technique
23 p4219 A70-44404

Radiation and phase-scanning properties of planar array of parallel plate waveguides, using wedge diffraction theory
23 p4166 A70-44973

PARALLELEPIPEDS

Elastic equilibrium of quasi-completely regular rectangular parallelepiped with rigidly clamped lateral faces, obtaining Lamé equations in double Fourier series
04 p0765 A70-14418

Boundary value problem in parallelepiped constructed for linear partial differential equation with constant coefficients using expansions in Riesz bases
10 p1911 A70-25305

Vector displacement numerical calculations for rectangular parallelepipeds of infinite and finite lengths
15 p2767 A70-32018

Rumanian book on spatial problems in elasticity theory covering deformation geometry, temperature effects, elastic parallelepipeds, etc
23 p4275 A70-44999

PARALLOGRAMS

Core flexibility effects on deformation of uniformly loaded clamped parallelogrammic sandwich panels using linear theory
17 p3185 A70-34920

Infinite periodic phased array over ground plane with dipole elements in parallelogram lattice, calculating driving impedance and gain loss due to mismatch
23 p4172 A70-44004

Clamped parallelogram metal plate thermal deformation under single surface radiant heating
24 p4426 A70-46009

PARALYSIS

Asymptomatic pilot with idiopathic paralysis of hemidiaphragm, discussing clinical picture and aeromedical significance
07 p1215 A70-19942

PARAMAGNETIC AMPLIFIERS

U MASERS

PARAMAGNETIC RESONANCE

Shift in nuclear paramagnetic resonance frequency of ligand nuclei in ferromagnets above Neel temperature
10 p1928 A70-24826

Ferrous and ferric ions properties in corundum from observing acoustic paramagnetic resonance
15 p2784 A70-32397

Ultrasonic and electron paramagnetic double resonance in Fe-doped corundum
22 p4074 A70-43010

PARAMAGNETISM

Uniform bulk magnetization concept in superparamagnets related to physical statistics of magnetic first order phase transitions
15 p2785 A70-32400

High strength magnetic fields effect on early embryonic development of frogs, relating growth abnormalities and paramagnetic ferritin motions
16 p2848 A70-33099

PARAMETERIZATION

Parameter introduction during boundary value problem solution for second order nonlinear ordinary differential equations
10 p1909 A70-24510

VLF radio noise statistical parameters observed as functions of azimuth, considering atmospheric distribution and parameters correlations
10 p1884 A70-25259

Complete sample estimation techniques for reparameterizations of Weibull density function to assign probabilities to components and systems lifetimes
12 p2243 A70-28012

Extrema of functions of many variables in presence of constraints from modified simplex method with variable search step
13 p2382 A70-29277

Book on aerodynamics of bodies of revolution covering hypersonic flow parameters effects, method of characteristics, slender body drag, blunt bodies, rarefied gas aerodynamics, etc
16 p2834 A70-33271

Parameter identification algorithm for nonlinear equations describing VTOL aircraft longitudinal response
16 p2942 A70-33327

Parameter analysis of dynamical systems by matrix approach, using n-dimensional parameter space
17 p3130 A70-35300

Atmospheric noise statistical parameters analysis on digital computer designed to measure short duration atmospheric radio noise
17 p3170 A70-35396

Bipolar transistor behavior identification and characterization in static regime, discussing measurement methods for parameters of IBIS model
17 p3054 A70-35414

Algebraic manipulation of empirical relationships between geophysical parameters, discussing invalid results
17 p3080 A70-35760

Parametric functions of integral matrices representing linear differential system via continuous coefficients
18 p3279 A70-36156

Turbofan engine performance optimization by closed form solution of operating cycle parameter functions
[ASME PAPER 70-GT-65] 18 p3303 A70-36840

Booster parameterized guidance algorithms investigated on basis of steering forms validity, discussing exoatmospheric ascent applications
[AIAA PAPER 70-1006] 20 p3669 A70-39584

Invariance conditions for control systems with time varying parameters
20 p3602 A70-39827

Parameter methods generalization and D decomposition, using function minimization methods
24 p4322 A70-46155

PARAMETERS

U INDEPENDENT VARIABLES

PARAMETRIC AMPLIFIERS

Frequency control of ruby laser pumped lithium niobate singly resonant parametric oscillator by radiation injection of CW Nd-YAG laser
01 p0110 A70-10566

Optical parametric oscillator pumped by continuously repetitively Q switched Nd/YAG laser output
01 p0113 A70-11171

CW visible ring cavity parametric oscillator, discussing pump depletion, conversion efficiency and improved stability resulting from optical isolation
01 p0052 A70-11173

Wideband parametric and tunnel diode amplifiers synthesizing method for obtaining maximum flat amplitude frequency response
03 p0457 A70-13727

Group delay characteristics of C band nondegenerate parametric amplifier determined by Nyquist method and compared to phase frequency derivative measurement
03 p0458 A70-14037

Low noise amplification equipment for telecommunications, considering France-Portugal link parametric amplifiers
05 p0819 A70-15983

Tunable optical parametric oscillators including Gaussian beams amplification, threshold, tuning techniques, spectral output, etc
05 p0822 A70-16651

Phase velocities of intrinsic normal waves of electron beam in three frequency parametric amplifier of space charge waves, determining optimal wave interaction conditions
05 p0823 A70-16890

Parametric interactions in three frequency TWT parametric amplifier, using power series
05 p0824 A70-16895

Increasing sensitivity of tuning fork gyroscope by parametric signal amplification
07 p1289 A70-20297

Low noise tunable parametric amplifier for tactical satellite communications, discussing characteristics and varactor diode mount
08 p1471 A70-20806

Radiometers with low noise parametric amplifiers at centimeter wavelengths for radio telescope, discussing design, performance and Venus observations
08 p1495 A70-21065

Parametric amplifier for spectral radiometer of U.S.S.R. astronomical telescope, showing improved sensitivity observations of neutral H emission
08 p1473 A70-21066

Low noise nonreciprocal microwave parametric amplifier with up-and-down converter and idlers in cascade
09 p1647 A70-22850

Low power microwave IMPATT oscillator as parametric amplifier pumping sources for use in radar and communication systems
10 p1847 A70-23891

Laser pumped optical parametric oscillators (OPO), considering phase matching, threshold power, transient response, etc
10 p1898 A70-23999

Resistive parametric mixing in GaAs oscillators at microwave frequencies resulting in negative mobility at signal frequency
10 p1849 A70-24231

Amplitude and phase constants of interacting waves in three frequency nondegenerate parametric amplifier of fast space charges using coupled wave technique
10 p1853 A70-25133

Varactor diode equivalent circuit determination for application to cooled parametric amplifiers design
11 p2017 A70-25573

Parametric effect maser developed by maintaining self oscillations in static amplitude modulated magnetic field, noting application as magnetometer
11 p2063 A70-25947

High dynamic range low noise parametric microwave amplifier performance measurement for radar receivers
12 p2183 A70-27166

Single and multistage parametric amplifiers for broadband communications, noting nonideal circular characteristics by scattering parameter and signal flow graph
12 p2197 A70-27933

Parametric amplifier as preamplifier for microwave receivers in space probes, presenting block diagrams and test results
13 p2379 A70-29559

Regenerative semiconductor parametric amplifier saturation in forward current mode, assuming harmonic voltages /signal, pumping and difference frequencies/ action at p-n junction
15 p2708 A70-31522

Microwave parametric amplifiers with nonideal circulators, deriving gain via scattering matrix theory and signal flow graphs
16 p2874 A70-33389

Terminal negative resistance of X band Gunn diodes, discussing frequency conditions for modulation and parametric amplification 16 p2877 A70-33417

Mechanical parametric amplification, improving SNR of acoustic systems in hostile environments 19 p3422 A70-37695

Flux intensity measurements of radio sources at 10.69 GHz by radome protected telescope using cryogenically cooled parametric amplifier as receiver 19 p3524 A70-38750

Parametric phenomena in oscillatory system with unlimited number of degrees of freedom, illustrating segment of long line loaded at one end 22 p3995 A70-42395

Signal and noise properties of degenerate and quasi-degenerate nonreciprocal parametric amplifiers without circulators 22 p3990 A70-43423

Minimum noise microwave parametric amplifiers incorporating varactor diodes with frequency dependent apparent loss resistance 23 p4169 A70-43786

Low noise dual receiver system for satellite communication earth station using parametric and transistor amplifiers 23 p4169 A70-43791

Ionospheric parametric amplification and frequency mixing due to polarized TEM waves nonlinear interaction with longitudinal electrostatic waves 23 p4185 A70-43838

PARAMETRIC DIODES

Self excited cavity oscillators with tunnel and parametric diodes and nonequilibrium medium, noting single and multimodes, energy capabilities and frequency interactions 13 p2366 A70-29405

PARAMETRIC FREQUENCY CONVERTERS

IR CW sum-frequency up-conversion of carbon dioxide laser radiation using phase matched prostrate as nonlinear crystal 01 p0111 A70-10786

Equivalent conductances and resistances vs pumping oscillation modes of p-n junction in parallel and series-connected three-frequency parametric circuits 04 p0659 A70-15209

High level parametric upconverter for radio link using evanescent mode waveguide 22 p3997 A70-42925

Nonreciprocal double-pumped parametric converter eliminating separate pump signals 22 p3998 A70-43252

Intermodulation distortion reduction in four frequency parametric converter by low impedance path 23 p4169 A70-43785

PARAMETRIC OSCILLATORS

U PARAMETRIC AMPLIFIERS

PARASITES

Biological satellite experiment, considering long term weightlessness effects on metabolism and biological rhythms of medical leech 16 p2854 A70-33993

Unnatural environment behavior of leeches for long term biosatellite experiment, determining temperature, humidity, oxygen pressure, carbon dioxide concentration, calcium hydroxide limits, etc 16 p2854 A70-33994

PARATHYROID GLAND

Parathyroidectomy effects on high altitude adaptation and adrenal cortex activity in rats exposed to chronic hypoxia 08 p1442 A70-20719

White Leghorn laying hens parathyroid glands fine structure from electron microscopic studies, noting electron dense membrane bound mature secretory granules in cytoplasm 09 p1619 A70-22800

PARAWINGS

Contour, pressure distribution and aerodynamic parameters calculations of slender highly cambered parawings in symmetric and asymmetric inviscid flow 03 p0408 A70-13800

Lift and drag characteristics of flexible parawings at subsonic speeds, predicting angle of attack for trailing edge flutter commencement 12 p2157 A70-28079

Parawing canopy behavior during deployment in free flight at specific altitudes and dynamic pressures [AIAA PAPER 70-1189] 21 p3751 A70-41804

AERCAB /Aircrew Escape/Rescue Capability/ Flying ejection seat, considering rotary wings, fixed wings and parawings 21 p3751 A70-41806

Finite element analysis of critical stress distribution in canopy of deployed twin keel parawing, predicting fatigue stress levels 21 p3753 A70-41820

Hi-glide personnel canopy /Para-Foil, Parawing, Sailing, Volplane/ technology capability requirements identification from performance parameters tradeoffs [AIAA PAPER 70-1194] 21 p3753 A70-41822

Reefing systems for Parawings, Sailwings, Para-Flyers, Paraplanes and Volplanes, discussing performance tests 21 p3753 A70-41824

All-flexible parawings aerodynamic performance prediction based on slender wing theory and circular arc approximations for canopy shape [AIAA PAPER 70-1188] 21 p3754 A70-41827

All-flexible parawing as primary descent system for large spacecraft landing, discussing configuration, structural arrangement, multistage reefing and L/D performance tests 21 p3754 A70-41828

Glide and landing performance of twin-keel parawings, discussing wind tunnel, radio flight and simulator tests 21 p3754 A70-41829

PARITY

Gravitational radiation scattering by Schwarzschild horizon, discussing odd parity waves of angular momentum 21 p3878 A70-40731

PARKING ORBITS

Navigation for lunar parking orbit with time varying osculating orbital elements, using Apollo 11 Doppler tracking data 14 p2613 A70-30457

Optimal explicit guidance equation using maximum principle for two stage vehicle injecting satellite into parking orbit 17 p3134 A70-35289

Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission [AIAA PAPER 69-918] 17 p3172 A70-35649

Optimum launch trajectories for ATS-E mission with noncircular parking orbits, considering apogee motor size, perigee radius and duration constraints [AIAA PAPER 70-1051] 19 p3528 A70-38866

PAROTID GLAND

U SALIVARY GLANDS

PARTIAL DIFFERENTIAL EQUATIONS

NT BIHARMONIC EQUATIONS

Energy inequality solutions properties pertaining to mixed boundary value problem of partial differential equations, using Fourier method 01 p0130 A70-10154

Asymptotic and approximate wave construction for system of first order quasi-linear partial differential equations 01 p0131 A70-10800

Functional optimization within partial differential equation solutions class by choosing optimum boundary values 01 p0131 A70-10922

Book on function theoretic methods for partial differential equations covering complex variables, harmonic functions, envelope method for singularities, operators, etc 01 p0133 A70-11325

Book on numerical solution of partial differential equations, discussing methods for physical and chemical problems on digital computer 01 p0134 A70-11326

Second order ordinary differential equations solution extended to higher order or partial differential equations using numerical integration 02 p0324 A70-12280

Method of weighted residuals /MWR/ for nonlinear partial differential equations applied to incompressible two dimensional turbulent boundary layer momentum and continuity equations 02 p0281 A70-12328

Optimal control synthesis in Markov and determinate systems using solution reduced from second order nonlinear partial differential equation 02 p0272 A70-12411

Wave propagation in inhomogeneous media, reducing quasi-linear hyperbolic partial differential equations to single nonlinear equation integratable by method of characteristics 03 p0525 A70-14184

Boundary value problems for partial differential equations representing steady gas flow hydrodynamic problems 03 p0469 A70-14228

Shell theory resolving equations transformation to second order partial differential equations suited for solution by numerical algorithms of network method 04 p0767 A70-14495

Augmented small parameter gas film equation for squeeze film journal bearing solved in terms of radial displacement [ASME PAPER 69-WA/LUB-9] 04 p0697 A70-14766

Finite difference analysis of partial differential equations derived from Navier-Stokes equations in hypersonic leading edge problem in merged gas flow-layer regime 06 p0980 A70-18349

Kolmogoroff partial differential equations for non-Markovian stochastic processes, noting applications to reliability theory 07 p1323 A70-18938

Simultaneous partial integrodifferential equations for transverse oscillations of uniform short beams 07 p1406 A70-19306

Partial differential equations hyperbolic systems solutions by finite difference methods, considering schemes stability and viscosity from first differential approximation standpoint 07 p1326 A70-19559

Mechanical vibration of beams analyzed by partial differential equations of beam vibration involving mass concentration and flexibility 07 p1411 A70-19786

Functions describing spatial-temporal temperature distribution in hyperbolic partial differential equations for nonstationary heat exchange between fluid flow and boundary wall 07 p1423 A70-19839

Steady oscillations under random forces of nonlinear system described by stochastic partial differential difference equations with distributed parameters and delayed argument 08 p1542 A70-20486

Chaplygin theorem proof for partial differential equation, using piecewise smooth manifold with unilateral conductivity 08 p1534 A70-21008

Optimal control conditions for elastic aircraft motion with delayed wing downwash determined by hyperbolic partial differential equations with delay 08 p1480 A70-21178

Nonlinear partial differential inequalities treated by companion function mu associated with continuity and growth conditions 10 p1908 A70-23836

Partial differential equation describing one dimensional heat transmission problems solved by eigenvalues for initial and boundary conditions 10 p1969 A70-25098

Boundary value problem in parallelepiped constructed for linear partial differential equation with constant coefficients using expansions in Riesz bases 10 p1911 A70-25305

Problem oriented computer programming language and translator for solving partial differential equations 11 p2013 A70-25367

Nonlinear partial differential operators eigenvalue solution using modified Newton iteration method, noting advantages over perturbation method 11 p2074 A70-26423

Computerized numerical integration of nonlinear partial differential equations describing blast wave in ionosphere with finite electric conductivity under uniform magnetic field 12 p2227 A70-28212

Hybrid computing techniques for solving parabolic and hyperbolic partial differential equations, discussing serial method accuracy and use of parallel logic for integrator control 13 p2373 A70-29461

Shallow shell theory partial differential equations, obtaining integral representations of general solutions 13 p2517 A70-29764

Second order hyperbolic partial differential equations solution by characteristic grid and continuous characteristic methods 15 p2768 A70-32818

Second order hyperbolic partial differential equations analog solution based on method of characteristics, showing advantage over digital computer solution 15 p2768 A70-32819

Variance reduction technique for hybrid computer generated random walk solutions of partial differential equations, comparing to analytical solution 16 p2942 A70-33731

Invariant imbedding application to solution of partial differential equations by continuous-space discrete-time /CSDT/ method, discussing time dependent heat diffusion 16 p2942 A70-33735

Continuous space discrete time /CSDT/ method using initial value formulation for partial differential equations, discussing applications to one dimensional problem 16 p2943 A70-33736

German monograph on stress-strain state determination for rotors of turbomachines covering strain equations, partial differential equations, boundary conditions, etc 16 p2971 A70-34078

Nonlinear partial differential equations initial value problems asymptotic solution using two time method 16 p2943 A70-34245

Forces on two dimensional oscillating airfoil in subsonic compressible wind tunnel flow, solving partial differential equation for pressure potential by integral transform technique 16 p2839 A70-34248

Algebraic aspects of generalized Riemann invariants method of integration of quasi-linear partial differential equations 16 p2944 A70-34329

Stochastic approximation for identification of distributed parameter system solutions described by linear partial differential equations

17 p3131 A70-35557

Third order accuracy for nonlinear hyperbolic system of partial differential equations extended to equations with independent variables

17 p3131 A70-35891

Class of third order difference methods for hyperbolic equations in one and two dimensions applicable to nonlinear initial value problems

17 p3131 A70-35893

Adiabatic invariant of nonlinear periodic wave described by partial differential equations in weakly inhomogeneous medium

18 p3291 A70-36642

Book on abstract methods in partial differential equations, covering functional analysis and distributions, elliptic theory, linear and nonlinear problems, evolution equations, etc

18 p3284 A70-36782

Augmented small parameter gas film equation for squeeze film journal bearing solved in terms of radial displacement

[ASME PAPER 69-WA/LUB-9] 19 p3435 A70-37609

Linear partial differential equations solvability, deriving necessary conditions for pseudo differential operator

19 p3457 A70-37677

Initial boundary value problems for hyperbolic partial differential equations, including Cauchy problem

19 p3457 A70-37678

Singularities of solutions of partial differential equations, discussing smallest convex set in manifold with differential operator

19 p3457 A70-37680

Sufficient conditions for local solvability of linear partial differential equations with operator on complex functions

19 p3457 A70-37682

Numerical integration of finite difference analogs of nonlinear partial differential equations, investigating data smoothing, filtering and boundary effects on computational instability

19 p3459 A70-38417

Simultaneous approximation of function and product with given operator, applying to boundary value problems of partial differential equations

19 p3459 A70-38682

Dirichlet problem for elliptic linear system of partial differential equations with constant first order coefficients

20 p3657 A70-39120

Parametric boundary layer theory numerical solution in two parameter approximation, solving partial differential equation by finite difference method

20 p3611 A70-39807

Shallow shell theory partial differential equations, obtaining integral representations of general solutions

20 p3732 A70-40102

Optimal terminal control stochastic synthesis for linear systems by Bellman second order nonlinear partial differential equation

21 p3801 A70-40607

Viscous magnetofluid dynamic one dimensional annular flow, reducing three dimensional field equation to coupled linear partial differential equations

21 p3855 A70-40889

Membrane theory of shells, reducing equilibrium equations to single second order partial differential equation through transformation in terms of stress function derivatives

21 p3939 A70-42031

Ducted propeller subsonic rotational flow with free boundaries, presenting second-order partial differential equation solution without linearizing assumptions

24 p4287 A70-45269

Continuous structural systems stability under random load excitation from linear partial differential equations of motion

24 p4421 A70-45281

PARTIAL PRESSURE

NT HYPOXEMIA

NT OXYGEN TENSION

Endtidal oxygen and carbon dioxide partial pressures, oxygen uptake and carbon dioxide after apnea and during apneic diving

02 p0235 A70-12089

Partial oxygen pressure in hyperaemic carotid capillary blood under hypoxic conditions, noting correlation with age and body weight

10 p1822 A70-25088

Gaseous monoxides dissociation energies and free energy functions tabulation for calculating partial pressures

14 p2545 A70-30902

Residual gases partial pressure measurement in vacuum chamber by mass spectrometer with electromagnetic scanner and electron multiplier, detecting electron current

19 p3421 A70-37466

PARTICLE ACCELERATION

Heavy nuclei survival in cosmic rays Colgate supernova acceleration model, assuming plasma wave instability in shock wave

02 p0357 A70-11788

Multiparticle processes in acceleration energy region, comparing various models, noting role of diffraction

03 p0526 A70-13044

Electrostatic charged particle acceleration and ion thruster function in geostationary satellite station-keeping and attitude control, orbital transfer and drag compensation

[ONERA-TP-764] 04 p0735 A70-14934

Ionization losses effect on energy spectra of cosmic ray heavy nuclei with Fermi acceleration, using transfer equation

04 p0742 A70-15201

Particle acceleration during 1966-1967 radio burst of 3C 273, indicating breaking down of model of expanding source emitting synchrotron radiation

05 p0918 A70-16927

Criteria for particle motion with constant acceleration in curved space-time

06 p1104 A70-17186

Quasi-steady coaxial MPD arcs characteristics, studying Ar ion velocities, electrostatic ion acceleration mechanism and arc voltage gradient

[AIAA PAPER 70-165] 06 p1132 A70-18208

Coherent synchrotron emission in Crab Nebula associated with electron gyromotion, discussing models for high energy particle acceleration

07 p1375 A70-18848

Ion acceleration in spherical and cylindrical plasma layers formed by spherical plasmoid expansion in plasma cylinders

07 p1384 A70-19414

Electromagnetic acceleration and energy losses of charged chromospheric-coronal plasma electrons and protons in unsteady magnetic fields of sunspots

07 p1384 A70-19417

Atomic and molecular beams produced by nozzle beams aerodynamic acceleration, discussing condensation effects, internal energy, scattering cross sections, etc

07 p1341 A70-20102

Binary mixture molecular beam apparatus combining aerodynamic acceleration and arc heating techniques, discussing particle energy and density

07 p1341 A70-20106

Light ions acceleration to high energy by pulsed high intensity electron beams

08 p1553 A70-21694

Synchrotron emission of relativistic particle in magnetic field with radiative reaction force comparable to Lorentz force, emphasizing pulsar cosmic ray electron acceleration

09 p1731 A70-22273

Magnetospheric substorms magnetograms taken at various stations, showing preceding ring storm particles deflection into magnetic tail

10 p1876 A70-24496

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux

11 p2107 A70-25526

Plasma turbulence theory, discussing particles stochastic acceleration in strong electric field

11 p2094 A70-26753

Primary cosmic rays electron-positron component, considering relative roles of collision-produced and directly accelerated electrons

12 p2292 A70-27382

Stochastic particle acceleration by VLF in weakly turbulent plasma in magnetic field, considering nonlinear cyclotron damping

13 p2468 A70-29935

Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations

14 p2630 A70-30220

Particle acceleration by electrostatic waves propagation in inhomogeneous plasma in terms of phase velocity, magnetic field and wave amplitude

15 p2778 A70-31912

German monograph on artificially accelerated proton measurements for ionization calorimeter calibration and cosmic radiation energy spectrum analysis during balloon flight

17 p3081 A70-34572

Pulsars as cosmic ray sources, emphasizing time properties of acceleration mechanisms

17 p3151 A70-34913

Acceleration and precipitation of Van Allen outer zone energetic electrons, using correlation experiment between magnetosphere and auroral zone

18 p3306 A70-36010

Van Allen electrons acceleration and precipitation during magnetospheric substorms in relation to auroral processes, discussing energy and pitch angle diffusion processes

19 p3411 A70-37495

Acceleration of high energy cosmic rays by pulsar LF electromagnetic radiation

19 p3501 A70-38085

Cosmic electron spectrum formation by acceleration, considering metagalactic background X radiation

20 p3695 A70-39174

Particle acceleration phase in solar flare development, discussing H alpha maximum, hard X ray burst and bremsstrahlung

21 p3880 A70-40971

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux

21 p3892 A70-41276

Hot electrons bunch spread deceleration in collisionless plasma, discussing stationary moving jump formation similar to shock wave

22 p4077 A70-42299

Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations

24 p4399 A70-46295

PARTICLE ACCELERATOR TARGETS

Polarized Co59 target using He3-He4 dilution refrigerator, analyzing fast neutron scattering

14 p2584 A70-30508

Bremsstrahlung and photoneutrons from electron-photon cascades in thick tungsten and tantalum targets bombarded with low energy electrons

20 p3674 A70-39222

High energy alpha particle beam exposed to plastic scintillators, determining spallation cross section for C12/alpha, alpha n/C11

21 p3852 A70-41138

PARTICLE ACCELERATORS

NT BETATRONS

NT ELECTRON ACCELERATORS

NT ION ACCELERATORS

NT LINEAR ACCELERATORS

NT OMEGATRONS

NT SYNCHROCYCLOTRONS

NT SYNCHROTRONS

NT VAN DE GRAAFF ACCELERATORS

Electron and proton accelerators design characteristics, performance capabilities and specifications, emphasizing opposite-beam techniques for elementary particles interactions studies

03 p0527 A70-13045

High energy neutron accelerator as fast neutron radiography source, comparing contrasts with gamma and X radiography

05 p0844 A70-15779

High velocity microparticle simulation techniques for studying properties, dynamics and origin of micrometeoroids, considering accelerators and impact results

06 p1029 A70-18131

Axicon systems for spectroscopy of light emitted by foil-excited accelerator beams, discussing scattering contribution to spectral line widths

07 p1287 A70-20083

Electrons radial motion and beam focusing in linear accelerator allowing for perturbing forces, calculating particle trajectory

10 p1926 A70-25110

Electrodeless traveling wave accelerator for wind tunnel use, determining gas stream density for subsonic and supersonic operation

16 p2889 A70-33868

Thermal neutron radiography with small accelerators using optimized collimator and fission increased flux

24 p4376 A70-45752

PARTICLE BEAMS

NT ATOMIC BEAMS

NT ELECTRON BEAMS

NT ION BEAMS

NT MOLECULAR BEAMS

NT NEUTRON BEAMS

NT PION BEAMS

NT PROTON BEAMS

Electron and proton accelerators design characteristics, performance capabilities and specifications, emphasizing opposite-beam techniques for elementary particles interactions studies

03 p0527 A70-13045

Electromagnetic wave growth effect on wave field propagating along beam-plasma slab, showing Poynting vector component

04 p0651 A70-15293

Transverse particle and energy fluxes in toroidal magnetic traps magnetic fields with ionized plasmas, discussing particle diffusion coefficient and thermal conductivity

08 p1554 A70-21807

Fast argon beam scattering by gas molecules measured to study atomic and molecular two body systems involving nitrogen and oxygen atoms

09 p1732 A70-22902

Lunar communications systems considering use of satellites, metallic particle belts, rockets, lasers and particle beams

14 p2634 A70-30196

Cryogenics and nuclear physics, discussing particle beam handling magnets, superconducting accelerators, detectors, moderators, low temperature irradiation facilities, etc

14 p2616 A70-31014

PARTICLE CLOUDS

U CLOUDS

PARTICLE COLLISIONS

LF electromagnetic waves theory for turbulent plasma based on expansion of particle collision and turbulent pulsation integrals 01 p0150 A70-10211

Oxygen collisional quenching rate in F region determined by comparing nightglow intensities with intensities calculated from electron density profiles 01 p0070 A70-10403

Daytime ionospheric electron temperature as function of electron-neutral particle collision reaction and nonlocal heating effect 01 p0170 A70-10407

Soviet book on plasma physics covering noninteracting and colliding particle motion, elementary processes, electric discharges, kinetic equations, macrocharacteristics, plasmoids, etc 01 p0151 A70-10500

Collision induced dissociations of 2000 eV diatomic O, N, CO and NO positive molecular ions as function of reactant ion internal energy 01 p0148 A70-11354

Evolution and entropy of partially ionized collision dominated plasmas interacting with radiation based on statistical analogs of irreversible thermodynamics 02 p0346 A70-11902

Cosmic ray muon source implied from hadrons X pairs produced in primary cosmic ray collisions 02 p0360 A70-12845

Cosmic ray particles inelastic nuclear interactions mean free path in iron measured in Wilson chamber and ionization calorimeter 03 p0554 A70-13030

Interacting meson systems effective masses with/without secondary proton measured, detecting heavy boson resonances and fireballs, considering proton nuclear interactions 03 p0472 A70-13031

Pion and nucleon interactions with atomic nuclei at 200 GeV using Wilson chamber and ionization calorimeter, determining pion collisions characteristics 03 p0555 A70-13034

Multiparticle processes in acceleration energy region, comparing various models, noting role of diffraction 03 p0526 A70-13044

Angle of incidence effect on oblique impact crater formed by high speed solid spherical particles colliding with massive lead targets 03 p0592 A70-13449

Density effects on transport coefficients of gaseous mixtures, solving modified Boltzmann equation including collisional transfer and three-particle collision effects 03 p0606 A70-13576

Radar Thomson backscatter observations of ion temperature and ion-neutral collision frequency used to investigate reversible heating in E region 03 p0477 A70-13988

Singularities arising during collisions in restricted n-body problem elimination, discussing Jacobi integral and finite-mass body configuration 04 p0714 A70-15354

Single impact data considered ineffective in estimating target damage induced by micron-sized particle cloud impingement 04 p0737 A70-15425

Motion near collision singularity in perturbed two body problem, applying method to boundedness proof for Sperling cluster energy 05 p0909 A70-16339

Collisions effects on cylindrical antenna impedance near plasma frequency of isotropic nonMaxwellian plasma, allowing for collision frequency dependence on electron energy 06 p1020 A70-17567

Ion-neutral coupling in plasma acceleration revealed by velocity disparities determined spectroscopically [AIAA PAPER 70-166] 06 p1133 A70-18219

Modified Maxwellian models for particle reflection in free molecular flow, correlating model parameters with gas-surface properties 06 p1110 A70-18259

Gas stream-elastic solid surface scattering characteristics, calculating trajectories, particle flux angular distributions, velocities, transfer coefficients, etc 06 p1111 A70-18265

Particle, momentum and energy flux spatial distributions of molecules scattered in collisions of low energy Ar atoms with mica and Ag surfaces 06 p1111 A70-18268

Heavy particle impact ionization in hot gases analyzed for ionization rates relationships 06 p1113 A70-18278

Particles and surface brightness distributions in nonionized cometary tails, considering near nucleus source and particle acceleration 07 p1378 A70-19035

Stress tensor for relativistic weakly ionized plasma in HF electromagnetic field taking into account collisions 07 p1348 A70-19197

Diatomic Br molecular vibration-rotation coupling effects on energy transfer during Br-Ar collisions, determining probability distributions 07 p1339 A70-20054

Inelastic scattering of He ions by Ne as function of angle, initial energy and energy loss using collision spectroscopy 07 p1346 A70-20243

Deviating and nondeviating absorption of radiowaves in ionosphere, deriving vertical distribution of particle collisions in E layer 08 p1490 A70-21431

Heavy particle collisions impact parameter and wave equations for direct excitation and electron capture processes 08 p1548 A70-21502

Fast argon beam scattering by gas molecules measured to study atomic and molecular two body systems involving nitrogen and oxygen atoms 09 p1732 A70-22902

Electromagnetic wave propagation through weakly inhomogeneous plasma layer with frequent electron-molecule collisions, noting applicability to ionosphere 11 p2003 A70-25530

Hydrodynamic equations for ions and electrons of ionized collisional plasma in inhomogeneous magnetic field based on Boltzmann kinetic equations 11 p2088 A70-25710

Linear theory of density gradient drift waves in stable collision dominated plasma using external excitation method 11 p2090 A70-26019

Collisional drift-wave turbulence in Li Q-machine plasma far unstable regime, discussing power spectra variations of density fluctuations 12 p2280 A70-27784

Glorified shadows in molecular beam scattering, considering undulation spacing, bound states number and extrema amplitudes in terms of optical analogies 13 p2454 A70-28624

Electrical conductivity without particle-particle or wave-particle collisional noise or radiation 13 p2463 A70-29238

Radio wave transmission through magnetized plasma layer as function of electron concentration and collision frequency, using coaxial accelerator 13 p2366 A70-29377

Collision and motion effect on rocket-borne quadrupole probe transfer impedance near lower hybrid resonance in ionosphere 13 p2371 A70-29919

Plasma kinetic equation, expressing interaction term as sum of binary collisions between close and collective interactions among remote particles 14 p2625 A70-31297

Semiclassical collision theory for computing fine structure proton impact excitation rates and cross sections for positive ions, presenting excitation rate tables 14 p2652 A70-31383

Potential gradient effect on charge separation mechanism during interaction of polarized snow crystals with ice sphere 15 p2769 A70-31445

Approximate dispersion relation for MHD waves from macroscopic plasma equations including particles collision terms 16 p2859 A70-32941

Effective cross sections for molecular hydrogen and hydrogen positive ion formation in collisions between He, Ne and Ar ions or atoms 16 p2954 A70-33193

Multistate impact parameter treatment of heavy particle collisions modified to include higher state couplings for electronic wave functions 16 p2956 A70-34309

Lorentz plasma electron velocity distribution with allowance for elastic and inelastic collisions, using Legendre polynomial and spherical harmonic expansions in Boltzmann equation 16 p2945 A70-34337

Krook gas particle collision model for relaxation from nonequilibrium to equilibrium Boltzmann distribution in spatially uniform gases 17 p3068 A70-34697

Na D lines emission cross sections measurement from ionic and neutral gases collisions at simulated meteor conditions 18 p3318 A70-37014

Photon pair annihilation process in graviton pair, examining IR emission in two scalar particle collision 19 p3472 A70-38172

Collisions in one, two and three dimensional plasmas of finite sized particles and clouds, obtaining scattering cross sections and Fokker-Planck coefficients 20 p3679 A70-39663

Charged particle collisions, discussing electron impact ionization of positive ions, detachment from negative ions, ion collisions, etc 20 p3676 A70-40154

Low voltage arc nonequilibrium ionization rate, taking into account atom-electron collisions 20 p3684 A70-40389

Configuration space three body elastic scattering theory for initially free independently moving particles collisions under short range forces 21 p3852 A70-40595

Coupling constant and binary collision expansions for ion motion in plasma line broadening 21 p3855 A70-40722

Electromagnetic wave propagation through weakly inhomogeneous plasma layer with frequent electron-molecule collisions, noting applicability to ionosphere 21 p3786 A70-41280

Electron-neutral collisional damping of longitudinal electron oscillations in weakly ionized plasma, solving linearized Boltzmann-Vlasov equation 21 p3860 A70-42014

Plasma sheath boundary in anisotropic plasma taking into account ionization rate, momentum transferring collisions and finite ion temperature 22 p4077 A70-42291

Neutron-electron collision damping and displacing of space echo in plasmas, indicating use for density measurement 22 p4082 A70-43244

Ionospheric bremsstrahlung X ray flux and ionization rate, considering electron-atom and electron-ion collisions as function of altitude 22 p4095 A70-43293

Upper atmosphere photoionization by extreme UV solar radiation compared with ionization by charged particles collisions 22 p4096 A70-43302

Scale invariance models correlation with cosmic ray data, comparing neutrino- and antineutrino-nucleon scattering 23 p4210 A70-43800

Classical calculations for energy transfer to diatomic molecules with rotational and vibrational degrees of freedom in atom-diatom-molecule collisions 23 p4221 A70-44010

Enskog theory extended to three particle collisions for gas transport properties 23 p4222 A70-44427

Normal shock waves structured by nonequilibrium radiative and electron-atom collisional ionization, using generalized radiation model 24 p4324 A70-45290

Plasma concentration and heavy particle-electron collision frequency in open cylindrical cutoff resonator based on frequency shift and passband broadening data 24 p4385 A70-45455

Plane parallel collision between two solid bodies of similar shape, discussing kinetic energy losses and motion after impact 24 p4427 A70-46376

Plane parallel collision of two solid spherical bodies with mass centers coincident with geometrical centers 24 p4427 A70-46377

NT PROTON DENSITY [CONCENTRATION]

Particle distribution and plasma nonequilibrium field evolution with turbulence generation by microwave field, considering plasma kinetic instability 01 p0150 A70-10212

Solid hydrogen condensation on interstellar grain surfaces at extremely low temperatures related to H atoms density 01 p0183 A70-10896

Electromagnetic showers fluctuations produced by electrons and photons in heavy materials, determining moments of particle numbers and bremsstrahlung differential cross sections 01 p0171 A70-11026

Extensive air shower axis position determined using energy methods and radial distribution geometry of particle density 01 p0171 A70-11252

Charged particles distribution according to multiplicity during pion-nucleon and nucleon-nucleon interactions at high energies 03 p0555 A70-13033

Density spectrum exponent of penetrating muon component of extensive air showers determined for hodoscopic assembly of Geiger-Muller counters with lead absorber 03 p0556 A70-13043

Equatorial magnetosphere particle and field data from 18 April 1965 geomagnetic storm reanalyzed in context of drift mirror instability theory 03 p0560 A70-13976

Charged particle distribution in heterogeneous medium using dispersion model to describe quasi-charged particles interaction with internal surfaces
03 p0536 A70-14370

Electron temperature and particle density measurements in annular MHD duct, demonstrating Hall effect existence
04 p0725 A70-14532

Interplanetary dust measurements near earth compared to theories predicting dust characteristics, discussing concentration, flux, impact rate and solar radiation pressure
04 p0749 A70-14619

Charged particle concentration emitted by inhomogeneous plasma determinable from emission spectral lines broadening, suggesting error correction procedure
05 p0889 A70-16541

Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity
05 p0915 A70-16754

Particle density of jet plumes exhausting in vacuum calculated for He, Ar and N
06 p1052 A70-18388

Individual extensive air showers axes localized by measurement of charged particle densities, assuming age parameter
07 p1365 A70-18777

Particles infinite systems equilibrium state by canonical ensemble theory, demonstrating existence and uniqueness of limiting distribution functions dependence on density
07 p1333 A70-18936

Optical hardness effect on dispersed particles spectrum determination accuracy by spectral transmittance
07 p1330 A70-20309

Meteor abundance determination by visual observation, calculating sighting probabilities for various magnitudes
08 p1573 A70-20949

Plasma sheath in quadrupole and hexapole geometries, investigating magnetic field variation, particle density and electrostatic potential in transition layer
08 p1552 A70-21530

Sporadic meteoroid particles in ionospheric spatial density determined from kinetic energy measurements
10 p1940 A70-24322

Polarization of solar scattered radiation measured by radio probes for aerosol particle concentration and size distribution as function of altitude
10 p1884 A70-25253

Low energy charged particle distribution within earth magnetosphere and environs, suggesting solar origin for storm time ring current protons
13 p2483 A70-30089

Meteor abundance determination by visual observation, calculating sighting probabilities for various magnitudes
15 p2806 A70-32761

Solar wind observations by Pioneer 6, considering particle density, flux and kinetic energy
16 p2972 A70-32949

Gamma phase particle distribution changes in homogeneous segregation in Co-Ti alloy attributed to elastic interaction during aging temperature changes
16 p2931 A70-33208

Positron fraction among primary cosmic ray low energy electrons, using pure emulsion stack exposed under residual atmosphere
19 p3504 A70-38109

Schlieren method application in plasma diagnostics, obtaining density change of neutral, ion and electron gases
21 p3825 A70-40950

Stagnation temperature of two phase nozzle gas jet containing solid particles on particle density and velocity
21 p3748 A70-42220

One dimensional radiation transfer equation in non-homogeneous particle field, discussing spatial variations, particle number density, temperature, size distribution and optical properties
23 p4281 A70-44445

PARTICLE DETECTORS

U RADIATION COUNTERS

PARTICLE DIFFUSION

NT ELECTRON DIFFUSION

Particle diffusion distribution function of two component ionized degenerate gas from Boltzmann transport equation, giving tables for various spin and mass ratios
01 p0151 A70-10318

Diffusion categories and propagation of radioactive elements in lower atmosphere determined with respect to measured radiation balance, temperature gradient and wind
03 p0521 A70-14290

Galactic cosmic rays scattering by solar wind magnetic field fluctuations, considering energy and momentum transfer
04 p0739 A70-14596

Energy spectrum time dependence of solar cosmic ray event of 28 January 1967 measured in Northern Hemisphere, discussing particle diffusion and magnetic trap
05 p0902 A70-16459

Minority current carriers diffusion in heterojunctions and p-n junctions in AlAs-GaAs, using X ray microanalyzer performing electron beam scanning
06 p1126 A70-17816

Kinetic theory applied to free flow in spherical geometry to study collisionless thermal escape of particles from planetary atmospheres
06 p1147 A70-18293

Mass variation laws in light of Tsiolkovskii hypothesis, considering particle separation rates and thermal energy losses for actual jet engines
07 p1363 A70-19088

Electrical conductivity of collisionless magnetoplasma in weakly turbulent magnetic field, using quasi-linear approach for diffusion equation for distribution function describing test particles
07 p1352 A70-19987

Cosmic ray microvariations relation to solar wind structure, particle scattering models, spatial distribution, time variations, etc
07 p1372 A70-20336

Diffusion coefficient of charged particles in HF stabilization of current-convective instability measured in Ge semiconductor electron hole plasma
07 p1355 A70-20365

Horizontal turbulent diffusion model of cloud, determining particles dispersion as function of time
08 p1538 A70-21111

Boltzmann systems dynamics, discussing excitation spectrum, momentum relaxation time, particle diffusion trajectory, macroscopic theory of quasi-collective processes, hydrodynamics, etc
08 p1545 A70-21421

Diffusion layer correspondence to phase diagram in terms of constituent phases and composition
09 p1702 A70-22563

Cosmic rays diffusion through interstellar plasma noting microstabilities role
10 p1931 A70-23972

Plasma turbulent diffusion across constant magnetic field, noting magnetic, kinetic energy and relaxation times ratio effects
11 p2094 A70-26755

Nonlinear effects in beam-plasma type interactions, studying particle redistribution under inhomogeneous oscillating electric field
11 p2095 A70-26759

Dispersion/peak broadening in gel chromatography measured with nonporous and porous column packings, suggesting diffusion controlled separation with linear permeation isotherm
12 p2181 A70-27474

Boron particles combustion behavior prediction by incorporating condensed phase effect into diffusion controlled model
13 p2472 A70-29612

Radial diffusion role in radiation belt dynamics from flux profiles time variations observations or equilibrium states analysis
13 p2484 A70-30094

Trapped particles radial diffusion in formation and decay of radiation belts
13 p2484 A70-30096

Trapped protons population explanation by combined pitch angle scattering and radial diffusion across L shells
13 p2484 A70-30097

Diffusion layer microprobe analysis during chromalumination of Inconel turbine blade
14 p2595 A70-30293

Cosmic ray transport in solar wind generalized with anisotropic diffusion approximation
14 p2632 A70-30887

Aerosol particle convective diffusion from gas medium into obstacle, solving Fokker-Planck equation for particle distribution
15 p2774 A70-31493

Beryllium fibers and Al matrix interactions at high temperatures and various durations, investigating diffusion by X ray diffraction, electron microscope and microprobe analysis
15 p2757 A70-31812

Stress relaxation of Mo under plastic deformation controlled by diffusion of interstitial atoms and dislocations, determining activation energy
15 p2758 A70-32124

Two phase axisymmetric jet, studying dispersion of pulverized impurity consisting of particles of various sizes
15 p2721 A70-32135

Book on dynamics of geomagnetically trapped radiation, covering radiation belts control, adiabatic theory, trapped particle diffusion, etc
16 p2972 A70-34300

Proton distribution in radiation belt inner zone from radial diffusion addition to cosmic ray produced albedo-neutron decay and atmospheric collision loss
17 p3150 A70-34644

Alloy hardening statistical theory, applying flow stress to second phase randomly dispersed particles
17 p3191 A70-35458

Electrons and ions diffusion effect on vertical distribution in F region, discussing diurnal variations at various heights
18 p3254 A70-37027

Solar protons directional and omnidirectional measurements during particle event of 25 February 1969 by Heos 1 spacecraft, indicating particle diffusion in interplanetary space
19 p3496 A70-37506

PARTICLE EMISSION

NT ELECTRON EMISSION

NT FIELD EMISSION

NT ION EMISSION

NT NEUTRON EMISSION

NT PHOTOELECTRIC EMISSION

NT SECONDARY EMISSION

Alpha particle emissivity measurement of moon by Explorer 35 spacecraft for U 238 abundance in outer crust
01 p0181 A70-10573

Gas flow proportional counter for measuring high emission rates of alpha particles, discussing design and operation
04 p0695 A70-15570

Neutrino emission, mass loss and giant branch termination in young clusters with giants originating from intermediate mass main sequence stars
06 p1138 A70-17277

Particle ejection moments from tail of comet Ikeya-Seki determined from photographs having visible terminal synchrones
06 p1140 A70-17732

Laser characteristics and applications in high temperature research including metal heating, welding, machining, surface particle emission and plasma production
07 p1301 A70-19881

Nonthermal mechanism for high energy radiation and particle emission from X-stars and pulsars
08 p1575 A70-21364

Neutrino emission effect on collapse of supermassive stars, estimating energy radiated, discussing envelope explosion
10 p1938 A70-24022

Dissipation mechanism and period rate increase in neutron star pulsar model with neutrino emission for damping
12 p2312 A70-28368

Plasma turbulence in Van Allen belts, examining weak turbulent electromagnetic wave properties, with emphasis on trapped energetic particles radiation
13 p2486 A70-28555

Comet Ikeya-Seki 1965 f tail formed by dust particles continuous ejection, using perihelion photographs
19 p3527 A70-38792

Particle ejections in solar atmosphere and chromosphere structure, discussing dark halo exhibited by H alpha line in active region
20 p3699 A70-39464

Emitting plasma probes floating potential, discussing emission rate dependence on probe temperature and surface coverage by seed
20 p3632 A70-39607

PARTICLE ENERGY

NT ELECTRON ENERGY

NT ELECTRON STATES

NT PROTON ENERGY

Electric power generators performance based on kinetic energy conversion of radioactive isotope decay products, noting space applications
01 p0140 A70-10217

Multiparticle processes in acceleration energy region, comparing various models, noting role of diffraction
03 p0526 A70-13044

Earth magnetosphere low energy plasmas measurements via McIlwain magnetic shell parameter, showing dependence on geomagnetic disturbances
03 p0557 A70-13284

Electron and positron flux steady state in interstellar space relationship to differential energy spectrum exponent in cosmic rays, discussing galactic halo and age
03 p0561 A70-14151

Spectral line widths in MPD arc jet measured to determine plasma electron density and heavy particle temperature
03 p0536 A70-14371

Satellite observation of energetic particles and magnetic fields, discussing radiation belts, magnetosphere, galactic cosmic rays, etc
04 p0740 A70-14620

Quarks discovery in cores of energetic extensive air showers, discussing results evaluation and interpretation
04 p0722 A70-15299

Bethe function for ionization losses in energy of elementary particles heavier than electron
05 p0899 A70-15961

- High energy solar flare data from neutron monitor stations supplemented by low energy data from interplanetary space probes Pioneer 6 and 7
05 p0902 A70-16443
- Cold molecular beam of helium impinging on LiF or Si crystals investigated for gas-surface interactions, using time of flight method
06 p1043 A70-18255
- Momentum transfer from neutral nitrogen molecules to solid surfaces measured for various incident beam molecule energies
06 p1112 A70-18272
- Attractive potential effects on free and bound particles distribution in dissociating gas, studying recombination reaction effects on gas kinetic structure
06 p1044 A70-18280
- Energetic particle intensity fluctuations during bright aurora, using rocket-borne measurements
06 p1060 A70-18548
- Source power molecule lifetime, acceleration and particle velocity in region near comet nucleus determined from brightness
07 p1378 A70-19036
- High and medium energy molecular beams - Conference, Cannes, July 1969
07 p1339 A70-20101
- Molecular beam research at low, intermediate and high energies, discussing inelastic processes, intermolecular potentials, etc
07 p1344 A70-20131
- Intermolecular potential of atoms and/or molecules determined from scattering cross sections of supersonic He and/or Ar atomic beams
07 p1344 A70-20132
- Scattering cross sections of K atoms on bromine molecules determined as function of particle energy using supersonic atomic beams
07 p1344 A70-20133
- Charge exchange and electron loss measurements in steam target exposed to high energy hydrogen ions beam, using equilibrium fractions method
07 p1345 A70-20142
- Highly variable component protons and alpha particles identified in low energy cosmic rays by IMP 4
07 p1369 A70-20199
- Relativistic magnetic monopoles detection in corpuscular primary cosmic rays, describing equipment and results
07 p1371 A70-20333
- Longitudinal nuclear-electromagnetic cascade in ionization spectrometer simulated by Monte Carlo method, noting energy relationship to particle sum recording
08 p1500 A70-21743
- Low pressure plasma stability in cylindrical crimped magnetic field, considering convective perturbations and particle velocity distribution
08 p1555 A70-21981
- Shock heated molecular beams of argon, oxygen and mixtures with helium, measuring particle velocities and gas dissociation
09 p1733 A70-23180
- Fast neutral particles produced in electron-ion oscillation discharge as function of gas pressure and magnetic field
09 p1736 A70-23190
- Satellite-borne spectrometer for low energy ion measurement
10 p1874 A70-24314
- Satellite mounted device for detecting and recording 20-110 Mev solar neutrons
10 p1889 A70-24488
- Neutron monitor air pressure attenuation coefficient dependent on neutron energy being recorded
10 p1889 A70-24491
- Universe neutrino energy density estimation based on photon-neutrino weak interaction coupling theory
10 p1920 A70-24567
- Muon energy measurements using pair production, bremsstrahlung cross sections, burst sampling and Monte Carlo calculations
10 p1920 A70-24857
- Highest energy primary cosmic ray particles, considering air shower characteristics and energy spectrum shape
12 p2292 A70-27381
- Cosmic ray muon energy spectra at large zenith angles measured by optical spark chamber magnetic spectrometer
13 p2476 A70-28933
- Vector magnetic field and energetic particle flux profiles, indicating geomagnetically aligned currents associated with visible auroral arc
13 p2397 A70-29197
- High energy cosmic ray muons, investigating arrival from both low and high galactic latitudes
13 p2478 A70-29482
- Low energy charged particle distribution within earth magnetosphere and environs, suggesting solar origin for storm time ring current protons
13 p2483 A70-30089
- Superhigh energy particles detection by transition radiation, measuring Lorentz factor of emitted spectra
14 p2616 A70-31003
- Neutral particle temperature, pressure and velocity measurements in argon plasma jet, using refraction index
14 p2625 A70-31350
- Average triton energy required to produce electron-hole pair in silicon measured, describing precision charge calibration of amplifier system
15 p2784 A70-32396
- Electrons, positrons and photon energy distribution inside hydrogen plasma injected with high energy electrons
15 p2781 A70-32429
- Metal surface ionization measurements for upper atmosphere and interplanetary space energetic neutral hydrogen analyzer design
17 p3138 A70-35309
- Miniature multigrid probes for measuring energy spectra of charged particles and absolute plasma densities, comparing results to microwave measurements
18 p3294 A70-36150
- Upper atmosphere neutral component temperature measurement from thermal spread of charged particles beam
18 p3247 A70-36182
- Low energy solar and galactic cosmic rays propagation in interplanetary medium observed by Zond and Venus space probes, discussing shock waves retardation
19 p3493 A70-37475
- Auroral substorm temporal relationship to particle kinetic energy increases within trapping region, observing geomagnetic field distortions at higher latitudes during disturbed epochs
19 p3411 A70-37494
- Energetic storm particle events observation, noting association with solar protons and interplanetary shock waves
19 p3496 A70-37518
- Atmospheric fluorescence observation of supernova energetic photon short pulse burst, using photomultiplier
19 p3500 A70-38079
- High energy charged particle observations on OSO 3 at various rigidities
19 p3505 A70-38117
- Charge spectrum of high and low energy heavy cosmic ray nuclei, using balloon-borne nuclear emulsions
19 p3507 A70-38130
- Primary cosmic rays above 4.5 GV, measuring charge composition from balloon flight
19 p3507 A70-38133
- High energy primary cosmic ray muons arrival directions examined for anisotropies underground
19 p3508 A70-38141
- Energetic cosmic ray particles transfer through interstellar space based on galactic disk model
19 p3511 A70-38158
- Dense plasma thermodynamic and electromagnetic properties, discussing correlation energy
19 p3480 A70-38181
- Solar wind and flare energetic particles properties and interactions, surveying interplanetary magnetic field, planetary bow shock waves, neutrons, neutrinos, etc
19 p3511 A70-38418
- Equilibrium energy spectra of cascade electrons and photons in light and heavy materials as function of total shower energy
20 p3675 A70-39304
- Geomagnetically trapped energetic nuclei Z greater than or equal to 3 in earth outer radiation zone, measuring intensity ratio to alpha particles
20 p3698 A70-39327
- Ionization spectrometer for hadron energy measurement, analyzing instrument accuracy by Monte Carlo model for nuclear-EM cascade in iron absorber
20 p3635 A70-40456
- Temporal and spatial origin of hot ions in turbulent plasma heating, using particle analysis
21 p3855 A70-40824
- Energy losses frequency distributions for fast charged particles in small pathlengths in equimolar He-carbon dioxide mixture
21 p3852 A70-40973
- Earth magnetosphere LF wave annular trap, examining high energy particle interaction with magnetosonic waves
22 p4013 A70-42300
- Galactic X ray background due to inner bremsstrahlung associated with suprathermal particles, taking into account interstellar gas self absorption and ionization rate
22 p4093 A70-42465
- Solar high energy particles penetration into ionospheric heights at equator, analyzing optical flare and solar proton data from ATS-1 and Explorer 34
23 p4235 A70-43816
- Spallation limits on low energy cosmic and nuclear gamma rays interstellar fluxes, evaluating fast particle effects on interstellar medium
24 p4397 A70-45758
- Translational temperature measurement of atoms and ions in plasma based on wavelength reduction by X ray spectroscopy
24 p4388 A70-46208
- PARTICLE FLUX
U FLUX [RATE]
PARTICLE FLUX DENSITY
NT ELECTRON FLUX DENSITY
NT NEUTRON FLUX DENSITY
NT PROTON FLUX DENSITY
- Interplanetary dust measurements near earth compared to theories predicting dust characteristics, discussing concentration, flux, impact rate and solar radiation pressure
04 p0749 A70-14619
- Neutral particle flux measurements in plasma wind tunnel using BeCu detector, discussing role in collisionless flow dissipation processes
04 p0727 A70-14994
- Solar neutrino spectroscopy using various radiochemical detectors for Be 7, N 13, O 15 and B 8 neutrino fluxes, noting Li 7 suitability for determining CNO cycle
05 p0898 A70-15949
- Solar flare alpha to proton flux ratios on 23 May 1967 observed following interplanetary disturbances, suggesting electric fields as cause of modulations
05 p0902 A70-16444
- Solar core opacity influence on revised photospheric ion abundances, discussing neutrino flux prediction doubling in solar models
05 p0905 A70-16985
- Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line
06 p1135 A70-17894
- Angular distributions of fast scattered particles resulting from noble gases collision with metal surfaces
06 p1112 A70-18271
- Energetic particle intensity fluctuations during bright aurora, using rocket-borne measurements
06 p1060 A70-18548
- Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes
07 p1367 A70-19445
- Micrometeor flux in near-earth space measured by satellite-borne low noise acoustic detectors
07 p1386 A70-19493
- Intensity variations of cosmic ray neutrons and mesons analyzed to isolate lunar day period
07 p1368 A70-20033
- Molecular beam interactions with solid crystalline surface with fcc lattice elementary cell, investigating intensity distribution of scattered particles
07 p1342 A70-20119
- Reflected molecular beam intensity distribution interpreted in terms of disturbances in boundary layer between gas and solid
07 p1343 A70-20122
- Particle flux densities in electric field near spherical body moving in rarefied plasma
07 p1355 A70-20368
- Cosmic ray air showers simulation, discussing high energy nuclear interaction and linear relation of primary particle energy to number
09 p1744 A70-22048
- Charged particle albedo latitude dependence estimated from balloon-borne Geiger telescopes
09 p1746 A70-23481
- Cosmic ray particle abundance in upper atmosphere during minimum solar activity estimated by nuclear photographic emulsions on balloon flight
10 p1932 A70-24438
- Directional particle flux dependence on probe orientation with respect to external magnetic field, determining pitch angle distribution from count rates
10 p1932 A70-24497
- Universe neutrino energy density estimation based on photon-neutrino weak interaction coupling theory
10 p1920 A70-24567
- Muon energy measurements using pair production, bremsstrahlung cross sections, burst sampling and Monte Carlo calculations
10 p1920 A70-24857
- Siderial time variations in cosmic ray intensity observed by inclined muon telescopes
10 p1933 A70-24858
- Solar neutrino flux measurement based on neutrino capture by large chlorine mass and subsequent Ar 37 decay in low noise environment
12 p2293 A70-27389
- Deposition zone on sphere and aerosol particles flux onto sphere as functions of flow Reynolds and Stokes numbers, discussing drop deformation effects
12 p2263 A70-27513
- Muon intensity meter for cosmic ray muon flux underground using scintillation telescope consisting of two coincidence counters
12 p2295 A70-28176
- Low momentum muon intensity dependence on geomagnetic latitude
13 p2476 A70-28919

Cosmic ray vertical muon flux measurements at sea level using spectrometer 13 p2477 A70-29124

Vector magnetic field and energetic particle flux profiles, indicating geomagnetically aligned currents associated with visible auroral arc 13 p2397 A70-29197

Radial diffusion role in radiation belt dynamics from flux profiles time variations observations or equilibrium states analysis 13 p2484 A70-30094

Micrometeor flux in near-earth space measured by satellite-borne low noise acoustic detectors 15 p2805 A70-32738

Meteor orbit parameters and incident particle flux measurements by radio methods, eliminating backscatter radar sensitivity limitations 15 p2807 A70-32814

Cosmic ray muon intensity deep underground vs depth measured with liquid scintillation detector hodoscope 18 p3308 A70-36897

Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes 18 p3309 A70-36919

Flare associated high energy photon and particle fluxes characterized by short rise times and longer lasting decays, discussing plasma emissions 19 p3493 A70-37473

Solar wind fluxes observed onboard Venera 2 and 6 compared with earth electromagnetic field pulsations and short period disturbances 19 p3494 A70-37479

Trapped particle population changes associated with solar events, discussing solar wind discontinuity effects on magnetosphere 19 p3495 A70-37487

Solar cosmic ray protons and electrons increase during 25 February-5 March 1969 observed by Venus 5 and 6 space probes, discussing interplanetary medium disturbance 19 p3495 A70-37504

Particle flux diagnostics of nonisothermal low pressure plasma, using corpuscular passive method 19 p3476 A70-37556

Cosmic ray positrons and negatrons differential intensities near north geomagnetic pole from balloon flight measurements, noting solar modulation effects 19 p3503 A70-38102

Solar neutrinos flux upper limit determination, describing detection equipment and procedures 19 p3511 A70-38486

Transverse magnetic disturbances in auroral oval, examining movement, intensity, particle fluxes and field magnitude 21 p3817 A70-41090

Upper limit to primary deuteron flux and path length in space, using emulsion stack exposed near geomagnetic equator during minimum solar activity 22 p4093 A70-42673

Low density gas jet from short circular cylindrical tube, calculating molecular flux radial density variation 22 p4076 A70-43430

PARTICLE INTENSITY

Low energy electron beam diffraction, calculating intensity as wavelength function 14 p2619 A70-30489

Primary cosmic rays spectrographic measurement, using hard muon component intensity variations data 20 p3629 A70-39320

Geomagnetically trapped energetic nuclei Z greater than or equal to 3 in earth outer radiation zone, measuring intensity ratio to alpha particles 20 p3698 A70-39327

PARTICLE INTERACTIONS

NT ELECTRON CAPTURE

NT ION ATOM INTERACTIONS

NT MOLECULAR COLLISIONS

NT MOLECULAR INTERACTIONS

NT NUCLEAR INTERACTIONS

NT SPIN-ORBIT INTERACTIONS

Gas-particle primary and pure gas secondary streams turbulent mixing, solving for various mixing zone flow field parameters 01 p0061 A70-10337

Coulomb, Gaussian and harmonic oscillator potentials for particle pairs in three body system, using S wave expansion 01 p0147 A70-10519

Relaxation in gas-particle flow, analyzing thermodynamic properties, interactions, single particles and one dimensional flow equations 01 p0062 A70-10805

Convective red dwarfs Kr 60 A and 60 B structure and stability taking into account electrostatic interactions between gas particles 01 p0188 A70-11337

Cosmic ray primaries and secondaries direct heating of thermal electrons for computation of H I regions electron densities and temperatures 02 p0363 A70-11782

Direct interaction between hydrogen atom and positive ion with one electron, using Born and two and four state impact parameter treatments 02 p0344 A70-12703

Soviet book on quantum electrodynamics covering photon mechanics, electron relativistic mechanics, electromagnetic interactions, corrections to Green functions, particle interactions, etc 02 p0345 A70-12827

Multiple particle production at high energy levels and associated peripheral interaction and statistical theories 03 p0555 A70-13035

Cosmic ray particles high energy interactions during extensive air showers, noting inelastic superhigh energy collisions 03 p0556 A70-13040

Electron and proton accelerators design characteristics, performance capabilities and specifications, emphasizing opposite-beam techniques for elementary particles interactions studies 03 p0527 A70-13045

Electron flux interaction with electromagnetic field in comb type waves via linear approximation assuming small space charge 03 p0447 A70-13291

One and two center Coulomb, hybrid and exchange integrals contributing to orbit-orbit interaction in diatomic molecules evaluated for Slater orbitals combinations 03 p0528 A70-14010

Energy spectrum of cosmic radiation primary nuclei calculated from collisions against stellar light photons and 3 K black body radiation 03 p0561 A70-14185

Charged particle distribution in heterogeneous medium using dispersion model to describe quasi-charged particles interaction with internal surfaces 03 p0536 A70-14370

Lunar neutron flux due to cosmic radiation interaction with lunar surface layer, determining angular distribution and energy spectrum 04 p0738 A70-14442

Particle removal in ablation of artificial graphite linked to oxidation, using high speed motion pictures in analysis 04 p0787 A70-15610

Elastic and inelastic scattering of proton beam from Ne 20 measured for cross sections to interpret polarization data 04 p0723 A70-15636

Extensive air shower characteristics for inelasticity coefficient, nucleon-pion interaction cross sections and secondary particles, noting parameter interchangeability 05 p0898 A70-15946

Multichannel spectrometer electronic circuitry for ionization colorimeter providing data on low energy particle interactions, emphasizing reliability and accuracy 05 p0846 A70-15948

Deuteron splitting by solar neutrinos for neutrino detection, describing deuterium scintillation detector characteristics 05 p0899 A70-15954

Extensive air showers with nuclear particle interactions using ionization colorimeters, neutron monitor, scintillation and Cerenkov radiation counters 05 p0846 A70-15958

Experimental determination of solar neutrino activity from interaction cross section between neutrinos and target nuclei 05 p0900 A70-15965

Two phase transitions existence in Hubbard model of interacting electrons using one particle Green function solution 05 p0884 A70-16099

Muon-electron ratio measurements in extensive air showers, showing anomaly due to chemical composition change of primary cosmic radiation 05 p0901 A70-16274

Attractive potential effects on free and bound particles distribution in dissociating gas, studying recombination reaction effects on gas kinetic structure 06 p1044 A70-18280

Surface-particle interaction and atmospheric parameters measurements by paddlewheel satellites, discussing angular distribution of re-emitted molecules and accommodation coefficients 06 p1067 A70-18287

Rocket rectilinear motion, comparing Meshcherskii and Gantmacher-Levin equations in light of contact interaction hypothesis 07 p1392 A70-19087

Cs jet device eliminating wall influence in nonlinear radiation-atom interaction phenomena 07 p1342 A70-20109

Angular and energy distributions of hyperthermal K atoms scattered and ionized by W surface measured as function of beam particle energy 07 p1342 A70-20115

Atomic gas particles interactions with self and solid surfaces based on rarefied gas dynamics and classical mechanics 08 p1547 A70-21077

Dominant radiation field interaction with gas flow field using matched asymptotic expansion method 08 p1598 A70-21579

Geoactive low energy particles and fresh photoelectrons interactions with upper atmosphere observed by satellite Cosmos 261 08 p1492 A70-21796

Pion and nucleon interactions, tabulating average multiplicity and inelasticity values for various primary cosmic ray energy levels 09 p1745 A70-22775

Charged particle interaction influence on photoionization cross section of negative hydrogen ion, considering initial state polarization leading to free s wave electron 09 p1732 A70-22826

Atmospheric particle interaction layer in front of meteor body, discussing ionization, diffusion, excitation, recombination, heat generation and luminosity 09 p1761 A70-23059

Electron-neutrino weak interaction and heat decay coupling constants found nearly equal, describing astrophysical tests based on white dwarf stars luminosity intervals 09 p1733 A70-23451

Space charge parameters influence on electron wave and traveling wave interactions in TWT 09 p1652 A70-23654

Ionospheric photoelectrons resulting from solar UV radiation interaction with atmospheric gases, obtaining escape fluxes using Monte Carlo method 09 p1747 A70-23667

Dissipative parameters determination for relativistic gas within kinetic theory framework based on particle interaction model, assuming constant differential effective interaction cross section 10 p1867 A70-24148

Tachyons /faster than light particles/ on basis of relativity theory, noting reaction with light speed particles and relation to quantum theory 10 p1916 A70-24385

Universe neutrino energy density estimation based on photon-neutrino weak interaction coupling theory 10 p1920 A70-24567

Warm clouds electrification calculated for electro-magnetic field growth by inductive mechanism, noting role of water drop pair interaction 10 p1913 A70-24807

Quantization of Wheeler-Feynman electrodynamics, discussing spontaneous emission and connection between quantum and classical interparticle action theories 11 p2108 A70-25700

Suspended Stokes particle-single wave interaction effect on energy dissipation and vorticity of random turbulent incompressible fluid approximated by Fourier-Stieltjes integral 12 p2213 A70-28236

Neutron flux due to cosmic radiation interaction with lunar surface layer, determining angular distribution and energy spectrum 13 p2475 A70-28467

Inhomogeneous one dimensional plasma in electrostatic normal modes, considering interactions of waves and particles 13 p2460 A70-28638

Heavy particle spectroscopy, deducing collision parameters from empirical observations 13 p2456 A70-29810

Nucleon spectra, particle multiplicities and radiochemical cross sections following stopped-pion absorptions by complex nuclei, comparing calculated and experimental data 14 p2618 A70-30341

Time dependent simultaneous solution for continuity, heat conduction and motion equations of system involving neutral, electron and ion gases 14 p2665 A70-30744

Nuclear reactions and elementary particle reactions in Friedman universe with positive lepton abundance and degenerate electrons, discussing prestellar helium synthesis 14 p2620 A70-30877

Ion line Stark broadening, considering electron-ion quadrupole excitation and electron resonant scattering 14 p2620 A70-31376

Elementary particles gravitational interactions, identifying tensor field with local gravitation 15 p2776 A70-31732

Interactions of electrons, phonons and magnons with crystalline surfaces - Conference, University of Lille, France, September 1969 15 p2785 A70-32763

Ion-molecule reactions produced in phosphine by ion cyclotron resonance 16 p2855 A70-33061

Dusty gas dynamics, examining shock wave structure, boundary layers stability, flow equations, acoustic damping, velocity and density perturbations, etc 17 p3068 A70-34671

Particle penetration of solid or liquid combustible airstreams injected into air breathing combustors 17 p3073 A70-35665

Charge source density during interaction between atmosphere and electron/proton fluxes at prescribed boundary parameters 18 p3307 A70-36178

Solar energetic charged particles interaction with earth bow shock and magnetopause 19 p3494 A70-37482

Elastic materials consisting of particles with rotary inertia, long range force and dipole interactions, deriving constitutive relations 19 p3538 A70-37794

Three level gas laser amplifier theory, considering quantum mechanical atomic system in interaction with two monochromatic EM waves 19 p3446 A70-37829

Cosmic rays deuterons abundance calculation from H and He nuclei collisions with interstellar matter 19 p3506 A70-38125

Solar wind and flare energetic particles properties and interactions, surveying interplanetary magnetic field, planetary bow shock waves, neutrons, neutrinos, etc 19 p3511 A70-38418

Deep inelastic lepton-hadron scattering cross sections universality properties based on Wilson theory 20 p3674 A70-39150

Magnetron type backward wave tube with negatively charged slow wave structure, analyzing electron beam wave interaction for starting conditions 20 p3596 A70-39251

Wave particle resonances broadening by particles random motion in turbulent electric field, determining cyclotron instabilities saturation level from vanishing nonlinear growth rate 20 p3679 A70-39661

Variational formalism in mechanics of continuous media in four dimensional event space, considering model with local particle interactions 20 p3724 A70-39855

Universe homogeneous isotropic model with thermal radiation at outset, considering nucleons and antinucleons interactions 21 p3884 A70-40910

Electron exchange coupling of Gd and Gd-Y alloy dihydrides from ESR indicating negative hydrogen ion entry 21 p3862 A70-41703

Electron-ion wave interaction due to scattering by electrons, using kinetic wave equation to describe wave-particle interaction 21 p3858 A70-41712

Monoenergetic nitrogen free molecule beam impingement on solid surface, calculating satellite drag coefficients from momentum transfer measurements 21 p3745 A70-41743

Earth magnetosphere LF wave annular trap, examining high energy particle interaction with magnetosonic waves 22 p4013 A70-42300

Statistical theory of electron-positron-photon vacuum in external magnetic field, noting magnetic activation effect at low temperatures 22 p4076 A70-43000

Electron-neutral interaction parameters for Ohm law coefficients in multicomponent nonisothermal plasmas tabulated as function of electron temperature 22 p4081 A70-43015

Scattering indicatrix of electromagnetic radiation in plasma caused by electron-ion interactions 22 p3989 A70-43141

Solar wind instability from TEM waves propagating parallel to magnetic field in electron-proton plasma 23 p4235 A70-43826

Solid particles interactions during entrainment by viscous incompressible fluid in pipe, calculating interaction force as function of radius, distance and Reynolds number 23 p4181 A70-44310

Neutrino processes in lepton era as primeval fireball relic, discussing coupling constant for muon-electron neutrinos interactions 23 p4253 A70-44849

Solid surface interaction between surface with normal molecular beam, generalizing model by energy parameter simulating dissipative forces 23 p4223 A70-44994

Velocity-space homogeneous plasma instabilities due to self interaction of single species 24 p4384 A70-45253

Hoyle-Narlikar gravitation theory, considering Bohr quantization of direct interparticle action over all pairs 24 p4403 A70-45405

Solar wind two fluid model with boundary conditions describing electron and proton behavior in expanding corona 24 p4397 A70-45770

PARTICLE MASS

NT ELECTRON MASS

Field equations in particle neighborhood for spherically symmetric metric in conformal gravitation theory, considering particle inertial mass as function of position 01 p0142 A70-10492

Optical and radio pulses from pulsars as test of light speed variation with frequency and photon mass possible existence 02 p0373 A70-12394

Charged aerosol charge/mass ratio measurement and colloidal propulsion system thrust, efficiency and exhaust velocity determinations 03 p0551 A70-12936

Scintillation spectrometer design for mass and energy spectra of elementary particles, discussing block diagram 05 p0846 A70-15962

Relativity theory and quantum mechanics relation concerning point charge velocity and motion at light speed, deriving elementary particle mass formula 06 p1106 A70-17833

Heavy particles separation at sea level from overall flux of cosmic radiation, discussing method and device recording subrelativistic particles 09 p1684 A70-23732

Electrical conductivity hypothesis based on concept of transition temperature being inversely proportional to ionic mass square root 12 p2282 A70-26880

Free carriers effective mass and relaxation time in semiconductors determined from IR spectra of light reflection 12 p2285 A70-27362

Sr 83, 85 and 87 level structure and mass defect, using stripping and pickup reactions 17 p3138 A70-34625

Primary mass effects on extensive air shower characteristics, using Monte Carlo simulation 23 p4238 A70-44930

PARTICLE MOTION

Solar radiation pressure effects on zodiacal dust particle orbital velocity, computing Doppler shift of H-beta absorption line as function of elongation 01 p0070 A70-10348

Soviet book on plasma physics covering noninteracting and colliding particle motion, elementary processes, electric discharges, kinetic equations, macrocharacteristics, plasmoids, etc 01 p0151 A70-10500

Soviet monograph on transfer processes theory in statistical mechanical systems based on probabilistic approach to random particle walk 01 p0215 A70-10650

Cosmic dust particle direction, velocity and mass from ionization and momentum measurements by dust sensor during impact on Pioneer 8 satellite 01 p0088 A70-10748

Aerosol particles Brownian motion under inertial forces in absence/presence of obstacle 01 p0143 A70-10997

Normal shock waves in frozen, partly frozen and equilibrium flow in gas-solid particle mixtures 01 p0065 A70-11100

Mass point motion in inertial reference system of special relativity, finding motion equations analogous to relative motion equations in classical mechanics 01 p0145 A70-11442

Motion equations of material point in general relativity theory found analogous to equations in classical mechanics for metric in introduced physical space 01 p0146 A70-11443

Lagrange and Hamilton equations of motion of mass point in physical space of general theory of relativity based on least action principle 01 p0146 A70-11444

Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions 01 p0068 A70-11603

Particle velocity distributions in low density supersonic jets measured by molecular beam sampling technique and multidisk velocity analyzer 02 p0276 A70-11849

Charged particle self resonant motion in field of plane electromagnetic wave, showing trapped particles existence in whistlers 02 p0256 A70-12116

Geodesic motion of massless particles inside static sphere of small volume, analyzing relativistic effect of energy accumulation and release 02 p0339 A70-12117

Cosmic ray protons, He nuclei and electrons solar modulation by betatron deceleration mechanism during interplanetary space passage 02 p0357 A70-12123

Adiabatic invariance of action integral for motion in nonregular fields, explaining charged particles motion through magnetic shock front in interplanetary space 02 p0359 A70-12788

Charged particles motion in isotropic weakly ionized plasma acoustic wave associated with difference in electrons and ions entrainment by neutral particles 03 p0530 A70-13087

Galactic bending dynamics, discussing omega and zeta motions coupling of neutral hydrogen in outer region 03 p0570 A70-13553

Air-glass particle suspensions flows in shock tubes, deriving effective drag coefficients from simultaneous particle concentration and pressure measurements [ASME PAPER 69-WA/FE-21] 04 p0667 A70-14778

Relative motion of two spheroidal homogeneous rigid bodies of isolated binary system, obtaining potential energy 05 p0880 A70-15760

Motion generated by spherical body moving along axis of uniformly rotating fluid, measuring particle velocities ahead of and behind body 05 p0789 A70-16013

Formula for energy radiated from particles system applied to electromagnetic and gravitational radiation and illustrated by charged particle motion in magnetic field 05 p0882 A70-16309

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field 05 p0903 A70-16726

Criteria for particle motion with constant acceleration in curved space-time 06 p1104 A70-17186

Charged particles motion in field of whistler mode wave packet, discussing trajectories 06 p1118 A70-17377

Relativity theory and quantum mechanics relation concerning point charge velocity and motion at light speed, deriving elementary particle mass formula 06 p1106 A70-17833

Motion of gaseous medium with uniform deformation with respect to three dimensional Cartesian coordinates 06 p1036 A70-17854

Particle nonlinear motion near equatorial libration points in restricted three body problem [AIAA PAPER 70-98] 06 p1146 A70-18226

Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities 07 p1366 A70-19427

Charged particle replacement by external plasma particles in ionized inhomogeneities moving in ionosphere, considering magnetic field role 07 p1266 A70-19435

Approximate method for celestial mechanics problems, considering particle motion under gravitation from central body in cylindrical coordinate system 07 p1387 A70-19626

Material particles unrealizability of periodic motion near libration points of triaxial ellipsoid rotating steadily about polar axis 08 p1543 A70-20491

Vibration stability of two identical particles constrained to plane and restrained by three linear springs with initial stress 08 p1591 A70-21466

Solar attraction effects on zero-mass body planar motion near triangular earth-moon libration points, obtaining variational equations of motion 09 p1754 A70-22477

Book on electrodynamics of particles and plasmas covering Cerenkov and gyro radiation, point charge motion, magneto-ionic theory, Boltzmann-Vlasov equations, etc 09 p1734 A70-22637

Charged particle self oscillatory motion in plane condenser field, applying results to electrical measuring instruments theory 09 p1680 A70-23144

Charged particles velocity profile across shock determined by induction velometry, considering eddy currents effects on induced potential gradient 09 p1738 A70-23677

Velocity synchronized Fourier transform hologram camera system for recording hypervelocity particles 09 p1688 A70-23775

Newtonian gravitational system of three point masses with oscillatory motion at time approaching infinity, discussing particles mutual distance 10 p1938 A70-24182

Particle escape from Newtonian gravitational system of positive energy 10 p1938 A70-24183

Tachyons /faster than light particles/ on basis of relativity theory, noting reaction with light speed particles and relation to quantum theory 10 p1916 A70-24385

Numerical integration method for function and solution of differential equation, considering equations governing two dimensional motion of particle in air stream 10 p1910 A70-25099

Electrons radial motion and beam focusing in linear accelerator allowing for perturbing forces, calculating particle trajectory 10 p1926 A70-25110

Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model 11 p2104 A70-25546

Transformed distribution function of particle velocity of plasma in Debye thermodynamic equilibrium approximation based on statistical mechanics 11 p2091 A70-26459

Elastic scattering effect on photoelectron transport and escape in upper sunlit atmosphere 12 p2222 A70-27187

Solid particle motions in dusty gas in inviscid hypersonic shock layers of slender wedges and cones and stagnation regions of cylinders and spheres 12 p2156 A70-27827

Kinetic theory of gas composed of identical particles with discrete velocity distribution, using Chapman-Enskog method 12 p2213 A70-28211

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities 12 p2213 A70-28218

Gas temperature effects on aerodynamic drag of carbon particles burning during nonisothermal motion 13 p2520 A70-28582

Low energy solar flare electrons scatter-free propagation through interplanetary medium, considering rise, decay and travel times 13 p2477 A70-29194

Self gravitating collisionless particles instability related to anisotropic random velocity distribution function in presence of disk-galaxy type spiral wave perturbations 13 p2492 A70-29299

Vibration spectra, kinetic and dispersion equations of solid spherical particles moving in incompressible weakly viscous liquid 13 p3388 A70-29368

Trapped particle interactions with plasma waves, analyzing pitch angle scattering, oscillating electric field, transverse waves and resonance effects 13 p2468 A70-29929

Laminar flow of suspension over flat plate, analyzing particulate velocity and concentration profiles relationships to drag and lift forces 14 p2565 A70-30270

Evaporation and combustion kinetics of droplets and particles in hot air stream, observing luminous trace 14 p2664 A70-30392

Quantum mechanical Boltzmann equation for atomic gas of composite particles, considering excited level degeneracy 14 p2619 A70-30651

Vibration stability of particle in plane restrained by two nonidentical springs with initial stress using Floquet theory and perturbations 14 p2657 A70-30843

Longitudinal electric field effect on trapped particle motion in asymmetrical magnetosphere, considering electron precipitation 15 p2728 A70-31990

Alumina particles marker transport in Ag wires during early sintering as function of plastic deformation by slip 15 p2745 A70-32392

Secular variations in osculating orbital elements of particle in Saturn ring gravitational field, considering motion in both external and internal space 16 p2973 A70-33226

Drift velocity for bound electron orbital motion in static axisymmetric magnetic field 16 p2959 A70-34187

Thermophoresis of aerosol particles in nearly free molecular nonuniformly heated gas, using linearized Boltzmann equation 18 p3292 A70-36254

Parametric representation of brachistochrones of mass point in centrosymmetrical gravitational field 18 p3283 A70-36387

Near earth motion equations for electrically charged dust particles in gravitating dipole magnetic fields, using zero-relative-velocity surfaces and energy integral 18 p3315 A70-36606

Gas particle mixtures nozzle flow at high loading ratios 18 p3208 A70-36693

Solar flare protons motion in sun radial magnetic field, considering protons interaction with interplanetary field inhomogeneities 18 p3309 A70-36901

Charged particle replacement by external plasma particles in ionized inhomogeneities moving in ionosphere, considering magnetic field role 18 p3249 A70-36909

Electric field strength in earth ionosphere and magnetosphere during irregular motion of fast ions and electrons 19 p3407 A70-37303

Coordinates for diagonalizing kinetic energy of particle system relative motion, discussing potential energy surface 19 p3373 A70-37841

Heavy and super heavy nuclei steady state spectra, comparing propagation parameters of light and medium nuclei 19 p3508 A70-38140

Energetic cosmic ray particles transfer through interstellar space based on galactic disk model 19 p3511 A70-38158

Ion-molecule pair relative motion in capture collisions, using computer-made movies 19 p3474 A70-38796

Adiabatic bounce periods of particle gyrophase coherence in earth field for cyclotron echo and triggered emission analyses 20 p3621 A70-39343

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities 20 p3612 A70-40091

Electric propulsion research involving MPD thrusters, current sheets and neutral-ion motion coupling [AIAA PAPER 70-1086] 20 p3683 A70-40249

Fraunhofer holography for small spherical particles three dimensional position and velocity measurements 21 p3822 A70-40811

Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model 21 p3882 A70-41296

Initial value transport of monoenergetic neutrons migrating in slab with infinite reflectors for isotropic scattering as function of material properties 21 p3854 A70-41999

Stagnation temperature of two phase nozzle gas jet containing solid particles on particle density and velocity 21 p3748 A70-42220

Magnetospheric tail magnetic field and particle motion calculation, assuming constant radius cylinder with current sheet bisecting center 22 p4019 A70-43111

Two particles relative motion in elliptical orbits in inverse square central force field 23 p4244 A70-44576

Particle motions in magnetic field, demonstrating existence of adiabatic region in particle phase space for Van Allen belt region 23 p4238 A70-44898

Particle motion in constant density dynamic viscosity random translational velocity fluid 24 p4324 A70-45139

Transition radiation due to charged particle moving in periodically stratified cold isotropic plasma 24 p4384 A70-45254

Faster-than-light particles impossibility in causal loops using nonquantum special relativity framework, considering tachyons 24 p4378 A70-45424

Two spherical particles rotation and slow motion about axis of circular cylinder in direction perpendicular to line of centers, considering fluid flow characteristics 24 p4325 A70-45781

Seeding particles motion recording in fluid flow by holographic velocimetry, using optical matched spatial filtering to determine particle location 24 p4340 A70-46350

PARTICLE PRODUCTION

Particle-antiparticle creation in galactic nuclei, expelling particles while retaining antiparticles 02 p0371 A70-12195

Cosmic ray muon source implied from hadrons X pairs produced in primary cosmic ray collisions 02 p0360 A70-12845

Nucleons and high energy pions inelastic interactions with complex nuclei involving external diffraction production of pions 03 p0526 A70-13029

Pion production characteristics during high energy nucleon interactions from data on production in upper atmosphere by gamma-quanta families/isobaric production/ 03 p0555 A70-13032

Multiple particle production at high energy levels and associated peripheral interaction and statistical theories 03 p0555 A70-13035

High energy muon production and interaction, analyzing ionization burst spectra 03 p0555 A70-13037

Thermodynamic potential of meson-nucleon plasma, showing variation of Landau equation of state in hydrodynamic theory of multiple particle production 03 p0527 A70-13052

Permittivity tensor calculations of weakly inhomogeneous plasma with monoenergetic component, using distribution function of particles produced by thermonuclear reactions 03 p0529 A70-13055

Negative O, NO and nitrous oxide ions formation by electron impact on nitrous oxide as function of pressure 03 p0441 A70-14007

Angular distribution and production probability of secondary shower particles produced by high energy cosmic ray muons using scintillation counter facility 05 p0899 A70-15957

Neutrinos production by primary cosmic rays in rarefied and dense media, calculating spectra 05 p0899 A70-15963

Carbon particles formation and growth model for cool variable carbon star atmosphere with sinusoidal carbon star atmosphere with sinusoidal temperature variations 07 p1380 A70-19260

Carbon particles formation and growth in Mira variables atmospheres, considering extinction effects on stellar structure and appearance 07 p1380 A70-19261

Quark search in cores of air showers with four million GeV mean energy, deducing rough production rate 07 p1368 A70-19925

Electron production rate enhancement by solar cosmic rays in lower ionosphere, considering particle distribution and polar cap absorption 07 p1369 A70-20153

Electron production in lower ionosphere by solar cosmic rays, calculating rates by computer as function of nuclear charge number, energy spectrum and height 07 p1373 A70-20348

Electrodynamic plasma accelerators fast particle generation mechanism during entrainment, studying polarization field potential structure 08 p1549 A70-20506

Relativistic particles formation associated with supermassive outbursts estimated to determine relativistic electrons mechanism in Crab Nebula 08 p1564 A70-20552

Vacuum UV photons production during ground state neutral argon atomic collisions, measuring relative cross sections energy dependence 09 p1731 A70-22333

Hydronium ion formation mechanism for D region, obtaining experimental support from mass spectrometer observation of ion production in oxygen glow discharge 09 p1671 A70-23500

Cross sections of fragments emitted in spallation reactions of carbon and nitrogen nuclei emulsion with alpha particles 09 p1733 A70-23549

Cosmic gamma ray spectrum from secondary neutral pion production in p-p interactions, discussing delta isobar, fireball and nuclear interactions effects 11 p2106 A70-26707

Solar L alpha and X ray emission contribution to lower ionosphere ion production, discussing altitudinal, latitudinal and temporal variations 11 p2106 A70-26789

Cosmic rays emission by dipole magnetosphere, applying model to neutron star particle belts 13 p2476 A70-28893

Fireball role in N-N interactions at primary cosmic ray energies, using fireball model to explain particle production 13 p2476 A70-28913

Elastic scattering formation and decay of unstable particle gases, discussing density and corrections to chemical and nuclear statistical equilibrium equations 13 p2455 A70-29223

Thermonuclear reactions in interior of sun, discussing models for He isotope concentration and flow to interpret solar neutrino generation 13 p2494 A70-29573

Primary cosmic ray flux and p-carbon cross sections measurements by satellites showing heavy particle production at high energies 15 p2792 A70-31733

Relativistic particles formation associated with supermassive outbursts estimated to determine relativistic electrons mechanism in Crab Nebula 15 p2805 A70-32707

Statistical analysis of cosmic radiation neutron component monitor error, taking into account generation multiplicity 18 p3307 A70-36097

Syrovatskii mechanism of high energy particle production near neutral line of magnetic field, noting solar flares occurrence conditions 19 p3478 A70-37581

Interstellar electron and positron intensity, observing pion production spectrum from nuclear collisions at machine energies 19 p3504 A70-38111

Cosmic rays deuterons abundance calculation from H and He nuclei collisions with interstellar matter 19 p3506 A70-38125

Cosmic rays propagation and production in Milky Way galaxy, using equilibrium model 19 p3510 A70-38157

Neutrino production by synchrotron process /magnetic bremsstrahlung/ in relativistic electron gas under intense magnetic field 20 p3695 A70-39050

Electron formation by cosmic rays in atmosphere, taking into account impinging particles energy variations 20 p3697 A70-39293

High speed shock wave propagation in deuterium gas, observing neutron production
21 p3806 A70-40744

PARTICLE SIZE DISTRIBUTION

Size distribution of Ni-Si particles precipitated from Si solid solution in Ni measured as function of concentration, aging time and temperature
02 p0317 A70-12320

Aerosol size distribution from data on atmospheric spectral transmittance and solar corona brightness spectral and angular variations
02 p0292 A70-12434

Intermediate air layer optical properties explained by assuming presence of small and large size aerosol particles
02 p0328 A70-12436

Aerosols size distribution and chemical composition and carbon monoxide, nitrous oxide and sulfur dioxide concentrations measured in pure atmosphere
03 p0521 A70-14289

Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles
04 p0776 A70-15422

Size and spatial distribution of meteoritic showers, establishing fragment distribution pattern relationship to sorting factor
05 p0912 A70-16464

Vacuum probe sampler to monitor particle contamination on surfaces within clean environments
05 p0808 A70-16703

Automatic particle counters and fluid contamination problems, misconceptions relating to sampling, size measurement, calibration, etc
05 p0851 A70-16706

Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density
05 p0918 A70-16915

Metal particle size relation to combustion time using statistical method applied to polydisperse Mg powder
07 p1419 A70-18756

Liquids particulate contamination sizing and counting by membrane filtration, specifying procedures and apparatus used
07 p1195 A70-18804

Atmospheric pressure, optical thickness and Young particle size distribution of Mars atmosphere determined from polarization observations
07 p1385 A70-19421

Microwaves scattering and attenuation in precipitations from raindrop size distribution curves analysis
08 p1462 A70-21096

Vacuum probe sampler to monitor particle contamination on surfaces within clean environments
09 p1623 A70-22340

Interstellar dust, discussing effective particle size, composition, formation and effects on astronomical observations
09 p1763 A70-23374

Electro-optical technique for size distributions of cloud and precipitations particles using linear array of photodetectors
10 p1912 A70-23929

Polarization of solar scattered radiation measured by radar probes for aerosol particle concentration and size distribution as function of altitude
10 p1884 A70-25253

Particle size distributions used in analyzing snow size spectra and radar reflectivity
11 p2004 A70-25651

Stable colloidal dispersions of subdomain magnetite particles correlated for magnetic properties in terms of size distribution and volumetric concentration by superparamagnetic theory
12 p2284 A70-27241

Scattering particle distribution relation to halo formation in polydisperse clouds, using Kirchhoff approximation for halos theory construction
12 p2264 A70-27522

Leonid meteor shower radar observation data, analyzing flux rates and particle size distribution
13 p2487 A70-28694

Griffith flaws limitation effect on glass matrix-tungsten composites strength, considering dispersed phase with wide particle size distribution
13 p2437 A70-28827

Two phase convex corner flows of particle imbedded inviscid incompressible fluid using small perturbations method
14 p2565 A70-30279

Particles shape and phase composition in combustion products of dispersed Al-Mg alloy powders by electron diffraction and X ray analysis
14 p2664 A70-30396

Quartz crystal particulate sensor instrument for terrestrial and Mars atmospheres
14 p2585 A70-30575

Polarized light scattering angle relationship with Mueller matrix elements for polydisperse systems of irregular randomly oriented particles
15 p2775 A70-32040

Two phase axisymmetric jet, studying dispersion of pulverized impurity consisting of particles of various sizes
15 p2721 A70-32135

Bistatic lidar /laser radar/ detection of atmospheric aerosol size distribution, using angular scattering measurements of polarization parameters
15 p2704 A70-32609

Airborne electro-optical array system design and performance for particle size measurement
16 p2906 A70-33175

Aerodynamic drag coefficients of micron size particle clouds in compressible transonic flow, using light extinction method
16 p2894 A70-33882

Fraunhofer holography for recording small particles to determine size distribution without disturbing sample
17 p3086 A70-35016

Erosion by solid particles, discussing impacting velocity effects, natural sand quartz particle size distribution and composition, artificial industrial abrasives, etc
17 p3126 A70-35600

Hypersonic flow containing dust, investigating for cosmic dust collection and analysis, discussing conditions for collected particle size distribution correspondence to original distribution
17 p3012 A70-35921

Interstellar cloud collisions, examining gas and dust particles separation by size
18 p3313 A70-36323

Atmospheric particle distribution spectrum by optical methods, estimating aerosol concentration from scattering coefficient
18 p3251 A70-36980

Atmospheric aerosols vertical distribution from aerostat measurements, considering particle size distribution
19 p3461 A70-37636

Primary cosmic rays energy spectrum, investigating extensive air shower /EAS/ size spectrum in 2,000-1,000,000 eV range
19 p3510 A70-38154

Collisions in one, two and three dimensional plasmas of finite sized particles and clouds, obtaining scattering cross sections and Fokker-Planck coefficients
20 p3679 A70-39663

Circumstellar system crushing processes described by integrodifferential equations, deriving particle size distribution of fragments in interplanetary space
21 p3889 A70-41148

Tranquility Base lunar soil origin, establishing component nature, size distribution, density, mineralogy, constructional or destructional history
21 p3897 A70-41519

Polarization of radiation reflected and transmitted by earth atmosphere, calculating scattering matrix for aerosol size distribution model
21 p3820 A70-41725

Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine
21 p3867 A70-41727

Particle size, shape and absorptivity effects on inclusion damage of Nd-doped barium crown laser glass
22 p4050 A70-43007

Spectral radiation extinction at atmospheric aerosol particles, discussing particles complex refractive indices and size distributions
22 p4065 A70-43171

PARTICLE SPIN

Self excited electron-phonon-spin spontaneous oscillations generation, deriving dispersion equation
16 p2878 A70-33779

Sound velocity in isotropic nonlinear elastic Cosserat continuum with constrained particle rotation, analyzing uniaxial and hydrostatic compression
20 p3734 A70-40434

Rarita-Schwinger fields in general relativity, extending equations for Fermion motion in linearized gravitational field to higher spin particles
24 p4380 A70-45818

PARTICLE TELESCOPES

Sidereal cosmic ray diurnal variations from underground muon telescopes in Northern and Southern Hemispheres, proposing model producing variations at earth vicinity
03 p0560 A70-13978

Block diagram for eliminating counting errors and spurious coincidences in telescope used at cosmic ray stations
05 p0845 A70-15931

Azimuthal telescope with proportional counters for underground recording of hard/soft cosmic ray components
05 p0846 A70-15937

Assessing background magnitude caused by earth natural radiation sources during underground detection of solar neutrinos by radiochemical methods
05 p0899 A70-15950

PARTICLE TRAJECTORIES

Azimuthal telescope for recording cosmic rays intensity, noting statistical error for vertical and oblique incident component
05 p0846 A70-15967

Automatic system for processing data from underground meson telescopes
07 p1238 A70-20347

Particle spectrometer for Apollo measurements of trapped protons and electrons, using directional telescope composed of solid state and scintillation counters
12 p2232 A70-27404

Digital closed-loop inflight calibration system for spaceborne particle spectrometers, utilizing cesium iodide crystal and programmable photomultiplier dynode supply
12 p2232 A70-27405

Muon intensity meter for cosmic ray muon flux underground using scintillation telescope consisting of two coincidence counters
12 p2295 A70-28176

Quark search in cosmic radiation near sea level, using scintillation counter telescope
15 p2793 A70-31737

Solar spar telescope of Lockheed Solar Observatory with closed tube protection from dust and wind
16 p2911 A70-33794

Statistical accuracy of standard muon azimuthal semicubic telescope for solar cosmic rays, discussing rms error
18 p3256 A70-36103

Azimuthal muon telescope installation at cosmic ray station, noting photorecorder circuitry
18 p3256 A70-36108

Sidereal cosmic ray diurnal variations using underground mu-meson telescopes in Northern and Southern Hemispheres
19 p3510 A70-38150

Five-channel azimuthal underground cosmic ray telescope using proportional counters suitable for continuous recording
20 p3629 A70-39312

PARTICLE THEORY

Fireball detection and discovery, investigating angular distribution of secondary particles using Van Hove and Amati theory
09 p1747 A70-23729

Book on plasma dynamics covering charged particle orbit theory, macroscopic equations, hydrodynamics, hot and cold plasma waves, kinetic theory and plasma radiation
11 p2087 A70-25500

Finite size particle physics for plasma computerized simulation, considering longitudinal oscillations, scattering cross sections, diffusion coefficients, etc
18 p3296 A70-36791

PARTICLE TRACKS

U PARTICLE TRAJECTORIES

PARTICLE TRAJECTORIES

NT ELECTRON TRAJECTORIES

Particle trajectory and associated wave determined for nonclassical trajectory problem from nonprobabilistic point of view, discussing discontinuity arising from unbounded velocities
01 p0142 A70-10657

Optimal control problems concerning vector determination and trajectory of point motion toward target in n-dimensional phase space
01 p0053 A70-11028

Quasi-trapped particle currents having discontinuities on daytime and nighttime side of earth
01 p0171 A70-11487

Galaxy model formulated in cylindrical coordinate system using Fokker-Planck equation for cosmic radiation particles propagation, discussing trajectories of high energy particles
03 p0553 A70-12880

Neutrinos line patterns in Muscovite mica, refuting Russel assumption by analysis of multiple Coulomb scattering of charged particles and track comparison
03 p0556 A70-13047

Theoretical and experimental cascade curves comparison for heavy materials used for particle absorption in tracking experiments, discussing Coulomb scattering
03 p0527 A70-13051

Laser beam for measuring particles velocity in two phase air-water jets by heterodyning, describing signal properties
05 p0858 A70-16258

Linear damping of sinusoidal oscillation in plasma, solving linearized Vlasov equation by integration along particle trajectories
05 p0888 A70-16304

Charged particles motion in field of whistler mode wave packet, discussing trajectories
06 p1118 A70-17377

High energy and contemporaneous cosmic ray tracks in bubble chamber picture noting evidence of quarks
12 p2276 A70-27997

Serra de Mage meteorite impact history from charge particle track analysis, noting fieldspar content
13 p2497 A70-29854

Charged particles focusing and sorting in bispiral systems, deriving differential equations for relativistic trajectories 15 p2707 A70-31520

Gas-particle mixture cascade flow over turbine blades, considering momentum/heat transfer and particle trajectories [AIAA PAPER 70-712] 16 p2835 A70-33569

HEOS 1 low energy proton measurements in interplanetary space, discussing particle direction during solar event and anisotropy time history 19 p3495 A70-37505

Fossil nuclear particle tracks in extraterrestrial matter using high voltage electron microscope and chemical etching 19 p3519 A70-38031

Erasure fission tracks in soda-lime glass, tektite, biotite and apatite by shock loading, determining dynamic pressure and associated temperature effects 19 p3414 A70-38035

Distribution functions of cosmic ray path length, obtaining exponential type for high and low energy data 19 p3509 A70-38146

Bubble chamber photography and track image reconstruction by holography, discussing measurement apparatus, accuracy and tolerances 19 p3428 A70-38510

Square cross section waveguide with cutoff frequency, calculating density wave propagation in helical electron beam trajectories directed by magnetic field 20 p3584 A70-39256

Solar radio U burst second branch low relative intensity, contradicting previous theory for trajectories 21 p3880 A70-40966

Nuclear particle tracks in Apollo 11 samples due to galactic cosmic rays and solar flares relationship to dynamic surface processes 21 p3914 A70-41648

Rock particle tracks of primary cosmic rays, spallation recoil nuclei, nuclear fission and solar wind ions, observing time scale multiple soil orientation 21 p3914 A70-41652

Apollo 11 bulk and core tube fines and rock cosmic ray tracks, discussing material history and corpuscular radiation flux and energy spectra near moon 21 p3916 A70-41667

Transillumination holography in environmental tests, discussing camera design, particle field and applications, including flow visualization in wind tunnel tests 03 p0486 A70-13539

Particles infinite systems equilibrium state by canonical ensemble theory, demonstrating existence and uniqueness of limiting distribution functions dependence on density 07 p1333 A70-18936

Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants [AIAA PAPER 69-175] 12 p2332 A70-27804

Plastic deformation of two phase alloy with small nondeformable particles in ductile matrix, discussing cross slip, yield and flow stress, work hardening etc 17 p3126 A70-35460

PARTICULATE FILTERS

U FLUID FILTERS

PARTITIONS [MATHEMATICS]

Partition functions and equilibrium constants for ScO, YO and LaO computed for 1000-8000 K, assuming doublet ground electronic state 10 p1946 A70-24970

Partitioning formalism for degenerate, almost degenerate and electron exchange perturbation problems 16 p2955 A70-34001

Partitioning perturbation theory for electron exchange problems, generalizing Hirschfelder-Silbey formalism 16 p2955 A70-34003

Ordinary differential equations piecewise polynomial approximation using subpartitioning to liquidate residuals 19 p3458 A70-38356

PARTITIONS [STRUCTURES]

Matrix analysis of steady state temperature field and heat flux through multilayer, plane, cylindrical or spherical partitions with internal heat sources 04 p0785 A70-14924

PARTS

NT TU-134 AIRCRAFT

Human vibration test program for airline passenger reaction to vibration environments of large commercial aircraft 02 p0244 A70-12132

Touring aircraft, discussing vibration and noise reduction, instrumentation, STOL aircraft, etc 02 p0227 A70-12663

Forward and rearward facing passenger seats effects in postdecompression emergency descent of high speed high altitude aircraft 03 p0437 A70-14061

Airline passenger food service, discussing public health measures, low temperature and cryogenic galley cooling 05 p0804 A70-15833

DO-231 fixed wing V/STOL airliner project based on DO-31 development, construction and flight tests, considering design problems, controls, safety, performance targets, etc 05 p0793 A70-15901

L-1011 TriStar design for transcontinental airline requirements, discussing propulsion, noise suppression, configuration, passenger comfort, etc 05 p0793 A70-16098

Safety analysis of VTOL aircraft for passenger transport based on accidental failures caused by technical defects, human error, weather, sabotage, etc 05 p0794 A70-16348

Unstable spiral precursor to jet upset /Mach tucks/ in executive jet transports 06 p0987 A70-18248

Civil air transport passenger escape devices design and installation criteria [SAE-ARP-495A] 07 p1191 A70-18805

Hansa 330 fan jet design for executive and commuter market, discussing forward-swept wing concept and standardized structures and systems 07 p1194 A70-19619

Particle properties and solar flare radiation hazards for passengers in supersonic flight 08 p1435 A70-20632

Jet lift passenger aircraft considered better suited for medium stage routes than rotor/ propeller designs for VTOL transport 08 p1436 A70-21347

Lift fan propulsion for VTOL passenger aircraft, discussing design, thrust augmentation, optimum element combination, engine-wing integrations and tests [DGLR-70-007] 10 p1929 A70-24049

Low cost lightweight flight control systems for business aircraft providing equivalent performance to larger equipment [SAE PAPER 700213] 11 p2079 A70-25886

Air conditioning systems design for turboprop commuter and business aircraft [SAE PAPER 700224] 11 p1980 A70-25895

Business aircraft fuel management system using capacitance and mass flow rate measurements, displaying fuel quantity and flow rate and flight time remaining [SAE PAPER 700225] 11 p1983 A70-25896

Twin turbofan executive aircraft /Falcon/ development, describing modifications and antinoise features 12 p2162 A70-28026

Falcon 10 economical executive aircraft development involving dimensions of cabin, powerplant and range 12 p2162 A70-28027

Falcon 10 simplified airliner-type equipment for operation under Category 2 weather conditions 12 p2167 A70-28028

Passenger aircraft structures accelerated testing for safety and fatigue durability under operational conditions, describing tests planning and evaluation 15 p2673 A70-31541

Emergency evacuation on land of passengers and crew of airliners, discussing training, equipment, standardization, communication and protective fabrics 15 p2675 A70-32220

High energy chemical systems for postcrash emergency evacuation of commercial passenger aircraft, discussing exit opening via explosive methods 15 p2675 A70-32221

Passenger survival and evacuation of civil jet transport aircraft after ditching at sea 15 p2676 A70-32223

Mercury passenger aircraft development schedule, cost, delivery and features, emphasizing weight balance and convenience 15 p2676 A70-32365

Corporate aircraft operations in Europe, discussing meteorological conditions, flight planning, airport arrival and departure procedures and language differences 16 p2842 A70-33820

Reliability maintenance problems in corporate aircraft operations, discussing equipment calibration, aircraft systems analysis and repair facility selection 16 p2921 A70-33821

Aircraft utilization rate vs invested money as factor determining financial justification of corporate aircraft operations, discussing maintenance engineering 16 p2921 A70-33822

Aircraft passenger tie-down failure, comparing injury patterns in various accidents to aid reconstruction 17 p3039 A70-35572

Mobile lounges and airport productivity concepts for optimal handling of passengers at airport terminal [AIAA PAPER 70-918] 17 p3064 A70-35830

- Central passenger traffic schedule role in air traffic control, discussing computer solutions, aircraft optimal use, etc
18 p3289 A70-36397
- Soviet book on passenger aircraft aerodynamics covering motions of gases and immersed bodies, similarity laws, boundary layer theory, finite span wing, etc
18 p3208 A70-36507
- Mass air transportation, discussing aircraft characteristics, traffic growth, scheduling, passenger and cargo handling, etc
18 p3350 A70-36656
- Passenger seaplanes virtues and drawbacks, discussing bases, servicing, refueling, passenger conveyance, prospects, etc
23 p4137 A70-43887
- Continuous flow requirements in aircraft passenger oxygen systems using phased dilution principle, discussing breathing mask efficiencies
23 p4141 A70-44483
- Superjet airliners wiring connectors for power distribution, signal circuitry and self ejecting push buttons for passenger seats
23 p4174 A70-44545
- ## PASSENGERS
- Systems engineering applied to airborne, airport and community socioeconomic structure in determining air freight and passenger demand impact on airport location and configuration
[ALAA PAPER 69-1091]
01 p0055 A70-10605
- Cardiology role in aviation medicine, evaluating jumbo jet and SST flight stress effects on pilots and passengers in age factor study of arteriosclerosis
05 p0803 A70-16721
- C-5 design features for entire environment assuring human integration as crew member or troop passenger
09 p1609 A70-22021
- Commercial jet passenger emergency oxygen needs for cabin decompression studied in determining time of safe unconsciousness
11 p1992 A70-26511
- Automatic air transportation passenger handling and postflight financial and statistical data processing
12 p2335 A70-27016
- Air terminal design, describing mechanical systems for moving people, baggage and cargo
[SAE PAPER 700259]
12 p2206 A70-27431
- Aircraft characteristics effects on traffic control and community, considering passengers and freight
14 p2612 A70-30108
- Rest periods assignment on long distance air travel of passengers based on physiological stress factor
15 p2690 A70-31892
- Concorde aircraft design for emergency passenger evacuation, emphasizing overwing inflatable escape slides and kinetic heating effects
15 p2675 A70-32222
- Human survival problems of transport aircraft in various airport ground-air situations and environmental conditions
15 p2676 A70-32224
- Passenger awareness of airline industry problems, discussing safety, traffic control, convenience, etc
15 p2831 A70-32225
- Space shuttle safety program for low risk passenger transportation, combining large aircraft experience with spacecraft technology
[AAS PAPER 70-055]
17 p3176 A70-34793
- Air freight carrier liabilities in passenger transportation international regulations, noting conflicting interpretations
19 p3553 A70-37562
- Air passenger legal rights and obligations, discussing contracting states, formalities, hygiene, inoculation and deinfestation
22 p4127 A70-43500
- Passengers physiological and medical problems on subsonic and supersonic aircraft
23 p4150 A70-44223
- Space rescue operations in orbit during heavy traffic of spacecraft with large passenger loadings, noting role of space shuttles and tugs
23 p4260 A70-44619
- ## PASSIVATION
- ### U PASSIVITY
- ## PASSIVE SATELLITES
- ### NT BEACON SATELLITES
- ### NT ECHO SATELLITES
- ### NT ECHO 1 SATELLITE
- ### NT ECHO 2 SATELLITE
- ### NT EXPLORER 22 SATELLITE
- ### NT PAGEOS SATELLITE
- Airborne SHF communication system for operation with passive satellites installed in C-121 aircraft
01 p0045 A70-11122
- Passive satellite coordinates correlations to instants of observation in U.S.S.R. ground stations, reducing quasi-synchronous observations by interpolation
11 p2007 A70-26192
- Passive and active satellite systems for point-to-point communication network with multiple access capacity, comparing technical and economic competitiveness
11 p2011 A70-26335
- ## PASSIVITY
- Dynamic systems absolute stability, optimality and passivity algebraic criterion in terms of real even polynomial coefficients
12 p2261 A70-27412
- ## PASTES
- Fluxless paste for thermomdiffusion calorizing stainless and heat resistant steels and alloys
19 p3434 A70-37459
- ## PATCHING
- ## U MAINTENANCE
- ## PATENTS
- Collection of patent papers on liquid crystals applications including radiation detection, polarizing, thermal imaging, etc
08 p1556 A70-21346
- Book on solar cells U.S. patent literature, discussing Si semiconductors, panel fabrication techniques, photoemissive devices, Cd, Ga and organic compounds, etc
09 p1612 A70-22050
- ## PATHOGENESIS
- Biochemical, electron microscopy and experimental medicine data indicating pathogenetic mechanism responsible for arteriosclerosis
03 p0431 A70-14278
- Hormones excreted by adrenal cortex function in rhesus monkeys pathogenesis after irradiation by sublethal dose
09 p1620 A70-22822
- Lumbar vertebrae transverse processes fractures in air crashes, considering factors involved, incidence and pathogenesis
17 p3033 A70-35578
- Etiopathogenesis of auditory disorders in flying personnel and aircraft engineers resulting from exposure to acoustic stresses
17 p3034 A70-35677
- ## PATHOLOGICAL EFFECTS
- Catecholamines biosynthesis, distribution, combining, uptake, deposition, release and metabolism in physiological and pathological reactions of organism
01 p0019 A70-10512
- Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests
03 p0423 A70-13709
- Pathological Q waves in various diseases in absence of myocardial infarction, discussing electrophysiological mechanism
03 p0426 A70-13941
- EKG, EEG, pneumograms and X ray pictures showed no pathological effect after prolonged confinement in sealed chamber having artificial atmosphere with variable gas composition
05 p0810 A70-17121
- Long bone necrosis in response to reduced atmospheric pressure exposure, comparing lesions with caisson disease
08 p1449 A70-21944
- Physiopathological effects of weightlessness, showing desirability of partial gravity for long voyages via spacecraft rotation
09 p1621 A70-23439
- Pure-tone air conduction audiogram for diagnosis of patients exposed to intense noise indicating conductive or sensorineural origin of loss
09 p1621 A70-23457
- Vasoactive agent effects on decompression sickness in rats, noting increased severity of bends by serotonin and platelet role
10 p1811 A70-24176
- Physiology and pathophysiology of oxygen transport in human blood, discussing fluctuations in O2 capacity and affinity
10 p1821 A70-25079
- Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests
11 p1985 A70-25509
- Physiopathologic effects on organs of longitudinal and tangential accelerations, decelerations, vibrations and weightlessness
11 p1986 A70-25821
- Plasma tocopherol concentrations and vitamin E deficiency in dogs, noting pathologic changes in smooth muscle, central nervous system, skeletal muscle and retina
20 p3569 A70-38991
- Laser radiation effects on lens lipid content in adult Rana temporaria frogs during cataract development
22 p3978 A70-43139
- Decompression hazards in manned orbiting systems, considering consciousness time, survival, pathological response, water vapor and denitrogenation effects and recompression rates
22 p3973 A70-43638
- Passengers physiological and medical problems on subsonic and supersonic aircraft
23 p4150 A70-44223
- Heme biosynthesis defect in vitamin E-deficient rats affecting bone marrow synthesis of delta-
- aminolevulinic acid and liver formation of porphobilinogen
24 p4304 A70-46146
- ## PATHOLOGY
- ### NT HUMAN PATHOLOGY
- Stainless steel micropipettes implantation in rat amygdala to study role in gastric secretion
02 p0234 A70-11729
- Pathophysiology of congenital heart disease - Conference, University of California, Los Angeles, July 1967
20 p3570 A70-39361
- ## PATIENTS
- Aeromedical Evacuation System in overall treatment process for seriously ill patient
09 p1628 A70-23467
- Air transport of cardiac patients with aorticuloventricular blocks, noting feasibility due to portable surveillance and treatment apparatus
12 p2172 A70-28041
- Patients emergency transportation by helicopter, discussing vehicle types and onboard medical treatment
14 p2540 A70-30191
- Air transportation of respiratory failure patients, considering medical equipment adaptation for aircraft use
20 p3580 A70-39440
- Optimum bed rest time schedules for cardiovascular patients from neurological, dynamometric, electromyographic and myogenic-tonus tests
23 p4149 A70-45077
- ## PATTERN DISTRIBUTION
- ### U DISTRIBUTION [PROPERTY]
- ## PATTERN RECOGNITION
- ### NT CHARACTER RECOGNITION
- Dynamic shape recognition scheme with two dimensional image mapped by spatial integration onto one dimensional time varying function, discussing corner information preservation
01 p0033 A70-10496
- Pattern recognition concepts applied to synthesis of aircraft approach progress monitor as adjunct to pilot decision process, discussing feasibility experiments [SRCC-106]
02 p0335 A70-12138
- Multidimensional data efficient decomposition for communication interface between man machine system, considering decision making and pattern recognition on digital computers with orthogonal transformations
02 p0265 A70-12149
- Instruments and procedures for photogrammetry automation, discussing automatic pattern recognition, data correlation and computer role
02 p0302 A70-12652
- Signal orientation insensitive filter for pattern recognition
02 p0266 A70-12701
- Lines and letters identification and localization relationships to stimulus attributes in visual perception supporting hierarchical processing hypothesis
03 p0425 A70-13825
- Nonparametric statistical pattern recognition conditions of finite probability distribution mixtures in non-supervised adaptive detection
03 p0454 A70-14078
- Error correction training procedures convergence for committee solution to pattern recognition problem
05 p0817 A70-16175
- Classification analysis methods application to plant identification for case with incomplete initial statistical information
06 p1014 A70-17632
- Image recognition problem analyzed by deterministic approach yielding criteria for operation of recognition algorithm
06 p1014 A70-17633
- Multichannel magnetograph display for pattern recognition of solar feature morphology compared with spectroheliograms
06 p1142 A70-17993
- Consistent and inconsistent linear inequalities evaluating speed and efficiency of algorithm for pattern recognition problems
08 p1467 A70-21782
- Algorithms based on continuous-group pattern recognition, distinguishing human faces, speech and handwritten characters
09 p1640 A70-22143
- Invariant recognition of visual patterns in translational conversions, describing patterns by differential method
09 p1641 A70-22824
- Automatic change discrimination applications to weather prediction, land resource management and city planning, using photographic, IR and radar sensor imagery
[ALAA PAPER 70-311]
09 p1677 A70-22876
- Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data channel efficiency, etc
[ALAA PAPER 70-309]
09 p1668 A70-22878

Star field pattern recognition methods for spacecraft attitude determination without a priori knowledge of star position-vehicle attitude relationship

09 p1725 A70-23516

Diffraction pattern sampling for automatic pattern recognition in photographic imagery

09 p1689 A70-23802

Pattern prerecognition processing for multibject pictures, describing illumination, contour and curvature computation

10 p1845 A70-24659

Airborne remote sensing automatic data processing for forest identification through pattern discrimination, utilizing power spectrum analysis

10 p1878 A70-24734

Pattern recognition model simulating human physiology based on two dimensional Fourier transform of input images

10 p1827 A70-24770

Symbols design for machine displays based on Gestalt pattern perception theory, considering symbol learning, perceptibility, detail, boundaries, etc

10 p1827 A70-24771

Radar observation of landscape regions, discussing dependence on recognition of variations in texture patterns on radar image

11 p2004 A70-25642

Computer texture analysis for two dimensional scenery pictures involving periodicity invariance under Fourier transform

11 p2014 A70-26251

Pattern recognition with time interval modulation information coding (TIMIC), considering channel capacity of switching device, similarity with nervous system, etc

11 p2010 A70-26267

Preprocessing data transformations for multispectral recognition mapping, reducing difficulties due to variations in environmental, observational and sensor conditions

12 p2220 A70-26935

Binary-valued digital pictures noise cleaning by propagation processes

12 p2188 A70-27937

Computer program for flying spot scanner pattern recognition, analyzing human chromosome contour

12 p2170 A70-27938

Descriptive pattern analysis methods, considering grammar formalism for broad application

12 p2193 A70-28102

Algorithm for feature extraction in pattern recognition, using internal and universal criterion in computerized process

12 p2193 A70-28103

Holographic identification of similar two dimensional images by linear transformation of space by spherical lens using white light correlator

12 p2238 A70-28185

Book on automatic recognition of visual patterns and mechanization of creativity, presenting computer program termed Arithmetic

13 p2373 A70-29451

Collection of papers on theory and applications of learning and pattern recognition systems covering statistics and algorithms, adaptive optimization, stochastic processes, etc

13 p2373 A70-29576

Pattern recognition involving machine extraction of characteristic features and classification based on associated values, discussing design and decision rules for optimal recognition

13 p2373 A70-29577

Statistical methods for feature selection and ordering, mode estimation and pattern classification in pattern recognition, describing sequential decision model

13 p2374 A70-29578

Error correcting algorithms for pattern classification, finding optimal approximation to unknown optimal decision function

13 p2374 A70-29579

Pattern recognition systems design and applications in medical and photographic data classification

13 p2374 A70-29580

Training algorithms in designing multilevel quasi-optimal controllers for dynamic processes, using pattern recognition methods

13 p2383 A70-29581

Stochastic reinforcement learning model synthesizing control and pattern recognition systems with learning attributes

13 p2374 A70-29584

Stochastic approximation methods applied to pattern classification, estimation and control

13 p2442 A70-29586

Soviet papers on image recognition covering sequential optimization, self learning processes, transformations statistics, spatial discretization, optical information processing, etc

14 p2552 A70-30418

Maximum convergence function in image recognition using dynamic programming and sequential optimization

14 p2553 A70-30419

Learning self learning relationship in image recognition, analyzing resolving function with minimum probability for erroneous recognition

14 p2553 A70-30420

Sufficient statistics for optimal correlation function in classifying optical images in pattern recognition, using permissible transformations

14 p2553 A70-30421

Standard pattern recognition with spatial discretization, concerning discrete cell or segment viewing

14 p2553 A70-30422

Optimal spatial discretization and brightness quantization of graphical symbols for pattern recognition, considering illumination and reflection coefficient

14 p2553 A70-30423

Computerized control for beam scanning and optical data processing concerning symbols, letters and photographic images

14 p2553 A70-30424

Airphoto interpretation, discussing descriptive, digital and photographic methods of representing recognition process results

14 p2585 A70-30642

Mathematical pattern recognition, using potential functions superposition methods for reconstructing probability density from samples

14 p2554 A70-30926

Error probability bounds for M-ary pattern recognition, proposing adaptive feature extraction criteria

15 p2703 A70-32564

Pattern recognition procedure for electronic systems data classification

15 p2706 A70-32566

Human and machine pattern discrimination correlated by statistical correlation method from pattern recognition task involving computer simulation and humans

16 p2852 A70-33461

Generalized iterative inverse algorithm for linear inequalities set involved in pattern recognition and threshold logic requiring decision functions determination

16 p2870 A70-33739

Noisy stochastic pattern recognition system, determining optimal measurement sequence by discrete Pontryagin maximum principle

18 p3234 A70-36337

Simultaneous optimal detection and parameter estimation of signals in noise, considering multiple solution, learning and image recognition

18 p3228 A70-36597

Neutral H spiral structure in Milky Way galaxy, discussing map derivation, pattern interpretation, arm characteristics and kinematics

18 p3327 A70-37161

Observation classification/image identification/for two normal sets with common covariance matrix, investigating error probability asymptotic behavior

19 p3375 A70-37283

Sample images division into teaching and checking sequences in pattern recognition problems, determining coefficients based on statistical properties of set

19 p3382 A70-37449

Bandlimiting in coherent optical matched filtering for pattern recognition, eliminating confusion between cross correlations and autocorrelations

19 p3446 A70-37889

Eye movements during visual search and meaningless pattern discrimination

19 p3361 A70-38054

Human memory information structure, discussing pattern recognition, simultaneous attention, problem solving and logic

19 p3363 A70-38322

Close range atmospheric shape classification, using image recognition theory concepts

19 p3416 A70-38572

Image detection in pattern recognition through bipolar correlation, discussing reference generating algorithms and digital simulation results

20 p3633 A70-39972

Statistical pattern recognition and threshold learning in signal detection of noisy binary pulses

21 p3794 A70-41332

Adaptive pattern recognition systems design based on notions of convergence and feedforward interconnection of two systems

21 p3794 A70-41499

Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data, channel efficiency, etc

[AIAA PAPER 70-309]

Suboptimum extraction of pattern features from continuous measurements, assuming different Gaussian random classes

22 p3991 A70-43493

Hyperthyroidism diagnosis by pattern recognition, using computerized class featuring information compression

22 p3977 A70-43732

Automatic detection of K-complex waveforms in sleep electroencephalograms, using pattern recognition

23 p4151 A70-44379

PATTERNS

Open pattern winding technique for composite materials, laying fibers without weaving around pillars at edge of table and to stiff beam

11 p2060 A70-26344

Pattern center hypothesis for habitation to centrifugal and linear accelerations in man, investigating aftereffects by nystagmography

14 p2538 A70-30913

PATTERSON MAP

Orthorhombic form of crystalline formylmethionine transfer RNA, obtaining Patterson function from three dimensional X ray diffraction data

05 p0803 A70-16947

PAYLOAD MASS RATIO

Single stage reusable ballistic space shuttle, featuring minimum payload mass ratios and high propulsive efficiency

23 p4262 A70-44686

All-body configuration hypersonic transport aircraft performance by computer synthesis, considering sonic boom constraint, maximum payload ratio and optimal cruise speed

[AIAA PAPER 70-1224]

24 p4291 A70-45957

PAYLOADS

Airport terminal configurations payload flow-through characteristics and space allocations, discussing passenger processing, baggage systems, etc

[AIAA PAPER 69-1088]

01 p0000 A70-10622

Cost reductions achieved by space payload life extension through manned maintenance and increased transportation economies via refueling and improved space propulsion

01 p0196 A70-10844

Geostationary satellite payload-optimal injection trajectory from nonequatorial firing range, describing dog-legging maneuvers

03 p0573 A70-13845

TD-1 satellite design and scientific payload

[DGLR-69-11]

04 p0762 A70-15142

Javelin research rocket payload suspension ensuring limited vibrational accelerations, using viscoelastic materials for damping

[DGLR-69-61]

04 p0774 A70-15147

Yo-Yo system for satellite Azur to reduce payload angular velocity after separation from booster, analyzing final spin error

[DGLR-69-43]

04 p0762 A70-15152

ASTRID two axis stabilization system for rocket payloads, aligning optical axis of experiment with star

[DGLR-69-42]

04 p0762 A70-15161

Parametric performance and cost comparison of separate and integral vehicle concepts for manned space activity using payload criterion

04 p0763 A70-15420

Sounding rocket Vera 15 design with emphasis on operation safety, discussing payload capacity

04 p0765 A70-15669

Airframe production factors involving choice of materials and fabrication methods, emphasizing weight reduction to increase payload

05 p0854 A70-15925

Optimum second stage sizes for Blue Streak first stage for maximum payload injection into various orbits, tabulating sizes and payloads

05 p0924 A70-16589

Solid propellant motors relative performance as related to intermediate payload missions, considering reusable liquid strap-on stages for post-Saturn payloads

05 p0897 A70-16897

Three dimensional motion of nonrigid parachute and payload system analyzed for dynamic stability

[AIAA PAPER 70-209]

06 p0987 A70-18062

Air cargo transportation systems in 1970s, discussing market expansion, payload capacity and fleet growth, containerization, etc

07 p1250 A70-19875

Electronic timing device for light balloon payloads, describing circuit

07 p1286 A70-19975

ARCAS meteorological rocket system designed for upper atmospheric soundings to provide thermodynamic and wind data, discussing payloads

07 p1395 A70-20256

Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc

[AIAA PAPER 69-1007]

09 p1767 A70-23262

TD-1 satellite design and scientific payload

09 p1767 A70-23429

Yo-Yo system for satellite Azur to reduce payload angular velocity after separation from booster, analyzing final spin error

09 p1767 A70-23430

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc

10 p1950 A70-24641

Titan 3C boost phase inertia loads on payload estimated for satellite design, using frequency and interface acceleration methods

[AIAA PAPER 70-485]

Accelerated gradient projection method applied to rocket trajectory optimization for minimizing fuel required for placing payload in circular orbits

11 p2120 A70-25446

13 p2485 A70-28395

- Gyroless attitude control system for pointing Aerobee sounding rocket payload at sun using solar sensors
13 p2501 A70-28422
- Space environment effects on spacecraft payload materials and performance, discussing atmospheric pressure, outgassing, radiation and meteoroid collision
13 p2485 A70-28434
- Mesosphere payload to measure neutral gas density, positive and negative ions concentration and mobility in D region
13 p2393 A70-28682
- Petrel payloads taking into consideration rocket stability after launch and compartment design
13 p2503 A70-28683
- Attitude control system of three axis stabilized payload for spectral survey of comet head light
13 p2505 A70-28770
- RESY parachute recovery for payloads launched by Skylark high altitude sounding rocket, noting flotation system and location aids
13 p2505 A70-28771
- OGO 5 satellite scientific observations, payloads, parameters and objectives
15 p2812 A70-32364
- Space station experiments, payloads and activity planning
16 p2983 A70-34067
- Light weight integrated spin-up launch mechanism for rocket propelled payload
16 p2845 A70-34113
- Reliable latch diaphragm release mechanism for separation of payload from spacecraft, discussing design, operation and tests
16 p2921 A70-34117
- Reliable collet release mechanism design for separation and ejection of reentry vehicle payload from booster
16 p2922 A70-34118
- Titan 3 launch vehicle for scientific space missions, discussing building blocks, performance and payloads
17 p3178 A70-35260
- Delta launch vehicle design modifications for increased payload and space research programs
17 p3179 A70-35261
- Commercial air transport mission payload and range capability analysis, noting on-line flight planning computers
17 p3204 A70-35815
- [AIAA PAPER 80-899]
Future spacecraft mission for short period comets rendezvous, considering trajectory requirements and launch vehicle payload capabilities
19 p3530 A70-38885
- [AIAA PAPER 70-1072]
Surveyor spacecraft characteristics and operation, discussing scientific payloads, landing sites, etc
20 p3716 A70-39951
- Weight growth factor in aircraft design, discussing fixed and variable weight, payload, performance, flight quality, structural criteria and life expectancy
20 p3562 A70-40363
- [SAWE PAPER 839]
Aircraft loadability design by computerized loading program using graphic plotter
20 p3562 A70-40364
- [SAWE PAPER 836]
Aircraft stretch efficiency factor as function of productivity and payload growth
20 p3563 A70-40369
- [SAWE PAPER 838]
Space shuttle with reusable launch system, discussing payload sensitivities regarding orbiter and booster weight and engine reliability
20 p3716 A70-40377
- [SAWE PAPER 849]
Optimal low thrust power plant for spacecraft payload-maneuver tradeoff
21 p3866 A70-40832
- Disposable load drop effect on aircraft range, using Breguet equations for graphic determination of bombing range
21 p3750 A70-40868
- Rocket motion and space propulsion systems, discussing exhaust velocity effect on payload
21 p3869 A70-42039
- Low disk loading rotors in high speed VTOL aircraft for economical vertical payload lift
23 p4139 A70-44153
- [ICAS PAPER 70-57]
Europa III SLV payload for geostationary equatorial orbit, describing engine thrust and propellant capacity for high energy second stage
24 p4414 A70-46357
- links, using programmable switch for improved traffic handling and frequency coordination
10 p1837 A70-24346
- Time division multiple access (TDMA) system for Symphonie communication satellite using PCM phase shift keyed RF carrier
10 p1837 A70-24353
- Real time Apollo PCM telemetry data compression and transmission using zero order predictor
14 p2550 A70-30768
- Analog data transmission over PCM telemetry link, comparing noncoherent FSK vs PSK reception performance for waveform error
14 p2552 A70-31187
- PCM telemetry transmitters, command and receiver and ground control for German research satellite Azur
16 p2890 A70-34349
- PCM command control system for high altitude ballooning operations, discussing component equipment
20 p3587 A70-40085
- SKYNET PCM telemetry and command station, discussing system design, pseudomonopulse feed, command and computer subsystems, etc
20 p3589 A70-40322
- Digital PCM telemetry link coding techniques, discussing encoding-decoding complexity, and concatenated block scheme for channel
24 p4315 A70-46258
- PDM [MODULATION]**
U PULSE DURATION MODULATION
- PEACETIME**
Peaceful uses of outer space, discussing committee reports and recommendations, direct broadcast satellites, administrative and financial implications, etc
07 p1428 A70-19688
- PEAKS**
Optimal synthesis of filters maximizing peak-sideobe ratio of arbitrary zone of mutual ambiguity function
13 p2369 A70-29734
- PECLET NUMBER**
Transverse flow convective instability spectrum in vertical channel with porous walls, noting Peclet number effects
12 p2333 A70-28199
- Two dimensional body slow motion through stratified fluid bounded by parallel vertical walls, examining flow at different Peclet numbers
21 p3744 A70-41246
- PEDALS**
Speed and accuracy of foot operation of controls tested by circular targets in rows within reach of right foot
02 p0245 A70-12144
- PEDOLOGY**
U SOIL SCIENCE
- PEELING**
Metal adhesive joints peeling and stripping strength determinations, describing static and dynamic tests
08 p1503 A70-20884
- PEENING**
NT SHOT PEENING
- PELAGIC ZONE**
Pelagic sediment natural spherules identification based on formation process and manganese nodules abundance
13 p2400 A70-29859
- PELLETS**
Steel balls impact on polyurethane foam, porous rubber and fiber materials, noting effects on both pellets and targets
09 p1769 A70-22123
- PENALTIES**
Reliability guarantee vs cost of capital, analyzing contract compliance delay and discounted penalty expenditures
13 p2525 A70-29570
- Penalty functions for state-space constraints elimination in continuous optimal control problems
14 p2562 A70-31353
- PENDULOUS GYROSCOPES**
U GYROSCOPIC PENDULUMS
- PENDULUMS**
NT GYROSCOPIC PENDULUMS
Mathematical pendulum oscillations under clockwise and counterclockwise impact impulse, deriving differential equations describing trajectories
01 p0141 A70-10153
- Lorentz invariance test using bar magnet on torsion fiber, analyzing preferred reference frame in space assuming earth velocity coupled to electron spin through specific term
02 p0341 A70-12849
- Astronomical clock pendulum oscillations isosynchronization noting effects of suspension elastic moment, fabrication, calibration errors and rotation center displacement
03 p0484 A70-13367
- N degree of freedom pendulum with suspension point vibrating vertically, determining conditions for parametric resonance occurrence
03 p0524 A70-13368
- Cross coupled rotational motions of free solid body carrying nutation-damping pendulums
07 p1335 A70-19808
- Time optimal control for rotation of solid supporting body with aid of pendulum, obtaining motion equations by algorithm
07 p1337 A70-20299
- Dynamic stability of pendulum-weight system during vertical HF small amplitude vibration of suspension point by averaging method
08 p1543 A70-20494
- Resonant oscillations of coupled physical pendulums, investigating phase trajectories by Struble method
08 p1544 A70-20964
- Spherical pendulum equations of motion solved using Hamilton-Jacobi theory
08 p1546 A70-21465
- Bifilar pendulum vibration absorber for counteracting helicopter main motor vibratory forces
10 p1805 A70-24657
- Support vibration effect on zero shift of damped vertical pendulum, using equivalent linearization with perturbation scheme
10 p1917 A70-25205
- Polymers dynamic properties in hyperelastic and vitreous states as function of temperature, using torsion pendulum method
18 p3263 A70-36469
- Soviet book on dynamic systems with cylindrical phase space covering differential equations with angular coordinates, parameter estimation, multidimensional and discontinuous systems, pendulums, etc
19 p3470 A70-37468
- Multiaxis clusters of single axis pendulous accelerometers with coincident centers of angular motion insensitivity
19 p3431 A70-38539
- Resonant oscillations of coupled physical pendulums, investigating phase trajectories by Struble method
20 p3672 A70-39386
- Inverted torsion pendulum performance improvement, describing dashpot to dampen lateral vibrations
23 p4202 A70-44950
- Pendulum dynamic stability under parametric excitation, presenting transient and steady state solutions by linear and nonlinear theory applications
24 p4379 A70-45587
- Oscillating pendulum equipment for nondestructive material tests, determining longitudinal and transverse elastic moduli of specimen
24 p4338 A70-45738
- PENETRANTS**
Inspection penetrant systems reliability and performance predictability for nondestructive flaw detection
01 p0096 A70-10005
- Nondestructive test procedures for maintaining and determining serviceability of penetrant inspection materials during use
05 p0844 A70-15780
- Liquid oxygen usage inspection penetrant systems combining nonreactivity with flaw detection sensitivity
08 p1508 A70-21745
- Nondestructive testing of small metal tubing, discussing eddy current, ultrasonic and electromagnetic inspection and dye penetrants
08 p1509 A70-21748
- Fluorescent penetrants vs magnetic powder test for individual and continuous material inspection, discussing sensitivity and surface finish influence
24 p4338 A70-45741
- Commercial fluorescent penetrants for natural and artificial cracks, considering indication characteristics
24 p4348 A70-45742
- Inspection penetrant development for flaw detection, considering entrapment efficiency and dimensional sensitivity
24 p4348 A70-45743
- PENETRATING PARTICLES**
U CORPUSCULAR RADIATION
- PENETRATION**
Penetration criterion for double walled structures subject to hypervelocity meteoroid impact providing class of protective material properties
03 p0584 A70-12921
- Penetration depth calculation of high speed non-deformable sphere into massive body, approximating force on sphere by ideal incompressible fluid cavitating flow
04 p0776 A70-15269
- Hard electron bremsstrahlung measurement during intense polar aurorae in January and February 1968, determining electron flux penetration region
04 p0682 A70-15731
- Point source intensity fluctuations dependence on penetration depth of wave propagating in statistically homogeneous and isotropic media
09 p1636 A70-23133
- Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris
13 p2509 A70-28521
- Low energy protons penetration into magnetosphere between forbidden regions, using model of constant electric field with charge exchange as loss mechanism
13 p2477 A70-29183

- Hard electron bremsstrahlung measurement during intense polar aurorae in January and February 1968, determining electron flux penetration region
14 p2575 A70-30816
- Particle penetration of solid or liquid combustible additives injected into air breathing combustors airstreams
17 p3073 A70-35665
- Welding electron beams metal penetration dependence on ionization phenomena, discussing model based on self focusing
22 p4043 A70-42379
- Isothermal kinetic rates of penetration of polymer by spherical indenter, using thermomechanical analyzer
22 p4059 A70-43079
- Nondestructive thermal and thermochemical treatment penetration depth measurement in metal, examining magnetic test and ultrasonic techniques
24 p4346 A70-45721

PENETRATION BALLISTICS

U TERMINAL BALLISTICS

PENETRAMETERS

- Wire and hole type penetrometers minimum perceptible image contrast level on radiograph, considering X ray quality and films effects
24 p4337 A70-45713

PENNING DISCHARGE

- Quasi-linear mode coupling in confined hot-ion Penning discharge plasma, discussing externally imposed excitation and internally generated oscillations
05 p0888 A70-16166
- Microwave nonlinear effects including mixing, harmonic generation and current rectification observed in plasma sheath surrounding Langmuir probe using PIG discharge
05 p0852 A70-16992
- Cyclotron frequency harmonics emission of PIG discharges linked to nonthermal electron plasma instability
07 p1354 A70-20316
- Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution [AIAA PAPER 69-259]
11 p2102 A70-26120
- Discharge effects on LF oscillations and ion extraction in hot cathode Penning plasma
13 p2463 A70-29370
- Penning pump argon stability, noting influence of pressure and ion incidence angle on cathode surface
15 p2744 A70-31847
- Radial distributions and escape of charged particles across magnetic field in hot cathode Penning discharge plasma with LF oscillations
15 p2780 A70-32191

PENNING EFFECT

- Hg and Cd seeded Ce plasma wide-spaced diode without external light source investigated for Penning effect on diode performance
10 p1808 A70-25038

PENTACHLORIDES

U CHLORIDES

PENTANES

NT NEOPENTANE

PENTOBARBITAL SODIUM

- Sodium pentobarbital effect on oxygen poisoned mice, observing respiratory depression coupled with lung failure
21 p3764 A70-41480

PENTOLITE

- Pentolite spherical charge gaseous explosion products expansion into vacuum, using Taylor similarity solution for flow in detonation wave
15 p2774 A70-31764

PENUMBRAS

- Penumbras forms and magnetic polarity distribution relationship in sunspot groups
01 p0184 A70-10955
- Penumbras visibility of earth on lunar disk related to moon distance during lunar eclipse, discussing moon vanishing
03 p0569 A70-13361
- Hydrostatic models of sunspot penumbra and umbra, analyzing spot transparency influence on Wilson effect
03 p0571 A70-13596
- Wilson effect in sunspot structure as penumbra foreshortening and disappearance or penumbra occultation by photosphere, analyzing intensity profiles on disk passage photographs
06 p1143 A70-18001
- Penumbras during lunar eclipses analyzed photometrically, considering effects of earth upper atmosphere and lunar luminescence
07 p1377 A70-18973
- Penumbral magnetic field strength on basis of photoelectric spectra of undisturbed photosphere
09 p1757 A70-22730
- Penumbras visibility of earth on lunar disk related to moon distance during lunar eclipse, discussing moon vanishing
11 p2118 A70-26726
- Penumbras and geomagnetic threshold effects on ionospheric electron production by primary cosmic rays
12 p2296 A70-28366

- Photoelectric spectra of photosphere and sunspot umbra and penumbra ranging from 3900 to 8000 Å
20 p3712 A70-40412
- Sunspot intensity profiles near solar limb, observing center side penumbra photosphere border
21 p3885 A70-40957
- Sunspot umbras and penumbras magnetically nonsplit lines measured photographically by spot contrast discriminator
21 p3887 A70-41115
- Sunspot penumbra velocity field spatial structure by filament spectrum analysis, plotting radial velocities relative to undisturbed photosphere
24 p4400 A70-45310

PEPSIN

- Pesinogens A, C and D from stomach mucosae of smooth dogfish separated by chromatography on DEAE cellulose
11 p1987 A70-26007
- Stereospecificity and reaction rate of enzymatic hydrolysis of racemic substrate by pepsin determined by nuclear magnetic resonance spectroscopy
12 p2181 A70-27472

PEPTIDES

- Optical transmission spectra of polypeptide films showing exciton structure near 1600 Å for alpha and polyproline II helices
02 p0345 A70-12723
- Chloride and sulfhydryl activators in glucagon degradation and secretion by purified rat liver dipeptidyl aminopeptidase I/Cathepsin C/
04 p0631 A70-14682
- Peptides removal from Merrifield solid phase by transesterification with anion exchange resin
06 p1003 A70-17154
- Peptide formation by stepwise tetramer-mediated condensation of alpha-amino acid as possible prebiotic process
07 p1204 A70-19202
- Mass spectrometric sequence determination of oligopeptides via acetylacetyl derivatives, giving reliable results with small peptides
09 p1630 A70-22976
- Peptide formation during glycine reaction with linear polyphosphates and cyclic metaphosphates, considering prebiotic synthesis
09 p1630 A70-23395
- Nitrosyl chloride reagent effects on phenylalanine peptides
12 p2181 A70-27471
- Polymer optical properties in terms of interaction matrix coupling monomers, applying to polypeptide alpha helix, beta sheets and polyproline helices
14 p2544 A70-30118
- Amino acids changes distribution in specificity regions of light polypeptide chains of immunoglobulins showing correspondence with Poisson distribution
14 p2536 A70-30349
- Taro ferredoxin amino acid sequence determined from chymotryptic and thermolysin peptides sequence
14 p2544 A70-30351
- Optical properties of amorphous polymers, considering one state calculations for flexible polypeptides in solution and disordered regions of films or proteins
21 p3780 A70-41702
- Stereochemical course of sterically controlled syntheses of dipeptides, using optically active amino acids
22 p3983 A70-43095
- Lipoprotein lipase activation on emulsified triglycerides by specific glycopeptides of human serum lipoproteins
24 p4298 A70-45802

PERCEPTION

- NT AUDITORY PERCEPTION
NT CONSCIOUSNESS
NT CRITICAL FLICKER FUSION
NT KINESTHESIA
NT OLFACTORY PERCEPTION
NT PROPRIOCEPTION
NT SENSORY PERCEPTION
NT SPACE PERCEPTION
NT TACTILE DISCRIMINATION
NT TASTE
NT VERTICAL PERCEPTION
NT VIBRATION PERCEPTION
NT VISUAL DISCRIMINATION
NT VISUAL PERCEPTION
- Air traffic vibration effects on human organs and sensations, considering blood circulation, lungs, eyes and muscles
09 p1625 A70-23007

PERCEPTRONS

U SELF ORGANIZING SYSTEMS

PERCEPTUAL SPEED

U PERCEPTUAL TIME CONSTANT

PERCEPTUAL TIME CONSTANT

- Perceptual tuning in tachistoscopic identification task with alternatives provided after or before and after stimulus
11 p1986 A70-25829
- Hypoxia effects on voluntary response time to peripherally located visual stimuli
24 p4302 A70-46107

PERCHLORATES

NT AMMONIUM PERCHLORATES

NT MAGNESIUM PERCHLORATES

NT POTASSIUM PERCHLORATES

- Thermal decomposition of perchlorates evaluated by mass spectrometer, with regard to composite propellants combustion processes
17 p3145 A70-34638

- Al particles fusion during combustion of stoichiometric mixtures of ammonium and potassium perchlorate and polyformaldehyde
18 p3299 A70-36246

- Powdered metallic additions effect on combustion rates of ammonium perchlorate with bitumen and polymethyl methacrylate and potassium perchlorate with bitumen mixtures
18 p3299 A70-36247

PERCHLORIC ACID

- Premixed perchloric acid-methane two flame structure, measuring burning velocities, spectra, temperatures and burned gas compositions
02 p0352 A70-12034

- Premixed flames of methane with chlorine dioxide and perchloric acid, comparing properties with methane-oxygen flames, suggesting unified reaction mechanism
07 p1425 A70-20007

PERCUSSION

- Linearization of elastic forces in vibration system with percussion
10 p1958 A70-24516

PERFECT GAS

U IDEAL GAS

PERFLUORO COMPOUNDS

- Photodissociation of perfluoroalkyl iodides filler of pulsed laser operating cavity, discussing thermal molecular dissociation and unexcited iodine atoms formation
08 p1513 A70-21418
- Poly(perfluoroalkylene oxides) preparation and curing, considering molecular weight and thermal stability
21 p3783 A70-42145

PERFORATED PLATES

- Thin anisotropic elliptical plate elastic equilibrium weakened by hole and under concentrated loads
01 p0211 A70-11445
- Curvature and hole spacing effects on stress concentration of isotropic plate weakened by two curvilinear holes, applying small parameter method
01 p0212 A70-11447
- Elastic deformation of plates with circular holes, determining stress concentration factors for compressible and incompressible materials on digital computer
02 p0390 A70-12810
- Complex stress functions and stress intensity factors at tips of star-shaped contour hole in infinite tensile sheet, including crack forking with arbitrary angle
03 p0585 A70-12974
- Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc
03 p0588 A70-13243
- Plane longitudinal elastic monochromatic wave diffraction on stress free circular holes in infinite plate, calculating stresses between holes
03 p0589 A70-13375
- Hole reinforcement providing stressed state beyond hole equivalent to plate stress without hole, reducing problem to annulus region mapping
03 p0590 A70-13378
- Eigenfunctions of oscillating infinite perforated membranes for various boundary conditions at holes
03 p0591 A70-13415
- Stress-strain state of perforated shallow shells with arbitrary curvature using Green matrices
03 p0591 A70-13416
- Stress-strain state of infinite isotropic perforated plate under cyclic symmetry, assuming finite strains and nonlinear material
03 p0592 A70-13445
- Equivalent rigidity of doubly periodic symmetrically perforated infinite plate strengthened by elastic ring under isotropic tension
03 p0595 A70-13754
- Stress distribution in anisotropic half plane with reinforced circular hole under external loads applied at plane infinity and ring edge
04 p0765 A70-14417
- Perforated plates bending for multiply connected regions, proving quasi-regularity and uniqueness of boundary value equations
04 p0767 A70-14481
- Statistical model equations to predict discharge coefficients for concentric orifice plates as function of line size, diameter ratio and Reynolds number [ASME PAPER 69-WA/FM-6]
04 p0667 A70-14837
- Reinforced openings effect on burst strength of ductile circular plates subjected to pressure loads
05 p0943 A70-16810
- Stress-strain state of plates weakened by reinforced hole and under tensile and bending loads, including boundary conditions
05 p0945 A70-16856

Bending problem for homogeneous transversely isotropic plate weakened by curvilinear hole
05 p0946 A70-19659

Bending stress concentrations in elastic square plate with central hole under uniform load, using finite element solutions of modified Rayleigh-Ritz method
06 p1168 A70-17940

Critical stresses for plate with circular hole and cracks assuming symmetrical load
07 p1402 A70-19054

Effect of uniformly distributed circular holes infinite double row on stress distribution in transversely bent strip, based on Kirchhoff bending theory
07 p1407 A70-19385

Stressed state of plate with reinforced circular hole under tension and bending using Airy stress functions
07 p1407 A70-19540

Isotropic plate stress-strain state weakened by doubly periodic curvilinear holes using nonlinear theory
07 p1408 A70-19544

Critical stress-strain diagrams for brittle plate possessing notch-type stress raisers under biaxial tension
07 p1408 A70-19547

Stress concentrations calculation at holes in plates and shells of positive Gaussian curvature applicable to hyperbolic shells
07 p1408 A70-19548

Boundary value problems solution for infinite elastic isotropic plane weakened by arbitrarily distributed circular holes based on using series in Taylor functions
07 p1408 A70-19549

Thin sheet and laminate bullet hole deformation zone microstructure observation by electron microscopy, considering terminal ballistics approach
07 p1413 A70-20049

Plate electromagnetic wave diffraction on conducting plate with circular hole
08 p1456 A70-20503

Limiting equilibrium of unbounded cracked elastic plate with circular hole, studying crack propagation under compression
09 p1769 A70-22121

Stressed state in region of strain raisers round holes/ in plate subjected to two axial tension associated with plastic yield
09 p1771 A70-22464

Stress concentrations and load transfer around cutouts in fiber reinforced laminates, discussing boron epoxy plates with circular holes
09 p1710 A70-22793

Creep and stability of perforated and unperforated turbine disks under operating conditions
09 p1779 A70-23097

Thermal stress freezing during optical polarization study of perforated disk three dimensional thermoelasticity
09 p1780 A70-23105

Stress concentrations in turbine disks with eccentric holes under steady creep
09 p1780 A70-23200

Stress concentration at circular hole in plate, considering material creep and aging effects
09 p1782 A70-23290

Steady harmonic oscillations of half space with circular holes, deriving algebraic equations for boundary value problems
09 p1782 A70-23296

Stress concentration in plate with hole reinforced by elastic cylinder described by equations of three dimensional elasticity theory
09 p1784 A70-23592

Stress distribution in strip with asymmetrically positioned infinite row of equal and equally spaced circular holes subjected to longitudinal tension or transverse bending
10 p1955 A70-24082

Equivalent rigidity of doubly periodic symmetrically perforated infinite plate strengthened by elastic ring under isotropic tension
10 p1960 A70-25009

Fatigue crack propagation rate in sheet alloys with holes as stress concentrators related to duration of various development phases
10 p1965 A70-25290

Pinhole expansion in anisotropic plastic disks determined by obtaining solutions for Tresca and Mises yield functions, assuming plane stressed state
11 p2138 A70-26171

Thermal stress concentration in constant thickness orthotropic plate with rounded square hole
12 p2323 A70-27338

Transmission coefficient for perforated screen related to orientation of rectangular and cross shaped narrow openings and field polarization during normal wave incidence
12 p2191 A70-28174

Steel plates with penetration of oblique circular cylindrical aperture tested for effects on stress concentration
13 p2510 A70-28728

Stress concentrations and optimum shape minimum-weight reinforcement of circular holes in plates determined by polarization-optical technique
13 p2512 A70-28864

Stress distribution in isotropic plates weakened by elliptical holes under bending based on elastic shallow shell theory and small parameter technique
13 p2514 A70-29291

Stressed state of infinite plate with circular hole induced by displacement discontinuity in form of cracks
13 p2514 A70-29292

Stress-strain state of infinite isotropic plate weakened by curvilinear slit
13 p2514 A70-29293

Elastic isotropic circular perforated plate stress-strain state, proving quasi-regularity of infinite linear algebraic equations
13 p2515 A70-29317

Isotropic plates weakened by circular holes, investigating bending by Ambartsumian plate theory
13 p2515 A70-29509

Stress concentration coefficient around hole in isotropic nonlinear plate under shear, reducing solution to integrating fourth order differential equation
13 p2516 A70-29510

Tensile test on perforated Al-filled rectangular plate of photoelastic material, obtaining stress concentration at hole by photoelastic visualization
13 p2516 A70-29628

Surface heat transfer coefficients under perforated plate of multiple square array round impinging air jets [ASME PAPER 69-GT-4]
14 p2666 A70-31025

Stresses in plate containing circular hole with notch under uniaxial tension, determining parametric coefficients by Fourier transforms
14 p2661 A70-31326

Axisymmetric nonuniform initial thickness disk under pressure and twisting along interior surface of circular hole using incremental theory of plasticity for deformation analysis
15 p2816 A70-32004

Stress analysis of polystyrene plate weakened by doubly periodic system of equal circular holes
15 p2817 A70-32166

Point heat source generation of thermal stresses in elliptical plate with circular hole, using functions of complex variable for stress field determination
15 p2818 A70-32182

Stress concentration problems for partially strengthened circular hole in plate under uniaxial tension
15 p2819 A70-32185

Stress concentration in flat rectangular and skew panels with circular holes from photoelastic verification of direct stiffness method [SESA PAPER 1633]
15 p2820 A70-32303

Stress distribution around oblique holes in uniaxially loaded plate using three dimensional photoelastic analysis [SESA PAPER 1618]
15 p2820 A70-32305

Stress concentration around oblique circular cylindrical apertures in steel plates [SESA PAPER 1533]
15 p2820 A70-32306

Thin plates with central circular holes, investigating creep behavior for biaxial edge tractions
15 p2822 A70-32359

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests [AIAA PAPER 69-531]
15 p2787 A70-32510

Elastic layer with circular cylindrical cavity under axial tension /Kirsch problem/, determining stress concentration from boundary value problem
18 p3335 A70-36130

Stress concentration near holes in plate in plane problem of thermoelasticity, taking into account physical and geometrical nonlinearities
18 p3336 A70-36133

Nonlinearly elastic plate with hole of general shape, determining stress concentration
18 p3336 A70-36139

Elastic bending of perforated inhomogeneous plane with circular holes or inclusions
18 p3340 A70-36579

Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc
19 p3548 A70-38461

Disk equations to determine tensions around arbitrary hole or stiffening contours
20 p3720 A70-39623

Infinite elastic plate with pair of insulated unequal circular holes, calculating thermal stresses
20 p3720 A70-39672

Elastoplastic equilibrium of thin infinite plate with periodic slit system along straight line under tension, investigating localized plastic deformation domains
20 p3721 A70-39769

Cross shaped plates with circular hole, determining stress concentrations under uniaxial and biaxial tension
20 p3734 A70-40443

Perforated infinite plate finite elastic deformation under biaxial tension, using successive approximation

in connection with complex variable method of plane elasticity
21 p3932 A70-40551

Perforated cantilever beams and plates vibration damping capacity improvement by stress concentration introduction
21 p3933 A70-40729

Perforated steel strip axial tension load limit, considering various hole diameters and numbers
21 p3936 A70-41415

Stress concentration effect on perforated Al alloy panel fatigue, using theory for material critical thickness near notch
21 p3938 A70-41955

Stresses and strains concentration around elliptic hole in finite plates subjected to uniform load, using photoelasticity, moire effect and grids
22 p4114 A70-42697

Shock wave damping by perforated walls in gas channel, visualizing curved fronts with 24-spark HF camera [SMPE PREPRINT 104]
22 p4032 A70-43031

Stress concentration near holes in nonlinear viscoelastic plate, using elastic theory
23 p4266 A70-43989

Heat conduction of doubly connected square and triangular isotropic plates with hole, applying small parameter method
23 p4276 A70-44217

Steel and duralumin strips with circular holes tested under axial tension, determining relationship between strength weakening and ultimate stress
24 p4420 A70-45272

Infinite plate perforated with rounded corner square hole under uniform partial loading, examining elasticity with conformal mapping
24 p4427 A70-46367

PERFORATING
Plastic film precise perforation using carbon dioxide laser and optical tooling permitting double exposure to laser beam
03 p0497 A70-13565

PERFORATION
Subsonic boundary lift interference in wind tunnels with perforated walls, using point matching method
14 p2563 A70-30869

Perforated solid body moving in ideal incompressible fluid, deriving equations of motion in Lagrangian form
20 p3610 A70-39732

PERFORMANCE
Performance characteristics analysis of large area roll-up solar arrays based on support structure size and weight [ASME PAPER 69-WA/ENER-11]
04 p0770 A70-14898

Linear regulator optimal for exponentially time-weighted quadratic performance indices, using cost equivalence concept in infinite terminal time solution
04 p0663 A70-15604

Minimum performance standards established by Radio Technical Commission for Aeronautics for airborne radio marker receiving equipment operating on 75 MHz
13 p2364 A70-28999

Time lag system performance index bounds determination and optimal feedback controller design based on min-max criteria
14 p2561 A70-31185

PERFORMANCE CHARACTERISTICS
U PERFORMANCE
PERFORMANCE DECUREMENT
U PERFORMANCE
PERFORMANCE PREDICTION
NT PREDICTION ANALYSIS TECHNIQUES
Performance boundaries of space propulsion systems containing nuclear electric stages [AIAA PAPER 69-249]
01 p0196 A70-10839

Mathematical models construction for predicting and measuring air traffic controller workload, using synthetic and analytic methods
02 p0332 A70-11972

Prediction systems for turbulent boundary layers, noting momentum integral equation use in all integral methods
02 p0281 A70-12327

Method of weighted residuals /MWR/ applied to turbulent boundary layer equations, describing two parameter prediction technique
02 p0282 A70-12330

Evaluation of performance of prediction methods for mandatory flows
02 p0286 A70-12359

Resistance strain gauge performance prediction, investigating response during temperature change for preattachment matching
02 p0302 A70-12498

Reinforced epoxy resin performance prediction from correlation between unfilled resin and laminates mechanical properties
02 p0322 A70-12606

Steady state deuterium-tritium fusion reactor approximate parameters prediction possibility based on

interim assumptions of plasma confinement, model, etc 02 p0349 A70-12755

Turbulent and wall jets with wide varieties of geometries and boundary conditions, predicting jet-in-flow effects on entrainment rate, lift, drag, etc 02 p0288 A70-12840

Flow development in conical diffusers, delaying stall with high velocity air injection through annular slot at diffuser inlet predicted by finite difference method 02 p0224 A70-12866

Ground clutter characteristics from moving receiver in bistatic radar system, developing method for performance prediction and problem analysis 03 p0449 A70-13586

Transistor behavior prediction at threshold of large signal conditions, using nomographs to evaluate maximum drive levels before distortion onset 03 p0452 A70-13966

Computerized approximations for quantitative predictions of EED firing characteristics based on header geometry and electrical leads 03 p0548 A70-14118

Piezoelectric transducers performance in ultrasonic devices evaluated from loss and admittance measurements, using Mason equivalent circuit method 03 p0496 A70-14206

Ablative throat nozzle performance, plotting change in thrust, exit pressure and Mach number as function of ablated to initial area ratio 03 p0410 A70-14336

Ball bearing performance prediction using analytical technique based on race profilometry data, considering torque variation [ASME PAPER 69-WA/LUB-4] 04 p0698 A70-14769

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/ chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow [AIAA PAPER 69-469] 04 p0732 A70-15423

Computerized thermal model simulating environment control system, crew and vehicle structure in performance prediction for Apollo lunar module [SAE PAPER 690621] 05 p0922 A70-15848

Antenna far field noise effect on monopulse type and conical scanning radar angle meters performance 05 p0813 A70-16256

Composite strength and stiffness prediction from fiber and matrix properties using computer 05 p0870 A70-16579

Miniature fluxgate magnetometer for sounding rocket measurements of two orthogonal components of external magnetic field, predicting performance by linear mathematical model 05 p0851 A70-16690

Turboblowers and compressors air tests for gas operation performance prediction 06 p1129 A70-17136

Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine [AIAA PAPER 69-452] 06 p1130 A70-17176

Optimal feedback controls design for linear systems relative to time-multiplied performance indices 06 p1025 A70-17960

Spherical gas bearings static characteristics and performance, discussing materials selection, optimum clearances and surface hardness 07 p1294 A70-19122

LUF /lowest useful frequency/ prediction for HF sky wave communication, emphasizing prediction methods using computers 07 p1229 A70-19156

Radio propagation characteristics and communication system performance, discussing concepts of MUF, LUF, error rate, communication system modeling, prediction techniques, etc 07 p1229 A70-19157

SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements [AIAA PAPER 69-235] 07 p1364 A70-19702

ICRPG liquid propellant thrust chamber performance evaluation methodology, reviewing imperfections and limitations [AIAA PAPER 69-468] 07 p1365 A70-19728

Freezing-mixing model for predicting plasma jet flow reactor yield development from analyses of thermochemical equilibrium, chemical reaction freezing and turbulent mixing 07 p1351 A70-19893

Missassignment prevention in aviation specialties, using multiple regression analyses and dichotomous pass vs fail criterion to develop prediction equations 07 p1222 A70-19929

Multichannel performance measurement of threshold extension FM demodulators using click suppression techniques 08 p1460 A70-20812

Multistage axial compressor performance described by mathematical model based on maximum probability principle 08 p1558 A70-21190

Computer program predicting thermal response of fusion welding tooling chill bars and holding fixtures, simulating moving heat source and contact 08 p1508 A70-21487

Compound state resonance energies and widths in elastic scattering of diatomic molecule at energies below rotational excitation threshold 08 p1548 A70-21523

Beam delay line for introducing variable gradients in Molonglo radio telescope, discussing circuits and performance 08 p1478 A70-21824

Reliability estimations precision evaluated by Monte Carlo simulation, analyzing causes of data inaccuracy 09 p1689 A70-22019

DASSS operational parameters and performance in SPADE satellite voice communication system 10 p1837 A70-24350

Electrode structural parameters effect on polarization characteristics of air-hydrogen cells to obtain optimum performance, reliability and service life 10 p1831 A70-24471

Linear time-varying systems transient responses prediction, using Krylov-Bogoliubov method and parameter plane analysis 10 p1855 A70-24704

High intensity shock wave propagation and generation of high enthalpy hypersonic flow studied to determine IMF-2 hypersonic shock tube performance limit 10 p1871 A70-24795

Hydrostatic oil journal bearings performance with several supply holes and incompressible lubricant, analyzing Reynolds pressure equation by numerical method 10 p1895 A70-24851

Solar activity forecasting using normalized sunspot curves deduced from 200 years of observations, discussing parameters of running 11 year cycle 10 p1949 A70-25287

Gas turbine engine performance prediction with water-methanol injection, describing analytical method [SAE PAPER 700208] 11 p2102 A70-25881

Reusable ballistic orbital-global transportation systems using rocket sled-assist-takeoff compared to SST systems in terms of effectiveness and cost 11 p2122 A70-26048

Solid rocket motor performance prediction including motor pressure, thrust and propellant parameters, discussing mathematical modeling of flow fields [AIAA PAPER 69-732] 11 p2102 A70-26117

Embossed/crinkled aluminized film multilayer insulation blankets with joints performance variation with temperature predicted by radiation heat transfer correlation 11 p2150 A70-26365

Lifting entry vehicle thermal protection system /TPS/ material performance, analyzing metallic radiator and passive transpiration systems and rigid insulator 11 p2150 A70-26368

Chemical milling characteristics, development and applications, outlining performance capabilities with Al, Ti, Fe and Mg alloys 12 p2240 A70-26991

PAM-FM modulation system optimal receiver derivation, assessing threshold performance assuming uniformly distributed modulating signal 12 p2183 A70-27155

Nonlinear phase shift equation derived from TWT single carrier performance, predicting multicarrier performance of communications satellites 12 p2195 A70-27248

Spherical reflector antenna with Gregorian correctors, calculating gain, far field radiation pattern and efficiency as functions of subreflector and feed positions 12 p2200 A70-28052

Gust response calculations compared with flight measurements for two fighter aircraft and jet transport to determine accuracy [AIAA PAPER 68-892] 12 p2162 A70-28077

Externally pressurized air journal bearing performance prediction, obtaining pressure distribution by numerical solution of Reynolds equation 13 p2418 A70-28743

Inertial hybrid navigation system optimization, discussing performance curves and numerical filters synthesis and error elimination 13 p2448 A70-28747

Pogo sticks concept for lunar exploration, showing improved performance over lunar surface or flying vehicles 13 p2505 A70-28891

Neutron irradiation effect on n-channel GaAs junction FET performance, considering transconductance, drain current, pinch-off voltage and cut-off frequency 13 p2376 A70-28932

Computer program for system reliability prediction, using probability tree approach and block probabilities 13 p2373 A70-29565

Computerized Monte Carlo prediction of maintenance time distribution of complex system, concerning man hours, elapsed time and schedule meeting 13 p2524 A70-29566

Beneficial and detrimental effects of value engineering change proposals on system reliability, relating cost improvement and performance factors 13 p2524 A70-29568

Reliability prediction techniques accuracy and optimal timing including true and project control predictions 13 p2524 A70-29569

Failure prediction testing and elements replacement at field maintenance level for increasing equipment reliability 13 p2423 A70-29697

Nuclear magnetic resonance magnetometers performance using dynamic polarization by electronic pumping 13 p2414 A70-30040

Agna propulsion system performance model for predicting propellant flow rate, mixture ratio, thrust time and specific impulse [AIAA PAPER 69-453] 14 p2629 A70-30754

GaAs-Ge heterojunction transistors with microwave planar geometry, calculating performance for comparison with Ge homojunction transistor 14 p2556 A70-30925

System effectiveness apportionment for constraints existing on accountable factors using Lagrange multiple method 14 p2669 A70-31111

Systems effectiveness equated to function of performance, availability, reliability, maintainability, quality control and manufacturing, emphasizing optimization 14 p2592 A70-31112

Wideband PCM/FM discriminator detection, predicting effects of predetection and postdetection filtering on system performance 14 p2558 A70-31192

Radial flow impellers design for maximum machine performance, using straight cascade characteristics 15 p2672 A70-31825

Field correlation theorem for deducing Cassegrain antennas performance from internal field distributions, considering two reflector diffraction problems 15 p2698 A70-31953

Cost effective reliability prediction techniques, discussing precision gyros procurement by NASA 15 p2736 A70-31964

Hybrid rocket engine with solid oxidizer based on ammonium perchlorate and Al, studying performance with FORTRAN 5 program 15 p2787 A70-32273

Constrained and constant coefficient optimal controls compared in optimizing performance criteria of vibrating beams 16 p2886 A70-33332

Rolling element bearings fatigue life prediction and extension, using elastohydrodynamic lubrication theory [ASME PAPER 70-DE-19] 16 p2917 A70-33423

Dynamic seal effectiveness prediction, considering bearing and sealing pressure distributions, friction coefficient, flow characteristics, etc [ASME PAPER 70-DE-53] 16 p2918 A70-33514

Liquid rocket engine injector elements design criteria, using noncircular orifice geometry to predict efficiency [AIAA PAPER 70-704] 16 p2967 A70-33565

Motor design parameters effects on solid propellant extinguishment predicted from mathematical combustion model 16 p2962 A70-33571

Optimal Kalman tracking filter performance estimation for manned maneuvering targets 16 p2949 A70-34057

Incoherent Manchester coded FSK system performance based on optimal signal detection theory, plotting instantaneous frequency vs time 16 p2866 A70-34074

Single stage /rigid/, two stage and stretch yo-yo despin mechanisms, discussing advantages, disadvantages and flight tests 16 p2985 A70-34114

Flow control valve without moving parts used in ATS A and D, describing design, operation and theoretical performance 16 p2846 A70-34132

Helicopter rotor blades flapwise bending moments prediction by transfer function/superposition techniques 17 p3013 A70-34704

Aircraft optimal operating procedure development by integral-variational performance analysis methods, discussing flight paths, fuel consumption, mission requirements, etc [AIAA PAPER 70-876] 17 p3016 A70-34812

Extrinsic photoconductive detectors, comparing performance for microwave and DC bias based on gain bandwidth product and SNR analysis 18 p3232 A70-36746

Axial gas turbine performance prediction method improvements based on comparison with tests [ASME PAPER 70-GT-2] 18 p3304 A70-36859

Transonic high turning low aspect ratio stator cascades flow field performance prediction, reducing secondary flows by partial slots [ASME PAPER 70-GT-63] 18 p3209 A70-36875

End wall boundary layers effect included in performance prediction method for multistage axial compressors
[ASME PAPER 70-GT-80] 18 p3210 A70-36884

Systems reliability numerical prediction
19 p3389 A70-38205

Solid state laser with transverse mode selection to increase brightness, discussing plano-concave resonator
19 p3447 A70-38508

Optical system mtf measurement by photographic technique for comparing telescopic sight with simulator, discussing performance
19 p3428 A70-38511

Contact-relay circuits failure free operation probability, taking into account coil winding breakage
19 p3390 A70-38579

Frequency multipliers with charge storage diode, analyzing turn-off transient effect on performance by charge control model
19 p3391 A70-38748

Instrument ball bearings running torque prediction at high speed under combined radial and axial loads
[ASLE PREPRINT 70AM 3D-3] 19 p3438 A70-38803

Rarefied gas viscoseals performance prediction by theoretical model, comparing results with experiment
[ASLE PREPRINT 70AM 5C-3] 19 p3439 A70-38806

Computer program for assessment and modification of mechanical component life predictions by discrete formulation of Bayes theorem
19 p3440 A70-38816

Long life reliability measurement for reentry and recovery systems, noting applicability to program monitoring, optimum resources allocation, etc
19 p3442 A70-38832

Integrated structural analysis for reliability prediction of solid propellant rocket motors
19 p3489 A70-38844

Carbons and graphites ablation tests for predicting performance under reentry conditions, considering microstructure effects
20 p3735 A70-39214

Nonlinear acoustic absorbers behavior analysis, discussing spectral and temporal computation methods
20 p3672 A70-39237

Apollo Lunar Module strapdown Abort Guidance system, correlating performance prediction with flight test results
[AIAA PAPER 70-1028] 20 p3666 A70-39509

Rocket course correction by lateral air expulsion (ram air control), deriving model for performance prediction
[AIAA PAPER 70-90] 20 p3715 A70-39559

Nonstationary random processes prediction by numerical method
20 p3673 A70-39762

Linear feedback control system with quadratic penalty function, deriving lower bound on optimal performance for suboptimality evaluation
20 p3604 A70-40116

Electrostatic plasma probe inverse process I-V properties from current voltage characteristics, improving accuracy and reliability by theory in terms of new variables
20 p3683 A70-40162

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability
20 p3659 A70-40261

Third stage engine performance from mass properties data for space vehicles with side-by-side tanks
[SAWE PAPER 846] 20 p3717 A70-40378

Externally pressurized air lubricated journal bearing with multiple supply holes, predicting load carrying capacity, flow requirement and stiffness
20 p3639 A70-40505

Slender wings of low aspect ratio and sharp leading edges, predicting inviscid maximum lift
21 p3743 A70-40585

Fusion welding cooling rates, peak temperatures and heating duration relationships to distance from fusion line predicted by theory for comparison with experiment
21 p3832 A70-40791

Solar arrays for Venus-Mercury flyby, evaluating temperature and power performance
21 p3756 A70-41010

Predictive model for potential variance from planned schedule of R and D tasks to minimize risk in management
21 p3955 A70-41172

OP-EX, optimal explicit guidance algorithm for powered flight outside atmosphere
[AIAA PAPER 68-869] 21 p3848 A70-41734

All-flexible parawings aerodynamic performance prediction based on slender wing theory and circular arc approximations for canopy shape
[AIAA PAPER 70-1188] 21 p3754 A70-41827

GaAs point contact diodes quick response performance with glass-metal or metal-ceramic bases, obtaining Schottky-type rectifying barriers by half period currents
22 p3995 A70-42406

Variable geometry radial inflow turbine performance estimation based on one dimensional flow theory
22 p3960 A70-43738

Survival probability of randomly excited structures, using maximum entropy principle
23 p4270 A70-44582

Biological life support systems mass exchange processes analysis based on mathematical models, predicting artificial ecological systems stability
23 p4149 A70-45029

PERFORMANCE TESTS

Flight test experiments for H-19 helicopter to evaluate aided inertial system performance for terminal guidance
01 p0136 A70-10303

Visual fatigue symptoms, causes, relation to general fatigue and psychological aspects, discussing testing for sensory and visual fatigue
01 p0022 A70-10857

Visual attention testing, considering perception focusing on stimulus object and eyelid blinking recording, measuring eye distance to work plane
01 p0023 A70-10861

Langley integrated life support system design, discussing manned test results including system engineering, atmospheric and water chemical analyses and microbial measurements
01 p0038 A70-10973

Brazed plate-fin superalloy panels suitable for hydrogen-cooled structures, discussing fabrication techniques, performance tests and pressure containment and fatigue characteristics
02 p0306 A70-11930

Test program preceding first German satellite experiment using HEOS satellite for Ba ion cloud injection into deep space
02 p0380 A70-12081

Omega position location equipment /OPL/ experiment data analysis, obtaining quantitative measure of statistical performance of system
02 p0336 A70-12180

Single stage experimental front fan designed for aircraft engines, measuring overall and blade element performances
02 p0355 A70-12258

Sliding steel specimens anomalous friction behavior in vacuum, noting friction-time plot dependence on oxide film rupture, load, environmental pressure, etc
02 p0321 A70-12534

Optical telescope spectrograph to obtain radiometric and spectrographic data on vehicles reentering atmosphere, discussing performance criteria and tests
03 p0489 A70-13653

Laser transmitter and optical superheterodyne receiver performance tests at 6328 A, demonstrating aperture size effect and noncoherent operation superiority
03 p0450 A70-13675

Statistical control charts for evaluating instrumentation performance during ordnance devices testing, discussing evolution, interpretation and application
03 p0494 A70-14126

Performance characteristics of RDX-metal sheath systems, using high speed motion picture photography for missile design applications
03 p0550 A70-14141

Electroencephalograms recorded for chimpanzees performance to play game, selecting parameters by computer analysis to discriminate between game phases and decisions
04 p0640 A70-14387

High hub/tip ratio centrifugal compressor with pipe and vaned cascade diffusers for turbofan engines, determining impeller performance
[ASME PAPER 69-WA/FE-28] 04 p0733 A70-14774

Nonextension lines characteristic to human skin utilized to provide natural mobility and minimal ballooning in full pressure suits noting mapping, testing, construction, etc
[ASME PAPER 69-WA/AUT-22] 04 p0642 A70-14826

Tangential jet, tandem, jet flap and vortex generator blade concepts investigated for turbine blade loading efficiency
[ASME PAPER 69-WA/GT-5] 04 p0734 A70-14890

Thermionic converter with oriented W electrodes, describing test method and computerized data acquisition for performance mapping
04 p0627 A70-14945

Optical performance of image intensifier system with good resolution for exposure times down to 1 nsec
04 p0695 A70-15568

Small three stage hydraulic turbine for aerospace and commercial applications, discussing design and performance
04 p0628 A70-15640

Simulation equipment for extraterrestrial solar radiation for spacecraft components evaluation tests, describing spectral characteristics
04 p0665 A70-15663

Nondestructive test procedures for maintaining and determining serviceability of penetrant inspection materials during use
05 p0844 A70-15780

Laboratory bench technique assessing performance of explosives, using brass small arms cartridge cases as witness vessels
05 p0894 A70-16323

Axial and nonlinear bending performance compared for compression moldings laminated from random glass fiber mat
05 p0870 A70-16577

Turboblowers and compressors air tests for gas operation performance prediction
06 p1129 A70-17136

Cooper aircraft handling rating scale on basis of test pilot experience
06 p1003 A70-18018

Back-up rings and special sealing devices performance qualification testing specifications
[SAE-ARP-979] 07 p1290 A70-18802

Design concept, materials application and performance characteristics of high temperature fasteners
[AIME PAPER F-69-6] 07 p1290 A70-18811

Specification of minimum performance standards and test procedures for automatic pressure altitude digitizer equipment
[SAE-AS-855] 07 p1279 A70-18901

Advanced concept ejection seat /ACES/ system design and performance, considering gyro-controlled vernier rocket motor and electronic time delays
07 p1192 A70-19016

Veloergometric assembly using two bicycles for simultaneously measuring muscular motor activity of persons in competition
07 p1221 A70-19525

Twin spool hydrogen turbopump performance at zero net positive suction pressure /NPSF/ saturated fluid in propellant tank, including steady state and simulated transient engine tests
[AIAA PAPER 69-550] 07 p1295 A70-19709

Visual acuity performance during various vibration stresses found differentially degraded for near, intermediate and distant vision
07 p1223 A70-19939

Water tests with N 300 Naviplanes confirming flexible skirt concept regarding speeds and stability
08 p1435 A70-20622

Astronomical telescope operation at transfer process from object to image using optical transfer function and brightness standards
08 p1493 A70-20685

Nickel zinc secondary battery low cost and high performance in military applications, discussing maintenance and rapid recharge requirements
08 p1440 A70-20710

Wideband tunable CW Gunn effect oscillator design, discussing microwave circuit effects on performance
08 p1471 A70-20788

Air brake with compressed air fed bearings for testing small turbines, determining power and friction moment
08 p1481 A70-21188

UHF transistor power amplifier, discussing CW and pulse performance and power gain
08 p1477 A70-21294

Display devices luminance and luminous efficiency measurement as function of angle
08 p1500 A70-21762

Resolution, contrast and gray scale performance of CRT displays compared to dot matrix displays
08 p1500 A70-21763

Crossed field amplifiers properties and applications, comparing performance to TWT
09 p1642 A70-22008

Lossless three-port H-plane waveguide junction circulator performance evaluation using computerized design
09 p1646 A70-22710

Spacecraft conditions influencing remote imaging sensor performance, discussing altitude, temperature and moisture at sensor, air turbulence, vehicle motion, etc
[AIAA PAPER 70-291] 09 p1677 A70-22853

Circulation-controlled lifting rotor built and tested on hovering rig, analyzing performance
09 p1611 A70-23284

Qualification and testing procedures for Apollo Spacecraft Program components and systems, discussing vibration tests
09 p1693 A70-23705

Tandem axial compressor performance for various blade stagger and flap angle values of rotor row, investigating gap influence
09 p1608 A70-23736

Turbojet engines departure from equilibrium performance during thermal soak transient attributed to heat absorption in turbine and compressor metals, observing thrust loss
09 p1744 A70-23739

Compressor blade performance dependence on Reynolds number, turbulence intensity and axial velocity ratio, considering wind tunnel tests with porous side walls
09 p1609 A70-23748

Photoelectric photometer for astronomic observations, discussing design and performance
10 p1886 A70-23917

Raney catalyst preparation and continuous operation in molecular hydrogen and oxygen electrodes noting improved voltage, manipulation and energy yield 10 p1831 A70-24467

Traveling wave tube amplifier performance in numerous orbiting communication satellites, emphasizing life test data 11 p2015 A70-25406 [AIAA PAPER 70-507]

SNAP 19 radioisotope fueled thermoelectric power supply orbital performance on Nimbus 3, ascribing power output decrease to decreasing generator output currents 11 p2120 A70-25435 [AIAA PAPER 70-480]

Satellite communications subsystem performance testing from initial integration through launch under all environmental exposure 11 p2030 A70-25445 [AIAA PAPER 70-448]

Despin ball bearing assemblies performance data for TACSAT and Intelsat 4, discussing technology needed for accelerated testing, higher precision, failure detection and lubricants 11 p2058 A70-25471 [AIAA PAPER 70-459]

CW chemical laser performance using molecular hydrogen diffused into supersonic fluorine atoms streams 11 p2063 A70-26067

High speed sequential decoding machine design and performance test for deep space channels 11 p2014 A70-26245

Mars landing analysis and simulation for unmanned lander prototype, discussing digital simulation by Monte Carlo techniques and physical tests 11 p2032 A70-26291

Broadband 2 GHz transhorizon radio relay system design and performance for transmission on four channel pairs 11 p2034 A70-26820

Medium temperature hydrogen fuel cells design, operational characteristics and performance 12 p2163 A70-26996

Aircraft pilot ability tests validity, applying correction methods in decision making regarding applicant acceptance 12 p2176 A70-27031 [DFVLR-SONDDR-32]

Electromagnetic differential flowmeter design and performance, considering SNR 12 p2231 A70-27162

High dynamic range low noise parametric microwave amplifier performance measurement for radar receivers 12 p2183 A70-27166

Read-diode microwave oscillators performance degradation due to space charge and series resistance, discussing RF power optimization 12 p2194 A70-27167

Frequency-time coded multichannel communication system error probability bounds to investigate frequency selective fading effect on performance 12 p2184 A70-27416

Xenon arc lamp searchlight performance and application during Apollo 8 launch 12 p2207 A70-27662

Grating spectrometer performance in measuring earth IR radiance determined from balloon flights 12 p2235 A70-27752

Porous hydrogen electrode performance with Ni skeleton catalyst, studying effects of temperature, active layer thickness, etc 12 p2182 A70-27759

Mechanically rechargeable zinc-air battery, discussing electrical performance, advantages and military applications 12 p2167 A70-27928

Plenum-chamber air-bearing and labyrinth-seal types air cushion lifting mechanisms performance in simulated hovering flight 12 p2162 A70-27981

Minimum performance standards for airborne radio receiving and direction finding equipment covering normal and environmental test procedures 13 p2365 A70-29000

Barium fluoride film hygrometer elements for radiosondes, discussing manufacturing and testing methods 13 p2408 A70-29470

Protective coatings with Si-Zr alloys for graphite, discussing wettability, spreading kinetics and impregnation 13 p2439 A70-29503

Flight test experiments for H-19 helicopter to evaluate aided inertial system performance for terminal guidance 13 p2449 A70-29622

Automatic test equipment performance and effectiveness below customer expectations, discussing design factors 13 p2525 A70-29677

Turbojet engine testing in ground level facilities with automatic instrument reading and parameters calculation 13 p2474 A70-29688

Feedback control systems automatic testing by examining frequency response 13 p2423 A70-29696

DC-10 aircraft wing engine calibration, isolated- and wing-nacelle testings using air-driven engine simulator [AIAA PAPER 70-590] 13 p2342 A70-29881

Closed loop MHD test facility ARGAS I, describing engineering performance and test measurements 14 p2533 A70-30532

Microwave integrated circuit lumped element approach, showing performance as function of geometry and frequency 14 p2561 A70-30920

Low pressure diffusion welding for joining Ti-6Al-4V alloy in Ar atmosphere under compressive loading, evaluating performance 14 p2591 A70-30933

Soviet book on bearing capacity of turbomachine rotor elements covering testing methods, stress analysis, design factors on stability, etc 14 p2658 A70-30958

Microwave band-stop filters based on ladder network low pass prototypes, comparing performance with bandpass type 14 p2557 A70-31179

Microwave filters developments, performance, production and costs 14 p2559 A70-31374

Axial flow fans performance dependence on aspect ratio from empirical relationships, plotting various component losses and stage efficiency 14 p2529 A70-31418

Thermocouples performance during fast varying temperature measurements in solids, considering physical parameters effects on accuracy 15 p2734 A70-31646

SHF radio telescope for solar radio wave observation, describing design and performance 15 p2717 A70-31897

CW HCN laser driven phase matched traveling wave lithium niobate electro-optic light modulator performance 15 p2750 A70-31976

Centrifugal pump performance correlation parameter under cavitation conditions for handling different liquids based on bubble growth theory 15 p2720 A70-32098

Air intake distortions effect on compressor performance, discussing radial and peripheral gradients 15 p2787 A70-32248

High gain helix radiators for spacecraft phased arrays, measuring performance vs design parameters 15 p2678 A70-32600

Electronic equipment reliability performance measurements during tests correlated to performance observed under field use 15 p2712 A70-32645

Boeing 707 and 727 aircraft components on condition maintenance program based on statistical analysis and performance monitoring for replacing scheduled overhauls 15 p2748 A70-32656

Electro-optical sensor night time capabilities with laser illuminator, determining current per unit area from photocathode 16 p2907 A70-33183

Electromechanical velocity feeder redesign for functional performance in random vibration environments [ASME PAPER 70-DE-25] 16 p2917 A70-33425

Real time video data display at visual and thermal IR wavelengths, demonstrating performance improvement for target recognition 16 p2910 A70-33436

Adhesives selection based on bond performance requirements, considering joint design, stress distribution, temperature effects, etc [ASME PAPER 70-DE-69] 16 p2939 A70-33519

Throttleable thruster system for Mars soft landing, selecting catalytic decomposition engine from system weight and performance studies [AIAA PAPER 70-652] 16 p2966 A70-33549

NERVA rocket engine program reliability, design, performance and managerial approaches [AIAA PAPER 70-711] 16 p2950 A70-33568

Turbofan engine compressor system performance dependence on circumferential extent, magnitude and rate of change of inlet temperature in altitude test facility [AIAA PAPER 70-625] 16 p2968 A70-33590

Axial flow multistage turbines performance, examining profile manufacturing tolerances effects on cost 16 p2970 A70-33677

Operation modes of nozzles with emerging pointed and central bodies, discussing external flow effects on internal performance 16 p2970 A70-33760

Ablative materials performance in high radiative heat flux environments produced by CW carbon dioxide laser [AIAA PAPER 70-864] 16 p2939 A70-33907

Al radiator with thin stainless steel tube liner using liquid metal coolant tested for heat rejection system of SNAP-8 Rankine cycle power system [AIAA PAPER 70-855] 16 p3000 A70-33922

Mariner 4 scan platform structure and actuator design, development and performance 16 p2845 A70-34106

Spacecraft hydraulic timers design and qualifications testing, discussing oil selection and temperature dependence 16 p2914 A70-34112

Explosively actuated /pyromechanical/, devices for spacecraft, discussing guidelines for design, testing, application and cost efficiency 16 p2963 A70-34125

Ball in tube nutation damper for spinning satellite, describing design, testing and fabrication techniques for achieving low friction level 16 p2985 A70-34136

Lubrication system flight performance and laboratory test data for space applications, considering torque motors, slip rings, bearings and gears 16 p2923 A70-34157

Nonextension lines characteristic to human skin utilized to provide natural mobility and minimal ballooning in full pressure suits noting mapping, testing, construction, etc 17 p3036 A70-34951

Heat pipe performance tests under longitudinal harmonic vibration 17 p3193 A70-35751

Multistage electrocardiographic exercise tests for cardiovascular performance measurement 17 p3034 A70-35878

Prototype grill device for turboprop aircraft engine inlet protection against bird ingestion, discussing performance tests 18 p3212 A70-35996

Deep space spacecraft radioisotope thermoelectric generators, discussing testing and evaluating for future missions 18 p3215 A70-36229

Position sensitive planar photocells based on silicon-silicon dioxide systems, discussing photoelectromotive force generation mechanism, light intensity and load characteristics 18 p3297 A70-36236

Avalanche transit time diode and transferred electron oscillators in microwave systems, discussing design, performance and applications 18 p3232 A70-36675

High bypass ratio aircraft turbofan engines, discussing program of factory, flight and operational suitability testing [SAE PAPER 700290] 18 p3302 A70-36806

Static charge reducer for aircraft fuels handling safety, discussing performance factors [SAE PAPER 700277] 18 p3263 A70-36808

Two dimensional compressor cascades of double circular arc and wedge shape blades testing performance in transonic and supersonic wind tunnels [ASME PAPER 70-GT-7] 18 p3302 A70-36829

Supersonic cascade wind tunnel performance evaluation, using compressor blades of simple geometric shapes [ASME PAPER 70-GT-110] 18 p3238 A70-36848

Tailpipe effects on gas turbine diffuser performance with fully developed inlet conditions [ASME PAPER 70-GT-86] 18 p3210 A70-36881

Hot cathode magnetron ionization gauge design, discussing performance and sensitivity 19 p3421 A70-37467

Electronic equipment reliability improvement, based on reliability control group qualification, burn-in and diagnostic tests 19 p3554 A70-38401

ONERA accelerometer flight test of performance in zero gravity environment, using Vesta sounding rocket for simulation 19 p3431 A70-38541

Runway test vehicle for lifting rotor performance in simulated forward flight, comparing with wind tunnel tests 19 p3402 A70-38611

Jet engine roller bearings retainer candidate cage materials and coatings evaluation on test rig simulating engine conditions [ASLE PREPRINT 70AM 2D-1] 19 p3439 A70-38805

Molybdenum disulfide abrasiveness on test rings coated with bonded solid lubricant [ASLE PREPRINT 70AM 5A-1] 19 p3439 A70-38811

Cryogenically cooled photoconductive IR radiation detectors, determining wideband optical heterodyne performance 20 p3627 A70-39085

In-Au contacts for GaAs, discussing fabrication and performance tests on transverse Gunn mode oscillator 20 p3686 A70-39118

Carbon/carbon composites constituent characteristics effects on thermal and mechanical properties, using polarized light and scanning electron microscopy 20 p3653 A70-39204

Unidirectional and multidirectional carbon/carbon composites quality and performance evaluation by NDT methods, including X ray radiography, ultrasonic test, pulse echo mapping, etc 20 p3654 A70-39211

- Transistorized quartz oscillators, testing frequency and amplitude stabilities and functions of input and output capacitances, supply voltage and feedback
20 p3597 A70-39258
- Choice reaction and movement time dependence on hypoxia induced by air pressure reduction inside decompression chamber, discussing adult human performance
20 p3573 A70-39714
- Liquid metal MHD power conversion system with Cs and Li as working fluids, describing hydraulic, electrical and high temperature tests results
20 p3680 A70-39986
- Large scale nonequilibrium linear MHD generator performance with rare gases under strong EM-gas dynamic interactions
20 p3681 A70-39993
- Performance comparison of diagonal conducting wall MHD generator and Hall generator of equal dimensions, investigating wall temperature effect
20 p3566 A70-40004
- Electrode size effects on combustion driven MHD generator performance, examining voltage losses, gas boundary layer temperature and surface conditions
20 p3566 A70-40005
- NASA Lewis closed loop MHD generator subsonic tests, discussing ducts, purge and Cs injection systems, electrode coating, etc
20 p3566 A70-40011
- Filament wound composites, investigating interaction of fabrication variables and untoward environments by delineating effect of each on structural performance
20 p3731 A70-40055
- Airborne atmospheric turbulent flux measurement system with fast response wind velocity, temperature, humidity and aircraft motion sensors, discussing performance and data reduction
20 p3665 A70-40109
- Concorde aircraft flight test program for verifying design features of wing vortices, fuel transfer, longitudinal stability, etc
21 p3749 A70-40580
- Helicopter vibration measurement techniques, discussing in-service fault diagnosis
21 p3749 A70-40582
- Helicopter dynamic tests for aeroelastic and mechanical instabilities and forced vibration problems
21 p3749 A70-40583
- Tooling concepts providing gas shielding in mechanized open air arc welding of Ti, evaluating effectiveness by various mechanical tests
21 p3832 A70-40788
- Solid state butt and lap joint welding of TD-nickel bar, evaluating performance by stress rupture and shear tests
21 p3832 A70-40790
- Stainless steel sheet-to-plate tee joint resistance welded by Magnetic Force Upset Welding process, testing performance
21 p3832 A70-40792
- Integrated Life Support System hardware tests, discussing oxygen and water recovery, contaminant control, personal accommodations and failure detection
21 p3833 A70-40989
- Working fluids liquid property variations effects on cryogenic heat pipe performance
21 p3946 A70-41043
- Heat pipe performance map with ammonia as working fluid, comparing thermal transport efficiency with water pipe
21 p3947 A70-41050
- ATS-5 spacecraft L band propagation performance, describing up and downlink test methods
21 p3790 A70-41363
- Parafol flight performance predictions and test results based on wind tunnel data and manned free flight
21 p3754 A70-41826
- Reefed and unreefed disk gap band parachutes tested in supersonic and subsonic wind tunnels to determine stability and performance
21 p3754 A70-41841
- Low aspect ratio compressor blade cascade performance at blade span center, discussing pressure loss, angle of attack and staggering
22 p3957 A70-42272
- Gas lubricated foil bearing performance as support for turborotor simulator, examining heating and thermal gradient effects
22 p4044 A70-42448
- High temperature fuel cell with thin disk solid electrolyte, evaluating performance as function of electrolyte, electrode and current collector resistance ratio
22 p3964 A70-42499
- Corrective light filter performance evaluation by spectral transmittance normalization
22 p4072 A70-42503
- Three dimensional hologram diffractive efficiency measurement by spectrographic attachment
22 p4026 A70-42508
- NERVA nuclear rocket reactors, considering NRX and XE technology tests
22 p4069 A70-43178
- Sealed Ni-Cd cells, investigating carbonate effect on performance
22 p3965 A70-43555
- Military sealed thin sintered plate Ni-Cd rechargeable batteries, comparing performance with other systems
22 p3966 A70-43538
- Superconducting magnet system design, operation and module tests, noting large and small coil systems performance data relationship
23 p4218 A70-44354
- Superconductive magnets with different windings and modular construction for magnetic mirror apparatus, discussing performance tests
23 p4218 A70-44355
- Guarded electrical cylindrical calorimeter measuring multilayer insulation thermal conductivity, discussing construction, test and error
23 p4195 A70-44366
- Plastic encapsulated IC for military environments, discussing cooker, corrosion and thermal shock tests
23 p4173 A70-44534
- Space vehicle for testing electric propulsion systems in space, powering by cluster of six electrostatic ion motors regulated by automatic thrust control
23 p4259 A70-44616
- Hypersonic wind tunnel facility for hypersonic aircraft and recoverable booster systems development [DFVLR-SONDDR-19]
23 p4178 A70-44799
- Cryogenic thermocouples of various metal pairs for low temperature measurements, discussing performance tests and calibrations
24 p4378 A70-45385
- Fluidic elements operation and performance, considering wall attachment, jet interaction, turbulence, gain load, operating ranges, etc
24 p4293 A70-45430
- Spark gap triggering with Q switched laser, comparing performance with electrical method
24 p4353 A70-45560
- Nondestructive tests for performance levels, discussing signature analysis as methodology
24 p4338 A70-45736
- Orbit-to-orbit space shuttle toroidal propellant tank design, construction and testing for outflow and slosh characteristics
24 p4417 A70-45940
- [AIAA PAPER 70-1325] Carrier injection-limited Gunn diode wideband performance, deriving expression for admittance
24 p4319 A70-46081
- Aircraft Doppler VHF omnidirectional radio range /DVOR/ performance test, noting improvement over VOR system
24 p4375 A70-46240
- Apollo 11 deployed solar cells, investigating degradation of surface properties and thermal control due to lunar module ascent effects
24 p4295 A70-46262
- PERFUSION**
U DIFFUSION
PERIDOTITE
NT ENSTATITE
NT OLIVINE
NT PYROXENES
PERIGEEES
Moon perigees and apogees for years 1-3000, tabulating parameters for calculations
08 p1568 A70-20635
- Space mechanics problem of passing from perigee to radial distance in given time determined by fitting conic to radii, using iteration method
09 p1760 A70-22927
- Echo 2 satellite orbital elements from optical observations covering last passages over Milan before orbital decay
17 p3172 A70-35628
- Comet brightness curves asymmetry with respect to perigee attributed to pre- and post-heating
19 p3526 A70-38781
- Artificial earth satellite orbit perigee motion, calculating perturbation effect due to gravitational and magnetic fields on orientation and rotation
21 p3884 A70-40843
- Europa 2 booster perigee stage engine design, discussing total and propellant masses, spin stabilization, materials, etc
23 p4234 A70-44672
- Lunar theory literal solution for average node and perigee movements compared with Delaunay results, using Lie transforms for Hamiltonian function
24 p4399 A70-45141
- PERIHELIONS**
Planetary perihelion precession with velocity-dependent gravitational mass in terms of special relativity
09 p1765 A70-23800
- Comet Ikeya-Seki 1965 f tail formed by dust particles continuous ejection, using preperihelion photographs
19 p3527 A70-38792
- PERIOD EQUATIONS**
U PERIODIC FUNCTIONS
PERIODIC FUNCTIONS
NT TANGENTS
NT TRIGONOMETRIC FUNCTIONS
- Periodic motions and integral stability for systems with quasi-cyclic coordinates applied to current carrying conductor oscillations and linear case of Routh equations
01 p0212 A70-11573
- Periodic solutions for two dimensional cubic differential equation, covering one dimensional traveling wave and two dimensional types
03 p0519 A70-13581
- Cosmic ray time series periodicity using variance analysis allowing for intensity variations and meteorological factors
06 p1135 A70-17543
- Optimal quadrature formulae for numerical integration of 2 pi-periodic functions involving integrand derivative values at knots
06 p1093 A70-17582
- Positive time-periodic solutions to parabolic problems with Stefan-Boltzmann boundary conditions using straight lines method
07 p1333 A70-18748
- Periodic motions and dynamic stability of nonlinear distributed sampled data system of closed loop of pulsed element governed by heat conduction equation
07 p1226 A70-18749
- Periodic solution with nondegenerate orbit for functional differential equations taking into account small perturbation
07 p1324 A70-19199
- Asymptotically periodic solution of nonlinear differential equations, discussing digital or analog computer utilization
07 p1326 A70-19782
- Radial heat conduction in infinite hollow cylinder with circular cross section and periodic heat transfer coefficient at inner and outer cylinder surfaces
07 p1423 A70-19816
- Quasi-stable linear differential equations systems with nearly periodic coefficients, noting application to equations with zero real portions of matrix characteristic roots
08 p1533 A70-20492
- Periodic and almost periodic solutions to vibrations of quasi-linear nonautonomous systems in presence of resonance, determining principal amplitudes
08 p1544 A70-20966
- Liapunov vector functions for asymptotically stable omega-periodic solution existence in case of finite dimensional system
08 p1534 A70-21002
- Extension of Liapunov systems to time lag systems with small periodic parameter
08 p1546 A70-21628
- Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions
08 p1546 A70-21629
- Error analysis in calculating periodic limiting state of rotor motion
09 p1727 A70-22624
- Periodic solutions with moderate eccentricities and high inclinations for three dimensional restricted three body problem by expanding disturbing functions by high speed computer
09 p1759 A70-22773
- Stability characteristics of near periodic orbits using variational equations, with results applied to phase space and stability problems
09 p1760 A70-22917
- Existence theorem for periodic solutions of nonlinear differential equations with deviating arguments
10 p1910 A70-24605
- Periodic solution existence theorem using harmonic linearization method
11 p2023 A70-25725
- Linear periodic coefficient differential equations stability analysis by infinite determinate method, considering applications to damped mechanical systems motion and dual spin satellite
12 p2261 A70-27813
- Stability of single periodic symmetrical solutions of plane circular restricted three body problem, using digital computer for numerical integration of equations of motion
13 p2490 A70-28950
- Nonlinear differential equations systems, deriving periodic solutions existence conditions
13 p2440 A70-29049
- Statistical output characteristics of harmonic cosine and sinusoidal inertialess phase periodic converters in two channel system with frequency multiplication
13 p2370 A70-29741
- Multiple period oscillations in nonlinear systems, using nonautonomous differential equations and Hammerstein operator
13 p2443 A70-29745
- Canonical representation for nonlinear differential equations periodic solutions
14 p2658 A70-30846
- Periodic solutions close to commensurabilities in three body problem, considering restricted and planar nonrestricted problems
17 p3172 A70-35561

- Nonlinear second order differential equations with periodic coefficients and solutions, examining stability by phase and amplitude plots by marginal range diagrams 18 p3282 A70-36356
- Periodic solutions of nonlinear second order differential systems containing symmetries, noting Marlin criteria 19 p3458 A70-38064
- Quasi-linear higher order differential equations, examining periodic solutions existence and stability 22 p4062 A70-42698
- Harmonic linearization method for periodic regimes in nonlinear control systems based on periodic solution sensitivity to higher harmonics and small parameters 22 p4000 A70-42829
- Periodic solutions to complex nonlinear automatic control systems with initial deviations, considering system stability and self oscillation conditions 22 p4002 A70-42839
- Three body problem periodic solutions, considering near equilibrium conservative Hamiltonian system consisting of two harmonic oscillators with rationally related frequencies 23 p4213 A70-44897
- Periodic boundary value problems with cyclic totally positive Green functions, and spline applications in vibrating physical systems and scaling theory 23 p4213 A70-44899
- Nonlinear second order differential equation periodic solutions, describing water column oscillation in U-tube 24 p4369 A70-46021
- PERIODIC ORBITS**
U ORBITS
PERIODIC OSCILLATIONS
U OSCILLATIONS
PERIODIC PROCESSES
U CYCLES
PERIODIC VARIATIONS
NT ANNUAL VARIATIONS
NT DIURNAL VARIATIONS
NT NOCTURNAL VARIATIONS
 Periodic cellular convection in troposphere with allowance for anisotropic turbulent mixing, showing cyclone association and intervals 01 p0135 A70-10206
- Male rats locomotor activity responses to altered photoperiods during exposure to varied-light artificial days 01 p0015 A70-10367
- Stellar system DQ Herculis photometry by synchronous signal averaging, indicating sinusoidal light curve with increasing binary period 02 p0373 A70-12392
- Beta Lyr spectral and brightness characteristics long period variations related to orbital motion perturbations 03 p0564 A70-13229
- Cosmic ray variations concepts with reference to 11, 22 and 80-90 year solar cycles Wolf number variations 03 p0568 A70-13355
- Astronomical clock pendulum oscillations isosynchronization noting effects of suspension elastic moment, fabrication, calibration errors and rotation center displacement 03 p0484 A70-13367
- Dynamic spectra of quasi-periodic VLF emissions noting association with geomagnetic micropulsations 03 p0477 A70-13985
- Galactic water vapor radio sources spectral observation suggesting correlation between time variation and polarization 04 p0747 A70-14547
- Solar Lyman-alpha radiation observed by OGO 4 spacecraft showing short term fluctuations superposed with monthly variation 04 p0741 A70-15128
- Tropospheric periodic responses to chromospheric flares, analyzing stations atmospheric pressure power spectra 04 p0742 A70-15524
- Latitude-period relation existence in geomagnetic micropulsations, discussing coupling between components of geomagnetic field fluctuations 05 p0838 A70-16278
- Periodic observation errors in air temperature, relative humidity, vapor and air pressure 05 p0879 A70-16665
- Oscillations intervals with diminishing period during magnetic storms, noting relationship to midlatitude disturbances in F region 05 p0842 A70-16746
- Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity 05 p0918 A70-16913
- Ionospheric absorption at oblique incidence during IQSY, studying seasonal and diurnal variations as solar zenith angle function 06 p1009 A70-17905

- HF periodic velocity oscillations effect on axisymmetric wake diffusion flames [AIAA PAPER 70-10] 06 p1182 A70-18179
- RW Aur-type variables in Taurus, studying temporal variations from photographic and photometric observations and B, B-V diagram 07 p1376 A70-18906
- Latitudinal dependence of period and amplitude of steady Pc 3-4 pulsations observed at group of widely spaced stations 07 p1268 A70-19464
- Lunar periodicity detected from radio aurora data as possible cause of lunar interaction with magnetosphere 07 p1389 A70-20164
- Heavy solid body motion about stationary point at small nutation angle, estimating region of series convergence representing periodic solutions to motion equations 07 p1336 A70-20298
- Material particles unrealizability of periodic motion near libration points of triaxial ellipsoid rotating steadily about polar axis 08 p1543 A70-20491
- Binary star spectrum analysis establishing seasonal and season-to-season variations in He II emission band intensity and shift toward long wave region 08 p1569 A70-20827
- Beta Lyr spectral and brightness characteristics long period variations related to orbital motion perturbations 08 p1580 A70-21662
- Pulsars period distribution not related to decay of magnetic field in rotating neutron star 09 p1756 A70-22518
- Two dimensionally periodic slow wave structure, verifying Shein formulas 09 p1637 A70-23143
- Periodic intensity fluctuations in pulsars from VHF phased array measurements 09 p1764 A70-23793
- Sideral time variations in cosmic ray intensity observed by inclined muon telescopes 10 p1933 A70-24858
- Zero-point of period-luminosity-relation of Cepheids based on proper motions, radial velocities and photometric data, applying secular parallax method 10 p1945 A70-24964
- Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis 10 p1925 A70-25031
- Human finger tips skin temperature periodical variations process and influencing factors using electronic analog model 10 p1823 A70-25306
- Ionospheric magnetic activity effects on cosmic radio noise absorption diurnal and seasonal variations in auroral zone, noting K index and lowest reflection frequency roles 11 p2043 A70-25536
- Three dimensional periodic boundary layer flow noting successive approximations method, noting steady streaming in first order cross flow 11 p2037 A70-26296
- Cosmic ray variations concepts with reference to 11, 22 and 80-90 year solar cycles Wolf number variations 11 p2118 A70-26720
- Climatic phenomena cyclic behavior from forecasting viewpoint, considering geomagnetic, upper atmospheric and solar activity effects 12 p2265 A70-28268
- Cosmic radiation periodic variations measurements noting second harmonic importance of daily variations 13 p2478 A70-29230
- Diurnal and seasonal variations of parameter s of meteor showers on celestial sphere, using radio echo amplitude distribution from radar observations 14 p2635 A70-30307
- Continuity equation plasma oscillation, discussing ion current waveform flowing from discharge and implications for periodic astrophysical phenomena 14 p2638 A70-30618
- Planetary orbit after central star supernova explosion, discussing effect on pulsar period 14 p2640 A70-30787
- Twelve year periodicities of Jupiter decametric radiation, noting correlation with Jupiter magnetic field rotation period 14 p2648 A70-31085
- Jupiter decimeter radiation long term variations from flux density measurements, suggesting correlation with solar activity 14 p2648 A70-31087
- Cosmic ray shortest term regular intensity variations, measuring particle dispersion as time function 14 p2633 A70-31314
- Harmonic analysis of digital data from satellite measurements of periodic phenomena with unknown periodicity 14 p2554 A70-31415

- Cyg XR-1 X ray spectrum variability by balloon-borne detectors as eclipsing properties of binary system 15 p2799 A70-31750
- Pulsars MP 0031 and CP 1919 periodic variations in pulse intensity, considering radio emission models with plasma waves 17 p3157 A70-34843
- Periodic cosmic ray variations near Southern magnetic pole related to chromospheric flares 18 p3307 A70-36102
- Pulsars PSR 1451-68, 1749-28 and 2045-16, discussing modulation effects associated with second periodicity 18 p3314 A70-36334
- Pulsars period galactic equator concentration correlation, discussing period-radio luminosity relation and spatial distribution 18 p3314 A70-36335
- Latitudinal dependence of period and amplitude of steady Pc 3-4 pulsations observed at group of widely spaced stations 18 p3250 A70-36938
- Motion stability in periodic cubic force field, using nonlinear differential equation integration with time periodic square wave function and Jacobian table 18 p3284 A70-37065
- Wolf numbers monthly fluctuations, giving histogram of fluctuation amplitude distribution 18 p3323 A70-37137
- Periodic thermal forcing role in Venus atmosphere dynamics, investigating momentum transport to support mean shear for channel flow 19 p3519 A70-38251
- Vibration signals analysis in random and periodic modes, presenting analyzers block diagrams 19 p3430 A70-38526
- Pc-1 pulsations during solar activity maximum and minimum, discussing diurnal, seasonal and cyclic variations 19 p3416 A70-38586
- Cepheids in Galaxy spherical component, determining periodic variations by distribution function technique 19 p3525 A70-38768
- Cepheids periodic variations photographic analysis 19 p3525 A70-38769
- Pulsars CP 0834, AP 1237 and CP 1919 radiation intensity periodic variations, discussing power spectra fluctuations in circulating plasma model 20 p3701 A70-39007
- Plane horizontal fluid film convective stability with free boundaries in vertical circular cylinder for periodic modulation of vertical temperature gradient or gravitational field 21 p3941 A70-40608
- Field-ion microscope image formation, determining periodic surface potential variation effects on high field tunneling 21 p3862 A70-40974
- Ionospheric magnetic activity effects on cosmic radio noise absorption diurnal and seasonal variations in auroral zone, noting K index and lowest reflection frequency roles 21 p3819 A70-41286
- Dispersion equation for impedance elements periodic structures phase velocity calculation, discussing approximate solution methods 22 p3984 A70-42392
- Crab pulsar observations with refractor and on-line data acquisition, indicating optical pulse arrival times at variance with previously assumed 77 day periodic wobble 22 p4097 A70-42464
- Periodic motions of arbitrarily long periods for idealized nonlinear spring-mass systems with two or more degrees of freedom 22 p4073 A70-42699
- Harmonic linearization method for periodic regimes in discrete nonlinear automatic control systems performing signal quantization with respect to level or time 22 p4001 A70-42833
- Ionospheric electron content measurement during solar activity cycle, noting temporal and spatial variations 22 p4020 A70-43159
- EUV solar spectral intensity distribution and cyclic variations 22 p4106 A70-43299
- Earth surface magnetic field variations due to magnetopause current system 24 p4329 A70-45355
- PERIODICITY**
U PERIODIC VARIATIONS
PERIODICITY (BIOLOGY)
U RHYTHM (BIOLOGY)
PERIPHERAL CIRCULATION
 Human thermoregulatory responses as function of peripheral thermoreceptors during imposed negative heat load in different ambient environments 01 p0024 A70-10977
- Constant-inflow and constant-pressure perfusion effect on vascular responses of dog 02 p0232 A70-11716

Polyethylene-bis-lepidine dibromides effect on blood pressure and peripheral vessel tonus in dogs, analyzing depressor reaction as function of binding chain

04 p0632 A70-15204

Peripheral arterial piezography for cardiological screening tests and checkups of flying personnel

05 p0807 A70-16495

Intracerebral, peripheral and central blood circulation relationship in humans during transverse accelerations

07 p1209 A70-19520

Intermittent forced inspirations or expirations effects on venous tone and blood flow in human skin vessels

17 p3024 A70-34595

Peripheral vasculocapillary blood circulation by plethysmography

19 p3370 A70-38212

Human peripheral blood flow rearming in cold ambient temperature, examining skin, rectal and tympanic membrane and oxygen uptake

20 p3576 A70-40327

Dynamic response of peripheral blood flow to hypothalamic temperature waveforms in baboon, using implanted thermodes

24 p4303 A70-46116

PERIPHERAL JET FLOW

Exit geometry effects on peripheral jet device lift, considering operating height, curtain thickness, base extension, etc

04 p0619 A70-15388

Secondary peripheral air injection effects on subsonic airflow through slotted tube, discussing primary flow, flow separation, static and stagnation pressures and temperature changes

11 p2036 A70-26140

Inviscid flow theory for ACV high speed peripheral jets, considering component inefficiencies, pressure losses, nozzle geometry, etc

12 p2156 A70-27211

Two dimensional peripheral turbulent jet curtain structure, determining curved and impinging jet flow field by pressure and velocity measurements

22 p3957 A70-42277

Static and dynamic spring constants of peripheral jet air cushion vehicle in heaving motion, obtaining sinusoidal input response characteristics

22 p3960 A70-42279

Peripheral jet ground effect machine model heaving motion, investigating static hover and forced and free vibration characteristics

22 p3961 A70-42281

PERIPHERAL NERVOUS SYSTEM

Nerve cell response to change in chemical constitution of surroundings used to investigate animal periphery sensory mechanisms

01 p0033 A70-10497

Functional model of signal analysis and pulse sequence conversion in nervous system at periphery of hearing

10 p1827 A70-25127

Excitation conduction velocity maximum along motor fibers of peripheral nerves as function of age in healthy subjects

15 p2679 A70-31602

Peripheral stimulations of various modalities effect on neurons impulse activity in hippocamp dorsal area of rabbits, noting excitation and latent periods

23 p4145 A70-44311

PERIPHERIES

U BOUNDARIES

PERTONEUM

Gamma-aminobutyric acid influence on 5- hydroxytryptamine in rat brain after intraperitoneal administration

01 p0019 A70-10510

PERMALLOYS [TRADEMARK]

LF creep characteristics in Block-wall Permalloy films, using high resolution Bitter pattern technique [IEEE PAPER 5.7]

05 p0893 A70-16996

Annealing atmosphere effect on permeability of Mo Permalloy

07 p1304 A70-18814

Normal and unconstrained vacuum-deposited Permalloy films composition dependence of magnetization-induced uniaxial anisotropy, noting agreement with magnetostrictive constraint theory

12 p2284 A70-27244

Permalloy evaporation rates from resistance heated W boat, revealing departure from free molecular flow

13 p2452 A70-29203

Magnetic dislocations effect on domain structure of postcritical Permalloy films subjected to alternating magnetic field

16 p2930 A70-33206

X ray fluorescence determination of thickness and composition of Permalloy films deposited on wire surface

18 p3258 A70-36466

Permalloy tapes uncertainty in magnetization process, discussing Barkhausen discontinuities measurement method

20 p3673 A70-40058

Uniaxial magnetic anisotropy in electrodeposited Permalloy films in terms of magnetostrictive mechanism

20 p3687 A70-40160

Orthogonal susceptibility of uniaxial thin nonmagnetostrictive Permalloy films

22 p4086 A70-43011

PERMANGANATES

Potassium permanganate catalytic effects on ammonium perchlorate deflagration, studying catalyst dispersion degree role

07 p1358 A70-19329

PERMEABILITY

NT DIELECTRIC PERMEABILITY

Gamma radiation effects on membrane permeability of isolated nuclei from white rats thymus in sucrose-calcium buffer

04 p0629 A70-14460

Annealing atmosphere effect on permeability of Mo Permalloy

[AIME PAPER F-69-7]

07 p1304 A70-18814

Permeability disturbances in skin capillaries of rabbits and rats following exposure to Sr90-Y90 beta radiation

09 p1619 A70-22789

Transpiration-cooled systems design with porous materials, considering mechanical and flow control /permeability/ properties requirements

12 p2256 A70-27822

Microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability

19 p3484 A70-37565

Crystal dislocations and microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability, noting eddy currents role

19 p3484 A70-37566

Magnetic field and permeability effects on drag in steady axisymmetric MHD flow of incompressible fluid around full and hollow spheres

19 p3477 A70-37577

Parachutes lightweight coated fabrics air permeability under axial tensile loading and load cycling at room temperatures

21 p3843 A70-41835

EM wave propagation in inhomogeneous media, examining permittivity and permeability

23 p4217 A70-43768

PERMEATING

Early Precambrian chert porosity and permeability, investigating hydrocarbon content origin

13 p2400 A70-29863

PERMUTATIONS

Rank permutation codes equivalence to binary code class capable of generation and detection through direct and inverse transformations respectively

20 p3594 A70-39975

Combinatorial optimization problems design on permutation set, considering applicability of variants successive analysis method

24 p4321 A70-45472

PEROVSKITES

Perovskite crystals phase transitions based on group theory, considering lattice vibration modes as instability source

24 p4389 A70-45206

Perovskite type oxide lanthanum manganate magnetic properties, explaining ferromagnetism by spin Hamiltonian formalism

24 p4389 A70-45601

PEROXIDES

NT HYDROGEN PEROXIDE

NT INORGANIC PEROXIDES

Oxygen electrode ring and disk currents analysis, studying oxygen reduction on platinum via peroxy intermediates

10 p1829 A70-24453

Self heating accompanying exothermic decomposition of gaseous diethyl peroxide in spherical vessel measured positionally by thermocouple

12 p2330 A70-27223

Thermal testing of decomposition and spontaneous ignition of diethyl peroxide before explosion

12 p2330 A70-27224

Free radical coupling of silyl peroxides in reinforced plastics, laminates and adhesives

16 p2937 A70-33377

PERSEID METEORIDS

Radar and photographic studies of meteors from Leonid and Perseid showers, presenting velocities, luminence and ionization

01 p0193 A70-11602

Perseids time distribution, based on observations during meteor showers, contradicting appearance of homogeneous Poisson process

09 p1750 A70-22099

Parameter S mean values measurement in Perseid meteor shower, discussing wind effects and accuracy

19 p3526 A70-38778

PERSONALITY

Headache and personality traits related to visual acuity and brightness sensitivity increases from sea level to high altitude

04 p0633 A70-15444

Professional personality formation and organization of aviator, discussing infancy motivation, identification with instructor during training, emotional life, etc

05 p0799 A70-15767

Pilots personality studies, considering roles of defense mechanisms, Oedipus complex, infant sexuality, Icarus complex, etc

10 p1825 A70-24660

PERSONALITY TESTS

Impression formation model extended to personality traits, noting curvilinear relationship between probability and liking ratings

05 p0803 A70-16670

Ego strength relationship to respiration in response to sound and light stimulation tested in subjects balanced for alertness-drowsiness by EEG criteria

09 p1616 A70-22331

Minnesota Multiphasic Personality Inventory scores compared with various pilot training proficiency levels, noting low correlation

12 p2176 A70-27032

Aptitude test validity taking into account selection board subjective decisions on pilot applicant acceptance

19 p3371 A70-38507

Age, grade, educational institution and attitude effects on pilot personality test performance

22 p3977 A70-42870

Jet pilots psychological survey on troubles, frustrations and personality trends by questionnaire

22 p3978 A70-42876

PERSONNEL

NT AIRCRAFT PILOTS

NT ASTRONAUTS

NT COSMONAUTS

NT FLIGHT CREWS

NT FLIGHT SURGEONS

NT FLYING PERSONNEL

NT GROUND CREWS

NT INSTRUCTORS

NT NAVIGATORS

NT OPERATORS [PERSONNEL]

NT ORBITAL WORKERS

NT PHYSICIANS

NT PILOTS [PERSONNEL]

NT SCIENTISTS

NT SPACECREWS

NT TEST PILOTS

Aerospace scientific and engineering work force movement between geographical areas and resource location

07 p1426 A70-18799

Mission Control Center and Apollo flight controller team, discussing personnel qualifications, equipment and individual evaluation

21 p3805 A70-41197

PERSONNEL DEVELOPMENT

Digital real time simulation for training and evaluating ATC controllers, discussing system hardware, software, design and implementation

02 p0274 A70-11977

Great Britain air transport industry manpower recruitment and training, technology changes effects and costs

02 p0402 A70-12307

Cooperation of NASA and DOD Quality Assurance personnel concerning Apollo 11, considering personnel training

07 p1428 A70-19674

Apollo Program flight control operations personnel premission planning and training, discussing presolution of launch problems and emergencies

09 p1768 A70-23707

Human engineering in weapon systems development, considering flying and ground personnel training plans

12 p2177 A70-27038

Personnel and organizational policies for university research management

12 p2336 A70-27750

Quality control organization for miniature resistance welding of electronic equipment, examining planning phase and personnel training program

14 p2592 A70-31107

ATC personnel training at International ATC Academy, discussing objectives and syllabus

19 p3372 A70-38650

PERSONNEL MANAGEMENT

Predicting retention rate of naval pilots and flight officers beyond initial obligated duty tour based on training performance

15 p2690 A70-31888

Systems engineering approach to comparison by emphasis for employee performance evaluation

17 p3130 A70-35298

Air traffic controller stress reduction, discussing work-rest intervals and various management and human factors

19 p3371 A70-38647

R and D programs engineering talent assignment case histories

21 p3955 A70-41174

Aktion X program for production efficiency, mobilizing personnel in weak points monitoring

24 p4430 A70-45624

PERSONNEL PROPULSION SYSTEMS

U SELF MANEUVERING UNITS

PERSONNEL SELECTION

NT PILOT SELECTION

Psychological aspects of unreliability sources in man machine systems for selection and training criteria of photooptical instruments users

01 p0036 A70-10821

Space flight candidate selection and physical training, comparing American and Soviet training programs for efficiency and physical requirements

07 p1216 A70-18792

Team hiring of research scientists by industrial and academic organizations, discussing causes and influence on R and D organizations management and design

07 p1427 A70-19002

Aircraft pilot and captain selection system on basis of STANINE/standard nine/ method of psychological assessment

10 p1825 A70-24504

Age discrimination in employment policies of air carriers, discussing legislative measures, hiring practices and retirement rules concerning stewardesses and FAA pilots

12 p2336 A70-27772

Ergonomic and medicomilitary aspects of human adaptation to cold environments, discussing metabolic and physical protective reactions, clothing and personnel selection

16 p2850 A70-34346

Wolff-Parkinson and White syndrome applicability in aeromedical appraisal for aircrew selection, noting effects of paroxysmal tachycardia

17 p3040 A70-35916

UK organization of ATC services, considering responsibilities, facilities and personnel recruitment

19 p3467 A70-38634

PERSONNEL SUBSYSTEMS

Air traffic control procedures pertaining to personnel, hardware and regulations

11 p2078 A70-25720

Personnel subsystem reliability through empirical approach, determining relations of man-hardware-procedure systems

15 p2804 A70-32665

Project managers problems of anomalies and ambiguities in complex missions operation and implementation, discussing interactions with personnel

23 p4284 A70-43996

PERSPEX (TRADEMARK)

Plastic strains at sharp notch roots in Perspex plates using interference patterns formed by gas laser monochromatic light beam for fracture initiation

11 p2131 A70-25594

PERSPIRATION

Esophageal, rectal and quadriceps muscle temperatures, oxygen uptake, weight changes, skin conductance and skin evaporation during thermal transients caused by bicycle exercise

10 p1810 A70-24006

Human sweating transient state characterized by time constant following abrupt ambient temperature rise

21 p3761 A70-41140

PERT

Installation planning of electronic data processing unit using network and PERT program features

03 p0454 A70-13969

Book on project management with critical path method and PERT, covering manual and computerized calculation of scheduling, networks, time-cost tradeoffs, etc

22 p4128 A70-43625

PERTURBATION

NT ORBIT PERTURBATION

NT SATELLITE PERTURBATION

Motion stability over finite interval of time for perturbed mechanical systems

01 p0146 A70-11560

Optimal linear controller synthesis with allowance for continuous perturbations effect, describing weighting factors selection

02 p0272 A70-12413

Perturbed motion of solid body with cylindrical cavity partially filled with viscous fluid, using Rabinovich equations

04 p0766 A70-14476

Lifting rotor blades flapping response to atmospheric turbulence, discussing time averaging and perturbation schemes

[AIAA PAPER 69-206] 04 p0624 A70-15378

Perturbation solution for fins taking into consideration interaction of conduction with radiation and convection

07 p1422 A70-19333

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

07 p1385 A70-19447

Evolutionary hydromagnetic shock perturbation by incident small amplitude hydromagnetic wave calculated for diverging wave amplitudes and directions

11 p2036 A70-26017

Annular gas laser, considering external periodic perturbation effect on difference frequency of oppositely moving waves

12 p2251 A70-28291

Self gravitating collisionless particles instability related to anisotropic random velocity distribution function in presence of disk-galaxy type spiral wave perturbations

13 p2492 A70-29299

Two dimensional jet velocity profile evolution under symmetrical and antisymmetrical perturbations

14 p2567 A70-31200

Perturbed motion of body with partially filled cylindrical cavity with damping ribs, discussing vibrations boundary value problems of liquid filling

15 p2775 A70-32157

Independent integrals of perturbed motion equations of spatial gyrohorizon compass

17 p3090 A70-35344

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

18 p3316 A70-36921

Plane waveguide field with complex geometric inhomogeneity, describing perturbed section by integral equations

19 p3381 A70-38567

Stratospheric perturbation sources from atmospheric circulation as function of season, geographic latitude and altitude, suggesting high energy protons in atmosphere

20 p3618 A70-39183

Magnetotail magnetic field perturbations associated with polar magnetic substorms, using IMP-A and B satellite observations

21 p3882 A70-41720

PERTURBATION THEORY

Critique of double resonance theory in gaseous lasers, including correction regarding saturation parameter for small RF perturbations and line width dependence

01 p0109 A70-10432

Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem

01 p0064 A70-11032

Upper atmospheric thermal fluctuations study based on correlation characteristics of rapid thermal perturbations, using linear differential equations

02 p0288 A70-11761

Asymptotic method based on Landahl small perturbation theory applied to perturbation velocity potential for oscillating delta wing in transonic flow

02 p0223 A70-11775

Perturbation method developed for linearizing nonlinear singular equation for inhomogeneous stratified atmosphere H-function in theory of radiative transfer

02 p0338 A70-11791

Singular perturbation problem solution asymptotic expansions applied to linearized theory of elasticity equilibrium problem with stress couples

02 p0389 A70-12685

Optical echoes using model of spins precessing in magnetic field, presenting time dependent theory of perturbation

02 p0341 A70-12830

Multiple periodicities in beta Canis Majoris Star 16 Lacertae attributed to tidal perturbation effects on pulsation mode of structural changes

03 p0567 A70-13320

Dead zone initial disturbance of sensitive element dynamic coordinate in two rotor gyrocompass determined using method of averages

03 p0484 A70-13419

Approximate method of boundary perturbation to solve elasticity and viscoelasticity problems for non-canonical bodies of revolution applied to stress concentration at ellipsoidal cavity

03 p0591 A70-13439

Potential determination from gravity disturbances along fixed direction in analysis of residuals of Doppler tracking of Lunar Orbiter satellites for moon gravity field

03 p0577 A70-14177

Matrix elements of nonadiabatic perturbation emphasized in semiempirical theory for evaluating polyatomic molecules radiationless rate constants in terms of electronic-vibrational state

04 p0722 A70-14699

Perturbation technique for numerically sensitive nonlinear two point boundary value problems

04 p0713 A70-15045

Rate equation analysis of steady state behavior of double cavity GaAs diode laser, noting solution stability by perturbation method

04 p0703 A70-15618

Coordinates computation method using spherical harmonic expansion of geomagnetic field, discussing direct computations by perturbation method

05 p0837 A70-15820

Exchange perturbation theories applied to delta function model of molecular hydrogen ion, discussing EL-HAV second order energy at large internuclear separations

05 p0884 A70-15878

Continuum, harmonic and finite element perturbation studies of elastica to yield postbuckling path derivatives from nonlinear energy formulation

05 p0927 A70-16011

Periodic perturbations of plane Poiseuille flow, observing neutral curve relationship to disturbance amplitude

05 p0832 A70-16019

Hybrid computer simulation of small nonlinearities effects in human arterial system, using perturbation techniques

05 p0805 A70-16045

Perturbation effects on elastic material deformation due to nonorthogonality of curves defining curvilinear acotropy, with application to circular cylindrical tube

05 p0929 A70-16065

Perturbation theory based on Lie transforms, reducing Deprit equation to generate general recursion formulas

05 p0908 A70-16336

Motion near collision singularity in perturbed two body problem, applying method to boundedness proof for Spherling cluster energy

05 p0909 A70-16339

Bounded operator functionals used for deriving nonlocal interaction Hamiltonian of quantum electrodynamics corresponding to converging series for scattering matrix in perturbation theory

05 p0883 A70-16876

Bounded nonlocal operator used in deriving series of subtracting Hamiltonians representing S matrix in perturbation theory after transition to local limit

05 p0883 A70-16877

Randomly perturbed linear differential equation involving first derivative of n-vector function of real variable

05 p0878 A70-17096

Excitation coefficients for arrays with shaped beam patterns by perturbation of roots which lie off unit circle

06 p1021 A70-17572

Time dependent pressure fluctuations effect on laminar film pool boiling on vertical flat plate by perturbation method to predict heat transfer

06 p1177 A70-17696

Degenerate and nondegenerate energy states and wave functions formulated by Rayleigh-Schrodinger perturbation theory

06 p1110 A70-17764

Ammonium perchlorate deflagrations, determining intrinsic stability of one dimensional burning configuration based on flame structure modeling

[AIAA PAPER 70-123] 06 p1128 A70-18044

Three body problem involving sun and perturbing and perturbed planets, examining perturbed motion equations of Brouwer and Encke methods

07 p1374 A70-18773

Propagation in perturbed magnetically focused electron beams, noting influence of spatially varying drift velocity and damping effect

07 p1239 A70-18867

Periodic solution with nondegenerate orbit for functional differential equations taking into account small perturbation

07 p1324 A70-19199

Step profile decay of initial perturbations of radiating gas as function of optical depth and Boltzmann number

07 p1255 A70-19212

Satellite orbit using analytic partial derivatives of perturbed motion based on state transition matrices

07 p1381 A70-19301

Hypothesis concerning initial spectrum of metric perturbations in Friedman model, discussing long wavelength gravitational waves energy

07 p1383 A70-19406

Perturbations classes for self adjoint operator limit spectrum preservation

07 p1327 A70-19807

Single junction vacuum thermocouple measuring thermal beam effect with reference to velocity distribution perturbation in molecular beam scattering

07 p1341 A70-20107

Axial-vector current divergence in external gravitational field, using perturbation approach in Minkowski space

07 p1336 A70-20167

Single frequency oscillations of variable cross section rods with random perturbations using asymptotic methods of nonlinear mechanics, discussing wedge oscillations

08 p1583 A70-20487

Phase shift effect on astatic gyro axis drift and stability during periodic perturbations, describing motion by nonlinear differential equations

08 p1493 A70-20489

Stability in systems finite over given time interval under permanent perturbations bounded in mean

08 p1543 A70-20490

Soviet book on motion of guided rockets in space covering aerodynamic and structural aspects, stabilization and disturbed rocket motion, etc

08 p1582 A70-20756

- Libration limits of satellite in Keplerian circular orbit, estimating potential energy of perturbing forces 08 p1582 A70-20967
- Stability of continuously differentiable functions representing approximate solution to system of differential equations of perturbed motion 08 p1545 A70-21167
- Incompressible laminar boundary layer stability of incompressible fluid for nonparallel oncoming flow, deriving perturbed motion equation 08 p1483 A70-21179
- Quasi-geostrophic baroclinic instability in non-separable parallel flow, using perturbation theory 08 p1539 A70-21604
- Random perturbation procedure for control variable functions optimization using hybrid computer method for analog solutions and digital storage 08 p1467 A70-21783
- Stress analysis of composite materials reinforced with glass ribbons embedded in epoxy matrix by photoelastic technique, discussing perturbation effect 08 p1594 A70-21862
- Gravitational collapse models with magnetic dipole and gravitational quadrupole, treating asymmetries as small perturbations 09 p1752 A70-22274
- Perturbation rotational levels in triplet states of CO emission spectra attributed to resonance fluorescence process involving optically forbidden transitions 09 p1731 A70-22282
- Integral equation perturbation technique, discussing applications to electrostatics, hydrodynamics, MHD, heat and mass transfer, etc 09 p1711 A70-22350
- Optimum control law for minimizing mass point maximum deviation under given disturbance obtained by graph analytic method 09 p1727 A70-22534
- Nonlinear stability theory for applying perturbed equations to dynamical system based on Liapunov stability theorem 09 p1727 A70-22612
- Molecular hydrogen parallel and perpendicular dynamic polarizabilities calculated for frequency dependence, using many body perturbation theory 09 p1731 A70-22780
- Periodic solutions of restricted three body libration point perturbation due to fourth body gravitational and radiative influence using Huang model 09 p1761 A70-23053
- Amplitude and phase correlations of spherical waves propagating in turbulent atmosphere using smooth perturbation method 09 p1636 A70-23139
- Motions stability about triangular points in elliptic restricted problem of three bodies, using perturbation scheme 09 p1728 A70-23205
- Inviscid hypersonic small disturbance theory applied to flow behind concave and convex exponential shock waves, determining supporting two dimensional airfoil surfaces 09 p1605 A70-23220
- Laminar boundary layers behavior in shock tube flows behind primary moving shock wave using perturbation method 09 p1662 A70-23281
- Streamwise perturbations in flow downstream of self excited blades cascade calculated by two dimensional theory, discussing periodic circulation shedding 09 p1608 A70-23746
- Gravitational instability theory for large density perturbations growth during expansion of matter without pressure 10 p1945 A70-24961
- Radiative transfer in inhomogeneous atmospheres using simplified matrix equations in perturbation method 10 p1933 A70-24984
- Polarized radiation transfer through inhomogeneous semiinfinite atmosphere by matrix perturbation method, giving nonlinear singular integral equation 10 p1933 A70-24985
- Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem 10 p1871 A70-25001
- Ideal fluid flow containing small spherical particles past cylinder and flat plate normal to stream using small perturbations method 11 p1976 A70-26012
- Spacecraft temperature prediction and heat conduction problems with nonlinear radiation boundary conditions by perturbation theory, applying to heat shield analysis 11 p2150 A70-26355
- Hydrogen-air reaction by singular perturbation methods for temperature and pressure values of supersonic combustion, changing reaction velocity by initial stoichiometry 11 p1995 A70-26624
- Gravitational disturbance by exterior planets, considering Brown transformation of longitudinal perturbation problem in relation to planet Neptune discovery 11 p2117 A70-26658
- Elastic postbuckling and imperfection sensitivity of discrete structural systems using perturbation approach 11 p2143 A70-26668
- Aerodynamic sound emission from compact eddy region by singular perturbation approach, discussing Lighthill and Ribner theories 11 p1977 A70-26687
- Linearized perturbation theory for quasi-static equilibrium stellar interior models, obtaining correction through bidirectional quadrature 11 p2118 A70-26709
- Wave propagation in continuous random media solved by partial differential equations with random coefficients, describing perturbation methods for obtaining solutions statistical properties 11 p2085 A70-26761
- Differential equations perturbed linear systems convergence, extending Bridgland results 12 p2260 A70-27011
- Solar wind structure as function of corotating coronal inhomogeneities determined using perturbation equations for spherical polar coordinate system 12 p2292 A70-27179
- Dynamic behavior and moments of oscillatory systems under steady perturbations using linear differential equations 12 p2261 A70-27555
- Perturbation theory of supersonic steady anisotropic flow with radiative heat transfer using hyperbolic characteristic coordinates 12 p2334 A70-28203
- Perturbation function of first order general planetary theory using Hori canonical variables, revealing mixed secular term of determining function 13 p2487 A70-28708
- Oscillatory perturbed motion of elastic body in general relativity space time, discussing energy tensor, unitary speed vector and density 13 p2451 A70-28954
- Banach space stability in presence of constantly acting perturbations bounded in mean, investigating differential operator equation 13 p2452 A70-29309
- Nonlinear branching point problems in fluid mechanics using perturbation technique 14 p2565 A70-30471
- Steady plane relativistic flow small irrotational perturbation theory determining subsonic, transonic and supersonic approximation 14 p2566 A70-30472
- Spiral structure of disk galaxies as nonaxisymmetric perturbations in density, using pressure free hydrodynamical equations 14 p2639 A70-30731
- Singular perturbation problems in theory of differential equations with almost periodic coefficients 14 p2599 A70-30847
- Flow velocity distributions in laminar boundary layer by perturbation methods 14 p2566 A70-30850
- Adiabatic relation between initial plasma density perturbations and radiation temperature fluctuations during galaxies formation, discussing relic radiation fluctuations 14 p2632 A70-31286
- Red giant model, investigating inclusion of semirelativistic partially degenerate gas characteristics by perturbationary technique 14 p2651 A70-31290
- Book on celestial mechanics covering perturbation methods, two body problems, astronomical coordinates, orbital mechanics, satellite rotation, gravitational effects, etc 15 p2799 A70-31998
- Circular free boundary problem associated with phase transformation by first order perturbation solution, discussing radial solidification and melting of fluid over cylindrical rod 16 p2941 A70-33003
- Plasma echo oscillations due to superposition of consecutive perturbations separated by intervals greater than characteristic decay time 16 p2957 A70-33198
- Equations of supersonic and hypersonic motion past circular cone by linearized method based on small perturbations with respect to nearly incompressible flow 16 p2835 A70-33746
- Partitioning formalism for degenerate, almost degenerate and electron exchange perturbation problems 16 p2955 A70-34001
- Coupled simple harmonic oscillators with almost degenerate energy levels, comparing partitioning perturbation techniques with Rayleigh-Schrodinger approach 16 p2955 A70-34002
- Partitioning perturbation theory for electron exchange problems, generalizing Hirschfelder-Silbey formalism 16 p2955 A70-34003
- German monograph on supersonic flows calculation past slender bodies of revolution using perturbation approach based on Poincare-Lighthill-Kuo method 16 p2839 A70-34082
- Longitudinal wave propagation in variable section bars, solving hyperbolic equation of motion by perturbation method 16 p2993 A70-34088
- Shear flow perturbations in inviscid incompressible stratified fluid of given density, comparing stability characteristics with jet flow 16 p2895 A70-34243
- Perturbation method to obtain analytical expressions for attenuation of plane wave sound propagation in lined ducts 17 p3136 A70-34523
- Singular perturbations of boundary value problems, investigating asymptotic solutions to finite difference equations 17 p3128 A70-34613
- Boundary conditions for electrodynamics of wave reflection from conducting bodies, using perturbation technique 17 p3128 A70-34633
- Satellite equations of motion in noninertial instantaneous astronomical system, taking into account perturbation equations terms 17 p3155 A70-34684
- Plasma waves parametric excitation by external electric field, using perturbation method of multiple scales 17 p3140 A70-34933
- Bounded ionospheric layers gradient instability, discussing perturbation growth and lifetime 17 p3076 A70-34944
- Normal shock structure in thermally perfect gas, using perturbation methods 17 p3070 A70-35244
- Perturbation method for finite elastodynamic deformation of nonlinear systems 17 p3191 A70-35590
- Magnetic perturbation effects on magnetoactive plasma, considering Boltzmann transport equation, plasma-electromagnetic interactions, heating, cooling, etc 17 p3142 A70-35592
- Couette flow stability between coaxial rotating cylinders, calculating eigenvector in first approximation small perturbation equations 17 p3073 A70-35695
- Hydrodynamic flow stability, formulating localizability properties for short wave perturbation 17 p3073 A70-35735
- Motion perturbation equations for guided space vehicles, allowing for sloshing liquid propellant viscosity effects 18 p3332 A70-36160
- Nonperturbability conditions and equations of motion of bigyroscopic vertical below escape velocity 18 p3259 A70-36592
- Schwarzschild exterior metric stability against perturbations from asymptotic behavior of Einstein field equations solution in Kruskal coordinates 18 p3291 A70-36650
- Iterative Hansen method of general perturbations programmed for digital computer, evaluating major and minor planetary theory 18 p3320 A70-37060
- Artificial satellite theory main problem for small and moderate eccentricities, using perturbation techniques based on Lie transforms for computer programming 18 p3334 A70-37062
- Differential equations for odd and even parity Regge-Wheeler perturbations on Schwarzschild metric 19 p3457 A70-37573
- Frames nonlinear elastic postbuckling behavior, using static perturbation technique 19 p3542 A70-38058
- Radio wave propagation over inhomogeneous terrains, determining perturbing effects of details on wave characteristics 19 p3381 A70-38573
- Perturbation calculation for linear ordinary differential operators, considering equivalence to eigenvalue problems 19 p3459 A70-38681
- Rotating stellar systems cooperative phenomena, estimating star-star collisions effect on perturbation rate and damping 19 p3525 A70-38772
- Second and higher order perturbation theory for two body trajectories, using recursive formulas [AIAA PAPER 70-1056] 19 p3528 A70-38871
- Ricci curvature tensor perturbations of space-time on Alfvén wave fronts 19 p3472 A70-38935
- Libration limits of satellite in Keplerian circular orbit, estimating potential energy of perturbing forces 20 p3713 A70-39388
- Perturbation method for nonlinear wave propagation in inhomogeneous media, considering sound propagation in ducts and hydromagnetic waves across nonuniform magnetic field 20 p3672 A70-39611
- Perturbation method for nonlinear acoustic wave propagation in steady one dimensional flow through variable cross section duct 20 p3673 A70-39612

Flow rate, momentum and energy perturbations during gas motions through shock wave, discussing acoustic waves impinging from supersonic region

20 p3612 A70-39815

Cylindrical gas suspension lubricating layer pressure distribution calculation by perturbation method, determining angular rigidity

20 p3637 A70-39818

Perturbation theory for nonlinear systems of differential equations

20 p3658 A70-40104

Boundary value problems in dynamic elasticity by perturbation method with displacement components

20 p3732 A70-40111

Viscous conducting fluid slow motion past sphere in presence of toroidal magnetic field, calculating Stokes flow perturbations

20 p3682 A70-40113

Perturbation method for stress-strain state of circular cylindrical shell with large curvilinear hole

20 p3734 A70-40442

Perturbed motion linear equations of body rigidly coupled to thin walled elastic shell partially filled with heavy compressible fluid

21 p3806 A70-40602

External field perturbations by local inhomogeneities in elastic medium, deriving expressions for interaction energy and forces between defects

21 p3933 A70-40604

Duality of optimal control and observation problems in cases of bounded coordinates and continuously acting perturbations respectively

21 p3801 A70-40605

Electromagnetic wave propagation in one dimensional periodic waveguide slow wave systems, deriving dispersion curves by perturbation theory

21 p3784 A70-40628

Secondary flow model for planetary boundary layer, considering flow as finite perturbation

21 p3813 A70-40904

Lifting reentry vehicle two dimensional motion optimization with inequality constraints explicitly containing control by perturbation method

21 p3845 A70-41265

Plasma wave echo, observing oscillatory behavior of perturbed distribution with different phases and amplitudes

21 p3858 A70-41389

Rotational transition probabilities of molecular collisions, using time dependent perturbation theory along linear trajectories

21 p3853 A70-41390

Numerical molecular rotational transition probabilities and cross sections in HCN-HCN and ICN-ICN collisions, using perturbation theory and multipole potentials

21 p3853 A70-41391

Bending stress at clamped support of impulsively loaded semiinfinite conical shell, obtaining formulas from perturbation theory

21 p3938 A70-41759

Quasi-conical supersonic wings with curved subsonic leading edges, discussing perturbation potential, boundary conditions, homogeneous flow and gothic and ogee planforms

21 p3747 A70-42108

Output probability of nonlinear systems from coupling moments for input random parameters, using equivalent perturbations method

22 p4003 A70-42885

Perturbation method with small parameter applied to turbulent transfer equation in lower atmosphere, solving longitudinal diffusion effect on evaporation

22 p4065 A70-42911

Nonlinear differential equations system under small perturbation, considering uniqueness for autonomous unperturbed system

22 p4062 A70-42969

Metric evolution in oscillatory mode of approach to singularity in homogeneous cosmological models in asymptotic region, showing Kasner epoch dependence on perturbation

22 p4075 A70-43478

Perturbation theories based on canonical transformations, examining von Zeipel theory and Hamiltonian functions

22 p4109 A70-43749

Book on guided EM wave theory covering mathematical methods transmission lines cavity resonators, perturbation theory, electrostatics, electric and magnetic fields, propagation, etc

23 p4172 A70-44242

Temperature dependent materials heat flow analysis using perturbation method for nonlinear boundary value problems

23 p4282 A70-44589

Moderately elliptic reference orbit perturbed motion, applying linearized perturbation equations for circular orbit

23 p4244 A70-44590

Restricted osculating two body orbit with time derivative of eccentric anomalies difference position as independent variable in perturbation differential equations

23 p4244 A70-44635

Doppler effect simplification to classical Laplacian orbit determination, deriving equations in perturbed gravity field for initial point determination

23 p4246 A70-44697

Celestial mechanics covering two body problem, orbital improvement, perturbation theory and dynamics, planetary and satellite theory, lunar motion, etc

23 p4255 A70-45032

High energy close approach trajectories within planar free fall three body problem, using perturbation theory

24 p4412 A70-45984

Perturbation effects on nonlinear first order wave equations discontinuous solutions decay, discussing boundary value problem for stress wave propagation in rod with viscous damping

24 p4426 A70-46026

Krylov and Bogoliubov perturbation method extension to difference equations based on analogy between differential and difference equations

24 p4370 A70-46027

Momentum source interaction with viscous uniform stream, constructing perturbation solutions from non-linear equations

24 p4327 A70-46040

Perfect gas statistical relations by perturbation form of state equation for atmosphere

24 p4372 A70-46071

Ionospheric wave propagation, using medium model, perturbation theory for vertical variation and computer eigenvalues of matrix system

24 p4314 A70-46132

Differentially rotating stellar interiors nonaxisymmetric perturbation stability in toroidal and poloidal magnetic fields

24 p4413 A70-46165

One dimensional gas pressure as function of activity, using Poisson-type partition function for perturbation calculation of thermodynamic limit

24 p4430 A70-46269

Linear stationary systems rms stability under parametric disturbances by white noise random processes

24 p4427 A70-46379

PERVEANCE

Magnetron-type electron gun structure with high design perveance for TWT applications

09 p1651 A70-23642

PETROGRAPHY

Worldwide data inventory of rock features associated with meteorite impact structures, including photomicrographs of petrographic features

01 p0069 A70-10223

Optical studies of deformational structures of minerals from meteorite craters and cryptoexplosion structures

02 p0292 A70-12510

Tenoumer crater meteorite impact origin from shock metamorphic features analysis

20 p3619 A70-39216

Electron microprobe and petrographic analyses of crystalline rock and separates from Apollo 11 lunar soil samples

21 p3895 A70-41506

Petrography and shock vaporization origin of Apollo 11 lunar breccias and glasses compared to terrestrial impactites and chondrites

21 p3898 A70-41524

Apollo 11 lunar rock mineralogy, examining petrographic and chemical features by light microscopy, electron microprobe microanalysis and detector system

21 p3898 A70-41525

Lunar rocks petrography, mineralogy and petrogenesis from Apollo 11 samples

21 p3902 A70-41554

Apollo 11 lunar dust, breccia and igneous rocks, using Mossbauer spectroscopy and petrographic techniques

21 p3916 A70-41664

Apollo 11 lunar crystalline rock and breccias petrography and luminescent properties, spectral analysis, color, emission bands and shock effects

21 p3918 A70-41678

PETROLEUM

U CRUDE OIL

PETROLOGY

NT PETROGRAPHY

Petrological, X ray and chemical analyses of Muz-zaffarpur Ni-rich ataxite, showing kamacite, taenite and minor schreibersite composition

01 p0177 A70-10328

Methane and ethane released from Apollo 11 lunar samples by crushing or acid treatment, suggesting carbides hydrolysis as main source

12 p2304 A70-27719

Apollo 11 lunar rocks mineralogy and petrology, noting anorthosite in powder and breccia

18 p3320 A70-37081

Chondrites and terrestrial rocks trace elements by neutron activation analysis, discussing radiochemical separation and computer analysis of gamma ray spectra

20 p3582 A70-38980

Apollo 11 lunar science - NASA Conference, Houston, January 1970, Volume 1, Mineralogy and petrology

21 p3893 A70-41501

Apollo 11 lunar rock and fines chemistry, mineralogy and petrology, discussing composition, igneous rocks, microbreccias, glasses and pyroxene relations

21 p3895 A70-41507

Apollo 11 lunar rocks, breccias, dust and chip mineralogy and petrology, examining composition, texture, grain size and morphologies

21 p3896 A70-41511

Apollo 11 lunar igneous rocks mineralogical, chemical and petrological features by optical and electron microscopy and X ray spectrometry

21 p3896 A70-41512

Apollo 11 lunar crystalline rock samples petrology, discussing shock and other metamorphic effects on mineral structure

21 p3897 A70-41516

Petrology, mineralogy and deformation of Apollo 11 rock samples using microscopic, X ray and electron microprobe methods

21 p3897 A70-41517

Petrologic analyses of minerals and glass spherules in Apollo 11 lunar rocks, indicating little fractionation and shallow-level differentiation

21 p3897 A70-41521

Petrology, crystallization and magma origin of lunar clinopyroxene, ilmenite-rich dolerite and microgabbro from Apollo 11 samples

21 p3900 A70-41536

Mineralogy and petrology of lunar rock samples indicating meteoritic increments

21 p3900 A70-41539

Apollo 11 lunar basalt petrogenesis, examining internal constitution and origin by high pressure

21 p3901 A70-41547

Lunar petrology of silicate melt inclusions from Apollo 11 rock samples, discussing heating experiments

21 p3902 A70-41548

Apollo 11 lunar igneous rock mineralogy and petrology, emphasizing ferrobasalt minerals microanalysis electron probe

21 p3903 A70-41557

Apollo 11 lunar basalt chemical composition and petrogenesis, using stable isotope dilution method

21 p3907 A70-41573

Crystalline rocks from Mare Tranquillitatis and Oceanus Procellarum, determining K-Ar ages

23 p4238 A70-43803

Terrestrial and synthetic lunar igneous rocks thermal conductivities in melting range, discussing thermal gradient

23 p4238 A70-43804

Apollo 11 ilmenite basalts petrology from regolith samples

23 p4239 A70-43898

Borgo San Donino chondrite petrology and mineralogical and chemical composition, considering texture and recrystallization features

24 p4411 A70-45791

PFM (MODULATION)

U PULSE FREQUENCY MODULATION

PM

Acidosis effects on anoxic rat heart cardiac performance and anaerobic energy generation

04 p0635 A70-15461

Potentiometric analysis for determining acidity and alkalinity in dark mineral oils with additives

05 p0810 A70-15898

PH variation effect on sea water on stress corrosion cracking behavior of Ti alloys

13 p2435 A70-29174

Corrosion and stress corrosion behavior comparison of aged Al-Zn-Mg alloy in aqueous chloride solution, discussing pH variation effect

18 p3271 A70-36028

Microbial existence limits in hot springs at varying temperature and pH characteristics

22 p3970 A70-42956

Blood oxygen, carbon dioxide and pN during hypothermia induced by He-oxygen mixture and cold exposure in hamsters, comparing with hibernation state

23 p4147 A70-44787

PH FACTOR

Acid base responses of arterial plasma of anesthetized man during acute carbon dioxide partial pressure changes, discussing anesthesia effects

01 p0020 A70-10651

H ion increased activity effect on sodium transport across short circuited turtle bladder

02 p0234 A70-11730

Blood pH effects on adrenomedullary response to hemorrhage, studying catecholamines release in anesthetized dogs

02 p0235 A70-11733

Arterial pH change effects on circulation and oxygen consumption in dogs, discussing respiratory acidosis heart rate, cardiac output and arterial blood pressure

17 p3024 A70-34593

PHARMACOLOGY

Pharmacology for long term manned space
04 p0629 A70-14566

PHARYNX

Electroencephalographic study of flying personnel utilizing nasopharyngeal electrodes to determine neurological disorders
06 p1000 A70-17302

PHASE ANGLE

U PHASE SHIFT

PHASE CHANGES

U PHASE TRANSFORMATIONS

PHASE COHERENCE

White noise and nonlinear effects in telemetry RF links, analyzing received process to phase coherent receiver
08 p1460 A70-20823

Holographic technique of coherent light field transformation with desirable phase distribution from laser light beams of arbitrary wavefront characteristics
08 p1497 A70-21410

Phase noise and cycle slip optimization of steady state digital data transition tracking loop used as bit synchronizer in phase-coherent receiver
11 p2024 A70-26202

Cardiac and respiratory cycles phase coincidence detection device, making photographic plates under physiological conditions
14 p2541 A70-30381

Alpha rhythm phase coherence during photic blocking, examining pacemaker model
19 p3368 A70-37811

Current-phase relationship in short superconducting weak links, using one dimensional model
24 p4389 A70-45224

PHASE CONTRAST

Object visualization in phase contrast using non-linear interferential holography by successive recording of intensities on photographic plate
05 p0848 A70-16273

Scattered field amplitude and phase determined from hologram light intensity distribution, noting biological applications
08 p1500 A70-21786

Comparator for measuring relative phase difference between identical frequency signals within microwave octave band
09 p1647 A70-22715

Phase meter for measuring angular coordinates of reflecting meteor trails
19 p3526 A70-38777

PHASE CONTROL

Radiation patterns containing multiple beams generated by aperture phase control
01 p0050 A70-10462

Minimum time frequency transitions in phase locked loops with phase and frequency controls using Pontryagin principle, obtaining switchless control strategies
04 p0652 A70-15339

Lateralization and detection of signals under antiphasic noise masking measured at various SNR levels
06 p1106 A70-17597

Constraint optimization on phase coordinates and controls noting extension to functional spaces
07 p1330 A70-18683

Optimal nonparametric amplitude and phase methods for synthesizing signal detection systems invariant to noise distribution and noise-signal combination
07 p1226 A70-18684

Discrete diode phase inverter for meter wavelengths providing north-south antenna control of radio telescope by diffraction method
08 p1473 A70-21064

Cross type radio telescope beam forming and steering system, describing switched delay lines and phasing circuits
08 p1477 A70-21823

Parabolic reflectors profile error compensation by means of multielement feed array with controllable phasing
09 p1644 A70-22236

Automatic phase correction for modulated subcarrier microwave systems used for control of industrial processes
09 p1632 A70-22281

TDMA system control, considering access process control and switching process control, discussing burst transmission phase control and channel selection at receiving end
10 p1839 A70-24366

Switched self balancing comparison radiometer with coupling between channels, showing measurement errors due to coupling correctable by phase switching
11 p2018 A70-26269

Atomic frequency standards for phase calibration of large aerial arrays applied to radiotelegraph
11 p2019 A70-26300

Optimal phase-manipulated signals synthesis from autocorrelation function using algorithm
11 p2012 A70-26804

Optimization for control processes with first and higher order constraints on phase coordinates
12 p2205 A70-28195

Automatic phase control of demodulating signal in one dimensional extremal system with harmonic tracking oscillations
12 p2205 A70-28338

Computer modeling of nonlinear phase automatic frequency control systems under noise and oscillating disturbance
13 p2383 A70-29303

Noise effect on single band modulation receiver using phase automatic frequency control for carrier wave at arbitrary SNR
13 p2370 A70-29739

Statistical output characteristics of harmonic cosine and sinusoidal inertialess phase periodic converters in two channel system with frequency multiplication
13 p2370 A70-29741

Transfer properties of scanning phase discriminator with intermediate storage, explaining sampling method and sample-hold-sample circuit
15 p2714 A70-32672

Phase control of locked negative resistance /Gunn/ oscillator under operational conditions, noting coupled varactor diode use
17 p3055 A70-35630

Soviet book on dynamic systems with cylindrical phase space covering differential equations with angular coordinates, parameter estimation, multidimensional and discontinuous systems, pendulums, etc
19 p3470 A70-37468

Second order automatic phase control system with proportionately integrating filter, calculating transient response by harmonic linearization method
20 p3584 A70-39253

Digital frequency and phase flip-flop comparator for slave oscillators fine control by master frequency
22 p3996 A70-42819

Harmonic linearization method application to automatic phase control system with periodic nonlinearities
22 p4002 A70-42840

Amplitude-phase characteristics of relay slave mechanisms with AC and DC motors under dynamic braking, using harmonic linearization
22 p4002 A70-42842

Optimization for control processes with first and higher order constraints on phase coordinates
22 p4004 A70-43320

Linear systems with phase coordinates bounded by given time functions, obtaining optimal control by iterative solution involving Lagrange multipliers
23 p4177 A70-44302

PHASE DEMODULATORS

Phase feedback demodulation technique to analyze telemetry performance degradation caused by voice interference in modes of Apollo communication system, providing linear detection scheme
04 p0648 A70-14660

Carrier recovery circuits synchronization for PSK demodulators used in TDMA satellite communication
10 p1835 A70-24338

PHASE DETECTORS

Phase detector with two value output and pulsed input for measurement and control circuits, noting construction with semiconductor elements
02 p0266 A70-11900

AFC by digital phase lock loop consisting of zone error detector with phase quantizing circuit and discrete frequency regulator with reversible counter
02 p0258 A70-12542

M-type transmission line with cyclotron waves to achieve phase inverter and delay line operation, showing phase sensitivity to magnetic field changes near cyclotron resonance
03 p0447 A70-13292

Linear phase detection using FM demodulation for Apollo S band communication system eliminating baseband voice interference with telemetry
04 p0648 A70-14659

Backscatter radar signal phase determination from amplitude data, measuring phase and amplitude in laboratory
05 p0815 A70-16507

Turbine blade vibration measurement by contactless discrete-phase method, discussing sensor positioning for displacement amplitudes and flutter speeds determination
09 p1681 A70-23199

Weak phase objects detection based on interferential and streak photography methods, noting fringe deformation role
10 p1916 A70-24587

LF signals phase determination during solar eclipse of 22 September 1968, noting frequency shift magnitude
14 p2547 A70-30238

Modulation method for phase detection in electro-optical light modulator of optical range finder
16 p2914 A70-34213

Pulse superposition measurements of small ultrasonic waves velocity changes using automatic recording phase sensitive detection
21 p3827 A70-41468

PHASE DIAGRAMS

LF signals phase determination during solar eclipse of 22 September 1968, noting frequency shift magnitude
24 p4316 A70-46313

PHASE DEVIATION

Earth space signal propagation characteristics obtained by satellite-borne radio interferometer provide phase information in addition to amplitude for improving navigation accuracy
02 p0260 A70-12567

Phase distortion and Faraday rotation of wideband radio waves propagating through ionosphere
03 p0449 A70-13584

Interferograms taken by phase difference amplification technique with nonlinear hologram, considering amplified image accuracy
08 p1500 A70-21788

Nonlinear phase distortion measurement in microwave limiters under dynamic conditions using two tone test signal
09 p1647 A70-22714

Roof prism reversing-front Michelson interferometer for phase correlation measurements in turbulent atmosphere
09 p1684 A70-23535

Atmospherically induced phase fluctuations for various path lengths using near ground horizontal Mach-Zehnder, discussing turbulence effects
10 p1916 A70-24413

Holographic compensation for atmospherically induced phase distortion of IR laser beam
11 p2049 A70-25638

Periodic high temperature effects on human systolic phase dynamics
12 p2174 A70-28359

Obliquely incident spherical wave amplitude and phase fluctuations, deriving formulae to compare variances behavior for refractive index fluctuation autocorrelation functions
14 p2574 A70-30750

Asymmetrical transient attenuation effects of bridge circuit phase discriminator on accuracy of phase difference measurements
15 p2707 A70-31508

Sudden phase anomaly /SPA/ in VLF radio wave propagation during Proton Flare Project, noting corresponding solar X-ray flux intensity enhancement
15 p2794 A70-32294

Polar cap disturbance of 7 June 1969 due to small proton enhancement, describing detection by transpolar VLF phase measurement
15 p2794 A70-32295

Negative sudden phase anomaly /SPA/ in VLF radio transmission, noting solar X ray flux intensity and zenith angle effects
15 p2699 A70-32297

Multiple sensor arrays phase difference estimation, assuming Gaussian signal and noise statistics
16 p2866 A70-34064

Nonlinear dynamic systems phase coordinate variations statistical characteristics, describing data reduction method
20 p3674 A70-40183

Image holography nonlinearities analysis, using photographic film characteristics for phase deviation enhancement
22 p4031 A70-42951

Lissajous figures for phase response of N-path signal filter transfer functions, using switched modulators
22 p3998 A70-43256

VLF phase disturbances, HF absorption and solar protons in 1967 PCA events, using ionization model
24 p4314 A70-46128

PHASE DIAGRAMS

Phase diagrams for binary mixtures at high pressures suggesting layered structures existence in Jupiter and Saturn atmospheres resulting from phase separations in hydrogen-helium mixture
02 p0368 A70-11819

Refractory metal-oxygen systems phases and phase relations
02 p0318 A70-12640

Two phase theory of ordered to disordered state transition in ternary alloys with fcc lattice, constructing phase diagrams
03 p0505 A70-13103

Microdeformation resistance in Ni alloys with ordered phase diagrams related to strain level, analyzing Bauschinger effect
03 p0505 A70-13106

Neutron bombardment effect on ordering and disordering state of alloys phase diagrams, noting temperature dependence
03 p0506 A70-13107

Ti-Al-V alloys after annealing investigated for equilibrium diagram at high temperatures
04 p0708 A70-15313

Ternary Ti-Al-Mo part phase diagrams constructed from Mo corner to plane titanium aluminate, including isothermal phase diagram for 600 C
05 p0864 A70-16548

Phase equilibria, crystallization and solidus surface in transition conode triangle of ternary system Mo-Ti-C at high temperatures
07 p1310 A70-19804

Carbide layer formation on Ta and Ta-W alloys, discussing Ta-C phase diagram and phases 07 p1320 A70-19892

Knudsen effusion cells high temperature uses, discussing binary alloys phase boundary determination and volume and surface diffusion studies 07 p1424 A70-19900

Phase equilibrium and homogeneity regions of solid solutions system Ni-Nb-O at elevated temperature 07 p1315 A70-20313

Ce-Ni-Si system X ray and microstructural analysis, constructing phase diagram for Ce contents of 0-33.3 wt percent 08 p1555 A70-21115

Phase diagram of dysprosium oxide-chromium oxide system constructed by microstructural analysis in 1600-2400 C range in argon atmosphere 08 p1556 A70-21118

Phase diagram of Nd-Rh system determined by powder X ray diffraction, metallography and differential thermal analysis methods 08 p1522 A70-21711

Phase diagrams of metal systems - U.S.S.R. Conference, Moscow, June 1967 09 p1702 A70-22559

Melting diagram for five element Mo-W-Nb-Ta-V system constructed by optimal projections from known composition-property relations for corresponding ternary systems with common components 09 p1702 A70-22561

Vacuum melting and heat treating equipment for high melting point metals from phase equilibria studies viewpoint 09 p1655 A70-22562

Diffusion layer correspondence to phase diagram in terms of constituent phases and composition 09 p1702 A70-22563

Binary and ternary systems phase diagrams construction by diffusion layer method and X ray analysis, studying concentration dependence of diffusion coefficient 09 p1703 A70-22564

Mechanical and physical properties of Nb-Ti binary annealed alloys as function of compound NbTi using microscopic and X ray phase analysis 09 p1704 A70-22755

Ordered Ni8Ta phase in nickel-rich binary alloy using electron microscopy and diffraction analysis 09 p1705 A70-22808

Alkali-alkaline earth niobates phase equilibrium study revealing tetragonal tungsten bronze-type solid solutions existence range 09 p1740 A70-22983

Phase diagram of rapidly crystallized Al-Cu-Mn alloys, observing ternary solid solutions formation during high cooling rate of melt 09 p1709 A70-23786

Phase diagram of Ti-Ta-Cr system, plotting isothermal and polythermal sections by microstructural and X ray analysis 09 p1709 A70-23787

Phase diagram of Ti-Ta-V system, determining solubility of sigma Ta and V in alpha and beta Ti in solid solutions 09 p1709 A70-23788

Phase equilibrium diagram and heat resistance of Ti-Al-Nb alloys along radial section by thermal and microstructural analysis 09 p1709 A70-23789

Fuel cells phase equilibria between carbonate melt and Li, Na and K solid aluminate electrolytes, analyzing thermal and electrical conductances 10 p1830 A70-24458

Electrochemically optimal structure for Raney alloy catalysts based on molecular hydrogen polarization temperature, noting beta and gamma phases and particle size influence 10 p1831 A70-24468

Enthalpy-entropy, enthalpy-pressure and composition diagrams of fluorine-hydrogen system, noting possible applications to rocket propulsion systems 10 p1929 A70-25100

Ternary metastable phase diagram for W-Ti-B system at room temperature 10 p1905 A70-25226

Ni-Nb-O system state diagram by reduction equilibria and X ray analysis, discussing oxidation resistance based on metal surface protective layers makeup 12 p2253 A70-27158

Ternary phase diagrams and quaternary excess free energy prediction using binary data, applied to Pb-Sn-Zn, Ag-Pd-Cu and Pb-Sn-Cd-Bi systems 12 p2254 A70-27475

Cu-Fe-Ti ternary system via microscopic, X ray and thermal analyses, measuring microhardness, electrical resistivity and magnetometry 13 p2433 A70-28863

Soviet monograph on V and W alloys covering phase diagrams, mechanical, chemical and physical properties, compounds and chemical composition 14 p2595 A70-30627

Binary Co-In system thermal analysis, X ray diffraction and microscopy, discussing phase diagram 14 p2595 A70-30838

Be-Al-Ti system liquidus surfaces and invariant equilibria by chemical, thermal, X ray and microscopic methods, discussing phase diagrams 14 p2595 A70-30839

High temperature solid-solid reactions and solid-liquid or condensed phase-gas equilibria, using solar furnace 14 p2545 A70-30907

Ternary phase diagram of liquid epitaxially grown gallium arsenide antimonide, considering use as high quantum efficiency long wavelength photoemitter 15 p2782 A70-31758

Fe-Ni-P phase diagrams for high temperatures, providing phase equilibria data for Widmanstätten pattern in iron meteorites 15 p2762 A70-32391

Ti-Cu-Ag phase diagrams and liquidus surface structure, using metallographic, thermal and X ray techniques 16 p2931 A70-33221

Magnetic phase diagram of hydrated cesium-copper carbide at 1.625 Neel temperature in external magnetic fields, giving equation for spin flop field temperature dependence 16 p2961 A70-33688

Titanium base binary systems phase diagrams, describing component activity and compound phases heat of formation 17 p3114 A70-34379

Ti interaction with elements of periodic systems, considering binary system phase diagrams 17 p3115 A70-34384

Phase transformations and equilibrium diagram of titanium-oxygen alloys, using electron and optical metallography 17 p3119 A70-34413

Phase diagrams of high strength metastable Ti beta alloys, showing minimum quantity of alloying elements for solid solution retention 17 p3119 A70-34418

Cr-Ni system activities and phase boundaries determined by solid electrolyte technique 18 p3273 A70-36040

Ni-Al-Nb superalloy, determining temperature effect on phase relationships in Ni-rich portion of phase diagram 18 p3273 A70-36041

Isothermal phase equilibria in Ti rich ternary Ti-Al-Fe alloys, noting eutectoidal transformation 18 p3275 A70-36123

Polythermal phase equilibrium and heat resistance of Ti-rich Ti-Zr-Al alloys, noting creep and tensile tests 18 p3275 A70-36124

Cross sectional phase diagram of Nb-Ti-Mo-V, discussing continuous crystallization and composition dependent hardness and resistance 18 p3275 A70-36125

Electron microscopic investigation of alpha-epsilon phase transformations in Co-Ni alloys above and under phase equilibrium temperature 18 p3276 A70-36205

Interferometric holograms of vibrating body via numerical analysis of oscillations amplitude and phases 18 p3258 A70-36303

Nb-Sn superconductors multiphase structure with three intermetallic phase, constructing diagram based on phase stability and composition 18 p3299 A70-37221

Phase equilibrium of Fe-rich Fe-Al alloys using single crystal X ray diffraction 19 p3452 A70-37838

Mo-Si system phase diagram by X ray, microstructural and thermal differential analyses, identifying eutectic, peritectic and eutectoid equilibria 20 p3649 A70-39773

Ni-Nb-Mo, Ni-Nb and Ni-Mo alloys phase equilibrium 21 p3840 A70-41898

Cd-Se and Cd-Te systems phase diagrams based on regular solutions theory, discussing molecular interaction energy dependence on composition 22 p4085 A70-42678

Phase relations in system Ag-Fe-S in 700-1200 C range at various vapor pressures by quenching and differential thermal analysis, observing liquid-immiscibility fields 22 p4053 A70-42732

Phase diagrams and nonvariant equilibria points of Ti-Si alloys subjected to prior annealing, determining phase transformations, decomposition and other properties as function of temperature 22 p4057 A70-43350

Thermodynamics and statistical physics of dense plasma with particle interaction energy exceeding kinetic energy, discussing three-component model phase equilibrium 23 p4229 A70-45073

Ni-Nb-W and Ni-W alloys phase equilibrium, obtaining diagrams from analysis of liquid and solid phases separated electromagnetically before tempering 24 p4359 A70-45372

Phase equilibria, hardness and electroresistivity of Ti-Al-V alloys at solid compound section for reinforced metal composites 24 p4361 A70-45831

Phase regions and lattice parameters of isothermal section of Mo-Zr-Cr system at 1100 C from microstructural and X ray analyses 24 p4361 A70-45832

Al-Zn-Mg alloy prolonged aging behavior, examining Gp and intermediate zones, equilibrium phases, maximum strength and serrated stress strain curve 24 p4362 A70-46189

Fe-Ni-Mn ternary martensitic alloy, discussing metastable miscibility gap island existence in bcc phase 24 p4363 A70-46193

PHASE ERROR

Rapid fading intensity distribution formula for analysis of aperture phase and amplitude errors influence on antenna arrays directional characteristics 03 p0456 A70-13463

Statistical characteristics of field of linear antenna with square phase characteristics, deriving formulas for presence of amplitude phase errors 05 p0820 A70-16255

Radar coherent linear FM microwave generation with 14 microsecond pulse length and 1000 MHz bandwidth, discussing phase error and coherency 07 p1236 A70-20064

Large-base radio interferometer with separate heterodyne receivers and electrical length automatic control, studying causes of phase errors 09 p1650 A70-23631

Line source antenna arrays containing random dissimilarities in waveguide cross section analyzed for phase errors to determine sidelobe deterioration 11 p2018 A70-26177

Stationary phase error variance for second order phase locked loop for low signal to noise ratios 13 p2383 A70-29590

Phase errors of hydraulic input impedance of arterial bed due to proximal or distal pressure measurements 15 p2682 A70-31940

Asymmetric phase error in antenna circular apertures, emphasizing beam squint resulting from distortion of paraboloidal reflector 16 p2859 A70-32942

Amplitude distribution selection in antenna aperture in presence of phase amplitude errors from relation between sidelobe level probabilistic and phase amplitude errors characteristics 16 p2873 A70-33241

Experimental model for random phase errors caused by surface irregularities in paraboloid reflector antennas 19 p3388 A70-37927

Synthetic aperture terrain-imaging radar systems, calculating tropospheric turbulence induced phase errors for comparison with microwave propagation experiment 22 p3991 A70-43579

Microwave transmission over elevated line-of-sight path, measuring phase front distortion between pairs of paths 22 p3991 A70-43580

Resolution limits and corresponding linear antenna apertures in presence of propagation phase errors, considering pattern angle 22 p3991 A70-43581

Phase and tracking errors due to mutual scattering in phase monopulse phase-scanned antenna 24 p4315 A70-46135

PHASE LOCK DEMODULATORS

Threshold extension techniques using impulse noise detection and elimination implemented at phase lock loop demodulator output 08 p1460 A70-20811

Delta modulation threshold extension technique for phase lock loop FM demodulator 15 p2703 A70-32559

Phase lock loop acquisition and tracking of carrier frequency modulated by single sinusoid, obtaining parameter values through mathematical model and digital simulation 15 p2703 A70-32578

Angle modulated carrier acquisition and demodulation, developing baseband model for behavior of output signal from phase lock loop 16 p2864 A70-33481

Threshold extension capabilities of phase lock loop and FM feedback demodulators, calculating output SNR for broadband systems 18 p3229 A70-36784

Recursive differential equation for moments of time-to-cycle slip in first and second order phase lock loops 21 p3802 A70-41350

Coherent receiver as hybrid carrier tracking loop consisting of standard phase locked and modified Costas loop 21 p3802 A70-41351

PHASE LOCKED SYSTEMS

AFC by digital phase lock loop consisting of zone error detector with phase quantizing circuit and discrete frequency regulator with reversible counter 02 p0258 A70-12542

Phase lock loop circuit for spacecraft communication noise filtration, describing linear study of first-order loops 03 p0448 A70-13537

GaAs microwave diode Gunn oscillator subharmonically injection phase locked at low frequency ratios 03 p0459 A70-14041

Minimum time frequency transitions in phase locked loops with phase and frequency controls using Pontryagin principle, obtaining switchless control strategies 04 p0652 A70-15339

Microelectronic L-band phase-lock loop receiver for data transmission between earth stations and satellites 06 p1017 A70-17338

Optimum signals for phase locked or delay locked loops determined as function of signal to noise ratio 06 p1023 A70-17523

Phase locked loop method for waveshaping rectangular wave frequency modulation signals in phase coherent VLF-FSK systems, reducing transient effects and adjacent channel interference 08 p1459 A70-20803

SHF avalanche transit time oscillator with FM noise reduction by injection phase locking 08 p1462 A70-21594

Tunnel diode parametric phase locked oscillators as memory elements, considering optimum subharmonic pumping frequencies determination 08 p1477 A70-21642

Laser frequency measurement and active and passive stabilization techniques, emphasizing HCN laser phase locking to frequency standard output 09 p1697 A70-22951

Atmospheric phase jitter for He-Ne locked laser measured by retroreflector for half mile round trip 09 p1699 A70-23539

Digital sampled-data loop of phase lock control containing digital zone error detector and digital frequency regulator with reversible counter as memory unit 10 p1833 A70-24085

Digital controlled phase-locked loop in burst mode operation, comparing recovery characteristics with carrier and bit-timing recovery techniques based on statistical analysis 10 p1835 A70-24333

Nomograms simplifying noise and natural loop bandwidths calculation for phase locked loop receiver, determining limiter suppression factor 10 p1844 A70-25244

Absolute frequency wideband high resolution determination, using frequency synthesizer as phase locked loop local oscillator 10 p1854 A70-25316

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator 11 p1996 A70-25349

Nonlinear phase locked loops compared with linear loops in communication and navigation, considering interference vulnerability 12 p2187 A70-27909

HCN laser 890 GHz line phase locked to multiplied standard frequency with wide bandwidth loop, narrowing line widths 13 p2426 A70-28798

HCN laser far IR line phase locked to absolute frequency standard 13 p2426 A70-28810

Carrier synchronization system for PSK signals, using direct regenerative repeater and phase locked loop/DR-PLL/ 15 p2697 A70-31826

Phase locked loop damping characteristics optimization based on input rms error rate minimization and transient error integral square value limitation 15 p2704 A70-32604

CW argon lasers simultaneous mode selection and phase locking by electro-optic KDDP crystals 15 p2753 A70-32610

Model probability distribution for hybrid phase locked loop derived by Fokker-Planck techniques, providing superior performance for all SNR 16 p2882 A70-33038

Cycle slipping rate in first order phase locked loop, extending Viterbi analysis 16 p2865 A70-34058

Gas laser phase locking due to loss modulation with double mode spacing 17 p3107 A70-35474

Internally loss modulated multimode ring gas laser, showing pulse peak intensity with detuning for phase locking 17 p3107 A70-35475

Phase locked automatic frequency control system, estimating duration of stabilization by theory Markov processes 18 p3228 A70-36625

Fundamental microwave oscillator subharmonic phase locking for stable power, comparing with varactor frequency multipliers 19 p3386 A70-37689

Optimum stabilized variable frequency multiple input phase locked oscillator in mutually synchronized systems 19 p3389 A70-37969

Injection locked bilateral microwave oscillators, deriving criterion for preventing reverse locking 20 p3597 A70-39470

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator 20 p3589 A70-40461

Digital bit synchronization phase locked loop steady state and transient performance in white Gaussian noise 21 p3802 A70-41352

Dynamic noise performance equivalence of phase locked or double superheterodyne tracking loops, using noise free external generator 21 p3793 A70-42180

Transient behavior of first order phase locked loop in presence of noise, solving Fokker-Planck equation for loop dynamics by numerical integration 21 p3802 A70-42181

Phase locked solid state laser with picosecond pulses applied to high speed cinematography [SMPTE PREPRINT 22] 22 p4034 A70-43051

Phase locked AFC circuit, calculating internal harmonic noise reduction by proportionately integrating filter 23 p4161 A70-43960

High stability phase locked Gunn microwave oscillator with internal crystal reference, discussing applications as signal generator, low noise Doppler radar sources, etc 23 p4172 A70-44013

Microelectronic phase lock microwave receiver packaging, discussing subassemblies interconnection minimization, shielding, RF interference, low loss and testing problems 23 p4164 A70-44536

Metal sheets thickness measurement and monitoring by through-transmission eddy current nondestructive testing, using phase locked amplifier 24 p4344 A70-45699

PHASE MODULATION

NT FM/PM [MODULATION]

NT PHASE SHIFT KEYING

Zero crossings of signal harmonic function with normal phase distribution, deriving relations with spectrum and modulating process parameters 03 p0447 A70-13289

Spectrum parameters analysis of signal in form of radio pulses sequence with harmonic angular modulation 03 p0448 A70-13511

PCM signal transmission testing over radio links with two level phase modulation 03 p0452 A70-14282

Half octave bandwidth traveling wave X band optical phase modulator, noting multiple interactions of optical and microwave fields in electro-optical crystal 06 p1079 A70-17192

Two cavity mode locking of He-Ne laser using electro-optic phase modulator 06 p1083 A70-17947

Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses 07 p1227 A70-18763

Equivalent scheme for tunnel diode oscillator operating mode and parameters effect on LF modulating signal phase correlations 07 p1241 A70-19287

Phase and amplitude modulated signals transmission over band limited channel disturbed by additive white Gaussian noise 07 p1237 A70-20195

Millimeter guided wave communication systems information transmission capacity increase, using quaternary and higher order modulation techniques 08 p1462 A70-21506

Correlation function of oscillation modulated in amplitude, phase and frequency by random processes causing spectral density maximum shift away from carrier frequency 09 p1633 A70-22409

Pulse train transition in Nd-YAG and He-Ne lasers mode-locked by intracavity phase modulator 09 p1697 A70-22919

Digital satellite communication system using multiphase modulation optimized for phase positions number to maximize transmission capacity 10 p1835 A70-24334

Digital transmission techniques optimal utilization of assigned frequency spectrum for phase modulation of frequency carriers 10 p1839 A70-24365

Circuitry for phase modulated synchronized electronic oscillators for measuring minor reactance changes during remote sensing 11 p2052 A70-26373

Biased measurement of angular coordinates of phase modulated signals under meter input quantization 11 p2012 A70-26806

Phased array radar for automatic random search using pseudorandom sequences to generate random phase characteristics of currents together with suitable gating 12 p2183 A70-26984

Transient processes in n-stage aperiodic amplifier during instantaneous change in phase and amplitude of emf at input 12 p2195 A70-27536

Amplitude and phase fluctuations in laser with non-linear absorption due to spontaneous emission, studying lasing instability near hysteresis threshold 12 p2248 A70-27548

Optical processing for measuring frequency spectrum of PM wave induced by turbulent medium in laser beam 12 p2249 A70-27756

Phase modulated laser light beam statistical analysis, using Michelson interferometer with piezoelectric crystal driven mirror connected to Gaussian random noise generator 12 p2249 A70-27877

Radar transmitter waveforms for multifunction operation, emphasizing phase and frequency modulation for CW radars 12 p2188 A70-27939

High speed linear phase and amplitude modulation of X band Gunn oscillators 12 p2199 A70-28016

Output correlation function of nonlinearity-filter system and phase modulated oscillations influence on system 13 p2366 A70-29411

Amplitude and phase modulation of laser beams by tetragonal crystal cuts 13 p2429 A70-29533

Quasi-optimal sequential detection of phase modulated signal of varying frequency on white noise background, using Markov theory 13 p2369 A70-29732

Thermally self induced laser beam phase modulation resulting in far field aberrational rings, describing structure and profile 13 p2431 A70-29834

Modulation phase distribution over emitting surface of p-n junction GaAs laser at micron wavelength 13 p2431 A70-29866

Phase modulated optical range finder with RF coaxial delay line 13 p2412 A70-29872

Frequency conversion during multiple phase modulation of supply voltage by pulse width technique 14 p2548 A70-30372

Hard limiting bandpass limiter output signal to noise ratio in PM signal detection calculated using probability density function 14 p2552 A70-31194

Phase modulated holography for inherent noise reduction using thicker recording media, increasing signal beamwidth or beam ratio 16 p2904 A70-33137

Optical spatial phase modulator array using membrane light modulator for coherent optical processing and character recognition 16 p2904 A70-33147

Holographic stereo model, comparing stereoscopic perception of phase and amplitude to model consisting of overlapping photos 16 p2908 A70-33228

Self phase modulation of stimulated Raman light in carbon disulfide, discussing Stokes and anti-Stokes spectrum regions 18 p2366 A70-36422

Noise rejection characteristics of ionospheric radioesondes via phase-code modulated signals, noting nonoptimal filter role in power loss 18 p3229 A70-37042

Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses 18 p3229 A70-37107

Cosmic ray anisotropy sidereal-diurnal effects isolation by solving simultaneous amplitude and phase modulation problem 20 p3696 A70-39282

Active filter operation, examining angle modulated signal at input by various approximation methods 22 p3997 A70-43130

Crosstalk error in binary phase modulated communications systems due to RFI and thermal noise 23 p4158 A70-43752

Power spectrum of digital signals pulse modulated with random sequences, discussing phase modulation and z transform techniques 24 p4315 A70-46151

PHASE SHIFT

Matrix method applied to achromatic linear phase plates design for polychromatic Ar lasers half wave phase shift 01 p0113 A70-10988

Phase fluctuations measurements of obliquely incident signal reflected from ionosphere performed over distance of 1300 km, showing amplitude dependence

01 p0046 A70-11533

Quadruple microwave probe applied to phase and attenuation variations measurements of HF wave propagating through dielectric media

02 p0345 A70-11898

Dispersive Doppler shift and Faraday rotation second order theory for curved earth-ionosphere geometry, calculating phase path differences

02 p0260 A70-12574

Spectral polarization characteristics phase variations used for classifying lunar surface features

03 p0565 A70-13234

O-C diagrams of RR Lyrae variables in M5, considering representation by parabolas or intersecting straight lines

03 p0567 A70-13321

Reduced multiport equivalent scattering parameters derivation by matrix method, determining load reflection coefficients effect on signal attenuation and phase shift

03 p0458 A70-14038

Holographic technique for transferring phase perturbation of subject waves onto spherical waves focusable through aperture and examinable by interferometric and schlieren methods

04 p0691 A70-15034

VLF phase disturbances and HF absorption during solar proton events of 28 August and 2 September 1966 related to proton intensities, energies and cut-off latitudes

04 p0741 A70-15124

Phase and amplitude level of plane light wave propagation in medium with randomly discontinuous refractive index, discussing wave phase dependence on dielectric constant

04 p0650 A70-15288

Lunar tides in midday critical frequency of F2 layer, determining phase reversal location

04 p0651 A70-15309

Diurnal cosmic ray intensity variations first and second harmonics amplitudes during sudden phase variations diagrammed from neutron monitor data during IGY

05 p0898 A70-15936

Electromagnetic wave phase characteristics after free space passage through statistical medium with wave disturbance producing density and ionization

05 p0815 A70-16735

Leading edge phase shift of output pulse from threshold-type pulse shaping circuit determined as function of triggering threshold

06 p1009 A70-17675

Acoustic impedance method for nondestructive testing exploiting phase defect of signal from piezoelectric transducer

06 p1074 A70-18629

Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves

07 p1276 A70-20422

Phase shift effect on astatic gyro axis drift and stability during periodic perturbations, describing motion by nonlinear differential equations

08 p1493 A70-20489

Spectral polarization characteristics phase variations used for classifying lunar surface features

08 p1580 A70-21667

CH, CD and CH ion excited states decay rates determined from phase shift and frequency data, discussing implications for astrophysics

09 p1731 A70-22513

Rectangular waveguides filled with magnetized ferrite with/without dielectric, calculating phase shift and attenuation by Ritz method

09 p1645 A70-22548

Tape recorder performance characteristics relevant to signal types handled, considering phase response and envelope delay

09 p1679 A70-22975

Materials permittivity measurement at millimeter and submillimeter wavelengths based on phase shift or sample optical thickness

09 p1684 A70-23648

Prolonged hypodynamia effect on human cardiac cycle phases using poly- and kinetocardiographic data

10 p1814 A70-24672

SID observed as VLF phase anomalies correlated with solar microwave radio bursts

10 p1933 A70-24816

Microwave phase shifter with rectangular ferrimagnetic toroid in waveguide longitudinal center, discussing impedance matching, phased array applications, etc

10 p1852 A70-24891

Microwave phase shift measurement errors caused by reflections from interference systems elements

10 p1853 A70-25130

Thermal diffusivity of opaque materials by phase shift method, using modulated radiation beam from carbon arc to heat material

11 p2068 A70-25767

Quantum mechanical inverse problem of elastic scattering theory, discussing Hylleraas solution for determining potential energy function from phase shift

12 p2274 A70-26899

Remote sensing of lunar photometric function at small phase angles by Apollo 8 command service module

12 p2297 A70-26926

Phase characteristics of nonperiodic slow EM wave delay structures determined by phase shift measurements

12 p2230 A70-26967

Nonlinear phase shift equation derived from TWT single carrier performance, predicting multicarrier performance of communications satellites

12 p2195 A70-27248

Ionospheric electron content calculations based on satellite measurements of Faraday rotation and phase path length variations

12 p2294 A70-27739

Circular loop antenna with traveling wave current distribution, considering phase change effects on radiation pattern and gain

12 p2198 A70-27965

Radiation patterns of phased array scanning antenna using digital phase shifter, reducing peak sidelobe level

13 p2380 A70-29785

Phase angle gauge measurement of meteor shower radiants, using radar observations of signal scattering in meteor trails

14 p2582 A70-30314

Digital filter facilitating biological data analysis through zero or linear phase shift filtering without distorting time relationship in data

14 p2542 A70-30796

Balloon localization with transponder system, measuring payload distance by phase difference in ground transmitted and received CW signal

14 p2588 A70-31308

Phase shift ultrasonic flowmeter measuring transit time between oppositely propagating waves in blood vessels

15 p2691 A70-31921

Prolonged upper ionospheric observations from Sputnik 3, Transit 4A and Explorer 22 signals Faraday fading and phase shifts, showing electron content dependence on solar activity

15 p2731 A70-32093

Air cell optical phase shifter for holography based on refractive index variation with air pressure

15 p2741 A70-32439

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction

15 p2802 A70-32483

Vector valued Gaussian random processes with Gaussian measurement noise, estimating phase and time delay parameters by maximum likelihood theory

15 p2704 A70-32593

Annular lasers energy, polarization, radiation loss and frequency characteristics dependence on phase shift due to anisotropic plate introduction

15 p2753 A70-32860

Phase stability measurements at 2695 MHz with radio link interferometer, discussing atmospheric water content effect

16 p2861 A70-32959

Optimum carrier phase delay estimation for one way ranging aircraft navigation, investigating receiver signal processing

16 p2947 A70-33449

Cycle slipping rate in first order phase locked loop, extending Viterbi analysis

16 p2865 A70-34058

Sound wave phase fluctuations from ultrasonic waves traveling through turbulent wakes of circular cylinders and plates, using multichannel pulse height analysis

16 p2839 A70-34086

Ionospheric scatter communications channel phase frequency characteristics measuring method, considering probability density function

18 p3256 A70-36091

Incompressible fluid flow past array of arbitrary profiles vibrating with arbitrary phase shift, taking into account blade displacement and vortex wake effect

18 p3206 A70-36277

Amplitude and phase fluctuations of opposing waves in ring laser with allowance for waves coupling due to backscattering

18 p3267 A70-36618

Phase delay of solid earth tide, minimizing ocean and atmosphere loading by strain seismograph measurement

18 p3255 A70-37077

Bounded electromagnetic wave propagation in randomly inhomogeneous medium, calculating correlation in amplitude and phase fluctuations

19 p3375 A70-37282

Phase shift direct and balance measurement procedures between signals over wide frequency range classified by conversion schemes

19 p3391 A70-38702

Meteor trails angular coordinates, using phase difference in pairs of spaced antennas with unequal base lengths

19 p3433 A70-38789

Mutual synchronization of oscillators at multiple frequencies, analyzing effect of tuning on frequency and phase

20 p3597 A70-39252

Transistor amplifier with back coupled emitter and parallel inductive correction, calculating optimal frequency and phase characteristics under complex load

20 p3598 A70-39790

SHF and EHF waves simultaneous propagation over slant line-of-sight overwater path, comparing phase variations and fading for signal coherence

20 p3588 A70-40301

Strip array excitation by field with large phase shift per period, deriving approximate solution from averaged boundary conditions

21 p3784 A70-40627

Electromagnetic field amplitude and phase scattering diagrams analysis for shape information capacity

21 p3785 A70-40637

Convergent numerical method for principal value integrals in dispersion relations of coupled channel scattering problem involving wave phase shifts

22 p4062 A70-42748

Amplitude and phase frequency characteristics of open and closed multiloop nonlinear automatic control systems by graphical methods

22 p4000 A70-42830

Coherent radar backscatter, calculating autocorrelation and power spectrum of spuri noise from periodic random phase injections for filter design to eliminate noise

22 p3992 A70-43591

S band tunable free running high Q triode oscillator phase and frequency instability measurement based on delay lines applications

23 p4170 A70-43796

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction

23 p4240 A70-43907

Millimeter band electromagnetic scattering from weakly doped GaAs, calculating reflection coefficient and phase angle

23 p4229 A70-43926

D region LF and VLF sky waves opposite phase perturbation behavior

23 p4162 A70-44006

Varian HA-100 spectrometer eliminating phase change by compensation network in synchronous audio detector reference signals

23 p4199 A70-44949

X band horn antennas precision phase center measurement technique for high resolution system applications

23 p4176 A70-44966

Holographic interferometry of phase object by double exposure method, showing no effect of photographic emulsion compression on order of interference

24 p4334 A70-45368

PHASE SHIFT CIRCUITS

NT CIRCULATORS (PHASE SHIFT CIRCUITS)

Ferrite-type phase shifter production by microstrip technique and integrated microwave system use in Gunn element Doppler radar

01 p0052 A70-11290

Diagram compression by spatiotemporal coding of antenna array fitted with phase shifters

05 p0811 A70-15989

Transversal filters with continuously tapped delay lines, emphasizing synthesis of low pass filter and phase shifter

05 p0822 A70-16652

Radiation patterns of scanning antenna using digital phase shifters to obtain suitable phase distribution to move sidelobes into invisible region

05 p0822 A70-16676

Polarization insensitive phase shifter for phased array antennas, discussing limitations, design optimization and experimental results

06 p1019 A70-17508

Controllable microwave phase shift varactor diode circuit parameters design optimization using digital computer for transmittance matrix coefficients calculation

08 p1474 A70-21230

Slot transmission line applicability to miniature ferrite phase shifter design exploiting elliptically polarized H field existence

08 p1475 A70-21283

Phase interpolation circuits for scanning phased array antennas, using doublers and frequency multipliers

09 p1646 A70-22701

Single bit latching reciprocal ferrite phase shifter design, operation and performance, noting linear phase response and low phase nonreciprocity

10 p1853 A70-25243

C band radar antenna with pencil beam steered in plane by ferrite phase shifters 16 p2875 A70-33394

Artificial pilot phased array /APPA/ for use as multiple narrow beam communication satellite, obtaining beam steering from phase shifter setting 16 p2983 A70-34070

Low pass linear phase active feedback circuit synthesis using distributed RC networks to realize flat magnitude response 19 p3392 A70-37707

Ferrite phase shifter for array antennas, discussing design trends, production, performance characteristics and future developments 19 p3388 A70-37864

Interference-polarization light filter, calculating phase shifter errors effects on transmittance by Poincare sphere method 22 p4072 A70-42505

PHASE SHIFT KEYING

Binary decoding extension to achieve unquantized demodulation performance for nonfading phase shift keyed coherent channel with white Gaussian noise 06 p1008 A70-17525

Random synchronization errors in PN and PSK systems reduce input signal power and introduce additional self noise 07 p1236 A70-20069

PSK demodulation by optimal carrier and bit synchronization methods based on nonlinear filter theory, relating error probability to signal to noise ratios 08 p1458 A70-20795

Error probability upper and lower bounds determined for self synchronized binary PSK communications systems, presenting maximum-likelihood and Monte Carlo computer simulation 08 p1463 A70-21777

Communication satellite PSK modulator-demodulator /modem/ implementation requirements and design for optimal performance 10 p1835 A70-24336

Carrier recovery circuits synchronization for PSK demodulators used in TDMA satellite communication 10 p1835 A70-24338

PSK distortion spectra generated in satellite transponders by interactions of FDMA PSK modulated carriers, developing computer programs for multichannel FDMA PSK modulated systems 10 p1839 A70-24364

Pseudonoise phase shift keying /PN/PSK/ and frequency hopping /PN/FH/ modulation technique for low altitude satellite receiving /VHF/ transmissions [AIAA PAPER 70-496] 11 p1999 A70-25436

Power spectral density and autocorrelation functions of sinusoidal carrier amplitude modulated by split phase PCM and PSK 11 p2008 A70-26203

Performance characteristics of quadriphase PSK communication system with noisy reference signal, formulating error probability 12 p2187 A70-27907

Analog data transmission over PCM telemetry link, comparing noncoherent FSK vs PSK reception performance for waveform error 14 p2552 A70-31187

Carrier synchronization system for PSK signals, using direct regenerative repeater and phase locked loop /DR-PLL/ 15 p2697 A70-31826

Communication satellite UHF link with FSK or PSK modulation, considering coded digital transmissions 16 p2867 A70-34331

PHASE SWITCHING INTERFEROMETERS

Phase switching method application to radio telescopic observations showing increase in reliability of radio source coordinates determination 07 p1240 A70-18909

Glass formation region of chalcogenide semiconductor arsenic triselenide-antimony triselenide system and vitreous-crystalline transformation, investigating electrical and optical properties 01 p0153 A70-10085

Shock wave structure in two phase media with temperature and velocity gradients and possible phase transitions 01 p0060 A70-10147

Second phase formation in Czochralski grown Cr-doped GaAs crystals by metallography, radioactive indicators and X ray analysis 01 p0156 A70-10189

Tungsten effect on phase transformations and carbide reactions to attain equilibrium at 850 C in Ni-base superalloys 01 p0118 A70-10727

Phase changes in Ni/Ti alloys with equiatomic composition, resolving discrepancy on nonMartensitic eutectoidal decomposition of B2 structure and intermediate precipitate 01 p0121 A70-11232

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe as function of cooling rate, using X ray analysis 01 p0124 A70-11590

Ti-Mn alloy quenched in brine and aged at high temperature studied for structural transformations using electron microscope 01 p0125 A70-11640

Phase equilibria in Mn-S, Mn-Se and MnS-MnSe systems by X ray diffraction after preparation by annealing 02 p0249 A70-11652

Acoustic emission analysis for material evaluation and polymorphic phase transformations characterization for metals and alloys, discussing electronic instrumentation and experimental techniques 02 p0276 A70-12551

Interstitial atoms ordering effects on low and high temperature phase transformations in alloys with bcc lattice 03 p0505 A70-13102

Two phase theory of ordered to disordered state transition in ternary alloys with fcc lattice, constructing phase diagrams 03 p0505 A70-13103

Strain hardening on single crystals of aging Ni-based alloys with ordered separated phase 03 p0505 A70-13104

Austenitic fcc Cr-Mn-N stainless steels ductile-to-brittle transition behavior noting role of deformation faulting 03 p0506 A70-13133

Phase alteration quenching effects in Ni-Mo alloys, discussing high temperature alpha region, isothermal annealing below peritectoid temperature and metastable nickel molybdenide phase 03 p0508 A70-13143

Ni-Nb intermetallic compound precipitation effect on various phase formations in strained samples of Alloy 718 /wrought Ni base alloy/ 03 p0511 A70-13568

Al and Ti single additions effects on recrystallization of Ni-Cr alloys, noting phase transformation and hardness variations 03 p0513 A70-14300

Extension characteristics of delta and sigma related phases in Mo-Ni ternary systems and evaluation of unit cell dimension variations on alloying 04 p0704 A70-14392

External optical phonon modes in ammonium and deuterammonium halides phase transitions as function of temperature, using IR and Raman spectra 04 p0646 A70-14695

Pressure-volume-temperature measurements on H, calculating fugacity coefficients 04 p0719 A70-15057

Niobium addition effect on alpha-gamma transformation temperature during continuous cooling of low carbon Ni-Cu steel 04 p0706 A70-15134

Ductile-brittle transition temperature relation with grain size in polycrystalline Mo as function of annealing temperature 05 p0862 A70-15907

Two phase transitions existence in Hubbard model of interacting electrons using one particle Green function solution 05 p0884 A70-16099

Dilatometric diagrams of phase transformations at low temperatures in Re steels, studying dilatation coefficient behavior 05 p0862 A70-16201

Sodium-titanium-boron-silicate glass opacity and fusibility increase during partial substitution of K for Na, noting phase composition changes 05 p0871 A70-16598

Structures formed during aging of martensite in maraging steels by X ray and chemical analyses using electrolytic isolation of phases 05 p0865 A70-16871

Thermal control of spacecraft via solid-liquid phase change materials [AIAA PAPER 70-12] 06 p1092 A70-18137

Internal friction and shear modulus of Co under dynamic and steady state conditions, discussing peak at alpha-epsilon transition 07 p1306 A70-19073

Multiphase fluid continuum model and hydrothermodynamic equations under phase transformations, including dimensionless and similarity parameters 07 p1254 A70-19085

Alloying elements effect on polymorphic alpha-beta transformation temperature of Ti systems, discussing heat resistance 07 p1307 A70-19555

Dynamic pearlite-austenite transformation and melt temperatures measured in laser-irradiated steel, discussing thermal response as function of heating rate 07 p1301 A70-19897

Molecular dipole moments-electric field interaction induction of cholesteric liquid crystal transition to nematic phase 07 p1225 A70-20053

Stefan problem involving mass transport and phase transformations, presenting solution algorithm 08 p1596 A70-20852

Elastic oscillations amplitude-dependent damping during phase transformations in two phase systems 08 p1556 A70-21121

Quadratic precipitate transformation into orthorhombic phase with conservation of maximal atomic density planes in Ni-Cr-Nb and Ni-Cr-Ta alloys during prolonged reheating 08 p1518 A70-21240

Irreversible phase transition analysis of atmospheric condensation-crystallization processes 08 p1538 A70-21427

Automatic cladding method for submerged arc stainless steel welding, discussing delta ferrite to sigma phase transformation for surfacing with low ferrite stainless steel 08 p1508 A70-21489

Martensitic transformations during quenching and tempering of maraging steels 08 p1520 A70-21495

Temperature dependence of microplastic yield and flow stress and transient creep responses of gamma prime phase 08 p1522 A70-21709

Temperature, transformation and strain rate effects on tensile ductility properties of stable and metastable compositions of austenitic stainless steels 08 p1524 A70-21956

Duplex Fe-Cr-Ni-Ti alloy sigma phase formation mechanism using electron microscope 08 p1525 A70-21958

Sigma and mu phase formations in Ni heat resistant alloys x ray analysis using phase isolation by anodic dissolution 09 p1700 A70-22079

Work strengthening and microstructure of Co-Ni base alloys containing Cr and Mo, discussing deformation induced martensitic transformation 09 p1705 A70-22806

Gamma prime phase structure ordering effect on critical shear stresses of aging Ni-Al alloys and nimonic 09 p1707 A70-23195

Isomorphous beta type Ti-Mo alloy omega phase transformations and morphology by electron microscopy, relating hardness to aging 10 p1902 A70-23817

Transformation kinetics of Ti alloy under isothermal conditions in solution treatment as function of temperature 10 p1903 A70-24025

Elastic stress-strain states in spherical reservoir and thick walled tube during nuclear radiation induced phase transformations 10 p1894 A70-24513

Phase equilibria and maximum melting compositions determinations for compound semiconductors by differential thermal analysis compared with vapor and high pressure techniques 11 p2098 A70-25812

Soviet monograph on intermetallic compounds with Laves phases, covering crystallographic and thermodynamic characteristics of Mg-Zn, Mg-Cu and Mg-Ni systems 12 p2252 A70-26885

Metal-semiconductor transition in magnetite described on band model with electrons breaking symmetry by ordering in self induced Coulomb potential 12 p2283 A70-27239

Low carbon Ni steels isothermal transformation characteristics, observing equiaxed ferrite and Widmanstatten and bainitic structures at various temperatures 12 p2256 A70-27615

Phase equilibria in quasi-ternary alloys by microstructural, thermographic and X ray analyses, showing continuous solid solutions formation in titanium-niobium-titanium aluminide 12 p2258 A70-28275

Phase transformations of molybdenum carbide under elevated temperature in vacuum, using X ray and differential thermographic analysis 13 p2433 A70-28852

Nickel chromite structural changes, thermal conductivity and dilatation during tetragonal-cubic transition, noting phonon-lattice effect 13 p2437 A70-28855

Nonaggressive liquid media effect on residual strains and phase transformations initiation and

PHASE TRANSFORMATIONS

development in polyurethane parts operating in lubricants, discussing wear resistance

13 p2439 A70-29431

Thick plate titanium alloy welds using filler wire to regulate chemical composition and plate phase constitution

13 p2435 A70-29456

Phase transformations in TiNi with equiatomic composition, using internal friction, electrical resistivity and dilatometry

13 p2435 A70-29499

Growth kinetics of strengthening phase during aging of Ni-Cr-W-Mo-Al-Ti alloys, considering gamma prime particles at different Al/Ti ratios

14 p1594 A70-30169

Cobalt surface X ray analysis after spark erosion treatment, revealing phase with high temperature stability

14 p2596 A70-30840

High temperature transformation of high speed steel low temper hardened in vacuum or atmosphere furnace

15 p2756 A70-31568

Niobium carbides formation in Nb containing steels during gamma-alpha transformation, establishing relationship between brittleness and carbide distribution characteristics

15 p2758 A70-32123

Austenite strength effect on austenite-martensite transformation in alloy steels, measuring resistance to plastic deformation

15 p2760 A70-32376

Austenitic stainless steel martensitic transformations, using transmission electron microscopy in conjunction with X ray and magnetization methods

15 p2761 A70-32379

Martensite-to-austenite reverse transformation in Fe-Ni-Co alloys, using dilatometry and coercive force measurements

15 p2761 A70-32386

Uniform bulk magnetization concept in superparamagnets related to physical statistics of magnetic first order phase transitions

15 p2785 A70-32400

Phase transformations in beta isomorphous Ti alloys, discussing effects on omega and alpha phases during quenching and aging and on martensite under stress

15 p2763 A70-32807

Beta phase decomposition kinetics and strain hardening inhibitions in Ti-base Mo alloys, using metallographic, dilatometric and X ray analyses

15 p2764 A70-32855

Circular free boundary problem associated with phase transformation by first order perturbation solution, discussing radial solidification and melting of fluid over cylindrical rod

16 p2941 A70-33003

Water structure role in membrane systems, considering phase transitions and thermal anomalies in surface properties

16 p2847 A70-33027

Preprecipitation and reversion stages in Ni-Co-Mo steel, observing dislocation nucleated phase growth initiation by aging

16 p2929 A70-33047

Massive eutectic and fine gamma phases precipitation in cast nimonic 100 alloy at 900 C aging

16 p2930 A70-33083

Beta transition mechanism dynamic mechanical properties in bisphenol-A based epoxy resins prepared with different curatives

16 p2856 A70-33500

Maraging nickel steel martensitic transformation temperature reduction after interruption by nonisothermal or isothermal tempering below 460 C

16 p2932 A70-33850

Constant grain size cast Mo ductile-brittle transition temperature dependence on annealing temperature using tensile test

16 p2933 A70-34274

Metallographic observations on slow crack growth in Be monocrystals suggesting explanation for transition regions

16 p2933 A70-34275

Chemical and structural microinhomogeneity, diffusion and mechanical properties of Ti alloys in connection with phase transformation characteristics

17 p3112 A70-34354

Heating effect above beta transus at intermediate and final stages of processing on Ti alloys properties

17 p3097 A70-34359

Ti-Al alloy crystallographic structure, observing hexagonality for alpha phase

17 p3114 A70-34377

Thermodynamic properties of bcc beta phase in Ti-Cu and Ti-Al systems, discussing activities determination technique

17 p3114 A70-34378

Oxidized alpha Ti crystals strain analysis based on X ray divergent beam, discussing hardening effects

17 p3115 A70-34387

Single phase alpha Ti alloy welds breaking strength, discussing delayed failure and cold cracking with various oxygen and hydrogen contents

17 p3117 A70-34399

Temperature cycling through phase transformation effects on plastic deformation of Ti and Ti-Al-V alloy under torsion and tension

17 p3117 A70-34400

Ti alloys martensitic transformations, metastable beta-phase decomposition and alpha-phase ordering

17 p3118 A70-34403

Martensitic transformation in Ti and Ti alloys, discussing shear systems influence

17 p3118 A70-34404

Twinned hexagonal martensites crystallography in Ti alloys, discussing alpha-beta and beta-fcc transformations

17 p3118 A70-34405

Cooling rate effect on beta phase transformation temperature in Ti-Nb and Ti-Al alloys

17 p3118 A70-34406

Ti alloys M sub s and beta sub s points thermodynamics, considering initiation of bcc-cph martensitic transformation

17 p3193 A70-34407

Ti binary alloys beta phase continuous cooling transformation, investigating additives effects

17 p3118 A70-34408

Metastable Ti alloys beta-omega-alpha decomposition and Ti-8Al alpha-ordered alpha transformation, using automatic measuring apparatus

17 p3118 A70-34409

Martensite transformations and cellular phase separation in Ti-Cu alloys, using electron microscopy

17 p3119 A70-34412

Phase transformations and equilibrium diagram of titanium-oxygen alloys, using electron and optical metallography

17 p3119 A70-34413

Martensitic transformation effects on mechanical properties of beta quenched Ti binary alloys

17 p3119 A70-34414

Martensitic phase change effects in TiNi on ultrasound waves propagation in transition region, using pulse echo measurements

17 p3126 A70-35603

Epitaxial beta SiC film formation on SiC by reactive evaporation or sputtering at low temperature

17 p3144 A70-35906

Cobalt binary alloys allotropic transformation and thermal expansion at various temperatures

18 p3271 A70-35967

Kingfisher meteorite metal particles microstructures, discussing phase transformation during reheating by shock

18 p3310 A70-35970

Ni-Al-Nb superalloy, determining temperature effect on phase relationships in Ni-rich portion of phase diagram

18 p3273 A70-36041

Omega transformation in Hf-Nb alloys, investigating aging at various temperatures

18 p3273 A70-36044

Transformation induced plasticity (TRIP)/high strength steels resistance to hydrogen embrittlement

18 p3273 A70-36047

Soviet papers on phase transformations of Fe, Ni, Co and Al alloys

18 p3275 A70-36201

Fe-Co alloys critical points during rapid heating, determining alpha-gamma phase transformations onset from dilatometric curves

18 p3275 A70-36203

Fe-Ni alloy alpha-gamma phase transformation after heating, noting deformation planes and directions in martensite

18 p3275 A70-36204

Electron microscopic investigation of alpha-epsilon phase transformations in Co-Ni alloys above and under phase equilibrium temperature

18 p3276 A70-36205

Dilatometric investigation of Fe alloys phase transformations, determining magnetic field effects and Curie temperatures

18 p3276 A70-36206

Magnetometric, dilatometric, pyrometric and X ray studies of phase transformations in Fe-Ni alloys, considering magnetic characteristics and formation of superstructures

18 p3276 A70-36207

Nb-based Ti-Zr alloy surface phase recrystallization characteristics, using field emission microscope

18 p3276 A70-36309

Interstellar gas thermal instability under cosmic ray heating, investigating perturbations causing transition to dense cool phase in pressure equilibrium with intercloud phase

18 p3309 A70-37003

Adiabatic microwave power meter design using sodium thiosulfate phase transformations

19 p3422 A70-37743

CdS conversion by cation exchange to single crystal CuS, examining phases structural relationship

19 p3486 A70-37766

Yield condition and Bauschinger effect in transition conditions for isotropic and orthotropic bodies

19 p3542 A70-38061

Solid-solid phase transitions in molecular crystals of organic tetrahedral substances, using differential scanning calorimetry

19 p3373 A70-38193

Ni-Cr heat resistant alloys structural transformation kinetics under aging, creep and operational conditions, discussing solid solution decomposition, hardening phases coagulation and dissolution, etc

20 p3645 A70-39037

Microstructure and phase distribution in maraging steels subjected to austenization and subsequent aging in reversible transformation temperature range

20 p3645 A70-39038

Heat treatment and alloying element influence on phase and structure transformations in Ti alloys, investigating mechanical properties and creep resistance

20 p3645 A70-39039

Beta Ti alloy decomposition study during aging by diffraction electron microscopy, forming finely dispersed coherent precipitates

20 p3645 A70-39041

Al-Zn-Mg alloys structural transformations by diffraction electron microscopy, investigating grain boundary and dislocation structure as function of heat treatment and chemical composition

20 p3646 A70-39044

Stressed cast Mg-Nd-Zr alloys structural transformations kinetics over temperature range by electron microscopy

20 p3646 A70-39046

Beta Ti-V-Cr-Al phase transformations below 500 C, discussing metastable phase, bcc formation and thermodynamics

20 p3646 A70-39106

Phonons and band structure role in metal-insulator phase transition, developing model of electron interactions with lattice vibrations

20 p3686 A70-39149

Ti binary alloys with V, Nb and Mo, determining phase boundaries by diffusion layers method and electron microscope analysis

20 p3649 A70-39727

RF spectral recombination lines from atomic level transitions, discussing populations, H lines, electron temperature, density and emission and formation

20 p3706 A70-39934

Heating conditions effect on microstructure, hardness, transformation temperatures and dimensional anisotropy of maraging steel

20 p3649 A70-39941

Mg-Al alloy beta phase precipitation, using metallography, hardness tests and electron microscopy

20 p3652 A70-40447

High temperature combined differential thermal analysis and spectrophotometric cell for phase transformation monitoring of evaporated thin film and bulk phthalocyanine

21 p3827 A70-41459

Earth upper mantle phase change instability, discussing temperature gradient, transformation influence on fluid, olivine-spinel phase flow patterns and tectonics

21 p3820 A70-41895

Zr-Nb alloys mechanical strength increase due to beta phase martensitic decomposition

21 p3840 A70-41897

Metastable beta Ti alloy as-quenched microstructure stability with respect to thin foils transformation during electrolytic polishing and bulk specimens during cold rolling

21 p3841 A70-42150

Octahedral solid-solid phase transitions by differential thermal analyzer and scanning calorimeter module, discussing entropy change causes

21 p3784 A70-42264

M phase thyristor amplifier operation, investigating state and transition equations by state variable methods

22 p3996 A70-42918

Ti phase transformation effects on thermal conductivity, electrical resistivity and spectral and total emissivities at 1100-1500 K

22 p4056 A70-43222

Phase diagrams and nonvariant equilibria points of Ti-Si alloys subjected to prior annealing, determining phase transformations, decomposition and other properties as function of temperature

22 p4057 A70-43350

Allotropic transformation points and linear thermal expansion coefficients of Co-base binary alloy terminal solutions, using dilatometric method

23 p4203 A70-43864

Nb-Ru equiatomic alloys reversible phase transformations, using electrical resistivity, hot stage optical metallography, X ray diffraction and magnetic susceptibility measurements

23 p4208 A70-44858

Austenitic formation by rapid heating of Ni maraging steel, noting microstructural characteristics relationship to martensite before phase transformation

24 p4356 A70-45144

Perovskite crystals phase transitions based on group theory, considering lattice vibration modes as instability source 24 p4389 A70-45206

Fe-Ni alloy plastic flow behavior during reversible austenite-martensite transformation under constant load 24 p4357 A70-45228

Zr-Nb alloys athermal omega transformation studied by transmission electron microscopy 24 p4358 A70-45234

Crystallography of martensite transformation on /225/ type planes of austenite in Fe-Mn-Cr-C alloy 24 p4358 A70-45237

Weak superstructure line patterns of ternary phases with TiFeSi and ordered iron phosphides by single crystal, Guinier powder and diffractometer techniques 24 p4359 A70-45249

Alpha phase Ti strengthening, investigating interaction between dislocations and interstitial solute atoms 24 p4360 A70-45516

Phase transitions in FeW doped strontium and barium oxides, using X ray diffraction and Mossbauer effect for transition temperature 24 p4390 A70-45605

Nonequilibrium solidification and metastable-stable phase transformation during heating of Al-Mo and Al-Cr alloys 24 p4360 A70-45829

Statistical characteristics of stability of single phase one component system under external force 24 p4381 A70-46144

Ti-Mo and Ti-Mn alloys omega transition phase, describing shape and crystallographic characteristics 24 p4361 A70-46178

High purity Cr-Ni heat resisting steels, investigating phase transformations with microhardness measurements magnetic analysis, X ray diffraction and microstructure examination 24 p4362 A70-46181

Spaak erosion or plasma jet treatment effects on Co surface structure, describing allotropic delta phase 24 p4364 A70-46221

Transition entropy during dissociation, investigating Trouton-Pictet rule applicability to diatomic molecules [DFVLR-SONDDYR-58] 24 p4430 A70-46412

PHASE VELOCITY

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency 01 p0149 A70-10163

Characteristic equation for phase velocity of surface wave propagating on helix for forbidden zone, suggesting current distribution function 05 p0815 A70-16775

Phase velocities of intrinsic normal waves of electron beam in three frequency parametric amplifier of space charge waves, determining optimal wave interaction conditions 05 p0823 A70-16890

NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity 05 p0917 A70-16906

Prestrain effect on waves propagation along slender low density unoriented polyethylene rod, indicating uniform phase velocity change over audio frequency range 07 p1248 A70-19237

Rayleigh and Love wave phase velocities for great circle paths from ordinary seismograms of World Wide Standard Seismographic Network /WWSSN/ stations 09 p1672 A70-23702

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency 10 p1925 A70-25011

Phase velocity and direction estimation of unknown signal propagating across two dimensional array in dispersive waveguide, showing dependence on SNR 11 p2018 A70-26274

Circular elastic helix phase velocities determined by internal constraints method, comparing results with other theories 11 p2085 A70-26557

Electron amplification and phase velocity of plane harmonic Rayleigh wave in gallium arsenide crystals under constant electric field 12 p2285 A70-27294

Turbulent flow phase velocity fluctuations measurement by hot-wire anemometers, obtaining cross-spectral density by Fourier analysis digital techniques 19 p3404 A70-38019

Electrostatic ion waves in uniform magnetic field, calculating phase and group velocities as function of propagation angle for comparison with dispersion measurements 20 p3678 A70-39659

Phase velocity and attenuation of shear waves in cases from sampled-CW ultrasonic crystal resonator reflection measurement 21 p3827 A70-41457

Acoustic surface waves phase velocity on lithium niobate with gold layer for propagation modes, predicting LF cut-off by substrate anisotropy 21 p3863 A70-42001

Dispersion equation for impedance elements periodic structures phase velocity calculation, discussing approximate solution methods 22 p3984 A70-42392

ELF and VLF waves in waveguide propagation mode, calculating lower ionosphere effect on attenuation and phase velocity 22 p3989 A70-42960

Interferometric investigation of rapidly varying frequency dependent phase objects, using ruby laser waves [SMPT PREPRINT 26] 22 p4034 A70-43049

Gravity waves produced in liquid electric conductor by piston subjected to sinusoidal pulsation, calculating magnetic field effect on amplitude and phase velocity 23 p4225 A70-44208

Phase and group velocity variations of LF transmission compared against crystal oscillator 23 p4163 A70-44228

Turbulent plasma without external magnetic field, observing low phase velocity ion wave mode 23 p4227 A70-44893

Microwave transmission in partially dielectric filled circular waveguide, deriving cutoff wavelength and phase velocity vs frequency 24 p4315 A70-46260

PHASE-SPACE INTEGRAL

Nonlinear differential equations solution behavior near zero point of phase space examined in material system perturbed motion 07 p1333 A70-18772

Phase space variations method proved not applicable to optimal control problems 08 p1479 A70-20856

Phase variable canonical form for time varying multivariable systems requiring less computational effort 08 p1463 A70-21645

Numerical solution of optimal control with dimensionality not exceeding phase space, using nonlinear programming and traveling wave method 10 p1911 A70-25185

Diffusion processes on multidimensional cylindrical phase space for studying stochastic processes for physical systems with angular measurements, developing model for satellite under torque 12 p2273 A70-28067

PHASED ARRAYS

Phased array antennas bandwidth and range resolution, discussing delay elements and antenna size affecting radiation patterns 01 p0042 A70-10262

Phase measuring scheme for large radio telescope array, describing constant-phase calibration signal production 02 p0269 A70-12583

Plane electromagnetic wave diffraction at periodic arrays obtained by direct summation of multiple reflection between arrays 03 p0442 A70-13095

Low loss low sidelobe N-way microwave optical power divider for single plane electronically steerable Ku band phased array antenna 04 p0655 A70-14624

Polarization insensitive phase shifter for phased array antennas, discussing limitations, design optimization and experimental results 06 p1019 A70-17508

Phased-array radars and parallel processing computers system in high target density environment, input-output, array steering and data storage and handling 07 p1236 A70-20150

Antenna arrays phase synthesis method based on properties of fast fluctuating phase distribution 09 p1645 A70-22414

Equivalent circuit for radiation admittance of infinite planar array of phased rectangular waveguide apertures 09 p1646 A70-22692

Phase interpolation circuits for scanning phased array antennas, using doublers and frequency multipliers 09 p1646 A70-22701

Periodic intensity fluctuations in pulsars from VHF phased array measurements 09 p1764 A70-23793

Phased array radar system synthesis, discussing small aperture systems, effects of solid state technology and role of data processing 10 p1842 A70-24877

Integrated circuit microwave phased array radar antenna systems for multiple frequency bands and multifunction operations to save cost and space 10 p1851 A70-24878

Hybrid microwave integrated circuits application to phased array and Data Relay Satellite System space transponder 10 p1851 A70-24879

Single bit latching reciprocal ferrite phase shifter design, operation and performance, noting linear phase response and low phase nonreciprocity 10 p1853 A70-25243

Air traffic control system using ground controlled satellite-borne phased array antenna to overcome UHF downlink path loss 11 p2077 A70-25421

[AIAA PAPER 70-497] 11 p2077 A70-25421

Spacecraft phased array antenna techniques, discussing tape helix radiators design for applications in navigation, TV broadcasting and data relay systems [AIAA PAPER 70-425] 11 p2015 A70-25452

S band communications repeater using retrodirective phased array on synchronous altitude data relay satellite /DRS/ for intersatellite and ground links [AIAA PAPER 70-424] 11 p2001 A70-25472

Phased array radar for automatic random search using pseudorandom sequences to generate random phase characteristics of currents together with suitable gating 12 p2183 A70-26984

Spacecraft high efficiency phased arrays with deployable helix radiating elements, considering gain and weight factors 12 p2197 A70-27930

Radiation patterns of phased array scanning antenna using digital phase shifter, reducing peak sidelobe level 13 p2380 A70-29785

Binary varactor diode microwave device, displaying two capacitance values in reverse bias operation for application in phased array systems and frequency control 14 p2556 A70-30919

Antenna research, discussing efficiency and design considerations in phased and strip line arrays and conical scan telemetry antennas 14 p2559 A70-31375

Phased array monopulse autotracking, radiointerferometer and Doppler frequency methods for radio tracking systems for artificial satellite orbits 15 p2697 A70-31836

High gain helix radiators for spacecraft phased arrays, measuring performance vs design parameters 15 p2678 A70-32600

Phased arrays, discussing ground based, shipboard and airborne research programs for military 16 p2863 A70-33264

Solid state phased array radar employing MIC modules in radiating elements, achieving reliability by redundancy 16 p2877 A70-33411

X band airborne antenna phased array, describing phase shifter, radiation pattern, associated computer, etc 16 p2864 A70-33454

Phased arrays universal figure of merit, including aperture efficiency, sidelobe level, scanning frequency and noise temperature 16 p2864 A70-33482

X band aircraft antennas selection and design for defense communications satellite systems, emphasizing steerable phased array 16 p2865 A70-33712

Artificial pilot phased array /APPA/ for use as multiple narrow beam communication satellite, obtaining beam steering from phase shifter setting 16 p2983 A70-34070

Gas tube isolator circuit for arcing amplifier in phased arrays, using programmed charge of capacitance bank during interpulse 16 p2879 A70-34072

Linear phased antenna arrays, calculating influence of interaction between radiating elements on radiation pattern 17 p3048 A70-35686

Transmit only solid state radar module built with microstrip techniques for phased array systems operating at L and S dual bands 17 p3056 A70-35899

S band CW power amplifier and varactor doubler module for airborne phased arrays 18 p3231 A70-36674

Directivity characteristics of planar antenna arrays with discrete identical elements and uniform phase progression 20 p3597 A70-39458

Scattering matrix for external coupling effects in dielectric covered phased array 23 p4160 A70-43766

Infinite periodic phased array over ground plane with dipole elements in parallelogram lattice, calculating driving impedance and gain loss due to mismatch 23 p4172 A70-44004

Phased array radar for missile defense, discussing development trends toward adaptive system logic control and microwave digital circuitry for signal processing 23 p4172 A70-44012

Linear phased arrays computer aided design, discussing search algorithms in multivariable optimization program 23 p4172 A70-44015

Phased array radar systems microwave circuit modules packaging techniques, discussing interconnections, assembly, hermetic sealing and leak testing 23 p4173 A70-44535

Radiation and phase-scanning properties of planar array of parallel plate waveguides, using wedge diffraction theory

23 p4166 A70-44973

PHASED LOCKED SYSTEMS

Stationary phase error variance for second order phase locked loop for low signal to noise ratios

13 p2383 A70-29590

PHASES

A priori initial phase distribution influence on optimal nonenergetic parameter estimation of rectangular narrow band radio signals on white noise background

13 p2369 A70-29730

PHENOBARBITAL

Aerzine-50 toxicity therapeutic treatment by pyridoxine and phenobarbital resulting in 100 percent survival of mice

07 p1222 A70-19926

Heme catabolism in untreated rats and in animals treated with phenobarbital or porphyrinogenic drug, comparing bilirubin and Co production

20 p3583 A70-40450

PHENOL FORMALDEHYDE

Polymer structure and cross-link density effects on thermal analysis of phenol-formaldehyde polymers pyrolysis products

11 p2069 A70-25804

Molybdenum disulfide and phenol formaldehyde resin lubricants for hydroextrusion of steel

15 p2743 A70-31639

PHENOLIC RESINS

Parietal ablation in phenolic resins using chemical kinetics

[ONERA-TP-734] 03 p0606 A70-13634

Phenolics and silicones characteristics, history, chemical composition, available forms, impregnation process, manufacture, productivity, electrical applications and temperature resistance

05 p0873 A70-16603

Phenolic nylon ablative thermal effectiveness in arc heated nitrogen, air and nitrogen-carbon dioxide streams

[AIAA PAPER 70-154] 06 p1183 A70-18233

Antifriction reinforced plastics based on polyamide fibers in epoxy phenolic resins, determining optimum ratios to obtain desired mechanical properties

09 p1710 A70-23675

Filament winding process for boron modified phenolic resin tape used in high temperature applications

12 p2242 A70-27204

Molybdenum disulfide and phenol formaldehyde resin lubricants for hydroextrusion of steel

15 p2743 A70-31639

Phenolic nylon thermal decomposition, considering surface reradiation and physical parameters effects

17 p3196 A70-35242

Phenolic nylon ablative thermal effectiveness in arc heated nitrogen, air and nitrogen-carbon dioxide streams

[AIAA PAPER 70-154] 23 p4282 A70-44520

PHENOLS

Ionol concentration variations in oncological patients blood, using liquid gas chromatography to determine removal by urine and feces

07 p1209 A70-19519

PHENOMENOLOGY

Choice prediction in partially repeatable decision situations, discussing phenomenological analysis

19 p3366 A70-38504

PHENYLALANINE

Feline hypersexuality, aggression and perceptual disorientation resulting from p-chlorophenylalanine administration

12 p2167 A70-27271

Nitrosyl chloride reagent effects on phenylalanine peptides

12 p2181 A70-27471

L-dihydroxyphenylalanine intraperitoneal injection effect on S-adenosylmethionine concentration in rat brain

21 p3764 A70-41269

PHENYLS

Electron impact promoted phenyl migration of trans phenyltolalene, considering mass spectrometry and stereochemistry

14 p2544 A70-30189

PHILOSOPHY

Philosophical problems arising in contemporary and modern mathematics, discussing metaphysics and psychology

07 p1327 A70-19787

Space orientation vs geocentrism in science and philosophy

19 p3553 A70-37397

PHOBIAS

Clinicnosographic criteria of flight phobia and differentiation from other psychopathologic syndromes, noting sociofamilial and operative factors

01 p0031 A70-10235

PHOBOS

Phobos motion observational results compared with Sharpless determination of secular acceleration

04 p0743 A70-14399

Phobos and Deimos photographic reconnaissance feasibility during 1971 orbiter and 1973 Viking missions, studying trajectory

[AIAA PAPER 70-60] 06 p1146 A70-18191

Phobos image analysis on Mariner 7 frame 7F91, discussing surface darkness, limb profile and geometric albedo

13 p2492 A70-29266

Phobos and Deimos photographic reconnaissance feasibility during 1971 Orbiter and 1973 Viking missions, studying trajectory

[AIAA PAPER 70-60] 23 p4243 A70-44507

PHONOARTERIOGRAPHY

Blood pressure indirect recording using ceramic crystal pick-up over brachial artery and under pneumatic cuff

06 p0992 A70-17299

PHONOCARDIOGRAMS

U PHONOCARDIOGRAPHY

PHONOCARDIOGRAPHY

Mitral stenosis and atrial flutter with atrial sounds heard and recorded, discussing sound generating mechanism

01 p0013 A70-10271

Atrial and ventricular gallops incidence during acute myocardial infarction by serial auscultation and phonocardiograms

01 p0014 A70-10277

Phonocardiographic and ultrasound observations of acute rejection following cardiac transplantation, considering rejection treatment at early stage

03 p0415 A70-12888

Ultrasonic Doppler method for timing mitral and aortic valves rapid movements, using filter to eliminate LF signals due to heart walls

03 p0432 A70-12891

Functional and organic systolic murmur differentiation using phonocardiography test

03 p0420 A70-13478

Phonocardiographic and mechanocardiographic features of patients with nonejection clicks and mid- or late-systolic murmurs

03 p0427 A70-13944

Hemodynamic determinants of gallop sounds in patients with aortic valve disease based on clinical, hemodynamic and angiographic observations

04 p0633 A70-15308

Ejection click of valvular pulmonic stenosis by external phonocardiograms and intracardiac pressure recordings during successive respiratory cycles

04 p0633 A70-15440

Frequency analysis of arterial sounds used in studying atherosclerosis, correlating spectra with jet flow turbulence past occlusion

06 p1003 A70-18220

On-line computer for heart rate, isovolumetric contraction time, ejection time, stroke volume and cardiac output using vibrophonocardiogram signals

07 p1224 A70-20196

Diastolic and equivocal fluttering of mitral valve in aortic insufficiency by echocardiography

09 p1615 A70-22209

X ray irradiation effects on phonocardiograms, EKGs, cardiac activity phases and Kunos-Garan mechano-electrical coefficient in dogs

13 p2350 A70-28890

Ultrasonic nonsearch Doppler cardiography for cycle phase analysis, recording single functions

20 p3581 A70-40199

Chest wall vibrations conversion measured by different transducers for simultaneous velocity, displacement, acceleration and phonocardiograms

21 p3770 A70-41236

PHONONS

Phonon-photon scattering intensity and line shape used to study laser-excited impurity centers dynamic characteristics in stimulated induction regime

03 p0499 A70-13256

Optical phonons in mixed sodium potassium tantalate crystals as function of temperature and composition, using IR and Raman spectra

03 p0542 A70-14002

Semiconductors low temperature photoconductivity fluctuations occurrence during energy relaxation probability by optical phonons

04 p0730 A70-14413

External optical phonon modes in ammonium and deuteroammonium halides phase transitions as function of temperature, using IR and Raman spectra

04 p0646 A70-14695

Phonon spectrum of mixed semiconductor crystals based on AIII-BV and AII-BVI compounds, studying frequency spectrum as function of crystal composition

07 p1300 A70-19867

Two parameter model for lattice vibrations applicable to diamond structured crystals, calculating phonon dispersion curves from dielectric screening theory

07 p1357 A70-19920

Laser light investigations of atoms, molecules and plasmas, considering Raman molecular spectroscopy,

acoustic phonons interactions and plasma diagnostics by light scattering

12 p2245 A70-27063

Self excited electron-phonon-spin spontaneous oscillations generation, deriving dispersion equation

16 p2878 A70-33779

Laser Raman spectroscopy, discussing scattering from vibrational modes in solid and from phonons above optical gap

17 p3081 A70-34599

Phonons and band structure role in metal-insulator phase transition, developing model of electron interactions with lattice vibrations

20 p3686 A70-39149

Helicons and transverse optical phonons coupling in degenerate polar semiconductors investigated from electromagnetic linear response theory and field method

24 p4390 A70-45603

PHOSGENE

Niobium oxychloride conversion to niobium pentachloride by vapor phase chlorination with phosgene, examining reaction kinetics

18 p3272 A70-36031

PHOSPHATES

NT ADENOSINE DIPHOSPHATE [ADP]

NT ADENOSINE TRIPHOSPHATE [ATP]

NT ADENOSINES

NT AMMONIUM PHOSPHATES

NT CALCIUM PHOSPHATES

NT DIPHOSPHATES

NT NUCLEOTIDES

NT POTASSIUM PHOSPHATES

NT PYRIDINE NUCLEOTIDES

Phospholipid metabolism intensity in brains of adrenalectomized and pseudo operated rats under hypoxia

01 p0012 A70-10054

Peptide formation during glycine reaction with linear polyphosphates and cyclic metaphosphates, considering prebiotic synthesis

09 p1630 A70-23395

Structural and functional properties of phosphates in biochemical reactions, discussing linkages

14 p2544 A70-30346

P32 labeled organic phosphate esters in water extracts of soil

20 p3615 A70-38979

Uridine phosphorylation by heating with inorganic orthophosphates achieved via nucleoside reactions

23 p4158 A70-44837

PHOSPHIDES

NT GALLIUM PHOSPHIDES

NT INDIUM PHOSPHIDES

NT MANGANESE PHOSPHIDES

NT SCHREIBERSITE

Optically pumped cadmium phosphide laser, obtaining IR coherent oscillation from Q switched Nd doped YAG laser excitation

15 p2751 A70-31985

Solid solutions of quasi-binary cross section CdP-CdTe and ZnP-CdTe, using X ray, thermal, microstructural and microhardness analyses

22 p4086 A70-43132

Weak superstructure line patterns of ternary phases with TiFeSi and ordered iron phosphides by single crystal, Guinier powder and diffractometer techniques

24 p4359 A70-45249

PHOSPHINES

Ion-molecule reactions produced in phosphine by ion cyclotron resonance

16 p2855 A70-33061

PHOSPHORESCENCE

Acrolein photoisomerization in lower excited states, determining fluorescence and phosphorescence quantum yields

15 p2694 A70-31730

PHOSPHORS

Transient hologram recording with fluorescein-boric acid glass organophosphor, noting effects of dye concentration, sample thickness, laser power and excited state lifetime

04 p0690 A70-15027

Projection CRT with liquid-cooled phosphor faceplate, showing linear relationship between brightness and beam current

09 p1673 A70-22034

Current-sensitive single gun color CRT with phosphor screen for display systems

12 p2195 A70-27373

Absolute quantum efficiency of phosphor calcium tungstate-lead under monochromatic far UV illumination

15 p2729 A70-32017

Visual IR laser beam display, using cathode ray tube phosphor with variable sensitivity and range control

15 p2752 A70-32441

Phosphor-output image intensifier response to single photon inputs in multichannel spectrophotometer for faint optical sources

23 p4195 A70-44291

Flickerless regeneration rates for CRT displays as function of scan order and phosphor persistence, using computer experiment 24 p4298 A70-45511

PHOSPHORUS
Fe-Ni-P phase diagrams for high temperatures, providing phase equilibria data for Widmanstätten pattern in iron meteorites 15 p2762 A70-32391
Direct gap conduction band and alloy composition monitoring InAlP, using electron microprobe cathodoluminescence and X ray emission 22 p4086 A70-43019
GaAs crystal surface Raman scattering from phosphorus impurities localized modes, using Ar ion laser line 24 p4391 A70-46255

PHOSPHORUS COMPOUNDS
NT ADENOSINE DIPHOSPHATE [ADP]
NT ADENOSINE TRIPHOSPHATE [ATP]
NT ADENOSINES
NT AMMONIUM PHOSPHATES
NT CALCIUM PHOSPHATES
NT DIPHOSPHATES
NT GALLIUM PHOSPHIDES
NT INDIUM PHOSPHIDES
NT MANGANESE PHOSPHIDES
NT NUCLEOTIDES
NT ORGANIC PHOSPHORUS COMPOUNDS
NT PHOSPHATES
NT PHOSPHIDES
NT PHOSPHINES
NT POTASSIUM PHOSPHATES
NT PYRIDINE NUCLEOTIDES
NT SCHREIBERSITE
Carbohydrate-phosphorus metabolites content in gophers brains under normal conditions during hypothermia and spontaneous warming at room temperature 01 p0012 A70-10055
Carbon dioxide lasers passive Q switching by gaseous methyl fluoride and phosphorus pentafluoride, presenting absorption coefficients 01 p0110 A70-10561
Acute hypoxia effect on mono-, di- and triphosphoinositides metabolism and content in white rats cerebral tissues, using chromatographic analysis 07 p1199 A70-18721
Electric discharge reactions in mixtures of phosphine with methane, ammonia and water, obtaining biologically significant inorganic and organic phosphorus compounds 09 p1630 A70-23396
Phosphorus compounds inhibition effect on oxidation and wear of graphite lubricants 13 p2437 A70-28854
Spatial-angular characteristics of Nd doped phosphorus oxychloride liquid lasers, discussing beam divergence effects 18 p3266 A70-36416
Solid phosphorus triamide derivatives as ignition aids in hypergolic propellant systems, testing characteristics in interaction with oxidizers 21 p3865 A70-41404

PHOSPHORYLATION
Gamma-aminobutyric acid effect on oxidative phosphorylation of rabbit and rat brain mitochondria, noting dependence on ionic concentration, temperature and amount of additions 01 p0019 A70-10509
Oxidative phosphorylation and oxygen intake during circulatory hypoxia in mitochondria of liver and brain in rats subjected to acute ischemia 23 p4145 A70-44315
Oxidative phosphorylation and oxygen consumption during hyperoxia in mitochondria preparations and tissue homogenates from white rat liver 23 p4146 A70-44316
Uridine phosphorylation by heating with inorganic orthophosphates achieved via nucleoside reactions 23 p4158 A70-44837

PHOTICS
Alpha rhythm phase coherence during photic blocking, examining pacemaker model 19 p3368 A70-37811

PHOTOABSORPTION
Cs seeding effect on bound-free UV photoabsorption of Cs-H plasma at constant electron density and energies below H ionization 02 p0343 A70-11904
Nitrogen molecule photoabsorption and photoionization cross sections determination, discussing ionization probability variations and radiationless transitions 07 p1347 A70-20358
Extreme UV spectroscopy with synchrotron radiation storage ring light sources in 40-400 Å range, including thin film photoabsorption measurements 21 p3826 A70-41451

PHOTOCATHODES
Photocathode internal light scattering effect on photomultiplier time response 05 p0845 A70-15806

Optical devices for enhancement of semitransparent photocathode quantum efficiency applied to TV camera tubes, image intensifiers and other imaging detectors 09 p1682 A70-23502
Spectral characteristics of secondary emission alloys for photocathodes in extra atmospheric radiation open-type detectors in UV range 14 p2582 A70-30166
Temporal dependence of photoelectron multiplier output waveform and focusing under photocathode alternating modulation, noting thresholds for optical reception 15 p2696 A70-31505
High efficiency semitransparent III-V semiconductor photocathodes fabrication and operation 19 p3486 A70-37756

PHOTOCELLS
U PHOTOELECTRIC CELLS
PHOTOCHEMICAL REACTIONS
NT PHOTOCROMISM
NT PHOTODECOMPOSITION
NT PHOTOLYSIS
NT PHOTOSYNTHESIS
NT RADIIOLYSIS
Aeronomy of Jovian upper atmosphere at pressures below 25 mb, discussing stratospheric heat sources, thermal emissivity, photochemistry of methane, ammonia, etc 02 p0366 A70-11804
Lower atmospheric photochemistry, discussing tropospheric, stratospheric, mesospheric and polluted atmospheric chemical and photochemical reactions 06 p1058 A70-18485
Photochemical calculations on mesospheric ozone for oxygen only, oxygen-hydrogen and oxygen-hydrogen-nitrogen atmospheres 07 p1273 A70-20268
Carbon dioxide photochemistry of Mars atmosphere, noting complications due to hydrogen compounds 09 p1763 A70-23483
Aeronomic neutral reaction rates, describing ozone excited state photochemistry 10 p1872 A70-23824
Chemical kinetic model for photoexcitation and photoionization of cold argon ahead of strong shock wave, predicting electron and excited atom concentrations [AIAA PAPER 68-666] 11 p2090 A70-25953
Sterically hindered arylidiazonium salts absorption spectra and quantum yield data interpretation, considering photochemical properties 12 p2182 A70-28300
Acrolein photoisomerization in lower excited states, determining fluorescence and phosphorescence quantum yields 15 p2694 A70-31730
Rocket and satellite data on upper atmospheric neutral/charged particles, short wave solar radiation, temperature and photochemical reactions 15 p2730 A70-32089
Photoreaction produced N-cyclohexyldiphenylketenimine from cyclohexyl isocyanide and diphenyldiazomethane 17 p3042 A70-34820
Book on ionospheric chemistry, covering chemical and photochemical reactions above 60 km and ionization processes 18 p3247 A70-36212
Nitric oxide and atomic nitrogen in mesosphere and stratosphere, discussing photochemical equilibrium 19 p3415 A70-38389
Nitrogen and nitric oxide production and diffusion, examining photochemistry and transport at high altitudes 20 p3620 A70-39339
Total reflectance of composite light diffuser with nonuniform absorption by two beam model, noting application to photochemistry 21 p3829 A70-41936
Trap filling dependence on intensity, temperature and wavelength of photoexcitation in CdS crystals subjected to electron radiation damage and annealing 21 p3864 A70-42013
Peroxyacetyl nitrate decomposition products under continued and discontinued irradiations determined by IR spectral analysis 22 p3983 A70-42944
Photoelimination reactions of macromolecules, emphasizing intermediate pathways heuristic description via energy level diagrams 23 p4157 A70-44391

PHOTOCHEMISTRY
U PHOTOCHEMICAL REACTIONS
PHOTOCROMISM
UV sensitive spiropyran films coloration mechanism and color structure stabilization, discussing film and laser applications to optical data recording and storage 01 p0086 A70-10357
Photochromic aminotriarylmethane filter solutions for flash blindness protection, noting stability against xenon flash UV exposure 04 p0690 A70-15028

Hologram storage and retrieval in photochromic SrTiO₃ crystals at ruby laser wavelengths 06 p1072 A70-18519
Photochromism of dihydroquinoline compounds and absorption spectra of color forms, noting color development upon UV light irradiation and thermal eradication 09 p1629 A70-22334
Optically bistable crystal applications, discussing photochromaticity, catochromatic tubes, oscilloscopes, computer storage devices and laser systems 19 p3446 A70-37860
Inorganic photochromic and cathodochromic recording materials, examining transition metal doped strontium titanates, rare earth doped calcium fluorides and Fe or S doped sodalite 22 p4088 A70-43601
Photochromic paint nondestructive testing for survival equipment, detecting bond defects and sandwich water 23 p4197 A70-44490

PHOTOCONDUCTIVE CELLS
Electro-optical transducers based on photoconductive cells, phototransistors and microminiature incandescent and solid state light emitters 16 p2904 A70-33144

PHOTOCONDUCTIVITY
Photoconductivity and photomagnetic effect measurements in Ge for determining nonequilibrium current carrier concentration produced by Q switched neodymium laser 01 p1017 A70-10099
Photoconductivity growth and decay curves green edge emission and integral flux in optical flare of cadmium sulfide crystals due to hole trapping process 03 p0540 A70-13503
Mercury cadmium telluride alloy as photoconductive IR detector material noting properties, composition and temperature dependence of energy gap 03 p0543 A70-14196
Semiconductors low temperature photoconductivity fluctuations occurrence during energy relaxation probability by optical phonons 04 p0730 A70-14413
Two photon photoconductivity of CdS crystals stimulated by ruby laser, showing emission self focusing during pumping 07 p1302 A70-20322
Photoconductivity detected in pigmented epithelium of eye during illumination by visible light 08 p1444 A70-20738
Ge-Cu IR detector photoconducting characteristics and application to carbon dioxide laser mode pattern measurement 10 p1898 A70-23922
Chromium doped GaAs photoconductivity spectral distribution at various temperatures, determining temperature dependence of impurity maximum 12 p2286 A70-27366
Fe and Ni doped GaAs photoconductivity at various temperatures, determining activation energy level 12 p2287 A70-27489
Self focusing of ruby laser radiation in CdS single crystal, considering effect on crystal photoconductivity 12 p2248 A70-27540
Surface field effect, contact potential and photoconductivity measurements on p- and n-type heteroepitaxial single crystal silicon films on sapphire 13 p2470 A70-29372
Photoconductive and thermal IR detectors development 13 p2410 A70-29656
Spectral distribution of GaAs photoconductivity, allowing for coordinate dependence of minority carrier lifetime in surface space charge region 15 p2782 A70-31626
Photoconductivity relaxation kinetics of low resistivity n- and p-type GaAs, showing nonradiative recombination 17 p3143 A70-35703
Photon capture cross sections for surface silicon electronic states using IR photoconductivity measurements 17 p3144 A70-35707
Extrinsic photoconductive detectors, comparing performance for microwave and DC bias based on gain bandwidth product and SNR analysis 18 p3232 A70-36746
Semiconductor solar energy converter, deriving conditions for occurrence of photoconductivity quenching 24 p4391 A70-46325

PHOTOCONDUCTORS
As₂Se₃ crystal production technology concerning substitution-type solid solution structure and photoconducting ferroelectric properties 04 p0729 A70-14409
Extrinsic photoconductor with reduced background under uniform illumination, describing frequency response as function of recombination and dielectric relaxation times and load resistances 14 p2586 A70-30989

PHOTOCURRENTS

Semiconductor image detectors in photodiode and photoconductor forms, describing construction and operation modes 15 p2714 A70-32673

Cryogenically cooled photoconductive IR radiation detectors, determining wideband optical heterodyne performance 20 p3627 A70-39085

Integrated ferroelectric photoconductor device for hologram storage, discussing improved phase readout technique for reconstruction 22 p3994 A70-43609

PHOTOCURRENTS

U ELECTRIC CURRENT
U PHOTOELECTRIC EMISSION

PHOTODECOMPOSITION

Photodecomposition of 1,4-dichlorobutane sensitized by n, pi singlet state of acetone as chemical process 04 p0646 A70-15319

Disproportionation to combination ratio of hydrazyl radicals generated in absence of hydrazine direct decomposition 14 p2544 A70-30120

Molecular oxygen role in photolytic decomposition of ozone by intermediate quantum yield method, presenting rate constants 16 p2858 A70-34009

PHOTODETACHMENT

Ion cyclotron resonance spectroscopy technique for determining electrons photodetachment energy from negative ions in gas phase 11 p1995 A70-26001

Electron photodetachment rate from meteor radar echo duration during night and daytime observations 19 p3515 A70-37664

PHOTODETECTORS

U PHOTOMETERS

PHOTODIODES

Semiconductor laser-photodiode system used as optical logic elements for electronic circuits describing storage elements, dynamic trigger and multivibrator 03 p0499 A70-13456

Silicon photodiode arrays with total active area noting element isolation 03 p0459 A70-14195

Emission modulation in multifunctional injection laser-photodiode system used as optical memory, pulse generator, multivibrator and trigger 05 p0859 A70-16268

Optical and electronic mixing in avalanche photodiode during variable amplitude signal demodulation in optical heterodyne receiver, considering conversion losses 07 p1243 A70-20282

Photosensitivity and scanning of planar Si photodiode image detector arrays, using most ring counter and shift register 10 p1846 A70-23881

GaAs-Au surface barrier n-type photodiode structure, electrical parameters and response characteristics 12 p2194 A70-26969

Vibration amplitudes and frequencies contactless measurement by sensor with photodiode for machining tool elements during metal working operations 12 p2235 A70-27683

Photovoltaic effects in diodes with generation-recombination process in space charge region 15 p2709 A70-32427

Information optical transmission parameters with electroluminescent GaAs diode as radiation source, calculating energy received over various distances 19 p3389 A70-38069

Constant false alarm rate bias technique to control avalanche photodiode laser receiver over varying operating conditions of temperature, ambient illumination, etc 20 p3641 A70-39483

Accurate tuning methods for laser mode locking device, using diffracted light measurement and photodiode with LF spectrum analyzer 21 p3838 A70-42047

Semiconductor luminescence and photodetector diodes near IR region transmission, describing frequency response measurements 22 p4087 A70-43445

PHOTODISSOCIATION

Atmospheric water vapor photodissociation and resulting O evolution recalculated for determining O abundance in absence of biological activity 01 p0081 A70-11294

Radiative-convective equilibrium model to investigate photodissociation of water in Venus atmosphere, considering greenhouse effect 04 p0757 A70-15516

Unsensitized gaseous fuel-air mixtures photochemical ignition due to molecular oxygen photodissociation by radiant energy absorption [AIAA PAPER 70-149] 06 p1183 A70-18225

Photodissociation of diatomic O and N molecules in far UV 07 p1338 A70-20052

Photodissociation of perfluoroalkyl iodides filler of pulsed laser operating cavity, discussing thermal molecular dissociation and unexcited iodine atoms formation 08 p1513 A70-21418

Photodissociation and fluorescence cross sections for hydrogen by Lyman-alpha photons emission from collisional quenching 16 p2953 A70-33006

Ammonium molecules dissociation and ionization in comet atmospheres due to solar corpuscular and photon radiation 19 p3514 A70-37642

Diurnal variation symmetry of upper atmosphere molecular oxygen concentration in terms of ozone photodissociation 23 p4190 A70-44083

Laser excited atoms quenching by iodine molecules from light pulse induced photodissociation of perfluoropropyl iodide active media 24 p4352 A70-45467

PHOTOELASTIC ANALYSIS

NT PHOTOGRAMMETRY

Dynamic stress concentration factor in strut containing symmetrically located elliptical discontinuity, using photoelastic technique with modulated ruby laser light source 02 p0388 A70-12495

Photoelastic stress analysis of shouldered shafts with keyways in shanks under direct loading and torsion, including keyway and shoulder fillet stresses 02 p0388 A70-12496

Piezoelectric transducer for photoelastic analysis of HF stress waves in thick ring subjected to transient loads 02 p0389 A70-12500

Photoelasticity extension to plane elastic problems with stress state depending on Poisson ratio, discussing multiple connected body with nonzero surface tractions on internal boundaries [SESA PAPER 1570] 03 p0583 A70-12884

Out-of-plane restraint effect on plane-stress solutions near straight boundaries, predicting deviation of two dimensional photoelastic results 03 p0584 A70-12951

Frozen stress techniques for photoelastic analysis of orthotropic plate on nonlinear foundation, providing results to compare with future finite element analysis 03 p0480 A70-12952

Stress-optic law for orthotropic composites photoelastic stress analysis, investigating use of transparent filament-resin composites 03 p0481 A70-12956

Hologram interferometry to study stresses in fixed two dimensional photoelastic models and three dimensional slice qualitative analysis [SESA PAPER 1530] 03 p0482 A70-12964

Pseudo two dimensional photoelastic test method applied to axisymmetric solid propellant rocket grains under pressure and thermal loads [SESA PAPER 1482] 03 p0482 A70-12968

Scattered light photoelastic stress analysis using doubly refracting materials and lasers 03 p0594 A70-13657

Transient thermal stresses in photoelastic models of various shapes under various steady state or transient temperature conditions, describing instrumentation and experimental methods 03 p0600 A70-14308

Thermal stress concentration produced by cracks, notches and fillets in plates free from external loads measured photoelastically 03 p0600 A70-14310

Two dimensional plane stress photoelastic models of star configurations in elastic case bonded solid propellant rocket motors under transverse body force loading 03 p0582 A70-14312

Stress analysis based on observing birefringence effects in photoelastic surface coating 04 p0689 A70-14922

Photoelastic and photorheological analysis of time-dependent variation of stress distribution in long strip compressed oppositely with elastic flat punches 05 p0928 A70-16012

Three dimensional photoelastic model for structural analysis of aircraft bulkhead to improve fatigue life 05 p0937 A70-16376

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns 06 p1063 A70-17643

Notched cylindrical shells of nonuniform thickness using two dimensional photoelastic models mounted on elastic foundations 07 p1249 A70-19239

Lens effects applied to measurement of stresses on plane transparent models in photoelastic analyses, visualizing stresses from moire fringes 07 p1409 A70-19746

Photoelastic stress analysis of composite structures subjected to gravitational forces using immersion analogy, considering constant acceleration stresses 07 p1413 A70-20038

Magnetophotoelastic model applied to plates bending stress analysis, deriving polarized light propagation equations 09 p1728 A70-23447

Dynamic photoelastic analysis of fracturing plastic plates, studying elastic and stress fields around propagating cracks 09 p1783 A70-23448

Profile plane state of stress in wedge with and without external notch using combined photoelastic analysis and moire method 11 p2131 A70-25591

Transient and steady state thermal stresses measured by holographic extension of photoelastic analysis 11 p2049 A70-25592

Stress distributions in thin walled pressure vessels analyzed by scattered light photoelasticity technique compared to strain gage analysis 11 p2131 A70-25593

Photoelasticity stress analysis, determining principal stress differences and orientation, using holographic interferometry to obtain sum and separation 11 p2049 A70-25596

VTOL aircraft metal fatigue examination by photoelasticity emphasizing stress reduction 11 p2132 A70-25622

Two dimensional photoelastic investigation of crack propagation in fiber-reinforced composites consisting of glass and polyester resin layers 11 p2136 A70-26078

Photoelastic analysis using fringe multiplication instrument applied to two dimensional models under load and frozen stress slices 11 p2061 A70-26834

Interferometric stress analysis in three dimensional photoelasticity, including practical measurements and analysis in terms of refractive index 12 p2326 A70-27621

Wing rib structure transient thermal stresses analysis using photothermoelastic method 12 p2327 A70-27982

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns 13 p2405 A70-28726

Tensile test on perforated Al-filled rectangular plate of photoelastic material, obtaining stress concentration at hole by photoelastic visualization 13 p2516 A70-29628

Photoelastic stress analysis, discussing holographic interferometry for main stresses separation and polyester resins application to birefringence pattern superposition elimination 15 p2815 A70-31809

Stress distribution around oblique holes in uniaxially loaded plate using three dimensional photoelastic analysis [SESA PAPER 1618] 15 p2820 A70-32305

Fringe interpretation in stress-holo- interferometry, emphasizing isopachic-isochromatic interaction effects in photoelastic analysis [SESA PAPER 1642] 15 p2739 A70-32309

Scattered light rosette using three polarized light beams intersecting at surface point to evaluate photoelastic stress data 15 p2739 A70-32320

Steel and cast iron early stage fatigue failure, using photoelastic coatings 17 p3192 A70-35741

Stress measurements in rotating plane disks with notched disturbed symmetry, using stroboscopic photoelasticity and numerical methods [ASME PAPER 70-GT-26] 18 p3344 A70-36867

Holographic interferometry applications in stress analysis of photoelastic resins, describing holographic interferometry assembly 18 p3262 A70-37209

Holographic registration of isochromatic and isopachous diffraction patterns of photoelastic birefringent objects, showing stress concentrations 19 p3422 A70-37649

Photographic patterns from brittle coatings, grids, photoelasticity and moire, considering variability, association with other images and esthetic value 19 p3546 A70-38343

Granular medium particles contact forces distribution measurement by absolute retardation method using photoelastic techniques 19 p3427 A70-38344

Maximum secondary principal stress axis and isotropic points determination in scattered light photoelastic analysis, considering bar in uniaxial tension and rectangular beam 19 p3546 A70-38345

Welded joint strain measurement by grating etching and moire fringe technique 19 p3428 A70-38513

Strain analysis by moire technique, using triangular and square root of 2 gratings 19 p3432 A70-38720

Three dimensional photoelastic analysis of stresses and strains in hollow circular cylinders with conical ends bonded to shell and shrunk 20 p3720 A70-39686

Strains and stresses along interfaces and near fiber ends in composite structures made of reinforced matrix, using photoelastic methods 20 p3730 A70-40035

Circular cylindrical shell stability under axial compressive load, analyzing buckling process by high speed photographic recording of photoelastic isoclinic pattern changes 20 p3735 A70-40528

Photoelastic stress measurement of metal powder particles during sintering, using two dimensional models 21 p3935 A70-41410

Clad glass fibers axial stress measurement by photoelastic techniques 22 p4060 A70-43415

Isoclinic parameter determination from intersection points of secondary isochromatics lines in photoelastic analysis, discussing polariscope theory and imperfect quarter wave plates error effect 23 p4198 A70-44910

PHOTOELASTIC MATERIALS

Out-of-plane displacement restraint at thin photoelastic plates bonded to rigid boundaries of inclusions inducing transverse stress components causing plane stress solution deviation 01 p0202 A70-11059

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis 03 p0482 A70-12967

High speed photography for instability onset and subsequent buckling process in photoelastic circular cylindrical shells under axial compression 03 p0594 A70-13659

Two dimensional plane stress photoelastic models of star configurations in elastic case bonded solid propellant rocket motors under transverse body force loading 03 p0582 A70-14312

Residual strains determination in rotating disks from photoelastic coatings interference 05 p0955 A70-17063

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis 07 p1286 A70-20040

Magneto-photoelasticity equations derived for photoelastic model in magnetic field, developing algorithm for optical phenomena for arbitrary stress distribution 11 p2131 A70-25588

Plane electromagnetic waves propagation in nonabsorbing photoelastic material with finite deformations, formulating theory from Eulerian and Lagrangian point of view 11 p2139 A70-26173

PHOTOELASTIC STRESS MEASUREMENT

U PHOTOELASTIC ANALYSIS

PHOTOELASTICITY

NT PHOTOVISCOELASTICITY

Holographic interferometry as stress analysis technique for crack propagation studies, discussing advantages over classic interferometric and conventional photoelastic methods 01 p0198 A70-10002

Successive small birefringences undergone by polarized light ray crossing photoelastic model represented by rotations in equatorial plane on Poincare sphere 06 p1168 A70-17918

Warped wave front viewpoint in analyzing object plane resolution, contrast and location in polariscopes 07 p1280 A70-19236

Photoplastic method for modeling of plane elastoplastic problems, comparing results with photoelastic coating method to estimate transition errors from model to prototype 10 p1965 A70-25320

Poincare sphere application to automatic polarization forms measurements and two/three dimensional photoelasticity by scattered light 11 p2142 A70-26633

Ellipsometry with Poincare sphere representation, describing application to automatic two and three dimensional photoelasticity by scattered light 17 p3086 A70-35014

Neumann and Maxwell photoelasticity laws reformulation with aid of characteristic tensor of mechanical state 17 p3187 A70-35044

Equal thickness interference fringe networks behavior in singularities region of photoelasticity 21 p3941 A70-42260

Optical glasses photoelastic constants measurement, tabulating results 22 p4072 A70-42509

PHOTOELECTRIC CELLS

Conflicting requirements for reflection reduction, thermal stabilization and radiation protection satisfied by three layer coatings on Si photocells 01 p0159 A70-10768

Coordinate-sensitive photocells with heterojunctions between wideband semiconductors, noting increased longitudinal photovoltage 03 p0541 A70-13722

Photocell uses in semiconductor integrated circuit, discussing scanned arrays applications and economics 03 p0459 A70-14265

Biplanar photocell in various holders noting intrinsic properties, emphasizing rise time characteristics 04 p0695 A70-15572

Divided photoelectric cell position sensitive detectors in laser alignment systems, obtaining independent signals for displacements in orthogonal directions 06 p1081 A70-17624

Photoelectric exposure meter for meridian circle readings photographic recording 08 p1496 A70-21159

Transverse Dember effect in elastically bent Ge single crystal illuminated by light beam, considering EMF distribution and photocell application 09 p1740 A70-23191

Photoelectric devices for object position fixation and superposition of two images 09 p1684 A70-23635

Photoelectric receiver and light beam alignment in gas laser aerial photography, considering directrix rectilinearity verification 12 p2247 A70-27476

Si photocells fabrication, reliability and energy conversion efficiency 19 p3358 A70-38479

Cadmium sulfide photocell development, noting plastic support base, film deposition and interconnection 19 p3358 A70-38480

PHOTOELECTRIC EFFECT

NT PHOTOIONIZATION

Rapid photoprocesses decay kinetics, using CW Ar ion laser beam interrupted periodically by electro-optical shutter 02 p0314 A70-12742

Rapid scanning high resolution photoelectric spectrometer for sunspot spectra study 07 p1289 A70-20291

Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules 08 p1513 A70-21412

Laser-induced electron emission from metals and insulators in form of evaporated films and single crystals, discussing many-photon photoelectric effects and thermionic emission 08 p1556 A70-21509

Photoelectric detector sensitivity variation effect on long term instability of servomagnet variometers 14 p2588 A70-31261

Picosecond light pulse measurement by two beam overlap technique using nonlinear photoelectric effect 17 p3097 A70-35912

Cooled antimony-cesium film photoelectric effect for weak luminous flux, examining electronic camera reciprocity 19 p3427 A70-38175

Detonation front position determination in explosive by photoelectric technique 22 p4121 A70-42341

Battery operated electronic servo governed photoelectric polarimeter for airborne measurements of skylight polarization, discussing design and operation principles 23 p4199 A70-45006

Time evolution of instantaneous light intensity mean and variance for Q switched single mode laser near oscillation threshold 24 p4355 A70-46090

PHOTOELECTRIC EMISSION

Autoelectron and autophotoelectron emission from Fe-doped p-type GaAs cathodes in vacuum, noting I-V and emission characteristics dependence on light flux 03 p0538 A70-13067

Low molecular weight organic semiconductors photoelectron UV emission spectra, studying electron energy distribution and optical ionization, dark bulk conductivity, etc 03 p0541 A70-13728

Photoelectric intensity measurements on emission bands of oxygen Herzberg I system excited in argon-oxygen afterglow 03 p0528 A70-14350

Competition mechanism for free carriers in junction isolated transistor collector suggested by current dependence of photocurrent 04 p0657 A70-14732

Silicon bipolar transistors primary photocurrent calculation using manufacturers data 04 p0657 A70-14736

Inelastic scattering of electrons by surface plasma oscillation for low energy electron diffraction and photoemission, interpreting surface plasmon excitation 07 p1337 A70-19359

Two photon photoconductivity of CdS crystals stimulated by ruby laser, showing emission self focusing during pumping 07 p1302 A70-20322

Time resolved photoelectric light detection, discussing photoelectric emission probability time dependence and radiation interaction with bound charge 09 p1726 A70-22232

Photoemission analyzer with finite emitter in spherically symmetric retarding field with magnetic field present, analyzing energy resolution 09 p1679 A70-22988

Photoemission energy distribution curves measuring circuit using AC retarding potential method, offering improved noise performance 09 p1679 A70-22996

Thermal lens effect produced by photocurrent in CdS, using focused laser beam to generate photocurrent causing local heating changes of refractivity 10 p1898 A70-23980

Photographs of ferroelectric tungsten oxide crystal domains obtained with photoemission microscope, noting memory effect after electron beam sweeping 11 p2099 A70-26463

Contaminated Ni crystal 100/ surface photoelectric yield as function of temperature, considering effects of Ar ion bombardment and annealing 12 p2288 A70-27680

Photoemission from evaporated gold films, measuring quantum yield, photoelectric energy distribution curves and optical density states 14 p2626 A70-30481

Photoemission of electrons and holes from Al into aluminum oxide, giving approximate energy band diagram of Al-aluminum oxide interface 15 p2783 A70-31759

Steady state potential distributions near photoemitting plate immersed in plasma, noting overshoot effects role for sheaths around satellites in interplanetary plasma 15 p2778 A70-31906

Photoemission optical analysis from thin films with uniaxial anisotropy, discussing reflectance, transmittance and divergence of Poynting vector 15 p2774 A70-32012

Peak emission currents from tungsten under ruby laser focused radiation, describing integral emission by heat conduction theory and Richardson equation 15 p2754 A70-32875

MOS structure, measuring ionizing radiation effects on interface barrier energies by internal photoemission techniques 17 p3144 A70-35901

Photoemitting cesium antimonide thin films for IR detectors 19 p3488 A70-38202

Photocurrent multiplication in single crystal n-type epitaxial GaAs due to impact ionization of shallow donors 22 p4087 A70-43218

PHOTOELECTRIC GENERATORS

Solar photoelectric power ion propelled probe of asteroid region, describing design and mission planning [AIAA PAPER 69-1105] 02 p0382 A70-12529

Photoelectric composite multicell solar generator, deriving empirical equation for external I-V characteristic 07 p1196 A70-19623

Solar energy direct conversion into electricity, surveying photoelectric, thermoelectric and thermoelectric methods 15 p2677 A70-31598

High voltage photoelectric generator containing semiconductor plates with series- and parallel-connected p-n junctions forming solid circuit for super-high light flux concentrations 16 p2843 A70-33201

Heterogeneous solar cells based on polycrystalline cadmium sulfide and selenide, discussing preparation methods and photoelectric and electric properties 18 p3215 A70-36238

PHOTOELECTRIC MATERIALS

Ternary phase diagram of liquid epitaxially grown gallium arsenide antimonide, considering use as high quantum efficiency long wavelength photoemitter 15 p2782 A70-31758

PHOTOELECTRIC PHOTOMETRY

U ELECTROPHOTOMETERS

PHOTOELECTRICITY

Parameters defining elliptic vibration of light reflected from surface using photoelectric ellipsometer 08 p1546 A70-21673

Structural and material design of contactless photopotentiometers operating in forward and reverse modes with given output characteristics 09 p1681 A70-23357

Carrier drift due to electromagnetic impulse, deriving expressions for photo EMF generated in transverse magnetic field manifesting monopolar photomagnetic effect 13 p2452 A70-29282

- Photoelectric device for recording plant rhythmic leaf movements in space 16 p2849 A70-33998
- Indium arsenide p-n junctions fabrication and electrical and photoelectric properties 17 p3143 A70-35120
- Lunar occultation photoelectric measurements, investigating irregularities of occulted stars 17 p3171 A70-35442
- Delta Scuti stars, determining consistent absolute magnitudes by Stromgren intermediate band colors and Crawford photoelectric H beta indices 17 p3171 A70-35443
- Adsorption influence on electrical and photoelectric properties of CdSe thin films 17 p3143 A70-35674
- Prebreakdown ionization growth in gases based on initial photocurrents production from high voltage uniform field electrodes 22 p4026 A70-42353
- Time resolving X ray grating polychromator, discussing photoelectric attachment with surface barrier semiconductor detectors [SMPT PREPRINT 75] 22 p4037 A70-43069
- PHOTOELECTROMAGNETIC DETECTORS**
- U RADIATION MEASURING INSTRUMENTS**
- PHOTOELECTRONICS**

- Stress analysis for plate with large displacements by multicamera photogrammetry, comparing results with numerical solution by finite differences 15 p2821 A70-32313
- Partial coherence theory in holography with photogrammetry applications, reconstructing images with fringes representing constant range contours 17 p3087 A70-35023
- Computer programs for photogrammetric aerial triangulation with independent models 18 p3248 A70-36778
- Aerial terrain analysis by color and color IR photography, analyzing physical factors affecting final image 22 p4018 A70-42963
- PHOTOGRAPH INTERPRETATION**
- U PHOTOINTERPRETATION**

PHOTOGRAPHIC DEVELOPERS

Optimum developer for aerial photofilms processing, relating light sensitivity and information capacity 18 p3258 A70-36283

PHOTOGRAPHIC EMULSIONS

NT NUCLEAR EMULSIONS

Holographic interferometry for determining optical path variations resulting from photographic plate emulsion thickness and refractive index changes during development 01 p0087 A70-10666

High resolution silver halide photoemulsions by holographic resolvometry using Ne-He laser to obtain interference patterns 01 p0095 A70-11633

Spectrophotometric facility for measuring spectral characteristics of color filters, photomultipliers and photographic plates as function of temperature 02 p0301 A70-12494

Photographic emulsions used for astronomical photography in U.S., discussing hypersensitization, exposure, processing and image evaluation methods 06 p1071 A70-18516

High resolution mass spectrography using AgBr photographic plates as ion detectors for organic chemical problems 07 p1224 A70-18894

Holographic recording of information contained in evanescent wave fields in high resolution photographic emulsions 07 p1281 A70-19367

Book on holography principles and applications, discussing imaging properties, coherence, photographic emulsions, optical analog computers, etc 07 p1283 A70-19739

Photographic emulsions design for increased water depth penetration during aerial multispectral recording of light absorption and scattering in water masses 09 p1674 A70-22261

Photographic emulsion nonlinear response effect on image quality, discussing holography for multiple exposures 09 p1676 A70-22718

Primary cosmic ray particles location in photographic emulsions exposed to balloon elevations by spark chambers, noting stack alignment 09 p1679 A70-22990

High resolution holography with pulsed radiation source, testing various emulsions for sensitivity and reciprocity behavior 09 p1681 A70-23175

Crop species and soil conditions identification from space by comparison of multivase and multiemulsion photography, assigning standard signature to optical fields 10 p1879 A70-24745

Chilled emulsion photography for astronomy and spectrography, reducing long exposures with chilled plates 14 p2585 A70-30649

Heterochromatic spectrophotometry, discussing maxima and integral techniques for line measurement, photoemulsion properties and Eberhard effect 14 p2585 A70-30784

Planetary and lunar photography at French observatory, discussing Pic du Midi facilities and various photographic emulsions 17 p3082 A70-34676

Plate illumination relation to opacity in photometry and spectrophotometry, using digital techniques 20 p3630 A70-39475

Photographic materials resolving power for lines and points 20 p3633 A70-39750

Photographic emulsions and photosensitive materials for holography, measuring noise spectral power density at high spatial frequencies by scattered light method 21 p3822 A70-40812

Photographic processing methods for high efficiency low noise phase holograms on silver halide emulsions 22 p4025 A70-42286

Holographic interferometry sensitivity augmentation by use of nonlinear properties of photoemulsion 22 p4038 A70-43140

Holographic interferometry of phase object by double exposure method, showing no effect of photographic emulsion compression on order of interference 24 p4334 A70-45368

Cobb chart resolution in photographic system including independent sources of image spread and single source of granularity 24 p4334 A70-45450

Motion picture B and W photographic materials characteristic curves, describing geometry by three-component set 24 p4335 A70-45653

Optical image reconstruction from holograms, discussing photographic materials resolution, response linearity, spatial noise, etc 24 p4335 A70-45654

Exposed photographic layers blackening phenomenon energy spectrum and mean square 24 p4336 A70-45655

Industrial radiography, discussing photographic emulsion layers granular structure formation due to ionizing radiation 24 p4337 A70-45714

Photographic paper as emulsion film substitute in industrial radiography, evaluating sensitivity and image contrast 24 p4337 A70-45715

Radiography using photo-nuclear reaction emulsion to improve picture contrast by eliminating scattered photons in sample 24 p4337 A70-45716

PHOTOGRAPHIC EQUIPMENT

NT BAKER-NUNN CAMERA

NT BALLISTIC CAMERAS

NT CAMERAS

NT FRAMING CAMERAS

NT HIGH SPEED CAMERAS

NT LALLEMAND CAMERAS

NT PANORAMIC CAMERAS

NT PHOTOGRAPHIC PROCESSING EQUIPMENT

NT SCHMIDT CAMERAS

NT TELEVISION CAMERAS

Scinticamera resolving power in radioactivity measurements, discussing mathematical principle of division of radioisotope concentration in biological experiments 01 p0040 A70-11404

Stereoscopic device for photogrammetric points selection and marking on aerial photographs 03 p0482 A70-13109

Martian orbital photographic missions objectives and sensors realizable capabilities, discussing relationships between orbital parameters and imaging systems constraints 03 p0490 A70-13663

Photoobjective and camera resolution tests regarding entire frame using two dimensional azimuth mark 05 p0852 A70-16864

Photo-optical instrumentation applications and theory - Conference, San Francisco, August 1969 09 p1672 A70-22029

Earth resources data transmission, describing picture reception and reproduction equipment [AIAA PAPER 70-328] 09 p1634 A70-22856

Photo-optical instrumentation - Conference, San Francisco, August 1969 09 p1684 A70-23751

Photographic apparatus for lunar orbiters and Apollo spacecraft, describing lunar surface closeup camera for astronauts, launch photographing, etc 13 p2406 A70-28926

Lunar Orbiter photo subsystem mechanisms, discussing film transport, vacuum and mechanical clamps, focal plane shutter, processor-dryer and optical mechanical scan 16 p2914 A70-34146

Surveyor camera double acting rotary solenoid actuated focal plane shutter utilizing two blades in parallelogram linkage 16 p2914 A70-34148

Image intensifier apparatus photographing nuclear electromagnetic cascades in ionization spectrometer 18 p3261 A70-37091

Soviet book on aerial photo plotting of aerogeophysical routes and anomalies covering techniques, equipment, low altitude surveys, etc 19 p3410 A70-37408

Photographic polarimeter based on Savart and lambda/4 plates combination for linear polarization measurements of coronal and prominence emission lines during solar eclipse 20 p3627 A70-39092

Vibration transfer coefficient of aerial camera-photographic assembly system for shock absorption during surveys 24 p4333 A70-45200

Apollo and Skylab photographic systems, describing equipment and missions 24 p4333 A70-45360

Image forming performance in photographic system design, considering Cobb chart resolution as figure of merit 24 p4334 A70-45449

PHOTOGRAPHIC FILM

NT MICROFILMS

UV sensitive spiropyran films coloration mechanism and color structure stabilization, discussing film and laser applications to optical data recording and storage 01 p0086 A70-10357

Broad bandwidth electronic analysis of high resolution photographic film using flying spot CRT or rotating mirror devices 02 p0302 A70-12613

Photographic negatives analysis, storage and reconstruction using facility permitting photography conditions simulation and computer image treatment 02 p0302 A70-12614

Interferogram contrast as spatial frequency function measured for photographic materials used in holography by He-Ne laser 03 p0485 A70-13530

Dichromated gelatin holographic films preparation, sensitization, exposure and development, giving diffraction efficiencies and reconstruction SNR 04 p0691 A70-15031

Automatic measurement of frequency-contrast characteristics of photographic films using linear, photoelectric and high speed comparator devices 05 p0852 A70-16865

Previous radiation exposure effect on photographic film noting increased sensitivity at UV frequencies 06 p1065 A70-17890

Minimum altitudes for illumination levels of aerial color photographic film calculated for different landscapes 07 p1283 A70-19633

Photographic film imagery, degraded by long term artificial atmospheric turbulence, restored by spatial filters placed in Fourier transform plane 07 p1336 A70-20090

Reconstructed holographic image complex amplitude expression derived, showing effects of film optical transfer function, size and shape 08 p1500 A70-21789

Hypersensitization of IR films for use in stellar photometry, discussing laboratory and astronomical tests 09 p1673 A70-22158

Aerophoto film emulsion layer and backing deformation magnitude and direction, suggesting use of photoplates for astrophotography 09 p1673 A70-22166

Color radiography with photographic negative film exposed to X rays, obtaining same thickness latitude with improved detail sensitivity on single emulsion line 10 p1887 A70-24168

Equidensity film advantages in photointerpretation relating to remote sensing in hydrology and land use 10 p1889 A70-24502

Orthophoto Attachment for A8 autograph to produce black and white and color aerial photographs on negative film 10 p1891 A70-24739

Photographic films for astronomy and spectroscopy, discussing resolving power, light sensitivity, antihalo lacquer and emulsions 10 p1892 A70-25129

Film reduction and time keeping used at Smithsonian Astrophysical Observatory for Baker-Nunn films 11 p2007 A70-26196

Quantitative analytic composite photography, performing image density point-to-point subtraction of two negatives 13 p2406 A70-28905

Photographic enhancement by slightly offset film sandwiching 14 p2586 A70-30979

Coherent or spatially incoherent light recordings of Fourier transform holograms, investigating resolution cells film grain and signal to noise ratio 14 p2588 A70-31207

Photographic materials for holography, discussing spectral sensitivity, grain size, resolution, transfer functions, diffraction efficiency, etc 17 p3084 A70-35003

Reciprocity law between radiation intensity and exposure time for photographic films in vacuum UV spectrum region, investigating departure at various wavelengths 18 p3257 A70-36281

Optimum developer for aerial photofilms processing, relating light sensitivity and information capacity 18 p3258 A70-36283

Meteor spectrosensitometric properties of panchromatic plates and films for aerial photos, investigating parametric conditions effect on image quality 19 p3422 A70-37653

Color film /XRC/ application in Mexico during solar eclipse of 7 March 1970, showing little color and tone distortion 19 p3423 A70-37751

Efficiency, low noise and photochromic effects suppression in bleached silver halide holography with various films 20 p3627 A70-39097

Pulsating light source afterglow increasing high speed film information content, discussing streak image, tearing process and impact stress tests [SMPTE PREPRINT 66] 22 p4032 A70-43036

Degraded photographic image enhancement limitations due to film grain noise 23 p4193 A70-43820

Diazo compounds purity effect on photosensitive photographic film quality, determining color image reproduction density 24 p4334 A70-45498

Photo copying in diapositive form, using ruby laser light on IR film 24 p4352 A70-45559

X ray films sensitometric investigation in medical and industrial radiography, evaluating HVL and ISO methods for X ray quality

24 p4337 A70-45710

Photographic paper as emulsion film substitute in industrial radiography, evaluating sensitivity and image contrast

24 p4337 A70-45715

PHOTOGRAPHIC MEASUREMENT

Photochronographic measurements of high speed rotor vibrations, showing precision and nutation components

01 p0093 A70-11268

Two phase flow visualization by various photographic and optical methods, describing equipment and lighting used and types of data obtainable

02 p0305 A70-12834

Interferogram contrast as spatial frequency function measured for photographic materials used in holography by He-Ne laser

03 p0485 A70-13530

Photo-optical instrumentation - Conference, Washington, D.C., August 1968, Volume 1

03 p0487 A70-13651

Photographic pyrometry for surface temperature measurements on ablation models, discussing technique accuracy and limitations

04 p0694 A70-15536

High speed photographic study of breakdown, crack formation, thermal explosions and molecular weight of transparent plastic dielectrics under laser beam

05 p0869 A70-16210

Optimal scale selection for aerial surveys by analyzing aerial photography data

07 p1278 A70-18690

Transistorized circuit for automatic control of photographic studies of pupillary reaction transient states in rabbits subjected to light stimulus

07 p1216 A70-18731

Color and black-and-white photomicrographs and photomicrographs of Apollo 11 moon rock sample consisting of spongy gray mass of pumice-like material

07 p1288 A70-20224

Atmospheric turbulence parameters in meteor zone determined from simultaneous photographic and radar observations, determining turbulent diffusion coefficient dependence on height

08 p1563 A70-20546

Atmospheric particles photographed in situ by cameras using microsecond flash lamps, discussing required mechanical motion compensation at aircraft speed

10 p1886 A70-23930

Quadratic error of semiautomatic measuring apparatus for photographic plates, noting operator contribution

11 p2051 A70-26182

Spatial geodesy calculations based on photographs of satellites against star background, recommending ECHO type satellites

11 p2046 A70-26191

Photographic techniques for artillery projectile flight evaluation, emphasizing high speed range and drum film image synchronized cameras

13 p2407 A70-29159

Atmospheric turbulence parameters in meteor zone determined from simultaneous photographic and radar observations, determining turbulent diffusion coefficient dependence on height

15 p2796 A70-31455

Upper atmosphere turbulence spectra of passive contaminants deposited by rockets from radiometrically calibrated photographs of chemical trails

15 p2725 A70-31688

Monochromatic radiation angular distribution surface reflectance measurement using photographic reflectometer

[AIAA PAPER 70-859] Cumulative jets during shock induced collapse of air cavities in thin fluid layers, using high speed motion picture photography

17 p3074 A70-35742

Atmospheric turbulence scale and dissipation from 80 to 120 km, using photographic observations of Leonid meteor trails

19 p3515 A70-37663

Optical system mtf measurement by photographic technique for comparing telescopic sight with simulator, discussing performance

19 p3428 A70-38511

Auroral photographic and visual observations, discussing satellite results and substorm development

19 p3417 A70-38730

Comet Ikeya-Seki 1965 f tail formed by dust particles continuous ejection, using preperihelion photographs

19 p3527 A70-38792

Aircraft trajectory postflight reconstruction involving photographic starfield and landmark referenced to inertial navigator output, discussing optimal data smoothing technique

[AIAA PAPER 70-1022]

20 p3666 A70-39512

Shock wave and surface velocity measurements in exploding foil testing by streak photography with image converter camera

21 p3824 A70-40863

Photographic determination of star positions at closed block plate adjustment, considering accuracy expectancy

21 p3889 A70-41146

Low pressure supersonic wake measurement by differential interferometer in double pass polarized light [SMPT PREPRINT 95]

22 p4036 A70-43060

Supersonic wakes visualization and photographic measurement by schlieren techniques, using amplitude subtraction and He-Ne laser

22 p4036 A70-43061

CW laser beam power density distribution monitoring by self calibrating photographic dosimetry technique

24 p4307 A70-45343

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs

24 p4429 A70-46008

Photographic representation of localization center of anomalous retinal correspondence

24 p4310 A70-46343

PHOTOGRAPHIC PROCESSING

Automatic photo-optical technique for processing of cineangiograms to find time-course history of left ventricular volume

04 p0641 A70-14559

Computer processing role in film scanning and digitizing for enhancing X ray and radioisotope scanner images in medical radiographs, discussing image noise reduction

04 p0654 A70-14562

Dichromated gelatin holographic films preparation, sensitization, exposure and development, giving diffraction efficiencies and reconstruction SNR

04 p0691 A70-15031

Photographic emulsions used for astronomical photography in U.S., discussing hypersensitization, exposure, processing and image evaluation methods

06 p1071 A70-18516

Bleach process giving high efficiency low noise holograms using potassium ferricyanide, noting drying procedure and developer

06 p1072 A70-18520

Photogrammetric processing of aerial photographs using setting values of phototriangulation by stereocomparator and electronic computer

07 p1278 A70-18691

Threefold reduction of aerial negatives facilitating microfilming without impairing accuracy and clearness of image details

07 p1278 A70-18692

Optimum image scale and longitudinal overlap in continuous orthophoto map production regarding sheet dimensions, instrumental ranges, flight path tolerances and ground relief

13 p2407 A70-29165

Pattern recognition systems design and applications in medical and photographic data classification

13 p2374 A70-29580

Herschel effect in UV solar photography in developing autotopographic photographic film for bright photospheric recording

13 p2497 A70-29853

Airphoto interpretation, discussing descriptive, digital and photographic methods of representing recognition process results

14 p2585 A70-30642

Photographic enhancement by slightly offset film sandwiching

14 p2586 A70-30979

Optimum developer for aerial photofilms processing, relating light sensitivity and information capacity

18 p3258 A70-36283

Photographic processing methods for high efficiency low noise phase holograms on silver halide emulsions

22 p4025 A70-42286

Combined hypersensitization and rapid in situ processing for time-average observation in real time hologram interferometry

22 p4025 A70-42321

Degraded photographic image enhancement limitations due to film grain noise

23 p4193 A70-43820

PHOTOGRAPHIC PROCESSING EQUIPMENT

Photogrammetric processing of aerial photographs using setting values of phototriangulation by stereocomparator and electronic computer

07 p1278 A70-18691

Stereo photographs conjugate image area matching, comparing automatic optical and electronic correlation techniques

09 p1680 A70-23067

PHOTOGRAPHIC RECORDING

Electromagnetic procedures and camera-spectrometer system for studying detonation processes, measuring mass flow rates and explosives spectra

01 p0090 A70-10887

Artillery type projectiles field photography in flight in connection with service integrity evaluation of weapon components under real environment conditions

03 p0490 A70-13658

Rotating prism method for obtaining time correlation between streak photographs and characteristic waveforms of flash X ray discharges

03 p0492 A70-13762

Performance characteristics of RDX-metal sheath systems, using high speed motion picture photography for missile design applications

03 p0550 A70-14141

Schwerd color drawings of amplitude and intensity distributions of Fraunhofer diffraction patterns, verifying accuracy with computer generated diffraction plate photographs

04 p0719 A70-15014

Simultaneous recording of near and far field diffraction patterns at several exposures for single laser pulse

04 p0701 A70-15022

Hologram recording materials properties and limitations, discussing diffraction efficiency of thick and thin amplitude and phase holograms, silver and non-silver halide noise effects, etc

04 p0690 A70-15026

Transient hologram recording with fluorescein-boric acid glass organophosphor, noting effects of dye concentration, sample thickness, laser power and excited state lifetime

04 p0690 A70-15027

Cine recording ophthalmoscope with TV monitoring for retinal photography during centrifugation

06 p1061 A70-17286

Photoelectric exposure meter for meridian circle readings photographic recording

08 p1496 A70-21159

Automatic photographic data processing system with transient reproducer to obtain digital format for computer analysis

09 p1673 A70-22030

Small contrast objects detection by photographic technique, measuring gradients, granularity noise and density variations for emulsions

09 p1673 A70-22157

Stars photographic position determination errors with NAFA-3C/25 camera, comparing films and plates

09 p1673 A70-22164

High temperature vacuum dilatometer for continuous photographic recording of expansion curves for refractory materials, determining thermal expansion coefficient

09 p1675 A70-22565

Time lapse photographic recording and scoring in-flight performance of helicopter aviator trainees during hypothetical tactical instrument mission

09 p1624 A70-22900

Control system for high speed photographic diagnostics based on rotating mirror action

09 p1679 A70-22993

Satellites equatorial topocentric coordinates determination from photographic observations

09 p1763 A70-23328

Holographic 3D movie of front-lighted opaque objects, recording diffuse reflection with CW laser and high resolution film

09 p1684 A70-23533

Meteor particle orbits, comparing inclined radio reflections with photographic and straight radar observations

14 p2636 A70-30322

Hologram superposition on photosensitive surface for multiimage successive recording, examining resolution, SNR, etc

15 p2734 A70-31596

Onboard IR receiver and ground photorecorder for Meteor satellite cloud tracking, using computer processed data

15 p2738 A70-32112

Aerospectrometric camera facilitating spectral brightness coefficients determination for object identification

16 p2908 A70-33227

Four dimensional recording using synchronous multiple pulse ruby laser holography

17 p3088 A70-35027

High speed photographic recording of bursting rotor in fragment control device

17 p3063 A70-35523

Systematic errors in rotating mirror framing cameras and film records for quantitative high speed motion analysis

17 p3095 A70-35632

Fiber optics lens for transferring specimen image to camera during vibration tests

17 p3095 A70-35633

Large photographic telescope characteristics for stellar and planetary observations, noting differential refraction influence on plate scale factors

18 p3259 A70-36608

Photographic patterns from brittle coatings, grids, photoelasticity and moiré, considering variability, association with other images and esthetic value

19 p3546 A70-38343

Holographic recording in transparent bodies with optical characteristics changeable under intensive light 20 p3633 A70-39999

Circular cylindrical shell stability under axial compressive load, analyzing buckling process by high speed photographic recording of photoelastic isoclinic pattern changes 20 p3735 A70-40528

Artificial rain erosion effects on missile and spacecraft recorded via high speed photography 20 p3635 A70-40531

Particulate boron levitated electrostatically in air and ignited by pulsed laser to avoid contamination, investigating combustion by high speed photography [SMPT PREPRINT 100] 22 p4032 A70-43034

Electronographic camera for ultrahigh speed photography, using nuclear emulsion as recording medium [SMPT PREPRINT 54] 22 p4033 A70-43039

High speed stroboscopic photography, discussing multiple flash and motion picture photography and TV operated strobe light [SMPT PREPRINT 42] 22 p4033 A70-43040

Orthogonal multistreak recording by framing camera applied to arrival of detonation wave at front surface of explosive charge [SMPT PREPRINT 32] 22 p4034 A70-43045

High speed holographic recording of transient events by single shot ruby and Nd-doped pulsed lasers, applying to shock tubes and wind tunnels [SMPT PREPRINT 3] 22 p4035 A70-43056

Material transfer image recording using focused laser beam, discussing experimental setup and test results 22 p4040 A70-43605

Computer photokymographic recording of gravitational-inertial force environment effects on cardiovascular and respiratory systems on centrifuge 22 p3976 A70-43709

Holographic primary and conjugate images properties, considering applications in moving scenes recording and multiple images storage and retrieval 23 p4193 A70-43924

Hologram superposition on photosensitive surface for multiimage successive recording, examining resolution, SNR, etc 23 p4195 A70-44280

PHOTOGRAPHIC RECORDING INSTRUMENTS

U OPTICAL MEASURING INSTRUMENTS

U PHOTOGRAPHIC RECORDING

U RECORDING INSTRUMENTS

PHOTOGRAPHIC TRACKING

Mathematical relations and procedures for automatic satellite tracking by four axis Zeiss camera, discussing motion along small circle approximation and punch tape criteria 02 p0255 A70-11770

Automatic camera theodolite at Sophia satellite tracking station, discussing instrument constants 02 p0273 A70-11774

Q switched and high energy pulse laser devices for location of satellite photographed by night against background of stars, including optimization in noise [ONERA-TP-753] 02 p0313 A70-12369

Computerized method for processing photographic earth satellite observation results, transforming coordinates by nonconformal approximation of polynomial function 05 p0814 A70-16367

Artificial earth satellites photographic observation without chronometric recording aids, determining location and time by single indicator 09 p1635 A70-23055

Satellite photograph equatorial coordinates dependence on magnitude of evaluated region, objective distortion and transformation methods 09 p1679 A70-23056

Soviet cameras for photographic observation of artificial celestial bodies, noting equatorial platform mount, mirror lenses and installations 10 p1892 A70-25128

Method of dependence involving triangulation applied to reducing photographs of earth satellites 11 p2006 A70-26185

Schmidt photographs reduction, noting film bending during exposure and mean error of satellite position 11 p2007 A70-26195

Satellites photographic positions accuracy compared with stars based on stellar coordinates, investigating causes of difference 11 p2008 A70-26198

Satellite coordinates estimation precision by comparing artificial satellite positions obtained simultaneously by photographic cameras 11 p2008 A70-26199

Photographic satellite plates reduction by astrometric method at geodetic institute at Potsdam, discussing star coordinates, astronomic refraction, etc 11 p2008 A70-26200

French photographic observations of Apollo 12 translunar trajectory 15 p2697 A70-31676

Bubble chamber photography and track image reconstruction by holography, discussing measurement apparatus, accuracy and tolerances 19 p3428 A70-38510

Artificial satellites photographic observation by camera, describing sighting system, tracking adjustments and shutter controls 19 p3433 A70-38793

PHOTOGRAPHS

NT CLOUD PHOTOGRAPHS

NT LUNAR PHOTOGRAPHS

NT MOTION PICTURES

Collection of papers on optics covering dielectric multilayer filter synthesis, photographic image, light interaction with free electrons, laser radiation, optical echoes, etc 02 p0340 A70-12878

Photographic image reconstruction of spatially incoherent illuminated object using twofold holography 09 p1675 A70-22486

Foreground presence for computer generated and painted three dimensional photographic displays using fly eye lenses 16 p2906 A70-33177

Holographic stereo model, comparing stereoscopic perception of phase and amplitude to model consisting of overlapping photos 16 p2908 A70-33228

Photographic image deblurring method, using image forming holograph and amplitude weighting transparency 22 p4042 A70-43670

Book on photographic action of ionizing radiations in dosimetry and medical, industrial, neutron, auto- and microradiography, emphasizing photographic materials reaction to photons and particles 02 p0337 A70-11696

Photographic relief images with arbitrary profile produced by using image relief height as spatial frequency function 02 p0300 A70-12462

Three dimensional X ray imaging technique from conventional radiograph set photoreduced and projected by special purpose imaging system 04 p0686 A70-14561

Holography history and applications to interferometry, contour mapping and three dimensional photography 07 p1279 A70-18900

High resolution multiple spark photography, discussing facility 09 p1680 A70-23070

Diffraction pattern sampling for automatic pattern recognition in photographic imagery 09 p1689 A70-23802

Transistorized differed synchronizer for delaying photoflash initiation in scientific photography 12 p2228 A70-26879

Laser beam photography utilization in engineering for optical pointers, interferometers and holographic visualization of surface strain and vibration 13 p2406 A70-28914

Laser beam photography by multiple reflections from partially reflecting mirrors 16 p2913 A70-33985

Electronically modified stroboscope as light source for multiflash photography of transient events, noting mechanical switches elimination 18 p3262 A70-37095

Magnetically focused two and four stage cascade picture amplifiers for astronomy and nuclear physics applications 20 p3630 A70-39426

Photographic images formation mechanism, examining streaks resolving power and total densities 20 p3632 A70-39747

High speed stroboscopic photography, discussing multiple flash and motion picture photography and TV operated strobe light [SMPT PREPRINT 42] 22 p4033 A70-43040

PHOTOINTERPRETATION

Satellite topocentric equatorial coordinates determination from photographic observations 02 p0363 A70-11773

Photointerpreters information extraction, studying psychological effects of image contrast and resolution on accuracy of target detection 02 p0300 A70-12459

Photographic negatives analysis, storage and reconstruction using facility permitting photography conditions simulation and computer image treatment 02 p0302 A70-12614

Stereocomparator and electronic computer used to determine aerial photographs relative orientation elements, discussing measurement error elimination 03 p0482 A70-13108

Space research photography role in studying earth and moon atmospheres and surfaces, determining spectral bands for contrast 03 p0483 A70-13168

Solar corona photographs for isophotes during solar eclipse of 22 September 1968 revealing chromospheric flare and prominences 03 p0569 A70-13362

Photometry as aid for aerial photography, discussing resolution, mapping, etc 03 p0486 A70-13554

Orbiter imagery analysis program for Apollo landing site selection, using photographic interpretive techniques 03 p0571 A70-13660

Lower E region turbulence interpretation based on high resolution photographs of artificial sodium vapor trails 03 p0476 A70-13913

Visual interpretation of moon and Mars surface photographs taken from satellites, analyzing craters and bumps 04 p0686 A70-14626

Cloud cover consequence on earth photographic space missions simulated by Monte Carlo method using worldwide statistics 04 p0676 A70-14636

Apollo 9 space photography of earth surface and use for quantitative analysis of earth resources, including supporting aircraft photography [AAS PAPER 69-572] 04 p0687 A70-14650

Plasma camera photographs of K plasma spatial distribution with electric fields and density gradients perpendicular to magnetic field, observing rotating irregularities around edge 04 p0728 A70-15005

Band shaped polar auroras widths from photographs analysis, noting wider bands for midnight hours and winter solstice 04 p0682 A70-15732

Geological contribution of satellite photography, discussing synoptic surveyability of vast areas and reduced scale maps of little known remote territories 05 p0837 A70-16073

Geological interpretation of aerial photographs, discussing picture quality, scale, film material and applications 05 p0840 A70-16499

Cartographic tying-in of Zond 3 lunar surface photographs to verify maps of moon far side 05 p0918 A70-16918

Meteor fragments motion and vaporization based on photographs 06 p1140 A70-17733

Optimal scale selection for aerial surveys by analyzing aerial photography data 07 p1278 A70-18690

Visual and quantitative image definition, evaluating microdetail clarity in panchromatic, IR, color and color IR aerial photographs 07 p1281 A70-19369

Visual perception of black-and-white photo in aerial photographic interpretation, examining processes in human brain 07 p1221 A70-19777

Aerial photographs interpretation methodology based on soil sciences taking into consideration reference level of photointerpreter 07 p1284 A70-19778

Lunar photography interpretation, discussing topographic maps obtained by spacecraft 07 p1284 A70-19779

Selenodetic investigations based on lunar photographs with background stars, converting equatorial coordinates to orbital using Cracovian formulas 08 p1564 A70-20560

Lunar Orientale region structure geological interpretation based on Lunar Orbiter 4 photographs 09 p1751 A70-22196

Remote sensing systems for vegetation analysis, discussing machine-aided photointerpretation methods for data analysis [AIAA PAPER 70-308] 09 p1678 A70-22879

Earth resources remotely sensed data analysis with emphasis on machine analysis over manual photointerpretation, discussing pattern recognition techniques, information systems, etc [AIAA PAPER 70-292] 09 p1678 A70-22891

Satellite photograph equatorial coordinates dependence on magnitude of evaluated region, objective distortion and transformation methods 09 p1679 A70-23056

Satellites equatorial topocentric coordinates determination from photographic observations 09 p1763 A70-23328

Analytical phototriangulation block equalization by two stage polygon method, discussing computer algorithm for problem solution 09 p1681 A70-23344

Photointerpretation applications to kaolin deposit detection, railway tunnel collapse analysis and highway drainage 10 p1873 A70-24075

Equidensity film advantages in photointerpretation relating to remote sensing in hydrology and land use 10 p1889 A70-24502

Satellite photographs for geological mapping and research assessed against interpretation of field data and conventional aerial photographs 10 p1876 A70-24640

Remote sensor input radiation at aperture, signals within and sensed data processing by computer techniques, noting automatic image interpretation 10 p1841 A70-24733

Intercensus population estimate by air photos, topographic maps and local and state census of population and housing 10 p1878 A70-24737

Forest inventory data collection by 70 mm photography, creating correction surface over model area of large scale pair 10 p1880 A70-24754

Polluted air mass concentration determined by photogrammetry, producing topographic type map with respect to vertical and oblique aerial photographs 10 p1880 A70-24755

Laser-light spatial-domain scanning function for deconvolution of blurred photographs using point-spread and holographic Fourier transform division filter 11 p2050 A70-25832

Classical astronomical photographic methods for reducing satellite photographs taking into account linear and nonlinear methods, analyzing random errors 11 p2006 A70-26184

Method of dependence involving triangulation applied to reducing photographs of earth satellites 11 p2006 A70-26185

Satellite observations reduction, determining continuous transformation over whole field of photograph by local transformations 11 p2007 A70-26187

Algorithms for transforming coordinates from photographic plate system to equatorial coordinates, noting applicability with unknown optical center position in plate system 11 p2007 A70-26188

Plate reduction method for Schmidt satellite camera, considering satellite position, distortion parameters, etc 11 p2007 A70-26193

Photographic plate reduction method at Polish Academy of Sciences based on sufficient reference stars, correcting x and y coordinates 11 p2007 A70-26194

Schmidt photographs reduction, noting film bending during exposure and mean error of satellite position 11 p2007 A70-26195

Film reduction and time keeping used at Smithsonian Astrophysical Observatory for Baker-Nunn films 11 p2007 A70-26196

Photographic reduction techniques at Meudon Observatory, discussing computation of standard and measured coordinates 11 p2007 A70-26197

Satellites photographic positions accuracy compared with stars based on stellar coordinates, investigating causes of difference 11 p2008 A70-26198

Photographic satellite plates reduction by astrometric method at geodetic institute at Potsdam, discussing star coordinates, astronomic refraction, etc 11 p2008 A70-26200

Solar corona photographs for isophotes during solar eclipse of 22 September 1968 revealing chromospheric flare and prominences 11 p2118 A70-26727

Residential urban environment data extraction from high and low resolution images 12 p2216 A70-26907

Gemini 12 photographs examined for urban and transportation data content 12 p2228 A70-26909

Spaceborne photography for detecting and identifying road networks, using color separation plates and photograph enlargement 12 p2216 A70-26910

Photography for geological interpretation, comparing color, color IR, and black-and-white photographs from spacecraft and aircraft 12 p2221 A70-26956

Landscape structure interpreting from aerial photos taken vertically from overflying aircraft 12 p2231 A70-27237

Aerial reconnaissance of soils, rocks, vegetation and streams, comparing color, IR color, and black-and-white photography 12 p2236 A70-27873

Automatic image interpretation and classification - Conference, Pisa-Tirrenia, Italy, August-September 1968 12 p2193 A70-28101

Automatic image interpretation and classification using two dimensional digital Fourier transforms 12 p2193 A70-28106

Methodology for machine processing for identification of individual crop types, discussing discriminant photoanalysis 12 p2227 A70-28108

Earth global photography by satellites, discussing photointerpretation 12 p2227 A70-28270

Venus photographs analysis during synoptic periods, noting inconclusive results on cloud layer and planetary surface structures 12 p2311 A70-28311

Satellite photographs interpretation for cloud types and patterns with allowance for transmission characteristics, image cut-off at corners and sun angle and glint 13 p2394 A70-28786

Quantitative analytic composite photography, performing image density point-to-point subtraction of two negatives 13 p2406 A70-28905

Photographic techniques and optical equipment in orbiter missions for lunar surface photography 13 p2407 A70-29164

Phobos image analysis on Mariner 7 frame 7F91, discussing surface darkness, limb profile and geometric albedo 13 p2492 A70-29266

Monograph on troposphere pressure, temperature and humidity and satellite TV photographs interpretation 13 p2446 A70-29786

Meteorological satellites TV pictures processing for hydrological information, emphasizing snow photographs interpretation 14 p2601 A70-30138

Sun glitter on sea surface from space photographs, considering wind and sea conditions effect on shape and brightness of patterns 14 p2572 A70-30345

Air photographs or imagery linear features, assessing sensors performance and developing interpretation criteria in photogeological research 14 p2573 A70-30641

Airphoto interpretation, discussing descriptive, digital and photographic methods of representing recognition process results 14 p2585 A70-30642

Band shaped polar auroras widths from photographs analysis, noting wider bands for midnight hours and winter solstice 14 p2575 A70-30815

Land use classification system of photointerpretation from remote sensor imagery 14 p2576 A70-30976

Soil characteristics determination from black and white, color and IR aerial photographs 14 p2577 A70-30980

Mixed hardwoods and pine area forest cover types identification by aerial photography 14 p2577 A70-30981

Lunar soil and rocks photometric and polarimetric properties from high resolution Surveyor pictures 14 p2644 A70-31054

Fringe interpretation in stress-holo- interferometry, emphasizing isopachic-isochromatic interaction effects in photoelastic analysis [SESA PAPER 1642] 15 p2739 A70-32309

Transistor densitometer used for variable star interpretation by amateur photographers 15 p2740 A70-32348

Lunar atmospheric pressure based on twilight horizon photographic data from Surveyor 7 15 p2803 A70-32500

Selenodetic investigations based on lunar photographs with background stars, converting equatorial coordinates to orbital using Cracovian formulas 15 p2805 A70-32715

Mariner 7, 8 and 9 lunar photographs, discussing evidence for internally heated moon 16 p2973 A70-33112

Optical filtering applied to aerial photointerpretation of oceanographic, archeologic and town planning data 17 p3081 A70-34620

Day and night IR imagery compared for interpreting vegetation 17 p3079 A70-35618

Gemini spacecraft photograph patterns revealing relationship between cloud formation and topography 18 p3258 A70-36298

Turbulent flows shadowgraph analysis, solving electromagnetic equations for optical response 18 p3242 A70-36692

Geometric methods for processing TV images of earth cloud cover 18 p3286 A70-36964

Lunar volcanic ridges features from interpretation of photographs by telescopes and satellites 19 p3418 A70-37992

Satellite TV cloud picture digital representation, deriving algorithms for statistical analysis of geometrical features 19 p3463 A70-38755

Mach-Zehnder interferometer for holographic investigation of inhomogeneities in transparent media, discussing photointerpretation error reduction 20 p3633 A70-39749

Orbital photography interpretation from test rockets and Apollo-Gemini spacecraft, considering environmental applications 20 p3634 A70-40321

Impact times measurement by photography, correlating projectile velocity with projectile- target distance 20 p3635 A70-40530

Natural and cultural landscape pattern classification in aerial photointerpretation using land-system concept 21 p3826 A70-41401

Internal and integral photointerpretation in aerial photography, discussing landscape information reliability increase by interdisciplinary method 21 p3826 A70-41403

Instrumental and atmospheric observational problems regarding dark mottles, fibrils and H alpha solar limb photographic interpretations 21 p3926 A70-42199

Image holography nonlinearities analysis, using photographic film characteristics for phase deviation enhancement 22 p4031 A70-42951

Horizontal passpoint error in block analytic aerotriangulations with dense perimeter ground control 22 p4031 A70-42964

Mapping from satellite-collected earth surface images, emphasizing optical/mechanical scanner images 22 p4037 A70-43089

Lunar atmospheric pressure based on twilight horizon photographic data from Surveyor 7 23 p4240 A70-43921

North Carolina continental shelf discolored water origin, movement and dissipation from Apollo 9 photograph interpretation 24 p4329 A70-45361

Flood plain boundaries delineation by panchromatic and color airphoto interpretation 24 p4329 A70-45362

PHOTOIONIZATION

Spectral distribution of X ray atmospheric absorption used to determine high energy photoelectrons spectrum 01 p0172 A70-11494

Diffuse soft X ray photoionization and heating of H I regions compared to cosmic ray heating 02 p0364 A70-11784

Photoelectron energy spectra and partial photoionization cross sections for carbon dioxide determined with spectrometer at monochromatic incident radiation wavelengths 02 p0343 A70-11903

Production rate constants for hydrated positive ions in photoionized nitric oxide-water afterglows 07 p1346 A70-20245

Nitrogen molecule photoabsorption and photoionization cross sections determination, discussing ionization probability variations and radiationless transitions 07 p1347 A70-20358

Charged particle interaction influence on photoionization cross section of negative hydrogen ion, considering initial state polarization leading to free s wave electron 09 p1732 A70-22826

Quasars photoionization of intergalactic high density hydrogen gas to interpret absorption features absence, noting gas temperature 10 p1942 A70-24628

Threshold photoionization cross sections for homonuclear diatomic N molecules calculated from Slater orbitals and Coulomb waves 11 p2086 A70-25833

Chemical kinetic model for photoexcitation and photoionization of cold argon ahead of strong shock wave, predicting electron and excited atom concentrations [AIAA PAPER 68-666] 11 p2090 A70-25953

Ruby laser beam used to trigger high voltage spark discharge in vacuum, studying auxiliary photoionization during firing delay or failure 12 p2249 A70-27999

Radial wave functions and photoionization cross sections for neutral atoms from central potential model based on Slater and Klein-Brueckner approximations 13 p2455 A70-29133

Molecular oxygen positive ion density in upper ionosphere as function of photoionization, ambipolar diffusion velocity and altitude effect 13 p2399 A70-29233

F I region ion structure diurnal variations, calculating photoionization rates 14 p2571 A70-30227

Hydrogen UV geocorona photoionizing effect on nighttime E region electron density in low and midlatitudes, comparing with ionosonde data 14 p2581 A70-31270

Thermal energy negative ion-molecule reactions in photoionized NO-water vapor mixtures, determining rate constants by stationary afterglow system 16 p2954 A70-33280

Cosmic X rays interstellar absorption, giving atomic He total photoionization cross section 18 p3308 A70-36899

F region photoionization rate vs height twin peak profile in presence of temperature maximum, taking into account ionization of atmospheric gases by quasi-monochromatic radiation 18 p3254 A70-37031

Alkali metals ionization by photons and atomic projectiles, discussing results in first Born approximation 20 p3676 A70-40153

Photoionization cross sections for atoms and ions of carbon, nitrogen, oxygen and neon as function of wavelength for H II regions and planetary nebulae 22 p4104 A70-42997

Upper atmosphere photoionization by extreme UV solar radiation compared with ionization by charged particles collisions 22 p4096 A70-43302

Bremsstrahlung X rays caused by energetic electrons precipitating into upper atmosphere, calculating photoionization rate as function of altitude 22 p4096 A70-43310

Laser induced gas breakdown, considering plasma generation and properties 23 p4225 A70-44185

Multiphoton gas ionization by coherent radiation, showing electron transitions role with gas ionization model 23 p4201 A70-44205

Autoionization theory application to partial solar photoionization cross sections for production rates of vibrationally excited positive molecular oxygen ions 23 p4222 A70-44785

Upstream gas photoionization caused precursor ionization effects on MHD switch-on shock structure 24 p4382 A70-45106

F I region ion structure diurnal variations, calculating photoionization rates 24 p4331 A70-46302

PHOTOLUMINESCENCE

NT X RAY FLUORESCENCE

Rapid photoprocesses decay kinetics, using CW Ar ion laser beam interrupted periodically by electro-optical shutter 02 p0314 A70-12742

Reflected light directional diagram effects on scintillating surface luminescence yield, considering scattering function gradient 12 p2231 A70-27310

Electric field heating effect on edge photoluminescence of n-type GaAs, noting increase in electron energy 12 p2286 A70-27368

Semiconductor luminescence and photodetector diodes near IR region transmission, describing frequency response measurements 22 p4087 A70-43445

Daytime near horizon atmospheric luminescence measurement by Cosmos 224 satellite, discussing contributions of nitrogen and aerosol and Rayleigh scatterings 23 p4188 A70-44061

Threshold characteristics of injection and electron excitation semiconductor lasers having photoluminescence properties of n-type GaAs single crystals 23 p4203 A70-45065

UV excited powdery fluorescent products, describing cryostat for photo and thermoluminescence at various temperatures 24 p4339 A70-46097

PHOTOLYSIS

NT RADIOLYSIS

Methane photochemistry in Jupiter atmosphere, investigating acetylene, ethylene and ethane photolysis 02 p0367 A70-11815

Xenon sensitized photolysis of carbon dioxide compared with direct photolysis at 1470 A resonance line 03 p0441 A70-14005

Vacuum UV flash photolysis of carbon suboxide, noting pressure dependent reaction rates of carbon atoms with various gases 04 p0645 A70-14391

Photoelimination of N from fused-ring triazoles in methanol 05 p0810 A70-16046

Dicyanostilbene formation from phenylethyne azide and isocyanate 05 p0811 A70-16054

Radicals in low pressure supersonic free jets, investigating production by flash photolysis 07 p1343 A70-20126

Bromine monoxide formation by atomic oxygen-bromine reaction in flash photolysis of bromine-nitrous oxide and bromine-nitrogen dioxide mixtures 08 p1455 A70-21342

Photolytic reactions mechanism in photochromic glass with silver halide crystals formed during glass manufacture, discussing properties and applications 08 p1499 A70-21683

Specific intensity production from photolysis of ozone-oxygen mixtures at 2537 A, investigating mechanism 10 p1831 A70-24565

Quenching efficiency of molecular oxygen relative to nitrogen, carbon monoxide, carbon dioxide and argon, involving photolysis of gas mixtures 13 p2361 A70-28498

Ketene and diazomethane flash photolytic measurement of reaction rates of singlet-triplet methylene deactivation 15 p2694 A70-31729

Direct sensitized photolysis of various dichlorobutanes yielding HCl 16 p2855 A70-33089

Pressure effects on quantum yields of carbon trioxide formation in gas phase ozone photolysis with carbon dioxide 16 p2856 A70-33653

Surface recombination centers protecting against discoloration of thermal control coatings due to chemical changes induced by photoproducts holes and electrons in oxide pigments 16 p2940 A70-33935

[AIAA PAPER 70-830] Molecular oxygen role in photolytic decomposition of ozone by intermediate quantum yield method, presenting rate constants 16 p2858 A70-34009

Oxadiazolone pyrolytic and photolytic fragmentation, noting intramolecular cyclizations and intermediate azomethine nitrene production 17 p3041 A70-34771

Photolysis of 3-phenyl-oxadiazol-5-one by UV irradiation, eliminating carbon dioxide 17 p3041 A70-34772

Aniline and o-anisidine production by photoelimination of nitrogen from fused ring triazoles 17 p3042 A70-34821

Optical charge transfer transitions in N-alkyl iodide salts, examining transient absorptions due to flash photolysis 18 p3226 A70-36765

Photolytic model of Jupiter belt excess temperatures and coloration compared to solid ammonia clouds, using IR and visual observations 19 p3513 A70-37410

PHOTOMAGNETIC EFFECTS

Photoconductivity and photomagnetic effect measurements in Ge for determining nonequilibrium current carrier concentration produced by Q switched neodymium laser 01 p0107 A70-10099

Carrier drift due to electromagnetic impulse, deriving expressions for photo emf generated in transverse magnetic field manifesting monopolar photomagnetic effect 13 p2452 A70-29282

PHOTOMECHANICS

U PHOTOGRAPHY

U PRINTING

PHOTOMETERS

NT ELECTROPHOTOMETERS

NT ULTRAVIOLET SPECTROMETERS

NT ULTRAVIOLET SPECTROPHOTOMETERS

Pritchard photometer analyzed for in-focus and out-of-focus operation using radial weighting function 01 p0091 A70-10918

In-flight radiometric calibration of low brightness OGO 4 airglow photometer 04 p0696 A70-15645

Compact and fully automatic fixed photometer for zenith measurements of night airglow intensities, calibrating sky observation through filter by constant intensity light source 05 p0845 A70-15821

Atmospheric turbidity measurements over U.S. using Volz sunphotometer 06 p1098 A70-18245

Photometric error analysis and optimum use of photomultipliers, discussing pulse-height spectra, detection and weighting systems 06 p1071 A70-18517

Analog computing spectral photometer for high temperature measurements in gas flames 07 p1285 A70-19896

Word organized photodetector array design for holographic read-only optical memories 07 p1288 A70-20148

High sensitivity photomultiplier TWT microwave photodetector with internal lowered secondary electron multiplier and spiral HF getter 09 p1645 A70-22413

Photodetector-electronic circuit matching channels for optical communication system, using minimum risk design criterion 12 p2237 A70-28153

Ballistic pulsed photometer calibration without etalon light pulse using radiation sensitivity, oscillation period and galvanometer damping 12 p2338 A70-28179

Balloon-borne photometer for collecting twilight and daytime OH intensity and rotational temperature variations data 13 p2399 A70-29240

Photodetector properties influence on optron transfer functions achieving light conversion by separating photocarriers with p-n junction 14 p2555 A70-30161

Photothermometer response to thermal shock, considering rapidly varying surface temperature measurement 16 p2901 A70-33104

Mercury cadmium telluride photodetectors, analyzing gain, signal current and radiation limits 16 p2905 A70-33153

Twilight sky brightness measurements at 5200 A for estimating upper atmospheric dust component, discussing error rates 16 p2899 A70-34184

Photodetector frequency response measurement, using beat light signals from mixed single mode He-Ne lasers 17 p3108 A70-35688

Far UV photometer for space research, isolating specific bands by combining spectral response of individual solar blind photocathodes with thin metallic films transmission qualities 17 p3096 A70-35766

Azimuthal moon telescope installation at cosmic ray station, noting photorecorder circuitry 18 p3256 A70-36108

Angular and geometric properties of actinometers, pyroheliometers and photometers, measuring direct and scattered circumsolar radiation 20 p3625 A70-39028

Amplitude modulated optical band signal detection, comparing optimal direct photodetector and superheterodyne receivers sensitivities 21 p3785 A70-40633

High speed photodetectors for microwave demodulation of light, discussing electrical properties, equivalent circuits and noise factors 21 p3799 A70-41420

Fluctuating light pulse packet detection by inertialess photodetector, deriving optimal algorithm 22 p3987 A70-42554

Semiconductor luminescence and photodetector diodes near IR region transmission, describing frequency response measurements 22 p4087 A70-43445

Signal arrival time variance in optical communication system with high lag photodetectors, examining input, detection and amplification noise 23 p4196 A70-44410

Subminiature transistor photosensor for direct measurements of capillary blood cell motion 24 p3409 A70-46119

NT ULTRAVIOLET PHOTOMETRY

NT VISUAL PHOTOMETRY

Quantitative method developed for photometric determination of B in nickel or titanium borides, using magnezon I reagent in alkaline solutions at various pH 03 p0504 A70-12983

Photometry as aid for aerial photography, discussing resolution, mapping, etc 03 p0486 A70-13554

Optical facilities of Apollo 11 mission and NASA Manned Spacecraft Center noting Fzadow telescopes, lunar cartography, photometric surface analysis, etc 04 p0687 A70-14690

Prelaunch photometric calibration of Surveyor TV system for reconstruction of lunar terrain televised pictures permitting system lunar performance prediction [AIAA PAPER 68-1138] 04 p0692 A70-15405

Automatic measurement of frequency-contrast characteristics of photographic films using linear, photoelectric and high speed comparator devices 05 p0852 A70-16865

Sensitivity distribution in working field of electro-optical converter tubes, noting use for photometric research 09 p1673 A70-22159

Auroral pulsation observed by Aerobee rocket instruments and ground multichannel photometer indicating primarily temporal fluctuation 09 p1671 A70-23497

Remote sensing of lunar photometric function at small phase angles by Apollo 8 command service module

12 p2297 A70-26926

Photometric determination of Ti with diantipyryl-methane in steels containing Se

18 p3277 A70-36465

Projection of integrating photometric spheres, discussing angular dependence on wall thickness, radiation losses and aperture dimensions

18 p3260 A70-36974

PHOTOMICROGRAPHY

Electrical and photographic methods for measuring microcracking in fiber reinforced plastics

08 p1501 A70-21916

Ti-Al-Zr-W-Si alloy fracture surface concentric markings number related to loading cycles after crack formation

10 p1904 A70-24837

Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hypervelocity from low energy impacts

[ALAA PAPER 69-367] 11 p2138 A70-26133

Water drop-solid surface collision experiments to study rain impact erosion process, using gas gun projectiles, high speed photography, photomicrography and profilometry techniques

22 p4116 A70-43096

PHOTOMULTIPLIER TUBES

Photomultiplier tubes for counting photoelectrons from photocathode, discussing pulse height distributions, SNR, quantum counting, statistical correlation and dark current properties

01 p0090 A70-10902

Spectrophotometric facility for measuring spectral characteristics of color filters, photomultipliers and photographic plates as function of temperature

02 p0301 A70-12494

Photocathode internal light scattering effect on photomultiplier time response

05 p0845 A70-15806

Duration measurements for sampling function in dynamic crossed field photomultiplier

05 p0849 A70-16655

Response variation and detection efficiency of funnelled channel electron multipliers for low energy protons and Ar ions

06 p1021 A70-17623

Photometric error analysis and optimum use of photomultipliers, discussing pulse-height spectra, detection and weighting systems

06 p1071 A70-18517

Signal to noise ratios and fluctuation spectrum of photomultiplier illuminated by laser passing through laser amplifier, noting population level effect

07 p1300 A70-19869

Heavy positive ions pulse counting by spiral-type continuous channel electron multiplier, noting long pulse rise time composed of numerous after pulsing

07 p1286 A70-19970

Secondary electron emission coefficients and energy distributions to investigate interaction between positive ions and Cu/Be dynodes of electron multiplier

07 p1344 A70-20127

Pulse characteristics of scintillator-photomultiplier-cathode ray tube channel for oscillographic recording of nanosecond pulses from neutron, gamma or X ray sources

08 p1496 A70-21218

High sensitivity photomultiplier TWT microwave photodetector with internal lowered secondary electron multiplier and spiral HF getter

09 p1645 A70-22413

Preamplifier-discriminator-gate generator in printed circuit for use with photomultipliers, noting pulse sensitivity and cost

09 p1679 A70-22997

Fatigue effects of incident illumination on area sensitivity, dynode gain stability and anode output for end-on photomultipliers

09 p1683 A70-23511

Channel electron multipliers design and operation, investigating parameters influencing amplification, resolving power and response probability

10 p1888 A70-24484

Cosmic ray muons continuous recordings, describing design and performance of plastic scintillators with photomultipliers

10 p1889 A70-24489

Lead type channel electron multipliers gain degradation in ultrahigh vacuum

10 p1849 A70-24557

Open magnetic electron multipliers (MEM) with continuous dynode and field strips for satellite-borne detection systems, emphasizing extreme UV detectors

11 p2049 A70-25628

Hybrid Cockcroft Walton multidynode photomultiplier supply for space applications, using miniature components and thick film technology

12 p2233 A70-27406

Photomultipliers single electron response by measuring electron pulse height distribution

12 p2236 A70-27850

Photomultiplier tubes for liquid scintillation equipment, emphasizing detection efficiency and coincidence background

14 p2587 A70-31005

Temporal dependence of photoelectron multiplier output waveform and focusing under photocathode alternating modulation, noting thresholds for optical reception

15 p2696 A70-31505

Photomultiplier tubes high quantum efficiency attainment by optical enhancement techniques

15 p2735 A70-31767

Open type secondary electron multipliers, discussing circuitry, emission recording, component materials and performance

16 p2873 A70-33231

Residual gases partial pressure measurement in vacuum chamber by mass spectrometer with electromagnetic scanner and electron multiplier, detecting electron current

19 p3421 A70-37466

Spurious photomultiplier response to short intense overexposure of atmospheric return using optical radar

21 p3828 A70-41474

Continuous channel electron multipliers (Channeltron) gain improvement via blanking method avoid detection of unwanted particles

23 p4197 A70-44477

PHOTON ABSORPTION

U ELECTROMAGNETIC ABSORPTION

PHOTON BEAMS

NT LIGHT BEAMS

Laser radiation coherence origin explainable by mechanism consisting of many photon emission process by many atoms

05 p0883 A70-16500

Photon propulsion with constant power in exhaust beam and intragalactic travel in force free space from solving relativistic rocket equations

06 p1132 A70-18105

Photon scattering in inhomogeneous medium, deriving expressions for mean number of photons escaping or annihilated in medium

07 p1376 A70-18910

P-n junction photovoltaic cell excitation by two photon absorption with low bandgap energy

19 p3446 A70-37764

High power neodymium laser with aspherical lenses to focus photon beam for nuclear fusion experiments

19 p3447 A70-38165

CW gas laser improvement, discussing optimum efficiency and photon beam spatial distribution

21 p3836 A70-41419

Photon flow delay regarding fluctuating source field in two points, applying correlation statistics by Pearson method of moments

22 p3988 A70-42564

PHOTON DENSITY

Constricted DC Ar arc with N or O additions calibrated as vacuum UV radiation standard for photon flux measurements

02 p0343 A70-11905

Superfluorescence losses in large aperture disk laser systems using Monte Carlo method, determining maximum population inversion from enhanced photon flux density considerations

03 p0503 A70-14209

Measurement method for second and third order photon intensity correlation functions, using optical field produced by gas laser operating near oscillation threshold

04 p0700 A70-14686

Very high energy cosmic rays disintegration and energy degradation by intense blue shifted photon fields of supernovae quasars and pulsar models

04 p0742 A70-15300

Optical position estimation model based on defining photon density profile center of gravity in noise, using photon Poisson process theory

04 p0652 A70-15337

Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes

07 p1367 A70-19445

Radiation field photon density matrix for gas laser with ring resonator determined from double level atomic model, considering photon dispersion and wave reflection feedback

08 p1513 A70-21420

Solar XUV lines photon flux based on one dimensional model of chromosphere-corona transition region

10 p1949 A70-25271

Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes

18 p3309 A70-36919

Photon occurrence moments probability distribution in partially coherent light signals

22 p3988 A70-42563

PHOTON-ELECTRON INTERACTION

Dispersed fluorescence spectra from vacuum UV photon impact on COS, noting absence of emission from higher vibrational levels

01 p0148 A70-11353

Collection of papers on optics covering dielectric multilayer filter synthesis, photographic image, light interaction with free electrons, laser radiation, optical echoes, etc

02 p0340 A70-12828

Nonlinear parameter of two intersecting laser beams in interaction with free electrons plane wave external field coupling

09 p1695 A70-22213

Photon capture cross sections for surface silicon electronic states using IR photoconductivity measurements

17 p3144 A70-35707

Laser light effects on electron beams, considering absence or presence of crystalline optically transparent solid

24 p4353 A70-45564

PHOTONEUTRONS

Bremsstrahlung and photoneutrons from electron-photon cascades in thick tungsten and tantalum targets bombarded with low energy electrons

20 p3674 A70-39222

PHOTONIC PROPULSION

Photon propulsion with constant power in exhaust beam and intragalactic travel in force free space from solving relativistic rocket equations

06 p1132 A70-18105

PHOTONS

Threshold laser power density-atom density relation in cesium vapor optical breakdown, suggesting two photon ionization process

01 p0110 A70-10569

Radiation effects on postshock gas state, noting shock wave optical thinness dependence on radiative cooling and photon flight time

02 p0277 A70-11867

Optical and radio pulses from pulsars as test of light speed variation with frequency and photon mass possible existence

02 p0373 A70-12394

Soviet book on quantum electrodynamics covering photon mechanics, electron relativistic mechanics, electromagnetic interactions, corrections to Green functions, particle interactions, etc

02 p0345 A70-12827

Transparent bodies photon thermal conductivity temperature dependence

03 p0515 A70-13206

Phonon-photon scattering intensity and line shape used to study laser-excited impurity centers dynamic characteristics in stimulated induction regime

03 p0499 A70-13256

Balloon-borne experiments with directional scintillators to measure low energy gamma radiation spectrum in midlatitude atmosphere for photons origin and gamma albedos investigation

03 p0561 A70-13996

Photon number per mode for laser with nonresonant feedback for homogeneous and inhomogeneous atomic line broadening

06 p1081 A70-17746

Laser emission photons scattering by semiconductor conduction electrons allowing for electron-phonon interaction

07 p1357 A70-19857

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action

08 p1554 A70-21805

Two photon interaction between ultrashort light pulse and medium, showing pulse propagation through medium without absorption

08 p1514 A70-21820

Photon scattering by Ar in vacuum UV measured for cross sections

09 p1730 A70-22071

Vacuum UV photons production during ground state neutral argon atomic collisions, measuring relative cross sections energy dependence

09 p1731 A70-22333

Dual photon emission from chemiluminescent SO-O reaction, proposing two step emission mechanism

09 p1630 A70-23001

Coherent photon responses production in liquids and glasses by superposing trains of giant laser pulses, achieving spatial separation of responses by combining pulse trains

10 p1900 A70-24564

GaAs light amplifier p-n junction gain and output noise determination for wide photon energy ranges, studying input noise levels effects on sensitivity

10 p1928 A70-25167

Photon nature, considering light-magnetic flux similarities

11 p2084 A70-26027

Saturation homogeneity ascribed to resonant photon capture in emission of neon laser

12 p2247 A70-27508

- Photon lifetime dependence on hole and electron concentration in GaAs from IR reflection spectra analysis 13 p2470 A70-28882
- Metastable He ion two photon decay, observing photon coincidence angular correlation in spectral distribution 13 p2456 A70-29811
- Atom excited state mean lifetime measurement, using correlated cascade photons method 14 p2620 A70-31378
- Cosmic X ray and gamma ray spectral energy distribution slope change explained by measurement process involving photon spectrum 15 p2792 A70-31431
- Time controllable continuous photon emission from plasma produced by pulsed laser vacuum spark applied to absorption spectroscopy in vacuum UV 15 p2734 A70-31757
- Continuous differential energy pulse height spectra reduction to photon upper atmospheric spectra 15 p2694 A70-31800
- Low light intensities measured using photon counting method, comparing signal to noise ratio with lock-in method 16 p2911 A70-33524
- Probabilistic model for radiative transfer of photons in inhomogeneous infinite cylindrical shell medium, noting radiation intensity relation to scattering and transmission functions 16 p2952 A70-33785
- Critique of paper on Crab Nebula pulsar pulsed gamma ray emission, considering photon flux and statistical data analysis 17 p3149 A70-34565
- Energy loss of high energy cosmic rays traversing isotropic radiation field of arbitrary energy spectrum in pair producing collisions with ambient photons 17 p3150 A70-34598
- Simultaneity in optical photon pairs parametric production, verifying quantum mechanical description of fluorescence 17 p3143 A70-35187
- Light combinatorial scattering by longitudinal photons with frequency near forbidden zone width, calculating Raman scattering cross sections 19 p3444 A70-37444
- Flare associated high energy photon and particle fluxes characterized by short rise times and longer lasting decays, discussing plasma emissions 19 p3493 A70-37473
- Atmospheric fluorescence observation of supernova energetic photon short pulse burst, using photomultiplier 19 p3500 A70-38079
- High energy galactic gamma rays photons, suggesting two-component cosmic ray source model 19 p3505 A70-38115
- Energy spectrum distortion of ultrahigh energy cosmic rays due to interactions with photons and neutrinos in universe 19 p3510 A70-38155
- Photon pair annihilation process in graviton pair, examining IR emission in two scalar particle collision 19 p3472 A70-38172
- High energy cosmic ray-photon interactions, discussing ion production, nuclear fission, proton energy loss, red shift, etc 20 p3696 A70-39283
- Gas dynamic quantum amplifier improvement, discussing power utilization, photon distribution and radiation transport 21 p3836 A70-41418
- Phosphor-output image intensifier response to single photon inputs in multichannel spectrophotometer for faint optical sources 23 p4195 A70-44291
- Scattered photon effects on cosmic diffuse X ray spectrum at balloon altitude, noting overcorrection for absorption of primary X rays 23 p4237 A70-44794
- Radiation detectors with superconducting weak links response to single photons, considering Mercereau ring interferometer 24 p4391 A70-46256
- PHOTOOXIDATION**
Electron transfer mechanism between photoact I and II from redox reactions observation with modulated polarograph 13 p2363 A70-29815
- Nucleic acids constituents reactions with singlet oxygen, determining oxidation mechanism in photodynamic processes 21 p3781 A70-42025
- PHOTOPIEZOELECTRICITY**
U PHOTOELECTRICITY
U PIEZOELECTRICITY
PHOTOPLASTICITY
Photoplastic method for modeling of plane elastoplastic problems, comparing results with photoelastic coating method to estimate transition errors from model to prototype 10 p1965 A70-25320
- Macrolon elastic-plastic strain model, studying stress-strain relationship and optico-mechanical properties 11 p2128 A70-25385
- Photoplastic material thickness change from mechanical and holographic measurements, showing correlation with isochromatics during plastic yielding 15 p2821 A70-32314
- PHOTORECEPTORS**
Degenerate retinal fibers in duck photoreceptor path connecting to suprachiasmatic hypothalamic region detected following optic nerve dissection 03 p0427 A70-13955
- Molecular structural relationship between cellular membranes and photoreceptors in plants and animals 16 p2847 A70-33028
- Human eye early receptor potential, investigating contributions of rods and cones 17 p3034 A70-35896
- Isochromic change in bleaching of rhodopsin, showing additional intermediate without detectable color change 23 p4147 A70-44776
- PHOTORECONNAISSANCE**
Royal Air Force air reconnaissance function, discussing cameras, films, processing and printing, photointerpretation, etc 03 p0495 A70-14144
- Wideband transmission of photographic reconnaissance information over long distances using Initial Defense Communication Satellite Program satellites 06 p1006 A70-17346

Photospheric Fe I abundance variation with excitation potential 01 p0175 A70-10239
- Solar corona magnetic field determination from photospheric magnetic field line-of-sight component observations, describing various mathematical methods 01 p0176 A70-10250
- Solar photosphere temperature fluctuations from model consistent with convection hypothesis agreeing with limb darkening data 03 p0570 A70-13591
- One dimensional magnetograph scans studying photospheric velocity oscillations and supergranulation, noting downward flows coincident with chromospheric network 03 p0570 A70-13593
- Solar photospheric Fe abundance determined from IR supermultiplet line spectra, considering LTE effects 04 p0749 A70-14597
- Solar radio emission intensity-solar flare index and 5303 A coronal line intensity-proton flare numbers relations 05 p0911 A70-16438

Flare radiation influence on high photospheric and low chromospheric lines in H alpha, H and K regions
05 p0902 A70-16439

Solar core opacity influence on revised photospheric iron abundances, discussing neutrino flux prediction doubling in solar models
05 p0905 A70-16985

Photospheric magnetic flux quantization away from sunspots, studying nonsunspot field strength distribution
06 p1142 A70-17992

Wilson effect in sunspot structure as penumbra foreshortening and disappearance or penumbra occultation by photosphere, analyzing intensity profiles on disk passage photographs
06 p1143 A70-18001

Turbulent velocities of convective motions in active and unperturbed photospheric faculae based on spectral observations
07 p1384 A70-19415

Faculae and flocculi intensity relationship to orientation of magnetic fields in solar photosphere and magnetosphere
08 p1560 A70-20837

Brightness distribution of spectroheliograms taken in metal lines reflecting velocity field structure in photosphere
08 p1570 A70-20839

Solar and stellar convection regions and coronas using photospheric models, taking into account molecule formation
08 p1581 A70-21953

Fe abundance in solar photosphere, evaluating various determination methods
09 p1753 A70-22382

Sunspots photospheric layers magnetic field structure, analyzing anomalous Zeeman pi-components in umbra
09 p1757 A70-22685

Homogeneous model solar photosphere in strict radiative equilibrium with depth-dependent line blanketing by neutral and ionized metals
09 p1757 A70-22728

Small scale motions in solar photosphere and chromosphere using solar spectrograms
09 p1757 A70-22729

Penumbra magnetic field strength on basis of photoelectric spectra of undisturbed photosphere
09 p1757 A70-22730

Triatomic hydrogen ion role in solar photosphere opacity implied from limb darkening and specific intensity data
11 p2104 A70-25739

Solar photospheric turbulence from observing Ti I line profiles at different center to limb distances, showing anisotropy
11 p2116 A70-26591

CH molecule line formation mechanism for 4300 A transition in solar photosphere, noting collisions with hydrogen atoms
12 p2311 A70-28309

Dark band in H alpha solar chromosphere above photospheric limb, outlining approaches to obtain spectrally pure observational results
13 p2486 A70-28627

Magnetic field spatial structure in sunspot with photospheric bridge, using photographic observations of solar spectrum lines
13 p2493 A70-29391

Formation mechanism of molecular CN violet bands in solar photosphere
13 p2493 A70-29393

Photosphere model and magnetic field gradient effects on line contours and magnetographic calibration curves, using nonlinear source function
13 p2496 A70-29845

Sudden disappearance of large quiescent prominence on solar disk with subsequent brightenings, using photospheric and gravitational model
13 p2497 A70-29850

Herschel effect in UV solar photography in developing autographic photographic film for bright photospheric recording
13 p2497 A70-29853

Polar and equatorial limb darkening related to solar rotation and thermal flow, using photospheric models
15 p2807 A70-32812

Photospheric magnetic fields by magnetograph during and one week before and after eclipse of 7 March 1970
16 p2977 A70-33844

Solar disk center to limb variation of Fraunhofer lines, comparing measurements to predictions by BCA, Elste and Holweger models
16 p2980 A70-34307

Magnetic flux measurements in quiescent solar filaments and adjacent photosphere using magnetograph observations
17 p3157 A70-34837

Continuous UV opacity effects on visual spectrum observations and predictions for solar photosphere
17 p3169 A70-35385

Solar photosphere temperature constancy in thin CO layer from equivalent spectral line width determination
18 p3322 A70-37134

Cosmic ray elements abundance at sources relative to carbon, comparing near-earth composition and solar photosphere
19 p3509 A70-38147

Solar atmospheric hydrodynamic response to stationary random forces homogeneous over horizontal planes, discussing common energy argument, various models and photospheric oscillation
19 p3523 A70-38690

Sun photographs with violet interference filter, determining photospheric magnetic fields position by cospatial network
20 p3634 A70-40410

Photospheric pore magnetic field model, investigating pore-sunspot distinctions
20 p3711 A70-40411

Photoelectric spectra of photosphere and sunspot umbra and penumbra ranging from 3900 to 8000 A
20 p3712 A70-40412

Coronal streamers structure and evolution from photographic and K-coronameter data, indicating photospheric bipolar magnetic regions as origin
20 p3712 A70-40416

Photospheric magnetic field differential rotation using synoptic charts for autocorrelation technique
21 p3885 A70-40951

Solar photosphere vertical velocities and horizontal wave propagation, discussing magnetic fields, phase coherence and behavior and oscillations
21 p3885 A70-40952

Solar photosphere absorption line weakened region, examining temperature increase effects on neutral and ionized lines
21 p3885 A70-40953

Solar coronal and photospheric iron abundances from absorption forbidden lines, discussing discrepancy with permitted lines
21 p3925 A70-42195

Photospheric metallic line profiles numerical experiment, investigating physical processes causing shape and asymmetry change
22 p4101 A70-42866

Solar photosphere negative viscosity phenomenon, examining Rossby wave on differentially rotating isothermal spherical shell of nonconducting inviscid ideal gas
22 p4109 A70-43748

Spectroscopic differential photosphere and chromosphere rotation with height in solar envelope
23 p4252 A70-44831

High resolution upper photosphere images obtained by slow raster scanning device and germanium bolometer, noting points around sunspots
24 p4400 A70-45307

Electrical conductivity in inhomogeneous photosphere and sunspots, suggesting sunspot plasma instabilities
24 p4400 A70-45311

Coherent motion effects on brightness of clouds moving above photosphere, describing H alpha Doppler brightening and Lyman alpha Doppler dimming in solar prominences
24 p4400 A70-45313

PHOTOSYNTHESIS

Photosynthesis and respiration rate in vegetables in controlled temperature, humidity, illumination levels, carbon dioxide and oxygen contents
03 p0425 A70-13892

Thermodynamics of radiation and photosynthesis, discussing Ross-Calvin maximal efficiencies, Duysens method, light and dark conditions and polarized light
03 p0428 A70-14011

UV radiation effects on pea plant chloroplasts photosynthesis at high altitudes, noting disruption of electron-transport chain reactions and cyclic phosphorylation
08 p1445 A70-21216

Biological conversion of solar energy, discussing photosynthesis and nonphotosynthesis mechanisms
15 p2688 A70-31600

Space cabin atmosphere regeneration by unicellular algae photosynthesis, discussing Chlorella cultivation procedures and additional functions in life support systems
23 p4154 A70-44655

Pigments absence in photosystem II of photosynthesis in heterocysts of blue-green algae
23 p4148 A70-44870

Photosystem II and oxygen evolution kinetics
24 p4305 A70-46411

PHOTOTHERMOTROPISM

U ANISOTROPY

U PHOTOTROPISM

U TEMPERATURE EFFECTS

PHOTOTRANSISTORS

Output and frequency limitations of functional converter using photopotentiometer with shaped resistor
09 p1682 A70-23358

Pulse-biased phototransistor imaging mosaics behavior measurement showing significant photovoltaic mode at high light levels
10 p1846 A70-23880

Electro-optical transducers based on photoconductive cells, phototransistors and microminiature incandescent and solid state light emitters
16 p2904 A70-33144

PHOTOTROPISM

Monopulse ruby laser with phototropic Q switch based on radiation density increase due to beam distribution
15 p2754 A70-32867

PHOTOTUBES

NT PHOTOMULTIPLIER TUBES

PHOTOVISCOELASTICITY

Polyurethane rubber time- and temperature- dependent visco- and photoviscoelastic coefficients using two dimensional strain and stress wave propagation photoviscoelastic analysis
03 p0599 A70-14243

PHOTOVOLTAGES

Coordinate-sensitive photocells with heterojunctions between wideband semiconductors, noting increased longitudinal photovoltage
03 p0541 A70-13722

Surface photovoltage regeneration mechanism in GaAs dependent on free carrier concentration, space charge density and minority carriers
15 p2783 A70-31951

PHOTOVOLTAIC CELLS

SNR for IR photovoltaic semiconductor cell generalized for astronomical case, noting stars approximation to black body radiators
05 p0849 A70-16645

Applied space research covering photovoltaic cells, electric propulsion, onboard data storage, vacuum lubrication and NASA-European organizations budgets
06 p1141 A70-17780

Photovoltaic InSb IR detectors design and operation, emphasizing performance in restricted field of view
16 p2926 A70-33152

Position sensitive planar photocells based on silicon-silicon dioxide systems, discussing photoelectromotive force generation mechanism, light intensity and load characteristics
18 p3297 A70-36236

P-n junction photovoltaic cell excitation by two photon absorption with low bandgap energy
19 p3446 A70-37764

Cadmium telluride photocells, discussing performance and mass production
19 p3358 A70-38481

Posterior electrode structural modification for reducing silicon photovoltaic cells absorptivity and operating temperature
19 p3358 A70-38492

Heat treatment and photovoltaic properties of copper disulfide-cadmium sulfide heterojunctions, measuring I-V characteristics, capacitance and spectral response
21 p3862 A70-41911

PHOTOVOLTAIC CONVERSION

Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar photovoltaic system
01 p0196 A70-10837

Electrical power system adaptable to intermediate solar probes, discussing thermoelectric, thermionic, photovoltaic systems and battery for energy storage
04 p0625 A70-14753

PHOTOVOLTAIC EFFECT

Pulse-biased phototransistor imaging mosaics behavior measurement showing significant photovoltaic mode at high light levels
10 p1846 A70-23880

Gold impurity photovoltaic effect in silicon, determining optical cross section for transition
14 p2627 A70-30528

Photovoltaic effects in diodes with generation-recombination process in space charge region
15 p2709 A70-32427

Photovoltaic effects in p-n junction semiconductors, discussing conduction and electro-optical mechanism in thermal equilibrium
19 p3488 A70-38476

Photovoltaic effects in semiconductors, considering excess load carrier transport and I-V characteristics
19 p3488 A70-38477

PHTHALATES

Low melt viscosity prepolymers of diallyl phthalate and isophthalate in mold encapsulation showing dimensional, electrical and mechanical stabilities under adverse environments
05 p0869 A70-16035

Potassium acid phthalate crystal X ray spectrometric properties measurements, discussing parallel position rocking curves and reflection coefficients
23 p4230 A70-44420

PHTHALOCYANIN

Oxygen reduction in sulfuric acid with phthalocyanine-carbon catalysts

10 p1829 A70-24456

High temperature combined differential thermal analysis and spectrophotometric cell for phase transformation monitoring of evaporated thin film and bulk phthalocyanine

21 p3827 A70-41459

Metal phthalocyanin catalyzed oxidation by oxygen of vanadium and iron couples in externally regenerated redox fuel cell cathode

22 p3966 A70-43536

PHUGOID OSCILLATIONS

U OSCILLATIONS

U OSCILLATORS

U PITCH (INCLINATION)

PHYSICAL CHEMISTRY

Collection of Soviet papers on physicochemistry of radiation damage covering free radical processes in cellular organelles, protective action of pyridine derivatives, etc

03 p0418 A70-13301

Thermal analysis - Conference, Holy Cross College, August 1968, Volume 2, Inorganic materials and physical chemistry

11 p2070 A70-25808

Physicochemical methods of producing formaldehyde for carbohydrate synthesis in life support systems

15 p2693 A70-32676

Papers on chemical physics covering photoelectron angular distribution, molecular orbital theories, electron impact spectrometry, resonant electron scattering, etc

16 p2857 A70-33796

Physicochemical properties of monomer and associated aluminokyls, determining heats of combustion

22 p4124 A70-42677

PHYSICAL ENDURANCE

U PHYSICAL FITNESS

PHYSICAL EXAMINATIONS

Human response in Apollo flights emphasizing astronaut food, water, waste management, physical examination, preventive medicine problems, etc

02 p0239 A70-12669

SAS pilot selection system, discussing assessment variables, physiological examinations, psychological tests, recruiting procedure, etc

03 p0433 A70-13262

Human response in Apollo flights emphasizing astronaut food, water, waste management, physical examination, preventive medicine problems, etc

13 p2353 A70-29434

Wolff-Parkinson and White syndrome applicability in aeromedical appraisal for aircrew selection, noting effects of paroxysmal tachycardia

17 p3040 A70-35916

Soviet monograph on automated physiological measurements with onboard computers, covering EKG, EEG, electromyogram, respiration, muscular activity, etc

19 p3372 A70-38797

Multiple choice rotation chair for clinical experimental research and pilot vestibular tests

20 p3580 A70-39438

Astronauts medical examination, using thermal load as functional and diagnostic test

20 p3575 A70-40195

Jet pilot aging effects on physical functions based on medical examinations during six years, noting visual accommodation changes

22 p3978 A70-42878

PHYSICAL EXERCISE

Computer analysis and comparison of ST segment on Frank and bipolar lead electrocardiograms of healthy persons and cardiac patients during exercise, noting physiological responses

01 p0013 A70-10270

Apollo space cabin atmospheres, evaluating diluent N effect on decompression sickness in intermittently exercising men

01 p0032 A70-10368

Absolute ULF ballistocardiogram /BCG/ values as pulsatile fluid pumping values in cardiodynamic function before and after exercise

02 p0248 A70-12677

Motion coordination capacity of persons subjected to 40 days bed rest using dynamographic technique, discussing nature of slackening

03 p0425 A70-13896

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises

03 p0425 A70-13898

Cardiac output and coronary blood flow changes in patients at rest and during peak exertion, stating correlation coefficients

03 p0428 A70-14065

Civil aviation personnel cardiovascular rehabilitation using single-lead electrocardiographic telemetry for monitoring and assessing cardiovascular status during supervised exercise

03 p0438 A70-14069

Airway resistance effect on ventilation and gas exchange during exercise, discussing minute volume and work of breathing response

03 p0429 A70-14157

Lactate accumulation and anaerobic work threshold in subjects exercised on bicycle ergometer, considering muscle contraction effect on oxygen supply

03 p0431 A70-14293

Exercise relation to acute myocardial infarction, coronary thrombosis, stenosis and obstruction, discussing prevention value of physical reconditioning in heart patients

04 p0636 A70-15466

Human skin temperature variations in supramuscular areas under physical activity and rest

04 p0638 A70-15505

Synchronous variations in skin and muscle temperatures of musculus gastrocnemius and flexor carpi in human subjects performing intermittent physical exercises

04 p0639 A70-15506

Muscle temperature variations and respiratory activity of athletes under various exercise regimens, outlining optimal weight lifting training programs

04 p0639 A70-15507

Skin-muscle temperatures ratio variations in dogs during periods of activity and rest

04 p0639 A70-15508

Activity and rest alternation effect on fatigue and rehabilitation behavior of trained athletes, discussing muscle performance characteristics

04 p0639 A70-15510

Physical exercise and rest regime evaluation by thermoelectric method recording skin temperature above gastrocnemius muscle

04 p0640 A70-15513

Computer program for on-line analysis of exercise ECG considered for improved diagnosis of ischemic heart disease

05 p0805 A70-16105

Standardized bicycle ergometer training effects at sea level and simulated altitudes, indicating hypoxia potentiating role

05 p0807 A70-16674

Cardiac work limiting factors during exercise under hypoxia, studying cardiac output and coronary blood flow capacities

06 p0991 A70-17282

Centripetal acceleration tolerance level correlated with circulatory system functional tests and physical exercises, discussing strength and speed endurance

07 p1201 A70-18787

Left ventricular wall motion in normal man at rest and after exercise using echocardiogram

07 p1210 A70-19573

Collection of papers on physical activity and aging, discussing physiology, biochemistry, coronary patients cardiovascular performance, electrocardiography, pathology, epidemiology, etc

07 p1211 A70-19689

Energy cost and heart rate responses to single stage nonsteady state submaximal exercise procedures used in diagnostic and functional testing

07 p1211 A70-19690

Physical training effects on factors in cardiovascular system influenced by age

07 p1212 A70-19691

Exercise habits and environmental emotional stresses role in origin and prevention of degenerative heart disease

07 p1212 A70-19692

Physiological responses during exercise recorded in patients with healed myocardial infarction, considering work tolerance

07 p1212 A70-19693

Physical activity and epidemiology of coronary heart disease

07 p1212 A70-19694

Epidemiologic investigation of physical activity and fitness effect on prevention of premature clinical coronary heart disease

07 p1212 A70-19695

Exercise influence on cardiac output and coronary blood flow during hypoxia, correlating CO and systolic pressure with blood flow changes

07 p1214 A70-19928

Human renal function, electrolyte and water metabolism during bed rest with daily leg exercise

07 p1223 A70-19937

Physical training effects on sedentary men with stable activity pattern, recording heart rates and oxygen uptake

07 p1215 A70-20171

Multistage treadmill exercise tests on healthy business executives noting S-T-segment responses

08 p1445 A70-21265

Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor

09 p1615 A70-22094

Aircraft pilots physical exercise program to maintain optimal state of fitness, discussing harmful effects caused by nervous and psychic strains

09 p1626 A70-23014

Body training type and amount effect on physiological functions and physical fitness of pilots, discussing pulse frequency

09 p1626 A70-23015

Serum lactate dehydrogenase /LDH/ isoenzyme in males before and after muscular exertion, observing change in skeletal muscle and liver fraction

10 p1809 A70-24002

Esophageal, rectal and quadriceps muscle temperatures, oxygen uptake, weight changes, skin conductance and skin evaporation during thermal transients caused by bicycle exercise

10 p1810 A70-24006

Prolonged hypodynamia effect on human blood coagulation, noting antithrombotic effect of physical exercise

10 p1815 A70-24678

Human motor functions changes following prolonged hypodynamia, including physical training and hypokinesia roles in standing and walking

10 p1815 A70-24682

Psychic state changes during prolonged bed rest, discussing effects of physical exercise and medicine

10 p1816 A70-24684

Physical exercise effects on man during prolonged bed rest, investigating muscle performance, static endurance, walking coordination and psychomotor functions

10 p1816 A70-24688

Body temperature effect on pulmonary ventilation response to exercise

10 p1819 A70-24773

Human pulmonary ventilation during exercise in high altitude and sea level acclimated subjects

10 p1819 A70-24774

Rats heart rate change during running at simulated altitude, discussing respiratory-circulatory training effect

11 p1985 A70-25671

Free fatty acids, glycerol and triglyceride levels in arterial and femoral venous blood in humans before and after physical training

12 p2169 A70-27625

Canoe paddlers physical training effect on cardiac output and local blood flow and metabolism at and during exercise and recovery

12 p2169 A70-27653

Initial period of muscular energy expenditure in athletes performing exercises on veloergometer, considering oxygen consumption

12 p2172 A70-28313

Soviet book on flight stress covering physiological bases, prediction and prevention methods, physical training, etc

13 p2357 A70-28775

Serum uric acid reduction in men during chronic physical exercise

13 p2355 A70-29802

Maximal oxygen intake, pulse heart rate and lactate levels variations with physical activity in middle aged man free of cardiovascular disease

13 p2356 A70-29826

Resting concentrations of fibrinogen, plasminogen and levels of euglobulin fibrinolytic activity, plasmin inhibitors and urokinase in blood in inactive and exercising men

13 p2356 A70-29942

Hot environment and hyperthermy effects on oxygen consumption in subjects performing muscular exercise

13 p2360 A70-29947

Inspired carbon dioxide pressure effects on human response to physical exercise, noting dyspnea and intercostal muscle pain

13 p2360 A70-29949

Swimming activity effect on dysbarism in rats in simulated free ascent from deep water

15 p2681 A70-31877

Human renal response to various exercise rates, measuring endogenous creatinine clearance, urine volume, solutes, acid, elements and protein excretion

15 p2684 A70-32534

Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor

15 p2685 A70-32690

Human power output dependence on muscle mechanical properties and kinematics of input motion, describing ergometer

16 p2853 A70-33669

Human circadian coronary circulatory rhythms during space flight weightlessness or bedrest with and without exercise

16 p2854 A70-33991

Training effect on strength per unit cross sectional area of arm muscle, using ultrasonic measurement

17 p3024 A70-34592

Oxygen uptake capacity, ventilation, heart rate and acid base values during bicycle ergometer exercise

17 p3036 A70-34594

Blood glucose and plasma immunoreactive insulin concentrations before, during and after intermittent short duration maximal exercise and glucose infusion

17 p3030 A70-35420

Oxygen uptake and cardiac output in males during submaximal and maximal treadmill and bicycle exercise 17 p3039 A70-35428

Multistage electrocardiographic exercise tests for cardiovascular performance measurement 17 p3034 A70-35878

Cutaneous liquid crystal temperature sensors for thermographic patterns of angina pectoris induced by treadmill exercise 19 p3364 A70-38361

Prolonged hyperbaric oxygen breathing effect on human physical performance at rest and during severe exercise 19 p3364 A70-38369

Human body core temperature control dependence during exercise on heat dissipation, noting sweating control 20 p3570 A70-38997

Determinants of human ventricular dimensions and myocardial free velocity relations during maximum and submaximum exercise levels 20 p3571 A70-39365

Visceral blood flow during exercise in sled dogs, testing hypothetical compensatory decrease as cardiovascular reserve for skeletal muscle by biotelemetry 20 p3571 A70-39366

Preliminary physical training for human water immersion resistance improvement 20 p3576 A70-40196

Ethanol ingestion effect on human response to submaximal and maximal exercise, measuring cardiac output and intraarterial pressure 21 p3761 A70-41135

Postexercise electrocardiogram detection of latent coronary heart disease in flyers prior to myocardial infarction 21 p3771 A70-41494

Body composition and weight changes estimation after physical exercise by prediction equations based on skinfold and girth measurements 21 p3766 A70-42155

Serum enzymes lactate dehydrogenase, creatine phosphokinase and isoenzymes in conditioned male after marathon run, noting little myocardium damage 21 p3766 A70-42158

Physical training effects on blood circulation, respiratory and muscular functions in aging persons 22 p3970 A70-42905

Hemodynamic indices of aged individuals engaging in physical exercises over long period of time 22 p3970 A70-42906

Contractive function of myocardium in middle and advanced age individuals under high physical loads during prolonged periods 22 p3970 A70-42907

Age determined hemodynamic reactions in men and women performing walking motions in lying position 22 p3970 A70-42908

Low carbon dioxide concentration breathing effects on exercise tolerance, discussing aerobic capacity decrement and hypercapnia occurrence 22 p3973 A70-43637

Decompression sickness relationship to physical exercise during simulated Apollo flight 24 p4307 A70-45336

Cardiovascular dimensions changes and heart volume in physically trained young men, comparing with response in old age 24 p4303 A70-46109

PHYSICAL FACTORS

Screen filtration pressure of human blood, establishing time, anticoagulant, red cells, platelets and leucocytes as physical determinants 07 p1210 A70-19590

Physical methods in applied climatology, analyzing meteorological effects on human body and building thermal conditions and plant biomass growth 15 p2771 A70-32111

Jet pilot aging effects on physical functions based on medical examinations during six years, noting visual accommodation changes 22 p3978 A70-42878

PHYSICAL FITNESS

Epidemiologic investigation of physical activity and fitness effect on prevention of premature clinical coronary heart disease 07 p1212 A70-19695

Body training type and amount effect on physiological functions and physical fitness of pilots, discussing pulse frequency 09 p1626 A70-23015

Antiair sickness medications effectiveness and secondary effects during low altitude transport of troops, observing sleepiness but no impairment of physical capacity 12 p2179 A70-28038

Fatigue and aircraft environment effects on physical and mental state of airline flight attendants during prolonged cruises 15 p2692 A70-32211

Statistical data on waivers granted to airline flight crew members by French Civil Aviation Medical Board based on ICAO medical standards 21 p3771 A70-41491

Heart rate-time curves before, during and after step-up exercise in relation to physical fitness 22 p3978 A70-42873

PHYSICAL OPTICS

Confocal parameters, spot sizes, waist positions and stability conditions of astigmatic Gaussian beams formed by spherical mirror laser cavity resonators 01 p0108 A70-10426

Book on coherent optics and holography covering image restoration, holographic interferometry, lensless Fourier transform holography, etc 01 p0144 A70-11074

Kerr physical optics formula usefulness for calculation of radar reflectivity of metallic bodies of revolution in terms of electric and magnetic dipoles 02 p0262 A70-12598

Optical echoes using model of spins precessing in magnetic field, presenting time dependent theory of perturbation 02 p0341 A70-12830

Laser emission intensity fluctuations influence on optical second and higher harmonic production and optical mixing arising from multimode oscillation 04 p0701 A70-14688

Optical waves in round metallic and dielectric waveguides calculated using geometrical optics and model analysis for anisotropic wall impedance model 04 p0652 A70-15396

Optical coherence and light fluctuations, determining statistical distributions of light from photoelectric counting experiments 09 p1728 A70-23372

Deformed grating frequency multiplication by filtering in Fourier plane of lens, forming moire pattern in image plane by mechanical interference 10 p1890 A70-24592

Ocular focus stimulator with provision for optical distance change between object and observer without brightness and visual angle variation 12 p2237 A70-28125

Microwave axicon with dielectric cone at aperture of focused antenna to reduce far-field radiation pattern beamwidth 14 p2549 A70-30512

PHYSICAL PROPERTIES

Technical ceramic products physical properties compared with metals, discussing manufacturing methods and industrial and engineering applications 02 p0322 A70-12714

Polymers application as engineering materials, discussing properties, physical states, etc 02 p0322 A70-12716

Field effect transistors with controlled p-n junction and metal-dielectric-semiconductor transistors investigated for radiation effects on physical and electrical properties 04 p0730 A70-14500

Cobalt alloys physical properties and heat treatment, discussing service conditions and critical problems 04 p0711 A70-15684

Aluminosilicate glass physical properties and chemical stability in water, alkaline and acidic agents, studying titanium oxides additions effect 05 p0871 A70-16596

Observed objects physical properties influence on boundary conditions of visibility perception by human eye 06 p0994 A70-17631

Gas turbine engine blades grinding and polishing procedures, considering fatigue life increase and physical properties stabilization 07 p1292 A70-18833

GaAs preparation techniques, crystal structure, electrical and physical properties, single crystal growth, impurities properties and distribution, thermal and optical properties, etc 07 p1356 A70-19397

Einstein gravitational equations general solution having physical singularity with respect to time 08 p1546 A70-21424

Oxygen pressure, volume and temperature data and derived thermodynamic properties presented in tabular form 09 p1788 A70-22956

Chimkurgan reservoir algae life and physicochemical characteristics 09 p1627 A70-23148

Rigid fire-retardant polyurethane foams obtained from phosphonopropionate polyols, discussing physical properties and shelf stability tests 10 p1907 A70-24063

Hydrodynamic analogy in restricted three body problem of celestial mechanics, discussing mass and momentum conservation and physical properties uniqueness 10 p1938 A70-24180

Ar-arc-produced dust of iron, carbon, silicon carbide and silica, investigating shapes, sizes, grouping and optical absorption to simulate interstellar grains 10 p1944 A70-24957

Sensor selection and telemetry measurement of physical parameters 11 p2011 A70-26453

Physicomechanical properties of tuff rock based on similarity to lunar surface rock, determining natural density, porosity and compression strength 11 p2119 A70-26798

Pulsars properties and physical nature, considering state of matter not reproducible in terrestrial laboratories 12 p2297 A70-27056

Composite reinforced materials similarity criteria to relate static and dynamic fields of various physical parameters, outlining mathematical simulation 12 p2259 A70-27526

High modulus carbon fibers low angle X ray diffraction correlation to physical properties 12 p2259 A70-28050

Annealed compressed ground synthetic mica and silver sput composite materials, analyzing physicochemical properties 12 p2260 A70-28319

Temperature-dependent physical properties effects on turbulent heat transfer, determining corrective factor for semiempirical equations 13 p2520 A70-28847

Visualized multicomponent systems subsolidus structures, studying physicochemical characteristics 13 p2470 A70-28885

Fiberglass reinforcement effects on injection molded thermoplastics physical properties, noting role of binder and glass content 13 p2438 A70-29204

Evaporated Au-Ni-Cr alloy resistor films physical and electrical characteristics, noting dependence on composition 14 p2625 A70-30285

Bi-Sb alloys, discussing structural data, crystal preparation, band structure, pressure, nonohmic conductivity, thermoelectric, thermomagnetic and magnetothermal effects 14 p2625 A70-30332

Soviet book on physical libration constants of moon based on visual and photographic observations of two craters by position angle method 14 p2642 A70-30959

Fluid urethane laminating resin for bonding nylon and glass fabrics, giving physical properties as function of room temperature curing time 16 p2938 A70-33381

Ti alloys beta forging effect on physical properties and tensile ductility 17 p3097 A70-34358

Ti alloys systems physical properties and structural phase stability, discussing electronic Fermi state density variation 17 p3114 A70-34376

Interstellar H I gas physical conditions, discussing ionization ratio average values and temperature conditions 18 p3328 A70-37175

Ferrite single crystals physical properties - Conference, Krasnoyarsk, U.S.S.R., June-July 1969 19 p3484 A70-37621

Ferrite single crystals physical properties - Conference, Krasnoyarsk, U.S.S.R., June-July 1969 19 p3485 A70-37626

Physical properties of comet heads, considering apparent diameters and internal magnitudes 19 p3514 A70-37641

Two dimensional electromagnetic fields in presence of cylindrical objects of arbitrary physical properties and cross sections, using scattering matrix approximation 19 p3471 A70-37778

Linear micromorphic material constants determination from constituent properties based on microelasticity theory 19 p3538 A70-37795

Space environment physical properties near earth, discussing neutral atmosphere, solar radiation, ionosphere, electric and magnetic fields and radiation belts 19 p3520 A70-38277

Electrophysical properties of refractory and rare earth metallic single crystals, discussing work function, transition temperature, resistivity and superconductivity 19 p3454 A70-38731

High temperature acoustic waves, examining solid and fluid properties, weld integrity nondestructive material tests and nondisruptive process measurement 20 p3628 A70-39170

Composite materials physical properties measurement and defect locations detection by NDT techniques 20 p3636 A70-39210

Chemical and physical factors effect on smoke evolution from polymers 20 p3736 A70-39405

Composite materials physical properties based on linearly reinforced media models and complex variable functions theory 20 p3655 A70-39860

High temperature aromatic polyester Ekonol, discussing fabrication, properties and potential applications

21 p3842 A70-41136

Apollo 11 lunar rock and soil mechanical behavior and physical characteristics, discussing color, specific gravity, density, shapes and adhesive and cohesive properties

21 p3913 A70-41646

Scorched aluminum powder (SAP) materials, discussing fabrication, physical and mechanical properties, applications in aircraft structural components, etc

22 p4055 A70-43084

PHYSICAL SCIENCES

Astronomy role in physical science and space exploration

10 p1940 A70-24373

PHYSICAL WORK

Alpha-aminobutyric acid accumulation by soleus and plantaris muscles of rat in vivo during work induced growth, showing amino acid transport variation with work level

02 p0232 A70-11711

Life support system model using heart rate to monitor man doing physical work in space suits under simulated space environment

02 p0245 A70-12146

Autocorrelation and cross correlation analysis of slow EEG potentials in rhythm of movement as cortical activity pattern of cerebral hemispheres during work

03 p0421 A70-13687

Diurnal variations of phase coupling between heart beat and respiration under resting conditions and modification by quantitatively regulated physical effort

03 p0431 A70-14294

Temperature variations in organs of man and animals performing physical work as physiological base of metabolic processes and for daily activity timetable development

04 p0638 A70-15502

Catecholine excretion, cardiovascular functions and subjective effort in healthy male subjects under various physical work loads

05 p0801 A70-16141

Alveolar ventilation difference in nasal and oral breathing in hyperventilation due to work

05 p0802 A70-16492

Blood clotting and fibrinolysis under short term physical work in healthy men measured using thrombelastograms

06 p0992 A70-17423

Pulmonary CO diffusing capacity in young men during muscular exercise

06 p0993 A70-17432

Symmetrical motor centers inequality significance in humans during interaction under conditions of successive innervations during exercise

07 p1213 A70-19790

Electromyograms cross correlation analysis to study time relationships between motor unit discharges of human musculus biceps and triceps brachii during physical work

07 p1213 A70-19791

Work and energy theorems in linear elasticity, discussing potential energy, real work, complementary energy and energy coefficients

11 p2142 A70-26625

Respiratory gas exchange, heart rate, arterial acidemia and hypocapnia responses to physical work in hyperbaric environments and hyperoxia conditions

12 p2169 A70-27655

Anaerobic and aerobic oxidation efficiency in muscular work performance before and after achieving oxygen steady state consumption

12 p2169 A70-27658

Maximum oxygen uptake correlation to age of subjects performing physical and sedentary work

13 p2350 A70-29112

Stochastic processes for physiological analysis of cardiac rhythm dynamics during work

15 p2680 A70-31609

Metabolic Rate Monitor for measuring continuous oxygen consumption during changes in work in real time

15 p2741 A70-32540

Cooling hood effect on physiological responses to work in hot environment, discussing body temperature

17 p3031 A70-35422

Glucose-free fatty acid interactions in working heart, noting increase in glucose uptake, oxidation and glycogenolysis with physiologic work increment

17 p3031 A70-35429

Decreased mental and physical performance of human beings due to T-oral and placebo vaccine reactions

19 p3359 A70-37389

Anaerobic carbohydrate metabolism in aging individuals under physical loads

22 p3969 A70-42900

Occupational and age composition of working population of U.S.S.R., comparing cardiovascular and respiratory systems

22 p3969 A70-42904

Virtual work equations steady state subharmonic solutions by Newton-Raphson method, developing generalized iterative procedure for nonlinear differential equations

24 p4423 A70-45577

Sympathetic-adrenal system activity of trained organism during muscular work and emotional excitation

24 p4300 A70-45841

PHYSICIANS

Physician-monitored central control facility communicating with remote site facilities staffed by paramedical personnel for public health care, based on aerospace experience

04 p0644 A70-15357

Survival training program preparing physicians as advisors regarding survival equipment and medicine

23 p4152 A70-44463

PHYSICS

Book on technical acoustics physics covering propagation, dissipation, reflection, field perturbation in real solids, liquids and gases, lumped constants, resonators, etc

01 p0144 A70-11328

Collection of papers on high temperature physics and chemistry covering shock tube chemistry, plasmas, exploding wires, etc

06 p1063 A70-17726

Growth points of physics - Conference, Florence, April 1969

12 p2297 A70-27053

PHYSICOCHEMISTRY

Physicochemical methods of producing formaldehyde for carbohydrate synthesis in life support systems

09 p1623 A70-22080

PHYSIOGRAPHY

U GEOMORPHOLOGY

PHYSIOLOGICAL DEFENSES

Phonocardiographic and ultrasound observations of acute rejection following cardiac transplantation, considering rejection treatment at early stage

03 p0415 A70-12888

Free radical antioxidant reactions in lipids from blood, liver, spleen, brain and intestines of rats exposed to ionizing radiation

03 p0419 A70-13309

PHYSIOLOGICAL EFFECTS

NT HEMODYNAMIC RESPONSES

NT PHYSIOLOGICAL RESPONSES

Biophysical symptoms and clinical treatment of ailments resulting from pressure drop, considering exposure to higher and lower pressure changes

[DVL-894] 01 p0011 A70-10036

Arterial pressure pulse waves mathematical analysis applied to variations in stroke volume in anesthetized dogs subjected to spine-to-breast accelerations

01 p0012 A70-10125

Sea-level pressure interval to prevent decompression sickness in humans flying in commercial aircraft after diving

01 p0032 A70-10366

Physiological significance of myocardial fibers curvature in left ventricle wall determined by numerical solutions based on mathematical description

01 p0039 A70-11368

Lactate rise diminution in anesthetized paralyzed dogs subjected to hypoxia by gas mixtures before and after beta-adrenergic blockade

02 p0233 A70-11724

Stainless steel micropipettes implantation in rat amygdala to study role in gastric secretion

02 p0234 A70-11729

Health hazards and physiological effects of atmospheric infrasonic waves, discussing sources, ear protecting devices and electrochemical detectors

02 p0247 A70-12467

Physiological equivalents of air with rare gases and H substitutes for nitrogen in inhaled gas mixtures providing normal oxygen intake

02 p0249 A70-12798

Slow waves and spikes in intestinal muscle of cat noting dependence on intracellular iontophoresis of Na

03 p0416 A70-13014

Motion coordination capacity of persons subjected to 40 days bed rest using dynamographic technique, discussing nature of slackening

03 p0425 A70-13896

Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding

03 p0425 A70-13897

Physiological effects on men of 10 hr exposure to nitrogen-oxygen mixture followed by pure oxygen 4 hr exposure, simulating conditions during EVA

03 p0436 A70-13899

Human alveolar-arterial oxygen differences during rest, sleep and exercise in initial hypoxia induced by simulated high altitude exposure

03 p0429 A70-14161

PHYSIOLOGICAL EFFECTS

Circadian rhythms characteristics in humans, animals and plants, noting possible effects of rhythm disturbances on astronauts

04 p0629 A70-14567

Hypokinesis effects on transversostrated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm

04 p0629 A70-14569

Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training

04 p0630 A70-14575

Physiological and physiopathological effects of transverse accelerations on spacecraft crews, discussing cardiovascular and respiratory systems

05 p0799 A70-15763

Heat exchanges between man and environment due to incidents or accidents during aircraft operation evaluated by combined heat transfer coefficient

05 p0799 A70-15764

Radiation environment in space and effect on man, discussing particulate and high energy electromagnetic radiation components

05 p0903 A70-16630

Standardized bicycle ergometer training effects at sea level and simulated altitudes, indicating hypoxia potentiating role

05 p0807 A70-16674

Pre-space flight tests effects on Macaca nemestrina monkeys spermatogenesis, considering immobilization and exposure time effects

06 p0991 A70-17287

High temperature effects on pilots psychomotor performance and physiological function, discussing measurements taken during complex tasks

06 p0999 A70-17290

Aircraft crews in-flight medically controlled feeding, discussing physiological and nutritive value of foods

06 p1001 A70-17669

Recumbency effect on human heel bone density during bed rest using X rays

06 p0996 A70-17850

Heart rate and circulatory load as ergonomic criteria based on muscular work, environment temperature, mental stress, etc

06 p0997 A70-18017

Mice irradiation reactions determination from various metabolism indices including blood sugar level, leucocytes number, proteolytic processes rates, etc

07 p1198 A70-18714

Carbon dioxide effect on oxygen uptake during hyperventilation in normal man

07 p1205 A70-19294

Traumatic rupture of aortic arch and descending thoracic aorta resulting from abrupt linear body deceleration

07 p1206 A70-19295

Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights

07 p1220 A70-19502

Human vertical perception with body tilt in median plane tested with luminous rod in upright to supine position with backward and lateral tilt

07 p1224 A70-20045

Visual analyzer physiology under effects of gravitation, atmospheric pressure, mechanical vibrations, etc

08 p1444 A70-20740

Acute gasoline poisoning toxicology and prophylaxis, manner of ingestion and effects on organs and systems

08 p1451 A70-20976

Microwave irradiation effects on rabbit eye lenses, noting injury dependence on frequency

[IMPI PAPER DA-4] 08 p1452 A70-21273

Human sea-level natives physiological changes during high altitude physical exercise, considering carbon dioxide arterial pressure, plasma cortisol, adrenal function indexes, etc

08 p1453 A70-21873

Optic chiasm damage effects on human depth perception implying interhemispheric link for binocular integration in central vision

09 p1618 A70-22669

Corpus callosum damage effects on human depth perception implying interhemispheric link for binocular integration in central vision

09 p1618 A70-22670

Air traffic vibration effects on human organs and sensations, considering blood circulation, lungs, eyes and muscles

09 p1625 A70-23007

Body training type and amount effect on physiological functions and physical fitness of pilots, discussing pulse frequency

09 p1626 A70-23015

Hyperbaric oxygenation treatment physiology and techniques, discussing limitations of equipment

09 p1620 A70-23017

Physiopathological effects of weightlessness, showing desirability of partial gravity for long voyages via spacecraft rotation

09 p1621 A70-23439

Serum lactate dehydrogenase /LDH/ isoenzyme in males before and after muscular exertion, observing change in skeletal muscle and liver fraction
10 p1809 A70-24002

Mineral saturation in calcaneal bone and hand finger phalanx in humans under prolonged hypodynamia by X ray analysis, observing Ca salts reduction
10 p1815 A70-24676

Prolonged hypodynamia effects on visual analysis, investigating functional weakening, fundus oculi appearance change and restoration after normal activity resumption
10 p1816 A70-24687

Hypodynamia aftereffects on nervous system, investigating organic microsymptoms, asthenia, vegetative-vascular instability and skin muscle akinetic hypotrophy
10 p1825 A70-24691

Hypodynamia effects on humans during prolonged bed rest, investigating immunological resistance, psychic disorders, myocardium changes, responses to pharmaceuticals, etc
10 p1817 A70-24696

Physiology and pathophysiology of oxygen transport in human blood, discussing fluctuations in O₂ capacity and affinity
10 p1821 A70-25079

Physiological and psychological human reactions during space flight concerning hypokinesia, space kinetosis, isolation and limited room conditions
11 p1986 A70-25707

Physiopathologic effects on organs of longitudinal and tangential accelerations, decelerations, vibrations and weightlessness
11 p1986 A70-25821

Vestibular adaptation to heat and rotary stimulation in animals and men
11 p1986 A70-25822

Inflight aircraft cockpit noise levels effect on pilot hearing sensitivity
11 p1990 A70-25875

Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights
11 p1991 A70-26101

Oxygen diffusion facilitation in vivo and nonsteady state conditions under physiological circumstances, emphasizing hemoglobin in red cells and myoglobin in muscle
12 p2171 A70-28024

Microwave radiation effects on radar operators myocardium functions
12 p2180 A70-28358

Centrifuging acceleration tolerance of various animals, relating physiological and morphological effects
12 p2174 A70-28361

Paced respiration and selective attention effects on heart rate and finger pulse amplitude in adult females subjected to visual stimuli
13 p2350 A70-29241

Sensory deprivation induced EEG changes, discussing duration effect on postisolation occipital alpha frequency
13 p2350 A70-29242

High altitude effects on total protein content and composition in rats blood serum
13 p2352 A70-29346

Medical wastage of professional aviators in military and civil aviation, discussing reasons for preventing flying license revalidation
13 p2359 A70-29440

Gravity effect on positional alcohol nystagmus in man and rabbits, observing threshold value in weightless state
13 p2359 A70-29442

Oxygen effect on night vision tested in men at 5,000 ft above sea level, obtaining threshold curves of dark adaptation
13 p2359 A70-29443

Arousal effects on vestibular nystagmus in man, discussing forced alertness in mental arithmetics form
14 p2538 A70-30911

Swimming activity effect on dysbarism in rats in simulated free ascent from deep water
15 p2681 A70-31877

High altitude liver function and blood flow, determining bromsulphthalein transport maximum and storage capacity and galactose elimination
15 p2683 A70-32531

Long term helium-oxygen atmosphere effects on rats and mice, investigating biochemical and metabolic changes
16 p2849 A70-33996

Exercise and rest of humans under hypoxia and hyperoxia, determining blood acid-base state, ventilation and carbon dioxide partial pressure
16 p2849 A70-34256

Complex accelerations effects on vestibular apparatus from physical and mathematical viewpoint
17 p3037 A70-35128

Intense deceleration effects on mice and rats, including internal organs damage and enzyme activity increase
17 p3025 A70-35132

Repeated decelerations effects on mice and rats, noting fibrotic changes in liver
17 p3025 A70-35133

Dehydration effects on rabbits acceleration resistance
17 p3025 A70-35134

Vibration effects on vestibular components, noting applications to spacecraft artificial gravity
17 p3038 A70-35322

Prototype space foods effects on humans, determining changes in bacterial fecal flora content
17 p3032 A70-35565

Bird dispersal measure at airports, using behavioral and electrophysiological effects of high power microwave radiation
18 p3222 A70-35993

Microwave radiation effects on maintenance personnel, investigating respiratory reaction, attention concentration, blood content of K, Ca, Na and proteins, etc
20 p3581 A70-40289

Ship engineers cardiovascular system functional changes during HF internal combustion engine noise, investigating EKG recordings and arterial pressure
20 p3582 A70-40292

Cardiac glycosides and beta receptor blocking agent effect on ULF displacement ballistocardiogram in healthy young men, measuring heart rate and blood pressure
21 p3763 A70-41227

Hypoxia and hyperoxia effect on ballistocardiogram of healthy males, determining systolic and minute cardiac forces
21 p3763 A70-41231

Work load effect on ballistocardiogram by minute cardiac force /MF/ measurement, using bicycle ergometer
21 p3763 A70-41233

Activation energies of acceleration and hypoxia stress in man and rats, noting brain function survival
21 p3764 A70-41484

Behavioral changes due to repeated low doses of rocket fuel monomethylhydrazine
21 p3771 A70-41485

Chicken lymphopenia and body mass loss resulting in death from chronic restraint, developing physiologically unstressful restraint for space environmental testing
21 p3765 A70-41488

Valsalva maneuver beat-to-beat effects on systolic cardiac intervals compared with time based measurements
22 p3972 A70-43484

Space flight effects on dogs cardiac activity, brain circulation and systemic-tissue circulation interactions
22 p3972 A70-43635

Passengers physiological and medical problems on subsonic and supersonic aircraft
23 p4150 A70-44223

Gravity effects on perinatal organ growth in chicks
24 p2977 A70-45342

Desoxycorticosterone action on human kidneys and sweat glands as function of temperature tested with various DOCA and NaCl doses
24 p4301 A70-45988

Vagus nerve blockage effect on arterial carbon dioxide tension and breathing regulation in dogs
24 p4303 A70-46112

Sonic boom effects on guinea pigs Corti organ, comparing auditory damage in cochlea with hair cell damage
24 p4305 A70-46374

PHYSIOLOGICAL FACTORS

NT PHYSICAL FACTORS

Biological rhythm disturbances of astronauts during air and space travel, discussing sleeping habits, alertness under weightlessness conditions, etc
02 p0241 A70-12763

Physiological limitations of air traffic controllers, considering stress factors connected with workload
04 p0716 A70-15314

External environment changes effect on animal activity, considering reactions on molecular, physiological and behavioral levels
07 p1199 A70-18782

Astronauts visual performance during space flight, studying reduction of visual disturbances from various physiological flight factors
08 p1444 A70-20741

Human factors responsibility for aircraft accidents, discussing cooperation between air safety service and flight surgeons
09 p1626 A70-23016

Human body homeostatic mechanisms autoregulation, discussing feedback control systems for blood pressure and flow regulation, bodily movements and postural control, etc
10 p1810 A70-24038

Period length calculation method for physiological rhythms by digital computer
10 p1811 A70-24380

Soviet book on flight stress covering physiological bases, prediction and prevention methods, physical training, etc
13 p2357 A70-28775

Physiological indices criteria for human thermal stress tolerance, discussing rectal temperature, body surface condition, body temperature and local cooling effects
13 p2351 A70-29332

Perception threshold in rapidly changing circumstances, discussing stimuli signals recognition
15 p2687 A70-32872

Instrumentation safety for physiological research in hyperbaric chamber environment, taking into account pressure, isolation, atmosphere, electricity and fire
18 p3222 A70-35939

Electronic differentiator for physiological research, discussing electrical voltage derivatives reproduction, sensitivity, etc
19 p3371 A70-38219

Human vigilance paradigm and physiology, discussing relationships between vigilance, signal detection and animal discrimination
19 p3364 A70-38324

PHYSIOLOGICAL INDEXES

U PHYSIOLOGICAL TESTS

PHYSIOLOGICAL RESPONSES

NT HEMODYNAMIC RESPONSES

Photoperiod variation effects on ambulatory primate Cebus albifrons deep body temperature /DBT/, locomotor activity /LMA/ phase relationships and DBT waveform
01 p0011 A70-10035

Physiological research on humans in hypothermia resulting from confinement to life raft on open sea, analyzing thermal conditions, thermoregulation and survival
01 p0013 A70-10233

Computer analysis and comparison of ST segment on Frank and bipolar lead electrocardiograms of healthy persons and cardiac patients during exercise, noting physiological responses
01 p0013 A70-10270

Reciprocal rhythm occurring with impulses of atrial or atrioventricular /A-V/ nodal or ventricular origin, noting role of A-V nodal pathways
01 p0016 A70-10442

Catecholamines biosynthesis, distribution, combining, uptake, deposition, release and metabolism in physiological and pathological reactions of organism
01 p0019 A70-10512

Male macaque monkey physiological deterioration in Biosatellite 3, noting falling brain temperature, lowered central venous pressure, fluid loss, blood redistribution into visceral pools, etc
01 p0022 A70-10822

UV radiation effects on mucopolysaccharide compounds in tears and on cornea epithelium of albino rabbits
01 p0037 A70-10860

Rats sympathoadrenomedullary response to increased oxygen tensions, measuring catecholamines, norepinephrine and epinephrine in adrenal gland, hypothalamus, serum and urine
01 p0024 A70-10979

Target-field luminance or duration effect on target susceptibility to masking demonstrated in visual backward masking study
01 p0039 A70-11163

Line length effects on sequential blanking in visual perception demonstrated by computer-based CRT display and interpreted with information processing model
01 p0039 A70-11164

Heart rate and skin conductance measurements during attention-direction tasks involving proprioceptive stimuli position on environmental acceptance and rejection continuum
01 p0026 A70-11166

Rabbits and cats cortical neurons responses to light and acoustic signals, using microelectrodes inserted at different depths into cortex
01 p0030 A70-11469

Comfort and thermal sensations and associated physiological responses during exercise at various ambient temperatures, noting effects on sensory estimates
01 p0031 A70-11648

Hyperbaric oxygenation /OHP/ effect on left ventricular function evaluated by measurement on anesthetized dogs of myocardial contractility
02 p0230 A70-11701

Chest, abdominal wall and diaphragm displacements of rabbits during partial and whole body exposure to shock waves produced by hexotol charges
02 p0231 A70-11704

Rat water intake and urine output during chronic centrifugation at resultant inertial fields of 1.7 and 3.0 g
02 p0231 A70-11705

Simulated responses of depressed and hyperpolarized single-medullated nerve fibers, using Frankenhauser-Huxley equations
02 p0231 A70-11706

Muscle force and electromyogram behavior with alteration in blood flow and composition in anesthetized cats
02 p0231 A70-11708

Constant-inflow and constant-pressure perfusion effect on vascular responses of dog

02 p0232 A70-11716

Polycythemia and hypercapnia effects on apparent oxygenation of rat brain during acute hypoxia by changes in creatine phosphate concentration and lactate/pyruvate ratio

02 p0232 A70-11717

Blood flow changes in portal vein and hepatic artery of anesthetized cats following intraportal and intrahepatic arterial administration of isoproterenol, epinephrine and norepinephrine

02 p0232 A70-11718

H ion increased activity effect on sodium transport across short circuited turtle bladder

02 p0234 A70-11730

Starvation effect on intestinal amino acid absorption of rats, noting protein synthesis reduction

02 p0234 A70-11731

Oxygen consumption, lactic acid production and mechanical performance of anesthetized dog gastrocnemius muscle with increased blood flow

02 p0235 A70-12090

Vestibular sensing system role in providing information concerning vertical, linear and angular head movements to central organs

02 p0246 A70-12191

Accelerative and decelerative heart rate responses in human subjects given differential conditioning trials by auditory and electric shock stimuli under paced respiration

02 p0239 A70-12628

Human response in Apollo flights emphasizing astronaut food, water, waste management, physical examination, preventive medicine problems, etc

02 p0239 A70-12669

Sensor, vegetative, motor and vestibulosomatic reactions to brief weightlessness in fighter pilots and laymen, ascribing disorders absence to statokinetic stability of organism

02 p0241 A70-12799

Cross adaptations of physiological functions, discussing results for heat, altitude and cold adapted animals

02 p0242 A70-12824

Cross adaptation criteria and modifications in physiologic and biochemical processes in man and mammals, demonstrating positive cross acclimation between hypertension and hypoxia exposure

02 p0242 A70-12825

Altitude changes effect on brown fat content and metabolism in deer mice, noting oxygen consumption and heat production limitation by hypoxia

02 p0242 A70-12865

Mathematical model for ejection fraction of human left ventricle incorporated with fiber orientation and ventricular geometry, showing consistent results with biplane angiocardigraphic films

03 p0433 A70-12975

Light synchronization of deep body temperature rhythms in Macaca nemestrina, investigating efficiency

03 p0416 A70-13013

Evoked potentials arising in entorhinal cortex of rabbits in response to stimulation of somatic nerves, light and sound

03 p0417 A70-13070

Somatosensory cortex removal effect on blocking action of skin stimulation on associative response to light flash in cats

03 p0420 A70-13430

Functional state changes in organism awaiting and performing parachute jump using orthostatic test, respiration retention and Howard step test

03 p0420 A70-13477

Tegmental nucleus neurons of cats cerebellum, considering responses to acceleration changes and natural stimulation of vestibular apparatus

03 p0421 A70-13510

Early and late response component of associative cortical area in cerebral hemispheres of cats connected with mono and polysensory neuron activity

03 p0421 A70-13688

Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests

03 p0423 A70-13709

Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness schedule on healthy pilots subjected to solitary confinement

03 p0423 A70-13711

Diurnal periodicity of physiological functions of flight crews flying through several time zones found to correspond to time zone of permanent residence

03 p0425 A70-13894

Space cabin atmosphere effects on primary and secondary immunologic responses in mice relative to spleen weight and antibody titers following antigenic stimulation

03 p0437 A70-14062

Unrestrained chimpanzees cortical and subcortical electrical activity during sleep recorded by telemetry and compared with human beings and other mammals

03 p0432 A70-14347

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats

04 p0629 A70-14570

High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses

04 p0630 A70-14576

Mathematical model building for temporal human motor responses /reaction, movement, manipulation/ by response surface technology and statistical experimental design

[ASME PAPER 69-WA/BHF-5] 04 p0642 A70-14851

Pilots hearing level based on pure tone threshold audiograms compared with personnel not exposed to job noise

04 p0631 A70-14982

Plasma free fatty acid level relationship to acute and chronic exposure to cold in rabbits, rats and humans

04 p0631 A70-14983

Physiological load of exercise at altitude evaluated by heart rate and recovery rate measurements

04 p0631 A70-14984

Temporary suppression of cortical associative responses in cats with electrocoagulated thalamic relay nuclei lesions

04 p0632 A70-15220

Collection of Soviet papers on physiological foundation of activity regimes covering human cerebral cortex, skin and muscles responses to stimuli, etc

04 p0638 A70-15501

Amphetamine effects on observing and monitoring performance in squirrel monkeys, investigating lever and key responses using food reinforcements

05 p0806 A70-16128

Rod and cone contributions to S potentials from cat retina using spectral sensitivity observation

05 p0801 A70-16379

Rod-cone interaction in cat S potentials, analyzing effect of wavelength and intensity upon dark adapted responses

05 p0801 A70-16380

Rod aftereffect relationship to percent rhodopsin bleached in S potentials from cat retina

05 p0801 A70-16381

Human eye contribution to visual evoked responses under different color stimuli during all possible monocular and binocular combinations

05 p0801 A70-16382

Nonspecific influences on rabbits neurons reaction to nonvisual stimuli in central visual pathway using microelectrodes implantation in visual cortex

05 p0802 A70-16624

Cerebellar cortex reactions to sciatic nerve stimulation in rats under transverse accelerations in centrifuge

05 p0804 A70-17116

Human heart chronotropic reactions during centrifuge acceleration tests up to tolerance limit, establishing sinus tachycardia in various degrees

05 p0804 A70-17120

Nervous system influence on erythema radiation reactions from soft X ray irradiation, discussing blood supply effect

06 p0993 A70-17430

Human unloading reflex, using experimental setup unloading muscle without tension increase

06 p1000 A70-17450

Bioelectrical reactions in anesthetized cats cortical zones in response to stimulation of contralateral sciatic nerve

07 p1199 A70-18722

Thalamic N.VPL role in distributing afferent flux in anesthetized cats cortex, using stimulating contralateral sciatic nerve

07 p1199 A70-18723

Physiological reactions of living organisms to aircraft and spacecraft acceleration, discussing physical, pharmacological and training methods to increase tolerance

07 p1200 A70-18785

Physiological effects of prolonged human motor activity restriction, discussing oxygen transport system, work capacity relationships, body fluids volume and distribution, metabolism, etc

07 p1200 A70-18786

Acceleration effects on chest organs by X ray studies noting heart shape changes, pulmonary areas, diaphragm position, etc

07 p1201 A70-18791

Ciliary nerve stimulation and lens motion data to identify open-loop plant dynamics of lens accommodation

07 p1216 A70-18858

Human visual performance, discussing effects of object size and exposure time

07 p1204 A70-19050

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors

07 p1207 A70-19496

Somato-vegetative and behavioral reactions of rabbits to electric stimulation of hypothalamus after injecting aminazine

07 p1209 A70-19521

Involvement reactions in dying and reanimated cats with nucleus reticular hypothalamicus stimulated by rectangular electric pulses

07 p1209 A70-19522

Left ventricular wall motion in normal man at rest and after exercise using echocardiogram

07 p1210 A70-19573

Physiological responses during exercise recorded in patients with healed myocardial infarction, considering work tolerance

07 p1212 A70-19693

Midbrain reticular neurons activity in cats during response to individual and coincident cortical and hypothalamic stimulations

07 p1213 A70-19789

Adaptive reactions in thyroidectomized rats blood and brain during adaptation to hypoxia compared with intact animals

07 p1214 A70-19794

Minute volume changes under acoustic excitation of mice for measuring respiratory process without strain on organs

07 p1214 A70-19824

Acceleration environment duplication difficulties, considering human physiological responses dependence on centrifuges performance characteristics and geometries

07 p1222 A70-19927

Human physiological responses to lower body negative pressure /LBNP/, studying presence or absence of change for orthostatic tolerance as function of time

07 p1222 A70-19933

Temporary or permanent visual field injury in test parachutists compared to control group

07 p1223 A70-19943

Physiology of high altitude, studying animal and man adaptation and changes in body processes due to life stresses and hypoxia

08 p1441 A70-20469

Operator analysis of electroretinograms, investigating eye reaction dependence on stimulation using amplitude-phase-frequency characteristics

08 p1450 A70-20730

Delayed trace reaction under stable and unstable pauses in apes and monkeys, noting independence of conditioned reflex

08 p1446 A70-21446

Thoracic cage, heart and extirpated lung dimensions measurement for dogs before and after explosive decompression and after ground level recompression

08 p1448 A70-21793

Acceleration training schedules performed with animals and test subjects, assessing schedules effectiveness in increasing tolerances to transverse acceleration

09 p1623 A70-22086

Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor

09 p1615 A70-22094

Flashtube photostimulators for examining human physiological response, discussing design and calibration

09 p1624 A70-22673

Hormones excreted by adrenal cortex function in rhesus monkeys pathogenesis after irradiation by sublethal dose

09 p1620 A70-22822

Physiological reactions detection, transmission and data evaluation of aircraft pilots subjected to various stress environments, using radio telemetry

09 p1626 A70-23009

Human tolerance to short duration high acceleration in centrifuge concerning peripheral or central vision trouble or syncope

09 p1626 A70-23112

Water cooled space suits automatic control based on physiological changes in astronaut during hard work

09 p1627 A70-23458

Dogs breathing air or oxygen during slow and rapid decompression, measuring intraocular and cardiovascular pressure changes and retinal responses

09 p1621 A70-23460

Startle auditory stimuli effects on motor performance and recovery characteristics from heart rate and skin conductance recordings

09 p1628 A70-23577

Blood lactate changes during prolonged exhaustive running at varied intensities and durations

10 p1809 A70-24001

Prolonged hypodynamia effects on hemodynamics using dye dilution method, noting adaptability in cardiovascular system

10 p1814 A70-24671

Prolonged hypodynamia effect on human cardiac cycle phases using poly- and kinetocardiographic data

10 p1814 A70-24672

Prolonged hypodynamia effect on heart size and myocardium function obtained from human chest X ray studies

10 p1814 A70-24673

Immunity indices in humans subjected to hypodynamia, noting infection resistance lowering

10 p1815 A70-24679

Human central nervous system changes during hypodynamia, noting unidirectional shifts in brain hemodynamics, rheographic wave propagation time reduction, etc

10 p1815 A70-24680

Human nerve and muscle system changes under prolonged hypodynamia

10 p1815 A70-24681

Psychic functions stability during prolonged hypodynamia, discussing memory, attention span, sensometer reactions, time estimating, etc

10 p1816 A70-24685

Physical exercise effects on man during prolonged bed rest, investigating muscle performance, static endurance, walking coordination and psychomotor functions

10 p1816 A70-24688

Human peripheral blood circulation during prolonged underwater activity, showing compensation for high humidity, noise levels, low water temperatures, isolation and confinement

10 p1822 A70-25178

Human cardiovascular system function during adaptation at various high altitudes using simultaneous EKG and phono-KG recordings

10 p1823 A70-25179

High altitude acclimatization effect on tissue capillarity, investigating physiological evidence in rats by tissue diffusing capacity measurement

10 p1823 A70-25220

Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests

11 p1985 A70-25509

Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness schedule on healthy pilots subjected to solitary confinement

11 p1985 A70-25511

Rats heart rate change during running at simulated altitude, discussing respiratory-circulatory training effect

11 p1985 A70-25671

Cold air inhalation effect on vital physiological functions of dogs, describing heat exchange simulator of upper respiratory tract

11 p1985 A70-25672

Free radical content changes in mice organs under hyperoxia and hypoxia

11 p1986 A70-25941

Incremental lower body negative pressure as assay method for human orthostatic tolerance

11 p1992 A70-26518

Pilots psychophysiological reactions to various aircraft types and flight maneuvers, considering recorded comments, blood pressure and heart rate

12 p2177 A70-27042

Pro- and anticoagulants dynamics in rats blood during early phases of prolonged sound effect

12 p2168 A70-27347

Metabolism in left ventricular myocardium of rabbits after asphyxiations and during postasphyxial recovery

12 p2168 A70-27624

Canoe paddlers physical training effect on cardiac output and local blood flow and metabolism at and during exercise and recovery

12 p2169 A70-27653

Cerebral circulatory reactions of smokers and non-smokers exposed to altitude, measuring vasomotor, blood flow and cardiac frequency indexes using scalp electrodes

12 p2172 A70-28042

Rats cardiac aerobic and anaerobic pathways response to hyperbaric oxygen exposure

13 p2349 A70-28833

Hypothermia and ionizing radiation effects on hamsters influenza immune response

13 p2349 A70-28834

Psychophysiological characteristics of pilot activity during various landing approaches with different instrumentation levels, studying heart and respiratory rates

13 p2358 A70-29297

Marrow granulocyte reserve restoration in dogs exposed to chronic gamma radiation, discussing leukocyte reaction to pyrogenic agent

13 p2351 A70-29326

Daily electrolyte excretion dynamics of subjects with shifted work-rest schedule, noting disagreement with Scharp results

13 p2358 A70-29343

Vegetative cardiovascular, motor and electrophysiological reactions to electrical stimulation of limbic and reticular formations in cerebrum after adrenalin and aminazine injections

13 p2352 A70-29352

Human response in Apollo flights emphasizing astronauts food, water, waste management, physical examination, preventive medicine problems, etc

13 p2353 A70-29434

Cardiac cycle and phases shortening observations from analyzing electro- and phonocardiographic data recorded during Gemini flights

13 p2359 A70-29437

Food ingestion initiation, investigating role of hypotonic solutions from observation of rats under water deprivation

13 p2353 A70-29495

Skin receptors afferent discharge characteristics during vibrotactile stimulation

13 p2354 A70-29594

Nervous system response fluctuation measurement during perceptual and learning tasks in terms of signal to noise ratio of electrical and tactile stimuli

13 p2354 A70-29595

Skin and tissue mechanical characteristics response to vibratory stimulation, considering effects on physiological and psychophysical tactile sensitivity measurements

13 p2354 A70-29598

Motion sickness in man and animals as normal response with individual susceptibility dependent on motion duration

13 p2355 A70-29793

Electronic simulation of neuronic membrane demonstrating nervous impulses generation and propagation behavior

14 p2542 A70-30387

Vestibular nystagmic and electrical responses facilitation, inhibition and habituation, noting modulation by subcortical and cortical systems

14 p2538 A70-30909

Electronystagmographical responses comparison with electroencephalographic record during prolonged torsion swing vestibular tests under cortical and subcortical factors influence

14 p2539 A70-30917

Intrinsic heart rate /IHR/ range and variability in healthy subjects measured showing age as important determinant in absence of heart disease

15 p2678 A70-31433

Infection resistance during extended space flights, discussing microfloral exchange, defense mechanisms, waste, etc

15 p2688 A70-31677

Physiological examination of healthy human beings, considering repose situation abnormal

15 p2691 A70-31923

Isolated human heart measurements for time course and instantaneous distribution of normal heart excitatory process

15 p2683 A70-32471

Human postural motor control systems nonlinearities, describing physiological experiments and mathematical models

15 p2693 A70-32568

Acceleration training schedules performed with animals and test subjects, assessing schedules effectiveness in increasing tolerances to transverse acceleration

15 p2693 A70-32682

Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor

15 p2685 A70-32690

Atrophic changes in tortoises during roundtrip to moon on Zond 5 ascribed to hunger and space flight factors

15 p2685 A70-32741

Muscular behavior analog simulation model from generalization of laws governing viscoelastic behavior of polymeric materials

15 p2693 A70-32820

Electrical potentials in response to auditory stimuli recorded in cat brains by averaging computer

15 p2685 A70-32831

Human and animal adaptation and responses to time intervals and temporal activity cycles, discussing conditioned reflexes in terms of physiological factors

15 p2687 A70-32869

Visual and auditory reactions in dogs to alimentary stimuli before and after partial removal of cerebellum, noting complete recovery within month

15 p2687 A70-32892

Cryobiotic potentialities on earth, investigating life forms physiological response to temperature, cryotolerance mechanisms, etc

16 p2848 A70-33093

Eating and digestion effects on arterial pressure and mesenteric and aortic blood flows in intact unanesthetized dogs

17 p3024 A70-34848

Physiological reactions of Soyuz 6, 7 and 8 crew during group flights, noting cardiovascular and respiratory reaction to submaximum stresses after flight

17 p3038 A70-35361

Barometric pressure reduction effect on gaseous and volatile metabolic products elimination in men wearing oxygen-supplied rubberized suits

17 p3038 A70-35363

Blood glucose and plasma immunoreactive insulin concentrations before, during and after intermittent short duration maximal exercise and glucose infusion

17 p3030 A70-35420

Sheep cardiac rate, respiration rate, hematocrit, erythrocytes per cubic mm and hemoglobin concentration responses to elevated ambient carbon dioxide

17 p3030 A70-35421

Cooling hood effect on physiological responses to work in hot environment, discussing body temperature

17 p3031 A70-35422

Mountain climbing effects on urinary excretion of vanillylmandelic and homovanillic acids, discussing circulatory system acclimatization

17 p3039 A70-35425

Ambient temperature effects on venous reactivity to hydrostatic stress, discussing posture changes and lower body negative pressure effects on index of compliance

17 p3031 A70-35426

Glucose-free fatty acid interactions in working heart, noting increase in glucose uptake, oxidation and glycogenolysis with physiologic work increment

17 p3031 A70-35429

Mathematical model for short term adaptation effects in human semicircular canal response to rotation, discussing nystagmus

18 p3216 A70-35940

Environmental heat stress indices of human subjects in bicycle ergometer experiment

18 p3224 A70-36226

Habituation and dishabituation in semiautact Aplysia preparation with central nervous system removed

18 p3217 A70-36517

Soviet papers on physiological adaptation to heat and cold covering thermoregulatory reflexes, bionics, temperature gradients, hypothalamus, gas exchange, heat generation, etc

18 p3217 A70-36526

Physiological mechanisms of cold adaptation in terms of individual, type and population categories, examining thermoregulatory muscular reflex

18 p3218 A70-36527

Varying thermoregulatory responses of different rodent species to long term heat and cold

18 p3218 A70-36534

Thermoregulation processes in oxygen consumption, blood and body temperatures and skeletal muscles in adult nutria and muskrats in air and water

18 p3218 A70-36535

Gas exchange, body temperature and electrical activity of neck and back muscles of cold-acclimated white rats subjected to various temperatures

18 p3219 A70-36540

Repeated local spine cooling effect on gas exchange and electrical activity of white rats skeletal muscles

18 p3219 A70-36541

Thermoregulation of hedgehogs during muscular activity in cold environment, recording electrical activity, oxygen consumption and body temperature during work-rest cycles

18 p3219 A70-36542

Prolonged cold adaptation effect on heat transfer during recovery period after hypothermia in white rats

18 p3220 A70-36543

Low ambient temperature exposure effect on hamster intestinal absorption capacity, using glucose test compound

19 p3360 A70-37772

Human spatio-temporal visual evoked response characteristics, showing potential graded rotation in same period as input stimulus

19 p3360 A70-37845

Human brain LF activity in visual evoked response, determining relationship to stimulation

19 p3360 A70-37846

Human response time to visual stimulus preceding or following auditory stimulus as function of interstimulus interval

19 p3362 A70-38311

Prolonged hyperbaric oxygen breathing effect on human physical performance at rest and during severe exercise

19 p3364 A70-38369

Mongrel dogs pulmonary and systemic circulatory responses to dopamine infusion

20 p3569 A70-38986

Determinants of human ventricular dimensions and myocardial free velocity relations during maximum and submaximum exercise levels

20 p3571 A70-39365

Skeletal muscles static tension influence on dog respiratory center functional properties, showing increased frequency volume and sensitivity under stimulation

20 p3574 A70-40174

Athletes ventilation and heart rate dynamic responses to supine leg exercise with sinusoidal work load

20 p3576 A70-40329

Human elbow induced forearm and hand vessels tachyphylaxis to angiotensin, noradrenaline and acetylcholine compared to vascular response of vasopresin

21 p3761 A70-40577

Visual vigilance task with standard, binary or rating procedures as response indicators based on signal detection theory, noting relationship to psychophysical procedures

21 p3761 A70-40743

Click-evoked potentials in rat auditory cortex, medial geniculate body, reticulate formation and hippocampus during natural sleep and waking

21 p3761 A70-40917

Ethanol ingestion effect on human response to submaximal and maximal exercise, measuring cardiac output and intraarterial pressure

21 p3761 A70-41135

Human sweating transient state characterized by time constant following abrupt ambient temperature rise

21 p3761 A70-41140

Rats brain oxygenation during hyperventilation with air or oxygen-nitrogen mixture, measuring creatine phosphatase concentration and lactate/pyruvate ratio

21 p3762 A70-41225

L-dihydroxyphenylalanine intraperitoneal injection effect on S-adenosylmethionine concentration in rat brain

21 p3764 A70-41269

Dehydrogenases activities in rabbit retina homogenates exposed to oxygen at high partial pressure for various time periods

21 p3765 A70-41487

Human leg blood flow distribution between deep and superficial veins during alternate treadmill work-rest periods

21 p3767 A70-42160

Muscular group response to sinusoidal and trapezoidal force applied to forearm, discussing frequency dependent limb oscillations and neuromuscular effects

21 p3767 A70-42161

Jet pilot EEG radio telemetry showing psychomotor stresses during takeoff and acceleration

22 p3978 A70-42877

Lateral and angular acceleration effects on blood and urine contents in specific metabolic indices of healthy young men

22 p3971 A70-43136

Visually evoked responses in man to different light stimuli intensities, noting marked increase in binocular over monocular visual response

22 p3972 A70-43408

Human postural control system response to mechanical torque disturbance, using second order differential equation with state dependent parameters for approximate analysis

22 p3979 A70-43494

Normal human postural control system reflex response to tendon jerk disturbance

22 p3979 A70-43495

Decompression hazards in manned orbiting systems, considering consciousness time, survival, pathological response, water vapor and denitrogenation effects and recompression rates

22 p3973 A70-43638

Biosatellite 3 experiment with male marmoset nemestrina monkey, discussing cardiac rate, vascular data, water balance, weight loss and brain temperature

22 p3973 A70-43646

Apollo program medical data contribution to knowledge of human response to space environment

22 p3980 A70-43651

Semicircular canals dynamic cross coupled responses to rotational movement, discussing mechanical model applicability

22 p3981 A70-43703

Orientation detectors in human visual cortex, suggesting mutual lateral inhibition

23 p4144 A70-43813

Human tolerance and ventilatory response to inspiratory mechanical loads

23 p4144 A70-43822

Human ventilatory response to resistance unloading during muscular exercise

23 p4144 A70-43823

Pilot influence on dynamic aircraft design, taking into account physiological state during various operational tasks

23 p4138 A70-44134

Water and salt metabolism changes during prolonged hypokinesia of rabbits, noting blood plasma dilution, hematocrit number and hemoglobin concentration reduction, etc

23 p4146 A70-44656

Mammal and human acoustic reflex for impulsive sound, investigating immunization effectiveness

24 p4297 A70-45373

PSYCHOLOGICAL TELEMETRY

U BIOTELEMETRY

PHYSIOLOGICAL TESTS

NT BODY SWAY TEST

NT CARBOXYHEMOGLOBIN TEST

NT EAR PRESSURE TEST

NT VESTIBULAR TESTS

Serologic evidence of immune mechanisms, including heart muscle antibodies in patients with idiopathic cardiomyopathy, showing no autoimmune disease in majority

01 p0014 A70-10276

Lipid and carbohydrate behavioral abnormalities in patients with angiographically documented coronary artery disease observed by glucose tolerance tests

01 p0016 A70-10441

Functional state changes in organism awaiting and performing parachute jump using orthostatic test, respiration retention and Howard step test

03 p0420 A70-13477

Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests

03 p0423 A70-13709

White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids

03 p0424 A70-13718

Simplified laboratory test program yielding serviceable information for possible direct laboratory diagnosis of risk factors affecting atherosclerosis

03 p0431 A70-14279

Oxygen consumption and body temperatures during acute hypoxia in man, based on low oxygen mixture breathing tests

03 p0439 A70-14291

Efferent model to test inhibitory influence of inferotemporal cortex lesions on visual discrimination of monkeys, using paired flashes of light

04 p0629 A70-14449

QRS and ST-T areas in multiple bipolar chest leads during normal and abnormal activation in patient measured for checking ventricular gradient concept

04 p0632 A70-15307

Solar and geomagnetic effects on variations in physiological tests using alimentary reflex of dogs

04 p0639 A70-15512

Surface and underwater swimming tests for statistical correlation to linear maximum accelerations effects

07 p1201 A70-18788

Circulatory system tests during linear, intermittent and continuous accelerations on centrifuge, noting lack of statistical correlation between centrifuge tests and functional tests

07 p1201 A70-18789

Tolerance level to z axis acceleration from centrifuge techniques, noting irreducibility of intermittent stepwise increasing accelerations tests

07 p1201 A70-18790

Ventilation function, pulse rate and blood pressure measured for adaptation to vertical upright and head-down positions

07 p1201 A70-18794

Physiological pilot training program of FAA, discussing slides on Aeronautical Center and Civil Aeromedical Institute

07 p1218 A70-19012

Energy cost and heart rate responses to single stage nonsteady state submaximal exercise procedures used in diagnostic and functional testing

07 p1211 A70-19690

Electromyograms cross correlation analysis to study time relationships between motor unit discharges of human musculus biceps and triceps brachii during physical work

07 p1213 A70-19791

Syncope proneness correlation with episodes of impaired consciousness in pilots during flight using physiological tests

07 p1223 A70-19944

Multistage treadmill exercise tests on healthy business executives noting S-T-segment responses

08 p1445 A70-21265

Various phases of human isometric left ventricle contraction, comparing results with previously published data

09 p1620 A70-23111

Biological performance studies under extreme environmental stresses for gaining insight into potential of earth-type life here and in universe

09 p1623 A70-23699

Cardiovascular reactions and orthostatic stability during hypodynamia determined from ECG, seismocardiograms, phonocardiograms, sphygmograms and tachy-oscillograms

10 p1817 A70-24694

Respiratory and cardiac activities, body weight variations, blood and urine electrolytic composition of astronauts during Soyuz orbital flights from medical tests

11 p1985 A70-25509

White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids

11 p1985 A70-25518

Hypoxia tolerance of albino rats in He-oxygen and Ar-oxygen environments in heat-pressure chamber, discussing He-oxygen mixture cooling effect

11 p1987 A70-26103

Open circuit gas washout test of lungs under inspiration-expiration transmission symmetry, using Hilbert-Schmidt operators

12 p2175 A70-27021

Perivascular pH influence on arteriolar diameter on brain surface of anesthetized rats and cats by micropipette technique

12 p2168 A70-27623

Electrode placement ancillary technique for obtaining stereotaxic atlas of infant rat hypothalamus

13 p2350 A70-29322

Hunger, thirst and environmental stimuli roles in development and elicitation of stimulus bound eating and drinking in animals

13 p2355 A70-29806

2000 meter race for endurance testing, using heart rate radiotelemetry before, during and after

14 p2543 A70-31173

Physiological examination of healthy human beings, considering repose situation abnormal

15 p2691 A70-31923

Physiological tests of sampled data hypothesis in human motor control system

16 p2851 A70-33323

Gas exchange adaptation to heat and cold in rats with different ecological backgrounds

18 p3218 A70-36533

Soviet monograph on automated physiological measurements with onboard computers, covering EKG, EEG, electromyogram, respiration, muscular activity, etc

19 p3372 A70-38797

Circadian rhythms from electrocardiogram and cardiogram of patient with human heart transplant, noting P waves relationship between donor and recipient tissues

20 p3570 A70-39166

Orthostatic stability reduction in experiments with simulated weightlessness, investigating functional compensation mechanisms

23 p4149 A70-45025

Biological life support system based on mutual equilibration of human metabolism and technically controlled algae culture, discussing experimental evaluation

23 p4156 A70-45026

Optimum bed rest time schedules for cardiovascular patients from neurological, dynamometric, electromyographic and myogenic-tonus tests

23 p4149 A70-45077

PHYSIOLOGY

NT PSYCHOPHYSIOLOGY

NT RESPIRATORY PHYSIOLOGY

Physiological interpretation of blood velocity curves recorded in right heart cavities of dogs by ultrasonic directional probe, using Doppler effect

01 p0035 A70-10709

Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations

03 p0436 A70-13900

Human esophagus physiology, studying sphincter function from data on healthy and afflicted subjects

07 p2124 A70-19793

Soviet collection of papers on physiology of vision under normal and extremal conditions

08 p1442 A70-20726

Compartmented physiological system dynamics by bilinear control model, relating homeostasis to system

15 p2693 A70-32571

Soviet papers on physiological data collection and analysis methods

19 p3369 A70-38206

Living organisms physiological death as biological problem, discussing hypotheses, theories and facts

23 p4145 A70-44225

Functional systems in biology, discussing interscientific demarcation, research strategy, physiological experiment, operational architectures, etc

24 p4305 A70-46391

PI-ELECTRONS

Plasma pi-electrons effects in annulene molecules, obtaining dispersion relation for plasma oscillations by Hueckel theory

14 p2621 A70-30116

PIEZOELECTRIC CRYSTALS

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure

01 p0154 A70-10131

Piezoelectric ultrasonic crystal on cardiac catheter tip measuring cardiac diameter in vitro and in excised canine hearts

01 p0038 A70-11025

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure

08 p1556 A70-21407

SnTe of various nominal hole concentrations measured for longitudinal piezoresistance effect along different crystallographic directions

10 p1927 A70-23993

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by superionic carrier drift currents

10 p1925 A70-25030

Piezo-rotatory coefficients $R_{11}/$ and $R_{12}/$ of isotropic non-enantiomorphic optically active crystals from fourth rank axial tensor, discussing stress effects

11 p2098 A70-26298

Elastic, piezoelectric and dielectric properties of barium titanate single crystals of laminar domain structure

12 p2288 A70-28329

Piezoelectric scattering effects on electron temperature and mobility in IIB-VIA semiconductor compounds with nonparabolic conduction band

13 p2471 A70-29373

Numerical model of piezoelectric surface wave propagation on free and metallized cubic and hexagonal crystals

19 p3486 A70-37754

Piezoelectric force and moment measurement by quartz multicomponent devices

19 p3426 A70-37937

Quasi-static thickness-shear approximation of radiation of electromagnetic energy accompanying oscillation of piezoelectric crystal plates

19 p3487 A70-37945

Ultrasonic surface waves amplification in piezoelectric crystal-Si semiconductor system, observing dependence on permittivity

19 p3488 A70-38675

Hydrostatic and anisotropic piezoresistance in organometallic crystals, noting iridium and platinum complexes with maximum metal-metal interaction

22 p4086 A70-43021

YIG single crystals piezo-optical effect and magnetic double refraction, describing stress measurement technique

23 p4230 A70-43931

Single crystal piezoelectric materials growth characteristics and wave propagation properties for surface acoustic wave applications

24 p4367 A70-45399

PIEZOELECTRIC GAGES

Piezoprobe parameters calculation for controlling angular welded connections of boiler assembly elements

02 p0300 A70-12481

Piezovibrator operation with two side acoustical loading in pulse mode

02 p0301 A70-12482

Piezoelectric sensing diaphragm for detection of micrometeorites in space, noting vibration mode and effect of small beads contact time on calibration errors

04 p0695 A70-15567

Piezoelectric accelerometer transverse sensitivity calibration using reference accelerometer comparison technique

06 p1073 A70-18599

Piezoelectric quartz and tourmaline pressure gages static calibration, evaluating errors

09 p1675 A70-22599

Piezoelectric field effect strain gage with semiconducting film for extremely small strains in electrically noisy background

15 p2739 A70-32317

Piezoelectric accelerometer reference systems calibration by function separation

17 p3089 A70-35173

PIEZOELECTRIC TRANSDUCERS

NT PIEZOELECTRIC GAGES

Piezoelectric transducer for photoelastic analysis of HF stress waves in thick ring subjected to transient loads

02 p0389 A70-12500

Piezojunction effect and applications in transducers, showing needle and mesa configurations as most promising methods

03 p0496 A70-14193

Solid state digital pressure transducer incorporating Si diaphragm with piezoresistive sensing elements for computerized supersonic and subsonic data applications

03 p0496 A70-14194

Piezoelectric transducers performance in ultrasonic devices evaluated from loss and admittance measurements, using Mason equivalent circuit method

03 p0496 A70-14206

Sputter machining thickness reduction methods for VHF resonant piezoelectric transducers

03 p0496 A70-14207

Electrical impedance, conversion loss and bandwidth for piezoelectric film or plate transducers used for generating planar volume-acoustic waves at microwave frequencies

06 p1062 A70-17480

Turbulence measurement by piezoceramic acoustic sensors, considering capacitance

07 p1284 A70-19829

Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower

07 p1285 A70-19835

Two component piezoelectric skin friction force transducer for hypersonic flow tunnel

13 p2405 A70-28815

Piezoelectric annular disk transducer mechanical response to step voltage input with prescribed temperature field

14 p2588 A70-31228

X band acoustic delay lines using thin film piezoelectric transducers

16 p2874 A70-33391

Ultraminiature piezoelectric semiconductor pressure transducers for wind tunnel models

17 p3093 A70-35491

Interdigital Rayleigh wave transducers piezoelectric coupling coefficient from bulk constants, permitting equivalent circuit parameters prediction

17 p3055 A70-35875

Miniature pressure transducers using piezoelectric or semiconductor elements

20 p3628 A70-39226

Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower

20 p3634 A70-40342

Piezoelectric sensors for multicomponent force and moment measurement

20 p3635 A70-40533

Triboelectric noise in mechanically flexed low level signal cables for piezoelectric transducers with high gain amplifiers

21 p3825 A70-40866

PIEZOELECTRICITY

Static deformation of radially polarized inhomogeneous rotating cylindrical shaft of barium titanate using elasticity, electric field and constitutive equations for piezoelectric materials

01 p0118 A70-10549

Piezojunction effect and applications in transducers, showing needle and mesa configurations as most promising methods

03 p0496 A70-14193

Peripheral arterial piezography for cardiological screening tests and checkups of flying personnel

05 p0807 A70-16495

Electro-optic effects in ferroelectric ceramics with electrically variable coefficients of piezoelectricity and birefringence, discussing applications

09 p1739 A70-22633

SnTe of various nominal hole concentrations measured for longitudinal piezoresistance effect along different crystallographic directions

10 p1927 A70-23993

Microwave amplifiers based on interaction between piezoelectric acoustic waves and collinearly drifting carriers, analyzing gain, frequency response, etc

11 p2018 A70-26164

Surface acoustic wave delay lines using interdigital transducers based on piezoelectrics with applications in VHF and UHF signal processing

11 p2005 A70-26165

Sound generation and detection by distributed piezoelectric sources using frequency response and equivalent circuit

11 p2085 A70-26701

Piezoelectric effects in ferroelectric ceramics using equivalent circuits and admittance matrices

12 p2283 A70-27005

Book on design of resonant piezoelectric devices covering linear piezoelectric materials, Green function, variational methods for dimensional motions and modes, etc

17 p3143 A70-35188

Two dimensional piezoelectric problems of electroelasticity, formulating general solutions in terms of stress and electric potentials using complex variables

19 p3487 A70-37946

Manganin in wire and thin foil geometries, measuring shock piezoresistance coefficient as function of deformation

20 p3687 A70-40166

Rayleigh wave scalar electric potential analysis on piezoelectric medium, using iterative techniques for Poisson equation

22 p4074 A70-42967

PIEZORESISTIVE TRANSDUCERS

NT PIEZORESISTIVE GAGES

Manganin piezoresistive shock gauge constant current supply using inductor and termination technique eliminating shunting

02 p0303 A70-12737

Miniature piezoresistive pressure transducers for catheter and external physiological measurements in small animals

07 p1220 A70-19297

Combined neutron and gamma ray irradiation effects on piezoresistive accelerometers

13 p2405 A70-28814

Subminiature solid state piezoresistive accelerometer using diffused four arm Wheatstone bridge sensor

17 p3094 A70-35522

Piezoresistive Si pressure transducer design for Digital Air Data Computers, achieving optimum resistor matching and long term stability

19 p3430 A70-38521

Sensing elements piezoresistive Si and indium antimonide film sensing elements for high sensitivity pressure transducers and accelerometers, discussing airborne telemetry applications

19 p3431 A70-38538

PIGEONS

Selective visual stimulus control by part of compound S delta in pigeons

01 p0021 A70-10796

Pigeon response to concurrent variable interval reinforcement schedules, investigating relative and changeover rates regarding key color

05 p0800 A70-16126

Chronic hypoxia effects on heart size and hematocrit ratios tested in pigeons

12 p2172 A70-28075

Fixed-ratio performance patterns of pigeon key-peck responses to fractional punishments by electric shock

22 p3971 A70-43375

PIGGYBACK SYSTEMS

Small satellites for scientific technological and operational missions, discussing piggyback launching, command, battery storage, telemetry and attitude control systems

15 p2810 A70-31781

PIGMENTS

NT CHLOROPHYLLS

Joint Chlorella-yeast cultivation on metabolites, investigating biomass accumulation and pigment synthesis

07 p1197 A70-18655

Dark adaptation correlated with in vivo visual pigments regeneration as function of bleaching during monomolecular time course

08 p1447 A70-21722

Radiation stable refractory oxides in white spacecraft thermal control coatings, discussing photocatalysis application to degradation analysis

11 p2067 A70-26364

Bidirectional reflectance and transmittance calculation for irradiated layer of monodisperse matrix suspended pigment particles

16 p2940 A70-33923

UV irradiation effects on ZnO used as pigment for spacecraft thermal control coatings

16 p2940 A70-33937

Rhodamine C chemiluminescent material for atmospheric ozone measurements, describing preparation and luminescence spectrum

19 p3373 A70-37638

Photoperiodism in animal organism, discussing retinal epithelium photosensitive substance accumulation and retino-hypothalamo-hypophyseal mechanism of pigmentation

19 p3365 A70-38413

Ruby laser radiation injury relationship to position and number of energy absorbing pigment particles in iris

20 p3579 A70-39425

Apollo 11 lunar fines porphyrin-like pigments content demonstrated by fluorescence spectrometry and analytical demetallation, suggesting rocket exhaust source

21 p3910 A70-41626

Isochromic change in bleaching of rhodopsin, showing additional intermediate without detectable color change

23 p4147 A70-44776

Pigments absence in photosystem II of photosynthesis in heterocysts of blue-green algae

23 p4148 A70-44870

PIGS [SWINE]

U SWINE

PILOT ERROR

Biphasic nature of pilot error in gliding, suggesting means of reducing aircraft accidents

03 p0433 A70-13261

Pilot visual information display systems influence on flight safety, discussing aircraft accidents and human error factors

04 p0691 A70-15143

Book on human factor in aircraft accidents covering desire to please, fatigue, diurnal rhythm, psychology, etc

06 p0987 A70-18249

Flight safety evaluation based on ICAC and German flight accident data indicating pilot role and tabulating statistical analysis

11 p1981 A70-25948

Reference systems for two dimensional visual indications as correction device for pilot guidance errors associated with rotation effects

12 p2177 A70-27036

Pilot disorientation in dark night takeoff accident type, presenting illusory angular displacement of vertical, flight paths and sequential accelerations

13 p2359 A70-29441

Corporate aircraft accident statistics, causes and prevention, noting pilot errors, mechanical failures, etc

16 p2842 A70-33814

Low cost headup displays /HUD/ for pilot error reduction during takeoff, approach and landing, discussing displayed functions vs cost tradeoffs

16 p2911 A70-33818

Pictorial display methods for pilot error reduction in area navigation via guidance control and capability beyond visual field

19 p3465 A70-38234

PILOT PERFORMANCE

Concorde aircraft flight simulator, describing piloting system refinement and pilot training

01 p0057 A70-10797

Aircraft pilot-autopilot task division during automatic landing, analyzing man machine interaction in aircraft approach guidance

01 p0139 A70-11258

Electronic displays role in pilot-aircraft interaction, considering flight safety, cost effectiveness, onboard data input, etc

01 p0039 A70-11260

Navy/pilot aircraft control performance during day and night final approach to landing on carriers for empirical performance criteria

02 p0243 A70-12131

Helicopter automatic hybrid navigation system for increased accuracy over unfamiliar terrain and above-human performance, comparing navigating pilot performance with machine

02 p0335 A70-12134

Air traffic control system for intercity and metropolitan VTOL airway reducing pilot and air traffic controller workloads

02 p0335 A70-12135

Helicopter avionic systems man machine capability estimation based on pilot workload, applying results to design evolution

02 p0244 A70-12136

Task interference model for interference among two or more continuous manual control tasks, suggesting metric for pilot mental work load

02 p0244 A70-12139

Intermittent EKG recordings during hypoxia test for detection and diagnosis of heart disorders in airmen

02 p0242 A70-12850

Biphasic nature of pilot error in gliding, suggesting means of reducing aircraft accidents

03 p0433 A70-13261

Commercial pilots susceptibility to emphysema and respiratory impairment in hypobaric environment, discussing flying disability implications

03 p0438 A70-14068

Cockpit display system to reduce aircraft pilot work load and aid judgment making during critical operations [ASME PAPER 69-WA/BHF-12]

04 p0642 A70-14854

Aircraft pilots vertigo during flight using questionnaire and interviews, emphasizing bank directional disorientation

04 p0643 A70-14979

Pilots hearing level based on pure tone threshold audiograms compared with personnel not exposed to job noise

04 p0631 A70-14982

Pilot response to stability augmentation system failures and design implications [AIAA PAPER 68-819]

04 p0624 A70-15379

Cardiology role in aviation medicine, evaluating jumbo jet and SST flight stress effects on pilots and passengers in age factor study of arteriosclerosis

05 p0803 A70-16721

High temperature effects on pilots psychomotor performance and physiological function, discussing measurements taken during complex tasks

06 p0999 A70-17290

High fidelity simulations for environmental stress evaluations, describing carbon dioxide effects on pilots simulated ground target tracking and reentry vehicle landing

06 p0999 A70-17291

Pilot emotional state during stressful situations from tape recorded vocal utterances of air to ground radio communications using spectrographic analysis

06 p1000 A70-17297

Anxiety-stress effects on pilot performance in execution of acquisition tracking task minimized by training

06 p1003 A70-18016

Cooper aircraft handling rating scale on basis of test pilot experience

06 p1003 A70-18018

Emotional stability relationship to pilot acceleration tolerance tested on centrifuge, confirming instability correlation to poor resistance

07 p1201 A70-18793

Vestibular semicircular canal excitation thresholds of experienced and candidate pilots for imposed angular accelerations

07 p1201 A70-18795

Acceleration and weightlessness effects on efficiency, reliability and capacity in pilots and astronauts muscular system

07 p1202 A70-18797

Decision algorithms simulating human controller adaptive behavior in controlling VTOL aircraft in hover following stability augmentation system failure

07 p1216 A70-18860

Pilot limitations role in USAF midair collisions, discussing information systems for collision avoidance

07 p1192 A70-19022

Ground terrain blurring during aircraft flight at low altitude and high speed, calculating theoretical blur zone

07 p1220 A70-19285

Concorde simulator for determining aircraft control responses and integrating pilot function into problem

07 p1249 A70-19743

Missassignment prevention in aviation specialties, using multiple regression analyses and dichotomous pass vs fail criterion to develop prediction equations

07 p1222 A70-19929

Vital capacity measurements made preflight and postflight on jet fighter aircrew breathing pure oxygen at various G forces

07 p1222 A70-19934

Syncope proneness correlation with episodes of impaired consciousness in pilots during flight using physiological tests

07 p1223 A70-19944

Visual aspects of collision avoidance, describing prudent mid-air maneuvers

08 p1449 A70-20481

Attack aircraft cockpit displays, discussing design requirements and pilot ability as controller

08 p1435 A70-20674

Optical suitability to pilot visual requirements in head-up displays, discussing telecentric viewed system permitting binocular disparity tests

08 p1449 A70-20675

Flight crews spatial vision, estimating absolute distance perception of pilots and navigators with emmetropic refraction

08 p1450 A70-20742

Convergence role in distance perception during aircraft landing, testing subjects with normal binocular vision, emmetropic refraction and visual acuity

08 p1450 A70-20744

Aircraft flight testing techniques modification to cover maximum performance values

08 p1437 A70-21735

Pilot and copilot task distribution schedules adopted by European civil aviation for landing approaches under poor weather conditions

08 p1542 A70-21850

Circadian rhythm of pilot efficiency and multiple time zone travel effects [DFVLR-SONDDR-29]

08 p1453 A70-21935

Time lapse photographic recording and scoring in-flight performance of helicopter aviator trainees during hypothetical tactical instrument mission

09 p1624 A70-22900

Flight stress effect on blood clotting stabilization of Starfighter aircraft pilots, observing no change in thrombocytes number

09 p1625 A70-23005

Aircraft pilots psychic and flight stress admissible degree not resulting in hazardous consequences, suggesting measures to increase resistance

09 p1625 A70-23006

Psychic stress causing factors and reactions in aircraft pilots on duty, analyzing harmful effects on organism

09 p1620 A70-23012

Body training type and amount effect on physiological functions and physical fitness of pilots, discussing pulse frequency

09 p1626 A70-23015

Metabolic and heart rates determined in experienced and inexperienced pilots during Hiller 12-E and 12-EL helicopters flight through standard maneuvers

09 p1627 A70-23455

Visual search activity decrease observed as function of time-on-task for skilled and unskilled helicopter pilots, recording eye movements and blinks

09 p1628 A70-23463

Pilot/vehicle dynamics from flight test records, discussing close-loop attitude control tasks

10 p1824 A70-23897

Airborne simulator program for evaluation of motion and visual cue effects on pilot performance in roll, using compensatory tracking tasks

10 p1857 A70-24202

Ground-based and in-flight simulation using variable stability aircraft, investigating pilot rating

10 p1858 A70-24209

Statistical methods for flying quality research concerning sailplane dynamic stability, maneuverability, sensitivity, rolling and pilot induced oscillations

10 p1805 A70-24582

Ground based simulation for hypersonic reusable lifting reentry vehicle design with pilot-in-loop, discussing six degree of freedom simulation

10 p1861 A70-24920

Pilots with high vestibular stability studied for spatial orientation, noting activity impairment due to alternating angular acceleration and optokinetic stimuli

10 p1828 A70-25180

Japanese jet aircraft pilots instrument reading and checking procedures during landing operation under contact flight rules

11 p2078 A70-25667

Pilot electroencephalograms during F-104 flights recorded by telemetering noting alpha, beta and theta activities

11 p1990 A70-25668

Aged pilots hearing acuity using speech audiometry, noting discrimination loss for HF verbal sounds

11 p1990 A70-25669

Inflight aircraft cockpit noise levels effect on pilot hearing sensitivity

11 p1990 A70-25875

Short duration high workload effects in pilot rr interval and finger tremor during Boeing 747 aircraft let-down, approach and landing

11 p1993 A70-26521

Agricultural pilots fatigue based on flight and environmental effects

11 p1993 A70-26522

Aviation psychological research - Conference, Zurich, September 1969

12 p2175 A70-27026

Minnesota Multiphasic Personality Inventory scores compared with various pilot training proficiency levels, noting low correlation

12 p2176 A70-27032

Aircraft pilot candidates reactions under simulated flight conditions tested using precision coordination analyzer /PCA II/ and instrument coordination analyzer /ICA/

12 p2176 A70-27034

Pilots psychophysiological reactions to various aircraft types and flight maneuvers, considering recorded comments, blood pressure and heart rate

12 p2177 A70-27042

Pilots anxiety in military milieu using interviews and questionnaires noting effect on proficiency

12 p2179 A70-27051

Psychological tests of pilot adaptation to accident situation using photo display assessment

12 p2179 A70-27052

Area navigation for reducing cockpit navigation workload, permitting aircraft operations on desired course and enhancing pilot response to ATC instructions

[SAE PAPER 700283]

12 p2266 A70-27426

Airborne equipment for Air Traffic Control System, improving pilot/controller cooperation

[SAE PAPER 700300]

12 p2266 A70-27448

Visual aircraft-to-aircraft detection effectiveness in collision avoidance as function of pilot performance and closing speed

12 p2267 A70-27633

Man machine eye-integration coupling in tracking task applied to helicopters, ocean-going craft and propeller aircraft

13 p2357 A70-28386

Frequency and amplitude during longitudinal control surface pumping by pilots in precise flight path handling for aircraft design

[AIAA PAPER 70-567]

13 p2346 A70-29032

Pilot-aircraft closed-loop characteristics, using pilot transfer functions for handling qualities prediction

[AIAA PAPER 70-568]

13 p2346 A70-29033

Longitudinal short-period flying qualities as closed-loop pilot-airplane system, noting acceptance values

[AIAA PAPER 70-569]

13 p2346 A70-29034

Military pilots visual estimation of point location coordinates within rectangular area

13 p2357 A70-29121

Flying qualities application to automobiles, discussing work load with respect to controllability and pilot behavior

13 p2347 A70-29142

Psychophysiological characteristics of pilot activity during various landing approaches with different instrumentation levels, studying heart and respiratory rates

13 p2358 A70-29297

Acceleration effects on mental working capacity of fighter pilots, discussing attention shift and stability, operational memory, sensorimotor reactions

13 p2351 A70-29337

Cardiac cycle and phases shortening observations from analyzing electro- and phonocardiographic data recorded during Gemini flights

13 p2359 A70-29437

Man powered aircraft /MPA/ designs, considering bird flight aerodynamic characteristics

14 p2531 A70-30859

V/STOL control systems design for aircraft stabilization and pilot workload reduction

14 p2615 A70-31278

Model for pilots optimal manual control of hovering VTOL aircraft longitudinal position

14 p2543 A70-31409

Heat stress levels in cockpit of AH-1G Hueycobra helicopter parked in sunlight with closed canopy, using sweating copper mannikin

15 p2689 A70-31881

Pitch and Coriolis illusions effects on pilot pitch angle adjustment in simulated takeoff

15 p2689 A70-31885

Pilots brake-takeoff decision at critical engine failure speed, discussing operational aspects of accelerate-stop criteria

15 p2675 A70-32219

Aircraft accident prevention via reduction of pilot attention distractions

15 p2692 A70-32226

Medical and professional disadaptation in fighter pilots, considering fatigue, digestive disorders, anxiety, absenteeism, efficiency loss and accident proneness

16 p2850 A70-34347

Aircraft pilot and nonpilot night vision adaptation comparison, using Goldmann-Weekers adaptometer

17 p3038 A70-35138

Fatal general aviation accidents examined by pathologists, determining pilot incapacity, accident sequence, aircraft design modification and crash protection performance

17 p3033 A70-35567

Safety in airline operations, discussing roles of aircraft designer and pilot

[AIAA PAPER 70-907] 17 p3019 A70-35819

Integrated flight management system for commercial aircraft pilot using computer

[AIAA PAPER 70-908] 17 p3134 A70-35820

Acrobatic pilots equilibrium behavior in vestibular training, discussing labyrinth reactions and fluid intake role

17 p3041 A70-35919

Optokinetic and vestibular effects on human operator reliability in aircraft control systems

18 p3223 A70-36184

Visual effects in astronauts and pilots, discussing optical illusions and distance estimation errors due to accelerations, runway factors, lack of oxygen, etc

18 p3225 A70-36777

Computer simulated decision hierarchical model of helicopter and VTOL pilot for multiloop closure and tracking characteristics of man-vehicle system

19 p3372 A70-38921

Comfort plane switch mounting design for helicopter collective controls, noting mock-up evaluation by test pilots

19 p3372 A70-38922

Hypoxia effects on aviators visual accommodation, convergence and stereoacuity, noting myopia increase with altitude

20 p3569 A70-38996

Bobweights effects on pilot induced oscillations, noting role in flying qualities and control system design

[AIAA PAPER 70-1002] 20 p3560 A70-39529

Pilot scanning dwell times and control workload in simulated instrument approach, using eye-point-of-regard (EPR) measurements

[AIAA PAPER 70-999] 20 p3580 A70-39532

Turbulence effects on lateral directional flying qualities, examining pilot task performance, control workload and compensatory behavior

[AIAA PAPER 70-998] 20 p3560 A70-39533

Student pilot case diagnosis of hysterical neurosis with syncopal and epileptiform symptoms

21 p3771 A70-41493

Postexercise electrocardiogram detection of latent coronary heart disease in flyers prior to myocardial infarction

21 p3771 A70-41494

Age, grade, educational institution and attitude effects on pilot personality test performance

22 p3977 A70-42870

Aircraft handling qualities specifications and definitions evolution based on test pilot rating correlation with engineering data and piloting ease evaluation with transfer functions

[ICAS PAPER 70-19] 23 p4138 A70-44114

Pilot influence on dynamic aircraft design, taking into account physiological state during various operational tasks

[ICAS PAPER 70-37] 23 p4138 A70-44134

Aircraft crew and pilot in-flight work load measurement and simulator

[ICAS PAPER 70-43] 23 p4138 A70-44141

Pilot trainees psychological screening, correlating Rorschach test parameters with subsequent training performance

24 p4306 A70-45123

Pilot heart rate during in-flight simulated ILS approaches in general aviation aircraft

24 p4306 A70-45333

Pilot navigation efficiency in low altitude terrain following flight, using synchronized TV and simulator with inertial guidance

24 p4307 A70-45506

Pilot hand-held and leg-mounted controllers for precision tracking from aircraft under buffeting tested in static and dynamic motion simulator

24 p4308 A70-45513

Biotechnological design of shirt/sleeve side-by-side crew station for shuttle vehicle, including pilot vision and landing experience from X-15 program

[AIAA PAPER 70-1327] 24 p4416 A70-45923

Pilot interface with area navigation system, describing control and display unit for navigation situation, flight plan and system status

[AIAA PAPER 70-1335] 24 p4373 A70-45933

PILOT PLANTS

Pilot model based on Kalman filtering and optimal control, investigating evaluation for time stationary conditions and sine-wave tracking

10 p1823 A70-23894

Complex organization-processing system of experimental production, noting work specialization in machine shops

11 p2060 A70-25936

PILOT SELECTION

Scientifically oriented pilot selection objectives criteria taking into account data concerning accident causes

[DVL-892] 02 p0242 A70-11684

Scandinavian Airlines system of pilot selection, considering personality traits, behavior characteristics, clinical examination, etc

03 p0433 A70-13260

SAS pilot selection system, discussing assessment variables, physiological examinations, psychological tests, recruiting procedure, etc

03 p0433 A70-13262

Missassignment prevention in aviation specialties, using multiple regression analyses and dichotomous pass vs fail criterion to develop prediction equations

07 p1222 A70-19929

Cardiovascular aging and aeromedical maintenance programs for selecting test pilots

08 p1453 A70-21739

Vestibulometric techniques for medical examination and pilot selection using Coriolis accelerations for instability prognosis

09 p1617 A70-22475

Pilot leadership qualities as criteria for selection, examining command training

11 p1993 A70-26607

Pilot training applicant test profiles, discussing difference between intelligent and intellectual candidates

12 p2176 A70-27028

Fighter pilot selection and training in Royal Netherlands Air Force

12 p2176 A70-27029

Elementary flight training study in Royal Netherlands Air Force for improving pilot selection, discussing instructor and social science roles

12 p2176 A70-27030

Aircraft pilot ability tests validity, applying correction methods in decision making regarding applicant acceptance

[DFVLR-SONDDR-32] 12 p2176 A70-27031

Ab initio pilots selection and training in Swissair, describing preselection, in-flight and final selection tests and interviews

12 p2176 A70-27033

Flying accident liability predictions reliability from pilot trainee aptitude test performance at selection, discounting accident proneness theory

12 p2178 A70-27048

Radiological studies of young adult spines for selecting aircrew personnel and collecting data to compile reference dossiers in case of accidents

12 p2171 A70-28039

Scandinavian airlines /SAS/ pilot selection system validity based on scores

15 p2689 A70-31772

French airline pilots training program at Montpellier and St-Yan, considering selection, licensing and simulators

16 p2853 A70-33675

Airsickness frequency, pathogenesis and prevention, discussing cadet selection

17 p3037 A70-35129

Medicopsychological and labyrinthine exploration of flight crew candidates aeronautical adaptation, using electronystagmographic method of swinging chair

17 p3041 A70-35918

Aptitude test validity taking into account selection board subjective decisions on pilot applicant acceptance

19 p3371 A70-38507

Airline transport pilots selection based on psychiatric and psychological testing

22 p3981 A70-43697

Pilot trainees psychological screening, correlating Rorschach test parameters with subsequent training performance

24 p4306 A70-45123

Aviation psychiatry role in pilots selection and treatment

24 p4296 A70-45124

Psychological training and selection of airline pilots for stress resistance

[DFVLR-SONDDR-53] 24 p4310 A70-46413

PILOT TRAINING

Concorde aircraft flight simulator, describing pilot training system refinement and pilot training

01 p0057 A70-10797

Adaptive man machine system for automated training of pilot dynamic control skills /decision and motion/, describing synthesis procedure

02 p0246 A70-12148

Visual spaceflight simulators for spacemen and aircraft pilot training

04 p0663 A70-14691

Visual, motion and auditory stimuli role in enhancing aircraft pilot training simulators realism, considering motion perception research

[ASME PAPER 69-WA/BHF-9] 04 p0642 A70-14853

Professional personality formation and organization of aviator, discussing infancy motivation, identification with instructor during training, emotional life, etc

05 p0799 A70-15767

Adaptive training applied to simulated pilot training system, discussing methods for variables selection, error measurement, trainee feedback, etc

05 p0805 A70-16007

Psychological factors in training and education of pilots and astronauts for optimal matching between human operator and vehicle control system

05 p0809 A70-16967

Anxiety-stress effects on pilot performance in execution of acquisition tracking task minimized by training

06 p1003 A70-18016

Crash control for reduction of operational hazards and flight accidents to survivable level, discussing pilot training for emergencies

07 p1191 A70-19008

Physiological pilot training program of FAA, discussing slides on Aeronautical Center and Civil Aeromedical Institute

07 p1218 A70-19012

Aviation medicine, discussing pilots physical fitness and training, spatial orientation, ground crew, data flow, etc

08 p1451 A70-20977

Jet pilot trainee qualification requirements, training process methods and equipment, considering German-French joint trainer aircraft program

08 p1452 A70-21348

Air transport total in-flight simulator /AT/TIFS/ equipped with six degree of freedom variable stability system for aircraft development and pilot training

08 p1437 A70-21736

Flight simulators for pilot training, discussing need for aircraft motion cues

09 p1655 A70-22296

Time lapse photographic recording and scoring in-flight performance of helicopter aviator trainees during hypothetical tactical instrument mission

09 p1624 A70-22900

Air combat simulator with attacker and evader pilots control capability, comparing simulated interceptions with flight test maneuvers

[AIAA PAPER 70-340] 09 p1656 A70-23023

Psychological fitness capacity of students in pilot training, determining unfavorable traits for flight

11 p1985 A70-25670

Civil airlines training captains heart rate response to simulator stress, base conversion and line training

11 p1992 A70-26519

Pilot leadership qualities as criteria for selection, examining command training

11 p1993 A70-26607

Pilot training applicant test profiles, discussing difference between intelligent and intellectual candidates

12 p2176 A70-27028

Fighter pilot selection and training in Royal Netherlands Air Force

12 p2176 A70-27029

Elementary flight training study in Royal Netherlands Air Force for improving pilot selection, discussing instructor and social science roles

12 p2176 A70-27030

Minnesota Multiphasic Personality Inventory scores compared with various pilot training proficiency levels, noting low correlation

12 p2176 A70-27032

Ab initio pilots selection and training in Swissair, describing preselection, in-flight and final selection tests and interviews

12 p2176 A70-27033

Aircraft pilot candidates reactions under simulated flight conditions tested using precision coordination analyzer /PCA II/ and instrument coordination analyzer /ICA/

12 p2176 A70-27034

Civilian pilot trainee stress level dependence on individual flying instructors, detecting psychophysiological variables by inflight recording

12 p2178 A70-27044

Preparatory aviation training applicants intelligence correlated with number of brothers and sisters

12 p2178 A70-27050

Airline flight crews training need, emphasizing pilot flight maneuver capabilities for emergencies

13 p2345 A70-28974

USAF undergraduate pilot trainees responses in prototype spatial orientation trainer

13 p2359 A70-29439

DC-9 aircraft pilot training including jet introduction, DC-9 conversion and route training

14 p2542 A70-30417

French airline pilots training program at Montpellier and St-Yan, considering selection, licensing and simulators

16 p2853 A70-33675

Variable stability trainer modification of F-106 to reproduce flight characteristics of aircraft for pilot training in potentially dangerous situations
16 p2842 A70-33815

Soviet book on peripheral vestibular apparatus and higher nervous system roles in motion sickness covering Coriolis acceleration tests, pilot training and selection, drugs, etc
19 p3359 A70-37406

Boeing 747 pilot transition training, discussing takeoff, landing, eyelevel, flareout taxi speeds, inertial navigation and electrical, fuel and hydraulic systems
20 p3562 A70-40083

Highlift and blown wing types slow speed STOL aircraft, comparing pilot training requirements with jet airline flying
[AIAA PAPER 70-1282] 24 p4292 A70-45971

Psychological training and selection of airline pilots for stress resistance
[DFVLR-SONDDR-53] 24 p4310 A70-46413

PILOTTED CENTRIFUGES
U HUMAN CENTRIFUGES

PILOTLESS AIRCRAFT
NT DRONE AIRCRAFT
NT TARGET DRONE AIRCRAFT

PILOTS (PERSONNEL)
NT AIRCRAFT PILOTS
NT TEST PILOTS

Human communication in pilots and in maintenance and administrative personnel, noting time factor influence
04 p0644 A70-14985

Pilots temporal lobe epilepsy case history and diagnosis
06 p1000 A70-17301

Flight doctor-pilot relationship, studying personal motivation
12 p2178 A70-27049

Age discrimination in employment policies of air carriers, discussing legislative measures, hiring practices and retirement rules concerning stewardesses and FAA pilots
12 p2336 A70-27772

Pilots EEG characteristics, noting alpha and beta rhythms prevalence
13 p2358 A70-29342

Vestibular habituation among pilots and flying staff from training and seniority standpoint
14 p2538 A70-30914

Sympathoadrenals activity in pilots during supersonic flight, investigating urinary catecholamine output
15 p2690 A70-31891

Characteristic injuries from aircraft controls inflicted in fatal accidents, showing pilot position and hand location upon impact
17 p3039 A70-35573

Pilot assessment aspects of flight simulation in terms of experiment planning, facility and results reporting and analysis
23 p4153 A70-44546

PINCH EFFECT
NT PLASMA PINCH
NT THETA PINCH

Pinch characteristics of simple band structure semiconductor and nondegenerate electron gas during bimolecular current carrier recombination, determining hole pairs spatial and recombination spectral distribution
03 p0538 A70-13062

Recombination emission of InSb semiconductor at low temperature during pinch effect with electron gas degeneration, calculating spectral distribution and effective temperature vs current
03 p0539 A70-13406

Magnetic field effect on recombination radiation intensity under pinch effect in semiconductor nondegenerate electron hole plasma with recombination time exceeding carrier lifetime
03 p0540 A70-13508

Hydrostatic thrust bearing with electrically conducting gas lubricant under axial current induced MGD pinch
03 p0497 A70-13780

Anodic precursors of convergent cylindrical shock wave of z-pinch discharges in He and Ar
07 p1261 A70-20357

Degenerate pinch in bipolar electron-hole plasma in semiconductors
13 p2472 A70-29760

Current distribution and interband recombination emission in bipolar semiconductor crystal under pinch effect produced by external magnetic field
20 p3677 A70-39590

Semiconductors with bipolar conductivity under electron-hole scattering, calculating plasma pinch effect on I-V characteristics
24 p4390 A70-45659

PINEAL GLAND
Dibutyltryl cyclic adenosine monophosphate stimulation of melatonin and serotonin synthesis from C-14 labeled tryptophan by rat pineals in organ culture
01 p0022 A70-10824

Melatonin biosynthesis, discussing regulation by light and sympathetic nerves, daily pineal rhythms, estrous rhythms and ovarian hormones
03 p0424 A70-13809

Mammalian pineal organ control experiments involving light and sympathetic nerve stimulation
10 p1812 A70-24396

Pineal C14-indoles synthesis in rats noting no direct effect of morphine
11 p1988 A70-26299

PINHOLES
Pinhole expansion in anisotropic plastic disks determined by obtaining solutions for Tresca and Mises yield functions, assuming plane stressed state
11 p2138 A70-26171

PION BEAMS
Extensive air shower characteristics for inelasticity coefficient, nucleon-pion interaction cross sections and secondary particles, noting parameter interchangeability
05 p0898 A70-15946

Neutron and proton distributions rms radii in nuclei by optical model analysis of low energy pion-nucleus interactions
07 p1337 A70-19360

Nucleon spectra, particle multiplicities and radiochemical cross sections following stopped-pion absorptions by complex nuclei, comparing calculated and experimental data
14 p2618 A70-30341

PIONEER SPACE PROBES
NT PIONEER 6 SPACE PROBE
NT PIONEER 8 SPACE PROBE
NT PIONEER 9 SPACE PROBE

High energy solar flare data from neutron monitor stations supplemented by low energy data from interplanetary space probes Pioneer 6 and 7
05 p0902 A70-16443

Pioneer 6-9 low magnetism spacecraft for interplanetary magnetic field observation
13 p2507 A70-30046

Pioneer-F Jupiter flyby mission planning, considering use of optimum broken plane trajectories to increase launch opportunity and/or payload capability
[AIAA PAPER 70-1050] 19 p3528 A70-38865

SNAP 19 radioisotope thermoelectric generator module for Viking Lander and Pioneer applications, discussing design requirements, environmental and mission constraints, life, performance and reliability characteristics, etc
22 p4071 A70-43195

PIONEER 6 SPACE PROBE
Transient Faraday rotation of S-band telemetry carrier observed during Pioneer 6 occultation by solar corona, correlating with decametric solar radio bursts
02 p0369 A70-12059

Pioneer 6 radio signal spectrograms during solar occultation, noting solar event effects on bandwidth
02 p0369 A70-12060

Magnetosheath plasma measurements by Pioneer 6 during outbound passage in dusk meridian, comparing results with various predictions
13 p2396 A70-29180

Solar wind observations by Pioneer 6, considering particle density, flux and kinetic energy
16 p2972 A70-32949

Nonmagnetic explosive actuated indexing device permitting precise 180 deg rotation of magnetometer sensor on Pioneer 6 spacecraft
16 p2914 A70-34124

PIONEER 8 SPACE PROBE
Primary cosmic ray nitrogen nuclei intensity and spectrum measured by balloons and Pioneer 8 space probe, obtaining abundance difference from solar atmosphere
01 p0169 A70-10319

Geomagnetic tail observations by Pioneer 8 probe
03 p0475 A70-13851

Geomagnetic tail observations by Pioneer 8 at 500 earth radii, analyzing time-averaged magnetic field data
03 p0575 A70-13983

Interplanetary magnetic field measurements by Pioneer 8 during 25 February 1969 solar activity, discussing geomagnetic storms, cosmic rays, shock fronts and ionospheric disturbances
19 p3513 A70-37501

Primary interplanetary electron energy spectrum, using Pioneer 8 measurements
19 p3502 A70-38094

Pioneer 8 and 9 cosmic ray detector system, discussing mechanical, electrical and data conditioning properties
23 p4195 A70-44300

PIONEER 9 SPACE PROBE
Pioneer 8 and 9 cosmic ray detector system, discussing mechanical, electrical and data conditioning properties
23 p4195 A70-44300

PIONS
Nucleons and high energy pions inelastic interactions with complex nuclei involving external diffraction production of pions
03 p0526 A70-13029

Pion production characteristics during high energy nucleons interactions from data on production in upper atmosphere by gamma-quanta families/isobaric production/
03 p0555 A70-13032

Charged particles distribution according to multiplicity during pion-nucleon and nucleon-nucleon interactions at high energies
03 p0555 A70-13033

Pion and nucleon interactions with atomic nuclei at 200 Gev using Wilson chamber and ionization calorimeter, determining pion collisions characteristics
03 p0555 A70-13034

Pionic transition in Ni isotopes to measure nuclear interaction effects, observing level shift and broadening
05 p0885 A70-16682

Pion and nucleon interactions, tabulating average multiplicity and inelasticity values for various primary cosmic ray energy levels
09 p1745 A70-22775

Cosmic gamma ray spectrum from secondary neutral pion production in p-p interactions, discussing delta isobar, fireball and nuclear interactions effects
11 p2106 A70-26707

High energy break in isotropic gamma ray spectrum predicted from critical test of cosmological pion-decay hypothesis
11 p2106 A70-26844

Th 232 and U 238 pionic X ray energies and widths, suggesting anomalous effect for interaction between high-Z nuclei and pion
15 p2776 A70-31738

Galactic gamma rays from OSO-3 observations attributed to decay of neutral pions produced by cosmic rays interaction with interstellar gas nucleons
17 p3150 A70-34567

Three dimensional nucleon-pion cascade equations solution for cosmic ray extensive air showers by pion-links method
17 p3150 A70-34597

Interstellar electron and positron intensity, observing pion production spectrum from nuclear collisions at machine energies
19 p3504 A70-38111

Background gamma ray observations attributed to decay of pi-mesons produced by extragalactic cosmic ray protons collisions, noting radiation sources age
21 p3877 A70-40703

PIPE FLOW
Heat transfer in tube flow with forced convection, internal radiation exchange, axial wall heat conduction and arbitrary wall heat generation
01 p0214 A70-10294

Steady one dimensional flow in gas filled cylindrical tube, studying shock induced compression wave generated by sudden piston acceleration
01 p0062 A70-10804

Flow stability criterion in rough pipes, deriving laminar to turbulent flow transition characteristics and drag as function of Reynolds number
01 p0064 A70-10998

Mass transfer analysis for axisymmetric turbulent flow in circular tube, deriving turbulent velocity profile from two part model, based on von Karman similarity hypothesis
01 p0064 A70-10992

Nonaxisymmetric mass transfer in turbulent flow in plain circular tube, considering diametral line and discontinuous ring sources
01 p0065 A70-11093

Mixing length relationship in Prandtl theory for turbulent channel and pipe flow, deriving universal velocity distribution law
02 p0277 A70-11911

Pressure drops in turbulent flow through circular or plane parallel section pipes, obtaining mean velocity expressions suitable for application to lubrication
02 p0277 A70-11912

Average pressure at downstream end of pipe discharging into reservoir with upstream end under pulsed flow, considering application to pneumatic control system
02 p0279 A70-12110

Axial flow reversal in swirling incompressible tube flow, discussing static pressure, velocity profiles and turbulent Navier-Stokes equation
03 p0465 A70-13017

Wall temperatures and heat transfer coefficients for solid-vapor mixtures of para hydrogen and nitrogen flowing in heated tube
03 p0604 A70-13018

Unsteady heat transfer equations for laminar fluid flow in pipe with varying wall temperature
03 p0604 A70-13207

Swirling flow through axisymmetrically deformed tube without consideration of viscosity and compressibility, noting wall flow for critical Rossby number values
03 p0468 A70-13788

Structural similarity hypothesis for fully developed turbulence in smooth circular tubes, using intensity correction procedure
04 p0665 A70-14453

Blood flow through veins and collapsible tubes simulated by physical model, downstream pressure effect and importance of collapse phenomena

04 p0641 A70-14631

Finite difference theory applied to numerical analysis of laminar equilibrium MHD flow in circular tube [ASME PAPER 69-WA/HT-55]

04 p0727 A70-14794

Heat transfer in partially ionized argon plasma flowing in water cooled circular tube as function of temperature, Reynolds number and tube entrance diameters

[ASME PAPER 69-WA/HT-54]

04 p0780 A70-14795

Heat transfer to absorbing fluid by coupled thermal radiation and laminar forced convection at pipe entry region, considering gray and nongray absorption

[ASME PAPER 69-WA/HT-16]

04 p0783 A70-14818

Laminar and turbulent flows of compressible media in rotating pipes, analyzing velocity distribution, angular velocity and Coriolis effects using Abel equation

04 p0672 A70-15159

Entrance shape effects on tube rarefied flow in transition regime, noting role of Reynolds number in shape selection

04 p0675 A70-15593

Unsteady flow equations for periodic axisymmetric laminar flow of second order fluids in circular cylindrical pipes

05 p0831 A70-15871

Closed form solutions describing nonlinear motions of incompressible fluid flowing in thin walled tube buckled by uniform external pressure

05 p0832 A70-16090

Laminar flow in circular pipe with arbitrary axial variation of wall temperature or heat flux, using integral type approximation

05 p0957 A70-16519

Free molecular flow through long circular tube rotating with constant angular velocity about axis, discussing rotation speed effect on mass flow

05 p0836 A70-16994

Steady laminar flow with frictionless central core surrounded by boundary layer in circular curved pipe, discussing friction factor and flowmeter discharge coefficient

05 p0836 A70-17107

Viscoelastic fluid flow through circular tube under time dependent pressure gradient superposed on steady Poiseuille flow

06 p1032 A70-17200

Frictional drag reducing polymer solution injection into boundary for turbulent pipe flow, discussing Reynolds number, injection rate, injection points and concentration

06 p1032 A70-17215

Suddenly started laminar flow in circular tube entrance region, obtaining integral momentum equation for boundary layer thickness, entrance length, velocity profile, etc

06 p1034 A70-17528

One dimensional compressible flow analysis for near field aerodynamics of tube-vehicles, showing drag coefficient dependence

[AIAA PAPER 70-140]

06 p1038 A70-18077

Monte Carlo analysis of free and near free molecular flow through circular tubes for mass, momentum and energy transfer

06 p1051 A70-18367

Slip flow of nitrogen gas through long circular tubes, measuring mass flow, pressure drop and cross sectional velocity profiles

06 p1051 A70-18368

Pipe orifice conductance for rarefied gas flow measured for specific Knudsen numbers and pressure ratios

06 p1052 A70-18370

Plastic lubricants motion in circular pipes, determining drag and cross sectional velocity profile of laminar flows

07 p1290 A70-18652

Gas detonation in rough walled pipe, calculating Chapman-Jouguet detonation velocity, deriving existence criterion

07 p1419 A70-18752

Approximate solution for heat transfer in incompressible fluid laminar flow in circular tube

07 p1253 A70-19060

Laminar flow forced convection heat transfer in circular pipe entrance region for constant wall temperature and constant wall heat flux

07 p1420 A70-19215

Cylindrical tubes steady axisymmetric inlet flow at lower Reynolds numbers, applying results to blood vessels entry flow

07 p1205 A70-19244

Spectral functions of airflow velocity pulsations in circular pipe at various Reynolds numbers, considering laminar, transition and turbulent regimes

07 p1259 A70-19826

Large axisymmetric disturbances generated in laminar pipe flow by sleeve oscillating at wall, measuring flow with laser-Doppler velocimeter

07 p1286 A70-19995

Damped turbulent whirling tube flow friction characteristics and heat exchange, solving equation of maximum tangential flow rate

07 p1261 A70-20464

Steady pressure driven flow of conducting fluid through insulating circular pipe in transverse magnetic field

08 p1549 A70-20502

Local heat transfer coefficients for unsteady conditions in tube determined by gradient method, noting use in reacting flow and jet nozzle protection

08 p1598 A70-21189

Unsteady flow in circular tube of constant section with time dependent discharge, determining pressure gradient and velocity distribution

08 p1484 A70-21477

Transverse oscillation periods of cylinder containing flowing fluid obtained by solving nonlinear partial differential equations describing transverse and longitudinal motion

08 p1592 A70-21480

Solid layer effect on laminar heat transfer and pressure drop in medium surrounding pipe with liquid flows below freezing point, discussing wall temperature effects

08 p1485 A70-21589

Heat transfer augmentation in tubes by surface roughness and twisted tape generated swirl flow

08 p1600 A70-21830

Gas flow in pipe with uniform wall heat flux, analyzing turbulent heat transfer using heat balance equation [ASME PAPER 69-HT-H]

08 p1486 A70-21834

Radiative transport in nongray cylindrical medium using total band absorptance

09 p1790 A70-23553

Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles [ASME PAPER 69-HT-4]

09 p1790 A70-23558

Velocity distribution along cylindrical pipe in adiabatic flow with friction and known inlet parameters

09 p1607 A70-23616

Steady and unsteady viscous incompressible one dimensional flows parameters in deformable cylindrical tube determined, solving continuity and motion equations by Galerkin method

09 p1664 A70-23715

Fluid boiling heated nonuniformly in pipe, deriving formulas for unsteady temperature field by integrating energy equation

09 p1791 A70-23716

Progressive shock waves propagation, reflection and transmission through sudden changes in pipe cross sectional area, obtaining boundary conditions for quasi-steady junction flow

09 p1664 A70-23738

Unsteady MHD flow in circular pipe with nonconductive walls under transverse magnetic field

10 p1921 A70-23959

Quasi-one dimensional motion of perfect compressible fluid through pipe, considering one dimensional schemes in aerodynamics

10 p1865 A70-24102

Molecular, viscomolecular and laminar gas flows in tubes and porous bodies at low pressures

10 p1869 A70-24287

Turbulent flow nonresonant pressure pulsations effects on local convective heat transfer in tube flow

10 p1968 A70-24288

Hydraulic loss and secondary circulation of fluid flow in three dimensional bend commercial conduits, discussing relationship to velocity distribution

10 p1871 A70-25094

Approximate solution for heat transfer in incompressible fluid laminar flow in circular tube

10 p1871 A70-25211

Secondary peripheral air injection effects on subsonic airflow through slotted tube, discussing primary flow, flow separation, static and stagnation pressures and temperature changes

11 p2036 A70-26140

Sound radiation from rigid flow spoilers correlated with fluctuating forces, measuring jet-pipe drag and lift components with transducers

11 p2085 A70-26699

Velocity fluctuations measurements in conducting fluids flowing through tubes

12 p2230 A70-27091

Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers

12 p2210 A70-27322

Tube relaminarization, predicting turbulent-to-laminar flow transition

12 p2212 A70-28118

Hydrodynamic entrance length in channels and tubes of varying cross section with arbitrary initial velocity profile [DFVLR-SONDDR-39]

12 p2212 A70-28210

Lateral motions of vertical uniform tubular cantilever conveying fluid, considering oscillatory instability at high flow velocities

13 p2511 A70-28741

Unsteady compressible pipe flows with large cross sectional variations studied by two dimensional difference method

13 p2386 A70-28806

Single component two phase pipe flow choking and shock phenomena, including flashing flow vibratory effects

13 p2386 A70-28846

Preston tube errors in pipe flow wall shear stress determination due to velocity distribution deviations

13 p2387 A70-28848

Boundary conditions and initial value lines for unsteady homentropic flow, performing straight pipe calculations

13 p2392 A70-30023

Velocity circulation in laminar motion of fluid in cylindrical tube, assuming equilibrium under dissipative forces

14 p2564 A70-30164

Incompressible turbulent fluid flow through ducts and pipes by integral boundary layer techniques, considering entrainment principles

14 p2564 A70-30258

Rarefied gas flow in slip regime through cylindrical tube assuming parabolic velocity profile

14 p2565 A70-30263

Karman vortex shedding phenomenon for flow rate measurement in channel or pipe

14 p2588 A70-31333

Natural vibrations frequency of tubular cantilever pipe with fluid flow, solving differential equation of motion by Ritz method

14 p2567 A70-31426

MHD turbulence suppression by magnetic field in tubes, using conduction anemometers

15 p2778 A70-31480

Turbulent flow theory of dilute linear polymer solutions in smooth and rough tubes based on Reynolds equation

15 p2719 A70-31491

Incompressible viscous fluid steady flow admission into bounded space from cylindrical tube, demonstrating solvability of plane and three dimensional versions

15 p2720 A70-31642

Pressure-flow relation for fluid in pipe obeying Casson equation, considering applicability to human blood

15 p2690 A70-31917

Steady flow of incompressible fluid through converging-diverging tube, considering implications in occlusive vascular disease

15 p2691 A70-31936

Water and blood flow characteristics in converging-diverging plastic tube, considering implications in occlusive vascular disease

15 p2691 A70-31937

Boundary layer equations for laminar flow, drag and heat transfer of gas in circular tube, considering parabolic and uniform entrance velocity profiles

15 p2722 A70-32692

Incompressible viscous fluid divergent turbulent flow detection in conical tube of revolution based on measuring wall pressure differences along tube generatrix

16 p2894 A70-33849

Turbulent shear flow asymptotic theory, discussing channel, pipe and two dimensional boundary layers

16 p2895 A70-34244

Mathematical model of pulsatile viscous entrance flow in thick walled elastic tube, investigating flow development effects in large arteries

17 p3035 A70-34471

Energy transfer processes of electron gas for pipe flow of weakly ionized nonequilibrium plasmas, noting electron temperature decrease exponentially along tube axis

17 p3142 A70-35438

Unsteady state Newtonian liquid diffusion in laminar flow in circular tube, using mathematical model

17 p3072 A70-35544

Unsteady convective heat transfer in pipes in presence of heat flux density and flow rate aperiodic variations

17 p3198 A70-35730

Tailpipe effects on gas turbine diffuser performance with fully developed inlet conditions [ASME PAPER 70-GT-86]

18 p3210 A70-36881

Lift forces acting on spheres in cylindrical tube laminar flow

19 p3352 A70-37647

Unsteady laminar incompressibles fluid flow in parallel plate channels and circular tubes, solving Navier-Stokes equations for prescribed discharge

19 p3405 A70-38347

Integral transforms applied to convective heat transfer during nonNewtonian fluid flow with power rheology in pipes and channels

20 p3613 A70-40177

Laminar fluid flow in pipes of rectangular cross section, determining critical Reynolds numbers and maximum instability locations

20 p3614 A70-40400

Heat transfer in cooled turbulent tube flow downstream region at high bulk-to-wall temperature ratios

21 p3945 A70-41037

Poiseuille pipe flow instability, considering asymptotic analysis for small wave number disturbances

21 p3807 A70-41241

- Resonance tube fluid dynamics, examining oscillation start and growth by wave diagram and gas-speed/sound-speed diagram 21 p3807 A70-41244
- Heat transfer and skin friction in quasi-steady axisymmetric turbulent pipe flow of incompressible fluid with variable physical properties 21 p3808 A70-41375
- Maxwellian fluid oscillating flow in thin walled elastic circular tube as function of tube dimensions, elastic properties, oscillation frequency, etc 21 p3810 A70-41963
- Vibrational response of thin walled pipes to internal turbulent water flow as function of Strouhal number 21 p3940 A70-42052
- Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers 21 p3811 A70-42063
- Mass flow rate correlation for nonsteady convective heat transfer in thin walled tubes with turbulent air flow 21 p3953 A70-42087
- Wave number spectral correlation of temperature and longitudinal velocity fluctuations in fully developed pipe flow 21 p3811 A70-42090
- Turbulent air flow measurements through heated pipe, determining local heat flux from simultaneous velocity and temperature fluctuation 21 p3811 A70-42091
- Isothermal steady laminar flow through tube with change in wall temperature, examining velocity profile relationship to temperature profile [ASME PAPER 70-HT-C] 22 p4008 A70-42421
- Downstream heat transfer and wall friction predictions for quasi-developed strongly heated turbulent pipe flow, using mixing length model [ASME PAPER 70-HT-8] 22 p4008 A70-42439
- Cantilevered tube conveying fluid, calculating forced vibration under time dependent loading and arbitrary initial conditions 22 p4010 A70-42650
- High velocity isothermal viscous compressible steam flow in circular tubes, measuring pressure drops 22 p4011 A70-42845
- Two phase liquid one dimensional motion in variable cross section tube, deriving mass transfer, motion and phase interaction differential equations 22 p4012 A70-43721
- MHD incompressible viscous flow in nonconducting circular tube, determining pressure, flow rate and magnetic field level by continuum theory concepts 23 p4224 A70-44161
- MHD laminar isothermal flow in closed cylindrical tube in rotating magnetic field, determining azimuthal velocity distribution 23 p4224 A70-44162
- Heat and mass transfer for liquid film evaporation during two phase two component flow in vertical steel tube under adiabatic and nonadiabatic conditions 23 p4276 A70-44215
- Subsonic Ludwig/simple expansion/ tube as shock tube for aerodynamic testing, examining flow characteristics 23 p4182 A70-44578
- Transition zone heat exchange during air mixed flow in pipes with conical duct or Vitoshinski nozzle inlets 23 p4283 A70-44729
- Critical heat flux during forced pipe flow of boiling ethanol-water and acetone-water binary mixtures 23 p4283 A70-44730
- Viscous compressible gas flows in pipe initial section, calculating friction and heat transfer coefficients 23 p4135 A70-44734
- Turbulent heat exchange coefficient and Prandtl number in turbulent air flow through heated pipe with constant heat flux 23 p4183 A70-44740
- Cross correlation measurement errors for fluid pipe flow with pseudorandom sequence generated temperature fluctuations, considering transport time, impulse response and laminar flow 24 p4333 A70-45111
- Pulsatile flow in circular rigid tube with and without longitudinal vibration, obtaining momentum integral solution 24 p4325 A70-45623
- Porous tube inlet region, calculating fluid injection effect on laminar flow from integral form boundary layer equations 24 p4326 A70-45782
- Long wave approximation for peristaltic transport in circular cylindrical tube, noting inertia and wavelength effects on backward flow 24 p4309 A70-46224
- PIPES**
- Orifice diameter for low Reynolds number flowmeter dependent on pipeline diameter tolerances 08 p1482 A70-20684
- Differential equation formulation for pipeline in hydraulic automatic control system considered as lumped or distributed parameter plant 09 p1612 A70-22823
- Aviation kerosene pipeline column separation after valve closure, solving differential equations for transient pressures propagation to predict vapor cavities duration 09 p1665 A70-23744
- Pressure and velocity ratios and energy requirements dependence on flow parameters of cylindrical capsule in horizontal pipeline 09 p1665 A70-23747
- Lumped parameter pipeline and hydraulic systems stability, deriving equations of motion for closed and open cycle control systems 18 p3216 A70-36946
- Cryogenic pipelines cooldown to operating temperature, calculating cryogen flow rate limits due to thermal stresses in steel and Al flanges 23 p4280 A70-44368
- PIPES (TUBES)**
- NT GAS PIPES**
- Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius encased in shell under pressure and unsteady temperature field 02 p0384 A70-11663
- Ultrasonic tracking type transducers for testing ribbed and smooth walled pipes using shadow and two probe echo methods 02 p0300 A70-12480
- Durability of refractory tubes of small thickness under creep with account of scale factor and unsteady conditions, tabulating experimental and theoretical values 03 p0508 A70-13247
- Stress wave propagation tests in thin walled tubes under combined tension and torsion, discussing predicted and observed strain-time profiles discrepancies 03 p0599 A70-12425
- Elasticity theory of orthotropic materials applied to steady rotation of long cylindrical tubes of filament reinforced plastics 03 p0602 A70-14331
- Axial compression effect on low cycle fatigue of thin walled metal tubes in torsion [ASME PAPER 69-MET-H] 04 p0705 A70-14880
- Stress concentration in long thick cylindrical tube under diametrically opposite normal loads using elasticity theory 05 p0939 A70-16505
- Stress analysis of curved tubes capable of accounting for all end effects based on shell theory equations 05 p0944 A70-16811
- Stability of conical hydraulic poppet valve with elastic support and inlet and outlet piping 06 p1075 A70-17139
- Pipe bounding walls effect on sound waves dispersion in rarefied gas, deriving integral equations showing frequency range decrease with container size 06 p1107 A70-18315
- Precision tungsten alloy tubing manufacture and properties, discussing direct conversion of metal powder to finished tubing with high temperature structural stability 07 p1292 A70-18928
- Wall temperature variation of transpiration cooled tube surrounding plasma arc calculated from gas mass flow and wall properties 07 p1420 A70-19214
- Stress analysis of multiaxially loaded tubes of fiberglass reinforced composite wound in three directions 07 p1318 A70-19755
- Air bubble free glass fiber-plastic laminates fabricated by wet-winding method using vacuum, noting void free filament wound pipes 07 p1295 A70-19766
- Autocollimation technique for determining flexure of tube of Wanschaff vertical circle 08 p1496 A70-21158
- Nondestructive testing of small metal tubing, discussing eddy current, ultrasonic and electromagnetic inspection and dye penetrants 08 p1509 A70-21748
- Boiling heat transfer enhancement inside tubes using integral fins, discussing water film retention on walls 08 p1599 A70-21825
- Tubing materials for gas turbine engines covering fabrication, selection, etc 08 p1559 A70-21854
- Structural analysis of boron filament-epoxy composite laminate tubes for use as spacecraft long column members 08 p1595 A70-21911
- Superconductor tubes experiment, observing flux jump initiation and propagation characteristics 09 p1738 A70-22293
- Miniaturized program oriented automatic pipe/tube welding system for in-place joining of fluid systems, controlling timing functions and weld current sequence 09 p1692 A70-22795
- Circumferential wall temperature gradients in spacecraft radiator tubes as function of tube wall fins 09 p1789 A70-23261
- Transient response of fin-tube space radiators under steady state operation halting and system cooling 09 p1790 A70-23564
- Natural vibration analysis of uniform cylindrical and cantilever rectangular tubes with cutouts 10 p1961 A70-25057
- Welding techniques for Nb-stainless steel bimetal tubing for liquid metal containment, determining structural integrity and bond interface condition after thermal cycling 10 p1897 A70-25309
- Thin walled tubes plastic instability under combined internal pressure and axial load for open and closed end conditions 12 p3232 A70-27216
- Stress-strain state effects on Cu and Ni tubular samples plasticity and strength using polarization-optical technique 12 p3233 A70-27341
- In-place gas tungsten arc fusion welding for joining small diameter precipitation hardenable aluminum tubing 14 p2590 A70-30930
- Film condensation in tubes, considering liquid-vapor interface, zero gravity and electrostatic field conditions 15 p2828 A70-32541
- Dangerous plane stressed state surfaces for fiberglass reinforced plastic pipes, using fourth degree polynomial 15 p2766 A70-32852
- Storable tubular extensible member /STEM/, discussing advantages of BI-STEM for erecting unfurlable structures in space 16 p2846 A70-34141
- Cold working effects on Zircaloy tubes mechanical properties and hydride orientation, discussing tubes use in nuclear power stations 17 p3123 A70-34645
- Elastoplastic deformations during explosive extrusion of pipes of different materials with linear strain hardening law 18 p3335 A70-36132
- Flow stability of incompressible heavy viscous fluid along wall of vertical circular cylindrical pipes, relating flow parameters to stability 18 p3240 A70-36278
- Loading history effect on work of plastic deformation in Ni and Cu pipes, taking into account stress and strain deviators deviation from similarity 18 p3344 A70-36945
- Fatigue strength in pulsed tension of butt-welded tubular joints, evaluating test results statistically 19 p3433 A70-37357
- Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius encased in shell under pressure and unsteady temperature field 19 p3547 A70-38437
- Durability of refractory tubes of small thickness under creep with account of scale factor and unsteady conditions, tabulating experimental and theoretical values 19 p3453 A70-38465
- Glass drainline development and marketing, describing technology transfer role 20 p3740 A70-39100
- Hot gas pipe thermoelastic reduction factors, determining elastic support, material and dimensions 20 p3720 A70-39624
- Resonance tube fluid dynamics, examining oscillation start and growth by wave diagram and gas-speed/sound-speed diagram 21 p3807 A70-41244
- Eddy current magnetic probe with frequency scanning for signal-noise discrimination in nondestructive testing of tubes 24 p4336 A70-45698
- Encasing and welded pipes flaws detection with high resolution by nondestructive testing, using eddy current method 24 p4345 A70-45702
- Tubing, fitting and flexible line designs and testing for production aircraft hydraulic distribution systems [SAE PAPER 700789] 24 p4294 A70-45856
- Thermosetting glass reinforced plastics fabrication and use for pressure vessels, vacuum vessels and pipes 24 p4350 A70-46388
- PISTON ENGINES**
- Aircraft piston engines air cooling analysis, discussing forced cooling for high altitude aircraft and helicopters 02 p0355 A70-12224
- Stirling free piston engine operating principles, performance limitations, heat transfer problems, fluid flow, mechanical design, test results and applications [ASME PAPER 69-WA/ENER-15] 04 p0627 A70-14895
- Heat transfer data for rotary piston and conventional piston engines, studying compression energy losses due to working fluid leakage 05 p0897 A70-17002

- Selection criteria for nonturbocharged air or liquid cooled reciprocating type prime movers used in aircraft ground support equipment 07 p1248 A70-18801 [SAE-ARP-1052]
- Supersonic fluid bistable amplifier used as air motor, converting supply air flow energy into reciprocating piston motion 10 p1807 A70-24791
- Reciprocating Rankine-cycle engine with organic working fluids, noting piston speed and efficiency [SAE PAPER 700162] 11 p1982 A70-25372
- Temperature distribution in cylinders of aircraft internal combustion rotary piston engine under air cooling 23 p4234 A70-44742
- PISTON THEORY**
- Steady one dimensional flow in gas filled cylindrical tube, studying shock induced compression wave generated by sudden piston acceleration 01 p0062 A70-10804
- Piston theory application to plates and shells stability in supersonic gas flows, considering critical velocities determination for asymmetric flows and oscillations 04 p0617 A70-15196
- Flow field between infinitely massive wall and rigid piston accelerated by detonation products, comparing analytical results to finite difference numerical integration 05 p0830 A70-15782
- Monte Carlo simulation for shock wave formation by specularly reflecting piston, discussing reflection from specularly reflecting wall 06 p1049 A70-18334
- Plane exponential reactive shock waves following piston impact on gamma-law gas solved by similarity method, including Whitham conditions and shock acceleration 10 p1967 A70-24194
- Piston formed weak steady shock wave propagation in relaxing gases, investigating via characteristics method [DFVLR-SONDDR-38] 12 p2212 A70-28206
- High Reynolds number flow in moving corner, observing vortex motion at piston and cylinder wall interface by flow visualization techniques 16 p2895 A70-34240
- Viscous heat-conducting one dimensional piston driven gas flow, assuming sharp shock discontinuity 17 p3075 A70-35890
- Shock and expansion waves formation by moving piston based on kinetic theory of gases, solving Bhatnagar-Gross-Krook equation by numerical method 21 p3808 A70-41377
- Piston problem numerical solution by Boltzmann collision integral, considering shock waves and thermal disturbances evolution at gas-solid interfaces 21 p3808 A70-41378
- PISTONS**
- NT MAGNETIC PISTONS**
- Radial clearance, pressure and piston length and diameter dependence of friction force at rest in piston type hydraulic devices 14 p2534 A70-30872
- Low friction seal for axial loading piston in triaxial soil testing cells 23 p4199 A70-43873
- Pneumatic actuator rod and piston head seals, examining materials at various temperatures, pressures and speeds [SAE PAPER 700791] 24 p4294 A70-45855
- PITCH**
- Fan rotors aerodynamic noise tonal annoyance reduction by blade unequal circumferential spacing, noting sound-pressure wave shape determination [ASME PAPER 69-WA/FE-23] 04 p0614 A70-14776
- Contralateral remote masking /CRM/ increase of LF tone burst produced by middle ear muscle contractions 04 p0632 A70-15082
- Retroactive interference stimuli effects on pitch discrimination in short term recognition memory task 07 p1215 A70-20046
- Axial flow compressor fan discrete tone noise radiation directivity pattern measurement and theoretical explanation for cut-off effect, power and harmonics 24 p4380 A70-46069
- PITCH [INCLINATION]**
- Multiple skirt air cushion vehicle /ACV/ pitch and heave dynamic characteristics, describing mathematical modeling and analog computer simulation 04 p0624 A70-15389
- Vortex sheets pitch along constant aerodynamic pitched propeller blade at zero traction, discussing calculation, construction and wind tunnel testing 05 p0790 A70-16159
- Pitch angle anisotropy instabilities of electromagnetic waves in space, discussing warm plasma, solar wind and Van Allen belts 06 p1118 A70-17380
- Mold canting effects on nonporosity of Al alloys flat castings noting decreased metal losses 08 p1517 A70-21134

- Shock wavefront configurations before inclined obstacles in supersonic flow, studying inclination angle role 09 p1604 A70-22443
- Electron flux independence of pitch angle distribution /0-90 degrees/ observed from sounding rocket measurements in auroral arc 10 p1932 A70-24492
- Directional particle flux dependence on probe orientation with respect to external magnetic field, determining pitch angle distribution from count rates 10 p1932 A70-24497
- Linearly tapered zigzag antenna of constant pitch angle observed for radiation and impedance characteristics 12 p2199 A70-27988
- Pitch damping derivatives computation for missile configurations undergoing small amplitude oscillations at subsonic speeds, using static aerodynamic data [AIAA PAPER 70-537] 13 p2339 A70-29004
- Solar proton structure across polar cap and anomalous latitude cut-off explained by local pitch angle variations 15 p2792 A70-31672
- Pitch and Coriolis illusions effects on pilot pitch angle adjustment in simulated takeoff 15 p2689 A70-31885
- Synchrotron model limitation for nonthermal spectra, demonstrating restriction to small pitch angles and strong fields 18 p3318 A70-37024
- Ballistic reentry vehicle roll-pitch coupling, showing influence of nose asymmetries 21 p3930 A70-41736
- Pitch-angle distribution of electron fluxes in auroral zone as function of geomagnetic latitude 23 p4192 A70-44878
- Energy dependence of equatorial pitch angle distribution for protons trapped in radiation belt, based on adiabatic theory and observational data 23 p4192 A70-44923
- Pitch illusion in flight personnel under centripetal acceleration 24 p4306 A70-45330
- PITCH [MATERIAL]**
- High strength and modulus continuous graphite fibers from pitch, describing production process from asphalt and specifications 21 p3842 A70-40732
- PITCH ANGLES**
- U PITCH [INCLINATION]**
- PITCH ATTITUDE CONTROL**
- U LONGITUDINAL CONTROL**
- PITCHING MOMENTS**
- Minimum drag hypersonic delta wing, analyzing shape for given planform, lift, pitching moment and volume using correction for pressure coefficient 01 p0002 A70-10557
- Pitching moment coefficient changes due to ground effect in fixed wing aircraft flight test method, considering constant angle of attack approach 04 p0619 A70-15394
- Upper surface suction effect on thin plate aerodynamic characteristics, considering relations for lift and pitching moment coefficients 06 p0968 A70-17851
- Missile oscillations in plane during pitching moment hysteresis, discussing test coefficients suitability for predicting motion 09 p1606 A70-23258
- Rolling reentry body velocity as function of roll, pitch, yaw rates and angle of attack 13 p2343 A70-29991
- Bearing force and moment produced by motion of inclined plate supported by compressed air in ground effect machines with small angle of attack 20 p3557 A70-39140
- Static and dynamic longitudinal stability of semirigid parafoil gliding descent system in pitching motion [AIAA PAPER 70-1191] 21 p3753 A70-41825
- Radiation forces on flat plate in ecliptic earth orbit applicable to satellite attitude dynamics during pitching libration 22 p4125 A70-43437
- Low speed airfoil two dimensional testing in wind tunnel with slotted wall, examining lift, drag and pitching moments [ICAS PAPER 70-08] 23 p4132 A70-44119
- PITOT STATIC TUBES**
- U PITOT TUBES**
- U SPEED INDICATORS**
- PITOT TUBES**
- Pitot tube measurements of mixing zone of turbulent shear flow, discussing velocity gradient effects 01 p0066 A70-11134
- Pitot boundary layer probes with position indicators using extensometric gauges for boundary layers on wind tunnel test models [ONERA-TP-754] 03 p0487 A70-13628
- Calibration for five hole spherical pitot probe plotting data for velocity, inclination and static pressure factors 06 p1063 A70-17621

- Velocity measurements with Pitot tubes in polymer solutions /polyethylene oxide/ in water, noting viscoelastic properties effect on measured pressure value 10 p1887 A70-24093
- Preston tube errors in pipe flow wall shear stress determination due to velocity distribution deviations 13 p2387 A70-28848
- Pitot probe for high altitude atmospheric density measurements integrated with telemetry system mounted on two stage Super Loki sounding rocket 14 p2585 A70-30576
- Graphical plotting of critical Preston tube diameter, allowing for Mach and Reynolds numbers effects and introducing limiting line 14 p2586 A70-30871
- Velocity fluctuations in temperature gradient turbulent jets and in turbulent flames, using hot wire in cooled pitot tube 17 p3096 A70-35749
- PITTING**
- Zr and stainless steel pitting in acidic and near neutral chloride media, comparing controlled potential and conventional chemical corrosion tests results 09 p1706 A70-22939
- 18-8 stainless steels pitting corrosion, examining grain boundaries influence 24 p4362 A70-46184
- PITUITARY GLAND**
- Glutethimide and aminoglutethimide reversible inhibitory effect on rat pituitary adrenal system in response to stress 07 p1203 A70-18902
- Circadian variation of pituitary-adrenal steroid levels, noting light role 14 p2540 A70-31430
- Mathematical model of human pituitary gland mechanism controlling secretions of serum growth hormone in response to glucose deficiency 20 p3569 A70-38995
- Serotonin, 5-hydroxyindoleacetic acid /5-HIAA/ and monoamine oxidase in bovine pituitary organ and median eminence 21 p3761 A70-40850
- PITUITARY HORMONES**
- Thyrotropin /TSH/ effects on thyroidal iodine metabolism during hypoxia in rats 02 p0231 A70-11703
- Extraction, analysis and properties of rat prolactin isolated from pituitary glands 07 p1203 A70-18895
- Pituitary hormone ACTH stimulatory effect on steroid hormone cortisol secretion by canine adrenal cortex, constructing seventh order state variable model 10 p1819 A70-24868
- Melatonin or water deprivation effects on pituitary serotonin content in rats 17 p3034 A70-35625
- Human gluco-regulatory hormone reserve depressions following acute and chronic acceleration exposure 20 p3572 A70-39436
- PIVOTED WING AIRCRAFT**
- U TILT WING AIRCRAFT**
- PIVOTS**
- Odessa observatory meridian circle pivots wear determined during observations of eclipsing variables 08 p1574 A70-21160
- Variable sweep wing pivot joint design utilizing double shear tilted spherical journal bearings with Teflon fabric liners 12 p2318 A70-27135
- Flexural pivots applications as bearings, hinges, force sensing devices, torsion springs, sensing elements, etc [ASME PAPER 70-DE-51] 16 p2918 A70-33513
- Life and confidence tests of miniature self contained flexure pivots in critical mechanisms [ASME PAPER 70-DE-76] 16 p2918 A70-33522
- Flexural pivots for space structures, describing design, fabrication and applications 16 p2924 A70-34170
- Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation 20 p3732 A70-40264
- Liquid lubricant unsteady motion and pressure distribution during pivot harmonic vibration in hydrodynamic bearing 23 p4200 A70-44163
- PLAGES [FACULAE]**
- U FACULAE**
- PLAN POSITION INDICATORS**
- Ultrasonic imaging system for flaw detection, analyzing welds 01 p0104 A70-10881
- Air traffic control CRT plan position indicators, considering alphanumeric symbols strokes design 19 p3469 A70-38645
- PLANAR STRUCTURES**
- Planar Gunn effect devices using various surface electrode configurations, discussing limitations by breakdown on Ga arsenide exposed surface 01 p0049 A70-10287

Steady thermoelastic state of inhomogeneous plane with circular discontinuity on perimeter, studying stress concentration at thermally insulated crack
03 p0595 A70-13738

Radiative heat transfer from longitudinal rectangular conducting fins on plane wall involving mutual irradiation, using iterative method
[ASME PAPER 69-WA/HT-22] 04 p0782 A70-14812

Steady state electrical characteristics of double diffused planar transistor calculated by iterative algorithm under arbitrary bias conditions
06 p1016 A70-17125

Axisymmetric or plane bodies temperature distribution from heat conduction analysis using computer program based on finite element method
09 p1788 A70-22581

Heat conduction analysis for plane body with boundary condition and time variable heat exchange coefficient, applying automatic control technique
10 p1966 A70-23869

Stress analysis of plane, shell and three dimensional structures using finite element method
12 p2315 A70-26886

Statistical design of density tapered planar circular and elliptical arrays for radiation patterns with good sidelobe behavior
12 p2199 A70-27987

Electromagnetic wave diffraction by heterogeneous planar dielectric structures, showing field distributions by single variable Fredholm equations
15 p2695 A70-31436

Drag optimal stern section of plane body at supersonic flow, allowing for friction forces
18 p3206 A70-36261

Transient stresses and strains in plane wedge under dynamic load, using photoelastic, high speed photographic and strain gage studies
[SMPT PREPRINT 93] 22 p4036 A70-43062

Dirichlet problem with singularities for plane with cutouts along circumference, determining analytical function
23 p4211 A70-44239

Radiation and phase-scanning properties of planar array of parallel plate waveguides, using wedge diffraction theory
23 p4166 A70-44973

PLANE WAVES

Natural oscillation modes two dimensional resonator determined in form of superimposed uniform plane waves with arbitrary coefficients of wave reflection
01 p0140 A70-10057

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure
01 p0154 A70-10131

Plane sinusoidal wave propagation through material reinforced with parallel fibers, using integral formulation for multiple scattering in infinite slab
01 p0130 A70-11187

Electromagnetic plane wave diffraction by slit and circular apertures in nonplanar conducting screens, presenting equireadance contour maps
02 p0340 A70-12455

Self consistent field method to calculate effective dynamic characteristics of elastic media with filler for plane longitudinal wave propagation
02 p0388 A70-12485

Plane electromagnetic wave diffraction at periodic arrays obtained by direct summation of multiple reflection between arrays
03 p0442 A70-13095

Electromagnetic field structure and interaction inside and outside of spherical shell of arbitrary linear media excited by monochromatic plane wave
03 p0443 A70-13151

Dispersive compression of plane frequency modulated waves in inhomogeneous plasma based on generalizing geometric optics approximation to unsteady quasi-harmonic processes
03 p0447 A70-13287

Plane longitudinal elastic monochromatic wave diffraction on stress free circular holes in infinite plate, calculating stresses between holes
03 p0589 A70-13375

Dispersion equation and coupling impedance of two dimensionally periodic slow wave structure of cellular cylinder type with parallel perpendicular diaphragms
03 p0456 A70-13438

Plane electromagnetic wave diffraction at conducting stripline, calculating surface current density and far field scattering using edge wave and factorization methods
03 p0451 A70-13755

Integrodifferential equation solved for plane wave reflection and transmission by random medium assuming homogeneous background refractive index
04 p0649 A70-14970

Phase and amplitude level of plane light wave propagation in medium with randomly discontinuous refractive index, discussing wave phase dependence on dielectric constant
04 p0650 A70-15288

Inhomogeneity and water vapor absorption influence on frequency spectrum of amplitude fluctua-

tions of plane wave propagating in turbulent atmosphere
05 p0813 A70-16252

Output characteristics of cyclotron maser with resonator field due to plane waves interference along static magnetic field, deriving tensor equations
05 p0858 A70-16260

Thermal radiation effects on plane magnetoacoustic waves in semiinfinite expanse of radiating gas of perfect electrical conductivity
05 p0890 A70-16822

Radiatively driven plane acoustic wave in nongray radiating and absorbing gas assuming local molecular equilibrium
06 p1173 A70-17515

Backscattered field determination at edge on incidence from thin circular plates illuminated by plane waves
06 p1008 A70-17563

Scattering and depolarization of plane horizontally polarized electromagnetic wave from slightly rough lossless dielectric layer, using small perturbation theory
06 p1010 A70-18019

Monte Carlo method applied to solving nonlinear Boltzmann equation for plane shock waves in elastic sphere gases
06 p1050 A70-18335

Moving plasma column scattering of obliquely incident microwaves, assuming arbitrary polarization for incident plane wave
06 p1124 A70-18608

Plane electromagnetic wave penetration into ferromagnetic half space solved for nonlinear parabolic equations using difference method
07 p1227 A70-18992

Plane electromagnetic wave reflection from laminar anisotropic medium, analyzing piecewise-constant permittivity tensor as boundary value problem
07 p1235 A70-19448

Plane electromagnetic wave diffraction on conducting plate with circular hole
08 p1456 A70-20503

Plane electromagnetic wave scattering at apex of conical body, presenting scattered field calculations for various cone sizes and surface impedances
08 p1461 A70-20974

Plane E-polarized wave diffraction by slit in conducting screen using Fredholm integral equations of second kind
08 p1461 A70-21004

Plane electromagnetic wave scattering by perfectly conducting cylinder coated with moving dielectric or plasma sheath, using relativity theory, Lorentz transformations, etc
08 p1551 A70-21251

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure
08 p1556 A70-21407

Multiple scattering of plane time harmonic compressional elastic wave impinged on parallel circular cylindrical inclusions in finite domain, analyzing stress field
08 p1592 A70-21469

Monochromatic plane electromagnetic wave incident from vacuum on plane boundary of plasma half space, discussing specular reflection and diffuse scattering boundary conditions
08 p1553 A70-21611

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode
08 p1485 A70-21633

Nonlinear effects related to plane electromagnetic wave propagation in weakly ionized plasma
09 p1735 A70-22842

Amplitude measurement of plane light wave propagating in turbulent atmosphere, giving log amplitude dependence on dispersion of logarithm fluctuations
09 p1636 A70-23136

Plane electromagnetic wave diffraction on circular cylinder
09 p1638 A70-23339

Plane electromagnetic wave scattering by conducting circular cylinder/wire in air/vacuum, computing scattering cross sections by Wiener-Hopf method
09 p1638 A70-23347

Plane electromagnetic wave diffraction at conducting stripline, calculating surface current density and far field scattering using edge wave and factorization methods
10 p1842 A70-25002

Electromagnetic waves propagation in nonlinear medium, investigating polarized plane wave incident on vacuum-plasma interface in magnetic field
10 p1844 A70-25156

Diffraction of plane cylindrical and spherical waves in wedge-shaped regions with reflecting edge, using asymptotic expansions
10 p1911 A70-25186

Unsteady problems of finite amplitude plane and cylindrical wave propagation in dissipative spatially symmetrical media
11 p2034 A70-25399

Plane electromagnetic waves propagation in nonabsorbing photoelastic material with finite deformations, formulating theory from Eulerian and Lagrangian point of view
11 p2139 A70-26173

Plane wave disturbances introduced in turbulent channel flow by vibrating ribbons near each wall, obtaining amplitude and relative phase
11 p2039 A70-26537

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Dirichlet problem
11 p2085 A70-26621

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Neumann problem
11 p2085 A70-26622

Weak plane waves propagation in binary mixtures of diatomic gases subject to vibrational relaxation, solving piston problem in acoustic approximation
12 p2209 A70-27151

Plane electromagnetic wave diffraction by perfectly reflecting half plane calculated by elementary method
12 p2184 A70-27234

Trumpet-type plane waves instability thresholds in plasma drifted by electric field, including calculation of thermodynamic equilibrium
12 p2184 A70-27236

Plane periodic diffraction of elastic waves propagating in medium with infinite sequence of circular holes
12 p2325 A70-27557

Linearized dispersion relation for plane wave propagation in uniform unbounded cold plasma permeated by DC magnetic field, considering two stream instability
12 p2281 A70-27881

Plane wave three dimensional diffraction through circular aperture in infinite screen computed for normal incidence, using Babinet principle
12 p2197 A70-27951

Plane electromagnetic waves anomalous reflections from diffraction grating with periodic array of rectangular holes in dielectric layer, observing resonant character
12 p2191 A70-28175

Plane electromagnetic wave interaction with compressible plasma fluid moving with uniform velocity in vacuum, calculating reflection and transmission coefficients
13 p2462 A70-29101

Plane electromagnetic wave reflection at interface of two semiinfinite dielectric media in relative motion perpendicular to incidence plane, noting polarization change
13 p2365 A70-29102

Plane electromagnetic wave in moving conductive medium, analyzing without approximation of velocity limitation
13 p2462 A70-29104

Elastic plane wave diffraction and scattering at convex obstacle in semibounded regions, using method of images
13 p2452 A70-29289

Plane cylindrical and spherical explosion waves propagation in detonating gas mixtures with counterpressure, calculating perturbed flow parameters by numerical method of integral relations
13 p2388 A70-29308

Plane harmonic wave steady state diffraction at cylinder in elastic half space, applying method of images
13 p2366 A70-29320

Electromagnetic plane wave oblique reflection from flat surface with spatially modulated surface impedance, computing wave spectrum
13 p2367 A70-29527

LF plane wave scattering from semielliptic groove in conducting ground plane noting validity for arbitrary polarization, incidence, directions and eccentricity
13 p2453 A70-29822

Plane waves propagation in elastic layer using Cauchy theory of initial stress
14 p2658 A70-30998

Plane wave ray optical scattering by two spheres for arbitrary angle of incidence and observation, noting importance of first order interaction terms
14 p2551 A70-31157

Normally incident plane monochromatic electromagnetic wave reflection and scattering from expanding dielectric slab, using invariant imbedding concept
15 p2695 A70-31438

Monograph on nozzle design effect on starting process initiated by plane shock wave in reflected shock tunnel
15 p2672 A70-31692

Plane EM wave reflection and transmission at moving boundary, discussing frequency disparity with incident wave
15 p2697 A70-31834

Plane electromagnetic waves propagation in isotropic medium in electromagnetic nonequilibrium conditions 15 p2790 A70-32275

Wave scattering from elliptic cylinder, solving boundary value problem for two dimensional wave equation 15 p2700 A70-32404

Plane wave scattering by strip of elliptical cylinder, considering geometrical diffraction theory 15 p2700 A70-32405

Acoustic and EM scattering by hyperbolic cylinder, considering plane wave incidence and line sources 15 p2700 A70-32406

Equation of state of solids measured by shock wave techniques, considering elastic-plastic flow in plane wave geometry 15 p2824 A70-32789

Plane wave diffraction by cylinder tipped half plane, demonstrating localized behavior by geometrical theory 16 p2872 A70-32975

Born approximation limit for plane wave multiple scattering in inhomogeneous electron density distribution in plasma 16 p2957 A70-32981

Electromagnetic waves scattering in uniformly moving media, using transformation formulas for plane waves 16 p2865 A70-33690

Plane harmonic sound wave reflection and transmission in flowing medium by infinite set of arbitrary spaced and staggered flat plates 16 p2971 A70-34016

Plane acoustic wave interaction with elastic spherical shell, discussing effects of membrane, bending, rotatory inertia and shear deformation 16 p2993 A70-34087

Plane wave reflection decay rate representation by slowness diagrams 16 p2952 A70-34089

Perturbation method to obtain analytical expressions for attenuation of plane wave sound propagation in lined ducts 17 p3136 A70-34523

Axially symmetric parabolic reflector with incident linearly polarized plane wave, determining Poynting vector behavior 17 p3043 A70-34615

Plane wave incident on oblate spheroid or disk, deriving LF field scattering 18 p3335 A70-35974

Electromagnetic wave Poynting vector trajectories in absorbing inhomogeneous media, discussing reversibility and energy propagation of spherical and plane structures 18 p3293 A70-36144

Plane wave diffraction by periodic grating reduced to waveguide problem, determining asymptotic behavior of integral solution 18 p3291 A70-36286

Plane electromagnetic waves diffraction by periodic structure of infinite system of parallel strips, reducing problem to solution of linear algebraic equations 18 p3227 A70-36287

Viscoplastic solids, computing plane shock wave propagation structure from nonlinear constitutive relations 18 p3338 A70-36435

Plane electromagnetic wave reflection from laminar anisotropic medium, piecewise-constant permittivity tensor as boundary value problem 18 p3229 A70-36922

Plane TM wave scattering by systems of two parallel conducting elliptical cylinders, metal tapes and combinations 19 p3374 A70-37278

Scattering structures of two parallel elliptical cylinders, tapes or combinations, deriving surface current density distribution under plane TM wave excitation 19 p3375 A70-37279

Plane electromagnetic wave diffraction by infinite grid above finite dielectric layer, calculating field distribution 19 p3375 A70-37281

Electric field equations of plane EM wave diffraction at lattice of conducting cylinders, using Hankel function 19 p3375 A70-37289

Plane EM wave diffraction by conducting strip, using algorithm for reducing integral to linear algebraic equations 19 p3376 A70-37433

Plane electromagnetic wave diffraction by thin metal gratings, using mathematical method of elasticity theory 19 p3376 A70-37712

Plane polarized electromagnetic wave diffraction by dielectric grating, obtaining linear algebraic equations for field coefficients 19 p3376 A70-37713

Plane wave diffraction by serrated surface, examining wave transformation matrix coefficients 19 p3377 A70-37715

Plane EM wave diffraction by ribbon periodic grating, determining diffraction spectrum wave amplitudes 19 p3377 A70-37718

Plane EM wave diffraction by bounded and unbounded periodic gratings 19 p3377 A70-37719

Plane monochromatic EM wave diffraction by rectangular metal bar tapered grating, examining amplitude and polarization parameters 19 p3377 A70-37721

Ponderomotive forces of plane electromagnetic wave incident at arbitrary angle on metal grating, based on diffraction results 19 p3377 A70-37723

Plane EM wave diffraction in cylindrical plasma-electron beam system 19 p3378 A70-37740

Diffraction amplitudes in plane H-polarized electromagnetic wave incident obliquely on grating with closely spaced conducting rectangular bars, obtaining transmission coefficient 19 p3378 A70-37745

Plane waves superposed on solid during steady state isothermal creep deformation subjected to unidirectional constant initial tensile stress 19 p3537 A70-37791

Synchrotron radiation emissivity function containment in dispersion equation for plane wave propagation in magnetoactive plasma 19 p3480 A70-38017

Plane wave reflection from stratified isotropic medium using ray tracing in complex space, noting agreement with phase integral method 19 p3380 A70-38404

Pressure field behind plane shock wave interacting with curved boundary 19 p3406 A70-38447

Plane waveguide field with complex geometric inhomogeneity, describing perturbed section by integral equations 19 p3381 A70-38567

Plane VLF wave propagation in waveguide formed by earth and inhomogeneous anisotropic ionosphere, determining excitation coefficients and attenuation functions 19 p3381 A70-38568

Space-time rays relation to plane wave dispersion surfaces in radiation and diffraction problems, using ray tracing diagrams 20 p3671 A70-39220

Plane electromagnetic scattering from perfectly conducting bodies, comparing exact numerical solution with experiment 20 p3585 A70-39394

Unsteady problems of finite amplitude plane and cylindrical wave propagation in dissipative spatially symmetrical media 20 p3673 A70-40093

Metallurgical changes induced by planar shock wave propagation through metals and alloys, describing shock-hardened metals macro and substructure 20 p3652 A70-40142

Plane electromagnetic waves diffraction on thin filaments cloud/passive dipoles/, discussing field fluctuations and mean power 20 p3588 A70-40298

Plane wave diffraction by periodic array at boundary between two media, discussing asymptotic behavior of reflection and transmission coefficients 21 p3806 A70-40614

Electromagnetic wave diffraction by ideally conducting wedge of finite radius, deriving asymptotic formula for plane wave scattering 21 p3784 A70-40626

Plane stationary shock wave reflection from rigid concave wall at low Mach numbers 21 p3811 A70-42204

Plane electromagnetic waves diffraction by moving periodic metal strip grating, writing E polarized wave of unit amplitude by Lorentz transforms 22 p3984 A70-42388

Plane electromagnetic wave propagation at normal incidence in isotropic lossless plane-stratified inhomogeneous gyrational medium, calculating varying profiles from constitutive equations 22 p4073 A70-42640

Ultrasonic transducer diffraction fields in highly anisotropic crystals obtained by plane waves angular spectrum 22 p4029 A70-42643

Elastic cylindrical shell transient response to plane acoustic shock wave traveling through light fluid medium 22 p4114 A70-42647

Plane shock wave decay by interaction with simple wave, solving nonisentropic equations of gas dynamics 23 p4179 A70-43969

Conducting bodies of revolution, calculating surface currents due to axially incident plane electromagnetic wave by computer program 23 p4162 A70-44005

Plane plasma waves in homogeneous conducting fluid with magnetic field, considering oscillations of two-fluid, cold and hot plasmas 23 p4224 A70-44179

Dipolar resonant scattering of H-polarized plane waves by axially magnetized plasma column with perfectly conducting core 23 p4228 A70-44977

Plane wave diffraction by infinite strips and slitted planes, obtaining asymptotic expansions valid for HF 24 p4426 A70-46019

Two identical conducting thin cylinders illuminated by plane wave at arbitrary incidence angle, determining backscattering cross sections and induced current 24 p4314 A70-46133

PLANET EPHEMERIDES

Dichotomy of Venus in eastern and western elongations, determining time of occurrence by graphical method 03 p0574 A70-13886

Optimum planetary image intensity at TV camera cathodes, exemplifying with Saturn orthicon image 04 p0688 A70-14694

Planetary ephemerides accuracy and navigation during interplanetary missions, discussing machine readable ephemerides for outer planets 13 p2448 A70-28703

Planetary tidal force effect on solar activity cycle, showing amplitude proportionality to solar and gravity center deviation 14 p2649 A70-31199

Celestial mechanics experiment for Mariner Mars 1971 to test general relativity theory and improve Martian ephemeris 16 p2978 A70-34031

PLANET ORIGINS

U PLANETARY EVOLUTION

PLANETARIUMS

Astronauts celestial training, using Mercury capsule simulator and Zeiss planetarium projector for flight simulation 08 p1481 A70-21275

PLANETARY ATMOSPHERES

NT JUPITER ATMOSPHERE

NT MARS ATMOSPHERE

Nonlinear flow conductance and convective terms effects on planetary thermospheres heating diurnal variations, emphasizing solar EUV heating 01 p0178 A70-10413

Atmospheric models of deep atmosphere thermal emission and ionosphere free-free emission used for studying Saturn microwave spectrum 01 p0180 A70-10533

Minor circle maneuver solution to equations of motion of vehicle in spherical planet atmosphere for gliding and cruising, discussing cylindrical planet case 01 p0184 A70-10949

Plane and spherical albedos of planet surrounded by infinite optical thickness atmosphere, with application to Venusian atmosphere 01 p0193 A70-11591

Lorentz absorption line shape computations in radiation scattered by homogeneous planetary atmosphere compared with results for isotropic scattering by van de Hulst similarity relations 02 p0364 A70-11792

Jovian planets atmosphere - Conference, Tucson, April-May 1969 02 p0364 A70-11801

Hydrogen pressure-induced IR absorption spectra, noting applications to planetary atmosphere studies 02 p0341 A70-11805

Planetary atmospheres dynamics, discussing rotational and MHD effects, energy sources, etc 02 p0366 A70-11806

Mutual diffusion coefficient of hydrogen atoms and molecules in upper atmospheres of major planets calculated as function of temperature, using Chapman-Enskog theory 02 p0342 A70-11817

Polarization observations of Saturn in UV and visible regions compared with Jupiter data, noting multiple scattering 02 p0368 A70-11818

Radiative transfer in plane parallel atmospheres computed by discrete space techniques based on invariance concept for application to planetary atmospheres 02 p0338 A70-11825

Absorption spectra computation for model planetary atmosphere using Neumann series for solving semiinfinite radiative transfer equation 02 p0342 A70-11826

Rocket telescope spectrometer precision pointing achieved by servocontrolling secondary mirror, discussing use for planetary atmospheres far UV spectrum studies 02 p0296 A70-11916

Collection of papers on optical properties of planetary atmospheres 02 p0374 A70-12426

Venusian atmosphere water content determined by airborne interferometer 02 p0377 A70-12554

- Optimal lift control of hypersonic lifting body during planetary entry, assuming exponential variation of atmospheric density 04 p0620 A70-15532
- Wind speed and potential temperature vertical profile in day/night planetary atmospheres estimated by similarity theory of boundary layer parameters 06 p1141 A70-17827
- Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials 06 p1142 A70-17891
- Kinetic theory applied to free flow in spherical geometry to study collisionless thermal escape of particles from planetary atmospheres 06 p1147 A70-18293
- Rayleigh phase matrix solutions and albedo values for imperfect Rayleigh scattering in semiinfinite planetary atmosphere 06 p1149 A70-18460
- Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc 06 p0985 A70-18558
- Planetary atmospheric entry optimal three dimensional glide paths, considering polar curve altitude dependence, flight path changes, braking maneuvers, etc 07 p1378 A70-18985
- Effective pressure and rotation line intensity in Uranus upper atmosphere obtained from methane band spectrograms, calculating maximum temperature at subsolar point 07 p1385 A70-19423
- Integral methods of obtaining electron density profile of planetary ionospheres and interplanetary gases 07 p1388 A70-20160
- Evaporation rates from rotating planet, showing augmentation over stationary planet 07 p1390 A70-20290
- Solar radiation reflection function for plane-parallel atmosphere with isotropic phase function calculated by successive scattering method, noting application to planetary atmospheres 08 p1571 A70-20909
- Absorption lines in hazy planetary atmosphere with isotropic scattering, examining phase variations of equivalent width 08 p1571 A70-20910
- Saturn ring atmosphere absorption spectrum observation during earth passage through ring plane 09 p1754 A70-22497
- Thermal controls for spacecraft in space and planetary atmospheres, including heat inputs by solar radiation and planetary albedos 09 p1789 A70-23130
- Grand tour space probe optics for observation of objects on planet, considering atmospheric refraction indices effect 09 p1700 A70-23768
- Solar and solar system planetary atmospheres including interplanetary space filled with solar wind 10 p1942 A70-24611
- Nonlinear integral equations of radiation transfer of stellar and planetary atmospheres 12 p2305 A70-27852
- Laminar multicomponent boundary layer for large injection and heat transfer, with particular reference to vehicle entry into planetary atmosphere 12 p2159 A70-28234
- Seed germination in simulated planetary atmospheres, considering biological responses of various organisms 14 p2537 A70-30692
- Planetary atmospheres and surfaces - Conference, Woods Hole, Mass., August 1969 14 p2643 A70-31051
- Solar wind interaction with planetary ionosphere, considering flow behavior across bow MHD shock 14 p2647 A70-31073
- Angular distribution of diffusely reflected solar rays over spherical shell planetary atmosphere, determining halo brightness 14 p2632 A70-31222
- Satellite probing method for transmission absorption spectroscopy of planetary atmospheres 14 p2650 A70-31230
- Polarization role in radiation scattering by planetary atmosphere, considering luminance variation and Rayleigh scattering 14 p2651 A70-31302
- Diffusely transmitted and reflected radiation fields for planetary isotropically scattering atmosphere bounded by Lambert law reflector 14 p2617 A70-31305
- Jupiter Red Spot, explaining motion rate in terms of cellular convection in liquid hydrogen-helium layer 15 p2799 A70-31895
- Power plant using carbon dioxide planetary atmosphere as working fluid, noting weight reduction 15 p2828 A70-32262
- Planetary atmospheres parameters use in spacecraft guidance 15 p2773 A70-32267
- Planetary atmospheric light diffuse reflection and transmission, applying anisotropic scattering theory 15 p2802 A70-32493
- Planetary atmospheric entry optimal three dimensional glide paths, considering polar curve altitude dependence, flight path changes, braking maneuvers, etc [DFVLR-SONDDR-49] 16 p2982 A70-33771
- Optical system of absorption tubes for planetary atmosphere spectra simulation 18 p3314 A70-36408
- Optical observation of structure, composition, thermal spectra and aerosol layers of giant planet atmospheres 18 p3315 A70-36601
- Planetary atmospheres energy balance, considering models in terms of radiative control or large scale fluid motions 19 p3521 A70-38499
- Soviet papers on planetary atmosphere dynamics and hydrodynamic long range weather forecasting covering atmospheric motions, wind field, model, etc 20 p3661 A70-39176
- Planetary scale unsteady atmospheric motions nonlinear problem, considering two level solenoidal model 20 p3662 A70-39177
- Planetary wind field from observed pressure field by linearized balance equation, assuming solenoidal air motion 20 p3662 A70-39178
- Cloudy planetary atmospheres model, assessing nonlocal thermodynamic equilibrium role 21 p3813 A70-40903
- Reacting planetary carbon dioxide-nitrogen atmospheres high temperature equilibrium thermodynamic and transport properties 21 p3950 A70-41747
- Planetary atmospheres X ray fluorescence, calculating Mercury, Venus, earth, Mars and Jupiter emissions 22 p4105 A70-43230
- Planetary atmospheric light diffuse reflection and transmission, applying anisotropic scattering theory 23 p4240 A70-43915
- EM radiation beams higher directivity from sources in two layer plasma in planetary atmosphere 23 p4242 A70-44261
- Absorption line multiple scattering in thick planetary atmosphere, using successive scattering method for single-scattering phase function based on line profile and equivalent width 23 p4222 A70-44550
- Internal constitution of terrestrial and giant planets, planetary surfaces and atmospheres 23 p4256 A70-45036
- Ashen light origin, considering atmospheric refraction of sunlight illuminating dark side of planet 24 p4399 A70-45113
- Planetary atmosphere diffuse radiative transfer reflection and transmission, deriving reciprocity relations from integrodifferential equations 24 p4409 A70-45756
- PLANETARY BASES**
Subsystem selection integration and technology for space base and planetary mission module /PMM/ of space station program [AAS PAPER 70-021] 17 p3023 A70-34801
- PLANETARY COMPOSITION**
Spectroscopically active compounds observability in Jupiter atmosphere using solar composition adiabatic equilibrium model 01 p0180 A70-10530
- Gibeon meteorite iron strength and ductility tests, discussing fragmentation and relation to parental planet structure 06 p1150 A70-18478
- Unmanned exploration program to study magnetic fields and chemical composition of five outer planets in solar system 07 p1375 A70-18871
- Data on Jupiter chemical composition, internal structure and energy sources, discussing Jovian planets origin and role played by gas 07 p1386 A70-19487
- Solar system objects /earth, moon, planets, meteorites, etc/ chemical composition data and analysis techniques 10 p1942 A70-24609
- Lunar and planetary surface chemical composition analysis using neutron inelastic scattering as optimum for unmanned missions 10 p1942 A70-24613
- Multispectral imaging from lander for Martian surface constituents discrimination 11 p2051 A70-26000
- Earth mechanical properties and composition compared with moon and other terrestrial planets 11 p2047 A70-26616
- Martian multispectral imaging from lander emphasizing spectral bands and gray levels number for discrimination of surface constituents 12 p2229 A70-26928
- Planetary gamma and X radiation by remote sensing and passive observation for gross chemical composition 15 p2793 A70-31749
- Lunar, meteoritic and terrestrial silicate rock chemical individuality based on atomic ratios 15 p2799 A70-31896
- Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer 15 p2802 A70-32491
- Data on Jupiter chemical composition, internal structure and energy sources, discussing Jovian planets origin and role played by gas 15 p2805 A70-32732
- Venus deep mantle water degassing rate from atmospheric hydrogen escape data 17 p3154 A70-34610
- Planetary interior density depth relationship, using modified Emden equation 18 p3321 A70-37122
- Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer 23 p4240 A70-43913
- Internal constitution of terrestrial and giant planets, planetary surfaces and atmospheres 23 p4256 A70-45036
- PLANETARY ENTRY**
U ATMOSPHERIC ENTRY
PLANETARY ENVIRONMENTS
NT JUPITER ATMOSPHERE
NT MARS ATMOSPHERE
NT MARS ENVIRONMENT
NT PLANETARY ATMOSPHERES
Microorganisms survivability in soils near spacecraft assembly areas during simulated Martian freeze-thaw cycles 09 p1619 A70-22768
- Differential thermal analysis capabilities in mineralogy for determining present/past planetary environmental parameters having significance for biological experiment 11 p1994 A70-25811
- PLANETARY EVOLUTION**
Nonthermal convection permissible modes in planetary mantles, using self gravitating homogeneous non-rotating sphere containing core and overlying viscous mantle 01 p0176 A70-10317
- Planetary mass and radii determinations indicating earth-moon-Mars and Mercury-Venus systems origin from two unstable planetary body breakups 01 p0177 A70-10342
- Solar system evolution based on Darwin theory, discussing energy inputs effect on primeval atmospheric molecules 02 p0229 A70-11666
- High temperature effects on evolution of Venus upper lithosphere, considering magnetic differentiation, isostatic adjustments, surface relief, mountain building time and distance scales, etc 02 p0371 A70-12207
- Moon-earth historical relationship, comparing differences in figure and interior with terrestrial planets 03 p0562 A70-12875
- Soviet Venus probes Venera 1, 2, 3, 4 and 5 emphasizing aims, implementation means and information yields influence on theory of solar system planets origin and evolution 04 p0757 A70-15672
- Meteoroid impact mass loss and formation of planets, investigating projectile-ejecta ratio and dependence on escape speeds 05 p0910 A70-16393
- Solar orbiting planets formation theory agreement with actual planetary system proved in terms of planetary masses and distances 05 p0913 A70-16567
- Manned or unmanned missions to asteroids close to earth as intermediate stage in planets formation 06 p1139 A70-17551
- Solar system evolution theories to explain planetary orbits, angular momentum and matter distribution, satellite systems and chemical composition 07 p1376 A70-18898
- Data on Jupiter chemical composition, internal structure and energy sources, discussing Jovian planets origin and role played by gas 07 p1386 A70-19487
- Thermal convection determination in earth, Venus, Mars and moon interiors based on thermal stability analysis, obtaining viscosity depth profiles 07 p1272 A70-20203
- Compressibility effect on density explaining Mercury-Venus density near equality to earth- Mars-moon, discussing theory of rotational break-up of parent planets 08 p1563 A70-20496
- Solar system origin theory emphasizing brother star approaching nebula for instability of boundary layer 08 p1568 A70-20638
- Soviet monograph on preplanetary cloud evolution and earth and planet formation covering convection, turbulence, gravitational instability and distribution function of bodies by size 08 p1568 A70-20725

PLANETARY EXPLORATION

Small planets observation methods, classification and designation, discussing asteroid belt origin
08 p1572 A70-20939

Asteroids uniaxial rotation as evidence against origin by collisional fragmentation of larger bodies
08 p1581 A70-21951

Extinct radioactive isotopes of solar system, discussing decay during nuclear synthesis and planetary formation periods
09 p1762 A70-23126

Mars primitive atmosphere analyzed from statistics of craters quantity as function of diameter, using Mariner 6 and 7 probe photographs
09 p1763 A70-23318

Soviet book on solar activity influence on earth natural processes covering atmospheric circulation and pressure, air temperature, precipitations and hydrological changes
09 p1719 A70-23471

Gerstenkorn moon capture theory taking into account tidal evolution of earth-moon system, discussing marine organisms time rate synopsis for earth rotation retardation
10 p1943 A70-24840

Jupiter atmospheric composition, gas and dust cloud formation as clues to origin and evolution of solar system
11 p2108 A70-25654

Differential thermal analysis capabilities in mineralogy for determining present/past planetary environmental parameters having significance for biological experiment
11 p1994 A70-25811

Earth continents and ocean basins as clues to planetary evolution, considering crust composition, moon origin, continental drift, etc
11 p2111 A70-26032

Comet-asteroid evolutionary relationship based on Hidalgo orbital analysis
11 p2114 A70-26472

Preplanetary matter irradiation by solar particles, noting isotopic abundances for evidence of nucleosynthesis induced by proton and alpha bombardment
13 p2486 A70-28619

Lunar surface optical properties differences for lunar and planetary nature and evolution determination
14 p2645 A70-31063

Data on Jupiter chemical composition, internal structure and energy sources, discussing Jovian planets origin and role played by gas
15 p2805 A70-32732

Small planets observation methods, classification and designation, discussing asteroid belt origin
15 p2805 A70-32751

Planetary origin theories, discussing lunar probes and manned landings data, accretion and fission formation models, etc
16 p2973 A70-33115

Mars evolution observation by gamma ray spectrometer in Martian orbit, transmitting information to earth as pulse height distribution
16 p2912 A70-33978

Gaseous disk in equatorial plane of solar nebula, determining dimensions from accretional theory for planets formation
17 p3172 A70-35584

Asteroidal parent bodies heating by electrical induction during early solar evolution
18 p3310 A70-35938

Mathematical model of asteroidal evolution and meteoritic mass distributions under collisional fragmentation using power law
18 p3312 A70-36213

Earth-moon system age and origin from tidal evolution equations, considering growth line counts on living and fossil marine invertebrates
21 p3921 A70-41971

Earth-moon system formation theory, discussing condensation from terrestrial hot extended silicate atmosphere
22 p4098 A70-42548

Apollo 11 data for lunar formation by earth breakup, discussing moon heating phase and correlation with planetary evolution
22 p4098 A70-42549

Titius-Bode law conclusions regarding solar system planetary distances numerical relations, considering planetary evolution
22 p4101 A70-42863

Solar nebula rings and planet formation by sedimentation of solid particles in mechanical equilibrium, including Jupiter and Saturn protoplanets
23 p4239 A70-43867

Venus polywater hydrosphere, discussing vapor phase, surface temperature, evolution, observations and model data
23 p4242 A70-44260

Venus atmospheric speculations compared to Soviet and American probe findings, discussing composition, evolution cloud layer and ionosphere
23 p4253 A70-44863

Planetary exploration for solar system origin and evolution, identifying outer planet mission scientific values
[AIAA PAPER 70-1244] 24 p4411 A70-45962

PLANETARY EXPLORATION
U SPACE EXPLORATION
PLANETARY GRAVITATION
Patch-conic method accuracy and limitations in determining space trajectories as function of planetary zones of influence
04 p0750 A70-14941

Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials
06 p1142 A70-17891

Gravitational field signatures for planetary fine structure analysis, describing lunar orbiter, selenodesy experiment and gravity field and earth gravity field satellite observation
11 p2111 A70-26029

Gravitational disturbance by exterior planets, considering Brown transformation of longitudinal perturbation problem in relation to planet Neptune discovery
11 p2117 A70-26658

Terrestrial external gravitational field approximation using sphere and ellipsoid attraction, showing mass, angular velocity and size dependence
12 p2300 A70-27477

Navigation for planetary orbiter and lander missions, considering orbit insertion, trim corrections and capsule descent for poor planetary gravity field model
13 p2448 A70-28706

Intermediate orbit calculation, allowing for spacecraft large gravitational perturbation during motion near planetary sphere of influence
18 p3312 A70-36166

Pluto space probe using swingby technique with Jupiter, Saturn and Uranus gravitation fields for acceleration
21 p3886 A70-41073

PLANETARY LANDING
Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles
[AIAA PAPER 68-1147] 01 p0195 A70-10828

Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer
01 p0197 A70-11501

Dry heat resistance of bacillus subtilis var. niger spores on selected planetary lander capsule surface materials
04 p0645 A70-15442

Electronic packaging and cabling on Capsule System Advanced Development Lander for Mars rough landing
06 p1016 A70-17335

Thermal testing of planetary lander vehicle in vacuum chamber, modeling electronics modules and experiments using resistance heaters
06 p1157 A70-18128

Nuclear propulsion requirements for manned landing mission to Mars assuming Saturn 5-based operation
07 p1375 A70-18874

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization
[AIAA PAPER 69-823] 07 p1365 A70-19716

Manned Mars mission planning, discussing technologies and costs for planetary landing
09 p1757 A70-22676

Differential thermal analysis-effluent gas analysis /DTA-EGA/ experiment for lightweight Martian landed capsule
11 p2050 A70-25802

Rough-landing space capsule for omnidirectional touchdown in lunar and Martian missions, tabulating design characteristics and functional capabilities
11 p2123 A70-26053

Mars landing analysis and simulation for unmanned lander prototype, discussing digital simulation by Monte Carlo techniques and physical tests
11 p2032 A70-26291

Computerized tradeoff analysis for planetary landing vehicle entry capsule and lander design optimization, emphasizing weight allocation for Mars 1973 missions
11 p2126 A70-26320

Navigation for planetary orbiter and lander missions, considering orbit insertion, trim corrections and capsule descent for poor planetary gravity field model
13 p2448 A70-28706

Throttleable thruster system for Mars soft landing, selecting catalytic decomposition engine from system weight and performance studies
[AIAA PAPER 70-652] 16 p2966 A70-33549

Planetary probes, orbiting space stations and manned spacecraft in interplanetary flights, discussing Mariner, Gemini and Apollo reentry and Venus landing
22 p4109 A70-42313

PLANETARY LONGITUDE
U PLANET EPHEMERIDES

PLANETARY MAGNETIC FIELDS

Dynamo theory of stellar and planetary magnetic fields, discussing mathematical analysis and electronic computation of eigenvalue problems and field parameters
01 p0185 A70-10957

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field
[AIAA PAPER 69-18] 04 p0742 A70-15543

Unmanned exploration program to study magnetic fields and chemical composition of five outer planets in solar system
07 p1375 A70-18871

Venus exploration by space probes, discussing orbital and physical data, planetary rotation, atmosphere, surface conditions and magnetic field
18 p3319 A70-37047

Earth magnetic field, discussing origin, field absence on planets and moon and MHD theory
19 p3410 A70-37399

Magnetospheric tail magnetic field and particle motion calculation, assuming constant radius cylinder with current sheet bisecting center
22 p4019 A70-43111

PLANETARY MASS
Planetary mass and radii determinations indicating earth-moon-Mars and Mercury-Venus systems origin from two unstable planetary body breakups
01 p0177 A70-10342

Jupiter mass determined from observations of Jupiter fourth satellite right ascension and declination differences
02 p0370 A70-12087

Geogravitational constants and mass determination, discussing Cavendish constant and measurement theory and technique
03 p0473 A70-13236

Mass and radius relations for zero temperature spheres of chemical elements, using equation of state and numerical integration
04 p0749 A70-14599

Meteoroid impact mass loss and formation of planets, investigating projectile-ejecta ratio and dependence on escape speeds
05 p0910 A70-16393

Solar orbiting planets formation theory agreement with actual planetary system proved in terms of planetary masses and distances
05 p0913 A70-16567

Mariners 6 and 7 range and Doppler tracking data for studying Martian mass and earth-moon mass ratio
06 p1151 A70-18486

Soviet monograph on constant of gravitation, mass and density of earth covering torsion balance, weight experiments and nonlinear vibration techniques
08 p1487 A70-20764

Geogravitational constants and mass determination, discussing Cavendish constant and measurement theory and technique
08 p1491 A70-21669

Earth/moon mass ratio and Mars mass and ephemeris from Mariners range and Doppler tracking data, noting relativistic time delay measurement possibility
15 p2798 A70-31652

Large planets mass determination based on Kepler law and gravitational effects
18 p3318 A70-37045

Uranus and Saturn reciprocal mass determination based on astronomical observations of Saturn and Jupiter respectively
20 p3705 A70-39477

Pluto mass from Saturn, Uranus and Neptune masses
23 p4243 A70-44295

Planetary masses determined from radar measurement data and radio tracking of space probes
24 p4407 A70-45535

PLANETARY MOTION
U SOLAR ORBITS
PLANETARY NEBULAE
IR emission from planetary nebulae, W-R, Of and symbiotic stars, discussing dust hypothesis for IR excess
01 p0173 A70-10039

High luminosity white dwarfs possible evolution from planetary nebulae, discussing plasma neutrino processes
01 p0189 A70-11342

Planetary nebulae with concordant and discordant radio and optical fluxes, discussing possible causes of discordances
04 p0747 A70-14516

Carbon atom RF recombination lines evaluated for conditions in H II regions and planetary nebulae
04 p0748 A70-14587

Radiative excitation in planetary and Orion nebulae by solving transfer equations for Lyman line and continuum radiation, using normalized on-the-spot /NOS/ approximation
04 p0758 A70-15700

Planetary nebula formation mechanism based on slow mass loss due to radiation pressure on grains
08 p1575 A70-21374

- Planetary faint nebulae containing northern Milky Way portion in direction of galactic anticenter observed with spectral Schmidt camera, noting stellar appearance
09 p1761 A70-23051
- Hydrogen rich material forming planetary nebula ejected from contracted core of evolved star with 20,000 times solar luminosity
10 p1936 A70-23906
- Planetary nebula NGC 7027, discussing hydrogen recombination lines
13 p2486 A70-28629
- Planetary nebula K3-50 microwave observations, determining composite source radio spectrum
18 p3313 A70-36326
- Planetary nebula NGC 7027 radio component, determining brightness temperature from fringe amplitude
18 p3313 A70-36327
- Image tube observations of Large and Small Magellanic Clouds and southern planetary nebulae at Cerro Tololo Observatory
20 p3705 A70-39480
- Planetary nebulae radial velocities using prime focus or coude spectra
21 p3889 A70-41157
- Planetary nebula NGC 7027 IR line spectra emission, examining S IV and AR III line intensities
22 p4094 A70-42933
- Orion Nebula and 32 other planetary nebulae spectra in yellow-green obtained with electronic camera, discussing forbidden N I and II lines
22 p4103 A70-42983
- Photoionization cross sections for atoms and ions of carbon, nitrogen, oxygen and neon as function of wavelength for H II regions and planetary nebulae
22 p4104 A70-42997
- Planetary nebulae NGC 7662 and NGC 7009 axially symmetric models from density distributions, H continuum threshold optical depths and central star temperatures
24 p4409 A70-45757
- Planetary nebula NGC 3242 monochromatic photographs and isophotic contours
24 p4411 A70-45788
- PLANETARY ORBITS**
- Planetary information obtained from radar installations, discussing distance and orbit measurements, rotation periods, planetary surfaces, emphasizing Mercury and Venus
01 p0185 A70-11046
- Optimal descent maneuver from planetary orbit for fixed atmospheric reentry angle, considering minimum impulse /fuel consumption/
04 p0745 A70-14496
- Patch-conic method accuracy and limitations in determining space trajectories as function of planetary zones of influence
04 p0750 A70-14941
- Analytic guidance and control for minimum fuel expenditure and optimal guidance corrections for low thrust vehicle in Martian orbit
04 p0716 A70-15544 [AIAA PAPER 78-862]
- Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planet orbiting, with emphasis on singular points
06 p1142 A70-17877
- Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems
06 p1158 A70-18177 [AIAA PAPER 70-160]
- Energy optimal osculating elliptical transfer orbit from low eccentricity orbit constructed for prolonged circling in equatorial plane of axisymmetric planet
07 p1374 A70-18774
- Dynamical constraints on planetary fission events, calculating maximum possible excursions of planetary orbits
07 p1381 A70-19280
- Pulsar formation effect on orbits of preexisting planets and postformation planets effects on pulsar period and phase residuals
08 p1570 A70-20898
- Major planets secular perturbations represented in trigonometric form using canonical transformations
09 p1751 A70-22176
- Minor planets orbits coordinates and velocities data at osculation time
09 p1756 A70-22654
- Thermal interface between edge of planetary disk and space for providing attitude reference during orbiting of planet
13 p2403 A70-28442
- Long period comets energy change due to planetary perturbations tabulated, obtaining orbital major axes before and after passage
13 p2489 A70-28906
- Venus obliquity dynamic implications, developing equations for independent parameter set to define spin vector
13 p2489 A70-28907
- Thermal tidal friction and gravitation effects on Mercury libration after solidification, noting equilibrium with orbital and rotational periods locked in 3/2 resonant state
14 p2638 A70-30701
- Mercury rotational angular velocity fluctuation in terms of orbital mean motion at different orbit positions
14 p2639 A70-30708
- Planetary orbit after central star supernova explosion, discussing effect on pulsar period
14 p2640 A70-30787
- Intermediate elliptical orbits for planetary satellites with small inclination to equatorial plane
18 p3312 A70-36174
- Solar quadrupole moment effect on secular perturbations of planetary orbital elements
18 p3313 A70-36325
- Planet Mercury transit on photographs, noting role as test for terrestrial time systems
18 p3314 A70-36515
- Planetary orbiter parameters long term variations under central body oblateness, solar and atmospheric drag perturbations
19 p3528 A70-38870 [AIAA PAPER 70-1055]
- Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems
21 p3931 A70-41861 [AIAA PAPER 70-160]
- Neptune orbit residual, discussing recently discarded Lalande precovery
21 p3922 A70-41986
- Jupiter perturbations on short period comets during close approaches, discussing orbital distribution
23 p4241 A70-44252
- PLANETARY QUARANTINE**
- Collection of papers on planetary quarantine and spacecraft sterilization covering microbiology, spacecraft components, launching and environments, planetary landing, etc
03 p0433 A70-12996
- Sterile access system using pilot assembly sterilizer system /PASS/ for NASA Planetary Quarantine Program
05 p0808 A70-16708
- PLANETARY RADIATION**
- Local thermal emission from Jupiter at 5 microns discussing North Equatorial Belt and atmospheric transparency
01 p0173 A70-10043
- Internal powers and effective temperatures of Jupiter and Saturn measured by aircraft mounted telescope, noting restraints on planetary structure and atmosphere models
01 p0173 A70-10045
- Far UV spectroscopy of Jupiter by rocket-borne spectrograph
01 p0179 A70-10528
- Atmospheric models of deep atmosphere thermal emission and ionosphere free-free emission used for studying Saturn microwave spectrum
01 p0180 A70-10533
- Icarus asteroid rotation period and brightness variation values obtained from photometric observations at Cassegrain reflector focus
01 p0180 A70-10536
- Jovian decameter radiation polarization during 1966-1967 apparition compared with cyclotron model predictions
02 p0364 A70-11793
- Venus and Jupiter Aerobee rocket photoelectric UV spectra, determining geometric albedos using reflecting layer and cloud models
02 p0367 A70-11812
- Absorption spectra computation for model planetary atmosphere using Neumann series for solving semiinfinite radiative transfer equation
02 p0342 A70-11826
- Mars multicolor filter photometry showing variation in whole-disk reflectivity
02 p0378 A70-12560
- Jupiter radio telescope observations at cm wavelengths, describing radiation belt emission characteristics and planetary brightness temperature spectrum
03 p0565 A70-13233
- Daily variations of winter stratospheric zonal wind and planetary waves based on synoptic charts from balloon observation
05 p0878 A70-16148
- Mayeda flare observed on Mars 4 June 1937/, suggesting oriented reflection of solar rays from ice crystals cloud or Martian surface feature
05 p0918 A70-16916
- Circular polarization measurements of Jovian decimeter radiation by 210-ft radio telescope at Goldstone, California
05 p0921 A70-16986
- Jovian decametric radiation periodicities analysis refuting evidence of Bigg for new Jovian satellites
06 p1138 A70-17280
- Cosmic rays effect on atmospheric temperature and wind, discussing planetary distribution of neutron component of radiation intensity
07 p1373 A70-20346
- Mars planet smoothing factor determined from phase curve of integrated brightness distribution on disk
08 p1564 A70-20557
- Jupiter and Saturn IR reflection spectra observed with Michelson interferometer- spectrometer, eliminating effects of terrestrial atmospheric absorption, solar spectral lines, etc
08 p1570 A70-20895
- Modulation lanes in fine structure of dynamic spectra of Jovian L bursts possibly due to ionosphere or magnetosphere
08 p1576 A70-21394
- Fine structure morphology in dynamic spectra of Jupiter decametric radiation determined from spectral recordings
08 p1562 A70-21514
- Critique of blue haze negative hypothesis in preliminary Mariner 6 data report
08 p1578 A70-21556
- Jupiter decametric noise storm commencement time defining constant planetary rotation period
08 p1580 A70-21572
- Jupiter radio telescope observations at cm wavelengths, describing radiation belt emission characteristics and planetary brightness temperature spectrum
08 p1580 A70-21666
- Book on solar and planetary radio emission covering solar system physical characteristics, quiet Sun, thermal and nonthermal emission, etc
09 p1752 A70-22201
- Baseline measurements of Jupiter decametric radiation providing upper size limit to coherent and incoherent sources
09 p1755 A70-22512
- Saturn disk temperature obtained from centimeter wavelength, suggesting possibility of nonthermal radiation
09 p1759 A70-22912
- Thermal controls for spacecraft in space and planetary atmospheres, including heat inputs by solar radiation and planetary albedos
09 p1789 A70-23130
- Jupiter brightness temperature values and standard deviations from EHF radio telescope observations
09 p1765 A70-23809
- Jupiter decametric emission modulation by planetary rotation and Io position, suggesting role of magnetic tail diurnal swings
10 p1940 A70-24434
- Radio telescopic observations of Jupiter, Venus and radio source 3C 273 at 2 and 8 mm wavelengths, determining brightness temperatures and radiation flux densities
10 p1948 A70-25153
- Stellar and planetary IR spectra from spectrometer with rotating circular variable thickness interference filter
11 p2113 A70-26468
- Thermal interface between edge of planetary disk and space for providing attitude reference during orbiting of planet
13 p2403 A70-28442
- Jupiter decametric radio bursts observed by tape recording fringe interferometer
13 p2486 A70-28626
- Jupiter luminosity as indication of internal energy magnitude, comparing limb darkening with predicted brightness distribution
14 p2643 A70-30984
- Mercury mm wave observations, examining longitude dependence of disk average brightness temperature and epilith thermal parameters range
14 p2647 A70-31076
- Thermal radio emission from major planets at mm and cm wavelengths and at decimeter wavelengths for Jupiter and Saturn
14 p2648 A70-31084
- Twelve year periodicities of Jupiter decametric radiation, noting correlation with Jupiter magnetic field rotation period
14 p2648 A70-31085
- Lunar occultation observation of Jupiter by radio telescope, determining one dimensional strip brightness distribution
14 p2648 A70-31086
- Jupiter decimeter radiation long term variations from flux density measurements, suggesting correlation with solar activity
14 p2648 A70-31087
- Jupiter microwave spectrum from polarimetric observations and previous data
14 p2648 A70-31088
- Synchrotron model involving electron trapping in dipolar magnetic field for Jupiter decimeter radiation
14 p2649 A70-31089
- Planetary gamma and X radiation by remote sensing and passive observation for gross chemical composition
15 p2793 A70-31749
- Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds
15 p2803 A70-32499
- Mars planet smoothing factor determined from phase curve of integrated brightness distribution
15 p2805 A70-32712

- Mars evolution observation by gamma ray spectrometer in Martian orbit, transmitting information to earth as pulse height distribution 16 p2912 A70-33978
- Jovian decimeter radiation, discussing electron drift velocity in dipole field, characteristic time for energy loss and radiation belt dimensions 16 p2980 A70-34192
- Jupiter decametric radio emission modulation by Io simulated by DC circuit model 18 p3321 A70-37120
- Jovian continuum radiation observation by RAE-1 during lunar occultations 19 p3512 A70-38608
- Jupiter RF spectrum in 80 to 10,000 MHz range for dipolar model, noting independent synchrotron component 21 p3891 A70-41185
- Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds 23 p4240 A70-43920
- Jupiter flux density changes at 2695 MHz correlated with 10.7 cm solar activity, suggesting magnetic anomaly explanation 23 p4246 A70-44751
- Pluto albedo at various wavelengths from spectrophotometric measurements 24 p4399 A70-45129
- ### PLANETARY ROTATION
- Rotation period of Jupiter based on decametric component of radio emission, suggesting anticorrelation with sunspot number for drift observed 01 p0173 A70-10044
- Icarus asteroid rotation period and brightness variation values obtained from photometric observations at Cassegrain reflector focus 01 p0180 A70-10536
- Planetary information obtained from radar installations, discussing distance and orbit measurements, rotation periods, planetary surfaces, emphasizing Mercury and Venus 01 p0185 A70-11046
- Planetary atmospheres dynamics, discussing rotational and MHD effects, energy sources, etc 02 p0366 A70-11806
- Equations of conservation of mass, energy and momentum applied to rotation effects on convective motion in planetary interiors 05 p0905 A70-15759
- Telescopic circular polarization observations of Jupiter at 9.26 cm related to Jovicentric declination of earth 05 p0906 A70-15896
- Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces 06 p1153 A70-18559
- Planets rotation axes inclinations related to Titius-Bode rule of solar distances, noting estimation of unknown inclinations 07 p1386 A70-19557
- Evaporation rates from rotating planet, showing augmentation over stationary planet 07 p1390 A70-20290
- Spin angular momentum of planets based on particle accretion, discussing particles cloud condensation 08 p1576 A70-21400
- Jupiter decametric noise storm commencement time defining constant planetary rotation period 08 p1580 A70-21572
- Asteroids uniaxial rotation as evidence against origin by collisional fragmentation of larger bodies 08 p1581 A70-21951
- Optimal transfer ellipse obtained by complete rotation in gravitational field of axisymmetric planet 09 p1751 A70-22161
- Venus rotation period determination by radar observation of surface features 09 p1759 A70-22911
- Thermal tidal friction and gravitation effects on Mercury libration after solidification, noting equilibrium with orbital and rotational periods locked in 3/2 resonant state 14 p2638 A70-30701
- Mercury rotational angular velocity fluctuation in terms of orbital mean motion at different orbit positions 14 p2639 A70-30708
- Venus radar anomalous features, examining rotation period, polarized and cross polarized scattering properties and topography 14 p2647 A70-31079
- Retrograde rotation of equatorial spots of Venus cloudy exterior layer, using UV photographic and spectroscopic observations 14 p2649 A70-31215
- Venus spin-orbit resonance resulting in consistent inferior conjunction with earth, suggesting solar atmosphere tidal influence 14 p2650 A70-31216
- Venus retrograde axial period contradiction between radar echoes and violet-UV photographic and interferometric spectroscopic methods explained by theory using strong magnetic dipole 16 p2973 A70-33116
- Convective heat transport role in determining rotating planets climatic temperature zones 22 p4099 A70-42626
- ### PLANETARY SPACE FLIGHT
- #### U INTERPLANETARY FLIGHT
- #### PLANETARY SPACECRAFT
- #### U INTERPLANETARY SPACECRAFT
- #### PLANETARY SURFACES
- #### NT MARS SURFACE
- Slopes distribution over finite span on planetary surface excavated by primary impact craters, including typical lunar mare crater densities 01 p0178 A70-10443
- Moon-earth historical relationship, comparing differences in figure and interior with terrestrial planets 03 p0562 A70-12875
- Automated mars surface sample return /AMSSR/ mission, discussing Saturn 5 chemical and nuclear approach [AIAA PAPER 69-1066] 04 p0764 A70-15626
- Space temperature determination, discussing planet or satellite absorption and radiation rate dependence on surface characteristics, solar radiation, planet albedo and thermal radiation 05 p0914 A70-16629
- Planetary boundary layer thickness estimation, considering geostrophic wind speed and potential temperature average vertical gradient 07 p1377 A70-18922
- Optimal photometric data processing for planetary characteristics and surface details, considering errors due to image blurring in telescope 07 p1384 A70-19419
- Orbit analysis of hypothetic comets formed by Jupiter surface eruptions using Lagrange origin hypothesis 08 p1573 A70-21012
- Venus surface temperature calculations with non-gray radiation balance model and Mariner 5 and Venera 4 vertical temperature profile data 08 p1579 A70-21568
- Radiative heat transfer in lunar and Mercurian surfaces, discussing radiative heat transfer in powders 08 p1579 A70-21569
- Thermally emitted photons of atmospheric molecules and aerosols and planetary surface followed by Monte Carlo method, using anisotropic single scattering functions 09 p1719 A70-23524
- Venus planetary surface and atmosphere, reviewing American and Soviet probe results 10 p1943 A70-24761
- Volcanic terrain by high precision photogrammetry for studying planetary surface roughness traversability by three wheeled vehicle 10 p1882 A70-25047
- Unmanned exploration of planetary surfaces in preparation for manned landings, describing Surveyor lunar probes 11 p2112 A70-26056
- Mars imaging mission and astrodynamic interaction, discussing arrival geometry and orbit size effects [AIAA PAPER 69-127] 11 p2112 A70-26130
- Mercury surface features from spectrograms of depolarized radar echoes 12 p2298 A70-27268
- Unmanned vehicles for planet surface exploration, discussing design and control using self adjusting and logic circuits 13 p2384 A70-28418
- Cratered planetary surface distribution and covariance functions of elevations using statistical model 13 p2488 A70-28763
- Planetary atmospheres and surfaces - Conference, Woods Hole, Mass., August 1969 14 p2643 A70-31051
- Venus surface temperature poleward variation from radio interferometry measurements 14 p2646 A70-31068
- Venus atmosphere-lithosphere interactions, predicting electrically conducting cloud masses presence 14 p2646 A70-31070
- Mercury mm wave observations, examining longitude dependence of disk average brightness temperature and epilith thermal parameters range 14 p2647 A70-31076
- Venus and Mercury surface height variations near equators, using radar time delay and Doppler observations 14 p2647 A70-31077
- Venus radar mapping using fixed base line interferometer for hemispheric ambiguity resolution 14 p2647 A70-31078
- Venus radar anomalous features, examining rotation period, polarized and cross polarized scattering properties and topography 14 p2647 A70-31079
- Dual mode algorithm for routing unmanned autonomous roving vehicle around obstacles on planets, using dynamic programming and terrain information [JPL-TR-32-1484] 14 p2655 A70-31183
- Mars carbon dioxide abundance and surface pressure from growth curve based on high resolution spectra 14 p2650 A70-31218
- Venus atmosphere and surface conditions, describing temperature, accumulation of carbon dioxide and runaway greenhouse effect 15 p2806 A70-32771
- Atmospheric boundary layer model, considering air-surface interaction, heat and humidity exchange, wind, temperature and humidity profiles, etc 17 p3132 A70-34667
- Planetary surface smoothness factor by disk brightness, Mars red light and phase curves methods, indicating superiority of visual observation 18 p3315 A70-36602
- Venus exploration by space probes, discussing orbital and physical data, planetary rotation, atmosphere, surface conditions and magnetic field 18 p3319 A70-37047
- Mercury photometric measurement, examining surface brightness for photometric function 18 p3319 A70-37052
- Planetary surface inhomogeneities detection by reflected and transmitted light polarimetry, using symmetry principles 18 p3319 A70-37057
- Aeolian regime of Venus surface resulting from high surface temperature and pressure, discussing spurious radar echoes, dust and sand transport and deposition 21 p3885 A70-40929
- Thin walled spherical shell spacecraft skin heating in planetary surface proximity, considering skin temperature distribution 21 p3944 A70-41019

- Jupiter surface drawings and photographs concerning quasi-periodic oscillations of red spot 24 p4411 A70-45800
- ### PLANETARY TEMPERATURE
- Internal powers and effective temperatures of Jupiter and Saturn measured by aircraft mounted telescope, noting restraints on planetary structure and atmosphere models 01 p0173 A70-10045
- Venus upper atmosphere average rotational temperature determined from high dispersion spectroscopic observations of 7883 A carbon dioxide band 01 p0184 A70-10912
- Jupiter atmosphere temperature and density profiles determined from thermal models based on thermal structure above dense cloud level 02 p0367 A70-11814
- Optical parameters of Martian surface and temperature, discussing brightness distribution along diameter in red spectral region, based on photoelectric cross sections 05 p0918 A70-16917
- Effective pressure and rotation line intensity in Uranus upper atmosphere obtained from methane band spectrograms, calculating maximum temperature at subsolar point 07 p1385 A70-19423
- Venus surface temperature calculations with non-gray radiation balance model and Mariner 5 and Venera 4 vertical temperature profile data 08 p1579 A70-21568
- Saturn disk temperature obtained from centimeter wavelength, suggesting possibility of nonthermal radiation 09 p1759 A70-22912
- Martian atmospheric models for lander and simulator design, obtaining effective sky temperatures, surface pressures and temperatures, atmospheric compositions, etc 11 p2112 A70-26141
- Mars and Venus radio temperature measurements by 210 ft telescope, obtaining effective brightness 12 p2309 A70-27896
- Upper atmospheric temperature-gravitational potential relationship for sun, earth and several planets 13 p2495 A70-29765
- Mercury disk temperature at 3.75 cm wavelength, showing variation with phase angle and hermographic longitude 14 p2647 A70-31075
- Martian soil thermal conditions at south pole, considering polar cap annual variations and carbon dioxide sublimation 15 p2802 A70-32492
- Venus atmosphere and surface conditions, describing temperature, accumulation of carbon dioxide and runaway greenhouse effect 15 p2806 A70-32771

Mercury disk temperature from microwave spectrum analysis, proposing subsurface greenhouse effect 17 p3157 A70-34838

Photolytic model of Jupiter belt excess temperatures and coloration compared to solid ammonia clouds, using IR and visual observations 19 p3513 A70-37410

Upper atmospheric temperature-gravitational potential relationship for sun, earth and several planets 20 p3710 A70-40090

Martian soil thermal conditions, considering polar cap annual variations and carbon dioxide sublimation 23 p4240 A70-43914

Jupiter model thermal profiles, examining metallic core and molecular envelope in convective equilibrium 23 p4241 A70-44251

Venus carbon dioxide band, deriving rotational temperatures at various phase angles 23 p4241 A70-44257

PLANETOCENTRIC COORDINATES

NT GEOCENTRIC COORDINATES

Three camera method for studying upper atmosphere winds via smoke trails providing wind velocity, earth coordinate data and error indication 14 p2607 A70-30572

Earth to planet radar signal time delay in general relativity expressed in relativistic spherical polar coordinates of earth and planet 15 p2806 A70-32801

PLANETOLOGY

Nonthermal convection permissible modes in planetary mantles, using self gravitating homogeneous non-rotating sphere containing core and overlying viscous mantle 01 p0176 A70-10317

Planetary mass and radii determinations indicating earth-moon-Mars and Mercury-Venus systems origin from two unstable planetary body breakups 01 p0177 A70-10342

Giant planets structure, calculating Jupiter and Saturn densities using Russell solar mixture and internal heat from central core radioactivity 01 p0181 A70-10663

Mars surface features, describing diagonal and meridian-latitude grid systems, continental blocks and continental drift 01 p0183 A70-10869

DC dynamo models for planetary electromagnetic conditions, considering nonrotationally symmetric turbulence induction actions and critical values for field maintenance 01 p0185 A70-10956

Radar probing of solar system noting contributions to knowledge on planets 01 p0192 A70-11485

Long range solar flare forecasting noting correlation between planetary conjunctions and proton events [AAS PAPER 69-624] 04 p0740 A70-14658

Satellite orbit and attitude determination and planetary gravity and astronomical constants from earth-based radar Doppler and orbital photogrammetric observations 04 p0750 A70-14938

Mercury shape estimated with isostatic form of equilibrium controlled by situation near perihelion passage at 3-2 resonance spin rate, discussing solidification thermal effects 05 p0908 A70-16332

Soviet book on Jupiter atmosphere covering structure, chemical composition, cloud cover, temperature conditions, etc 05 p0910 A70-16412

Rotation, diameter, mass, atmosphere and constitution of planet Neptune, with emphasis on visual observations 05 p0913 A70-16552

Physical and life supporting properties of hypothetical Martian biosphere, considering organism adaptation theories 05 p0803 A70-17109

Tabulated corrections of data concerning reduction of photographs of small planets obtained at Bucharest Astronomical Observatory 06 p1139 A70-17549

Dynamical constraints on planetary fission events, calculating maximum possible excursions of planetary orbits 07 p1381 A70-19280

Planets rotation axes inclinations related to Titius-Bode rule of solar distances, noting estimation of unknown inclinations 07 p1386 A70-19557

Martian polar cap spectra interpreted with laboratory measurements of water-carbon dioxide frost spectral reflectance 07 p1388 A70-19946

Thermal convection determination in earth, Venus, Mars and moon interiors based on thermal stability analysis, obtaining viscosity depth profiles 07 p1272 A70-20203

Jupiter conductive molten metallic hydrogen core of moderate temperature suggested from solids melting point temperature dependence on pressure 07 p1390 A70-20238

Figure of gravitating inhomogeneous rotating liquid, applying results to Jupiter and Saturn model construction 08 p1564 A70-20558

Small planets observation methods, classification and designation, discussing asteroid belt origin 08 p1572 A70-20939

Catalog systems orientation based on major and minor planets observation, discussing zero points corrections 08 p1574 A70-21152

Hori canonical equations analytical solution generalization resulting from elimination of short period terms of first order planetary theory 08 p1575 A70-21239

Neptune and Pluto oblateness inferred from analogous similarities of mass, diameter and mean density with Uranus and Mars planets 09 p1750 A70-22096

Major planets secular perturbations represented in trigonometric form using canonical transformations 09 p1751 A70-22176

Rayleigh number effects on convection in planetary mantles, considering conservation equations of mass, energy and momentum 09 p1752 A70-22312

Planetary perihelion precession with velocity-dependent gravitational mass in terms of special relativity 09 p1765 A70-23800

Einstein theory applied to sample modeling of planetary orbits and light beams touching sun in solar gravitational field 10 p1939 A70-24268

Laboratory simulation for shock waves around earth, moon and Venus based on artificial solar wind and magnetic dipole interaction study 10 p1948 A70-25182

Planetary and space mission planning - Conference, New York, October 1967 11 p2110 A70-26026

Earth mechanical properties and composition compared with moon and other terrestrial planets 11 p2047 A70-26616

Ring micrometer radius determination and application to right ascension changes in determining positions of comets, planets and planetary moons 11 p2057 A70-26675

Planet Venus motion, mass, dimensions, shape, topography and atmosphere 12 p2311 A70-28301

Perturbation function of first order general planetary theory using Hori canonical variables, revealing mixed secular term of determining function 13 p2487 A70-28708

Soviet monograph on minor planets origin and physical nature, considering orbits, investigative techniques, etc 13 p2488 A70-28800

Mars geology, discussing polar caps phenomena, diurnal variations, orbital eccentricity, seasonal meteorology, volcanism, erosion, etc 15 p2800 A70-32059

Figure of gravitating inhomogeneous rotating liquid, applying results to Jupiter and Saturn model construction 15 p2805 A70-32713

Small planets observation methods, classification and designation, discussing asteroid belt origin 15 p2805 A70-32751

Planetary origin theories, discussing lunar probes and manned landings data, accretion and fission formation models, etc 16 p2973 A70-33115

Mars 1969 planetary surface drawing and photograph evaluation, noting dark spot east of Nodus Lacontis 17 p3154 A70-34677

Mercury drawings from refractor observations during 1964-1967 18 p3315 A70-36611

Lunar and planetary laboratory communications, Volume 8 covering IR astronomy, Mercury, Mars, Uranus, comets, etc 19 p3515 A70-37929

Planet Mercury knowledge summary, discussing orbit, diameter, mass, density, rotation, surface features, atmosphere, polarization, albedo and color 19 p3515 A70-37930

Einstein theory applied to sample modeling of planetary orbits and light beams touching sun in solar gravitational field 19 p3520 A70-38393

Astronomical events observed in 1970 by amateur astronomers, discussing sun and moon eclipses and planets visibility 21 p3886 A70-41074

Planetary unipolar electric generator system theoretical model based on polarization charges deposition by solar wind 22 p4100 A70-42790

Jupiter varied color surface area observations /1926-1964/ 22 p4107 A70-43594

Pluto mass from Saturn, Uranus and Neptune masses 23 p4243 A70-44295

Gas chromatographic-mass spectrometric identification of aliphatic hydroxy acids in plants and sediments 02 p0252 A70-12521

Phytotron design and operation, discussing closed air conditioned plant growing system at Stockholm including greenhouse, light controlled rooms, darkrooms, etc

03 p0435 A70-13716

Carrot plants growing during 374 days in conveyor type aeroponic assembly, noting yield and morphological features

03 p0436 A70-13902

Unicellular algae protein diet effects on animal and human enteric microflora composition

09 p1615 A70-22087

Water depth determination by remote measurement of near IR reflectance of underwater plants, discussing effects of water path length changes

10 p1878 A70-24741

Phytotron design and operation, discussing closed air conditioned plant growing system at Stockholm including greenhouse, light controlled rooms, darkrooms, etc

11 p1990 A70-25516

Light-induced electron paramagnetic resonance signal detected in *Anacystis nidulans*

11 p1989 A70-26847

Plant leaves discrimination by multispectral reflectance indicated in transmittance measurements via remote sensing from aircraft and spacecraft

12 p2218 A70-26920

Plant cultivation in closed biological cycles by hydroponic method using keramit/alumoferrisilicate/substrate

13 p2358 A70-29328

Venus water presence from Venera 4 and Mariner 5 data suggesting polar seas and oceans saturated with hydrochloride and carbon dioxide as plant life source

14 p2637 A70-30365

Physical methods in applied climatology, analyzing meteorological effects on human body and building thermal conditions and plant biomass growth

15 p2771 A70-32111

Unicellular algae protein diet effects on animal and human enteric microflora composition

15 p2685 A70-32683

False color aerial photography with IR film for distinguishing vegetation types and assessing plant vigor based on leaf reflectance

17 p3078 A70-35613

Remote sensing experiment demonstrating utility of multispectral color aerial photography for detection of differences among vegetative species

17 p3095 A70-35615

Photographic and multisensor imagery augmented by field survey for mapping vegetation boundaries and density differences within and between plant communities

17 p3079 A70-35616

Anomalous substrate oxidizing specificities among red brown and green algal peroxidases and land plants

19 p3360 A70-37773

Cosmos 110 satellite experiments concerning radiation effects on lysogenic bacteria and plants

23 p4149 A70-45030

PLANTS [INDUSTRIES]

U INDUSTRIAL PLANTS

PLASMA ACCELERATION

Steady state spherically symmetric model for solar plasma acceleration with distance, showing essential role of viscosity

01 p0172 A70-11519

Acceleration mechanisms in pulsed plasma accelerator with rail electrodes driven by capacitor discharge

02 p0348 A70-12501

Steady, homogeneous, electromagnetic plasma acceleration fields, demonstrating electric and magnetic fields effects on dynamic behavior

03 p0529 A70-12989

Solar wind acceleration and coronal plasma heating above plage regions from spectra of solar radio echoes, computing temperature rise and energy input

04 p0470 A70-15049

Neutral gas ionization and ion recombination effect on electrodynamic plasma acceleration in coaxial and flat electrode accelerators

04 p0728 A70-15222

Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field

04 p0729 A70-15596

Ion-neutral coupling in plasma acceleration revealed by velocity disparities determined spectroscopically

06 p1133 A70-18219

Plasma ion cyclotron resonance acceleration in nonuniform magnetic field by RF field

07 p1353 A70-20229

Light ions acceleration to high energy by pulsed high intensity electron beams

08 p1553 A70-21694

Quasi-steady state plasma acceleration in coaxial electrode geometry during synchronized application of tailored pulses of mass flow and current

09 p1736 A70-23204

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux

11 p2107 A70-25526

Mass transfer in electrodynamic accelerated plasma, discussing recombination, ambipolar diffusion, electrode sputtering, charge exchange, electron capture and resistance forces effect on acceleration

13 p2461 A70-28862

Ohmic dissipation in MHD plasma acceleration, demonstrating interaction with electric field and magnetic induction

14 p2621 A70-30296

Solar wind velocity profile in rapid acceleration of coronal plasma from type I, III and V bursts

17 p3152 A70-35745

Laser applications in thermonuclear fusion, analyzing plasma acceleration under laser pulse action

18 p3265 A70-36110

Acceleration processes in MPD arc jet in Ar for symmetric discharge layer and rotating spoke types

20 p3680 A70-39992

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux

21 p3892 A70-41276

Stochastic kinetic theory for plasma turbulent heating by random fields, predicting acceleration effects

21 p3859 A70-41899

Mass transfer effects on plasma electrodynamic acceleration, discussing plasma recombination and diffusion

22 p4083 A70-43386

PLASMA ACCELERATORS

NT COAXIAL PLASMA ACCELERATORS

Plasma accumulation between mixed field accelerator and pulsed magnetic mirror, noting duration and stability

02 p0346 A70-12104

Acceleration mechanisms in pulsed plasma accelerator with rail electrodes driven by capacitor discharge

02 p0348 A70-12501

Pulsed MHD accelerator for MHD wind tunnel application, discussing accelerator gas source, magnetic field and operation

03 p0462 A70-12907

Heat transfer to insulator wall of linear MGD accelerator attached to shock tube, comparing measurements with Hartmann boundary layer analysis

[ASME PAPER 69-WA/HT-53] 04 p0781 A70-14796

Crossed field plasma accelerator designed as element of hypersonic wind tunnel driver

06 p1119 A70-17471

Quasi-steady coaxial MPD arcs characteristics, studying Ar ion velocities, electrostatic ion acceleration mechanism and arc voltage gradient

06 p1132 A70-18208

Repetitively pulsed quasi-steady vacuum arc magnetoplasma dynamic accelerator for propulsion, using electrolytic capacitors as power source

[AIAA PAPER 70-167] 06 p1133 A70-18228

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators

[AIAA PAPER 69-112] 07 p1348 A70-19322

Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency

[AIAA PAPER 69-113] 07 p1348 A70-19323

Electrodynamic plasma accelerators fast particle generation mechanism during entrainment, studying polarization field potential structure

08 p1549 A70-20506

Inert gas plasma jets diagnostics in accelerator by spectroscopy, determining flow velocities, excitation and gas temperatures

11 p2093 A70-26744

Energy spectrum of electrons accelerated in linear plasma betatron close to potential compared to cyclic betatron results

13 p2463 A70-29379

Hypervelocity gas, electromagnetic, explosive drive and exploding wire accelerometers and high explosive, shaped charge, plasma drag and electrostatic accelerators for projectile impact studies

15 p2718 A70-32783

Electroless traveling wave accelerator for wind tunnel use, determining gas stream density for subsonic and supersonic operation

16 p2889 A70-33868

Experimental and theoretical investigation of mass injection effect on high current MPD arc

16 p2959 A70-33869

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region

[AIAA PAPER 69-381] 16 p2959 A70-33870

Fluid dynamics of pulsed plasma accelerators, discussing energy transfer and losses limitations

18 p3301 A70-36660

Langley 20 megawatt plasma accelerator design and operation, describing arc heater modifications, exit parameters, electrical properties, etc

20 p3606 A70-40010

Plasma accelerator compressible turbulent boundary layers numerical calculation taking into account MHD effects, electron thermal nonequilibrium and finite rate ionization

20 p3682 A70-40017

Multimegawatt quasi-steady MPD arc accelerator in millisecond pulses, noting applicability to experiments requiring long exposure times

[AIAA PAPER 70-1095] 20 p3683 A70-40241

Composite accelerator electrodes on Cs bombardment microthrusters, testing various designs and electrode coatings

[AIAA PAPER 70-1089] 20 p3693 A70-40246

Plasma accelerators for nuclear EM propulsion, considering power supply requirements and differences between plasma and ion engines

22 p4070 A70-43186

Eroding-dielectric plasma accelerators energy characteristics, discussing current distribution

22 p4083 A70-43387

Extremely high temperature deuterium examination, using coaxial plasma accelerators to determine neutron production and vorticity

23 p4227 A70-44452

PLASMA ARC SPRAYING

U ARC SPRAYING

U PLASMA SPRAYING

PLASMA ARC WELDING

Plasma beam welding of light metal and heat resistant alloys, discussing weld characteristics, beam I-V characteristics, etc

09 p1690 A70-22077

Plasma arc welding torches nozzle dimensions and shape dependence on thermal and electrical characteristics, optimizing energy output

22 p4042 A70-42378

PLASMA ARCS

U PLASMA JETS

PLASMA CHEMISTRY

Streamline thermal plasma chemistry, reviewing diagnostic techniques and product oriented research

14 p2545 A70-30905

PLASMA CLOUDS

Needle-shaped filament artificial ion cloud drift and diffusion in F1 region plasma in presence of neutral wind and uniform electric field

01 p0070 A70-10401

Thermal and dynamical evolution of gas clouds in transparent and opaque stages by comparing rates of cooling, heating, contraction and expansion

05 p0907 A70-16041

Large scale artificial plasma cloud experiments for magnetosphere, solar wind and cometary physics, discussing Ba ion and ice clouds released by satellites

[AIAA PAPER 70-33] 06 p1145 A70-18183

Atmospheric thermodynamic properties determined from radar studies of detonation waves from cesium-seeded explosive bursts in lower ionosphere

06 p1012 A70-18542

Expansion and deceleration of rocket-released artificial ion cloud in terms of snowplow expansion model and drag deceleration

07 p1271 A70-20159

Magnetic funneling model proposed for accretion of matter onto neutron star to study X ray production during motion through interstellar cloud

10 p1931 A70-23902

Monograph on ambipolar diffusion and motion instability of satellite produced artificial barium ion clouds in ionosphere and magnetosphere

11 p2048 A70-26825

Plasma experiments in space including electric fields measurement, collisionless plasma studies and artificial Ba cloud generation

12 p2214 A70-26868

Barium ionic cloud formation under action of sunlight and expansion in terrestrial magnetic field using plasma model

12 p2214 A70-26892

Electromagnetic wave scattering from atmospheric ellipsoidal plasma formations, using arbitrary permittivity and magnetic permeability tensors

13 p2366 A70-29376

Signal decoder for barium USA Germany /BUG/ project command reception system, discussing Ba ion cloud propagation and expansion along geomagnetic field

13 p2367 A70-29557

Solar radar echo characteristics, discussing coronal compressional waves and refraction by plasma clouds and moving plasma irregularities

13 p2370 A70-29852

Auroral and polar cap ionospheric electric fields and tensor conductivity elements using ion clouds data of Ba release experiment

13 p2402 A70-30080

Many body correlation and conditional probability functions of plasma shield clouds surrounding test particles

14 p2623 A70-31034

Spherical ionized cloud movement in ionosphere uniform anisotropic plasma as function of electric field applied to rocket released ion clouds

15 p2726 A70-31867

Barium ion clouds striation formation above E layer ascribed to LF gradient drift instability

15 p2727 A70-31908

Striation formation in artificial ion clouds aligned with local geomagnetic fields, considering visual indi-

cation of ionospheric electric field transferal along magnetic field

19 p3415 A70-38387

Moving type 4 solar burst on 1 March 1969 observed at 80 MHz, discussing plasma cloud associated with prominence

21 p3880 A70-40967

Solar wind free electron number density measurement by Pioneer 6 spacecraft after solar proton flare, constructing plasma cloud models

21 p3881 A70-41079

PLASMA COMPOSITION

Cs seeding effect on bound-free UV photoabsorption of Cs-H plasma at constant electron density and energies below H ionization

02 p0343 A70-11904

Stellar configurations of cold static neutral plasma consisting of nuclei and degenerate electron gas, calculating integral parameters by Newton gravitation theory

07 p1376 A70-18912

Cesium plasma composition as equilibrium mixture of ideal gases assuming chemical equilibrium attainable by specified reactions

07 p1349 A70-19660

Steady state spherically symmetrical ejection of multicomponent plasma from sun determined with hydrogen approximation, considering ion composition

07 p1391 A70-20418

Solar wind properties and helium abundance determined from satellite-borne electrostatic analyzers

09 p1746 A70-23482

Dynamics of multicomponent plasma involving charged or neutral gases with transport phenomena for case of no magnetic field

09 p1738 A70-23580

Helicon wave dispersion in cold multicomponent plasma of n-type Si and Ge semiconductors in linear hydrodynamic approximation

10 p1928 A70-24832

Stationary and nonstationary nonlinear waves propagation in multicomponent collisionless plasma, considering dispersion relations for acoustic oscillations

10 p1844 A70-25166

Gas mixture plasma ionized and heated by discharge and ejected into vacuum, considering nonequilibrium ionization calculation with gap between electron and heavy particle temperatures

11 p2092 A70-26732

Reciprocity principle for biased and two component compressible plasmas

12 p2282 A70-27971

Cesium plasma composition as equilibrium mixture of ideal gases, assuming chemical equilibrium attainable by specified reactions

15 p2781 A70-32697

Photoresonant cesium plasma ionization, discussing pumping spectra, electron gas, molecular-atomic ion ratio and dynamics

19 p3474 A70-37440

Equilibrium compositions of helium-nitrogen, argon-nitrogen and xenon-nitrogen plasmas at atmospheric pressure between 5000 and 35,000 K

19 p3552 A70-37831

Electron-neutral interaction parameters for Ohm law coefficients in multicomponent nonisothermal plasmas tabulated as function of electron temperature

22 p4081 A70-43015

Collision integral model for multicomponent mixture, investigating partially ionized plasma longitudinal vibrations

22 p4083 A70-43382

PLASMA CONDUCTIVITY

Equilibrium state of high current discharge in low conductivity plasmas, obtaining light sources at low temperatures

01 p0152 A70-10993

Nonequilibrium potassium seeded Ar plasma electrical conductivity at atmospheric pressure, noting current density role

02 p0347 A70-12232

HF electromagnetic field penetration of plasma with finite conductivity and Hall constant for containment of hot plasmas, formulating nonlinear electrodynamic problem

05 p0889 A70-16490

Electrical conductivity calculation for plasma in spatially inhomogeneous magnetic field using small-gyroradius approximation to kinetic equation

05 p0889 A70-16491

HF conductivity tensor of isotropic plasma, taking into account particle correlations describing weakly Langmuir turbulent plasma

05 p0889 A70-16532

Ohms law of electromagnetohydrodynamics derived on basis of Lorentz hydrodynamic plasma model, considering plasma conductivity

05 p0890 A70-16852

Electrical conductivity of collisionless magnetoplasma in weakly turbulent magnetic field, using quasi-linear approach for diffusion equation for distribution function describing test particles

07 p1352 A70-19987

Induced current density of fully ionized stationary plasma in externally applied HF electric field, discussing frequency range of fluctuations

07 p1352 A70-19988

Electrical conductivity of fully ionized plasma in strong magnetic field computed as application of method for plasma transport coefficients

07 p1354 A70-20246

Plasma finite DC resistivity quantum theory, considering electron-molecule collisions energy absorption, noise generation, etc

08 p1551 A70-21099

Axisymmetric instabilities by Z-pinch and reverse axial current discharges in plasmas of arbitrary conductivity

08 p1554 A70-21810

Feedback stabilization of surface instabilities of highly conducting plasma, discussing application to linear pinch with uniform axial static magnetic field

09 p1734 A70-22272

Plasma conductivity measuring device using phenomenon of change of coil induction in electromagnetic field

09 p1737 A70-23380

Small loop impedance in magnetoplasma determined for magnetic field normal and parallel to loop plane

09 p1738 A70-23671

MGD model of plasma with dissipation due to finite electrical conductivity described by differential equations

10 p1922 A70-24144

Nonequilibrium plasma MHD generator critical pressures determination, applying electron energy balance equation and relation between plasma conductivity and Hall parameters

10 p1809 A70-25142

Thermal conductivity of argon, nitrogen and air plasmas at atmospheric pressure and 6500-16500 K range, discussing electric arc source

11 p2148 A70-25760

Cylindrical shock wave two dimensional propagation in conducting plasma in magnetic field, assuming isentropic flow along streamline

11 p2091 A70-26174

Electromagnetic inductive shock tube design and wave velocity, electron temperature and plasma conductivity measurements

12 p2206 A70-27400

Impurities and electrothermal instabilities effect on conductivity of two temperature nonequilibrium plasma

12 p2281 A70-27846

RF method for recording temperature dependence of electrical conductivity of solids, liquids and multicomponent plasma mixtures

13 p2459 A70-28583

Electromagnetic shock tube demonstrations of electrode spark breakdown, strong shock behavior, plasma conductivity and hypersonic shock flow over blunt body

13 p2404 A70-28623

Electrical conductivity of partially ionized gas in magnetic field by Frost mixture rules extension

17 p3141 A70-34985

Microwave diagnostics of plasma temperature and conductivity in streaming nitrogen arc with skin effect under atmospheric pressure

19 p3476 A70-37554

Equilibrium homogeneous steady state highly ionized non-Debye plasma for investigation of electrical conductivity, viscosity, dynamic properties, etc

19 p3480 A70-38183

Inhomogeneous nonequilibrium plasma stratification in magnetic field, investigating electrical conductivity

19 p3481 A70-38191

MHD instability of homogeneous inviscid plasma with finite electrical conductivity and anisotropic pressure, obtaining dispersion equation for model

20 p3677 A70-39048

Nonequilibrium plasma stability, conductivity and Hall parameter influenced by current flow parallel to magnetic field, discussing Ar-Cs and He-Cs plasma data

20 p3682 A70-40019

Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream

20 p3684 A70-40259

Electromagnetic wave propagation in colloidal plasmas analyzed by kinetic approach, obtaining expressions for current density, DC and microwave conductivities, etc

20 p3685 A70-40502

MHD generators nonequilibrium ionization improvement by blowing low work function particles into cold working gas to obtain required conductivity

21 p3855 A70-40794

Collisionless magnetospheric plasma turbulent conductivities for weak and strong electric fields parallel to magnetic field

22 p4016 A70-42787

Geomagnetic perturbation effects on conduction along field lines and short period fluctuations associated with plasma turbulization in magnetosphere

23 p4189 A70-44065

Scaling laws for turbulent plasma anomalous conductivity dependent on electrostatic fluctuation spectrum

23 p4227 A70-44796

Semiconductors with bipolar conductivity under electron-hole scattering, calculating plasma pinch effect on I-V characteristics

24 p4390 A70-45659

PLASMA CONFINEMENT

U PLASMA CONTROL

PLASMA CONTROL

Plasma accumulation between mixed field accelerator and pulsed magnetic mirror, noting duration and stability

02 p0346 A70-12104

Magnetic flux trapping experiment with Al conductor, showing decay time constant connection with sunspot theory

02 p0299 A70-12393

Ceramic plasma containers construction by soldered seal technique for ion lasers, noting moly- manganese process

02 p0314 A70-12746

Steady state deuterium-tritium fusion reactor approximate parameters prediction possibility based on interim assumptions of plasma confinement, model, etc

02 p0349 A70-12755

Tokamak-type magnetic configurations application to thermonuclear reactor, discussing equilibrium and stability parameters minimum values, operating pattern and heating method

02 p0349 A70-12756

Saturation of linear or nonlinearly/explosively/ unstable HF electrostatic flute modes in mirror confined plasma

03 p0529 A70-13005

Cs plasma research, discussing Q-machines, plasma confinement, magnetic field experiments, LF and HF wave propagation, etc

03 p0533 A70-14015

Plasma nature, properties and applications, discussing echoes, shocks, phase mixing and hot plasma containment

05 p0887 A70-16130

Quasi-linear mode coupling in confined hot-ion Penning discharge plasma, discussing externally imposed excitation and internally generated oscillations

05 p0888 A70-16166

HF electromagnetic field penetration of plasma with finite conductivity and Hall constant for containment of hot plasmas, formulating nonlinear electrodynamic problem

05 p0889 A70-16490

Plasma resonances, considering unbounded and bounded uniform and nonuniform plasmas and nonlinear effects

06 p1116 A70-17365

Remote feedback suppression method for plasma collisional drift instability using modulated microwave irradiation, describing linear heating mechanism theory

06 p1122 A70-18014

Soviet collection of papers on magnetic traps covering chamber walls effect on plasma heating, plasma in mirror trap and self sustained fusions

07 p1350 A70-19844

Magnetic trap chamber walls adverse effect on plasma heating produced by electron beam injected at low hydrogen pressures

07 p1350 A70-19845

Electron clouds injection and containment by magnetic field in toroidal vacuum chamber, studying causes of cloud instability

07 p1353 A70-19994

Plasma density measurement by LC tank circuit with plasma contained in induction coil, deriving expressions for circuit resistance and resonant frequency

08 p1550 A70-20846

Plasma sheath in quadrupole and hexapole geometries, investigating magnetic field variation, particle density and electrostatic potential in transition layer

08 p1552 A70-21530

Plasma containment by spherical multipole magnetic trap, discussing injection and trapping of gun-produced plasma

08 p1553 A70-21609

Guiding center plasma theory, obtaining stability criteria from charged particle motion equations considerations

10 p1926 A70-25250

Unsteady plasma oscillation stabilization by envelope controller with spatial and temporal dispersion

11 p2087 A70-25604

Plasma energy confinement time as function of discharge parameters for plasma thermal insulation in Tokamak-3

11 p2088 A70-25713

Electrostatic wave propagation and growth rate in electron beam inhomogeneous plasma confined by magnetic field 11 p2091 A70-26460

Plasma equilibrium in stellarator type magnetic trap /vintatron/ with magnetic configuration created by strong longitudinal field 12 p2277 A70-27313

Feedback stabilization and mode coupling of ionization waves in positive column discharges, noting dynamic stabilization of unstable bounded plasma systems 12 p2280 A70-27787

Stable auroral red /SAR/ arc alignment-movement relationship, suggesting dominant local time control 13 p2397 A70-29193

Collisionless plasma confinement using spatially uniform time varying magnetic field 14 p2624 A70-31100

Plasma containment in adiabatic magnetic traps, discussing particles, Coulomb collisions, instabilities, cyclotron resonance masers, Van Allen belts, etc 16 p2958 A70-33232

Surface oscillations energy and attenuation in damped spectral region of semibounded degenerate electron plasma 18 p3293 A70-36143

Magnetic mirror confined plasmas, solving Fokker-Planck equation 18 p3296 A70-36795

Energy loss of fast protons in cold Li plasma confined by magnetic field, using precession around axis to develop large interaction length 19 p3474 A70-37364

Laser-produced plasmas production and containment, studying expansion in uniform magnetic field and charge quantity as power density function 19 p3444 A70-37535

Conical plasma gun with Z pinching restrained by axial magnetic field, describing operating characteristics 19 p3480 A70-38018

Nonuniform electron plasma trapped in one dimensional potential well, determining linear oscillations by normal mode approach 19 p3482 A70-38944

Pair correlations effect in equilibrium and nonequilibrium theory, taking Coulomb collisions into account for ionized plasmas confined to half space by reflecting boundary 20 p3679 A70-39662

Transport coefficients of inhomogeneous magnetized bounded and unbounded plasmas based on quasi-linear approximation 21 p3857 A70-41385

Nuclear fusion reactor spacecraft propulsion system using ion rocket with charged deuterium nuclei fuel, emphasizing nuclear plasma confinement problem 21 p3867 A70-41498

Nonequilibrium flow adjacent to cooling tube wall confining cascade arc plasma electrical discharge 21 p3805 A70-41763

Dynamic potentials equations of guided electromagnetic wave propagating in laterally bounded plasma along magnetic field axis 21 p3860 A70-42005

Plasma injection and confinement in closed quadrupole magnetic trap 22 p4083 A70-43388

High density plasmas production and containment in theta pinch device, discussing shock and Joule heating 23 p4225 A70-44186

Critical Hall parameter for linear development of MHD electrothermal instability in bounded nonequilibrium plasma 23 p4227 A70-44555

Electron runaway suppression in fully ionized Lorentz plasma by crossed magnetic and electric fields 24 p4382 A70-45105

Plasma heated by cyclotron resonance using waveguide method, considering properties, confinement conditions and instabilities 24 p4385 A70-45453

Plasma confinement in min-B configuration of linear multiple with mirrors, attaining additional stabilization via linear rods carrying unidirectional current 24 p4386 A70-45612

PLASMA CYLINDERS

Oblique unsteady shock wave structure propagating at large Mach numbers in plasma cylinder under steady magnetic field, showing particle velocity profile discontinuity 01 p0064 A70-10999

Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening 01 p0153 A70-11589

Cylindrical axial plasma flow fields velocity radial dependence measurement by double-wedge spectroscopy using Abel unfolding of Doppler shifts 02 p0349 A70-12657

Measurement techniques for determining density and temperature distributions along radius of plasma cylinder by electron cyclotron resonance, microwave refraction and acoustic resonance 02 p0349 A70-12758

Electric potential fluctuations beyond long collisionless plasma cylinder in uniform magnetic field, noting thermal noise intensity 03 p0530 A70-13086

Electromagnetic wave propagation through stratified positive plasma column in waveguide, noting stratification travel effects on wave amplitude and phase shift 03 p0443 A70-13096

Surface wave attenuation in homogeneous plasma cylinder caused by resonance in transition layer between plasma and vacuum 03 p0447 A70-13286

Photon absorption and emissivity of nonequilibrium cylindrical plasma in Doppler broadened lines and hemisphere approximation 04 p0724 A70-14411

Magnetized resonantly sustained HF plasma column wave properties, obtaining above-critical density as function of static magnetic induction 04 p0728 A70-14999

Electrostatic oscillations in cylindrical column of laboratory plasmas excited by electromagnetic waves, investigating resonances by cold plasma theory 06 p1116 A70-17368

Inhomogeneous plasma cylinder skin effect, surface impedance, radiation transport and mean noise temperature 07 p1347 A70-19107

Ion acceleration in spherical and cylindrical plasma layers formed by spherical plasmoid expansion in plasma cylinders 07 p1384 A70-19414

Plane electromagnetic wave scattering by perfectly conducting cylinder coated with moving dielectric or plasma sheath, using relativity theory, Lorentz transformations, etc 08 p1551 A70-21251

Free plasma column discharge in HF field in high pressure deuterium atmosphere, discussing high plasma temperature inside column and reliable thermonuclear reaction achievement 08 p1551 A70-21417

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics 08 p1554 A70-21802

Microwave-induced ionization oscillations in resonant plasma column excited by low pressure mercury DC discharge 10 p1922 A70-23988

Nonlinear wave interactions in quiescent plasma column with external disturbance creating broadened frequency spectrum and weakly turbulent plasma 10 p1922 A70-24146

Fast magnetoacoustic wave propagation in cylindrical plasma column with constant current density, using geometric optics 10 p1923 A70-24229

Plasma column dynamic stability breakdown in quadrupole HF magnetic field in terms of violating stability criterion for long wave deformation 10 p1926 A70-25109

Hydromagnetic flute and surface wave instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization 10 p1926 A70-25117

Hall effect influence on HF traveling magnetic field penetration into solid cylinder plasma device compared to magnetically contained plasma 11 p2088 A70-25712

Tonks-Dattner resonances in plasma columns, considering viscosity effect on radial oscillations in nonuniform plasmas 12 p2281 A70-27792

Finite amplitude stability of plasma column in weakly ionized gases and in semiconductor plasmas in longitudinal magnetic field 13 p2458 A70-28566

Electromagnetic waves extraordinary mode scattering by small diameter nonuniform plasma column in magnetic field 13 p2460 A70-28644

Energy loss radial dependence due to K resonance radiation for infinitely long plasma cylinder, using approximation method for integrals 13 p2461 A70-28731

Electron temperature and concentration determined from longitudinal electron cyclotron harmonic waves in finite plasma column 13 p2467 A70-29916

Coupled temperature and electric potential distribution in finite rotational symmetric hydrogen arc column in axial magnetic field 14 p2621 A70-30656

Plasma cylinder surface drive current buildup, using theta pinch two dimensional model 14 p2624 A70-31049

Incident microwave signal in Tonks-Dattner resonance coupled to discrete LF modes in plasma column 15 p2778 A70-31756

Glass tube surrounded nonuniform plasma column interaction with TM microwave field of cylindrical cavity for electron density measurements 15 p2780 A70-32347

Resonance excitation of high amplitude waves in plasma cylinder by HF azimuthal axially periodic current flowing through coil encircling plasma 16 p2957 A70-33194

Collision dominated plasma column radial structure including ambipolar diffusion region obtained from constant mean free time and path approximate formulas 16 p2959 A70-34311

Multiple narrow beam antenna system with plasma column and electromagnetic wave ring source, discussing radiation pattern and electronic scannability 18 p3294 A70-36346

Ion density and electron temperature variations as function of maximum electric field density in independently excited plasma column striations 19 p3475 A70-37552

Helium plasma ionization rate in positive column with DC discharge, considering gas pressure, electron density, electric field strength and plasma radius 19 p3476 A70-37559

Stationary DC discharge positive column in helium, determining production balance and loss of charge carriers 19 p3476 A70-37560

Plane EM wave diffraction in cylindrical plasma-electron beam system 19 p3378 A70-37740

Hydromagnetic flute and surface waves instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization 20 p3685 A70-40510

Slow and fast ionization waves in inert gas or molecular gas plasma columns, describing striation formation in neon discharge by hydrodynamic equations 22 p4079 A70-42371

Gas discharge positive column finite length effect on wave dispersion and instability, indicating critical magnetic field 22 p4079 A70-42374

Ion and electron ambipolar velocity distribution near plasma sheath boundary in collisional positive column 22 p4080 A70-42542

Magnetosonic resonance excitation in waveguide winding wrapped around plasma cylinder 22 p4082 A70-43380

Supersonic convective electric arcs with magnetic stabilization in sulfur hexafluoride, examining aerodynamic drag and plasma column slanting 23 p4227 A70-44554

Dipolar resonant scattering of H-polarized plane waves by axially magnetized plasma column with perfectly conducting core 23 p4228 A70-44977

German monograph on thermal and nonthermal phenomena in quasi-stationary convectionless plasma arc column, using 13-moment approximation for Boltzmann equation 24 p4382 A70-45089

Quasi-homogeneous approximation validity for electron velocity distribution function disturbance in gas plasma column ionization waves discharge involving high currents 24 p4386 A70-45794

Plasma positive column impedance in low current noble gas discharges, using Boltzmann equation for electrons 24 p4387 A70-45796

PLASMA DECAY

Wave-wave coupling of two HF electromagnetic waves launched into warm plasma across constant confining magnetic field, using Maxwell-Vlasov equations for electrons 02 p0349 A70-12757

Maximum plasma decay rate in heterogeneous medium determined from deionization process in rarefied gases 03 p0536 A70-14369

Upper cesium levels population inversion during cesium discharge plasma decay 08 p1550 A70-20848

Electron temperature and concentration in decaying He and Ar plasmas with cesium vapor additions 11 p2092 A70-26733

Resonant and nonresonant coupling between two coherent electron plasma waves propagating in opposite directions, considering parametric decay 12 p2279 A70-27780

Plasmon decay by neutrinos emission in strong magnetic field, examining parallel and perpendicular propagation 18 p3305 A70-35936

HF oscillations excitation in decaying plasma-electron beam system, noting Coulomb collisions and nonlinear effects role

18 p3294 A70-36145

Fully ionized magnetized rotating plasma interaction with neutral gas blanket, discussing plasma decay and velocity field

19 p3481 A70-38489

PLASMA DENSITY

Plasma density and electroacoustic resonance effects on coupled cylindrical antennas self and mutual impedances measured in Hg-arc discharge

01 p0050 A70-10461

Stable geomagnetic pulsations related to plasma density shock position in magnetosheath and to magnitude of diurnal variations

01 p0082 A70-11508

Plasma electron temperature and density in Tokamak T3 toroidal discharge measured by Thomson scattering of laser light

02 p0346 A70-12199

Time resolved cavity perturbation technique to measure high plasma density in magnetic mirror compression experiment, obtaining total electron number

02 p0347 A70-12236

Recombination instabilities in plasmas and gases undergoing density changes through volumetric processes, solving linearized and nonlinear cases by simplified fluid mechanics equations

02 p0348 A70-12238

Measurement techniques for determining density and temperature distributions along radius of plasma cylinder by electron cyclotron resonance, microwave refraction and acoustic resonance

02 p0349 A70-12758

Nonisothermal plasma perturbed by supersonic body, studying plasma rarefaction and condensation cones, particle density, etc. in wake

03 p0407 A70-13413

Accumulated plasma density and lifetime measurement of trapped ions between accelerator and periodic magnetic mirror, showing limitation by collisions and charge exchange

03 p0532 A70-13683

Plasma jet temperature and density determination from intensity ratio of H beta line and continuous spectrum

04 p0725 A70-14535

Electron plasma frequency exchange corrections temperature dependence at high densities, using equation of motion for coupled particle-hole pair operators

04 p0727 A70-14714

High density nonlinear and linear growth rates of flute modes instabilities in cold plasma coexisting with low density of energetic electrons

04 p0728 A70-14998

Magnetized resonantly sustained HF plasma column wave properties, obtaining above-critical density as function of static magnetic induction

04 p0728 A70-14999

Plasma camera photographs of K plasma spatial distribution with electric fields and density gradients perpendicular to magnetic field, observing rotating irregularities around edge

04 p0728 A70-15005

Nonequilibrium Cs plasma electron density, temperature and sustaining field using theoretical analysis and probe measurements

05 p0887 A70-16108

Stably trapped magnetospheric plasma distribution determined from Pi2 micropulsations and auroral electrojet index AE

05 p0839 A70-16285

Coupling between LF oscillations and third harmonic frequency resonances of bounded plasma capacitor system, discussing density profile variation

05 p0890 A70-16654

Transmission and emission of radiation from dense inhomogeneous finite laboratory plasma column in magnetic field with interpretation by cold plasma theory

06 p1116 A70-17367

Impedance and radiation pattern of quarter wave monopole and half wave dipole antennas in isotropic plasma, considering plasma density role

06 p1117 A70-17372

Pulsed dense argon plasma arcs radiation spectra in visible and UV regions as function of current and pressure

07 p1349 A70-19652

Plasma properties produced in mirror magnetic trap by electron beam determined during transition from hot electron dense plasma into cold electron low density plasma

07 p1350 A70-19846

Emission containment and working temperature reduction possibility in thermonuclear reactor by increasing plasma densities and introducing large atomic number contaminants

07 p1350 A70-19847

Self sustained fusion reaction in dense deuterium-tritium plasma, considering large atomic number contaminants optimal concentration calculations

07 p1351 A70-19848

Relaxation time calculation for ground and excited states of H atoms and H-like ions in optically thin and thick plasmas, considering electron density role

07 p1353 A70-20058

Plasma concentration in nondipole magnetosphere model from Pc 5 pulsations periods for high geomagnetic latitudes, noting solar winds effect

07 p1277 A70-20443

Plasma density measurement by LC tank circuit with plasma contained in induction coil, deriving expressions for circuit resistance and resonant frequency

08 p1550 A70-20846

Laser interferometric technique involving use of unstable external resonator to facilitate electron density measurements in presence of transverse plasma density gradients

08 p1499 A70-21693

Laser radiation absorption in xenon plasma, noting dependence on intensity due to atoms ionization

08 p1554 A70-21803

Plasma electron density determination by number of extreme resolved line, considering broadening action by Doppler effect for Balmer, Lyman and Paschen series

09 p1734 A70-22731

Stark broadening of singly ionized nitrogen lines measured in dense high temperature plasma behind reflected shock wave in T tube

09 p1731 A70-22776

Plasma electron density errors in measurement by microwave interferometers, noting effects of inaccurate phase shift determination

09 p1738 A70-23634

Geomagnetic pulsations /pc 4/ characteristics from analyzing magnetosphere model yielding plasma densities consistent with experimental data

10 p1875 A70-24483

Stationary low pressure plasma enclosed in emitting surfaces calculated for spatial charge density distribution

10 p1923 A70-24539

Plasma cumulation, with and without shell under concentric pressure impulse using perfect gas theory, estimating critical parameters

10 p1926 A70-25322

Wind shear caused ionospheric E region irregularities investigated by horizontal plasma density gradients determination

11 p2045 A70-25652

Seeded dense plasma-electrode system behavior, studying effect of adsorption and emission from boundary surfaces

11 p2090 A70-25952

Plasma density and velocity required for simulating solar wind flow over magnetosphere (bow shock) in plasma wind tunnel

11 p2032 A70-26372

Homogeneous plasma turbulence growth limits, determining bounds on density and electromagnetic field nonlinear fluctuations in thermodynamic terms

11 p2096 A70-26767

Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory

12 p2278 A70-27327

Collisional drift-wave turbulence in Li Q-machine plasma far unstable regime, discussing power spectra variations of density fluctuations

12 p2280 A70-27784

Density gradient drift waves stabilization in collisionless plasma by stellarator type windings, observing oscillations amplitude reduction in shear magnetic field

12 p2280 A70-27785

Coulomb interaction effect on diffusion of plasma produced by contact ionization in magnetic field, obtaining density profiles by iterative procedure

12 p2280 A70-27789

Magnetospheric plasma density effects on impedance of VLF electric field spacecraft antenna

13 p2397 A70-29186

Solar wind turbulence, demonstrating radio source interplanetary scintillation consistent with plasma density correlation

14 p2642 A70-30888

Adiabatic relation between initial plasma density perturbations and radiation temperature fluctuations during galaxies formation, discussing relic radiation fluctuations

14 p2632 A70-31286

Ultrahigh speed camera with high optical resolution for dense plasma diagnosis

14 p2590 A70-31407

Plasma concentration measurement in coaxial accelerator, using gas laser and multiple wave interferometer in vacuum chamber

15 p2781 A70-32858

Probe measurements in Cs plasma formed by contact ionization with hot wire for density, electron temperature and space potential

16 p2958 A70-33624

Collisions effects on ion collection by Langmuir probes, determining plasma density

17 p3139 A70-34494

Langmuir probe position-dependent ion flow effects on plasma density measurement in low pressure mercury discharge

17 p3083 A70-34995

Magnetized plasma electron density measurement by laser self heterodyne

17 p3141 A70-34996

Ar plasma generation by focused Q switched ruby laser beam, measuring density and temperature by electro-optical spectroscopy

17 p3107 A70-35111

Type 2 irregularities in equatorial electrojet associated with plasma density vertical gradients

18 p3244 A70-36017

Miniature multigrid probes for measuring energy spectra of charged particles and absolute plasma densities, comparing results to microwave measurements

18 p3294 A70-36150

Magnetospheric plasma concentration from geomagnetic pulsations periods

19 p3409 A70-37320

Laser radiation and solid target interaction, calculating temperature and plasma density as function of intensity

19 p3447 A70-38166

Dense plasma thermodynamic and electromagnetic properties, discussing correlation energy

19 p3480 A70-38181

Steady electric field effect on dense plasma cyclotron instability

20 p3678 A70-39595

Spectral lines self rotation effects on plasma temperature and density measurement in MHD duct boundary layer

20 p3678 A70-39632

Gaseous neon plasma positive column electrons density and drift velocities measurements by Langmuir probe technique

20 p3683 A70-40163

Solar corona current free magnetic field distribution relationship to plasma density structure

20 p3712 A70-40415

Electron temperature measurements in flowing high density plasma by cooled Langmuir probe, considering probe temperature variations effects in boundary layer

21 p3854 A70-40557

Nonrelativistic electron bremsstrahlung in dense plasma with strong magnetic field

21 p3855 A70-40721

Extended homogeneous stationary field-free spherical plasma source, including radial density measurement with Langmuir probe in argon

21 p3805 A70-41463

Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory

21 p3860 A70-42068

Low density plasma in region of orbital-motion-limited /OML/ currents in presence of cylindrical Langmuir probes

22 p4078 A70-42360

Superimposed external DC magnetic field effect on electrodeless HF plasma density, discussing electron cyclotron waves resonance excitation and plasma electron energy gain

22 p4079 A70-42364

Neutron-electron collision damping and displacing of space echo in plasmas, indicating use for density measurement

22 p4082 A70-43244

Magnetoplasma density modulation from LF and amplitude magnetic perturbations, using collisionless Boltzmann transport equation

22 p4082 A70-43255

Solar X-ray data from rocket and satellites, discussing hot dense plasmas and correlation with H alpha flares, calcium plages and microwave emission

22 p4096 A70-43300

Solar wind flux correlation with earth EM field pulsations, noting flare-generated shock front effects on magnetosphere

23 p4236 A70-44051

Meteor trails isotropic diffusion in presence of moving point source of ionization with variable intensity, calculating plasma density on and near trajectory

23 p4240 A70-44084

High density plasmas production and containment in theta pinch device, discussing shock and Joule heating

23 p4225 A70-44186

Low beta surface ionized rotating streaming plasma column, determining low magnetic field effects on density and stability

23 p4229 A70-44988

Quasi-ambipolar diffusion in arc discharges in magnetic field, calculating ions and electrons density distributions between anode and cathode sheaths

24 p4384 A70-45148

Temperature, densities and electric field strength of cascaded arcs burning in He under normal pressure

24 p4384 A70-45425

Plasma concentration and heavy particle-electron collision frequency in open cylindrical cutoff resonator

tor based on frequency shift and passband broadening data 24 p4385 A70-45455

Density correlation measurements for diffusion coefficient in magnetized He plasma 24 p4386 A70-45614

PLASMA DIAGNOSTICS

Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls/dispersion 01 p0084 A70-11554

Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening 01 p0153 A70-11589

Plasma velocity, electron temperature and density and ion density determined by two mutually perpendicular probes 03 p0529 A70-12940

Supersonic plasma jets studied spectroscopically, determining atomic levels populations, population inversion conditions, electron temperature and concentration distributions, etc 03 p0531 A70-13254

Plasma optical transparency criterion, estimating nonequilibrium plasma layer optical density limit 03 p0531 A70-13255

Earth magnetosphere low energy plasma measurements via McIlwain magnetic shell parameter, showing dependence on geomagnetic disturbances 03 p0557 A70-13284

Nonequilibrium cesium plasma of low voltage arc discharge, measuring electron temperature and distribution function and diffuse-series excited level populations 03 p0532 A70-13740

Electron temperature of hydrogen-oxygen flame plasma obtained by floating probe method compared to spectroscopic method results 03 p0608 A70-14380

Microwave spherical resonator and reentrant cavity as diagnostic tools to obtain discrete point data along plasma column compared with cylindrical cavity 04 p0696 A70-15650

Charge carriers recombination and diffusion coefficients for confined gas discharge plasma obtained from data on radial particle distribution profile 05 p0888 A70-16330

Slide rule for calculating electron number density, Debye length and Debye sphere particles in plasma parameters determination 05 p0852 A70-16847

Diagnostic methods for field-free plasmas with medium dispersed optical-spectrographic and source monitoring equipment 06 p1063 A70-17728

Spectroscopic quantitative diagnostics of high density plasma sources encountered in aerospace applications and chemistry 06 p1063 A70-17729

Uranium plasma design and characteristics, measuring emission and absorption coefficients as function of temperature and pressure [AIAA PAPER 70-43] 06 p1122 A70-18084

Magnetosphere and interplanetary space diagnostics by micropulsations analysis, discussing geomagnetic cavity boundary, cold plasma density, energetic particles, etc 07 p1264 A70-19191

Circumsolar plasma structural inhomogeneity origin 07 p1384 A70-19418

Plasmatron generated rarefied helium plasma parameters in external magnetic field using hot-wire anemometer Langmuir probe 07 p1349 A70-19653

Plasma properties produced in mirror magnetic trap by electron beam determined during transition from hot electron dense plasma into cold electron low density plasma 07 p1350 A70-19846

Intense quasi-steady He plasma discharge stability in magnetic field measured by Langmuir and optical techniques 07 p1354 A70-20321

Solar wind structural characteristics determination from cosmic ray variations in interplanetary medium, considering interplanetary magnetic field structure and spatial orientation 07 p1372 A70-20337

Time dependent electrostatic probe theory relating measurements to internal properties of plasma, calculating free stream ion density from collected electric charge 07 p1289 A70-20466

Rarefied plasma flow past bodies, considering determination of aerodynamic coefficients, charged states, electric and magnetic fields and plasma parameters 08 p1432 A70-21087

Thermal sheaths effect on cooled probes for stationary and flowing plasmas measurements at high pressure 08 p1497 A70-21528

Pulse propagating in unstable plasma, determining characteristics by asymptotic expansion applied to Vlasov-Maxwell equations 09 p1734 A70-22684

Diagnostics of inhomogeneous plane stratified plasma with arbitrary electron concentration distribution, solving differential equation for electromagnetic wave propagation normal to plasma layers 09 p1735 A70-23160

Transient partially ionized plasmas observation by two wavelength holographic interferometry, describing electron density measurements 09 p1736 A70-23186

Laser-produced Al plasmas linear and nonlinear behavior, using framing camera and energy absorption measurements to study outermost ion energy increase and luminous front expansion 09 p1736 A70-23187

Electrostatic cylindrical probes applicability to hypersonic flow field diagnostics 11 p2086 A70-25684

Plasma transport properties at temperatures up to 15000 K, considering electrical and thermal conductivity, radiation source strength and viscosity 11 p2089 A70-25759

Microwave power absorption in plasma investigated by transmission cavity excited in TE mode, determining electron density and collision frequency 11 p2089 A70-25841

Modified laser Michelson interferometer for probing highly transient plasmas occurring behind incident shock waves in shock tubes 11 p2052 A70-26369

Inert gas plasma jets diagnostics in accelerator by spectroscopy, determining flow velocities, excitation and gas temperatures 11 p2093 A70-26744

Spectroscopic diagnostics of erosion plasma jets from cylindrical pulsed plasma generator operating in vacuum 11 p2093 A70-26745

Radar interferometry as diagnostic method for remote probing of turbulent plasma 11 p2096 A70-26766

Interplanetary and magnetospheric plasma structures experiments and theory 12 p2298 A70-27060

Laser light investigations of atoms, molecules and plasmas, considering Raman molecular spectroscopy, acoustic phonons interactions and plasma diagnostics by light scattering 12 p2245 A70-27063

Scanning Fabry-Perot interferometer for plasma diagnostics, determining kinetic temperatures 12 p2231 A70-27215

Electron concentration measurement range expansion in plasma by laser interferometer with optical signal phase modulation 12 p2278 A70-27328

Portable low cost shearing interferometer for plasma and flow analysis and instruction aid 12 p2235 A70-27754

Tuned laser radiation to diagnose and enhance local conditions in alkali metal plasma 12 p2281 A70-27793

Plasma diagnostics by high sensitivity holographic interferometry 12 p2235 A70-27794

SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics [AIAA PAPER 69-258] 13 p2473 A70-28515

Nonlinear Vlasov equation treatment by Fourier-Hermite expansion techniques for plasma problems 13 p2457 A70-28556

Mass transfer in electrostatically accelerated plasma, discussing recombination, ambipolar diffusion, electrode sputtering, charge exchange, electron capture and resistance forces effect on acceleration 13 p2461 A70-28862

Rotational and vibrational temperature effects on neutral gas and electron temperature and density in high pressure discharge plasma diagnostics 13 p2462 A70-29129

Magnetosheath plasma measurements by Pioneer 6 during outbound passage in dusk meridian, comparing results with various predictions 13 p2396 A70-29180

Stark broadening of neutral helium line in plasmas for electron densities measurements accuracy, comparing to H beta determined densities 13 p2456 A70-29225

Satellite plasma diagnostics for electric and magnetic fields and fine structure of collisionless shocks in solar wind plasma flows and interplanetary shocks 13 p2481 A70-30069

Wall stabilized arc source for spectroscopic measurements of isothermal plasma at various pressures 14 p2584 A70-30505

Plasma refractive index determination by propagation method allowing simultaneous electron concentration and density measurements by reflected damped wave 14 p2622 A70-30658

Langmuir probe characteristics and field response in low pressure nonstationary plasma diagnostics in weak magnetic field 14 p2623 A70-30785

Streaming thermal plasma chemistry, reviewing diagnostic techniques and product oriented research 14 p2545 A70-30905

Ultrahigh speed camera with high optical resolution for dense plasma diagnosis 14 p2590 A70-31407

Langmuir probe comparison to electron temperature probe measurements of ionospheric electron temperature during rocket flights 15 p2734 A70-31674

RF floating double probe for plasma ionization density and electron temperature 15 p2778 A70-31755

Discharged cleaned surface effect on accuracy and reliability of electron density and temperature measurements by Langmuir probes 15 p2778 A70-31765

Concentric polarization Fabry-Perot duochromator for spectral line displacement measurements applied to ion drifts in hollow cathode plasma 15 p2737 A70-32042

Probe measurements in Cs plasma formed by contact ionization with hot wire for density, electron temperature and space potential 16 p2958 A70-33624

Electrostatic probe measurements of vortex streets growth in plasmas bounded shear flow [AIAA PAPER 70-758] 17 p1319 A70-34493

Plasma diagnostic data from onboard Langmuir probes, reflectometers, antenna VSWR and beacon and telemetry attenuation for blunt body reentry flow field [AIAA PAPER 70-756] 17 p3008 A70-34495

Microwave diagnostic method for amplitude variations of electron density and collision frequency in weakly ionized plasma 17 p3140 A70-34871

Magnetized plasma electron density measurement by laser self heterodyne 17 p3141 A70-34996

Time dependent characteristics of dense argon plasma formed by pulsed lasers, measuring shock wave front velocity with streak camera 17 p3104 A70-35083

Excited atoms transfer mechanism in helium plasma, using He-Ne laser 17 p3106 A70-35102

Plasma opacity measurements using CW He-Ne and Ar lasers as light sources 17 p3106 A70-35107

Pulsed plasmas refractive index measurement by two-wavelength He-Ne laser interferometry, estimating effects of heavy atoms and neutral gas density 17 p3107 A70-35110

Low temperature plasma flow velocity measurements using transit-time technique and high speed filming 17 p3141 A70-35345

Electron concentration distribution over plasma discharge cross section, using interferometry 17 p3142 A70-35732

Vlasov high temperature plasmas numerical analysis, using Hamilton variational principle 18 p3296 A70-36793

Electron temperature and concentration profiles behind shock front from IR emission and absorption simultaneous measurement, applying method to xenon ionization and recombination processes 19 p3402 A70-37443

Microwave diagnostics of electron density, temperature and light emission in self excited moving striations in hydrogen plasma 19 p3475 A70-37553

Stepwise ionization effect on electron distribution, transport and balance coefficients in low voltage low pressure neon plasma 19 p3476 A70-37555

Particle flux diagnostics of nonisothermal low pressure plasma, using corpuscular passive method 19 p3476 A70-37556

Equilibrium homogeneous steady state highly ionized non-Debye plasma for investigation of electrical conductivity, viscosity, dynamic properties, etc 19 p3480 A70-38183

Ionospheric movements measurement methods and data interpretation 19 p3415 A70-38415

Gas discharge in longitudinal magnetic field, investigating instability of diffusion dominated positive column 20 p3677 A70-39112

Surface contaminated Langmuir probe measurements in glow discharge plasmas, discussing errors 20 p3633 A70-40161

Electrostatic plasma probe inverse process I-V properties from current voltage characteristics, improving accuracy and reliability by theory in terms of new variables 20 p3683 A70-40162

Gaseous neon plasma positive column electrons density and drift velocities measurements by Langmuir probe technique

20 p3683 A70-40163

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties

20 p3684 A70-40258

Shock waves formation in rarefied plasma investigated by Thomson scattering of ruby laser light

20 p3643 A70-40388

Passive corpuscular diagnostics of high temperature plasma based on charge exchange neutrals, calibrating stripping chamber

20 p3685 A70-40398

Schlieren method application in plasma diagnostics, obtaining density change of neutral, ion and electron gases

21 p3825 A70-40950

Mach-Zehnder interferometer for plasma diagnostics measurements, discussing optical interference method, fringe shift determination and dispersion equations

21 p3856 A70-41150

Book on electrical probes for plasma diagnostics covering kinetic theory, carrier distribution, current characteristics, plasma resonance, etc

21 p3829 A70-41790

Mass spectroscopy analysis of neutral and ionic population of plasma in carbon dioxide laser gas mixture, discussing collision processes

21 p3838 A70-42006

Low electron temperature plasma measurements by electrostatic planar guard ring probe with floating potential electrode, discussing electronic circuit

21 p3830 A70-42015

Electron concentration measurement range expansion in plasma by laser interferometer with optical signal phase modulation

21 p3860 A70-42069

Charge separated and quasi-neutral solutions of electron heat transfer to spherical body in quiescent nonequilibrium plasma, noting diagnostic applications

21 p3860 A70-42080

Spontaneous emission intensification at 6911 Å in potassium to evaluate plasma local conditions, using low pressure arc and Q switched ruby laser

22 p4049 A70-42359

Uranium plasma diagnostics, measuring emission and absorption coefficients as function of pressure and temperature

22 p4069 A70-42361

Stationary hydrogen RF plasma, using quadrupole mass analyzer for ion composition and extraction study

22 p4078 A70-42363

Carbon dioxide-nitrogen He discharge gas temperature measurements involving plasma refractivity determination by interferometer

22 p4049 A70-42366

Plasma diagnostics by two-beam optical interferometry and holographic techniques, discussing plasma parameter spatial distribution recording insensitivity to radiation and variable-sensitivity interferometry

22 p4079 A70-42382

Electron energy distribution in time-varying plasmas, using difference quotient circuits for Langmuir probe characteristics measurement

22 p4082 A70-43220

Magnetospheric thermal plasma studies via ground based whistler method, identifying radial and longitudinal irregularities in electron density, bulk motion and plasmaphase position and displacements

22 p4021 A70-43281

Micropulsations as diagnostic tool for magnetospheric research, explaining ULF and VLF results variances

22 p4021 A70-43282

Magnetospheric plasma parameters from ground observation data of Pc-1 type micropulsations, assuming radiation belt plasma cyclotron instability

22 p4022 A70-43283

Magnetosphere storm diagnostics from geomagnetic, auroral and airglow parameters, discussing calibration via satellite observations

22 p4022 A70-43289

Geomagnetic wake in solar wind at 500 earth radii, correlating Explorer 35 and Pioneer 8 data

23 p4184 A70-43828

Ionospheric ion temperature measurements by retarding potential analyzer onOGO-6 satellite

23 p4185 A70-43840

Plasma diagnostics based on light beam refractivity, considering laser interferometry and holographic methods

23 p4225 A70-44188

Hydrogen cluster beam discharges, determining transient plasma ion density from Stark broadening measurements of H beta line

23 p4228 A70-44939

Equatorial E region electrojet plasma irregularities, discussing electron density, drift velocity, profile structure, etc

24 p4384 A70-45150

Magnetic field measurement by laser light scattering intensity fine structure determination in plasma

24 p4353 A70-45567

Plasma jet motion stability in axial magnetic field of stellarator diverter and solenoid

24 p4386 A70-45660

Energy-mass analysis for steady state plasma by electrostatic analyzer and time of flight mass spectrometer, determining ion species temperature and density ratios

24 p4387 A70-45813

PLASMA DIFFUSION

Needle-shaped filament artificial ion cloud drift and diffusion in F1 region plasma in presence of neutral wind and uniform electric field

01 p0070 A70-10401

Charged particle distribution in heterogeneous medium using dispersion model to describe quasi-charged particles interaction with internal surfaces

03 p0536 A70-14370

Plasma turbulence theory formulated using averaging operators, obtaining nonlinear dispersion relation for turbulent diffusion coefficients

03 p0537 A70-14377

Steady, ambipolar, low and high speed plasma transport equations developed for terrestrial ionosphere, discussing boundary conditions for supersonic and subsonic flows

04 p0679 A70-15112

Plasma transport models of polar ionosphere, discussing physical processes involved and effects on electron concentration, ion composition and speeds

04 p0679 A70-15113

Periodic potential probe for diffusive flux to wall measurements in negative glow and back diffusion plasmas

06 p1074 A70-18617

Optical parametric backward-wave instabilities in unbounded medium with stopband dispersion using Fourier-Laplace integral

08 p1552 A70-21595

Turbulent diffusion and ion heating in plasmas in presence of current instability

08 p1554 A70-21813

Current diffusion from magnetic piston into postshock gas upstream observed in electromagnetic shock tube

09 p1736 A70-23185

Beam plasma system instability, studying anomalous diffusion toward vessel walls as function of generated oscillations

09 p1737 A70-23335

Comets ionized shells, studying plasma expansion in corpuscular solar wind magnetic field

10 p1940 A70-24372

Drift dissipative instability of weakly ionized plasma, considering ion motion along magnetic lines in dispersion equation

10 p1923 A70-24407

Field-aligned plasma velocity dependence on plasma diffusion and wind velocity illustrated with model of night F2 layer

10 p1881 A70-24814

Solid state plasma drift velocity effect on helicon propagation constant assuming isotropic momentum relaxation time and effective mass

10 p1928 A70-24831

Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution

11 p2102 A70-26120

Plasma turbulent diffusion across constant magnetic field, noting magnetic, kinetic energy and relaxation times ratio effects

11 p2094 A70-26755

Plasma turbulence spectral theory, considering cascade processes in collisional and collisionless dissipation

11 p2095 A70-26756

Diffusion coefficients measurements in velocity space from ion-ion collisions and ion wave microturbulence, supporting theoretical calculations and diffusion equations in plasma

12 p2279 A70-27777

Drift waves relation to anomalous cross field diffusion in fully ionized magnetoplasmas, introducing model predicting amplitude, correlation time, fluctuation spectrum and diffusion process

12 p2280 A70-27788

Coulomb interaction effect on diffusion of plasma produced by contact ionization in magnetic field, obtaining density profiles by iterative procedure

12 p2280 A70-27789

Frequency modulated RF pulses compression with dispersive property of lossless, isotropic and homogeneous plasma used to enhance receiver transmission resolution

12 p2282 A70-27960

Collision dominated plasma column radial structure including ambipolar diffusion region obtained from constant mean free time and path approximate formulas

16 p2959 A70-34311

Two component fully ionized plasma in HF electric field, demonstrating suppression of runaway electrons in Lorentz plasma

17 p3140 A70-34934

Plasma anomalous diffusion relation to self excited LF oscillations

19 p3480 A70-38016

MHD instability of homogeneous inviscid plasma with finite electrical conductivity and anisotropic pressure, obtaining dispersion equation for model

20 p3677 A70-39048

Gas discharge in longitudinal magnetic field, investigating instability of diffusion dominated positive column

20 p3677 A70-39112

Cylindrical plasma inhomogeneities including meteor trains diffusion in presence of magnetic field, observing dependence on angle theta

21 p3886 A70-41060

Laser torch plasma dispersion gas dynamics from motion and kinetics of ionization processes

21 p3839 A70-42238

Plasma inhomogeneity and drift effects on synchrotron radiation from relativistic charged particles in magnetoplasma

22 p4082 A70-43254

Meteor trails isotropic diffusion in presence of moving point source of ionization with variable intensity, calculating plasma density on and near trajectory

23 p4240 A70-44084

PLASMA DIODES

Hg and Cd seeded Ce plasma wide-spaced diode without external light source investigated for Penning effect on diode performance

10 p1808 A70-25038

Sheath structure of plasma diode using kinetic theory model of plasma-sheath transition

13 p2376 A70-28642

Collisionless alkali plasma diode with two electrodes emitting electrons and ions with half-Maxwellian velocities, analyzing potential distribution

14 p2622 A70-30660

PLASMA DISCHARGES

U PLASMA JETS

PLASMA DISPERSION

U PLASMA DIFFUSION

PLASMA DYNAMICS

Moving plasmas with small angular divergence without guide field produced by modified Ti-washer gun for plasma interaction studies

01 p0054 A70-10109

Magnetic field effects on point Coulomb impurity charge static shielding by quantum electron plasma

01 p0151 A70-10449

Electron distribution function for steady homogeneous plasma of arbitrary ionization degree under strong electric fields, discussing kinetic equations for elastic and nonelastic encounters

02 p0346 A70-12231

Interplanetary plasma inhomogeneity size, shape and spatial orientation and drift velocity and direction determined from radio telescope data

03 p0565 A70-13231

Electrostatic instability criterion for plasma with distribution function having discontinuities and sharp bend at minima

03 p0532 A70-13526

Ionospheric aerodynamics concerning plasma flow and stability, ion motion, radio wave scattering, etc

03 p0479 A70-14386

Discharges in Ar flow in membrane shock tube at Mach 5, discussing plasma compression, shock wave position and effect on electrode region

04 p0725 A70-14534

Rarefied plasma motion in geomagnetic dipole equatorial plane near magnetosphere symmetry axis deriving approximate solution to quasi-hydrodynamic equations

04 p0681 A70-15717

Two dimensional plasma modes involving geometry and velocity spaces, discussing Vlasov equation

05 p0890 A70-17025

Radiation from dipole in dispersive anisotropic magnetized plasmas using Fourier analysis

06 p1116 A70-17363

Interplanetary plasma flow past earth and planets simulation using kinetic equations

06 p1147 A70-18292

Electron beam generated plasma behavior, showing electron pressure local nonisotropy capability for generating supersonic-subsonic transitions

06 p1123 A70-18296

Kinetic processes in plasma subjected to randomly fluctuating electric field, obtaining chain of single particle distribution functions

07 p1349 A70-19553

Finite amplitude disturbance propagating across magnetic field within infinite plasma, solving Vlasov equation and ordering moment equations hierarchy

07 p1352 A70-19989

Expansion and deceleration of rocket-released artificial ion cloud in terms of snowplow expansion model and drag deceleration

07 p1271 A70-20159

Electrodynamic plasma accelerators fast particle generation mechanism during entrainment, studying polarization field potential structure

08 p1549 A70-20506

Spark track plasma of electrical discharge in fluid, describing energy dissipation, particle formation and density, plasma temperature, etc

08 p1551 A70-21202

Interplanetary plasma inhomogeneity size, shape and spatial orientation and drift velocity and direction determined from radio telescope data

08 p1580 A70-21664

Laser heating of plasma, motion pattern and shock wave parameters during absorption burst in solid body vapor, using numerical analysis

09 p1695 A70-22181

Dynamics of multicomponent plasma involving charged or neutral gases with transport phenomena for case of no magnetic field

09 p1738 A70-23580

Book on plasma dynamics covering charged particle orbit theory, macroscopic equations, hydromagnetics, hot and cold plasma waves, kinetic theory and plasma radiation

11 p2087 A70-25500

Plasma self Q switching in pulsed far IR lasers, discussing lens effect of plasma electrons delaying laser pulses

11 p2062 A70-25634

Magnetopause representation by mixing region of plasma streams with different velocities and magnetic fields, assuming hydromagnetic viscosity caused by wave-particle interactions

11 p2114 A70-26563

Flow dynamics effects on characteristics of high temperature plasmatron, describing plasma burner design and HF discharge plasma experiment

11 p1984 A70-26740

Rarefied plasma motion in geomagnetic dipole equatorial plane near magnetosphere symmetry axis by deriving approximate solution to quasi-hydrodynamic equations

14 p2575 A70-30801

Many body correlation and conditional probability functions of plasma shield clouds surrounding test particles

14 p2623 A70-31034

Comparative sets of higher order adiabatic motion equations for plasmas in electric and magnetic fields with slow variations

14 p2624 A70-31043

Compressible plasma gravitational instability taking into account Hall effect

14 p2624 A70-31225

Kinetic processes in plasma subjected to randomly fluctuating electric field, obtaining chain of single particle distribution functions

15 p2777 A70-31460

Distant radiation from magnetic line source in moving isotropic plasma, discussing dependence on velocity

15 p2778 A70-31835

Plasma velocity and moment equations in magnetic dipole field as function of variations along coordinate directions

16 p2956 A70-32934

Collection of papers on gas dynamics covering hypersonic flow, rarefied gas and plasma dynamics, heat and mass transfer, etc

17 p3069 A70-35031

Continuum plasma dynamics with electromagnetic forces of same order of magnitude as gas dynamic forces, discussing various flow problems

17 p3141 A70-35040

Photoresonant cesium plasma ionization, discussing pumping spectra, electron gas, molecular-atomic ion ratio and dynamics

19 p3474 A70-37440

Ar arc discharge magnetically induced retrograde rotation dynamics, using high speed photography

19 p3475 A70-37533

Gas discharge in longitudinal magnetic field, investigating instability of diffusion dominated positive column

20 p3677 A70-39112

Magnetospheric and magnetic storms correlated to solar wind energy penetration, noting roles of energetic plasma and magnetospheric low energy plasma convection

22 p4022 A70-43287

HF plasma propagation, discussing RF discharge by exciting axially symmetric mode of plasma column

22 p4084 A70-43671

Thermodynamics and statistical physics of dense plasma with particle interaction energy exceeding kinetic energy, discussing three-component model phase equilibrium

23 p4229 A70-45073

MPD experiments in inductive hydrodynamic shock tube with round cross section and radial magnetic field

24 p0000 A70-45798

Mathematical model for plasma expansion resulting from short energy pulse absorption

24 p4387 A70-45799

PLASMA ELECTRODES

Acceleration mechanisms in pulsed plasma accelerator with rail electrodes driven by capacitor discharge

02 p0348 A70-12501

Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field

[AIAA PAPER 69-280] 04 p0729 A70-15596

Electron temperature distribution in thermal boundary layer about probe electrodes calculated by successive approximations allowing for electron heating by arc

09 p1734 A70-22167

Quasi-steady state plasma acceleration in coaxial electrode geometry during synchronized application of tailored pulses of mass flow and current

[AIAA PAPER 69-267] 09 p1736 A70-23204

Silver cathodes and plasma-sprayed anodes for cold effective hydrogen/oxygen fuel cells with solid zirconium dioxide electrolyte, considering carbon precipitation avoidance

10 p1830 A70-24459

Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect

10 p1808 A70-25124

Seeded dense plasma-electrode system behavior, studying effect of adsorption and emission from boundary surfaces

11 p2090 A70-25952

Heat exchange in linear vortex plasmatron with bilateral ejection, noting dependence on electrodes geometry and gas flow rates

11 p1984 A70-26737

Electron bombardment ion engine thrust variations, considering effects of electrode misalignment and ion current changes

12 p2291 A70-27808

Surface parameters influence on energy transfer to arc jet anode, discussing work function, accommodation coefficient and diffuse reflection coefficient of electrons

[AIAA PAPER 69-107] 12 p2281 A70-27809

Electric field in rectangular MHD channel with ideally conducting electrodes in uniform magnetic field, considering conditions for maximum channel effectiveness

13 p2461 A70-28966

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode

[AIAA PAPER 69-241] 13 p2475 A70-29959

Microwave harmonic generation by nonlinear plasma-metal junctions noting calcium, gallium, molybdenum, gold, copper and platinum cathodes

14 p2549 A70-30438

MHD power generation, investigating replenishment of zirconia electrode from plasma in open flame and duct configurations

14 p2534 A70-30535

Collisionless alkali plasma diode with two electrodes emitting electrons and ions with half-Maxwellian velocities, analyzing potential distribution

14 p2622 A70-30660

Coaxial electrode arc discharge plasma accelerators at reduced pressure under crossed fields, employing Hall effect

15 p2779 A70-32104

Laminar Cu-W electrode erosion resistivity in single chamber electric arc hydrogen plasmatrons with gas vortex stabilization

15 p2780 A70-32130

Combustion driven Hall configuration MHD generator, discussing boundary layer analysis, gas density nonuniformity and electrode drop

20 p3566 A70-40003

Electrode size effects on combustion driven MHD generator performance, examining voltage losses, gas boundary layer temperature and surface conditions

20 p3566 A70-40005

Continuous electrode MHD generator ionization instabilities, measuring current distribution and transverse electric field

20 p3567 A70-40018

Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect

20 p3568 A70-40517

Plasma source design using stellarator type magnetic field, eliminating electron beam and electrode produced impurities

21 p3858 A70-41713

Arc ignition and cathode spot movement dynamics of thermionically emitting cathode surfaces in heat feedback plasma

21 p3859 A70-41903

Current distribution of accelerating electrodes of coaxial injector, using differential magnetic probe

22 p3965 A70-42805

PLASMA ENGINES

Spectral line widths in MPD arc jet measured to determine plasma electron density and heavy particle temperature

03 p0536 A70-14371

Current stream function, Hall current density, force densities and pressure distribution for typical MPD thruster

03 p0552 A70-14372

Radial velocity profiles measured in plasma jet thrusters with thermal and self magnetic acceleration, discussing disturbances due to discharge current-magnetic field interactions

03 p0553 A70-14374

Pulsed plasma and ion microthrusters providing satellite attitude and position control

05 p0896 A70-16119

Dynamic I-V characteristics of megawatt pulsed MPD-ARC plasma thruster under various axial magnetic fields given for Ar and hydrogen propellants

[AIAA PAPER 70-164] 06 p1131 A70-18092

LES-6 satellite solid Teflon pulsed plasma thruster performance, determining energy balance, thrust and circuit parameters

[AIAA PAPER 70-179] 06 p1132 A70-18206

Pulsed plasma vacuum-arc thruster system incorporating throttle and thrust vector controls for long life satellite control applications

[AIAA PAPER 70-180] 06 p1133 A70-18232

Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods

[AIAA PAPER 69-244] 09 p1613 A70-23238

Three axis attitude control of earth oriented non-spinning synchronous communications satellite, using gimbal-mounted momentum wheel and pulsed plasma thrusters

[AIAA PAPER 70-456] 11 p2119 A70-25431

Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters

[AIAA PAPER 69-243] 11 p2102 A70-26122

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite

[AIAA PAPER 69-298] 13 p2473 A70-28504

Continuously working plasma thrusters, describing operating principles of Hall current and self magnetic acceleration systems

15 p2790 A70-32277

RFI measurements at X band on LES-7 prototype pulsed plasma thruster

17 p3149 A70-35669

RF plasma thrusters for synchronous satellites, estimating weights and efficiencies of various types

20 p3689 A70-40124

Spinning satellites stationkeeping at synchronous altitude, using solid propellant pulsed plasma microthrusters

[AIAA PAPER 70-1148] 20 p3690 A70-40206

Electric propulsion research involving MPD thrusters, current sheets and neutral-ion motion coupling

[AIAA PAPER 70-1086] 20 p3683 A70-40249

Low power MPD arc thruster performance with downstream cathode, using Xe propellant

[AIAA PAPER 70-1084] 20 p3693 A70-40251

Cathode geometry effect on performance of radiation cooled MPD arc thruster in continuous mode

[AIAA PAPER 70-1083] 20 p3693 A70-40252

Electrolytic capacitor current pulse networks for quasi-steady MPD arc thrusters, determining series resistance effects on energy transfer

[AIAA PAPER 70-1082] 20 p3568 A70-40253

Quasi-steady MPD arc thruster average thrust measurements, considering time-of-flight velocity determination by ion collecting probes

[AIAA PAPER 70-1080] 20 p3694 A70-40255

Repetitively pulsed MPD propulsion systems, considering thruster performance

[AIAA PAPER 70-1093] 20 p3695 A70-40522

Pulsed plasma and low pressure detonator thrusters for long life secondary spacecraft propulsion, considering satellite stationkeeping and attitude control

[AIAA PAPER 70-1147] 21 p3868 A70-41782

High temperature acceleration of propellants in electrothermal thrusters including resistojets, arcjets, thermionic and plasma configurations

22 p4091 A70-42763

PLASMA FLOW

U MAGNETOHYDRODYNAMIC FLOW

PLASMA FLUX MEASUREMENTS

Ionization studies in collision dominated high pressure flame plasma using electrostatic probes

03 p0534 A70-14212

Unsteady state and transit time analysis of geoeffective interplanetary plasma flux observed near earth causing magnetospheric storm of 17-19 April 1965

04 p0683 A70-15736

Periodic potential probe for diffusive flux to wall measurements in negative glow and back diffusion plasmas

06 p1074 A70-18617

Unsteady state and transit time analysis of geoeffective interplanetary plasma flux near earth causing magnetospheric storm of 17-19 April 1965

14 p2575 A70-30820

Negative hydrogen ion balance in high intensity plasma source, measuring flux as function of discharge current

15 p2780 A70-32195

- Dual satellite magnetic field and plasma measurements of earth bow thick pulsation shock by Vela 3A and Explorer 33 22 p4013 A70-42470
- Plasma with oriented charged particle fluxes macroscopic parameter measurement by multigrid probes facing and reversed to drift, noting graphical data processing 24 p4385 A70-45454
- PLASMA FREQUENCIES
 - Bremsstrahlung emission from thermal plasma coexisting with relativistic electron tails, noting enhancement at electron plasma frequency harmonics 02 p0348 A70-12240
 - Saturation of linear or nonlinearly /explosively/ unstable HF electrostatic flute modes in mirror confined plasma 03 p0529 A70-13005
 - Inhomogeneous plasma oscillations in counterstreaming plasmas analyzed for electric fields and resonant frequencies from Vlasov equation 04 p0726 A70-14671
 - Electron plasma frequency exchange corrections temperature dependence at high densities, using equation of motion for coupled particle-hole pair operators 04 p0727 A70-14714
 - RF probe impedance variations with magnetic field strength in hot plasma for electron gyrofrequencies less than plasma frequency explained by model 06 p1117 A70-17371
 - Collisions effects on cylindrical antenna impedance near plasma frequency of isotropic nonMaxwellian plasma, allowing for collision frequency dependence on electron energy 06 p1020 A70-17567
 - High electron density plasma generation by ionized gaseous filament explosion, noting plasma frequency effect on spectral brightness 10 p1915 A70-23961
 - Nonlinear wave interactions in quiescent plasma column with external disturbance creating broadened frequency spectrum and weakly turbulent plasma 10 p1922 A70-24146
 - Cyclotron waves absorption study in bounded rarefied plasma having Larmor electron frequency exceeding plasma frequency 10 p1925 A70-25101
 - Narrow band radiation from longitudinal plasma waves nonlinear interactions during solar bursts, comparing flux intensities for Corona single or double shock wave frequencies 10 p1934 A70-25272
 - Magnetic field effect on burst emissions in plasma frequency range, observing radiation band widening and modes transmission in terms of Appleton-Hartree theory 10 p1949 A70-25273
 - HF and LF plasma waves interaction in three wave approximation taking into account linear damping 11 p2089 A70-25714
 - Topside ionosphere nighttime structure over Japan deduced from Alouette 2 satellite plasma frequency measurements 12 p2226 A70-28063
 - Electrostatic waves for upper ionospheric plasma model, obtaining solutions to dispersion relation at multiples of electron cyclotron frequency 13 p2400 A70-29914
 - LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes 16 p2958 A70-33254
 - Numerical ionospheric world mapping of plasma frequency, considering height, latitude, longitude and local mean time variations 19 p3380 A70-38403
 - Antennas impedances in warm isotropic plasma, using hydrodynamic and kinetic /Vlasov/ equations 19 p3380 A70-38406
 - Topside plasma frequency resonance below electron cyclotron frequency, discussing ray paths and delay times 20 p3620 A70-39336
 - Positive ions energy dispersion effused from RF plasma, presenting ion extraction model for plasma sheath system and equivalent circuit 20 p3678 A70-39608
 - Collisionless plasmas fluid dynamical equations in presence of strong magnetic field, discussing Larmor and electron plasma frequencies 20 p3678 A70-39609
 - Superimposed external DC magnetic field effect on electrodeless HF plasma density, discussing electron cyclotron waves resonance excitation and plasma electron energy gain 22 p4079 A70-42364
 - Homogeneous plasma in uniform magnetic field, deriving theory for instabilities and LF wave propagation modes 22 p4079 A70-42370
 - LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes 23 p4226 A70-44283

PLASMA GUNS

Moving plasmas with small angular divergence without guide field produced by modified Ti-washer gun for plasma interaction studies

01 p0054 A70-10109

Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in twin stainless steel and Al targets

18 p3342 A70-36685

[AIAA PAPER 69-378]
Conical plasma gun with Z pinching restrained by axial magnetic field, describing operating characteristics

19 p3480 A70-38018

Axial propellant density gradients and circuit capacitance correlated with pulsed coaxial plasma gun efficiency

21 p3858 A70-41726

Air spark gap to switch stored charge in LC circuit, using auxiliary triggering circuit to clamp magnetic flux

23 p4177 A70-44471

Coaxial plasma deflagration gun for accelerating particles to high velocities at low thermal energy for plasma injection experiments

24 p4383 A70-45120

W, Ta and Mo components economical fabrication by plasma spraying for rocket nozzles, susceptors and crucibles

24 p4350 A70-46355

PLASMA HEATING

Equilibrium model of laminar arc constrictor plasma generator, correlating heat transfer, wall shear stress, friction factor and development length

03 p0533 A70-13952

Nonthermal heating mechanism in quiet solar wind, tabulating observed and predicted parameters

03 p0561 A70-13998

Thermochemical relaxation influence on shock heated plasma gases via heat transfer experiments on ionized Ar, molecular nitrogen and carbon dioxide

03 p0536 A70-14366

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera

04 p0730 A70-14458

Solar wind acceleration and coronal plasma heating above plage regions from spectra of solar radio echoes, computing temperature rise and energy input

04 p0740 A70-15049

Remote feedback suppression method for plasma collisional drift instability using modulated microwave irradiation, describing linear heating mechanism theory

06 p1122 A70-18014

HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe

07 p1348 A70-19551

Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum

07 p1349 A70-19552

Monograph on research by Japanese Institute of Plasma Physics covering theta pinch, plasma heating, flow, diagnostics, etc

07 p1350 A70-19843

Soviet collection of papers on magnetic traps covering chamber walls effect on plasma heating, plasma in mirror trap and self sustained fusions

07 p1350 A70-19844

Magnetic trap chamber walls adverse effect on plasma heating produced by electron beam injected at low hydrogen pressures

07 p1350 A70-19845

Turbulent diffusion and ion heating in plasmas in presence of current instability

08 p1554 A70-21813

Pulse indicators using thermoelectric effect of hot carriers caused by nonuniform heating of electron gas in HF field

09 p1643 A70-22127

Laser heating of plasma, motion pattern and shock wave parameters during absorption burst in solid body vapor, using numerical analysis

09 p1695 A70-22181

Plasma generation and heating by controlled thermonuclear fusion reactions using pulsed lasers

09 p1734 A70-22249

Solar wind heating, determining roles of various energy sources from Explorer 34 observations

09 p1755 A70-22511

Nonresonant electromagnetic absorption in high density plasma used for RF heating in magnetostatic field

09 p1735 A70-22923

Laser radiation conversion into kilovolt X rays using planar heated plasma, discussing electron temperature role

10 p1921 A70-23987

Deuterium plasma expansion resulting from thermal shock produced by laser impulse

10 p1923 A70-24526

Gas mixture plasma ionized and heated by discharge and ejected into vacuum, considering nonequilibrium ionization calculation with gap between electron and heavy particle temperatures

11 p2092 A70-26732

Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory

12 p2278 A70-27327

Plasma torch for increasing material fusion temperatures in metallization methods

12 p2244 A70-28072

Pulsed plasma jet radiant heat flux effect on celophane film coated, polished and etched metals, noting erosion destruction

12 p2282 A70-28287

Macroscopic plasma response to absorption of high intensity laser radiation in one dimensional geometry

13 p2459 A70-28636

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera

13 p2510 A70-28655

Drift instability and ion heating by high amplitude magnetosonic wave in plasma waveguide in constant magnetic field

13 p2463 A70-29381

Power absorption by microwave generated plasmas noting pressure effects

14 p2622 A70-30675

Hot universe model for demonstrating distortions in Rayleigh-Jeans region of microwave relic radiation spectrum by primeval plasma heating before recombination epoch

14 p2632 A70-31287

HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe

15 p2777 A70-31458

Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum

15 p2777 A70-31459

Ions energy spectra in plasma heated by shock wave, using passive corpuscular diagnostic technique

15 p2781 A70-32821

Beam current instability and plasma heating by electron beam generated in linear discharge, discussing electron beam-cold plasma interactions

16 p2957 A70-33191

Electron beam interaction with ionized K plasma, considering Langmuir waves instability, turbulence and electron heating

18 p3295 A70-36614

Plasma satellites near He I forbidden lines during turbulent heating

19 p3475 A70-37441

Surface layer heating of solid body by dense gas discharge plasma radiation, comparing vaporization and reversible opacity onset times in quartz

19 p3482 A70-38733

Ion heating during plasma instability due to interaction with electron beam in mirror magnetic trap

20 p3678 A70-39598

High radiation intensity neodymium glass laser, describing installation for heating plasmas to high temperatures

20 p3643 A70-39758

Dense plasma jet kinetic instabilities and heating in strong magnetic field

20 p3682 A70-40138

Nonlinear resonant heating in magneto-plasma, calculating energy absorption by ions and plasma wave amplitude

20 p3685 A70-40467

Temporal and spatial origin of hot ions in turbulent plasma heating, using particle analysis

21 p3855 A70-40824

Plasma heating by ionizing shock waves reflected by transverse magnetic field barrier, discussing discontinuity resolution

21 p3857 A70-41381

Turbulent plasma heating by adiabatic magnetic compression with longitudinal ring current

21 p3857 A70-41387

Stochastic kinetic theory for plasma turbulent heating by random fields, predicting acceleration effects

21 p3859 A70-41899

Numerical analysis of inductive electrodeless discharge of thermal Ar plasma column heated by RF axial magnetic field

21 p3859 A70-41902

Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory

21 p3860 A70-42068

Small high temperature rotary plasma-heated furnace for refractory material high purity processing, discussing design and operation

22 p4005 A70-42368

Planar resonance probe in free molecular arc heated flowing plasma, examining shift nature in measured frequency position of minimum drawn current

22 p4081 A70-43013

Stochastic heating of plasma in toroidal trap /stellarator/, showing discharge ignition potential dependence on microwave oscillator frequency

22 p4084 A70-43394

High density plasmas production and containment in theta pinch device, discussing shock and Joule heating

23 p4225 A70-44186

Plasma heated by cyclotron resonance using waveguide method, considering properties, confinement conditions and instabilities

24 p4385 A70-45453

PLASMA INSTABILITY

- Energy balance of self sustaining thermonuclear reaction with nonuniform magnetic field in wall-contained dense plasma, allowing for radiation losses 11 p2088 A70-25709
- Hydrodynamic equations for ions and electrons of ionized collisional plasma in inhomogeneous magnetic field based on Boltzmann kinetic equations 11 p2088 A70-25710
- HF and LF plasma waves interaction in three wave approximation taking into account linear damping 11 p2089 A70-25714
- Magnetopause representation by mixing region of plasma streams with different velocities and magnetic fields, assuming hydromagnetic viscosity caused by wave-particle interactions 11 p2114 A70-26563
- Coulomb interaction effect on diffusion of plasma produced by contact ionization in magnetic field, obtaining density profiles by iterative procedure 12 p2280 A70-27789
- Mathematical models reproducing nonlinear mode interactions in CW bounded plasma devices 13 p2458 A70-28567
- Landau damping in plasma cyclotron wave interaction by symmetrical counterstreaming double electron beam with uniform magnetic field 13 p2468 A70-29917
- Ohmic dissipation in MHD plasma acceleration, demonstrating interaction with electric field and magnetic induction 14 p2621 A70-30296
- Container wall-collision plasma sheath model for charge carrier investigation using velocity distribution [DFVLR-SONDDR-51] 14 p2622 A70-30662
- Vlasov interaction of magnetically coupled E layer with dissipative structures including injection, trapping and drag effects 14 p2623 A70-30698
- Solar wind interaction with planetary ionosphere, considering flow behavior across bow MHD shock 14 p2647 A70-31073
- Plasma kinetic equation, expressing interaction term as sum of binary collisions between close and collective interactions among remote particles 14 p2625 A70-31297
- VHF radiation from plasma during electron beam interaction with fast magnetoacoustic wave stimulated by external spatially periodic currents 15 p2780 A70-32118
- Shock wave propagation during moving pulsed plasma interaction with stationary gas discharge plasma 15 p2780 A70-32197
- Alfven wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface 15 p2805 A70-32722
- Collisionless shocks structure in turbulent wave-particle interactions, obtaining ion distribution function 16 p2959 A70-33970
- Solar wind interaction with earth, moon, Venus and Mars, reviewing literature on continuum fluid model, spacecraft observations, plasma characteristics, etc 17 p3150 A70-34669
- Nonlinear electrostatic vibrations in colliding antiparallel flows of rarefied plasma 17 p3141 A70-35335
- Temporal and spatial covariation of high latitude geophysical phenomena, using unified mechanism of solar plasma stream interaction with geomagnetic field 18 p3247 A70-36404
- Solar wind and flare energetic particles properties and interactions, surveying interplanetary magnetic field, planetary bow shock waves, neutrons, neutrinos, etc 19 p3511 A70-38418
- Fully ionized magnetized rotating plasma interaction with neutral gas blanket, discussing plasma decay and velocity field 19 p3481 A70-38489
- Interactions between moving alkali-metal seeded dense plasma and metallic thermionically emitting electrode with surface properties influenced by seed particle absorption 20 p3681 A70-40007
- Auroral arcs formation model based on dynamic magnetosphere-ionosphere interaction 21 p3817 A70-41089
- F region magnetic disturbances due to low energy solar plasma penetration during proton bursts 21 p3882 A70-41285
- Magnetoplasma interaction with axially slotted delay line, examining coil behavior physical mechanisms by cold plasma model 22 p4079 A70-42365
- Electric propulsion plasma thrust beam and ambient space plasma electrostatic equilibration, considering various charged particle parameters involved in bi-plasma system interactions [AIAA PAPER 70-1142] 22 p4091 A70-42974
- Steady state frequency spectra for Alfven waves and MHD turbulence in collisionless plasma with nonlinear interaction by particle scattering 24 p4383 A70-45114
- Velocity-space homogeneous plasma instabilities due to self interaction of single species 24 p4384 A70-45253
- PLASMA JET SYNTHESIS**
- HF electrodeless plasma discharge synthesis of niobium and vanadium intermetallic compounds 11 p2061 A70-26746
- PLASMA JET WIND TUNNELS**
- Plasma arc wind tunnel gas velocity measurement with electron beam probe using closed-loop electronic controller to stabilize beam position 01 p0092 A70-11195
- Neutral particle flux measurements in plasma wind tunnel using BeCu detector, discussing role in collisionless flow dissipation processes 04 p0727 A70-14994
- Ion density profile across shock in partially ionized gas measured in plasma jet wind tunnel for comparison with Rankine-Hugoniot relation 09 p1662 A70-23235
- Army missile command /AMICOM/ plasma jet wind tunnel automatic control system design 16 p2888 A70-33303
- Steady state plasma wind tunnel for flow around ionospheric satellites, studying wakes of cylinders and spheres 16 p2837 A70-33866
- PLASMA JETS**
- Pulsed arcs in argon and helium at superhigh pressures, noting plasma ionization and temperature and charged particle density 01 p0149 A70-10168
- Negative resistance I-V characteristics of low voltage arc discharge in Cs plasma 01 p0150 A70-10172
- Magnetically balanced arcs in supersonic external flows, indicating central core with differential Lorentz forces analogous to Grashof number in free convection phenomena 02 p0347 A70-12233
- Focused deuterium plasma discharge neutrons and X rays energy spectra, flux and time resolved collimation measurement with nuclear emulsions and scintillation detectors 02 p0348 A70-12241
- Critical magnetic fields, frequencies and spatial structure of ion-acoustic instability of HF induction discharge plasmas in hydrogen, Ar, He and Hg vapor 02 p0348 A70-12261
- Millimeter and nanosecond resolution of fast neutrons in pulse dense high temperature deuterium plasma discharge with polyethylene collimators and photomultipliers 02 p0303 A70-12739
- Anomalous behavior of arc motion in high pressure cross-field plasma devices in terms of electromagnetic effects 03 p0529 A70-12938
- Laser emission action at 4880 Å in plasma discharge from injecting electron beam into Ar at different pressures 03 p0530 A70-13063
- Supersonic plasma jets studied spectroscopically, determining atomic levels populations, population inversion conditions, electron temperature and concentration distributions, etc 03 p0531 A70-13254
- Turbulent submerged plasma jet boundaries calculated theoretically and compared with experimental results from dynamic head profiles 03 p0532 A70-13515
- Air plasma pulsed discharge jets erosive effects on metals, semiconductors and dielectrics, noting role of thermal effect 03 p0532 A70-13742
- Equilibrium model of laminar arc constrictor plasma generator, correlating heat transfer, wall shear stress, friction factor and development length 03 p0533 A70-13952
- Hot cathode reflex discharges investigated to improve ion generation efficiency in space ion thrusters 03 p0536 A70-14368
- Spectral line widths in MPD arc jet measured to determine plasma electron density and heavy particle temperature 03 p0536 A70-14371
- Entrainment rate of ambient medium by MPD arc jet, discussing flow field in and around jet and pressure distribution along vacuum tank wall 03 p0553 A70-14373
- Electron efflux effectiveness from discharge plasma into vacuum, investigating various electrodes influence 04 p0724 A70-14415
- Radiation-convection interaction in plasma free jet, using two-thermal-domain model for enthalpy distribution determination [ASME PAPER 69-WA/HT-50] 04 p0781 A70-14798
- Pulsed high current arc burning in hydrogen at pressures to 400 atm, discussing stability and discharge plasma parameters 04 p0729 A70-15224
- Stability and shape of magnetically balanced atmospheric cross-flow arcs in Ar noting balanced modes 04 p0729 A70-15549
- Plasma gas jets high velocity propagation, studying radiation precursor and divergence and expansion chamber effects 04 p0675 A70-15594
- Axial and rotational velocity profiles of plasma jet from Doppler shift of spectral lines [DFVLR-SONDDR-27] 04 p0729 A70-15612
- Dynamic I-V characteristics of hot cathode megawatt level nitrogen propellant pulsed MPD arc plasma source for various axial magnetic fields 04 p0729 A70-15642
- Exploding wire discharges in high vacuum, discussing particle emission MHD instabilities, plasma temperature and electron density 05 p0890 A70-16820
- Ball lightning mechanism proposal based on mathematical model for electric discharge current in parabolic plasma shell forming vortex-type storm front 05 p0879 A70-17021
- Diagnostic methods for field-free plasmas with medium dispersed optical-spectrographic and source monitoring equipment 06 p1063 A70-17728
- Pulsed supersonic plasma jets induced surface ablations and cracks in polymers, using X ray and IR analysis 06 p1091 A70-17763
- Plasma arc tests to simulate stagnation reentry heating on spherical subized models of nuclear heat source to investigate heat shield materials ablation characteristics [AIAA PAPER 70-200] 06 p0974 A70-18172
- Quasi-steady coaxial MPD arcs characteristics, studying Ar ion velocities, electrostatic ion acceleration mechanism and arc voltage gradient [AIAA PAPER 70-165] 06 p1132 A70-18208
- Repetitively pulsed quasi-steady vacuum arc magnetoplasdynamic accelerator for propulsion, using electrolytic capacitors as power source [AIAA PAPER 70-167] 06 p1133 A70-18228
- Microwave scattering from plasma column of low pressure discharge in Hg under free space conditions 06 p1125 A70-18609
- Wall temperature variation of transpiration cooled tube surrounding plasma arc calculated from gas mass flow and wall properties 07 p1420 A70-19214
- Doppler shift measurements of axial and rotational velocities in MPD arc, using references from iron arc [AIAA PAPER 69-110] 07 p1364 A70-19324
- Pulsed dense argon plasma arcs radiation spectra in visible and UV regions as function of current and pressure 07 p1349 A70-19652
- Chemical synthesis in streaming thermal plasmas including HCN from cold methane and N plasma discharge chemistry 07 p1351 A70-19879
- Freezing-mixing model for predicting plasma jet flow reactor yield development from analyses of thermochemical equilibrium, chemical reaction freezing and turbulent mixing 07 p1351 A70-19893
- Transpiration-cooled constricted arc for plasma generation, considering transport properties, LTE assumptions and porous tube flow characteristics 07 p1351 A70-19898
- Dispersion of ion-acoustic waves in quiescent rare gas discharge plasmas, discussing model simulating ion waves generated by finite sine wave bursts 07 p1352 A70-19990
- Cyclotron frequency harmonics emission of PIG discharges linked to nonthermal electron plasma instability 07 p1354 A70-20316
- Electron density, excited state density and neutral particle temperature in Ar and Ne nonequilibrium laminar plasma jets 08 p1550 A70-20596
- Thermal and nonthermal plasmas for ion production, discussing gas pressure, voltage and discharge current effects on electron temperature 09 p1734 A70-22037
- Plasma discharge absorption coefficients measurement using Q switched ruby laser 09 p1694 A70-22139

PLASMA LAYERS

Plasma discharge studies by holographic interferometry using ruby laser pulse for light source
09 p1674 A70-22171

Doppler effect induced small spectral line shifts measured by modified duochromator in MPD arc jet
09 p1684 A70-23531

HF electromagnetic wave detector based on study of volt-ampere characteristics of luminescent plasma discharge
10 p1922 A70-24030

Plasma energy confinement time as function of discharge parameters for plasma thermal insulation in Tokamak-3
11 p2088 A70-25713

Inert gas plasma jets diagnostics in accelerator by spectroscopy, determining flow velocities, excitation and gas temperatures
11 p2093 A70-26744

Spectroscopic diagnostics of erosion plasma jets from cylindrical pulsed plasma generator operating in vacuum
11 p2093 A70-26745

Controllable thermonuclear reactor with free-float HF discharge plasma in deuterium
12 p2271 A70-27351

Pulsed plasma jet radiant heat flux effect on cellophane film coated, polished and etched metals, noting erosion destruction
12 p2282 A70-28287

SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] 13 p2473 A70-28515

DC plasma arc jet excitation and emission characteristics for solution analysis with economical inert gas flow rates
13 p2362 A70-29107

Interference holograms of low temperature nitrogen plasma jet using fundamental and second harmonic ruby laser emissions
13 p2464 A70-29384

Thermal induction plasma discharge characteristics, considering radiation and conduction losses
13 p2465 A70-29702

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode
[AIAA PAPER 69-241] 13 p2475 A70-29959

Neutral particle temperature, pressure and velocity measurements in argon plasma jet, using refraction index
14 p2625 A70-31350

Teflon and polymethyl methacrylate sublimation breakdown in plasma jets, using electric arc heated argon, nitrogen, air and oxygen
15 p2765 A70-32103

High energy electron temperature in beam plasma discharge pulsed laser measured by bremsstrahlung X radiation spectrum
15 p2752 A70-32194

Negative hydrogen ion balance in high intensity plasma source, measuring flux as function of discharge current
15 p2780 A70-32195

Plasma electron density measurement for microwave-excited pulsed discharges based on skin effect
15 p2780 A70-32367

Microwave probe for measuring electron density profile in supersonic arc jet plasma
15 p2741 A70-32433

Discharge chamber plasma processes in electron bombardment ion thrusters, considering factors affecting thruster performance
[AIAA PAPER 69-494] 15 p2791 A70-32501

Electron density fluctuations in transitional zone of turbulent plasma jet, using digital analysis of Langmuir probe signals
[AIAA PAPER 70-731] 16 p2958 A70-33495

Gas-core nuclear rocket engine simulation by induction coupled plasma torch, determining gas flow patterns
[AIAA PAPER 70-691] 16 p2950 A70-33555

Ni particles induced quenching measured by probes in afterglow plasma of pulsed linear discharge, determining deionization rate
16 p2958 A70-33687

Experimental and theoretical investigation of mass injection effect on high current MPD arc
[AIAA PAPER 69-266] 16 p2959 A70-33869

Transverse magnetic field effects on Ar cross flow arc temperature distribution, cross section shape and profile, discussing forced convection effects
[AIAA PAPER 70-777] 17 p3138 A70-34477

Electron concentration distribution over plasma discharge cross section, using interferometry
17 p3142 A70-35732

Thermal stability test assembly for refractory materials cylindrical specimens, using argon plasma jet
19 p3395 A70-37351

Molybdenum carbization in methane-based plasma glow discharge, considering possible pyrocarbon layer formation and temperature effects
19 p3434 A70-37456

Elementary chemical reaction kinetics effect on electrophysical parameters of low temperature plasma jets, calculating relaxation time for C fuels
19 p3481 A70-38184

Low temperature underexpanded supersonic gas plasma jets behind shock wave, analyzing rarefaction and viscosity effects on parameters distribution
19 p3352 A70-38185

DC plasma generator with Ar stabilized arc, investigating heat and mass transfer in jet discharge channel
19 p3481 A70-38189

Acceleration processes in MPD arc jet in Ar for symmetric discharge layer and rotating spoke types
20 p3680 A70-39992

Potential fluctuations in intersecting plasma jet streams attributed to ion-electron instability, using external probe
20 p3682 A70-40136

Dense plasma jet kinetic instabilities and heating in strong magnetic field
20 p3682 A70-40138

Alfven critical velocity concept in MPD arcs analysis, obtaining exhaust velocity relationship from one dimensional flow model
[AIAA PAPER 70-1096] 20 p3683 A70-40240

Multimegawatt quasi-steady MPD arc accelerator in millisecond pulses, noting applicability to experiments requiring long exposure-times
[AIAA PAPER 70-1095] 20 p3683 A70-40241

Arc luminosity in cathode region of quasi-steady MPD arc jet, using high speed photography and electric and magnetic field probes
[AIAA PAPER 70-1094] 20 p3683 A70-40242

Supersonic weakly ionized plasma jet in argon, investigating axial and radial temperature profiles by electrical probe techniques and spectroscopic and photographic methods
20 p3685 A70-40463

Axisymmetric jet plasma flow in magnetic nozzle, measuring electric potential, electron temperature and ion density and velocity
21 p3856 A70-41380

Nonequilibrium flow adjacent to cooling tube wall confining cascade arc plasma electrical discharge
21 p3805 A70-41763

Intense high ionization degree discharge plasma initiation at low gas pressures, using auxiliary discharge
22 p4078 A70-42356

Spatial stability of transferred arc anode spots during cutting with plasma jets, noting currents associated with microspots
22 p4043 A70-42380

Transpiration cooling of porous constrictor walls of high intensity electric arc in plasma
[ASME PAPER 70-HT-35] 22 p4122 A70-42432

Electric propulsion plasma thrust beam and ambient space plasma electrostatic equilibration, considering various charged particle parameters involved in bi-plasma system interactions
[AIAA PAPER 70-1142] 22 p4091 A70-42974

High speed plasma jet propagation, obtaining time of arrival measurements, brightness temperature, pressure and impact data
22 p4012 A70-43014

Controllable thermonuclear reactor with free-float HF discharge plasma in deuterium
22 p4084 A70-43595

Temperature distribution and thermal conductivity determination in Ar plasma cascade arc
23 p4226 A70-44438

Five-moments approximation calculation of magnetoplasma dynamic hydrogen arc radial pressure profile as function of ambient pressure and superimposed magnetic field
23 p4228 A70-44935

Magnetoplasma dynamic hydrogen arc radial pressure profile as function of ambient pressure and superimposed magnetic field, using thirteen-moments approximation
23 p4228 A70-44936

German monograph on thermal and nonthermal phenomena in quasi-stationary convectionless plasma arc column, using 13-moment approximation for Boltzmann equation
24 p4382 A70-45089

Temperature, densities and electric field strength of cascaded arcs burning in He under normal pressure
24 p4384 A70-45425

Plasma jet motion stability in axial magnetic field of stellarator diverter and solenoid
24 p4386 A70-45660

Spark erosion or plasma jet treatment effects on Co surface structure, describing allotropic delta phase
24 p4364 A70-46221

PLASMA LAYERS

Transmission and reflection of electromagnetic waves by bounded moving plasma layer in slow wave space
01 p0042 A70-10167

Radiation enhancement from spherical antenna by overdense plasma coating, noting use for reentry vehicle blackout prevention
02 p0262 A70-12601

Electromagnetic wave reflection on thin plasma layer with Epstein electron density profile, noting use in microwave diagnostics
03 p0529 A70-13016

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer
03 p0565 A70-13232

Plasma optical transparency criterion, estimating nonequilibrium plasma layer optical density limit
03 p0531 A70-13255

Energy distribution function of electrons in weakly ionized plasma layer at electrode calculated, allowing for possible plasma concentration inhomogeneities
03 p0540 A70-13525

Coherent microwave generation mechanism in indium antimonide at high electric fields, formulating thin plasma layer double stream interaction theory
03 p0534 A70-14214

Rectangular-slot antenna pair self and mutual admittances in inhomogeneous plasma layer on slender conical body, calculating VSWR and isolation
06 p1020 A70-17565

Ion acceleration in spherical and cylindrical plasma layers formed by spherical plasmoid expansion in plasma cylinders
07 p1384 A70-19414

S- and p-polarized electromagnetic wave incident on semifinite laminar plasma layers, analyzing reflection and absorption characteristics
08 p1456 A70-20504

Spectrum of waves emitted from waveguide of two plane dielectric or isotropic plasma layers, solving dispersion equations numerically by computer
08 p1472 A70-20973

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer
08 p1580 A70-21665

Anodic electric layer in self sustaining discharge in transverse magnetic field with neutral gas burnout, studying neutral atom ionization probability
09 p1734 A70-22110

Diagnostics of inhomogeneous plane stratified plasma with arbitrary electron concentration distribution, solving differential equation for electromagnetic wave propagation normal to plasma layers
09 p1735 A70-23160

Oblique E-mode electromagnetic wave in plane stratified collisionless plasma taking into account plasma temperature
09 p1639 A70-23674

Transmission and reflection of electromagnetic waves by bounded moving plasma layer in slow wave space
10 p1842 A70-25015

Vacuum arc discharge phases before total breakdown, studying high combustion voltage relation to interplasma double layer potential difference
10 p1969 A70-25115

Electromagnetic wave propagation through weakly inhomogeneous plasma layer with frequent electron-molecule collisions, noting applicability to ionosphere
11 p2003 A70-25530

Radio wave transmission through magnetized plasma layer as function of electron concentration and collision frequency, using coaxial accelerator
13 p2366 A70-29377

Magnetotail plasma sheet temporal variations during substorms and plasma pressure as related to dynamic pressure of solar wind from Vela satellites observation
13 p2480 A70-30061

Spatial distribution and directional anisotropies of tail plasma sheet energetic electrons from measurements by electrostatic analyzer and energetic particle experiments on Vela 4
13 p2482 A70-30071

Interplanetary plasma observations by Vela satellites in solar wind and plasma sheet of magnetotail during magnetic storm
19 p3410 A70-37490

Inhomogeneous nonequilibrium plasma stratification in magnetic field, investigating electrical conductivity
19 p3481 A70-38191

Electromagnetic wave propagation through weakly inhomogeneous plasma layer with frequent electron-molecule collisions, noting applicability to ionosphere
21 p3786 A70-41280

Electromagnetic wave propagation through cold slowly varying plasma layers in absence of external magnetic field
21 p3860 A70-42000

Slow and fast ionization waves in inert gas or molecular gas plasma columns, describing striation formation in neon discharge by hydrodynamic equations
22 p4079 A70-42371

Interferometric investigation of rapidly variable frequency dependent phase objects, using ruby laser waves
[SMPT PREPRINT 26] 22 p4034 A70-43049

EM radiation beams higher directivity from sources in two layer plasma in planetary atmosphere 23 p4242 A70-44261

LF drift-dissipative instabilities of HF skin layer in nonuniform plasma 24 p4383 A70-45119

PLASMA LIFETIME

Plasma accumulation between mixed field accelerator and pulsed magnetic mirror, noting duration and stability 02 p0346 A70-12104

Accumulated plasma density and lifetime measurement of trapped ions between accelerator and periodic magnetic mirror, showing limitation by collisions and charge exchange 03 p0532 A70-13683

PLASMA LOSS

F 2 field-aligned ion velocity measurement compared with theoretical results, discussing difference at sunspot minimum and daytime ion velocity-plasma loss relation 10 p1881 A70-24815

Inertia effect on low density plasma losses in toroidal MHD equilibrium in model stellarator field 24 p4383 A70-45115

PLASMA OSCILLATIONS

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency 01 p0149 A70-10163

Langmuir oscillations excited by electron beam in plasma during instability development investigated for temporal and spatial structure, using visualization 01 p0150 A70-10174

Quasi-linear ion oscillation theory for Maxwellian plasma, considering electron and ion distribution perturbations and energy transfer 02 p0346 A70-12105

Time resolved cavity perturbation technique to measure high plasma density in magnetic mirror compression experiment, obtaining total electron number 02 p0347 A70-12236

Transverse Kelvin-Helmholtz instability in rotating thermally ionized alkali metal plasmas /Q machines/, analyzing LF drift wave edge oscillation using dispersion equation 02 p0348 A70-12239

Satellite lines of forbidden transition in laser-produced He plasma attributed to longitudinal plasma oscillations 02 p0379 A70-12717

Spectrum function in Booker scattering formula /first order Born approximation/ for dielectric constant fluctuations in hypersonic wake plasmas 03 p0529 A70-12908

Variable magnetic field effect on stability of Langmuir waves propagating in plasma in constant magnetic field 03 p0530 A70-13064

Ion-cyclotron oscillations in plasmas, considering plasma waves and oscillation characteristics 03 p0530 A70-13065

Nonisothermal plasma perturbed by supersonic body, studying plasma rarefaction and condensation cones, particle density, etc, in wake 03 p0407 A70-13413

Temporal and statistical characteristics of HF oscillations from electron beam interaction with plasma in magnetic field 03 p0532 A70-13524

Electrostatic drift-dissipative plasma instability and nocturnal equatorial spread F irregularities, discussing amplification in collision dominated medium 03 p0477 A70-13990

Inhomogeneous plasma oscillations in counterstreaming plasmas analyzed for electric fields and resonant frequencies from Vlasov equation 04 p0726 A70-14671

Plasma camera photographs of K plasma spatial distribution with electric fields and density gradients perpendicular to magnetic field, observing rotating irregularities around edge 04 p0728 A70-15005

Quasi-linear mode coupling in confined hot-ion Penning discharge plasma, discussing externally imposed excitation and internally generated oscillations 05 p0888 A70-16166

Linear damping of sinusoidal oscillation in plasma, solving linearized Vlasov equation by integration along particle trajectories 05 p0888 A70-16304

Coupling between LF oscillations and third harmonic frequency resonances of bounded plasma capacitor system, discussing density profile variation 05 p0890 A70-16654

Plasma oscillations, resonances and wave propagation characteristics analyzed by radio pulse sounders for application to space measurements 06 p1115 A70-17360

Ionospheric observations of resonance oscillations using satellite-borne radio sounding instruments 06 p1115 A70-17361

Electrostatic oscillations in cylindrical column of laboratory plasmas excited by electromagnetic waves, investigating resonances by cold plasma theory 06 p1116 A70-17368

Relativistic electron low beta plasma oscillations in external magnetic field using covariant dispersion relations 06 p1120 A70-17542

Kinetic theory of longitudinal ion oscillations pertaining to LF plasma oscillations monitored in Ariel 1 satellite wake due to ions trapped in potential trough 06 p1120 A70-17591

Hall current effects on anisotropic plasma magnetogravitational instability under uniform magnetic field, considering electron inertia role and plasma perturbations 07 p1348 A70-19228

Inelastic scattering of electrons by surface plasma oscillation for low energy electron diffraction and photoemission, interpreting surface plasmon excitation 07 p1337 A70-19359

Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum 07 p1349 A70-19552

Induced current density of fully ionized stationary plasma in externally applied HF electric field, discussing frequency range of fluctuations 07 p1352 A70-19988

Plasma ion-cyclotron oscillations resonance excitation in crossed electric and magnetic fields, describing instability development 07 p1354 A70-20319

Plasma physics relating turbulence to cosmic rays covering oscillations, turbulent acceleration, subcosmic rays, langmuir turbulence spectra and acceleration, etc 07 p1371 A70-20332

Surface oscillations of plasma in external HF field derived from hydrodynamics and Maxwell equations 07 p1355 A70-20367

He-Ne laser plasma vibrations and radiation power during active medium discharge excitation by DC current, noting characteristic energy hysteresis 08 p1511 A70-20519

Plasma oscillations analytic second order theory verification by computerized simulation, using Fourier-Hermitian expansion of distribution function in phase space 08 p1550 A70-20636

Scalar potential nonlinear fluctuations in quasi-stationary plasma, deriving expressions for potential spectral function and Langmuir and ion-acoustic fluctuations spectral densities 08 p1550 A70-20844

Flute instabilities of cold magnetoactive plasma with radially dependent density and strong azimuthal particle streams, discussing nonzero perpendicular temperature effects on oscillations 08 p1552 A70-21504

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency 08 p1554 A70-21804

Low pressure plasma stability in cylindrical crimped magnetic field, considering convective perturbations and particle velocity distribution 08 p1555 A70-21981

Trapped particle vibrations stability during quasi-neutral plasma disturbance due to centrifugal drift in stellarator electric field 08 p1555 A70-21982

Ion-acoustic wave oscillations of weak collision plasma in strong electromagnetic field, discussing instability 09 p1736 A70-23198

Beam plasma system instability, studying anomalous diffusion toward vessel walls as function of generated oscillations 09 p1737 A70-23335

Microwave-induced ionization oscillations in resonant plasma column excited by low pressure mercury DC discharge 10 p1922 A70-23988

Ionosphere effect on toroidal magnetodynamic waves in idealized representation, analyzing oscillations correlation between adjacent magnetospheric shells 10 p1875 A70-24444

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency 10 p1925 A70-25011

Langmuir oscillations excited by electron beam in plasma during instability development, investigating temporal and spatial structure using visualization 10 p1925 A70-25019

Nonlinear interaction between plasma and HF field near cyclotron frequency, studying plasma oscillations generation in strong magnetic field 10 p1925 A70-25102

Excitation of plasma ion-cyclotron oscillations by ion beam passing through neutral gas along magnetic field, noting radial stabilization 10 p1926 A70-25118

Unsteady plasma oscillation stabilization by envelope controller with spatial and temporal dispersion 11 p2087 A70-25604

Surface waves stability in cold bounded plasma against background of steady state electron oscillations, using nonlinear approximation 11 p2089 A70-25716

Wakes of cylinder in collision-free plasma wind tunnel simulating ionospheric satellite conditions, noting decaying oscillation 11 p1976 A70-26018

Linear theory of density gradient drift waves in stable collision dominated plasma using external excitation method 11 p2090 A70-26019

Acoustic perturbations in stationary weakly ionized pulsed neon plasma 11 p2096 A70-26842

Hot-electron cold-ion plasma with anisotropic electron velocity distribution function, discussing stability under finite pressure and unstable oscillation forms 12 p2277 A70-27314

Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions 12 p2278 A70-27358

Density gradient drift waves stabilization in collisionless plasma by stellarator type windings, observing oscillations amplitude reduction in shear magnetic field 12 p2280 A70-27785

Tonks-Dattner resonances in plasma columns, considering viscosity effect on radial oscillations in nonuniform plasmas 12 p2281 A70-27792

Stellar and nebular magnetic fields formation, considering role of high temperature plasma random charge and current fluctuations 12 p2307 A70-27864

Plasma properties investigation by laser beam probes, considering direct observation of oscillation mode 13 p2458 A70-28564

Nonlinear dielectric function and propagators of plasma submitted to electric field by Vlasov equation iterative solution, considering electron plasma in thermodynamic equilibrium 13 p2458 A70-28565

Mathematical models reproducing nonlinear mode interactions in CW bounded plasma devices 13 p2458 A70-28567

Parametric excitation of potential oscillations in plasma near cyclotron frequency subjected to UHF electric and constant magnetic fields 13 p2463 A70-29281

Discharge effects on LF oscillations and ion extraction in hot cathode Penning plasma 13 p2463 A70-29370

Finite Larmor radius interchange and LF drift oscillations due to magnetospheric temperature and density gradient stresses in trapped plasma 13 p2401 A70-29936

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant [ALAA PAPER 69-232] 13 p2475 A70-29961

Landau and Doppler-shifted cyclotron damping effects on helicon-like and plasma excitations of many-valley semiconductors 13 p2472 A70-30016

Plasma pi-electrons effects in annulene molecules, obtaining dispersion relation for plasma oscillations by Hueckel theory 14 p2621 A70-30116

Continuity equation plasma oscillation, discussing ion current waveform flowing from discharge and implications for periodic astrophysical phenomena 14 p2638 A70-30618

Parametric oscillation instabilities in plasma under magnetic field perpendicular to circularly polarized or hybrid electric field 14 p2624 A70-31042

Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum 15 p2777 A70-31459

Radial distributions and escape of charged particles across magnetic field in hot cathode Penning discharge plasma with LF oscillations 15 p2780 A70-32191

Energy bands shape effect on fluctuations in nonequilibrium low resistance semiconductor plasma 15 p2784 A70-32192

Inhomogeneous ion beam plasma LF instability, showing oscillations amplitude maxima in radial density gradient regions 15 p2780 A70-32193

Partially ionized plasma stability with allowance for ionization and recombination processes, discussing ion-acoustic oscillations 15 p2781 A70-32823

Plasma helix equilibrium and stability in transverse magnetic field, considering oscillation damping by ohmic heating 15 p2781 A70-32910

PLASMA PERTURBATION

Plasma echo oscillations due to superposition of consecutive perturbations separated by intervals greater than characteristic decay time

16 p2957 A70-33198

Ion beam scattering at turbulent plasma oscillations in glass chamber containing low pressure air

16 p2958 A70-33253

LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes

16 p2958 A70-33254

Collisionless plasma theory modification to include effects of finite Larmor radius of ion and electron on perturbation flow mixing

17 p3141 A70-34935

Magnetic perturbation effects on magnetoactive plasma, considering Boltzmann transport equation, plasma-electromagnetic interactions, heating, cooling, etc

17 p3142 A70-35592

Surface oscillations energy and attenuation in damped spectral region of semibounded degenerate electron plasma

18 p3293 A70-36143

HF oscillations excitation in decaying plasma-electron beam system, noting Coulomb collisions and nonlinear effects role

18 p3294 A70-36145

Regular and stochastic oscillations in plasma beam discharge produced by beam instability from observing time dependent variations in spectral line luminescence intensities

18 p3294 A70-36147

Finite size particle physics for plasma computerized simulation, considering longitudinal oscillations, scattering cross sections, diffusion coefficients, etc

18 p3296 A70-36791

Hydrodynamic model analogy to water bag/incompressible homogeneous fluid in phase space/, investigating nonlinear collisionless plasma oscillations

19 p3474 A70-37365

Homogeneous plasma electrostatic oscillations excitation by electromagnetic waves nonlinear interaction in magnetic field, deriving expression for density perturbation

19 p3475 A70-37536

Finite electron beam plasma system, investigating relationship between linear fluctuations temporal growth and resulting stationary oscillations spatial growth

19 p3475 A70-37540

Plasma lasers, investigating striation oscillations and excess noise phenomena and generation mechanisms

19 p3446 A70-37858

Solid state plasmas waves and oscillations in metals, semiconductors, noting applications for microwave devices

19 p3479 A70-37944

Plasma anomalous diffusion relation to self excited LF oscillations

19 p3480 A70-38016

Nonuniform electron plasma trapped in one dimensional potential well, determining linear oscillations by normal mode approach

19 p3482 A70-38944

Rarefied plasma flute oscillation stabilization in magnetic field, using controlled electron beams

20 p3677 A70-39173

Cold electron plasma nonlinear oscillations in magnetic field, using mathematical model

20 p3678 A70-39591

Electromagnetic waves and oscillations excited by magnetic current ring source around infinitely long compressible plasma column, deriving radiation field distribution

20 p3685 A70-40506

Excitation of plasma ion-cyclotron oscillations by ion beam passing through neutral gas along magnetic field, noting radial stabilization

20 p3685 A70-40511

HF electromagnetic field effect on nonhomogeneous collisionless magnetized plasma stability, deriving dispersion equation for drift cyclotron oscillations

21 p3854 A70-40622

Statistical analysis of random oscillations excited in electron beam-plasma system based on signal recording data

21 p3855 A70-40631

Plasma and spiraling electron beam interactions, observing oscillations above integral multiples of electron cyclotron frequency

21 p3857 A70-41388

Plasma wave echo, observing oscillatory behavior of perturbed distribution with different phases and amplitudes

21 p3858 A70-41389

Two probe electron energy distribution measurements in gaseous discharges with random and coherent oscillations, giving xenon results at low pressures

21 p3828 A70-41471

Electron-neutral collisional damping of longitudinal electron oscillations in weakly ionized plasma, solving linearized Boltzmann-Vlasov equation

21 p3860 A70-42014

LF self excited oscillations in inhomogeneous afterglow magnetoplasma measured by Langmuir probe, noting dissipative drift instabilities

22 p4079 A70-42372

Electron beam instability in cylindrical magnetically confined plasma column, calculating quasi-static spatial growth increments

22 p4080 A70-42403

Electronic damped plasma oscillations eigenfrequency in presence of external electric field

22 p4082 A70-43253

Collision integral model for multicomponent mixture, investigating partially ionized plasma longitudinal vibrations

22 p4083 A70-43382

Potassium plasma-electron beam interaction, studying LF instability due to electron and ion heating

22 p4083 A70-43385

Electric field finite amplitude oscillations of electron hole plasma during pinch effect, considering impurities stabilizing effect

22 p4084 A70-43468

Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions

22 p4084 A70-43599

Geomagnetic tail and plasma sheet hydromagnetic oscillations, deriving dispersion equations and stability conditions

23 p4184 A70-43829

MHD instability due to strong magnetic field induced scattering of plasma oscillations, using one sided Q device

23 p4223 A70-43949

Plane plasma waves in homogeneous conducting fluid with magnetic field, considering oscillations of two-fluid, cold and hot plasmas

23 p4224 A70-44179

Collisionless plasma weak turbulence theory derivation from Vlasov equations, considering interactions between oscillation modes

23 p4225 A70-44182

Homogeneous plasma in unidirectional oscillatory electric field, solving Boltzmann equation by electron distribution function expansion

23 p4225 A70-44240

Ion beam scattering at turbulent plasma oscillations in glass chamber containing low pressure air

23 p4226 A70-44282

LF oscillations of bounded low pressure plasma under magnetic field in discharge chamber, determining spatial distribution by Langmuir sliding probes

23 p4226 A70-44283

Uniform HF electric field effect on ion-acoustic oscillation instability in nonisothermal magnetized current-carrying plasma

24 p4383 A70-45118

Electron plasma oscillations excitation by ion-acoustic waves

24 p4386 A70-45607

LF instability in plasma produced by electron cyclotron resonance in nonuniform magnetic and electromagnetic fields

24 p4386 A70-45613

Resonant electrons interaction with turbulent ion-acoustic plasma oscillations consisting of superimposed three dimensional random phase wave packets

24 p4386 A70-45658

Large amplitude high phase velocity oscillations anomalous damping in electron-ion plasma resulting from MHD instability

24 p4387 A70-46091

PLASMA PERTURBATION U PLASMA OSCILLATIONS PLASMA PHYSICS

Soviet book on plasma physics covering noninteracting and colliding particle motion, elementary processes, electric discharges, kinetic equations, macrocharacteristics, plasmoids, etc

01 p0151 A70-10500

Cryogenically cooled superconducting electromagnets design, construction and properties for research in plasma and solid state physics, considering coil systems

01 p0143 A70-10970

One dimensional nonlinear model of anisotropic plasma instability with respect to Alfvén waves growth, noting applicability to solar wind processes

01 p0153 A70-11597

Collection of papers on advances in plasma physics, Volume 2, covering Cs plasma, waves in interstellar plasma and shock waves

03 p0533 A70-14014

Shock wave research in plasma physics, discussing classical gas dynamic shock wave theory, detonation waves, collisional shocks, relativistic velocity shock waves, etc

03 p0533 A70-14017

Phenomena in ionized gases - Conference, Bucharest, September 1969

03 p0534 A70-14359

Plasma nature, properties and applications, discussing echoes, shocks, phase mixing and hot plasma containment

05 p0887 A70-16130

Collection of papers on advances in plasma physics, Volume 3

06 p1121 A70-17901

Plasma dielectric tensor derived quantum mechanically, emphasizing similarity in classical and quantum mechanical methods, discussing linear wave propagation, kinetic equations, etc

06 p1121 A70-17904

Superposition of dressed particles in plasma kinetic theory proved by using generalized stochastic equation for conditional probability density for one particle

06 p1124 A70-18500

Argon ion CW lasers, discussing design, inverse population, plasma, radiative transition probabilities, pumping, frequency spectra and active medium

07 p1298 A70-19642

Real plasma isotherms using three component /atoms, electrons, positive ions/ model in search for supercooled dense plasma

07 p1349 A70-19651

Monograph on research by Japanese Institute of Plasma Physics covering theta pinch, plasma heating, flow, diagnostics, etc

07 p1350 A70-19843

Plasma physics relating turbulence to cosmic rays covering oscillations, turbulent acceleration, subcosmic rays, langmuir turbulence spectra and acceleration, etc

07 p1371 A70-20332

Vlasov equations and irreversibility in plasma physics and stellar dynamics, calculating statistical entropy and relaxation time

08 p1550 A70-20556

Solar wind ejection, analyzing regions of heat conducting fluxes and laminar patterns

08 p1561 A70-21059

Monochromatic plane electromagnetic wave incident from vacuum on plane boundary of plasma half space, discussing specular reflection and diffuse scattering boundary conditions

08 p1553 A70-21611

Collective approach to thermodynamics of N-particle electron gas including transverse radiation, calculating internal energy and pressure of modes

08 p1553 A70-21612

Model for magnetic field-line reconnection in conducting incompressible fluid, determining maximum reconnection rate entirely by null point conditions

08 p1553 A70-21615

Vacuum UV atomic nitrogen and oxygen lines contribution to energy transfer in high density plasma, noting f values and Stark half widths

09 p1730 A70-22229

Diamagnetic plasma in nonuniform magnetic fields, determining equilibrium plasma configurations in and near neutral point for low and high pressure

09 p1734 A70-22478

Book on electrodynamics of particles and plasmas covering Cerenkov and gyro radiation, point charge motion, magneto-ionic theory, Boltzmann-Vlasov equations, etc

09 p1734 A70-22637

Boltzmann collisionless transport equation for relativistic plasma solved by expanding distribution function in terms of unnormalized spherical harmonics

10 p1923 A70-24228

Waveguides consisting of three concentric regions suitable for plasma experiments, showing dispersion characteristics and cut-off frequencies

10 p1850 A70-24835

Cascade mechanism of closure associated with nonlinear wave interactions between modes in turbulent plasmas, using hydrodynamical model

11 p2087 A70-25358

Transformed distribution function of particle velocity of plasma in Debye thermodynamic equilibrium approximation based on statistical mechanics

11 p2091 A70-26459

Quiescent plasma physics - Conference, Paris, September 1969, Part 1

12 p2279 A70-27776

Physics of quiescent plasmas - Conference, Paris, September 1969, Part 2

12 p2279 A70-27782

Physics of quiescent plasmas - Conference, Paris, September 1969, Part 3

12 p2280 A70-27790

Simulated isotropic lossless plasma radiating apertures located on nonplanar models, relating results to antenna radiation patterns

12 p2282 A70-27969

Reciprocity principle for biased and two component compressible plasmas

12 p2282 A70-27971

Nonlinear effects in plasmas - Conference, Orsay, Essonne, France, September 1966

13 p2456 A70-25551

Sheath structure of plasma diode using kinetic theory model of plasma-sheath transition

13 p2376 A70-28642

- Collision coefficients of reaction and inverse reaction for nonequilibrium processes with variable distribution functions and cross sections
13 p2461 A70-28920
- Alfven waves wavelengths dependence on inhomogeneous magnetic field geometry in stationary plasma, using conformal transformations
13 p2462 A70-28984
- Book on plasma physics covering properties, particle and wave motion, instabilities, shock waves, application to light nuclei controlled fusion, etc
13 p2465 A70-29783
- Raman scattering cross sections in solid state semiconductor plasma in magnetic field from phonon fluctuations
14 p2621 A70-30485
- Electron distribution for transport coefficients in Lorentzian plasma under magnetic field, determining electrical conductivity, thermal diffusion and viscosity
14 p2623 A70-31033
- Thermal relaxation rate in one and two dimensional electron plasma models with positive background, using particle in cell simulation
14 p2624 A70-31047
- Report to COSPAR on Swedish space research /1969/ including rocket-borne auroral particle experiments, plasma physics, atmospheric, solar, cosmic radiation, etc
15 p2830 A70-31722
- Plasma reflection edge in thin film InAs semiconductors, calculating refractive index and extinction coefficient from free charge parameters
15 p2783 A70-31966
- Vlasov equations and irreversibility in plasma physics and stellar dynamics, calculating statistical entropy and relaxation time
15 p2781 A70-32711
- Lorentz plasma electron velocity distribution with allowance for elastic and inelastic collisions, using Legendre polynomial and spherical harmonic expansions in Boltzmann equation
16 p2945 A70-34337
- Electrothermal instability in nonequilibrium plasma interpreted in terms of generalized instability in gas discharge
17 p3139 A70-34550
- Laboratory experiments applicability to interplanetary plasma physics, describing simulations of solar wind interactions, magnetosphere, collisionless shock waves, etc
17 p3164 A70-35123
- Nonideal plasma thermodynamics data, discussing particle interactions, Coulomb potential, stability, etc
17 p3142 A70-35733
- Magnetic probes effectiveness study of electron heating behind shock wave front in plasma, measuring electron temperature
18 p3294 A70-36149
- Collisional contribution to finite wavelength high frequency dielectric constant of Coulomb plasma
18 p3295 A70-36439
- Collection of papers on methods in computational physics, plasma physics covering Vlasov equation, simulation, finite difference, etc
18 p3295 A70-36787
- Electrostatic sheet model for plasma, emphasizing computer solutions of various problems
18 p3295 A70-36788
- Fourier and Hermite transform methods for Vlasov equation solutions in plasma physics
18 p3296 A70-36789
- Finite size particle physics for plasma computerized simulation, considering longitudinal oscillations, scattering cross sections, diffusion coefficients, etc
18 p3296 A70-36791
- Finite difference methods for collisionless plasma models, taking into account Eulerian form of Vlasov equation in phase space
18 p3296 A70-36792
- Collisions in one, two and three dimensional plasmas of finite sized particles and clouds, obtaining scattering cross sections and Fokker-Planck coefficients
20 p3679 A70-39663
- Gas dynamics turbulence of controlled properties effect on electrical discharge across plasma stream, preventing filamentary nature
20 p3681 A70-40008
- High speed cameras for submicrosecond exposures in plasma research involving theta and zeta pinches
20 p3635 A70-40526
- Schrodinger equation for hydrogen solved for high pressure behavior of materials, applying to stellar atmospheres and laboratory plasmas
21 p3849 A70-40933
- Binary Boltzmann operator for quantum statistical second virial coefficient for real gases and plasmas in two-particle scattering problem involving Jost function
22 p4081 A70-42824
- Hot plasmas physics - Conference, Newbattle Abbey, Scotland, July-August 1968
23 p4224 A70-44176
- Plasma kinetic theory, applying Boltzmann equation, Lorentz gas model and relaxation method
23 p4224 A70-44177
- Plasma kinetic theory, considering crossing from instability to stability, waves decay by collisional damping and emission by bremsstrahlung
23 p4224 A70-44178
- Plasma macroscopic and microscopic instabilities derivation from MHD and Vlasov equations
23 p4224 A70-44180
- Plasma physics computational problems concerning controlled thermonuclear reactions, considering instability and equilibrium numerical calculations
23 p4224 A70-44181
- Plasma physics and MHD in astrophysics of sun and stars, discussing stellar magnetism origin and evolution, solar and stellar atmospheres, pulsars, etc
23 p4256 A70-45042
- PLASMA PINCH**
NT THETA PINCH
Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency
[AIAA PAPER 69-113] 07 p1348 A70-19323
- Axisymmetric instabilities by Z-pinch and reverse axial current discharges in plasmas of arbitrary conductivity
08 p1554 A70-21810
- Feedback stabilization of surface instabilities of highly conducting plasma, discussing application to linear pinch with uniform axial static magnetic field
09 p1734 A70-22272
- Pinched plasma reversed current induction due to relativistic electron beam injection
09 p1736 A70-23183
- Computer models simulating plasma motion applied to sheet pinch stability, investigating relativistic and nonrelativistic regimes
14 p2623 A70-30696
- Gas kinetic pressure profile and mass density of propagating current sheet in argon pinch discharge, using piezoelectric transducer
14 p2624 A70-31041
- Gas pressure effects on visible and UV laser action in small argon Z-pinch plasma discharge, using streak photographs
15 p2750 A70-31968
- Pinch effect in degenerate and nondegenerate electron hole plasma in semiconductors during bimolecular bulk recombination
18 p3298 A70-36620
- Conical plasma gun with Z pinching restrained by axial magnetic field, describing operating characteristics
19 p3480 A70-38018
- Laser interferometry with unstable external resonator, determining radial electron density distributions during implosion phase of linear z-pinch discharge in argon
20 p3630 A70-39420
- High speed cameras for submicrosecond exposures in plasma research involving theta and zeta pinches
20 p3635 A70-40526
- Electric field finite amplitude oscillations of electron hole plasma during pinch effect, considering impurities stabilizing effect
22 p4084 A70-43468
- PLASMA POTENTIALS**
Probe impedance loss in cold magnetoplasma related to distribution of point charge potentials
02 p0346 A70-12124
- Thermodynamic potential of meson-nucleon plasma, showing variation of Landau equation of state in hydrodynamic theory of multiple particle production
03 p0527 A70-13052
- Plasma space potential measurement by RF characteristics of Langmuir probe
07 p1288 A70-20233
- Scalar potential nonlinear fluctuations in quasi-stationary plasma, deriving expressions for potential spectral function and Langmuir and ion-acoustic fluctuations spectral densities
08 p1550 A70-20844
- Vacuum arc discharge phases before total breakdown, studying high combustion voltage relation to interplasma double layer potential difference
10 p1969 A70-25115
- Emissive probes for measuring plasma potentials over different ion density ranges on SERT spacecraft, detailing calibration and mechanical and electronic configurations
13 p2404 A70-28519
- Collisionless alkali plasma diode with two electrodes emitting electrons and ions with half-Maxwellian velocities, analyzing potential distribution
14 p2622 A70-30660
- Spherical electrostatic probe in uniform quiescent continuum slightly ionized gas for range of bias potential and radius-Debye length ratio
16 p2912 A70-33863
- Plasma space potential measurement with heavy ion beam probe using cesium gun and electrostatic energy analyzer
16 p2960 A70-34339
- Potential calculation from given source distribution, including direct and iterative methods, error analysis, convergence, computer programs and applications in plasma physics
18 p3284 A70-36790
- Phase rate of plasma potential variations in fast ionization waves without electron distribution assumptions
21 p3856 A70-40949
- LF resonances and potential in plane nonisothermal plasma layer, considering electromagnetic field interaction and ionic collisions
24 p4383 A70-45116
- Spatial potential measurements in magnetized non-Maxwellian hydrogen plasma, using Zaitsev-Mnev method
24 p4385 A70-45464
- PLASMA POWER SOURCES**
NT PLASMA ENGINES
Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution
[AIAA PAPER 69-259] 11 p2102 A70-26120
- Army Missile Command 8000 kw plasma facility automatic control system design
20 p3606 A70-39689
- Plasma accelerators for nuclear EM propulsion, considering power supply requirements and differences between plasma and ion engines
22 p4070 A70-43186
- PLASMA PROBES**
NT ELECTROSTATIC PROBES
Probe impedance loss in cold magnetoplasma related to distribution of point charge potentials
02 p0346 A70-12124
- Spherical probe impedance in infinite collisional isotropic plasma investigated for ionospheric applications, selecting electron density
06 p1117 A70-17369
- RF probe admittance in ionosphere investigated for cold anisotropic and warm isotropic plasma diagnostics
06 p1117 A70-17370
- RF probe impedance variations with magnetic field strength in hot plasma for electron gyrofrequencies less than plasma frequency explained by model
06 p1117 A70-17371
- Quadrupole probe for ionospheric plasma resonances involving measurement of mutual impedance between pairs of electrodes
06 p1117 A70-17373
- Sweeping W wire probe in rotational high temperature plasmas for local heat transfer measurement
06 p1120 A70-17699
- Diagnostic methods for field-free plasmas with medium dispersed optical-spectrographic and source monitoring equipment
06 p1063 A70-17728
- Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role
06 p1064 A70-17886
- Periodic potential probe for diffusive flux to wall measurements in negative glow and back diffusion plasmas
06 p1074 A70-18617
- Plasma sheath transition structure surrounding cylindrical probe in weak axial magnetic field on basis of moment equations
07 p1353 A70-20230
- Thermal sheaths effect on cooled probes for stationary and flowing plasmas measurements at high pressure
08 p1497 A70-21528
- Electron temperature distribution in thermal boundary layer about probe electrodes calculated by successive approximations allowing for electron heating by arc
09 p1734 A70-22167
- Electron and proton temperature differential near earth bow shock determined from plasma probe measurements by Vela 4B satellite
09 p1670 A70-23486
- Plasma magnetic field measurement by scattered light, analyzing electron spectrum modulation with gyration frequency
10 p1916 A70-24401
- Transfer impedance measurement for HF quadrupole probe immersed in hot magnetoplasma
10 p1877 A70-24709
- Neutral-dominated plasma turbulence, discussing space-time plasma probe correlation functions for electron density fluctuations measurements
11 p2095 A70-26757
- Mathematical model of microwave probe for reentry plasma, using variational method to calculate reflection coefficient
12 p2230 A70-26983
- E region plasma parameters measurement by in situ probes, considering electron density and temperature
12 p2225 A70-27737

PLASMA PROPULSION

Emissive probes for measuring plasma potentials over different ion density ranges on SERT spacecraft, detailing calibration and mechanical and electronic configurations [AIAA PAPER 69-272] 13 p2404 A70-28519

Plasma properties investigation by laser beam probes, considering direct observation of oscillation mode 13 p2458 A70-28564

RF floating double probe for plasma ionization density and electron temperature 15 p2778 A70-31755

Magnetic fields effect on probe measurements in weakly ionized Ar plasma flow at atmospheric pressure 17 p3139 A70-34693

Continuum theory of spherical electrostatic probes as measuring devices in high density weakly ionized gases 17 p3140 A70-34931

Plasma resonance phenomena related to ionospheric plasma parameters using gyroplasma probe on Kappa 8-15 sounding rocket 17 p3077 A70-35307

Winter ionosphere electron density profile from rocket-borne gyro-plasma probe observations 17 p3078 A70-35308

Ionospheric sounding with gyro-plasma probe on Kappa 8-15 rocket, discussing electron density profiles and plasma resonance 17 p3079 A70-35638

Miniature multigrid probes for measuring energy spectra of charged particles and absolute plasma densities, comparing results to microwave measurements 18 p3294 A70-36150

Plasma properties across bow shock and in magnetosheath as function of supersonic solar wind 19 p3494 A70-37481

Emitting plasma probes floating potential, discussing emission rate dependence on probe temperature and surface coverage by seed 20 p3632 A70-39607

Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream 20 p3684 A70-40259

Maintenance voltage of RF argon thermal induction plasma at atmospheric pressure as function of ring probe 21 p3859 A70-41904

Probe technique for plasma electron temperature measurements at medium and high pressures, examining thermal boundary effects 22 p4078 A70-42362

Nonzero electron temperature effect on mutual impedance of quadrupole probe in hot isotropic plasma 22 p4080 A70-42720

Plasma with oriented charged particle fluxes macroscopic parameter measurement by multigrid probes facing and reversed to drift, noting graphical data processing 24 p4385 A70-45454

PLASMA PROPULSION

Chemical engineering problems of resistojets, pulsed plasma, ion bombardment and colloid thrusters 01 p0166 A70-10974

TV data transmitted by Iantars series automatic ionospheric laboratories released by geophysical rockets at 100-400 km, discussing plasma-ion propulsion system performance 04 p0735 A70-14936

Plasma devices for spacecraft propulsion taking into account electrothermal, electromagnetic and electrostatic systems 05 p0895 A70-15817

Repetitively pulsed quasi-steady vacuum arc magnetoplasmadynamic accelerator for propulsion, using electrolytic capacitors as power source [AIAA PAPER 70-167] 06 p1133 A70-18228

Pulsed plasma transfer systems weight analysis, studying propellant density gradients effects on coaxial plasma gun performance [AIAA PAPER 70-168] 06 p1133 A70-18231

Kaufman thruster performance dependence on transmission of ion extraction optics and magnetic field shape 07 p1365 A70-19705

RF interference emanating from satellite-borne pulse plasma thruster by measuring RF power at UHF antenna having plasma in near field 11 p2103 A70-26136

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode [AIAA PAPER 69-241] 13 p2475 A70-29959

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant [AIAA PAPER 69-232] 13 p2475 A70-29961

Continuously working plasma thrusters, describing operating principles of Hall current and self magnetic acceleration systems 15 p2790 A70-32277

Axial propellant density gradients and circuit capacitance correlated with pulsed coaxial plasma gun efficiency 21 p3858 A70-41726

PLASMA RADIATION

Equilibrium state of high current discharge in low conductivity plasmas, obtaining light sources at low temperatures 01 p0152 A70-10993

Bremsstrahlung emission from thermal plasma coexisting with relativistic electron tails, noting enhancement at electron plasma frequency harmonics 02 p0348 A70-12240

Focused deuterium plasma discharge neutrons and X rays energy spectra, flux and time resolved collimation measurement with nuclear emulsions and scintillation detectors 02 p0348 A70-12241

Cylindrical axial plasma flow fields velocity radial dependence measurement by double-wedge spectroscopy using Abel unfolding of Doppler shifts 02 p0349 A70-12657

Laser emission action at 4880 Å in plasma discharge from injecting electron beam into Ar at different pressures 03 p0530 A70-13063

Electron relaxation in shock heated Ar plasma estimated by measuring radiation intensity at various frequencies 03 p0535 A70-14363

Photon absorption and emissivity of nonequilibrium cylindrical plasma in Doppler broadened lines and hemisphere approximation 04 p0724 A70-14411

Phase lock technique study of 10.6 micron radiation effect in carbon dioxide laser plasmas on 2.4 micron spontaneous emissions and plasma impedance 05 p0857 A70-16071

Electron distribution function in quasi-static free moderately ionized plasma with partial radiation trapping determined from electron-electron collisions 05 p0889 A70-16452

Charged particle concentration emitted by inhomogeneous plasma determinable from emission spectral lines broadening, suggesting error correction procedure 05 p0889 A70-16541

Astrophysical plasmas radio emission interpreted as collective bremsstrahlung due to ultrarelativistic electron tails, discussing Crab Nebula, quasars and Jupiter 05 p0904 A70-16932

Transmission and emission of radiation from dense inhomogeneous finite laboratory plasma column in magnetic field with interpretation by cold plasma theory 06 p1116 A70-13767

Cerenkov radiation in infinite anisotropic electron plasma linearly polarized in magnetic field having linear electron distribution moving with uniform velocity 06 p1120 A70-17538

Uranium plasma design and characteristics, measuring emission and absorption coefficients as function of temperature and pressure [AIAA PAPER 70-43] 06 p1122 A70-18084

Spectrally and spatially resolved measurements on arc heated Ar plasma radiation for eliminating discrepancies in transition probabilities [AIAA PAPER 70-42] 06 p1122 A70-18187

Inhomogeneous plasma cylinder skin effect, surface impedance, radiation transport and mean noise temperature 07 p1347 A70-19107

Plasma polarization shift for resonance line of ionized He in shock tube due to negative space charge 07 p1348 A70-19273

Pulsed dense argon plasma arcs radiation spectra in visible and UV regions as function of current and pressure 07 p1349 A70-19652

Emission containment and working temperature reduction possibility in thermonuclear reactor by increasing plasma densities and introducing large atomic number contaminants 07 p1350 A70-19847

Electron density dependence on electron temperature during self and mutual interaction of electromagnetic waves in magnetoplasma, tabulating numerical results 07 p1351 A70-19968

Radio wave propagation in anisotropic plasma consisting of oxygen ions and protons, deriving expressions for radio wave refractive index 07 p1355 A70-20452

Plasma display system characteristics and history, discussing gas discharge cell construction and behavioral mechanisms 08 p1499 A70-21688

Fluidic logic elements to control firing and extinction of plasma matrix display system cells with constant electrical power supply 09 p1673 A70-22032

Thermal radiative transfer in nonuniform anisotropic magnetoactive plasma, correcting term of Zheleznyakov equation 09 p1734 A70-22514

Photon bremsstrahlung from relativistic hydrogen plasma determined by studying electron-positron pairing effect on plasma radiation intensity 09 p1735 A70-22986

Distortion of electromagnetic pulse undergoing total internal reflection in inhomogeneous isotropic plasmas in lower ionosphere 09 p1639 A70-23672

Fluidic logic elements for controlling selected cells extinction in hybrid plasma-fluidic display 09 p1738 A70-23758

Laser radiation conversion into kilovolt X rays using planar heated plasma, discussing electron temperature role 10 p1921 A70-23987

Radiative capacity measurement for plasmas produced from nonconducting materials by pulsed discharges in magnetic field 10 p1923 A70-24252

Continuum radiation of nitrogen plasma at atmospheric pressure at high temperatures 10 p1923 A70-24472

Stationary low pressure plasma enclosed in emitting surfaces calculated for spatial charge density distribution 10 p1923 A70-24539

Plasmas role in emission mechanisms active in celestial sources of radiation, discussing sun and quasars 10 p1948 A70-25027

Energy balance of self sustaining thermonuclear reaction with nonuniform magnetic field in wall-contained dense plasma, allowing for radiation losses 11 p2088 A70-25709

Microwave radiation from electron beam generated turbulent magnetoplasma measured, indicating enhancement near electron cyclotron harmonic frequencies 11 p2095 A70-26760

Stellar plasma neutrino pair emission, comparing photon neutrino coupling with current current coupling theory and white dwarf evolution 12 p2297 A70-26976

Radiative intensity calculations for carbon dioxide and carbon dioxide-nitrogen plasmas for various temperatures, densities and path lengths, computing UV and continuum spectra 12 p2275 A70-27170

Radiation emission and transfer in unsteady outer space plasmas, discussing turbulence mechanisms involving electron and ion motion, relativistic and non-relativistic electron beams, etc 12 p2305 A70-27854

Bremsstrahlung radiation emitted from homogeneous, field free, nonrelativistic plasma, deriving formulas 13 p2456 A70-28500

Incoherent scattering of radiation from collisionless plasma in quasi-stationary state, analyzing wave energy from spectral decomposition for given background distribution function 13 p2457 A70-28558

Far UV emission spectrum of plasma produced by laser beam impact on Al target observed as function of time, determining electron temperature 13 p2460 A70-28729

Gas discharge gap preionization by thin preheated tungsten wire ignition without explosion, resulting in plasma turbulence prevention and radiation density increase 13 p2462 A70-28986

Electron collision frequency effects on Cerenkov radiation from magnetoplasma, applying results to magnetosphere and ionosphere 13 p2465 A70-29546

Delayed ionospheric resonance echoes radiated from topside plasma after pulse sequence stimulation by Alouette 2 satellite 13 p2370 A70-29904

Emission resonances at harmonics of electron cyclotron frequency in laboratory plasmas, considering stellar optical radiation 13 p2467 A70-29915

Pulsar radiation emission by electrons and protons in close orbit taking into account density, energy and correlation in plasma 14 p2638 A70-30617

Time controllable continuous photon emission from plasma produced by pulsed laser vacuum spark applied to absorption spectroscopy in vacuum UV 15 p2734 A70-31757

Distant radiation from magnetic line source in moving isotropic plasma, discussing dependence on velocity 15 p2778 A70-31835

Two diaphragm combustion shock tube for plasma radiation energy transfer, describing development, performance, make-up and testing 15 p2779 A70-32019

Uranium plasma emission coefficients as function of DC arc operation, measuring intensity spectrum with scanning spectrometer
[AIAA PAPER 70-692] 16 p2950 A70-33554

Plasma wave radiation by electron stream in active solar corona, obtaining spectrum and growth rate 16 p2979 A70-34189

Oxygen, nitrogen and argon plasma total radiation measurement at various wavelengths and temperatures 17 p3139 A70-34547

Rayleigh-Gans-Born approximation application to the thermal radiation of reflecting convex plasma sphere, cylinder and ellipsoid 18 p3294 A70-36146

Regular and stochastic oscillations in plasma beam discharge produced by beam instability from observing time dependent variations in spectral line luminescence intensities 18 p3294 A70-36147

Radiation condition for unbounded anisotropic dispersive magnetoplasma 18 p3295 A70-36492

Radial profiles of emission and absorption coefficients and temperatures in cylindrically symmetric plasmas 19 p3475 A70-37551

Microwave diagnostics of electron density, temperature and light emission in self excited moving striations in hydrogen plasma 19 p3475 A70-37553

Particle flux diagnostics of nonisothermal low pressure plasma, using corpuscular passive method 19 p3476 A70-37556

Surface layer heating of solid body by dense gas discharge plasma radiation, comparing vaporization and reversible opacity onset times in quartz 19 p3482 A70-38733

Ball lightning model assuming radiation field within plasma dielectric region resonant at higher than collision frequency 22 p4016 A70-42780

Scattering indicatrix of electromagnetic radiation in plasma caused by electron-ion interactions 22 p3989 A70-43141

Laser light pulse interaction with solid targets, observing second harmonic generation in induced plasma from time resolved spectra 22 p4084 A70-43673

Atomic hydrogen plasma slab, calculating thermodynamic equilibrium deviations effect on resonance radiation 23 p4223 A70-43824

Hypervelocity impact flash resolved into submicrosecond continuum radiation pulse succeeded by slow rising long duration light pulse from neutral atomic line emission 23 p4227 A70-44553

X ray spectra from paraboloidal plasma focus devices, measuring electron energy produced by photoelectric effect and by Compton scattering 23 p4229 A70-44990

Expansion of laser produced plasma into uniform magnetic field, calculating electromagnetic radiation 24 p4382 A70-45108

Transition radiation due to charged particle moving in periodically stratified cold isotropic plasma 24 p4384 A70-45254

Anisotropic turbulent plasma EM emission due to density fluctuations, noting relationship to turbulence spectrum 24 p4384 A70-45256

Solar flare microwave spectra from coherent plasma emission mechanism 24 p4396 A70-45390

Microwave emission from Maxwellian magnetoplasma in uniform magnetic field 24 p4386 A70-45606

PLASMA RESONANCE

Conductivity and permittivity for ion and electron resonance region of ionospheric plasma model calculated in quasi-hydrodynamic approximation 01 p0082 A70-11528

Warm Maxwellian plasma stabilization of velocity-space instabilities, evaluating densities and temperatures for stabilizing resonant loss-cone modes 02 p0347 A70-12237

Surface wave attenuation in homogeneous plasma cylinder caused by resonance in transition layer between plasma and vacuum 03 p0447 A70-13286

Tonks-Dattner resonances peaks in rare gas plasmas, considering electron densities variations role 03 p0534 A70-14211

Magnetized resonantly sustained HF plasma column wave properties, obtaining above-critical density as function of static magnetic induction 04 p0728 A70-14999

Microwave cavity perturbation measurements of electron densities at electroacoustic resonances excited in afterglow plasma 04 p0728 A70-15004

Topside ray trajectories near upper hybrid resonance 04 p0650 A70-15119

Coupling between LF oscillations and third harmonic frequency resonances of bounded plasma capacitor system, discussing density profile variation 05 p0890 A70-16654

Plasma oscillations, resonances and wave propagation characteristics analyzed by radio pulse sounders for application to space measurements 06 p1115 A70-17360

Ionospheric observations of resonance oscillations using satellite-borne radio sounding instruments 06 p1115 A70-17361

Plasma resonances, considering unbounded and bounded uniform and nonuniform plasmas and nonlinear effects 06 p1116 A70-17365

Electrostatic oscillations in cylindrical column of laboratory plasmas excited by electromagnetic waves, investigating resonances by cold plasma theory 06 p1116 A70-17368

Quadrupole probe for ionospheric plasma resonances involving measurement of mutual impedance between pairs of electrodes 06 p1117 A70-17373

Satellite observations of VLF and ELF resonances related to ionospheric plasma singularities 06 p1118 A70-17375

Plasma polarization shift for resonance line of ionized He in shock tube due to negative space charge 07 p1348 A70-19273

Ion resonance instability in nonneutral plasmas, considering ions addition to low density electron cloud with low kinetic energy 07 p1352 A70-19991

Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations 07 p1276 A70-20425

Longwave and shortwave mode transformation in resonant layer of inhomogeneous plasma 08 p1550 A70-20847

Discharge current effect on shape and position of resonance curves for electron concentrations during microwave oscillation conversion in magnetoactive plasma 08 p1551 A70-20866

Narrow band detector for polarized light in far UV based on plasma resonance 09 p1676 A70-22650

Ionospheric plasma lower hybrid resonance measurement and excitation via rocket-borne probe 09 p1670 A70-23319

Modulation coupling between electron and ion resonances in magnetoactive plasmas, discussing probeless feedback stabilization scheme 11 p2091 A70-26403

Plasma resonance excitation by small pulsed dipole in weakly inhomogeneous plasma determined using WKB solutions and stationary phase approximations 12 p2277 A70-27188

Resonant and nonresonant coupling between two coherent electron plasma waves propagating in opposite directions, considering parametric decay 12 p2279 A70-27780

Tonks-Dattner resonances in plasma columns, considering viscosity effect on radial oscillations in nonuniform plasmas 12 p2281 A70-27792

Energy loss radial dependence due to K resonance radiation for infinitely long plasma cylinder, using approximation method for integrals 13 p2461 A70-28731

Topside ionosphere structure deduced from resonance spikes on ionograms obtained by Alouette 2 satellite and electron density distributions 13 p2395 A70-29091

Alouette satellite antennas and receivers for detecting plasma resonances and VLF signals, noting ground station telemetry link 13 p2380 A70-29902

Alouette 1 plasma resonance observations, analyzing electron density measurements in sheath region and cyclotron harmonic resonant frequencies 13 p2466 A70-29903

Delayed ionospheric resonance echoes radiated from topside plasma after pulse sequence stimulation by Alouette 2 satellite 13 p2370 A70-29904

Floating resonance spike on Alouette 2 ionograms after sounder pulse transmission at half upper hybrid frequency, noting harmonic excitation role 13 p2370 A70-29905

Alouette plasma resonance stimulated perpendicularly to magnetic field by planar dipole charge sheet and permeable grids 13 p2467 A70-29907

Time decay of higher order cyclotron harmonic resonances with decreasing perpendicular wave number 13 p2467 A70-29908

Dispersion and group velocity characteristics of topside resonance oblique echoes near plasma frequencies observed by satellite 13 p2467 A70-29909

Local resonance at upper hybrid frequency from satellite observation, noting effects of electron plasma/cyclotron frequency ratio 13 p2370 A70-29911

Infinitesimal dipole moving through hot uniform electron plasma in magnetic field, investigating asymptotic time behavior of plasma resonance 13 p2467 A70-29912

Collision and motion effect on rocket-borne quadrupole probe transfer impedance near lower hybrid resonance in ionosphere 13 p2371 A70-29919

Bounded hot plasmas with/without steady magnetic field, discussing ion-electron resonances 15 p2779 A70-31997

Plasma resonance phenomena related to ionospheric plasma parameters using gyroplasma probe on Kappa 8-15 sounding rocket 17 p3077 A70-35307

Ionospheric sounding with gyro-plasma probe on Kappa 8-15 rocket, discussing electron density profiles and plasma resonance 17 p3079 A70-35638

Tonks-Dattner resonances in warm inhomogeneous plasma column, examining kinetic theory for waveform shapes and resonance location 19 p3475 A70-37534

Diffuse plasma resonance sequence observed on Alouette 2 ionograms, showing pattern similar to spread echo 20 p3620 A70-39335

Topside plasma frequency resonance below electron cyclotron frequency, discussing ray paths and delay times 20 p3620 A70-39336

Cold nonuniform plasma slab model for afterglow echoes at upper hybrid resonance in uniform magnetic field 20 p3679 A70-39664

Nonlinear resonance conditions for plasma three-wave interactions, considering wave propagation modes and constant magnetic field 20 p3682 A70-40137

Collisionless plasma shock wave instability, discussing resonance and energy dissipation through ion Landau damping 22 p4077 A70-42292

Slow wave propagation on conducting surface separated from plasma by ion sheath, observing resonances on cylindrical antenna 22 p4082 A70-43238

Magnetosonic resonance excitation in waveguide winding wrapped around plasma cylinder 22 p4082 A70-43380

Atomic hydrogen plasma slab, calculating thermodynamic equilibrium deviations effect on resonance radiation 23 p4223 A70-43824

LF resonances and potential in plane nonisothermal plasma layer, considering electromagnetic field interaction and ionic collisions 24 p4383 A70-45116

Resonant electrons interaction with turbulent ion-acoustic plasma oscillations consisting of superimposed three dimensional random phase wave packets 24 p4386 A70-45658

PLASMA RINGS

U TOROIDAL PLASMAS

PLASMA ROCKETS

U PLASMA ENGINES

PLASMA SHEATHS

Spherical and cylindrical electrostatic probe operation analyzed under conditions producing collision-dominated sheaths 01 p0149 A70-10105

Driving point admittance of infinite cylindrical antenna excited by uniform gap and immersed in lossy compressible isotropic plasma, discussing propagation constants 01 p0051 A70-11102

Equatorial patterns measurement of plasma covered axially slotted cylindrical antenna, describing discharge tube, facility and Langmuir probe survey of tube electron density 02 p0269 A70-12590

Microwave nonlinear effects including mixing, harmonic generation and current rectification observed in plasma sheath surrounding Langmuir probe using PIG discharge 05 p0852 A70-16992

Electromagnetic radiation patterns from aperture in conducting cylinder coated with moving isotropic plasma sheath, noting sheath velocity and plasma frequency influence 06 p1020 A70-17564

Reentry plasma RF noise temperature in-flight measurements by Trailblazer 2 compared with computed data 06 p1008 A70-17568

Boundary conditions and iterative procedures for plasma sheath problems, using matrix equation to represent differenced Poisson equation 06 p1123 A70-18295

Plasma sheath transition structure surrounding cylindrical probe in weak axial magnetic field on basis of moment equations

07 p1353 A70-20230

Low energy ions incidence angle effects on secondary electron emission from molybdenum cylinders in low pressure plasma, noting role of Langmuir sheath around target

07 p1355 A70-20356

Supersonic flight vehicle plasma sheath effect on effective range of onboard radar installation, discussing SNR

08 p1461 A70-20869

Plane electromagnetic wave scattering by perfectly conducting cylinder coated with moving dielectric or plasma sheath, using relativity theory, Lorentz transformations, etc

08 p1551 A70-21251

Thermal sheaths effect on cooled probes for stationary and flowing plasmas measurements at high pressure

08 p1497 A70-21528

Plasma sheath in quadrupole and hexapole geometries, investigating magnetic field variation, particle density and electrostatic potential in transition layer

08 p1552 A70-21530

Integrated electron density determination for plasma sheath on reentry vehicle based on power coupling change measurement

08 p1552 A70-21596

Electron density reduction in plasma surrounding reentry vehicle due to N atom removal by water droplets injection

09 p1737 A70-23237

Ion acoustic wave propagation near sheath at plasma-wall boundary in low pressure argon plasma measured by electron beam probe

10 p1921 A70-23965

Ion-burst excited by pulsed mesh grid in plasma in connection with sheath structure

10 p1922 A70-23989

Comets ionized shells, studying plasma expansion in corpuscular solar wind magnetic field

10 p1940 A70-24372

Surface waves excited by oscillating current in cold plasma surrounded by metallic sheath of infinite conductivity, deriving frequencies and growth rates

11 p2089 A70-25717

Stability of realistic inhomogeneous plasmas with sheaths, examining electron beam-stable Maxwellian plasma interaction

11 p2090 A70-26021

Sheath structure of plasma diode using kinetic theory model of plasma-sheath transition

13 p2376 A70-28642

Cylindrical electric dipole antenna in magnetoactive ionospheric plasma, noting ion sheath effect on input impedance and active length

13 p2399 A70-29402

Plasma sheath boundary as closed Mach surface, demonstrating Bohm criterion application to ion velocity component normal to sheath edge

13 p2464 A70-29465

Transition radiation in plasma sheet in vacuum assuming specular reflection of electrons at vacuum boundary

13 p2464 A70-29512

Radiation from electric dipole oriented normal to magnetostatic field in plasma column improving antenna transmission characteristic during reentry

13 p2467 A70-29913

Electric field intensity and extension of space charge sheath for ion extraction from nitrogen plasma

14 p2622 A70-30661

Container wall-collision plasma sheath model for charge carrier investigation using velocity distribution [DFVLR-SONDDR-51]

14 p2622 A70-30662

Low density collisionless plasma sheath in planar and cylindrical geometry under weak magnetic field, considering ion-electron pair generation

14 p2624 A70-31040

Steady state potential distributions near photoemitting plate immersed in plasma, noting overshoot effects role for sheaths around satellites in interplanetary plasma

15 p2778 A70-31906

Plasmopause motion in equatorial plane under sudden dawn-dusk field with constant solar wind-magnetosphere interaction

20 p3620 A70-39341

Radiation theory circular waveguide in dominant TE mode and flush mounted to infinite conducting flat ground plane covered by plasma or dielectric sheath

20 p3586 A70-39500

Positive ions energy dispersion effused from RF plasma, presenting ion extraction model for plasma sheath system and equivalent circuit

20 p3678 A70-39608

Ionospheric plasma sheath effect around floating cylindrical high power dipole antenna, obtaining electron, ion and potential profiles

20 p3589 A70-40466

Spacecraft sheath structure, potential and velocity effects on ion current measurements by traps and mass spectrometers

21 p3816 A70-41087

Continuous pseudoacoustic and ion waves excitation and damping in plasma sheath around grid, taking into account transit time effect on ion acceleration

21 p3858 A70-41710

Sheaths effect on capacitance of plane grid capacitor in plasma, discussing satellite aerials admittance

21 p3792 A70-42046

Plasma sheath boundary in anisotropic plasma taking into account ionization rate, momentum transferring collisions and finite ion temperature

22 p4077 A70-42291

Electron densities between inner edge plasma sheet and plasmasphere as function of geocentric radial distance fromOGO-3 electrostatic measurements

23 p4236 A70-43834

Dipole antenna in compressible lossy plasma, calculating sheath and absorptive surface effects on current distribution from boundary value problem formulation

23 p4228 A70-44963

Quasi-ambipolar diffusion in arc discharges in magnetic field, calculating ions and electrons density distributions between anode and cathode sheaths

24 p4384 A70-45148

PLASMA SLABS

Seasonal effect on F region midlatitude slab thickness diurnal variations during magnetic disturbances using monitoring VHF signals from geostationary satellites

02 p0290 A70-12160

Microwave transmission through afterglow of RF excited electrodeless He discharge approximating low collision frequency plasma slab of uniform electron density in magnetic field

03 p0530 A70-13152

Electromagnetic wave growth effect on wave field propagating along beam-plasma slab, showing Poynting vector component

04 p0651 A70-15293

Power reflection and transmission coefficients for polarized electromagnetic waves incident on plasma slab moving along magnetostatic field

06 p1008 A70-17566

Effective noise temperature of planar aperture antennas in lossy inhomogeneous plasma slabs calculated by computer

09 p1646 A70-22704

Electromagnetic scattering from underdense plasma slabs with randomly varying dielectric constant, calculating reflection coefficient

11 p2095 A70-26763

Small amplitude HF electromagnetic wave penetration in hot plasma slab, showing wave period/transit time ratio dependence of electromagnetic field distribution

14 p2551 A70-31037

Electromagnetic field transmission through plasma slab with specified electron density-collision frequency profiles, using integral derived from transmission and reflection coefficients

16 p2957 A70-32979

VLF wave generation due to nonlinear interaction of two microwaves with plasma slab under high DC field

22 p4077 A70-42294

Total electron content and equivalent slab thickness statistical data during magnetic disturbances from AT-3 satellite VHF transmission observations

22 p4020 A70-43162

Atomic hydrogen plasma slab, calculating thermodynamic equilibrium deviations effect on resonance radiation

23 p4223 A70-43824

Geomagnetic tail and plasma sheet hydromagnetic oscillations, deriving dispersion equations and stability conditions

23 p4184 A70-43829

PLASMA SOUND WAVES

U MAGNETOHYDRODYNAMIC WAVES

U PLASMA WAVES

PLASMA SPECTRA

Giant pulse Q switched lasers generated plasmas, noting VUV spectral line shifts, asymmetries and existence of satellite lines

02 p0345 A70-11894

Spectrum function in Booker scattering formula /first order Born approximation/ for dielectric constant fluctuations in hypersonic wake plasmas

03 p0529 A70-12908

Supersonic plasma jets studied spectroscopically, determining atomic levels populations, population inversion conditions, electron temperature and concentration distributions, etc

03 p0531 A70-13254

Plasma jet temperature and density determination from intensity ratio of H beta line and continuous spectrum

04 p0725 A70-14535

Vibrational relaxation and continuous spectrum transition during dissociation of diatomic low temperature plasma

04 p0721 A70-14539

Classical path methods for treating Stark spectral line broadening in plasmas illustrated by Lyman alpha line of hydrogen calculations

04 p0726 A70-14670

Visible light emission from nonequilibrium Cs plasma measured for spectral intensity distribution, suggesting excitation mechanism in terms of collision-radiation model

05 p0887 A70-16109

Transition probability and Stark profile of H alpha standards for absolute intensity calibration of spectroscopic data from thermal shock tube plasma

05 p0853 A70-17083

Plasma quasi-stationary turbulence spectrum determination from nonlinear equations for Langmuir waves interaction, considering fast particles effects

06 p1119 A70-17499

Calcium neutral and ionic lines broadening and shift by microfields measured by plasma flame observations

06 p1148 A70-18453

Turbulence spectra and generated power determined for plasma turbulence in objects with high electromagnetic radiation density /quasars and supernova shells/

07 p1384 A70-19412

Scalar potential nonlinear fluctuations in quasi-stationary plasma, deriving expressions for potential spectral function and Langmuir and ion-acoustic fluctuations spectral densities

08 p1550 A70-20844

Photoelectrons entry into F region detected at conjugate point during winter night by Thomson scatter observations of plasma lines appearing in signal spectrum

08 p1489 A70-21386

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics

08 p1554 A70-21802

Langmuir HF turbulence effect on anisotropic plasma oscillation spectra, determining instability conditions

08 p1554 A70-21809

Plasma electron density determination by number of extreme resolved line, considering broadening action by Doppler effect for Balmer, Lyman and Paschen series

09 p1734 A70-22731

High electron density plasma generation by ionized gaseous filament explosion, noting plasma frequency effect on spectral brightness

10 p1915 A70-23961

Plasma turbulence spectral theory, considering cascade processes in collisional and collisionless dissipation

11 p2095 A70-26756

Radiative intensity calculations for carbon dioxide and carbon dioxide-nitrogen plasmas for various temperatures, densities and path lengths, computing UV and continuum spectra

12 p2275 A70-27170

Turbulence spectrum due to density fluctuations in plasma with strong magnetic field, using hydrodynamic theory and Poisson equations

13 p2457 A70-28559

Radial ion temperature distribution in hydrogen arc within axial magnetic field measured spectroscopically by thermal Doppler effect

14 p2621 A70-30657

Plasma satellites near He I forbidden lines during turbulent heating

19 p3475 A70-37441

Coupling constant and binary collision expansions for ion motion in plasma line broadening

21 p3855 A70-40722

Steady state frequency spectra for Alfvén waves and MHD turbulence in collisionless plasma with nonlinear interaction by particle scattering

24 p4383 A70-45114

Clean shock tube maintaining high gas purity level for Ar plasma spectroscopy

24 p4388 A70-46271

PLASMA SPRAYING

Parameters effect on radius of dispersion during plasma and detonation spray coating process of niobium and zirconium carbides

06 p1076 A70-17849

Directional emissivity and thermal diffusivity of solids at 1000-3000 K by radiation comparison method, applying to sintered and plasma sprayed Mu, Ta and W

23 p4207 A70-44661

PLASMA STABILITY

U MAGNETOHYDRODYNAMIC STABILITY

PLASMA TEMPERATURE

Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions

01 p0153 A70-11598

Measurement techniques for determining density and temperature distributions along radius of plasma cylinder by electron cyclotron resonance, microwave refraction and acoustic resonance

02 p0349 A70-12758

P-n junction and microplasmas voltage temperature coefficients during avalanche breakdown
03 p0541 A70-13729

Electron temperature of hydrogen-oxygen flame plasma obtained by floating probe method compared to spectroscopic method results
03 p0608 A70-14380

Thin film heat gauge for measuring thermal transport from plasma to end wall of shock tube, discussing measurements in high temperature Ar
03 p0496 A70-14381

Plasma jet temperature and density determination from intensity ratio of H beta line and continuous spectrum
04 p0725 A70-14535

Excitation temperature functions calculated in rare gases spectrum lines to determine radial plasma temperature distribution
05 p0886 A70-15798

Laser produced plasma temperature measurements using method of X rays selective transmissions through different absorbing films
06 p1081 A70-17596

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form
06 p1135 A70-17895

Longitudinal spectral line intensity distributions measured for plasma temperature determination
06 p1074 A70-18601

Equivalent excited-state temperature of high pressure plasma calculated for unequal electron and gas temperature, considering ion and electron recombination
06 p1114 A70-18634

Plasma temperatures in magnetosphere, investigating ion energy balance, electron heating and agreement with rocket measurements
08 p1489 A70-21381

Alkali seeded plasma electron density and temperature enhancement by laser resonance pumping
08 p1552 A70-21576

Thermal and nonthermal plasmas for ion production, discussing gas pressure, voltage and discharge current effects on electron temperature
09 p1734 A70-22037

Plasma energy confinement time as function of discharge parameters for plasma thermal insulation in Tokamak-3
11 p2088 A70-25713

Thermal conductivity of argon, nitrogen and air plasmas at atmospheric pressure and 6500-16500 K range, discussing electric arc source
11 p2148 A70-25760

Nitrogen oxide ions mobility in air calculated at high plasma temperatures
12 p2276 A70-27845

Impurities and electrothermal instabilities effect on conductivity of two temperature nonequilibrium plasma
12 p2281 A70-27846

Variable temperature plasma with two ion species, noting rarefaction wave propagation during one dimensional expansion into vacuum
13 p2464 A70-29415

High argon plasma temperatures via pulsing constricted electric arc
14 p2621 A70-30504

Mars upper atmosphere refractivity, free electron number density and plasma temperature altitude profiles from Mariner 1969 radio occultation measurements
14 p2646 A70-31072

Plasma temperatures of X ray flux from laser induced breakdown plasmas in air, using absorption spectrometer
[ARL-70-0145] 15 p2750 A70-31753

Anisotropic temperature plasma susceptibility calculation based on velocity moment equations and circular polarized coordinates, compared to Vlasov equation solution
17 p3140 A70-34929

Ar plasma generation by focused Q switched ruby laser beam, measuring density and temperature by electro-optical spectroscopy
17 p3107 A70-35111

Spatial-temporal distribution of laser spark plasma electron density and temperature based on holographic interferometry
18 p3265 A70-36152

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature
[AIAA PAPER 69-183] 18 p3208 A70-36694

Electronic excitation contribution to frozen properties and cut-off criteria of high temperature gas plasma
18 p3296 A70-36955

Radial profiles of emission and absorption coefficients and temperatures in cylindrically symmetric plasmas
19 p3475 A70-37551

Microwave diagnostics of plasma temperature and conductivity in streaming nitrogen arc with skin effect under atmospheric pressure
19 p3476 A70-37554

Ion temperatures and incident intensities in plasmas produced by solid target irradiation with Q switched laser beam
19 p3479 A70-37765

Soviet papers on transfer phenomena in low temperature plasmas
19 p3480 A70-38180

Emitting plasma probes floating potential, discussing emission rate dependence on probe temperature and surface coverage by seed
20 p3632 A70-39607

Spectral lines self rotation effects on plasma temperature and density measurement in MHD duct boundary layer
20 p3678 A70-39632

X ray emission of hot dense intergalactic plasma, discussing evolution equation for temperature and degree of gas ionization vs red shift
21 p3877 A70-40702

Low electron temperature plasma measurements by electrostatic planar guard ring probe with floating potential electrode, discussing electronic circuit
21 p3830 A70-42015

Probe technique for plasma electron temperature measurements at medium and high pressures, examining thermal boundary effects
22 p4078 A70-42362

Plasma generation by pulsed laser heating, investigating ionization effects on temperature
22 p4082 A70-43224

Temperature, densities and electric field strength of cascaded arcs burning in He under normal pressure
24 p4384 A70-45425

Translational temperature measurement of atoms and ions in plasma based on wavelength reduction by X ray spectroscopy
24 p4388 A70-46208

PLASMA THEORY U PLASMA PHYSICS

PLASMA TURBULENCE

LF electromagnetic waves theory for turbulent plasma based on expansion of particle collision and turbulent pulsation integrals
01 p0150 A70-10211

Particle distribution and plasma nonequilibrium field evolution with turbulence generation by microwave field, considering plasma kinetic instability
01 p0150 A70-10212

Kinetic equation of helicons interactions in electron-hole plasma, discussing turbulence spectrum and effect on current carrier drift velocity
03 p0531 A70-13407

Turbulent submerged plasma jet boundaries calculated theoretically and compared with experimental results from dynamic head profiles
03 p0532 A70-13515

Plasma turbulence theory formulated using averaging operators, obtaining nonlinear dispersion relation for turbulent diffusion coefficients
03 p0537 A70-14377

Turbulent-plasma electrons ballistic effects on solar wind magnetic field fluctuations in lunar vicinity
04 p0753 A70-15123

HF conductivity tensor of isotropic plasma, taking into account particle correlations describing weakly Langmuir turbulent plasma
05 p0889 A70-16532

Plasma quasi-stationary turbulence spectrum determination from nonlinear equations for Langmuir waves interaction, considering fast particles effects
06 p1119 A70-17499

Anisotropic plasma instability in nonlinear stage, studying turbulent relaxation of ion distribution by quasi-linear theory
06 p1119 A70-17501

Turbulence spectra and generated power determined for plasma turbulence in objects with high electromagnetic radiation density /quasars and supernova shells/
07 p1384 A70-19412

Scalar radiative transport equation solved iteratively for microwaves backscattering from turbulent plasma, deriving model for direct and cross polarized cross section
07 p1353 A70-19993

Plasma physics relating turbulence to cosmic rays covering oscillations, turbulent acceleration, subcosmic rays, langmuir turbulence spectra and acceleration, etc
07 p1371 A70-20332

Langmuir HF turbulence effect on anisotropic plasma oscillation spectra, determining instability conditions
08 p1554 A70-21809

Turbulent diffusion and ion heating in plasmas in presence of current instability
08 p1554 A70-21813

Nonlinear wave interactions in quiescent plasma column with external disturbance creating broadened frequency spectrum and weakly turbulent plasma
10 p1922 A70-24146

Cascade theory of turbulence, applying cascade decomposition resulting from Navier-Stokes application to hydrodynamic turbulence to Riemann equation for atmospheric and plasma turbulence
10 p1868 A70-24167

LF ion-acoustic wave nonlinear interaction with HF Langmuir waves in nonisothermal plasma, establishing criteria for ion plasma turbulence
10 p1925 A70-25103

Cascade mechanism of closure associated with nonlinear wave interactions between modes in turbulent plasmas, using hydrodynamical model
11 p2087 A70-25358

Turbulence of fluids and plasmas - Conference, New York, April 1968
11 p2093 A70-26751

Plasma turbulence stochastic processes, considering radiation, transport and acceleration mechanisms and relationships to fluid turbulence
11 p2094 A70-26752

Plasma turbulence theory, discussing particles stochastic acceleration in strong electric field
11 p2094 A70-26753

Thermal plasma devices with discrete modes, describing periodic pulling and transition to continuous noise spectrum characteristic of turbulence
11 p2094 A70-26754

Plasma turbulent diffusion across constant magnetic field, noting magnetic, kinetic energy and relaxation times ratio effects
11 p2094 A70-26755

Plasma turbulence spectral theory, considering cascade processes in collisional and collisionless dissipation
11 p2095 A70-26756

Neutral-dominated plasma turbulence, discussing space-time plasma probe correlation functions for electron density fluctuations measurements
11 p2095 A70-26757

Microwave radiation from electron beam generated turbulent magnetoplasma measured, indicating enhancement near electron cyclotron harmonic frequencies
11 p2095 A70-26760

Microwave scattering by turbulent plasma electron density fluctuations
11 p2096 A70-26765

Radar interferometry as diagnostic method for remote probing of turbulent plasma
11 p2096 A70-26766

Homogeneous plasma turbulence growth limits, determining bounds on density and electromagnetic field nonlinear fluctuations in thermodynamic terms
11 p2096 A70-26767

Turbulent flowing plasma, analyzing wavenumber frequency dependent spectral function and space-time correlation function
11 p2096 A70-26768

Plasma turbulence theory application to experimental phenomena using two stream instability example
11 p2096 A70-26769

Solar wind magnetic field power spectra and plasma velocity, discussing turbulence, viscosity and dissipation
11 p2106 A70-26770

Turbulence in incompressible electrically conducting fluid with uniform applied magnetic field, discussing nonlinear energy transfer mechanisms and magnetic effects
11 p2096 A70-26771

Gas and electron density fluctuations in weakly ionized turbulent wake behind hypersonic spheres and cones
11 p1978 A70-26773

Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions
12 p2278 A70-27358

Diffusion coefficients measurements in velocity space from ion-ion collisions and ion wave microturbulence, supporting theoretical calculations and diffusion equations in plasma
12 p2279 A70-27777

Collisional drift-wave turbulence in Li Q-machine plasma far unstable regime, discussing power spectra variations of density fluctuations
12 p2280 A70-27784

Radiation emission and transfer in unsteady outer space plasmas, discussing turbulence mechanisms involving electron and ion motion, relativistic and non-relativistic electron beams, etc
12 p2305 A70-27854

Plasma turbulence in Van Allen belts, examining weak turbulent electromagnetic wave properties, with emphasis on trapped energetic particles radiation
13 p2486 A70-28555

Turbulence spectrum due to density fluctuations in plasma with strong magnetic field, using hydrodynamic theory and Poisson equations
13 p2457 A70-28559

Collisionless plasmas strong turbulence in terms of mixing length and Hamilton-Jacobi theories
13 p2458 A70-28562

Witness particle electric field as function of nonlinear conductivity of weakly turbulent anisotropic plasma by perturbation method
13 p2465 A70-29638

Stochastic particle acceleration by VLF in weakly turbulent plasmas in magnetic field, considering nonlinear cyclotron damping
13 p2468 A70-29935

PLASMA WAVES

Anisotropic plasma turbulence produced by two stream instability onset near light cylinder of rotating magnetic star for pulsar model 14 p2640 A70-30788

Weakly turbulent plasma dielectric constant nonlinear tensor for frequent Coulomb collisions, using hydrodynamic equations 15 p2781 A70-32824

Coherent wave propagation in warm turbulent plasma, using perturbation method for wave dispersion 16 p2860 A70-32945

Ion beam scattering at turbulent plasma oscillations in glass chamber containing low pressure air 16 p2958 A70-33253

Electron density fluctuations in transitional zone of turbulent plasma jet, using digital analysis of Langmuir probe signals [AIAA PAPER 70-731] 16 p2958 A70-33495

Correlation functions of weak quasi-steady plasma turbulence determined by plasmon interactions, using computerized integral equation 17 p3139 A70-34643

Mutual coherence function of light scattered by plasma turbulent electron density fluctuations, taking into account refractive index changes 17 p3137 A70-35722

Interplanetary plasma disturbances in Venus proximity from Venera measurements 18 p3312 A70-36172

Electron beam interaction with ionized K plasma, considering Langmuir waves instability, turbulence and electron heating 18 p3295 A70-36614

Relativistic electron spectra of cosmic rays accelerated by plasma turbulence, examining singularity in solution 18 p3322 A70-37127

Permittivity tensor of weakly turbulent magnetoactive cold electron plasma, calculating nonlinear currents 20 p3677 A70-39296

Electromagnetic waves scattering from dense turbulent plasma, calculating radar cross sections of inhomogeneous plasma for peak electron densities 20 p3586 A70-39459

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties 20 p3684 A70-40258

Current driven ion wave plasma turbulence in collisionless shock, measuring frequency and wave number spectra by shock front light scattering 20 p3685 A70-40497

Temporal and spatial origin of hot ions in turbulent plasma heating, using particle analysis 21 p3855 A70-40824

Plasma turbulence statistical theory in magnetic field based on averaging operators, deriving nonlinear dispersion relation 21 p3857 A70-41386

Electromagnetic scattering power spectrum from underdense turbulent plasmas, deriving first and second moments 21 p3858 A70-41732

Collisionless magnetospheric plasma turbulent conductivities for weak and strong electric fields parallel to magnetic field 22 p4016 A70-42787

Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions 22 p4084 A70-43599

Collisionless plasma weak turbulence theory derivation from Vlasov equations, considering interactions between oscillation modes 23 p4225 A70-44182

Turbulent collisionless plasma shocks formation, wave front steepness and explanation for earth bow shock 23 p4225 A70-44183

Ion beam scattering at turbulent plasma oscillations in glass chamber containing low pressure air 23 p4226 A70-44282

Scaling laws for turbulent plasma anomalous conductivity dependent on electrostatic fluctuation spectrum 23 p4227 A70-44796

Turbulent plasma without external magnetic field, observing low phase velocity ion wave mode 23 p4227 A70-44893

Anisotropic turbulent plasma EM emission due to density fluctuations, noting relationship to turbulence spectrum 24 p4384 A70-45256

Resonant electrons interaction with turbulent ion-acoustic plasma oscillations consisting of superimposed three dimensional random phase wave packets 24 p4386 A70-45658

PLASMA WAVES

NT ELECTROSTATIC WAVES

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting cases 01 p0149 A70-10162

LF electromagnetic waves theory for turbulent plasma based on expansion of particle collision and turbulent pulsation integrals 01 p0150 A70-10211

Absorbed RF plasma wave noise spectrum in region of anomalous dispersion, noting peak in far IR region 01 p0150 A70-10286

Acoustic wave excitation and damping in cryogenic He plasma produced by HF pulse discharge, considering nonadiabatic heating and dissipation during reflection 03 p0529 A70-13056

Ion-cyclotron oscillations in plasmas, considering plasma waves and oscillation characteristics 03 p0530 A70-13065

Charged particles motion in isotropic weakly ionized plasma acoustic wave associated with difference in electrons and ions entrainment by neutral particles 03 p0530 A70-13087

Dispersive compression of plane frequency modulated waves in inhomogeneous plasma based on generalizing geometric optics approximation to unsteady quasi-harmonic processes 03 p0447 A70-13287

Van der Pol equation for finite amplitude ion-acoustic waves in unstable plasma propagating across weak magnetic field 03 p0531 A70-13404

Nonlinear drift wave buildup in inhomogeneous plasma faster than in linear approximation 03 p0531 A70-13509

MGD finite flow regions surrounded by nonconducting gas, considering wave behavior at boundary of conducting region and magnetic field influence 03 p0533 A70-13803

Solutions properties of initial and mixed initial-boundary value problems of wave equations 03 p0537 A70-14384

Collimated light beam enhanced scattering and anomalous absorption due to decay into plasma waves 04 p0727 A70-14996

Nonlinear propagation of electron plasma wave in cylindrical waveguide, discussing linear theory of electrostatic waves in cold plasma 04 p0728 A70-15000

Electrostatic field effects of electromagnetic wave propagation in anisotropic plasma 04 p0728 A70-15002

Critique of paper on transverse enhanced bremsstrahlung from supraluminous and subluminal longitudinal waves in isotropic homogeneous plasma 04 p0728 A70-15006

Scattering cone of hydromagnetic waves propagating along magnetic lines in magnetized plasma with oscillating electric dipole 04 p0683 A70-15738

Auroral radio reflections using two coherent bistatic radio systems, discussing ionoacoustic waves in auroral plasma 05 p0837 A70-16072

Plasma behind pressure front of shock wave investigated for ionization mechanism by microwave reflection and transmission, noting electron temperature distribution 05 p0887 A70-16110

Fields and power transfer for electromagnetic waves in hot plasma calculated using Fourier integral and Fourier series methods 05 p0888 A70-16165

Two dimensional propagation of transverse waves in plasma with embedded curl-free magnetic field, discussing cosmic ray acceleration and magnetic neutral sheet formation 05 p0888 A70-16437

Stability of nonlinear plasma waves set up by counterstreaming cold electron beams immersed in background of stationary ions 05 p0889 A70-16531

Whistler mode wave propagation in collisionless Vlasov plasma along nonuniform magnetic field 05 p0889 A70-16533

Thermal radiation effects on plane magnetoacoustic waves in semiinfinite expanse of radiating gas of perfect electrical conductivity 05 p0890 A70-16822

Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar 05 p0917 A70-16904

Relativistic plasma waves in uniform ambient magnetic field analyzed for growth rate to investigate plasma instabilities of streaming cosmic rays 05 p0904 A70-16931

Uniqueness and reciprocity theorems in elastic medium occupying infinite domain extended to electromagnetic wave propagation in plasma 05 p0890 A70-17097

Plasma waves in space and laboratory - NATO Conference, Norway, April 1968 06 p1114 A70-17359

Plasma oscillations, resonances and wave propagation characteristics analyzed by radio pulse sounders for application to space measurements 06 p1115 A70-17360

Plasma wave theory and experiments, emphasizing stable Maxwellian plasmas and transverse and longitudinal wave modes in zero and nonzero magnetic fields 06 p1116 A70-17366

Low altitude electric and magnetic measurements of plasma waves in space from OV3-3, Pioneer 8 andOGO 5 satellite observations 06 p1118 A70-17376

Plasma waves and instabilities, detailing linearized Vlasov-Maxwell equations solution appropriate to Landau problem 06 p1118 A70-17378

Linear transformation of waves in nonuniform magnetoactive plasma by solving wave equation with/without allowance for spatial dispersion 06 p1119 A70-17498

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons 06 p1121 A70-17802

Kinetic theory of plasma waves in magnetic field, covering small amplitude waves in infinite homogeneous plasma, limiting cases, etc 06 p1121 A70-17902

Electron plasma wave damping by ion sound wave scattering using Vlasov equation 06 p1125 A70-18638

Waves and differential equations for electromagnetic field in nonuniform magnetized plasma described for all orders in electron and ion temperature 07 p1350 A70-19823

Dispersion of ion-acoustic waves in quiescent rare gas discharge plasmas, discussing model simulating ion waves generated by finite sine wave bursts 07 p1352 A70-19990

Asymptotic method for Vlasov equation formulated for weakly Landau damped monochromatic plasma wave in collisionless electron plasma 07 p1353 A70-20231

Asymptotic method for Vlasov equation of plasma wave reformulated in Eulerian representation 07 p1354 A70-20232

Diener kinetic theory for charged particles in EM field with Coulomb interactions taking into account transverse plasma waves 08 p1550 A70-20616

Longwave and shortwave mode transformation in resonant layer of inhomogeneous plasma 08 p1550 A70-20847

Plasma monochromatic wave propagation equilibrium state instability mechanisms, discussing stimulated scattering by thermal plasma particles and particle capture in wave potential well 08 p1551 A70-21422

Acoustic wave propagation in partially ionized gas in external electric field, solving differential equations by Laplace transformation 08 p1552 A70-21503

AM electromagnetic wave self modulation in magnetoplasma, considering self and mutual interaction of ordinary and extraordinary propagation modes 08 p1552 A70-21527

Weakly nonlinear dispersive cold plasma waves propagation by two time scale expansion, taking into account amplitude dispersion and coupling 08 p1553 A70-21613

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency 08 p1554 A70-21804

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action 08 p1554 A70-21805

Pulse propagating in unstable plasma, determining characteristics by asymptotic expansion applied to Vlasov-Maxwell equations 09 p1734 A70-22684

Nonlinear effects related to plane electromagnetic wave propagation in weakly ionized plasma 09 p1735 A70-22842

Spontaneous echoes amplitude resulting from damped electronic plasma plane wave excitation in collisionless plasma 09 p1735 A70-22843

Fokker-Planck Coulomb collisions effect on plasma wave echoes 09 p1736 A70-23181

Wave dispersion relations in uniform magnetized plasma represented in single integral form, discussing model loss-cone and temperature anisotropy distributions 09 p1736 A70-23188

Amplitude modulation of microwave signals propagated through periodically varying plasma 09 p1639 A70-23673

Oblique E-mode electromagnetic wave in plane stratified collisionless plasma taking into account plasma temperature 09 p1639 A70-23674

Ion acoustic wave propagation near sheath at plasma-wall boundary in low pressure argon plasma measured by electron beam probe

10 p1921 A70-23965

Two-stream and cross-stream effects on nonlinear wave stability with shock in collisionless plasma

10 p1921 A70-23967

Ion-burst excited by pulsed mesh grid in plasma in connection with sheath structure

10 p1922 A70-23989

Fast magnetoacoustic wave propagation in cylindrical plasma column with constant current density, using geometric optics

10 p1923 A70-24229

Helicon wave dispersion in cold multicomponent plasma of n-type Si and Ge semiconductors in linear hydrodynamic approximation

10 p1928 A70-24832

Type I comet tails orientations dispersion attributed to nonradial plasma waves and discontinuities in interplanetary gas, calculating solar angular momentum loss rate

10 p1947 A70-24987

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting gases

10 p1925 A70-25010

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis

10 p1925 A70-25031

Narrow band radiation from longitudinal plasma waves nonlinear interactions during solar bursts, comparing flux intensities for Corona single or double shock wave frequencies

10 p1934 A70-25272

Cascade mechanism of closure associated with nonlinear wave interactions between modes in turbulent plasmas, using hydrodynamical model

11 p2087 A70-25358

Long-time cross modulation field resulting from triggering electrostatic waves in one dimensional plasma, discussing supraluminous waves interactions

11 p2088 A70-25704

HF and LF plasma waves interaction in three wave approximation taking into account linear damping

11 p2089 A70-25714

Surface waves stability in cold bounded plasma against background of steady state electron oscillations, using nonlinear approximation

11 p2089 A70-25716

Surface waves excited by oscillating current in cold plasma surrounded by metallic sheath of infinite conductivity, deriving frequencies and growth rates

11 p2089 A70-25717

Chemical kinetic model for photoexcitation and photoionization of cold argon ahead of strong shock wave, predicting electron and excited atom concentrations

[ALAA PAPER 68-666]

11 p2090 A70-25953

Linear theory of density gradient drift waves in stable collision dominated plasma using external excitation method

11 p2090 A70-26019

Nonlinear parametric excitation of stable resonant drift waves by mode-mode coupling in potassium plasma of Q device

11 p2090 A70-26020

Refractive index profiles method for vertically polarized electromagnetic waves in horizontally stratified magneto-plasma extended to anisotropic media, noting relevance to ionospheric propagation

11 p2011 A70-26555

Wave propagation in solid state plasma with ferroelectric and ferromagnetic properties, deriving matrix equation allowing for nonlinearity of dielectric constant and magnetic permeability

12 p2283 A70-26970

Dispersion relations between wave frequency and vector obtained from matrix equation for wave propagation in solid state plasma with ferroelectric and ferromagnetic properties

12 p2283 A70-26971

Diluted plasma microinstabilities allowing for Langmuir waves propagation without magnetic field and Landau effects

12 p2277 A70-27057

Ionization instability of finite bounded plasma, investigating electrothermal waves in large disturbance domain by numerical simulation

12 p2163 A70-27065

Trumpet-type plane waves instability thresholds in plasma drifted by electric field, including calculation of thermodynamic equilibrium

12 p2184 A70-27236

Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions

12 p2278 A70-27358

Spherical electroacoustic waves in drifting thermal plasma, describing ion acoustic perturbations

12 p2279 A70-27779

Resonant and nonresonant coupling between two coherent electron plasma waves propagating in opposite directions, considering parametric decay

12 p2279 A70-27780

Collisional drift-wave turbulence in Li Q-machine plasma far unstable regime, discussing power spectra variations of density fluctuations

12 p2280 A70-27784

Density gradient drift waves stabilization in collisionless plasma by stellarator type windings, observing oscillations amplitude reduction in shear magnetic field

12 p2280 A70-27785

Drift wave instabilities nonlinearities, discussing plasma growth rate and saturation coefficients, damping rate as function of amplitude and lower mode modification

12 p2280 A70-27786

Drift waves relation to anomalous cross field diffusion in fully ionized magnetoplasmas, introducing model predicting amplitude, correlation time, fluctuation spectrum and diffusion process

12 p2280 A70-27788

Parametric and Raman instabilities predicted by linear theory for plasma in electromagnetic field

13 p2458 A70-28563

Collisional theory of longitudinal wave propagation in partly ionized multitemperature gases

13 p2460 A70-28637

Inhomogeneous one dimensional plasma in electrostatic normal modes, considering interactions of waves and particles

13 p2460 A70-28638

Nonlinear drift wave buildup in inhomogeneous plasma faster than in linear approximation

13 p2460 A70-28652

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons

13 p2460 A70-28653

Plane electrostatic shock waves propagation in plasma with electrons in potential equilibrium and collision free ions

13 p2461 A70-28730

Wave dispersion in lower exospheric multicomponent plasma, investigating mode group velocity frequency dependence at various altitudes

13 p2395 A70-28940

Hydrodynamic equations to obtain transformation coefficient for HF weakly damped waves in magnetoactive plasma, applying to solar corona

13 p2463 A70-29227

Plasma waves in space and laboratory - NATO Conference, Roros, Norway, April 1968

13 p2466 A70-29901

Electron temperature and concentration determined from longitudinal electron cyclotron harmonic waves in finite plasma column

13 p2467 A70-29916

Grid assemblies as electrostatic plasma wave antennas, computing driving point and transimpedances for approximating single pole impedance in heavy Landau damping regime

13 p2371 A70-29918

Polar ionosphere auroral oval position detection by satellite observations of naturally occurring VLF and man-made HF plasma waves

13 p2371 A70-29924

Trapped particle interactions with plasma waves, analyzing pitch angle scattering, oscillating electric field, transverse waves and resonance effects

13 p2468 A70-29929

Whistler mode wave packets propagation in hot inhomogeneous collisionless plasma immersed in nonuniform ambient magnetic field

13 p2468 A70-29931

Reverse flow in plasma generated in conical electromagnetic shock tube and reflected from downstream bulkhead, noting stabilization effects

13 p2469 A70-29974

Plasma wave particle interactions in outer magnetosphere, magnetosheath and solar wind, noting role of AC electric fields

13 p2483 A70-30085

Hydromagnetic wave velocity and space anisotropy instabilities in magnetosphere, using dispersion relation

13 p2483 A70-30086

Temporal wave echoes and Landau damping in collisionless plasma using signal averaging and time delay techniques

14 p2622 A70-30687

Scattering cone of hydromagnetic waves propagating along magnetic lines in magnetized plasma with oscillating electric dipole

14 p2575 A70-30822

Sideband instability and trapped particle charge density response of large periodic Bernstein-Greene-Kruskal waves in collisionless plasma

14 p2623 A70-31039

Normal wave propagation modes existence in magnetized plasma, deriving criteria for electrostatic approximation validity

14 p2624 A70-31045

Ordinary mode electromagnetic wave propagation instability in high beta plasma, determining lower bound on growth rate

14 p2624 A70-31048

Elastohydrodynamic monochromatic wave coupling in liquid filled container as model for Alfvén and magnetoacoustic waves transmission in plasma

14 p2625 A70-31356

Plasma waves with anisotropic pressure, discussing magnetoacoustic waves integral curves

15 p2777 A70-31476

Pioneer 8 wave and particle observations correlation showing broadband wave levels reduction during extended geomagnetic tail crossings

15 p2727 A70-31904

Low amplitude waves and substantial frequencies interaction by averaging method for hydrodynamics of waves in collisionless plasmas

15 p2720 A70-32114

Collisionless shock waves in magnetized plasma as function of Alfvén-Mach number, measuring electron temperature jump on wave front spectroscopically

15 p2779 A70-32116

Solar type 3 burst theory, considering plasma wave energy conversion into radio emission

15 p2802 A70-32484

Coherent wave propagation in warm turbulent plasma, using perturbation method for wave dispersion

16 p2860 A70-32945

Ion motion neglecting conditions for radio waves in plasma based on Ohm's law uncoupling from momentum transfer

16 p2957 A70-32980

Resonance excitation of high amplitude waves in plasma cylinder by HF azimuthal axially periodic current flowing through coil encircling plasma

16 p2957 A70-33194

Electron-acoustic, ion-acoustic and electromagnetic plane waves coupling at shock front in two fluid ionized viscous plasma

16 p2958 A70-33282

Resonant interaction and instability produced by nonlinear coupling of modulated wave and LF mode, stimulating self focusing of plasma waves

16 p2958 A70-33285

Plasma wave radiation by electron stream in active solar corona, obtaining spectrum and growth rate

16 p2979 A70-34189

Acoustic wave propagation through positive column of glow discharge of three component plasma, noting amplitudes dependence on excitation wave amplitude

17 p3140 A70-34872

Warm homogeneous magnetoplasma longitudinal cyclotron harmonic wave propagation perpendicular to static magnetic field, noting instabilities

17 p3140 A70-34927

Plasma waves parametric excitation by external electric field, using perturbation method of multimode scales

17 p3140 A70-34933

Cerenkov plasma waves generation by fast electron streams in solar corona and conversion into EM waves

17 p3173 A70-35768

OGO 5 observations of quasi-trapped electromagnetic waves in solar wind at 70 kHz

18 p3306 A70-36005

Nonlinear theory for surface waves propagating in bounded magnetoactive plasma

18 p3295 A70-36412

Nonlinear interactions of plasma waves with positive and negative energies producing explosive instability

18 p3295 A70-36420

Propagation constants in laminar plasma circular waveguides filled with anisotropic linear medium, using Galerkin-Ritz method

19 p3474 A70-37428

Higher order magnetic field-free temporal and spatial plasma wave echoes, solving collisionless Boltzmann equation by method of characteristics

19 p3476 A70-37557

Solid state plasmas waves and oscillations in metals, semimetals and semiconductors, noting applications for microwave devices

19 p3479 A70-37944

Synchrotron radiation emissivity function containment in dispersion equation for plane wave propagation in magnetoactive plasma

19 p3480 A70-38017

Slow wave propagation in plasma moving along external magnetic field, generalizing refractive index formula

19 p3417 A70-38592

Nonuniform finite amplitude plasma waves nonlinear decay and instability, discussing initial damping /or growth/ effect

20 p3678 A70-39660

Multidimensional control systems synthesized in accord with polyinvariance and coordinating couplings principles

20 p3604 A70-39837

Electrothermal mode wave propagation in nonequilibrium partially ionized gas, using model with finite ionization

20 p3680 A70-39984

Nonlinear resonance conditions for plasma three-wave interactions, considering wave propagation modes and constant magnetic field

20 p3682 A70-40137

Langmuir wave beam nonlinear transformation in isothermal plasma due to induced scattering by ions

20 p3684 A70-40385

Nonlinear resonant heating in magneto-plasma, calculating energy absorption by ions and plasma wave amplitude

20 p3685 A70-40467

Electromagnetic wave propagation in colloidal plasmas analyzed by kinetic approach, obtaining expressions for current density, DC and microwave conductivities, etc

20 p3685 A70-40502

Spread electron beam excitation of magnetoactive plasma waves in quasi-linear relaxation

21 p3855 A70-40948

Plasma wave echo, observing oscillatory behavior of perturbed distribution with different phases and amplitudes

21 p3858 A70-41389

Rotating cold plasma wave propagation modes including Coriolis effect in absence and presence of external magnetic field

21 p3860 A70-41924

Homogeneous plasma in uniform magnetic field, deriving theory for instabilities and LF wave propagation modes

22 p4079 A70-42370

Slow wave propagation on conducting surface separated from plasma by ion sheath, observing resonances on cylindrical antenna

22 p4082 A70-43238

Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions

22 p4084 A70-43599

Solar type 3 burst theory, considering plasma wave energy conversion into radio emission

23 p4240 A70-43908

Plasmas kinetic theory, considering crossing from instability to stability, waves decay by collisional damping and emission by bremsstrahlung

23 p4224 A70-44178

Plane plasma waves in homogeneous conducting fluid with magnetic field, considering oscillations of two-fluid, cold and hot plasmas

23 p4224 A70-44179

Collisionless plasma shock wave structures from geophysical and astrophysical phenomena standpoint, describing tarantula experiment

23 p4225 A70-44184

Turbulent plasma without external magnetic field, observing low phase velocity ion wave mode

23 p4227 A70-44893

Partially ionized viscous plasma longitudinal wave propagation, formulating motion equations for electrons, ions and neutrals from Maxwell and Boltzmann equations

23 p4229 A70-44987

Bunched ion bursts amplitude modulation effects on nonlinear ion acoustic waves in grid plasma system

23 p4229 A70-44989

Ion acoustic wave propagation in collisionless gravity-supported plasma in static magnetic field calculated from linearized Vlasov equation

24 p4382 A70-45109

Electromagnetic waves nonlinear interaction at various threshold powers, inducing propagation in solid body plasma

24 p4388 A70-45201

LF electrostatic ion cyclotron wave energy resonant power absorption in plasma in axially nonuniform magnetic field

24 p4386 A70-45608

LF plasma waves amplification by beam-plasma interaction, considering electron and ion temperatures effects

24 p4387 A70-45797

Pressure gradient induced drift waves in collisionless hydrogen plasma in homogeneous magnetic field

24 p4388 A70-46209

PLASMA-ELECTROMAGNETIC INTERACTION

Transmission and reflection of electromagnetic waves by bounded moving plasma layer in slow wave space

01 p0042 A70-10167

Particle distribution and plasma nonequilibrium field evolution with turbulence generation by microwave field, considering plasma kinetic instability

01 p0150 A70-10212

LF electromagnetic waves interaction propagating in stream-magnetized cold plasma, discussing waves temporal growth and instability

02 p0262 A70-12603

Wave-wave coupling of two HF electromagnetic waves launched into warm plasma across constant

confining magnetic field, using Maxwell-Vlasov equations for electrons

02 p0349 A70-12757

Anomalous behavior of arc motion in high pressure cross-field plasma devices in terms of electromagnetic effects

03 p0529 A70-12938

Electromagnetic wave reflection on thin plasma layer with Epstein electron density profile, noting use in microwave diagnostics

03 p0529 A70-13016

Variable magnetic field effect on stability of Langmuir waves propagating in plasma in constant magnetic field

03 p0530 A70-13064

Van der Pol equation for finite amplitude ion-acoustic waves in unstable plasma propagating across weak magnetic field

03 p0531 A70-13404

Electromagnetic finite amplitude wave beams self action in magnetoactive plasma, noting nonlinear characteristics

03 p0448 A70-13411

Dynamic model for Martian ionosphere modification by solar wind, assuming negligible Mars magnetic moment and neutral atmosphere

04 p0753 A70-15103

Anomalous Doppler shift interaction between positive ions and right-hand polarized EM waves propagating at small angle to interplanetary magnetic field

05 p0905 A70-15761

Plasma behind pressure front of shock wave investigated for ionization mechanism by microwave reflection and transmission, noting electron temperature distribution

05 p0887 A70-16110

HF electromagnetic field penetration of plasma with finite conductivity and Hall constant for containment of hot plasmas, formulating nonlinear electrodynamic problem

05 p0889 A70-16490

Electrical conductivity calculation for plasma in spatially inhomogeneous magnetic field using small-gyroradius approximation to kinetic equation

05 p0889 A70-16491

Microwave nonlinear effects including mixing, harmonic generation and current rectification observed in plasma sheath surrounding Langmuir probe using PIG discharge

05 p0852 A70-16992

Propagation, reflection and dispersion equation for electromagnetic waves in longitudinally magnetized plasma filled coaxial waveguide using rotating coordinates

06 p1016 A70-17124

Light scattering at 90 deg from laser-induced breakdown plasmas in air, discussing origin

06 p1114 A70-17189

Electromagnetic wave scattering from finite plasma, discussing statistical measurement errors in degrees of freedom studies

06 p1007 A70-17464

Power reflection and transmission coefficients for polarized electromagnetic waves incident on plasma slab moving along magnetostatic field

06 p1008 A70-17566

Forward angle microwave scattering by plasma covered magnetized metallic sphere, calculating radial electron density distribution

06 p1008 A70-17576

Laboratory simulation of interactions between ionospheric plasma and diverse spacecraft systems

06 p1029 A70-18067

Solar wind interaction with moon derived for model and compared with satellite data

06 p1147 A70-18291

Numerical analysis of rarefied plasma flow interaction with charged conducting bodies of various forms and dimensions

06 p1123 A70-18298

Moving plasma column scattering of obliquely incident microwaves, assuming arbitrary polarization for incident plane wave

06 p1124 A70-18608

Microwave scattering from plasma column of low pressure discharge in Hg under free space conditions

06 p1125 A70-18609

Light scattering from free electrons in laboratory plasma, showing frequency spectrum equal to electron density fluctuations

07 p1347 A70-18899

Stress tensor for relativistic weakly ionized plasma in HF electromagnetic field taking into account collisions

07 p1348 A70-19197

Solar wind velocity anisotropy effect on interplanetary magnetic field inhomogeneity

07 p1366 A70-19443

Four satellite cluster laboratory in near-earth environment to investigate solar-terrestrial relationships, emphasizing interaction of solar wind and magnetosphere

07 p1387 A70-19711

Magnetic trap chamber walls adverse effect on plasma heating produced by electron beam injected at low hydrogen pressures

07 p1350 A70-19845

Electromagnetic wave scattering from charged particle in hot electron plasma in magnetic field, considering relativistic corrections for scattered radiation spectra

07 p1352 A70-19992

Surface oscillations of plasma in external HF field derived from hydrodynamics and Maxwell equations

07 p1355 A70-20367

S- and p-polarized electromagnetic wave incident on semiinfinite laminar plasma layers, analyzing reflection and absorption characteristics

08 p1456 A70-20504

TEM waves penetration into magnetoactive semibounded plasma using Vlasov and Maxwell equations, obtaining electric field for specular reflection of electrons

08 p1551 A70-21255

AM electromagnetic wave self modulation in magnetoplasma, considering self and mutual interaction of ordinary and extraordinary propagation modes

08 p1552 A70-21527

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency

08 p1554 A70-21804

Scattering cross sections of electromagnetic waves in rectangular plasma-filled waveguide based on reciprocity theorem

08 p1464 A70-21983

Thin linear antennas in plasma analyzed for radiation characteristics by linearized hydrodynamic theory, showing effect of feed points displacement

09 p1643 A70-22207

Pulsar model assuming magnetic dipole radiation by spinning neutron star interacting with nearby plasma

09 p1756 A70-22517

Ion-acoustic wave oscillations of weak collision plasma in strong electromagnetic field, discussing instability

09 p1736 A70-23198

Argon plasma interaction with RF electromagnetic field using MGD model, noting plasma-field coupling and plasma temperature exhibition of skin effect

09 p1737 A70-23433

Long radio wave propagation and effective refraction index in turbulent magnetoplasmas with stochastic density variation

10 p1832 A70-23962

Relativistic nonlinear coupled longitudinal-transverse propagation of intense laser beams in cold overdense plasma

10 p1921 A70-23968

Transmission and reflection of electromagnetic waves by bounded moving plasma layer in slow wave space

10 p1842 A70-25015

Nonlinear interaction between plasma and HF field near cyclotron frequency, studying plasma oscillations generation in strong magnetic field

10 p1925 A70-25102

Electromagnetic waves propagation in nonlinear medium, investigating polarized plane wave incident on vacuum-plasma interface in magnetic field

10 p1844 A70-25156

Laboratory simulation for shock waves around earth, moon and Venus based on artificial solar wind and magnetic dipole interaction study

10 p1948 A70-25182

Plasma production by solid hydrogen-giant pulse laser interaction, studying time dependent distributions of plasma density, temperature and velocity

10 p1902 A70-25222

Electromagnetic wave propagation through weakly inhomogeneous plasma layer with frequent electron-molecule collisions, noting applicability to ionosphere

11 p2003 A70-25530

Hall effect influence on HF traveling magnetic field penetration into solid cylinder plasma device compared to magnetically contained plasma

11 p2088 A70-25712

Ion-acoustic instability effect on HF EM field penetration into plasma taking into account nonlinear Ohm law

11 p2089 A70-25715

Microwave power absorption in plasma investigated by transmission cavity excited in TE mode, determining electron density and collision frequency

11 p2089 A70-25841

Alfven and cylindrical magnetoacoustic waves in homogeneous unbounded conducting plasma in non-homogeneous magnetic field, applying Weinberg method to propagation analysis

11 p2089 A70-25850

Polarization effects during HF EM wave interaction in plasma, discussing plasma scattering effects in polarization transport equations

11 p2004 A70-25937

RF interference emanating from satellite-borne pulse plasma thruster by measuring RF power at UHF antenna having plasma in near field

11 p2103 A70-26136

Radiation from electric dipole in moving isotropic plasma analyzed for plasma velocity effect on pattern and far fields 11 p2091 A70-26178

Electromagnetic scattering from underdense plasma slabs with randomly varying dielectric constant, calculating reflection coefficient 11 p2095 A70-26763

Microwave scattering by turbulent plasma electron density fluctuations 11 p2096 A70-26765

Radio wave scattering cross section in wake of body moving in ionosphere, using simplified procedure with asymptotic expressions 11 p2012 A70-26787

Electromagnetic wave penetration in plasma under uniform DC magnetic field, considering wave propagational direction and electric field 12 p2279 A70-27781

Electric dipole radiation field in homogeneous anisotropic compressible plasma, obtaining asymptotic expressions by saddle point integration method 12 p2282 A70-27970

Nonequilibrium solid state electronic plasma instabilities due to interactions with strong electric and magnetic fields 12 p2289 A70-28363

Parametric and Raman instabilities predicted by linear theory for plasma in electromagnetic field 13 p2458 A70-28563

Plasma properties investigation by laser beam probes, considering direct observation of oscillation mode 13 p2458 A70-28564

Macroscopic plasma response to absorption of high intensity laser radiation in one dimensional geometry 13 p2459 A70-28636

Inhomogeneous one dimensional plasma in electrostatic normal modes, considering interactions of waves and particles 13 p2460 A70-28638

LF electrostatic waves oblique to magnetic field in plasma, evaluating dispersion relation near ion cyclotron frequency 13 p2363 A70-28641

Laser radiation interaction with hot nonuniform plasma, determining thermal and electromagnetic forces for various temperatures and densities 13 p2460 A70-28643

Plane electromagnetic wave interaction with compressible plasma fluid moving with uniform velocity in vacuum, calculating reflection and transmission coefficients 13 p2462 A70-29101

Plane electromagnetic wave in moving conductive medium, analyzing without approximation of velocity limitation 13 p2462 A70-29104

HF electromagnetic forces on collisionless cold magnetoactive plasma-vacuum boundary using time-averaged stress tensor 13 p2462 A70-29127

Electron density and transverse electron temperature of magnetoactive plasma generated in circular waveguide by microwave signal with variable polarization 13 p2462 A70-29128

Plasma instability in TEM wave field, considering nonpotential HF oscillations buildup with frequency near external wave frequency 13 p2463 A70-29283

Q switched ruby laser pulses nonlinear absorption by partially ionized plasma behind reflected shock wavefront, observing absorptivity dependence on light intensity 13 p2429 A70-29420

RF admittance and electric field of plane grid capacitor in hot collision free magnetoplasma in parallel magnetic field dominated by Bernstein modes 13 p2467 A70-29910

Infinitesimal dipole moving through hot uniform electron plasma in magnetic field, investigating asymptotic time behavior of plasma resonance 13 p2467 A70-29912

Power absorption by microwave generated plasmas noting pressure effects 14 p2622 A70-30675

Light scattering from plasmas with nonMaxwellian electron velocity distribution function 14 p2622 A70-30694

Small amplitude HF electromagnetic wave penetration in hot plasma slab, showing wave period/transit time ratio dependence of electromagnetic field distribution 14 p2551 A70-31037

Comparative sets of higher order adiabatic motion equations for plasmas in electric and magnetic fields with slow variations 14 p2624 A70-31043

Em wave reflection and transmission at boundary between free space and semiinfinite anisotropic plasma 15 p2778 A70-31830

Gyrosynchrotron from accelerated electron, discussing effects of cold and collisionless magnetoplasma on far field and frequency spectra 15 p2728 A70-31989

Glass tube surrounded nonuniform plasma column interaction with TM microwave field of cylindrical cavity for electron density measurements 15 p2780 A70-32347

Plasma electron density measurement for microwave-excited pulsed discharges based on skin effect 15 p2780 A70-32367

Dipole and loop antennas in isotropic compressible plasma under wave incidence, using reciprocity theorem for receiving voltages and maximum powers 16 p2957 A70-32982

Refractive index equation for Whistler propagation in weakly drifting magnetoplasma 16 p2959 A70-34224

Hydrogen plasma refractive index and absorption constant for laser radiation frequencies as functions of electron temperature and atomic density 16 p2959 A70-34338

Antennas in plasma, investigating electromagnetic and electroacoustic waves and boundary value approach 17 p3045 A70-35076

Plasma induced radio frequency interferences from DC-DC converter to receiving antenna simulated for REXS satellite in space chamber 17 p3047 A70-35400

Electric field component of waves in auroral ionosphere measured by double Langmuir probe field detectors, discussing wave-particle interactions and turbulence 17 p3096 A70-35767

Relaxation properties of nonequilibrium electronic solid state plasma during nonlinear interaction with external fields, using kinetic equation 18 p3297 A70-36423

Solar wind velocity anisotropy effect on interplanetary magnetic field inhomogeneity 18 p3309 A70-36917

Homogeneous plasma electrostatic oscillations excitation by electromagnetic waves nonlinear interaction in magnetic field, deriving expression for density perturbation 19 p3475 A70-37536

Inhomogeneous plasma ellipsoid equilibrium in external HF field, assuming parabolic density distribution 19 p3479 A70-37739

Plane EM wave diffraction in cylindrical plasma-electron beam system 19 p3378 A70-37740

Ionization relaxation behind reflected luminous shock front in argon plasma flow interaction with magnetic fields, using spectroscopic and streak interferometric observations 19 p3479 A70-37814

Electric field component equations of electromagnetic wave traveling through stratified plasma, considering incident and reflected ordinary and extraordinary waves 19 p3379 A70-37863

Temporal echo in plasma for applied rectangular pulses, discussing ballistic approximation 19 p3480 A70-38174

Weakly ionized gas subjected to pulsed DC electric field, analyzing transient relaxation of electrons velocity distribution 19 p3482 A70-38899

Helium II line broadening in high temperature plasma, measuring profile for comparison with theoretical prediction 20 p3677 A70-39115

Electromagnetic waves scattering from dense turbulent plasma, calculating radar cross sections of inhomogeneous plasma for peak electron densities 20 p3586 A70-39459

Laboratory simulation of interactions between ionospheric plasma and diverse spacecraft systems [AIAA PAPER 70-169] 20 p3606 A70-39695

Large scale nonequilibrium linear MHD generator performance with rare gases under strong EM-gas dynamic interactions 20 p3681 A70-39993

Compressible plasma axisymmetric channel flow under electromagnetic forces and ohmic heating, noting velocity profiles and current density [AIAA PAPER 70-1098] 20 p3683 A70-40239

Plasma nonequilibrium state formation and light absorptivity variation under high power laser pulsed radiation 20 p3684 A70-40387

Shock waves formation in rarefied plasma investigated by Thomson scattering of ruby laser light 20 p3643 A70-40388

Electromagnetic waves and oscillations excited by magnetic current ring source around infinitely long compressible plasma column, deriving radiation field distribution 20 p3685 A70-40506

HF electromagnetic field effect on nonhomogeneous collisionless magnetized plasma stability, deriving dispersion equation for drift cyclotron oscillations 21 p3854 A70-40622

Anomalous electromagnetic wave absorption in collisionless plasma attributed to instability excitation causing ion density fluctuations 21 p3855 A70-40754

Electromagnetic wave propagation through weakly inhomogeneous plasma layer with frequent electron-molecule collisions, noting applicability to ionosphere 21 p3786 A70-41280

Electromagnetic scattering power spectrum from underdense turbulent plasmas, deriving first and second moments 21 p3858 A70-41732

Electromagnetic wave propagation through cold slowly varying plasma layers in absence of external magnetic field 21 p3860 A70-42000

VLF wave generation due to nonlinear interaction of two microwaves with plasma slab under high DC field 22 p4077 A70-42294

Space electric field considered for solar wind plasma drift origin and possible energy source for spacecraft propulsion, estimating intensity on lunar surface 22 p4100 A70-42789

Plasma-TEM wave nonlinear interactions in magnetosphere, discussing atmospheric occurrence 22 p4021 A70-43276

Solar wind intensity and direction correlated with intensity of earth surface magnetic disturbances and geomagnetic pi-2 type pulsations 22 p4022 A70-43284

EM wave second harmonic generation by plasma wave, discussing decay processes in inhomogeneous plasma layer 22 p4083 A70-43381

Ionospheric parametric amplification and frequency mixing due to polarized TEM waves nonlinear interaction with longitudinal electrostatic waves 23 p4185 A70-43838

Solar wind flux correlation with earth EM field pulsations, noting flare-generated shock front effects on magnetosphere 23 p4236 A70-44051

Laser light scattering in plasma for charged particle correlation function 23 p4225 A70-44187

External DC electric field effect on microwave absorption in plasma 23 p4226 A70-44372

Optimum input pulse signal synthesis for transmission through lossless homogeneous isotropic plasma, using matched filter theory 23 p4228 A70-44962

Dipolar resonant scattering of H-polarized plane waves by axially magnetized plasma column with perfectly conducting core 23 p4228 A70-44977

Expansion of laser produced plasma into uniform magnetic field, calculating electromagnetic radiation 24 p3482 A70-45108

LF resonances and potential in plane nonisothermal plasma layer, considering electromagnetic field interaction and ionic collisions 24 p4383 A70-45116

Acoustic plasma wave excitation by transverse electromagnetic wave beam, calculating LF instabilities and energy losses 24 p4384 A70-45149

Microwave propagation in circular waveguide with axially magnetized gas or solid state plasma/Faraday configuration/, calculating twist modes 24 p4318 A70-45213

Corotating magnetic field model of pulsar, using electromagnetic field equations of dipole radiation in low density plasma 24 p4413 A70-46137

PLASMA-PARTICLE INTERACTIONS

Quasi-linear relaxation of electron beam in plasma with concentration nonuniformities, noting electron velocity role 01 p0150 A70-10213

UHF signal amplification by electron beam-plasma interaction, defining amplification frequency ranges 01 p0043 A70-10658

Electron trapping effect on ion-wave instability in plasma, deriving expression for saturation energy spectrum 01 p0152 A70-11361

Inhomogeneous plasma containing weak electron beam using Vlasov equation, noting wave-wave coupling effect 02 p0345 A70-11882

Temporal and statistical characteristics of HF oscillations from electron beam interaction with plasma in magnetic field 03 p0532 A70-13524

Electron efflux effectiveness from discharge plasma into vacuum, investigating various electrodes influence 04 p0724 A70-14415

Galactic cosmic rays scattering by solar wind magnetic field fluctuations, considering energy and momentum transfer

04 p0739 A70-14596

Turbulent-plasma electrons ballistic effects on solar wind magnetic field fluctuations in lunar vicinity

04 p0753 A70-15123

Numerical solution for differential equations describing nonlinear beam-plasma interactions based on dispersion relation analysis

05 p0886 A70-15799

Ion-neutral coupling in plasma acceleration revealed by velocity disparities determined spectroscopically [ALAA PAPER 70-166]

06 p1133 A70-18219

Whistler amplification in magnetosphere for electron interaction with background plasma to produce wave growth, discussing stability of various anisotropic velocity distributions

06 p1059 A70-18533

Homogenous monoenergetic cylindrical electron beam interaction with homogeneous cold plasma, investigating system stability

06 p1125 A70-18615

Surface wave propagation and amplification by electron beam-plasma interaction, inapplicability of coupled mode theory and use for microwave amplifier

06 p1125 A70-18616

Synchrotron radiation negative reabsorption possibility for relativistic electrons dipped into and in absence of unrelativistic plasma

07 p1348 A70-19413

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

07 p1385 A70-19447

Coupled mode method, analyzing interaction between slow space charge wave of electron beam and electroacoustic wave of lossless warm plasma

07 p1349 A70-19687

Quasi-linear feedback effect of enhanced ion-wave fluctuations on average electron distribution in current-carrying plasma

07 p1338 A70-19822

Plasma-electron beam system LF dispersion characteristics noting ion instability

08 p1549 A70-20505

Light ions acceleration to high energy by pulsed high intensity electron beams

08 p1553 A70-21694

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action

08 p1554 A70-21805

Radial self focusing of low density electron beam by interaction with plasma in presence of beam plasma instability

08 p1554 A70-21818

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability

08 p1554 A70-21819

Pinched plasma reversed current induction due to relativistic electron beam injection

09 p1736 A70-23183

Plasma charge transfer in unstable beam plasma in magnetic fields system allowing for electron discharge pump operation

09 p1737 A70-23334

Beam plasma system instability, studying anomalous diffusion toward vessel walls as function of generated oscillations

09 p1737 A70-23335

Cosmic rays diffusion through interstellar plasma noting microstabilities role

10 p1931 A70-23972

Electron-ion beam plasma system, using one dimensional quasi-linear equations for describing electron heating and stabilization

10 p1923 A70-24403

Stability of realistic inhomogeneous plasmas with sheaths, examining electron beam-stable Maxwellian plasma interaction

11 p2090 A70-26021

Electron beam-plasma interaction nonlinear development in time and space using computer simulation

11 p2095 A70-26758

Nonlinear effects in beam-plasma type interactions, studying particle redistribution under inhomogeneous oscillating electric field

11 p2095 A70-26759

Comet tail simulation by using fast acting gas valve to produce gas cloud for interaction with plasma stream

12 p2298 A70-27190

Spatial relaxation of electron gas colliding with positive ions from plasma velocity distributions, solving time independent Fokker-Planck boundary problem

12 p2280 A70-27791

Electron beam interaction with plasma in absence of magnetic field, discussing microwave radiation emission and incoherent scattering and instability spatial growth

13 p2459 A70-28569

Beam-plasma system mode coupling near electron cyclotron frequency, obtaining interference patterns

13 p2459 A70-28570

Electron beam interaction with Maxwellian plasma, investigating temperature effects on instabilities

13 p2460 A70-28639

Trapped particle interactions with plasma waves, analyzing pitch angle scattering, oscillating electric field, transverse waves and resonance effects

13 p2468 A70-29929

Whistler instability examined on gyrating electron beam interaction with cold background plasma propagating parallel to magnetic field

13 p2468 A70-29932

Perpendicular propagation of VLF waves from wave/ particle interaction in vicinity of lower hybrid resonance frequency in magnetosphere

13 p2468 A70-29934

Plasma wave particle interactions in outer magnetosphere, magnetosheath and solar wind, noting role of AC electric fields

13 p2483 A70-30085

Morphology of thermal and energetic particles in inner magnetosphere during geomagnetic disturbances and solar cycles

14 p2630 A70-30358

High energy electron temperature in beam plasma discharge pulsed laser measured by bremsstrahlung X radiation spectrum

15 p2752 A70-32194

Electrons, positrons and photon energy distribution inside hydrogen plasma injected with high energy electrons

15 p2781 A70-32429

Beam current instability and plasma heating by electron beam generated in linear discharge, discussing electron beam-cold plasma interactions

16 p2957 A70-33191

Ni particles induced quenching measured by probes in afterglow plasma of pulsed linear discharge, determining deionization rate

16 p2958 A70-33687

Spatial electric field variations and electron distribution for beam plasma amplification, using nonlinear approximation

16 p2959 A70-34336

HF oscillations excitation in decaying plasma-electron beam system, noting Coulomb collisions and nonlinear effects role

18 p3294 A70-36145

Electron beam interaction with ionized K plasma, considering Langmuir waves instability, turbulence and electron heating

18 p3295 A70-36614

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

18 p3316 A70-36921

Charged particle interaction with fluctuation fields in nonequilibrium magnetoactive plasma

20 p3678 A70-39596

Ion heating during plasma instability due to interaction with electron beam in mirror magnetic trap

20 p3678 A70-39598

Langmuir wave beam nonlinear transformation in isothermal plasma due to induced scattering by ions

20 p3684 A70-40385

Energetic electron precipitation enhancement by cold plasma injection, discussing whistler mode turbulence, particle density and magnetosphere

21 p3818 A70-41105

Plasma and neutral gas collisionless interactions in magnetic field based on Alfvén critical velocity hypothesis, discussing electron energy distribution

21 p3857 A70-41383

Plasma and spiraling electron beam interactions, observing oscillations above integral multiples of electron cyclotron frequency

21 p3857 A70-41388

Charge separated and quasi-neutral solutions of electron heat transfer to spherical body in quiescent nonequilibrium plasma, noting diagnostic applications

21 p3860 A70-42080

Electron beam instability in cylindrical magnetically confined plasma column, calculating quasi-static spatial growth increments

22 p4080 A70-42403

Plasma-electron beam interaction instability transition from absolute to convective in hydrogen tube system at various pressures, considering electron collision effects

24 p4385 A70-45452

Resonant electrons interaction with turbulent ion-acoustic plasma oscillations consisting of superimposed three dimensional random phase wave packets

24 p4386 A70-45658

High resolution cylindrical capacitor observation of fine structure of distribution function of electron beam interacting with plasma

24 p4387 A70-45820

PLASMAGUIDES

Electromagnetic wave propagation in homogeneous plasma waveguide satisfying Appleton-Hartree approximation without collisions in presence of longitudinal magnetic induction

02 p0349 A70-12724

Electromagnetic wave propagation through stratified positive plasma column in waveguide, noting stratification travel effects on wave amplitude and phase shift

03 p0443 A70-13096

Electromagnetic wave diffraction effects on matching plasma waveguide to coaxial power extraction line

03 p0531 A70-13334

Anomalous H wave absorption in circular waveguide by dense collisionless plasma, connecting to instability excitation with subsequent plasma heating

03 p0537 A70-14379

Electromagnetic wave growth effect on wave field propagating along beam-plasma slab, showing Poynting vector component

04 p0651 A70-15293

Steady state plasma generation in metallic waveguide without dielectric container by cold cathode discharge in He

05 p0819 A70-15803

Propagation, reflection and dispersion equation for electromagnetic waves in longitudinally magnetized plasma filled coaxial waveguide using rotating coordinates

06 p1016 A70-17124

Scattering cross sections of electromagnetic waves in rectangular plasma-filled waveguide based on reciprocity theorem

08 p1464 A70-21983

Slow HF waves propagation under magnetic field effect in plasma waveguide surrounded by dielectrics or metal

10 p1843 A70-25106

Microwave field component distribution in plasma waveguide covered by metallic sheath in magnetic field, using counterbalanced antenna probes for field measurements

13 p2463 A70-29378

Circularly polarized waves in waveguide loaded with high density magnetoplasma, discussing propagation mode and plasma boundary

13 p2379 A70-29617

Electromagnetic wave diffraction effects on matching plasma waveguide to coaxial power extraction line

14 p2623 A70-30713

Plasma beam systems dispersion equation with allowance for electron collisions with heavy particles

15 p2779 A70-32117

Convolution equation for kinetic theory of EM field excitation in plasma waveguides

23 p4223 A70-43772

Microwave propagation in circular waveguide with axially magnetized gas or solid state plasma /Faraday configuration/, calculating twist modes

24 p4318 A70-45213

Circular waveguide with axially magnetized plasma, investigating twist mode propagation in InSb at 70 GHz

24 p4311 A70-45214

MPD experiments in inductive hydrodynamic shock tube with round cross section and radial magnetic field

24 p0000 A70-45798

PLASMAS [PHYSICS]

NT ARGON PLASMA

NT CESIUM PLASMA

NT COLD PLASMAS

NT COLLISIONLESS PLASMAS

NT COSMIC PLASMA

NT DEUTERIUM PLASMA

NT ELECTRON PLASMA

NT HELIUM PLASMA

NT HIGH TEMPERATURE PLASMA

NT HYDROGEN PLASMA

NT METALLIC PLASMAS

NT MICROPLASMAS

NT NITROGEN PLASMA

NT NONUNIFORM PLASMAS

NT RAREFIED PLASMAS

NT RELATIVISTIC PLASMAS

NT ROTATING PLASMAS

NT STELLAR WINDS

NT THERMAL PLASMAS

Cooling time estimation for white dwarf stars with ion component undergoing condensation, based on plasma thermodynamic properties

01 p0189 A70-11341

Whistlers paradoxical behavior in bounded magnetoplasmas, discussing double reflection and wave propagation

02 p0263 A70-12733

Rotary equilibrium of plasma ellipsoid in external HF fields in constant magnetic field, calculating revolution frequency and effective energy potential

03 p0530 A70-13085

Laser irradiation of RF plasmoid producing electron density increase, discussing resonance sustained RF discharges, mode locking, laser photodetachment, etc [ONERA-TP-751]

03 p0501 A70-13630

- Shock wave structure in quasi-neutral weakly ionized plasma using Mott-Smith functions
03 p0535 A70-14362
- Kinetic theory for calculating electron distribution function of weakly ionized plasmas in arbitrarily time dependent electromagnetic fields
05 p0886 A70-15800
- Plasma nature, properties and applications, discussing echoes, shocks, phase mixing and hot plasma containment
05 p0887 A70-16130
- Magnetic field fluctuations of interplanetary plasma, considering anisotropic temperature instabilities
05 p0915 A70-16750
- Electron distribution functions in weakly ionized plasmas by asymptotic analysis of boundary layer near wall
06 p1121 A70-17903
- Plasmapause observations by ion spectrometer aboard OGO-5 vehicle for early orbits, obtaining O, He and H ion concentration profiles for geomagnetic parameter
06 p1059 A70-18546
- Diffusion coefficient of charged particles in HF stabilization of current-convective instability measured in Ge semiconductor electron hole plasma
07 p1355 A70-20365
- Kinetic theory equations for completely ionized plasma taking into account Diener method
08 p1550 A70-20615
- Impedance radiation pattern and actual height of receiving dipole antenna in magnetoactive plasma calculated by electrodynamic reciprocity theorem
08 p1472 A70-20970
- Potential distribution outside ideally reflecting charged sphere immersed in resting plasma described by nonlinear integral equation, allowing for polarization
08 p1432 A70-21090
- Electrons velocity distribution function in homogeneous stationary weakly ionized Lorentz plasma in neon, investigating effect on mobility, collision frequency, diffusion and kinetic energy
11 p2089 A70-25871
- Radiation characteristics of ion acoustic waves from monopole and dipole antennas, observing patterns of longitudinal wave in isotropic plasma
12 p2279 A70-27778
- Bremsstrahlung radiation emitted from homogeneous, field free, nonrelativistic plasma, deriving formulas
13 p2456 A70-28500
- Magnetoplasmas nonlinear dielectric response function and parametric instabilities, discussing homogeneous pumping waves
13 p2459 A70-28568
- Electrostatic probe behavior in RF excited plasma, illustrating perturbation effect of potential drop on I-V characteristics
13 p2406 A70-28935
- Shot noise effect in antennas to measure electric charge density fluctuations in plasma, noting thermal equilibrium with Maxwellian distribution function
13 p2371 A70-29920
- BBGKY hierarchy pair correlation function for magnetoplasma under weak external force, using operator method and time periodic ansatz for distribution functions
14 p2623 A70-30697
- Electric and magnetic dipole VLF radiation patterns in lossy two component magnetoplasma
16 p2860 A70-32944
- Antennas in plasma, investigating electromagnetic and electroacoustic waves and boundary value approach
17 p3045 A70-35076
- Bremsstrahlung from weakly ionized plasma, discussing emission and absorption characteristics, electron-atom collisions and dispersive effects
18 p3294 A70-36347
- Temporal echo in plasma for applied rectangular pulses, discussing ballistic approximation
19 p3480 A70-38174
- Earth exospheric plasma distribution, relating solar eclipses effects to geophysical phenomenon
19 p3418 A70-38904
- Nonlinear resonant heating in magneto-plasma, calculating energy absorption by ions and plasma wave amplitude
20 p3685 A70-40467
- Plasma-air junction problem in parallel plate waveguide, obtaining discontinuity admittance expression
22 p3994 A70-42350
- Sparks channel resistance temporal variation, using resistivity of fully and singly ionized plasma
22 p4072 A70-42354
- Molecular vibrational temperature dependence on electron and neutral gas temperatures and degree of ionization for plasma excitation in nitrogen
22 p4078 A70-42358
- Optically thin plasma population and ionization equilibrium, taking into account heavy particle collisions
22 p4082 A70-43219
- Electron energy distribution in time-varying plasmas, using difference quotient circuits for Langmuir probe characteristics measurement
22 p4082 A70-43220
- Pulsed multipole magnetic field shaping short plasma blobs
22 p4083 A70-43389
- HF plasma propagation, discussing RF discharge by exciting axially symmetric mode of plasma column
22 p4084 A70-43671
- Electron distribution function in homogeneous ionized plasma under oscillating electric fields and steady magnetic fields, solving Boltzmann transport equation
23 p4226 A70-44248
- PLASMATRONS**
- Plasmatron generated rarefied helium plasma parameters in external magnetic field using hot-wire anemometer Langmuir probe
07 p1349 A70-19653
- Electric arc stability with descending static I-V characteristics in plasmatrons using direct Liapunov method
11 p2093 A70-26734
- Plasmatron geometrical parameters effect on electric arc I-V characteristics, using various gas vortex flows for arc stabilization
11 p2093 A70-26735
- Water cooled metallic diaphragm thermal stability effect on plasmatron electric arc characteristics stabilized by vortex air flow
11 p2093 A70-26736
- Heat exchange in linear vortex plasmatron with bilateral ejection, noting dependence on electrodes geometry and gas flow rates
11 p1984 A70-26737
- DC air flow plasmatron arc chamber operation with metal surfaces used for charge stabilization, obtaining I-V characteristics and gas flow parameters in quasi-limiting region
11 p1984 A70-26738
- Coaxial plasmatron pulsation on intensity of heat exchange between high temperature nitrogen jet and axisymmetric body near critical point region of spherical bluntness
11 p1984 A70-26739
- Flow dynamics effects on characteristics of high temperature plasmatron, describing plasma burner design and HF discharge plasma experiment
11 p1984 A70-26740
- Pulsed and CW microwave discharge plasmatrons design calculation, providing electrodeless plasma in metallic chamber and nonequilibrium plasma
11 p1984 A70-26741
- Ignitron converters for feeding power plasmatrons and arc reactors, describing circuit and operation
11 p1984 A70-26742
- Laminar Cu-W electrode erosion resistivity in single chamber electric arc hydrogen plasmatrons with gas vortex stabilization
15 p2780 A70-32130
- PLASMOIDS**
- U PLASMAS [PHYSICS]**
- PLASMONS**
- Inelastic scattering of electrons by surface plasma oscillation for low energy electron diffraction and photoemission, interpreting surface plasmon excitation
07 p1337 A70-19359
- Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions
12 p2278 A70-27358
- Correlation functions of weak quasi-steady plasma turbulence determined by plasmon interactions, using computerized integral equation
17 p3139 A70-34643
- Plasmon decay by neutrinos emission in strong magnetic field, examining parallel and perpendicular propagation
18 p3305 A70-35936
- Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions
22 p4084 A70-43599
- PLASTIC AIRCRAFT STRUCTURES**
- Boeing 707 B-epoxy composite forelap design, analysis, fabrication and flight testing
02 p0307 A70-11955
- Carbon fiber reinforced plastics /CFRP/ uses in commercial aircraft structural component
03 p0516 A70-13546
- Ti alloys, high strength steels and plastics for aircraft and spacecraft constructions, including aging behavior of lap joints and prepreg laminates in vacuum [DGLR-69-58]
04 p0699 A70-15162
- Boron-epoxy composite materials for secondary and primary aircraft structural components, discussing multidirectional laminates, joint analysis, etc
05 p0942 A70-16620
- Plastics applications in aircraft, missile systems, satellites, sounding rockets and manned spacecraft, discussing reinforced plastics and structural laminates
05 p0874 A70-16623
- Lightning protection development programs application to light aircraft plastic components, emphasizing structure and fuel systems designers awareness [SAE PAPER 700220]
11 p1980 A70-25892
- Boron epoxy composite structural parts for aerospace vehicles, discussing production times and cost reduction
12 p2240 A70-27076
- NDT methods for fiberglass, graphite and boron fiber composites for aircraft structures
12 p2243 A70-27465
- Tensile tests on wings and wing components of plastic engine-driven aircraft, discussing design, configurations and mechanical properties
14 p2656 A70-30250
- Foamed in place epoxy resins in aircraft composite structures
16 p2937 A70-33369
- Joint design for fiberglass reinforced plastic aircraft components regarding minimum weight and reliability [ASME PAPER 70-DE-56]
16 p2989 A70-33516
- Tungsten filled urethane in aircraft areas as balancing agent
17 p3126 A70-35418
- Composite compression tubes for VTOL aircraft components, describing weight parameters and mechanical properties [AIAA PAPER 70-898]
17 p3193 A70-35809
- Gliers made of glass fiber reinforced plastics, investigating thermostatic properties under solar irradiation and surrounding warm air
19 p3454 A70-37370
- Reinforced plastic for aircraft parts, investigating low viscosity polyester resins of styrene crosslinking type
20 p3656 A70-40028
- High thermal stability glass fibers alternatives improving stiffness-to-weight ratio of resin and Al-based composites used in F-111 boron epoxy wings
22 p4058 A70-42480
- PLASTIC ANISOTROPY**
- NT ELASTIC ANISOTROPY**
- Polymers yield criterion determination using Hill method exemplified by polyvinyl chloride, discussing effects of transversal anisotropy and rheological properties
02 p0320 A70-11740
- Plane-strain equations for deformation of weakly plastic anisotropic body analyzed by small parameter method
03 p0592 A70-13446
- Anisotropic fiberglass reinforced plastics creep properties under biaxial compression, showing compressive to tensile strain elimination or change
07 p1316 A70-19546
- Fiberglass reinforced anisotropic plastics heating during cyclic axial loading
16 p2934 A70-33215
- Anisotropic plasticity yield conditions, analyzing elastic to plastic deformation transition geometry
20 p3727 A70-39889
- PLASTIC COATINGS**
- Zinc and resin coated alkaline glass fibers tensile strength, describing test procedure
01 p0126 A70-10220
- Stress analysis based on observing birefringence effects in photoelastic surface coating
04 p0689 A70-14922
- Fluorocarbon polymer coatings, discussing role of fluorine content and carbon bond in chemical inertness, degradation resistance, thermal stability and low surface friction [SAE PAPER 690645]
05 p0868 A70-15842
- Series emittance thermal control coatings of polymeric dielectric films overlaying reflectors vacuum exposed to UV, X ray and proton radiation [AIAA PAPER 70-64]
06 p1106 A70-18069
- Atomic hydrogen maser wall shift determined by measurements on FEP Teflon coated storage bulbs, suggesting Teflon properties change as basis
07 p1301 A70-19973
- Plastic semiconductor devices encapsulation materials and fabrication techniques, considering device performance in various environments and military applications
08 p1468 A70-20626
- Performance characteristics of low density epoxy-water emulsion corrosion resistant coating for nonferrous alloys
08 p1526 A70-20648
- Axial flow compressor clearance control coatings at blade tip paths for efficiency [SAE PAPER 700330]
12 p2291 A70-27462
- Radiative heat transfer effects on polymeric combustion-inhibiting coatings in solid propellant rocket motors [AIAA PAPER 70-835]
16 p2971 A70-33930
- Basket weave fabrics for gliding descent decelerators with polyurethane and nylon coatings for tearing strength and pressure packing [AIAA PAPER 70-1180]
21 p3843 A70-41833

Book on plastic coatings for electronics covering chemical structure, properties, applications, manufacturing technology, etc

22 p4058 A70-42455

PLASTIC DEFORMATION

Combined aging and plastic deformation treatment effects on breaking point, yield stress, elongation and contraction of austenitic Fe-Ni-Ti alloy

01 p0115 A70-10064

Plastic deformation of wedge shaped model asperities influencing gas leakage between contacting surfaces, discussing critical contact pressure

01 p0060 A70-10267

Transformation induced plasticity steels tensile properties measurement indicating loss of ductility due to H embrittlement

01 p0118 A70-10729

Construction of formulas relating stresses and plastic deformations describing inelastic bodies behavior under complex loads

01 p0210 A70-11411

Bauschinger effects in repeated tensile and compressive strains in inelastic media under variable temperatures as function of load vector, using plastic yield

01 p0211 A70-11422

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests

01 p0160 A70-11606

Constitutive equations and thermally activated dislocation processes in metals, noting temperature and strain rate relationship

02 p0316 A70-11737

Finite element technique extended for plastic buckling of flat plates, using Stowell theory

03 p0584 A70-12923

Thermodynamic constitutive equations for large dynamic plastic deformation problems

03 p0585 A70-12971

Plane-strain equations for deformation of weakly plastic anisotropic body analyzed by small parameter method

03 p0592 A70-13446

Flexible cylindrical shell elastoplastic state determined by theory of small elastoplastic deformations, utilizing material incompressibility in plastic state

03 p0593 A70-13500

Strain distribution measurement in plastically deformed region around crack tip in metals using moire grid and optical interference

03 p0513 A70-14019

Thin shells of revolution plastic collapse under axisymmetric loads on basis of Tresca-Nakamura yield criterion, using computer algorithm

03 p0598 A70-14238

Brittle composites /including fiber reinforced material/ deformability and plastic deformation effect on tensile strength, discussing pressure induction of sound flow

[ASME PAPER 69-WA/PROD-28]

04 p0705 A70-14834

Metals and alloys creep under tension and compression at elevated temperatures, considering plastic deformation equation applicability

04 p0707 A70-15265

Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain-time histories and residual strain

04 p0779 A70-15599

Biaxial prebuckling loading effect on compliance tensor in plastic buckling of square plates analyzed by local strain statistical theory

05 p0925 A70-15790

Unloading wave in elastic-plastic half space with rigid unloading for two parameter loads, discussing deformation body model

05 p0925 A70-15825

Plane deformation of plastic thin walled tubes under complex tensile and torsional load

05 p0935 A70-16233

Micromechanisms of fracture in metals and polymers before plastic deformation onset, discussing macroscopic polymer properties from microstructure and molecular structure

05 p0937 A70-16365

Test apparatus for investigating crystal defects influence on simultaneous measurement of metals thermal and electric conductivity under plastic deformation at cryogenic temperature

05 p0829 A70-16399

Elastoplastic thick layer with disk-shaped crack analyzed for stress and strain, determining width of plastic zone

05 p0939 A70-16482

Motion stability of ideally plastic medium flow in conical matrix, studying surface and velocity distribution for minimum plastic deformation energy

05 p0945 A70-16854

Small elastoplastic deformation effects on stress-strain state of rib-reinforced cylindrical shells

05 p0946 A70-16955

Work of plastic deformation in two dimensional rolling determined by energy dissipation function

05 p0857 A70-17017

Plastic deformation of refractory alloys during stress relaxation tests under vibrations, showing enhanced stability

05 p0866 A70-17033

Carrying capacity of machine parts under small numbers of cyclic plastic deformation, reviewing breakdown criteria relation to kinetics of stress-strain states

06 p1161 A70-17383

Plastic bodies stress-strain state under variable loads generalized to cases of cyclic loads and plasticity

06 p1162 A70-17384

Plastic flow theory applied to cyclic deformation of metals under complex cyclic loads

06 p1162 A70-17385

Copper specimens stress-strain diagrams under cyclic loads of various amplitudes, noting three stage process plastic deformation

06 p1162 A70-17386

Stress kinetics and breakdown time of hardening Al alloys and steels under cyclic loads, noting dependence on plastic deformation

06 p1162 A70-17391

Structural elements elastoplastic deformation regularities under repeated loadings, using adaptability theory

06 p1163 A70-17394

Shear and linear strain energy criteria for limiting stress state model of solid deformable bodies, considering uniaxial, biaxial and triaxial loading

06 p1166 A70-17657

Energy dissipation during torsional and flexural vibrations of steel and duralumin specimens subjected to plastic deformation, accounting for discrepancies due to methodical errors

06 p1166 A70-17658

Cyclic plastic deformation changes with load increase under uniform stress with normal loading and nonuniform stress with impact loading, considering fatigue limit

06 p1168 A70-17923

Plastic zone around propagating fatigue crack in Cu single crystals, using transmission electron microscopy and X ray topography

06 p1171 A70-18494

Plastic deformation effects on superconductivity of wire specimens of high purity Pb, In and Ti cold worked at liquid He and annealed

06 p1127 A70-18614

Plane elastic-relaxing plastic shock wave yielding of Fe numerically integrated by two step stable difference scheme without pseudoviscosity

06 p1172 A70-18618

Steels microstructural plastic deformation under pulsed laser irradiation

07 p1303 A70-18712

Elastic and plastic deformation zones stress-strain state under complex stresses, obtaining relation for stress and strain components

07 p1401 A70-18834

Surface mean deformation state under shot peening found equal to deformation under single indentation

07 p1292 A70-18835

Metallic adhesion produced by surfaces compression, discussing asperities plastic deformation and macrodeformation caused by contact area growth

07 p1292 A70-18939

Numerical analysis of axisymmetric elastoplastic deformation of circular plates under combined lateral load and membrane force

07 p1402 A70-18977

Rotating disk stability relation with stress distribution in plastic deformation of material

07 p1402 A70-19056

Plastic deformation of thin flexible axisymmetric shells under load, discussing tensile stresses

07 p1407 A70-19383

Rolling texture and recrystallization of Mo single crystals and deformation effect on texture formation using X ray transmission technique

07 p1309 A70-19613

Refractory metal monocarbide single crystal growth by plastic strain induced primary and secondary recrystallization

07 p1313 A70-19902

Thin walled metal cylinders residual deformation microstructures under internal impulsive loading

07 p1285 A70-19969

Abrasive wear of polymers subject to plastic and elastic deformation, considering papers, metal gauze and rough metal surfaces

07 p1296 A70-20003

Polycarbonate ductile fracture measured for strain energy release rates and plastic zone size and shapes to correlate with existing theories and experimental data

07 p1321 A70-20041

Axisymmetric elastoplastic deformation theory for elastic cylindrical shell using Saint Venant yield condition, obtaining expressions for strain components, longitudinal deformation, etc

07 p1415 A70-20185

Yield criterion for plastic bending of transversely anisotropic circular plates under plane stress

08 p1589 A70-21250

Energy equilibrium for crack growth in elastoplastic media, analyzing crack behavior during plastic deformation concentrated at edge of propagating crack

08 p1590 A70-21414

Thermal and athermal components of flow stress and deformation dynamics in Ti-Al alloy

08 p1521 A70-21578

Dynamic strain aging effect on Mo-Ti-C alloy creep, relating carbides precipitation during plastic deformation to mobile dislocations density

08 p1524 A70-21954

Plastic bodies plane flow Lagrangian description applied for prescribed deformation path of material fibers

09 p1769 A70-22251

Metals yield locus in strain hardening range in sigma-tau plane determined using slip theory, considering Bauschinger effects

09 p1771 A70-22395

Stressed state in region of strain raisers /round holes/ in plate subjected to two axial tension associated with plastic yield

09 p1771 A70-22464

Plastic growth of pressurized shell under cyclic thermal stresses superimposed on steady pressure load, investigating shake down using bending approximation

09 p1774 A70-22586

Cold and hot work deformation of aluminum alloys, discussing flow-stress dependence on strain rate, temperature and composition

09 p1692 A70-22642

Spherical and cylindrical cavities dynamic plastic expansion analysis by finite element method allowing for inertia forces

09 p1777 A70-22724

Particle fracture in oxide dispersed stainless steels during plastic deformation at room temperature

09 p1706 A70-22813

Nonisothermal loading model of polycrystalline material, investigating tangential stresses in slip direction and plastic deformation using linear strengthening law

09 p1779 A70-23102

Strain gages for static deformation measurement of fiberglass reinforced plastics at room and higher temperatures, discussing error sources and gage-specimen adhesive bonding

09 p1780 A70-23107

Plastic buckling of eccentrically stiffened circular cylindrical shells with multiple isotropic layers under combined axial and lateral pressure, deriving stability criterion

09 p1780 A70-23213

Power-law stress-strain relation in plastic complex stressed state, showing identical strain hardening curves for shear and tension

10 p1957 A70-24280

Rigid/plastic or rigid/perfectly plastic anisotropic plate under uniform bending, analyzing stress distribution

10 p1964 A70-25092

Residual stresses effect on strength and hardness of tungsten carbide-cobalt alloy by application of small plastic deformations, observing crack formation anisotropy

10 p1904 A70-25168

Strain tempering effects on upper and lower bainite, discussing strengthening and fracture toughness as function of temperature

10 p1905 A70-25173

Plastic strains buildup during thermal cycling, establishing relation between strain interval and cycles number to failure for strain hardening materials

10 p1965 A70-25293

Momentum theory of small elastic-plastic deformations, proving minimum potential energy, simple loading and elastic unloading theorems

11 p1218 A70-25387

Shells equilibrium with large plastic deformations, discussing stability under uniaxial/biaxial tension and physical models for material mechanical properties

11 p2130 A70-25569

Plastic strains at sharp notch roots in Perspex plates using interference patterns formed by gas laser monochromatic light beam for fracture initiation

11 p2131 A70-25594

Stress concentration in elastoplastic and creep deformations determined by approximate solution

11 p2134 A70-25845

Low cycle fatigue tests on stainless steel, discussing crack behavior dependence on temperature and plastic strain range

11 p2139 A70-26405

Thin cylindrical shells of perfectly plastic rigid material, analyzing dynamic plastic deformation under internal impulsive pressure

11 p2139 A70-26413

Metals low cycle fatigue resistance, discussing repeated plastic straining effect on mechanical properties

11 p2141 A70-26609

Energy principle providing upper bounds on plastic deformation in elastoplastic structures subjected to blast loading

11 p2144 A70-26670

Deformation theory for small elastic-plastic strains in orthotropic material and discretization and iterative solution techniques

11 p2144 A70-26684
Structural design for allowable plastic deformation under dynamic loads, deriving finite element representation of elastic-plastic plane frame beam

12 p2317 A70-27117
Thin walled tubes plastic instability under combined internal pressure and axial load for open and closed end conditions

12 p2322 A70-27216
Indentation pressures in rigid perfectly plastic solids correlated with ratio between indenter strain and material yield strain for various indenter geometries

12 p2322 A70-27232
Aluminum sheets anomalous plastic behavior under balanced biaxial and uniaxial tensions

12 p2324 A70-27398
Resistivity anomalies of nickel-chromium alloy with Al additions subjected to deformation and heating, studying K-state

12 p2254 A70-27496
Metallic cylindrical shells design reinforced with elastic glass fiber rings, considering elastoplastic deformation

12 p2324 A70-27530
Annealed stainless steel low cycle fatigue data analysis leading to method of characteristic slopes approach for correlating plastic strain range to fracture time

12 p2255 A70-27604
Superplasticity in physical metallurgy, comparing with metal deformation modes

12 p2257 A70-28145
Orthotropic fiberglass reinforced plastic deformation during stretching with allowance for binder breakdown in transverse layer

12 p2259 A70-28283
Polyurethane and metal surface layers deformation related during sliding friction in presence of liquid media, noting friction coefficient-deformation relation

12 p2244 A70-28284
Residual stress determination in flat strip elastoplastically deformed by finite bending

13 p2508 A70-28485
Plastic deformation in brittle and ductile fracture, discussing elastoplastic stress analysis of cracked bodies, plane strain deformation near cracks, etc

13 p2509 A70-28601
Plastic strain state effect on ductility and toughness of structural steels

13 p2432 A70-28675
Plastic symmetrical bending of freely supported beam under transverse local pulsed load, discussing deflection velocity fields during loading and unloading stages

13 p2514 A70-29307
Variational principles derivation for inelastically deformable body mixed boundary value problem, considering loading conditions with basic functions free of discontinuities

13 p2516 A70-29524
Plastic deformation of Mo-Re single crystals produced by electron beam zone refining, investigating lattice frictional stress, activation volume temperature variation, etc

13 p2436 A70-29562
High temperature dislocation model based on dislocation dynamics, rate theory and varying back stress ratio

13 p2436 A70-29563
Plastic deformation of Be single crystals under hydrostatic pressure, considering resolved shear stresses on glide systems

14 p2595 A70-30334
Pulsars crust plastic deformation leading to rotation damping, higher magnetic moments and rarer starquakes

14 p2638 A70-30672
Elastoplastic material mechanical theory, considering constitutive equations with plastic deformations and decompositions of total velocity-strain /stretching/

14 p2661 A70-31281
Pure Mo recrystallization deformed by cold rolling using transmission electron microscopy

14 p2597 A70-31284
Plastic deformation and aging effects on fatigue characteristics of steels until rupture under cyclic loads

15 p2755 A70-31540
Al-Zn eutectoid alloys defect structures and interactions in superplastic deformation process

15 p2756 A70-31567
Yield criteria for plastic deformation on glassy high polymers induced by stress field, noting crazing and shear yielding dependence on first stress invariant

15 p2764 A70-31787
Mechanical and morphological characteristics of overload and fatigue in dog ulnas, showing elastic and plastic deformation zones

15 p2682 A70-31935

Stress relaxation of Mo under plastic deformation controlled by diffusion of interstitial atoms and dislocations, determining activation energy

15 p2758 A70-32124
Shallow shells of revolution under axisymmetrical loads, analyzing plasticity and creep by integral equations algorithm

15 p2817 A70-32164
Axisymmetric elastoplastic deformation of compressible plate with arbitrary hardening under uniform load, solving in quadratures

15 p2817 A70-32167
Plane deformation of anisotropic plastic nonstrain-hardenable material, analyzing state equations for stresses and strain rates

15 p2818 A70-32184
Photoplastic material thickness change from mechanical and holographic measurements, showing correlation with isochromatics during plastic yielding

15 p2821 A70-32314
Size effects on impact energy disposition in plastically deformed thick steel specimens at shelf temperature, using similitude laws

15 p2760 A70-32332
Austenite strength effect on austenite-martensite transformation in alloy steels, measuring resistance to plastic deformation

15 p2760 A70-32376
Metal fiber multiple necking effect on uniaxial metal matrix composites ductility and plastic deformation behavior for brass-W model system

15 p2761 A70-32378
Alumina particles marker transport in Ag wires during early sintering as function of plastic deformation by slip

15 p2745 A70-32392
Work hardening properties of Ni single crystals of various orientations during intermittent and continuous plastic deformation

15 p2762 A70-32394
Metal property effects on deformation and strain energy distribution during hypervelocity projectile cratering

15 p2824 A70-32790
Metastability effects on plastically deformed Al, showing superplastic flow

15 p2764 A70-32902
Super plasticity in plastically deformed pure Al related to recrystallization

15 p2764 A70-32903
Superplastic deformation of thin circular diaphragms subjected to on-sided hydrostatic pressure, emphasizing thickness variations in bulged shapes

16 p2916 A70-32917
Titanium and Ti-Al single crystals microscopic plastic deformation features, slip modes and dislocation substructures

17 p3116 A70-34389
Commercial purity Ti athermal plastic deformation, showing anomalous behavior with temperature variations

17 p3116 A70-34392
Titanium hydride deformation assisted nucleation in alpha-beta titanium alloy, showing low strain rate embrittlement and stress corrosion crack propagation in aqueous environments

17 p3116 A70-34395
Hydrogen embrittlement of Ti and Ti alloys under plastic deformation and critical hydrogen concentration

17 p3117 A70-34397
Temperature cycling through phase transformation effects on plastic deformation of Ti and Ti-Al-V alloy under torsion and tension

17 p3117 A70-34400
Hot plasticity elongation of cast and wrought Ti-Al-V alloy as function of temperature and strain rate

17 p3117 A70-34401
Displacement bounding principle for finitely deforming rigid plastic structures exhibiting geometric stability, with application to cylindrical shell

17 p3184 A70-34906
Plastic deformation of two phase alloy with small nondeformable particles in ductile matrix, discussing cross slip, yield and flow stress, work hardening etc

17 p3126 A70-35460
Plastic deformation zones at crack tip considered as distributed heat sources, using stress and strain distribution solutions

17 p3191 A70-35463
Sapphire and ruby plastic deformation and fracture properties at room temperature, discussing sapphire base ceramics

18 p3278 A70-36046
Elastoplastic deformations during explosive extrusion of pipes of different materials with linear strain hardening law

18 p3335 A70-36132
Spherical shell of variable thickness, calculating stress-strain state around reinforced circular hole during elastoplastic deformation

18 p3336 A70-36138

Ti alloy prior plastic deformation effect on fatigue strength under bending, tension, torsion and rolling

18 p3275 A70-36141
Elastic and plastic cylindrical shells, investigating dynamic buckling under impulsive loads

18 p3338 A70-36436
Stress concentration in notched flat samples under plane plastic deformation

18 p3340 A70-36570
Cyclic plastic breakdown of thin cylindrical shell under ring shaped load in temperature field, using linear programming method

18 p3341 A70-36585
Loading history effect on work of plastic deformation in Ni and Cu pipes, taking into account stress and strain deviators deviation from similarity

18 p3344 A70-36945
Combined mechanical and cyclic thermal stresses effect on plastic deformation buildup in E1435 alloy preceding breakdown

19 p3449 A70-37349
Plastic deformation of melted Al-Mg single crystals, using dynamic tensile testing

19 p3450 A70-37374
Metal powder rolling process as compaction with plastic particle deformation, deriving pressure distribution on rollers

19 p3434 A70-37451
Superlattice stacking faults in plastically deformed nickel aluminate /gamma prime phase/ due to interaction of antiphase boundary /APB/ type dislocation pairs

19 p3451 A70-37704
Plastic deformation in Ni-Cr-Nb alloy precipitation hardened at different long terms of high temperature

19 p3451 A70-37706
Plasticity and strain hardening in sintered metals, considering pressure at pores and elastoplastic limit under small plastic deformation

20 p3644 A70-38962
Solid body nonelastic deformation in terms of thermodynamic principles of nonequilibrium processes

20 p3718 A70-39246
Elastoplastic deformation in strip with symmetrical semicircular notches simulating stress-strain-state on celluloid models by polarization-optical method

20 p3720 A70-39735
Elastoplastic deformation of thin circular plates under uniformly distributed transverse loads, using mixed type variational equation

20 p3721 A70-39776
Soviet papers on mechanics of solid deformed body covering elasticity and plasticity theories, shell stability, eigenvalue problems, etc

20 p3722 A70-39851
Low cycle metal fatigue under stress concentration, examining complex loading, cyclic strain, stress-strain state and plastic deformation

20 p3727 A70-39885
Anisotropic plasticity yield conditions, analyzing elastic to plastic deformation transition geometry

20 p3727 A70-39889
Thin circular plate clamped along edge, calculating large displacements and elastoplastic strains for comparison with measurement

21 p3935 A70-41406
Elastic-plastic deformation analysis at finite strain by two component thermodynamic model

21 p3937 A70-41431
Apollo 11 lunar soil and breccia shock metamorphism, examining plastic deformation structures in plagioclase, pyroxene and olivine

21 p3897 A70-41520
Compatibility equations in superelastic domain for permanent deformation hypotheses

22 p4114 A70-42611
Cylindrical cavity uniform expansion in compressible elastic plastic solid, calculating pressure by similarity solution

22 p4114 A70-42634
Spherical cavity nonuniform expansion in compressible elastic plastic solid, calculating velocity field and pressure by approximate similarity solution

22 p4114 A70-42635
Recrystallized and nitrided Mo alloy microstructure under plastic deformation by tension at high temperatures

22 p4038 A70-43122
Mo single crystals tensile properties at different orientations, noting asymmetric slip in plastic behavior

22 p4056 A70-43155
Alloy aging process after plastic deformation, examining relationship of phase distribution and mechanical and physical properties

22 p4056 A70-43340
Soviet bibliography on flexible plates covering elastic bending, elastoplastic state under transverse load and bending beyond elastic limit

22 p4119 A70-43710
Limiting pressure for isotropic plastic plates and spherical shells with stress dependent yield, using flow theory

22 p4120 A70-43717

- Precious metals, measuring tension, grinding and polishing induced surface plastic deformation effects on electron work function and exoemission
23 p4204 A70-43927
- Comparative load capacity of disk models of natural gas blowers of different designs under plastic strain
23 p4232 A70-43941
- Plastic postbuckling and imperfection sensitivity of spherical shells under axisymmetric bifurcation
23 p4272 A70-44714
- Plastic deformation dislocation motion and incompatibility relationship, describing strain rate, velocity and stresses
24 p4420 A70-45229
- Ti single crystals plastic deformation in axial compression at high temperatures
24 p4358 A70-45239
- Metal and alloy sheets, investigating deformation and failure under biaxial stretching tensile tests
24 p4358 A70-45240
- Plastic creep displacement and deformation bounds computation for simple redundant structures, using energy theorems
24 p4422 A70-45288
- Notch sensitivity dependence on plastic strain in Al alloy, heat resistant steels and Ni alloys under tensile tests at room temperature
24 p4360 A70-45827
- Isothermal plasticity thermodynamic foundation, deriving constitutive equations for various deformations
24 p4426 A70-45994
- Zn-Al alloy high velocity deformation characteristics, examining ductility and aging at various temperatures and heat treatments
24 p4363 A70-46194
- PLASTIC FILMS**
U POLYMERIC FILMS
PLASTIC FLOW
NT TRESKA FLOW
Strain rate, temperature and alloy content effects on plastic flow in binary substitutional alloys of bcc iron

- Plastic flow and failure of elastic fiber reinforced composite materials with noninteracting and interact-

ing discontinuities, obtaining stress distribution for various work hardening degrees
17 p3187 A70-34991

Pure Ni plastic flow threshold measurement under combined ultrasonic and static loadings, noting annealing
22 p4053 A70-42644

Moire technique application to fracture toughness tests on Zr alloys, measuring crack opening displacements and plastic flow beneath notch
23 p4208 A70-44914

Fe-Ni alloy plastic flow behavior during reversible austenite-martensite transformation under constant load
24 p4357 A70-45228

Plane flow of incompressible elastic perfectly plastic solid, deriving hyperbolic stress and velocity equations
24 p4427 A70-46043

PLASTIC MATERIALS

U PLASTICS

PLASTIC PROPELLANTS

Flame spreading theory for plastic fuels surfaces in nitrogen-oxygen mixtures, considering initial fuel temperature, pressure and mixture composition effects
02 p0396 A70-12015

Polyvinyl chloride plastisol propellants consisting of fine solid oxidizer and powdered metal, discussing composition, propellant flow, curing time and temperature dependence
07 p1360 A70-19908

Burning and degradation mechanism of polyester propellants correlated with mass regression rate dependent on surface temperature
11 p2099 A70-25990

Combustion rates acceleration of ammonium perchlorate mixtures with polystyrene and polymethyl methacrylate by KCl and LiF additions, forming molten layer on charge surface
18 p3299 A70-36248

PLASTIC PROPERTIES

NT ELASTOPLASTICITY

NT PHOTOPLASTICITY

NT THERMOPLASTICITY

NT VISCOPLASTICITY

NT YIELD POINT

Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium
01 p0124 A70-11615

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads
02 p0315 A70-11662

Bounded region satisfying regularity necessary to Korn inequalities and Sobolev immersion theories, discussing plasticity theory operator monotony in Minty-Browder sense
02 p0387 A70-12109

Dislocation climb theories of creep and superplasticity derived, postulating strain hardening and recovery processes with independently determined rates
02 p0317 A70-12315

Thin simply supported circular rigid ideally plastic plate subjected to dynamic transverse load uniformly distributed over central circular region
02 p0389 A70-12668

Strain rates and stresses relations in plasticity theory for consolidatable orthotropic bodies having three elastic planes of symmetry
02 p0389 A70-12686

Rigid plastic body of material insensitive to strain rate under time dependent surface tension and time independent body forces
02 p0391 A70-12816

Elastoplastic media revised mathematical model with allowance for cumulative damages effect on elastoplastic property under variable loads
04 p0775 A70-15199

Plasticity theory of single crystals based on dislocations behavior, considering only plane and elastic strains
05 p0928 A70-16061

Testing equipment and methods for metallic materials selection for low temperature applications, characterizing plasticity by yield strength, tensile strength, elongation, etc
05 p0864 A70-16805

Finite element method for large displacement elastic-plastic analysis of plates and shells, using geometric stiffness matrices and stress-strain relationships
05 p0943 A70-16809

Continuous metal fiber composites tensile strength and ductility in terms of plastic instability
05 p0946 A70-16924

Dual model for describing brittleness and plasticity of solid elastic deformable body, formulating criteria for passage into inelastic state
06 p1166 A70-17656

Fabrication technique effect on tensile and plastic properties of semifinished sintered Al powder products at room temperature and 600 C
06 p1076 A70-17848

Oxidation behavior of metals concerning oxide plasticity role in connection with oxide film macro- and microstresses
07 p1305 A70-18968

Plastic symmetrical trough waveguides with metalized surfaces for hybrid millimeter-wave integrated circuit systems, discussing ferrite resonant isolator
07 p1243 A70-20151

Limiting equilibrium of rigid-plastic cylinder subjected to compression by concave stamps
08 p1583 A70-20533

Quenched and tempered steels ductile fracture with respect to plasticity, structure and crack development conditions using microfractography
08 p1515 A70-20922

Ultrasonic vibration effect on strength and plastic properties of metals undergoing torsion tests
08 p1520 A70-21499

Plastic properties of tungsten carbide single crystals at room temperature, determining slip system crystallographic orientations
08 p1520 A70-21557

Strength and plasticity criteria for anisotropic reinforced materials model taking into account material structure, components properties and behavior
09 p1768 A70-22119

Polarization-optical studies of large deformations in nonlinear theory of elasticity and plasticity, considering procedures based on photoelastic coatings and transparent models
09 p1768 A70-22120

Variational theorem for compatibility and plasticity for Mises solids based on stress functions
09 p1771 A70-22397

Finite deformations of flexible inelastic orthotropic shells of revolution for generalized plastic flow and deformation theories
10 p1955 A70-24079

Finite deflections theory applied to elastic-plastic arches, introducing coefficients depending on shape and degree of yielding of cross section
10 p1955 A70-24080

Interstitial and substitutional impurity effects on fracture strength, plastic properties and ductile-brittle transition temperature of vanadium determined from impact and tensile tests
11 p2066 A70-25913

Powder base superalloy with superplastic behavior, ascribing mechanism to migration of second phase gamma prime particles
12 p2252 A70-26889

Plastic properties of materials to elastic limit of pure metal and ionic solid crystals
12 p2283 A70-27055

Weather effects on plastic properties, discussing weathering interactions with plastics and polymer degradation
12 p2259 A70-27206

Stress-strain state effects on Cu and Ni tubular samples plasticity and strength using polarization-optical technique
12 p2323 A70-27341

Dispersion strengthened Ni-Cr alloys elastic and plastic properties at room temperature, studying preferred crystallographic orientation effect
12 p2255 A70-27609

Superplastic nickel superalloys fabrication by controlled densification during direct extrusion
12 p2257 A70-28020

Plasticity and superplasticity exploitation - Conference, Eastbourne, Sussex, England October 1969
12 p2327 A70-28143

Superplasticity in physical metallurgy, comparing with metal deformation modes
12 p2257 A70-28145

Engineering development role in metal forming industry expansion, discussing metals ductility or plasticity increase for extending processes
12 p2244 A70-28146

Elastoplastic continuum under specified rates of body forces, surface tractions and displacements, formulating minimum principle for solving boundary value problem
13 p2513 A70-29154

Al-Mg alloy sheets work hardened plastic properties, tensile strength and elongation
14 p2597 A70-30962

Elastoplastic torsion problems solution by strain theory of plasticity, describing torsion function in hypergeometric series form
14 p2661 A70-31329

Unloading shock waves propagation in elastoplastic medium, investigating strain hardening effect on shock strength decay, residual strains and radial stresses
15 p2815 A70-32002

Axissymmetric nonuniform initial thickness disk under pressure and twisting along interior surface of circular hole using incremental theory of plasticity for deformation analysis
15 p2816 A70-32004

Tapered cantilever Al plate load characteristics, determining elastic and plastic strain due to regular, reverse and second regular deflection sequence
15 p2821 A70-32307

Super plasticity in plastically deformed pure Al related to recrystallization 15 p2764 A70-32903

Book on structural mechanics with introduction to elasticity and plasticity 16 p2987 A70-32915

Metallic superplasticity and superplastic alloys in simple tension, forming tubes and sheets of superplastic Sn-Pb eutectic alloy by pressure forming techniques 16 p2916 A70-32916

Superplastic deformation of thin circular diaphragms subjected to oned-sided hydrostatic pressure, emphasizing thickness variations in bulged shapes 16 p2916 A70-32917

Lateral pressure bulging of superplastic alloy sheet, considering flat circular sheet and bulging into V grooves 16 p2916 A70-32918

Fiber reinforced prepreg properties measurements in high modulus graphite/epoxy and fiberglass/ epoxy prepreg sheets and tapes 16 p2938 A70-33386

Pressure forming Ti sheet alloy blanks in superplastic condition under controlled temperature and strain rate 17 p3117 A70-34402

Rate-sensitive perfectly plastic linear strain hardened rings and tubes, calculating response to impulsive loads 17 p3184 A70-34907

Plasticity limit theorems applicability extended without geometry change requirement, discussing load elastic buckling and fiber pullout from composite materials 17 p3186 A70-34977

Baron thermal diffusion effects on plastic of pure Mo subjected to recrystallization 17 p3102 A70-35408

Collection of papers on physics of strength and plasticity, covering flow mechanisms, stress fields, alloy hardening, crack structure and initiation, rock ductility, etc 17 p3190 A70-35451

Cyclic strain effects on creep for steel at elevated temperatures, discussing overload frequency effects on plastic strain buildup 17 p3127 A70-35719

Temperature changes minimization techniques in specimens during microplasticity tests, describing gage assembly for plastic strain measurement 18 p3272 A70-36030

Transformation induced plasticity (TRIP) high strength steels resistance to hydrogen embrittlement 18 p3273 A70-36047

Optimal distribution of plastic inhomogeneity of torsioned prismatic square bars under maximum loading 18 p3343 A70-36719

Polarization optical determination of plane stress plastic region, using celluloid model 18 p3343 A70-36723

Ti alloys low temperature strength and plasticity, noting twinning and additives effects 19 p3450 A70-37457

Strain transducer /optical diffraction grating/ for plastic wave propagation measurement along specimens subjected to impact 19 p3425 A70-37884

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads 19 p3453 A70-38436

Continuum bodies strain subjected to shearing stresses in incremental form based on slip theory of metals plasticity 19 p3549 A70-38668

Ti-Nb-Zr alloys strength and plasticity at various temperatures, noting compositional effects on tensile and yield strength 19 p3453 A70-38712

Microstresses in plasticity theory, considering continuous elastic body model of crystal with dislocations 20 p3724 A70-39859

Stress-strain characteristics at high strain rates, obtaining materials dynamic plastic properties by thin wafer technique 21 p3932 A70-40543

Plastic zones between symmetric and collinear edge cracks in thin plexiglass strips, using He-Ne laser interferometry 21 p3939 A70-41967

Papers on thermoplastics covering types, properties and applications 22 p4060 A70-43624

Isothermal plasticity thermodynamic foundation, deriving constitutive equations for various deformations 24 p4426 A70-45994

Superplasticity, discussing strain rate-flow stress relationship and grain boundary sliding 24 p4363 A70-46218

PLASTIC TAPES

Fiber reinforced prepreg properties measurements in high modulus graphite/epoxy and fiberglass/ epoxy prepreg sheets and tapes 16 p2938 A70-33386

Electrically conductive plastics fabrication and applications limitations, discussing plastic matrix materials loaded with various conductive fillers 01 p0129 A70-10938

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain 01 p0212 A70-11562

Nonsteady thermal decomposition of plastics subjected to large heat flows, introducing equations governing char layers and pyrolysis zones 02 p0397 A70-12021

Polymeric materials properties, discussing tensile stress disadvantage and compensation by reinforcement and polymer chain directional alignment 02 p0321 A70-12305

Complex Young modulus of plastics during flexural vibration, discussing deformation of viscoelastic bodies and test results of various plastics [ONERA-TP-715] 03 p0487 A70-13645

High speed photographic study of breakdown, crack formation, thermal explosions and molecular weight of transparent plastic dielectrics under laser beam 05 p0869 A70-16210

N-substituted tetrabromophthalimides prepared as fire retardant additives to PVC, polyester and epoxy resins 05 p0811 A70-16585

Handbook on fiberglass and advanced plastics composites covering raw materials, processing methods, design and applications 05 p0872 A70-16601

Precooling effect on load carrying capacity of heat resistant plastics subjected to unilateral heating 05 p0874 A70-17065

Heat resistant plastics stability subject to unilateral heating with allowance for mass removal, obtaining dimensionless stability characteristics for structures design 05 p0874 A70-17066

Test stand for endurance and creep testing of plastics, glazed ceramics and other brittle materials 06 p1028 A70-17665

Power series solution of Cauchy problem for axisymmetric state of ideally plastic body 07 p1405 A70-19288

Graphite-polyester plastic material with electrical resistance for eliminating static charges leading to explosions 07 p1295 A70-19764

Sand erosion of metals and plastics, discussing effects of impact conditions and impacting particles and target surface properties 07 p1314 A70-20004

Metals and plastics tensile strain rate sensitivity tested by drop weight tests, obtaining dynamic and static stress-strain curves 09 p1704 A70-22725

Dynamic photoelastic analysis of fracturing plastic plates, studying elastic and stress fields around propagating cracks 09 p1783 A70-23448

Macroscopic internal stresses in plastics surfaces, discussing stress effect on plastic moulding service life, Knoop hardness test and charts 11 p2132 A70-25597

Pinhole expansion in anisotropic plastic disks determined by obtaining solutions for Tresca and Mises yield functions, assuming plane stressed state 11 p2138 A70-26171

Charring ablative plastic thermal properties simultaneous measurement using modified heat transfer model and nonlinear regression analysis 12 p2333 A70-28111

Longitudinal stress waves propagation in polymeric optically active plastic bars using photoelasticity method 12 p2328 A70-28277

Fiberglass plastic cylindrical shells stability against creep under prolonged hydrostatic pressure, obtaining critical loading times 12 p3328 A70-28278

Strain induced in laminated orthotropic fiberglass plastic cylindrical shell by normal concentrated load, using equations free from rectilinear normals hypothesis 12 p3328 A70-28279

Structural strength of fiberglass plastics reinforced conical shells, using impregnation technique of dry package under pressure 12 p2328 A70-28280

Engineering properties and structure of plastics - Conference, New York, May 1970 13 p2438 A70-29251

Plastic encapsulated semiconductors reliability test programs with emphasis on accelerated humidity-temperature method 13 p2377 A70-29259

Simulated Venusian atmosphere effects on polymeric plastic and rubber materials, comparing with high temperature air and nitrogen exposures 14 p2640 A70-30781

Plastics - Conference, Washington, D.C., February 1970 16 p2934 A70-33351

Plastic structural components service life estimation based on creep diagrams and short time tests 16 p2941 A70-34323

Plastic materials Poisson ratio and Young modulus measurements by triaxial compression method 17 p3089 A70-35048

Nonlinear elasticity law for elastic moduli of plastics 18 p3344 A70-36947

Super heavy cosmic ray nuclei charge composition and track identification, using Lexan polycarbonate, cellulose triacetate (CTA) and nuclear emulsion 19 p3508 A70-38137

Complementary energy bounding theorem for statically loaded bodies composed of time independent plastic material 19 p3546 A70-38353

Plastic bodies rupture and crack growth under creep, considering tension of bar with symmetrical angular notches 20 p3727 A70-39882

Glass plastic composite electrically heated windshields for aircraft, discussing design, fabrication, qualification testing and service experience 21 p3750 A70-41137

Monolithic precision castings using photoetched plastic and lost-wax investment techniques [ASME PAPER 70-FLCS-8] 22 p4043 A70-42419

Plastic balloon platforms for atmospheric research and engineering applications, discussing design and use of unreinforced polyethylene and reinforced Mylar types 22 p3962 A70-43650

Dynamic deformation in thin walled axisymmetric plastic shells and filaments under time variable loads applied to high energy rate forming techniques 23 p4200 A70-44235

Plastic encapsulated IC for military environments, discussing cooker, corrosion and thermal shock tests 23 p4173 A70-44534

Approximation method for large deflection analysis of impulsively loaded rigid plastic circular plates and symmetric shells 23 p4275 A70-44943

Nondestructive examination for plastics, discussing transmission, microwave and ultrasonic tests 24 p4346 A70-45720

Papers on plastics, volume 1 covering materials, design, fabrication, applications, etc 24 p4368 A70-46223

PLASTISOLS

NT SMOKE

Slurry-cast filled nitrocellulose plastisols as solid propellants, discussing compositions, performance and applicability to beryllium fuel 07 p1360 A70-19907

Polyvinyl chloride plastisol propellants consisting of fine solid oxidizer and powdered metal, discussing composition, propellant flow, curing time and temperature dependence 07 p1360 A70-19908

PLATE [METAL]

U METAL PLATES

PLATE THEORY

Anisotropic shells and plates dynamic field equations derived, taking into account mechanical forces and nonuniform temperature field 01 p0200 A70-10553

Moments and shear forces in plate flexure represented by single valued stress functions of position, stating variational principle for compatibility 01 p0201 A70-10931

Longitudinal wave motion in rods, plates and shells based on three dimensional equations and asymptotic expansion 01 p0209 A70-11365

Plates and shells natural oscillations frequencies and modes, analyzing variational, asymptotic and numerical methods

01 p0210 A70-11412

Two asymptotic dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads

01 p0212 A70-11563

Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates

01 p0212 A70-11564

Triangular conforming plate bending element applied to static and dynamic problems, investigating convergence rates of finite element approximations

03 p0584 A70-12924

Monograph on buckling and postbuckling behavior of plates tapered in planform, comparing stability of tapered and rectangular plates

03 p0586 A70-13002

Stress-strain state equations of shallow spherical shells in rectangular and polar coordinates, discussing reduction to plate and Cauchy-Riemann equations

03 p0591 A70-13427

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure

03 p0600 A70-14306

Thermal stresses of semiinfinite plate with circular hole filled with elastic inclusion and subjected to uniform heat flow

03 p0601 A70-14317

Linear isothermal response of viscously damped thin homogeneous polygonal plates subjected to uniform dynamic loading, calculating forced solutions by numerical integration

03 p0601 A70-14318

Linear nonaxisymmetric bending of infinite plate coupled to elastic half space under concentrated loads using double Fourier transforms

04 p0766 A70-14480

Thin walled plate simply supported on three edges, studying behavior following local stability loss

04 p0772 A70-14923

Soviet monograph on numerical determination of dynamic characteristics of plates and shells by method of summary representations, covering oscillation and stability problems

04 p0773 A70-14954

Flat plates thermal buckling calculations with allowance for transverse shear deformation effect, using Rissner variational principle

04 p0773 A70-15091

Piston theory application to plates and shells stability in supersonic gas flows, considering critical velocities determination for asymmetric flows and oscillations

04 p0617 A70-15196

Biaxial prebuckling loading effect on compliance tensor in plastic buckling of square plates analyzed by local strain statistical theory

05 p0925 A70-15790

Soviet book on anisotropic plates theory, strength, stability and oscillations including corrections to classical theory

05 p0928 A70-16016

Dynamic response of simply supported rectangular plate under suddenly applied transverse load, comparing solutions of classical and improved plate theories

05 p0933 A70-16174

Stress distribution around crack tip of initially curved sheets

05 p0939 A70-16484

Green operator structure and eigenvalue approximation of boundary value problems regarding vibrations and buckling of clamped plates using orthogonal invariants

05 p0876 A70-16563

Finite element method for large displacement elastic-plastic analysis of plates and shells, using geometric stiffness matrices and stress-strain relationships

05 p0943 A70-16809

Modulus of rigidity and stress-strain state measured in square plate during shear produced by twisting

06 p1060 A70-17132

Rectangular and nonrectangular anisotropic plate bending and stability analysis by difference-differential technique, allowing for combined freely supported and clamped end conditions

06 p1167 A70-17864

Eigenvalue solutions convergence rates using two finite plate multidegrees of freedom bending elements

06 p1169 A70-17941

Numerical analysis of axisymmetric elastoplastic deformation of circular plates under combined lateral load and membrane force

07 p1402 A70-18977

Circular plates dynamic response to axisymmetric time dependent loads, analyzing transverse restraint effects on response maxima by plate theory

07 p1404 A70-19251

Governing equations solution for simply supported laminated anisotropic rectangular plate using Fourier series method

07 p1406 A70-19305

Unsteady heat conduction in plate, solid or hollow infinite cylinder and sphere with internal heat source and radiative heat transfer on surface

07 p1423 A70-19818

Elastic fields in bimaterial plate under uniform compressive and anti-plane shear loadings, finding stress distribution and induced interfacial shear stresses

07 p1412 A70-19957

Nonlinear thermodynamic theories of plates, elastic shells and rods derived from three dimensional theory of classical continuum mechanics

07 p1414 A70-20172

Transverse free molecular flow past broken plate of infinite span, determining aerodynamic coefficients

08 p1432 A70-21082

Thermoelastic characteristics of glass fiber reinforced plastic materials, determining temperature dependent deformation of composite plate

08 p1526 A70-21164

Thermoelastic state of plate near foreign circular inclusion, assuming heating by uniformly distributed sources and ideal plate-inclusion thermal contact

08 p1587 A70-21171

Variational problem of determining optimal heat transfer from gas flow to porous plate boundary layer

08 p1597 A70-21176

Biharmonic equation in polar coordinates solved for circular plates and plate sectors with various boundary conditions, using finite difference approximations

08 p1589 A70-21246

Two dimensional natural convection boundary layer on finite isothermal horizontal plate, examining upward facing cold plate and downward facing hot plate

08 p1598 A70-21580

Theorem for highest statically admissible multiplier for plates and shells, noting association with stress field satisfying yield equality at all cross sections

08 p1595 A70-21977

Nonuniqueness theorems for von Karman equations governing thin flat elastic plate deflections clamped at edges and subjected to normal and edge loading

09 p1768 A70-22063

Natural oscillation frequencies of subsonic gas flow past plate array, solving eigenvalue problem by splicing method

09 p1603 A70-22117

Nonorthotropic pinched plates deflections solution, demonstrating asymptotic convergence of small parameter method

09 p1769 A70-22151

Free incompressible oil jet interaction with mobile plate, discussing plate configuration, oil feed pressure and nozzle diameter, applications to electrohydraulic converter design, etc

09 p1613 A70-22825

Rectangular plate in unsteady temperature field, analyzing thermoplasticity problem by reducing solution to linear system with variable coefficients

09 p1779 A70-23098

Numerical analysis of forced parametrically excited plate vibration in plane supersonic flow, using digital computer

10 p1958 A70-24527

Transverse vibrations of rods, plates and shells based on hyperbolic, circular and Bessel functions

10 p1959 A70-24586

Temperature effect on plate damping by constrained viscoelastic layers, emphasizing transition and operating temperature compatibility

10 p1962 A70-25063

Noise-flutter interrelation in flight vehicle flexible plate and shell configurations immersed in fluid flow

11 p2132 A70-25726

Elastic bending of clamped and supported elliptic and parabolic plates under external pressure investigated by lines of equal deflection

11 p2133 A70-25839

Conforming plate bending solution with third degree polynomial deflection functions in triangular finite elements, using Lagrange multipliers as stress parameters

11 p2143 A70-26642

Stress concentration coefficients in multiply connected plates and bulky elements made of nonlinearly elastic materials

12 p2323 A70-27336

Critical equilibrium of plate under omnidirectional tension with radial rectilinear cracks

13 p2515 A70-29429

Isotropic plates weakened by circular holes, investigating bending by Ambartsumian plate theory

13 p2515 A70-29509

Plane stress state equations for micropolar elastic plates using complex potentials

13 p2517 A70-29629

Arbitrary planform plates with edge clamping and elastic beam spanwise support using Green function

14 p2655 A70-30182

Eigenvalues of membranes and plates, comparing asymptotic and numerical values

14 p2600 A70-31223

Rheological calculation of plate resistance and heat transfer in laminar flow of structurally viscous fluids

15 p2827 A70-32126

Axisymmetric elastoplastic deformation of compressible plate with arbitrary hardening under uniform load, solving in quadratures

15 p2817 A70-32167

Closed form difference equations for finite element models in structural mechanics, noting plate and grid applications

16 p2990 A70-33672

Infinite elastic plate with beam reinforced circular insert, using classical plate theory and Euler-Bernoulli hypothesis for beams

16 p2990 A70-33679

Transversely isotropic elastic plates vibrations without initial specification of field variables spatial dependence on thickness coordinate by two dimensional asymptotic theory

16 p2994 A70-34232

Three dimensional linear small deformation theory of elasticity solution for free vibration of simply supported homogeneous isotropic thick laminated rectangular plates

17 p3181 A70-34522

Matrix filtering method for stability solutions of shells and plates by finite difference method

18 p3341 A70-36580

Discrete element stress and displacement analysis of elastoplastic plates

18 p3342 A70-36686

Bent plates strain analysis using in-plane moire method for small and large deflections

19 p3535 A70-37383

Soviet book on theory of shell and plate type thin walled structural elements stability covering strength, boundary value problems, oscillations, design, etc

19 p3535 A70-37401

Linear micropolar elasticity theory of shells and plates, considering transverse shear and normal strains and rotary inertia

19 p3538 A70-37793

Open and multiply connected closed sections of varying thicknesses, solving for unrestrained torsion

19 p3545 A70-38339

Sandwich panels geometrically and physically nonlinear theory, obtaining equations of motion and boundary conditions consistent with strain displacement relations

19 p3547 A70-38360

Spherical shell equilibrium states dynamic calculation method applied to thin plates nonlinear theory statistical problems

20 p3725 A70-39871

Bending of rigidly fixed or simply supported parallelogram plates, using Ritz and Rubnov-Galerkin variational methods

21 p3933 A70-40742

Stress intensity factors for complicated crack configurations in finite plates, using finite element method with cracked elements

21 p3940 A70-42034

Symmetrical bending of isotropic elastic half-strip with free longitudinal edges and end displacements, indicating use for plate and shell theory

22 p4118 A70-43568

Cross ply laminated plates natural frequencies, approximating flexural vibration by classical theory

22 p4119 A70-43679

Limiting pressure for isotropic plastic plates and spherical shells with stress dependent yield, using flow theory

22 p4120 A70-43717

Stress concentration near holes in nonlinear viscoelastic plate, using elastic theory

23 p4266 A70-43989

Plate constituting doubly connected region bounded by outside curvilinear polygon and inside by eccentrically located circle, using series summation

24 p4424 A70-45636

PLATELETS

Platelet and lipid changes in thrombocytopenic and control rats subjected to bends producing technique in aerobolism

01 p0015 A70-10364

Human blood platelets volume measured in Coulter counter, noting relation to temperature

03 p0416 A70-13008

Platelet function in coronary artery disease and myocardial infarction, considering thrombosis, atherosclerosis, emboli in microcirculation, etc

04 p0635 A70-15458

Adhesive and aggregative properties of blood platelets in rats after beta irradiation linked to activity of serum factor

07 p1207 A70-19474

Platelet aggregation in whole blood, basing measurement method on filtration pressure with added adenosine diphosphate /ADP/

07 p1210 A70-19591

Blood platelets aggregation and release reaction in thromboembolic disease due to injury

17 p3032 A70-35471

PLATES

- Quasi-static thickness-shear approximation of radiation of electromagnetic energy accompanying oscillation of piezoelectric crystal plates 19 p3487 A70-37945
- Heat exchange and temperature distribution between two liquids divided by plate, discussing possible errors 20 p3737 A70-39634
- Plate temperature field and stress distribution under thermal pulses, evaluating critical heat load for damage 20 p3737 A70-39635
- Laminar boundary layer equations on plate with arbitrary catalytic properties in diatomic gas flow undergoing vibrational dissociative relaxation 20 p3611 A70-39802

- Nondestructive bond inspection by interferometric holography of ultrasonically excited plates 14 p2588 A70-31166
- Complex plates free transverse oscillation modes and frequencies using Ritz method 15 p2818 A70-32183
- Stress analysis for plate with large displacements by multicamera photogrammetry, comparing results with numerical solution by finite differences 15 p2821 A70-32313
- Clamped skew plates influence coefficients, natural vibration frequencies and nodal patterns measurement, comparing to Galerkin method results 16 p2988 A70-33124
- Geometrically nonlinear theory for sandwich type plates symmetrically built of three elastically and thermally anisotropic layers, considering nonuniform temperature field 16 p2990 A70-33744
- Low aspect ratio plates flutter analysis for subsonic and supersonic models 16 p2991 A70-33888
- Sound wave phase fluctuations from ultrasonic waves traveling through turbulent wakes of circular cylinders and plates, using multichannel pulse height analysis 16 p2839 A70-34086
- Vibrations of shells, plates and membranes carrying dynamic systems at discrete points on surface, obtaining eigenfunction and eigenvalue equations 16 p2993 A70-34090
- Transonic flow around perpendicular plate, determining front side velocity and pressure from known stagnation point and transonic region 16 p2839 A70-34236
- Polycarbonate plate fatigue crack propagation, discussing length due to repetitions, striation number relationship to cycles, and stress intensity 16 p2941 A70-34335
- Stress intensity analysis method for plates with random cracks array under plane stress 17 p3187 A70-34997
- Natural vibrations of complex plates for combined free and clamped conditions 17 p3189 A70-35343
- Plates and rods tendency to warp and form nonsymmetrical stress systems during heat treatment 19 p3433 A70-37272
- Electromagnetic induction in plate with two dimensional conductivity distribution for case of E polarization, representing field by Green functions 19 p3408 A70-37314
- WKB or eikonal approximation for waves and vibrations in inhomogeneous Euler-Bernoulli beams and plates and Timoshenko beams 19 p3536 A70-37700
- Flexural vibrations of laminated composite plates, maintaining continuity of displacements and surface tractions at intersurfaces between reinforcing layers and composite matrix 19 p3537 A70-37790
- Book on thermoelasticity covering thermal stresses in disks, plates, shells and bodies of revolution under steady and unsteady temperature fields 19 p3541 A70-37974
- Book on structural analysis by finite difference calculus covering elastic and elastoplastic states, vibration and buckling of beams, gridworks, plates and shells 19 p3548 A70-38599
- Hydromagnetic flow past infinite impulsive motion plate, determining velocity and temperature fields distribution 19 p3482 A70-38934
- Vibrating plate thickness function, applying eigenvalue problem 20 p3726 A70-39877
- Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces 20 p3732 A70-40268
- Plate structural analysis by finite element method, obtaining geometric continuity by additional displacements and forces at corner nodes 21 p3932 A70-40553
- Stress-strain state of finite length elastic beam free of bending moments and coupled to semiinfinite plate 21 p3933 A70-40603
- Support elasticity role in axisymmetric plates bending, discussing Rayleigh-Ritz solution 21 p3937 A70-41739

- Accelerated supersonic motion of plate with attached shock wave at finite angle of attack in ideal gas, using perturbed nonstationary motion equations 21 p3748 A70-42209
- Aerodynamic noise scattering by semiinfinite compliant plate in turbulent flow, using Lighthill theory and Wiener-Hopf technique 23 p4179 A70-43968
- Finite element structural analysis /FESTRAN/ computer program predicting static structural response of plate and shell structures 23 p4272 A70-44717
- German monograph on stress-strain state in prestressed, rigidly supported flexible plates subjected to large deflections, using extended Wolmir solution 24 p4418 A70-45083
- Infinite plates and shallow shells stability under doubly periodic surface loadings, using nonlinear analysis 24 p4421 A70-45283
- German monograph on thermally induced elastic stress effects on crack formation and propagation in plates 24 p4422 A70-45524
- Periodically supported beams and plates free vibration, calculating natural frequency spectrum distribution and normal modes 24 p4427 A70-46070
- PLATFORMS**
- Mariner 4 scan platform structure and actuator design, development and performance 16 p2845 A70-34106
- PLATING**
- NT ELECTROPLATING
- NT NICKEL PLATE
- Hydrogen embrittlement of landing gear steels, discussing plating bath program additions for optimum safety conditions 07 p1294 A70-19349
- PLATINUM**
- Anions adsorption at platinum determined by ellipsometry, finding perchlorate and fluoride ions adsorption below detection limit 03 p0441 A70-14043
- Semitransparent Pt film reflectance in vacuum UV evaporated on glass, quartz, Al, Au and Cr on glass compared with opaque films 04 p0731 A70-15023
- Thermoelectric characteristics of graphite and titanium carbide compared with platinum after prolonged annealing at 2300 C 07 p1316 A70-19661
- Oxygen electrode ring and disk currents analysis, studying oxygen reduction on platinum via peroxy intermediates 10 p1829 A70-24453
- Pt resistance thermometers for low temperature measurements, discussing structural and mechanical characteristics 19 p3432 A70-38704
- Heat transfer measurement from Pt wire to carbon dioxide near critical pressure, discussing film boiling and free convection flows 21 p3953 A70-42167
- Hydrostatic and anisotropic piezoresistance in organometallic crystals, noting iridium and platinum complexes with maximum metal-metal interaction 22 p4086 A70-43021
- Various Frank loops in quenched and annealed Pt, examining dislocations with field ion microscopy and computer simulated approximations 23 p4230 A70-44758
- PLATINUM ALLOYS**
- Ultrahigh vacuum metal bonding by twist compression technique, reporting adhesion and friction coefficients for atomically ordered Pt-Co alloy 21 p3833 A70-41465
- PLENUM CHAMBERS**
- Nonlinear heaving motion of plenum-chamber air cushion vehicles induced by sinusoidal ground irregularity 22 p3961 A70-42280
- PLETHYSMOGRAPHY**
- Physiological signals of cardiovascular system transducing methods applied to vector ECG, heart sounds, peripheral pulse waves, chest microphone and pletismography 02 p0243 A70-12095
- Pletismographic investigation of myogenic load influencing sportsmen central nervous systems state, tabulating short and long distance running results 03 p0420 A70-13403
- Forced hyperventilation effect in human subject based on indices regarding changes in respiration rhythm, EEG and finger pletismogram 15 p2679 A70-31607
- Binocular fundus refectometry and pletismography in rabbits and man after dye injection and in patients with carotid occlusion 24 p4310 A70-46345
- PLEURAE**
- Pleural space of dogs investigated by spheres injection of varying density and diameter, discussing sedimentation velocities 03 p0429 A70-14160

- Position dependent variations in intrapericardial, pleural and esophageal pressures and cardiac output in thorax of dogs 13 p2356 A70-29946
- Topography of pleural surface pressure and vertical gradient of transpulmonary pressure above resting volume in relaxed animals as function of alveolar pressure 21 p3766 A70-42154
- PLEXIGLASS [TRADEMARK]**
- U POLYMETHYL METHACRYLATE
- PLIES**
- U LAYERS
- PLOTTERS**
- NT X-Y PLOTTERS
- Photogrammetric three dimensional control extension investigated by plotter and method of Independent Model Aerotriangulation 10 p1890 A70-24731
- Selenology by traverse method, discussing equipment and mapping procedure 11 p2111 A70-26043
- Plotter induced reconstruction errors minimization in computer generated binary Fourier transform holograms 15 p2737 A70-32044
- Computer generated holograms production, reducing memory size and plotter resolution 20 p3627 A70-39098
- PLOTTING**
- Radar primary plot extraction, suggesting signals summing technique in delay line 02 p0256 A70-11975
- Aircraft wing ribs tangents plotting procedure using Monge diagram 08 p1507 A70-21197
- Soviet book on aerial photo plotting of aerogeophysical routes and anomalies covering techniques, equipment, low altitude surveys, etc 19 p3410 A70-37408
- PLOTTING INSTRUMENTS**
- U PLOTTERS
- PLUG NOZZLES**
- Auxiliary inlet ejector and plug nozzle flight performance, describing design variation effects for high supersonic speeds 16 p2841 A70-33563
- [AIAA PAPER 70-701]
- Rocket attitude stabilization using exhaust gas flow spinning plug nozzle as gyroscopic mass 20 p3715 A70-39562
- [AIAA PAPER 70-67]
- Thrust deflector for VTOL aircraft fuselage mounted lift engines designed as isentropic plug nozzle, considering mass flow, pressure forces and Coanda effect 20 p3563 A70-40379
- [SAWE PAPER 841]
- PLUGS**
- Broadband RF filter/attenuator plug to replace plastic type plugs for protecting wire bridge electroexplosive devices against RF energy 03 p0495 A70-14130
- PLUM BROOK REACTOR**
- Precision machining and repair of radioactive Plum Brook Reactor core fuel grid 01 p0140 A70-10322
- Forced cooling water flow temporary loss accident at Plum Brook Reactor, discussing inspection and corrective action 01 p0140 A70-10323
- Optimum fuel utilization for Plum Brook Reactor, using criticality data for effects of neutron leakage and burnup uniformity in core point model 20 p3671 A70-39110
- PLUMBANE**
- U LEAD COMPOUNDS
- U METAL HYDRIDES
- PLUMES**
- NT ROCKET EXHAUST
- Plume-induced flow separation effect on thermal environment using Saturn 5 film and instrument data, attributing heating rate increase to recirculated exhaust gases 04 p0761 A70-14815
- [ASME PAPER 69-WA/HT-18]
- Plume-induced X band radar attenuation, AM and PM noise measured in aluminumized solid propellant motor firings 04 p0736 A70-15409
- Predicted and measured low density plume impingement effects on loads and heat transfer compared on orbiting Saturn 5 with oxygen-hydrogen burner engine 04 p0737 A70-15430
- Wind tunnel tests for engine jet plume effect on boatall pressure drag 06 p1038 A70-18050
- [AIAA PAPER 70-132]
- Exhaust plume from underexpanded sonic and supersonic nozzles including boundary mixing analyzed by approximate model to predict Mach disk location 06 p0972 A70-18135
- [AIAA PAPER 70-229]
- Mach disk in underexpanded exhaust plume predicted by dividing flow field into subregions 06 p0974 A70-18176
- [AIAA PAPER 70-231]
- Particle density of jet plumes exhausting in vacuum calculated for He, Ar and N 06 p1052 A70-18388

- Vertical plume velocity and temperature measurements by hot wire probe on turbulent free convection zones over model fires 07 p1282 A70-19582
- Contaminants formation during pulse mode operation of liquid bipropellant attitude control rocket engine, discussing exhaust plume effects 07 p1394 A70-19708
- [AIAA PAPER 69-574]
- Rocket plume effects impulsive ground test technique under simulated high altitude pressure conditions, discussing hardware simplifications 10 p1951 A70-24906
- [AIAA PAPER 70-399]
- Laminar natural convection plumes behavior above energy sources calculated by simplest variables, indicating optimum formulation of boundary value problem 12 p2332 A70-27700
- Carbon dioxide jet plumes condensation on model nozzle in vacuum chamber, noting particle size and growth rate 13 p2523 A70-29983
- Isolated convective plumes immersed in return flow turbulent downdraft 15 p2769 A70-31440
- Optical system measurement of density and rotational temperature in gaseous plume simulating auxiliary propulsion and oxygen hydrogen burner of S-4B 16 p2913 A70-34023
- Two phase plume at various incidence angles on flat plate, determining impinging particle mass flux, forces and damage 23 p4134 A70-44566
- PLUTO [PLANET]**
- Neptune and Pluto oblateness inferred from analogous similarities of mass, diameter and mean density with Uranus and Mars planets 09 p1750 A70-22096
- Pluto space probe using swingby technique with Jupiter, Saturn and Uranus gravitation fields for acceleration 21 p3886 A70-41073
- Pluto mass from Saturn, Uranus and Neptune masses 23 p4243 A70-44295
- Pluto albedo at various wavelengths from spectrophotometric measurements 24 p4399 A70-45129
- PLUTONIUM**
- NT PLUTONIUM ISOTOPES
- PLUTONIUM ISOTOPES
- Pu/U ratio in St. Severin meteorite at time of Xe retention beginning 13 p2488 A70-28723
- PLUVIOGRAPHS**
- U RECORDING INSTRUMENTS
- PNEUMATIC CIRCUITS**
- Pneumatic fluidic oscillator consisting of bistable multivibrator, analyzing feedback loop operation based on electropneumatic analog system 02 p0229 A70-12673
- Iterative solution to transmission lines termination problems 04 p0627 A70-14861
- [ASME PAPER 69-APM-M]
- Fluid flow at pneumatic network junction, considering junction pressure determination as boundary condition for all transmission lines meeting at junction 04 p0627 A70-14862
- [ASME PAPER 69-APM-N]
- Admittance calibration of short HF through flow pneumatic lines, using hot-wire anemometer 16 p2891 A70-33628
- [ASME PAPER 70-FE-10]
- PNEUMATIC CONTROL**
- Average pressure at downstream end of pipe discharging into reservoir with upstream end under pulsed flow, considering application to pneumatic control system 02 p0279 A70-12110
- Positive displacement low pressure air motors for Boeing 747 fan thrust reverser pneumatic actuators and controls 03 p0550 A70-12881
- Pneumatic line losses due to friction in pneumatic control systems 04 p0628 A70-15399
- Proportional controlled pneumatic servomechanisms analysis extended to include motion along stroke, considering position effect on stability 05 p0797 A70-15891
- Electropneumatic actuation systems for rocket engines in extreme environment applications involving high nuclear radiation levels and high and cryogenic temperatures 14 p2535 A70-31343
- Fluid thermal actuator for temperature control of ITOS /Improved Tiros Operational System/ meteorological satellite, discussing design and performance 16 p2846 A70-34129
- Flow control valve without moving parts used in ATS A and D, describing design, operation and theoretical performance 16 p2846 A70-34132
- Soviet book on fluidic theory covering jet elements, pneumatic throttles, chambers, communication channels, etc 19 p3357 A70-37469

Hydraulic and pneumatic controls construction and use in machine tools
19 p3359 A70-38725

Pneumatic actuator control system improvement, using invariance theory to compensate load variability and dynamic response of medium
20 p3564 A70-39848

Cryogenic fluid heat exchanger flow oscillation automatic feedback control, discussing design and simulation
23 p4280 A70-44370

Fluidically controlled aircraft fuel transfer system three-tank model construction, noting maintenance and fail safe operation
[SAE PAPER 700786]
24 p4294 A70-45858

PNEUMATIC EQUIPMENT
NT GAS VALVES
NT PNEUMATIC CIRCUITS
Pneumatic line losses due to friction in pneumatic control systems
04 p0628 A70-15399

Dynamic mathematical model of proportional electromagnetic transducer in pneumatic servomechanisms derived by Lagrange-Maxwell method assuming circuit linearity
07 p1195 A70-18750

Soviet book on pneumatic actuators theory and design, using digital computers to solve dynamic equations and to obtain diagrams and nomograms
08 p1440 A70-20752

Fluidic curved-wall electropneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters
09 p1614 A70-23691

Thermodynamic properties of periodically variable air volume in pneumatic pressure generator of pressure sensor calibration bench
10 p1863 A70-24027

Unmanned spacecraft landing shock absorption by hybrid pneumatic configuration having hard surfaced footpad with dual pneumatic bag attenuator
12 p2312 A70-27115

Fatigue life and long term strength of polycarbonate components in pneumatic pulsating pressure equipment described by power and exponential equations
13 p2440 A70-29784

Pneumatic suspension systems for air cushion skirts
16 p2841 A70-33759

Fluid thermal actuator for temperature control of ITOS /Improved Tيروس Operational System/ meteorological satellite, discussing design and performance
16 p2846 A70-34129

Working medium excess and absolute pressure effects on pneumatic elements characteristics
22 p3967 A70-43566

Fluidic logic devices compared with electric relay and hydraulic/pneumatic valve equivalents
24 p4293 A70-45429

Hydraulic and pneumatic components for logic circuits of automatic controls, considering amplifiers, interlocked systems and use of fluidics
24 p4293 A70-45618

Pneumatic actuator rod and piston head seals, examining materials at various temperatures, pressures and speeds
[SAE PAPER 700791]
24 p4294 A70-45855

Hydraulic and pneumatic dampers operation, analyzing force components
24 p4427 A70-46380

PNEUMATIC PROBES
Rotodynamic pumps energetic characteristics determination by pneumatic tests, describing air test results for various models
12 p2165 A70-27399

PNEUMATIC RESET
U PNEUMATIC CONTROL

PNEUMATICS
Pneumatic instability, capacity and rigidity of thrust and journal gas bearings with external air injection
18 p3264 A70-37072

PNEUMOGRAPHY
U PNEUMOGRAPHY
Radiorheopneumographic study of external respiration of office workers during mental and physical activity
07 p1204 A70-19142

Human lung closing and subdivision volume relationship to age and body position
12 p2169 A70-27657

Diaphragmatic muscle reactions and pneumogram changes in rats immediately after air passage obstruction
19 p3360 A70-37804

PNEUMOTHORAX
Aeroatelectasis and pneumothorax in fighter pilot postflight chest pains, noting decompression role
17 p3041 A70-35920

POCKELS EFFECT
U BIREFRINGENCE

PODS [EXTERNAL STORES]
Thrust follower force stability in pod mounted jet engine and nacelle whirl using multiple degrees of freedom model
10 p1930 A70-25070

POIKILOTHERMIA
NT FROGS
NT TURTLES

POINCARÉ PROBLEM
Poincaré invariance compatibility with general relativity, discussing Brandt groupoid, decomposition and local groups
06 p1106 A70-17540

Bounds in magnetofluidynamics for angular velocity of rotating fluid mass in relative equilibrium noting generalization of Poincaré theorem
13 p2463 A70-29153

POINCARÉ SPHERES
Poincaré sphere application to automatic polarization forms measurements and two/three dimensional photoelasticity by scattered light
11 p2142 A70-26633

Ellipsometry with Poincaré sphere representation, describing application to automatic two and three dimensional photoelasticity by scattered light
17 p3086 A70-35014

Interference-polarization light filter, calculating phase shifter errors effects on transmittance by Poincaré sphere method
22 p4072 A70-42505

POINT DEFECTS
NT FRENKEL DEFECTS
NT VACANCIES [CRYSTAL DEFECTS]
Stress intensity and strain energy release rate in elastic fiber-reinforced composites with different thermomechanical properties and imperfect bonding
[ASME PAPER 69-WA/APM-15]
04 p0771 A70-14913

Imperfect solid deformation, presenting formalism for elastic theory nonlinear aspects of continuous distributions of dislocations and point defects
17 p3190 A70-35456

POINT IMPACT
Small reentry vehicles roll motions and impact point dispersion due to spin reversal
15 p2813 A70-32522

Point mass impact on flexibly interconnected rigid bodies with tree structure and spherical joints without dry friction, discussing resulting velocity changes
21 p3849 A70-40552

POINT MATCHING METHOD [MATHEMATICS]
U BOUNDARY VALUE PROBLEMS

POINT SOURCES
Emission from broadband impulsive point source refracted by spherical interface between fluids with different acoustic velocities, showing emitted and inverse waveform disturbances
01 p0046 A70-11190

Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas
01 p0172 A70-11489

Ionospheric irregularities-diffraction patterns relative drifts, verifying point source effect for radio waves reflected from E and sporadic E layers
07 p1236 A70-20162

Strong point explosion in atmosphere with density dependent on height, obtaining numerical solutions for exact gas dynamic equations
09 p1658 A70-22112

Transient heat conduction of thin circular disk with uninsulated surfaces rotating past stationary point source by finite element method
09 p1787 A70-22269

Point source intensity fluctuations dependence on penetration depth of wave propagating in statistically homogeneous and isotropic media
09 p1636 A70-23133

Diffuse light transmission from point sources over horizontal paths in lower atmosphere, discussing effect of range
10 p1912 A70-24424

Shock propagation from point explosion energy source into cold exponential atmosphere with radiative heat transfer in rear of shock front
10 p1869 A70-24525

Multiwavelength laser beam propagation with point source transmitters, determining turbulence levels independently
13 p2426 A70-28837

Einstein-Maxwell equations for monopolar point electrical charge, calculating proper energy for electromagnetic and gravitational fields
13 p2451 A70-28956

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body
13 p2517 A70-29763

Point heat source generation of thermal stresses in elliptical plate with circular hole, using functions of complex variable for stress field determination
15 p2818 A70-32182

POINTING CONTROL SYSTEMS
Hydromagnetic viscous flow of incompressible conducting fluid due to electric current radial divergence from point source
15 p2780 A70-32426

Holography without reference waves, describing image characteristics of spherical waves from point source
15 p2743 A70-32893

Direction finder for point source signals, discussing mathematical model for random noise in space, S/N performance and equipment design
17 p3042 A70-34586

Acoustical holography with single stationary point detector noting reciprocity between detector and point source illuminator
17 p3088 A70-35030

Integral equation for three dimensional Fourier transform applied to isotropic scattering of radiation from point source in finite spheroidal atmosphere
17 p3137 A70-35599

High energy cosmic gamma radiation detection from point source in Sagittarius, using balloon mounted spark chamber with Cerenkov telescope
19 p3500 A70-38078

Radio beam trajectory in Fresnel zones of isotropic laminarily inhomogeneous ionosphere, discussing point source field and wave propagation
19 p3381 A70-38569

Point source electric field over different sections of impedance piecewise inhomogeneous surface, calculating attenuation function near boundaries
19 p3381 A70-38570

Teleradiometer calibration in background radiation absence, using distant and finite point source method and collimator means
20 p3633 A70-39798

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body
20 p3732 A70-40101

Microwave scintillations at sunrise indicating solar point sources at sunspot cycle peak and terrain configuration influence on ionospheric disturbances
20 p3591 A70-40493

Cygnus X-2 point X ray source, establishing as spectroscopic binary with peculiarities
21 p3875 A70-40682

Spherical shock from point explosion in medium with varying density, obtaining exact similarity solution for propagation
21 p3808 A70-41448

Tracking of point object in Fresnel zone from observation of amplitude-phase pattern in aperture plane
22 p4026 A70-42555

Photon flow delay regarding fluctuating source field in two points, applying correlation statistics by Pearson method of moments
22 p3988 A70-42564

Acoustic field scattering from multipole point sources by solid spherical surface
22 p4010 A70-42693

Radiation shielding calculations, discussing Monte Carlo concepts for point fluxes with random sampling of source distributions
23 p4217 A70-43810

Meteor trails isotropic diffusion in presence of moving point source of ionization with variable intensity, calculating plasma density on and near trajectory
23 p4240 A70-44084

Fourier hologram synthesis using laser point source and Wollaston birefringent prism
24 p4336 A70-45667

POINT TO POINT COMMUNICATIONS
Operational requirements of shipping for satellite communication systems, discussing distress cases, satellite navigation systems, information distribution traffic control, etc
03 p0522 A70-13605

Sirio satellite SHF transponder for experiments in atmospheric propagation and communication between ground stations
15 p2709 A70-32285

Point to point and radar return attenuation measurements at SHF through clear air and rain
16 p2858 A70-32928

POINTERS
U DIALS

POINTING CONTROL SYSTEMS
Attitude sensing and target pointing instrumentation in earth orbiting stellar telescopes in inertial space
16 p2905 A70-33155

Precision gimbaled sensor pointing system calibration data errors due to misalignments and inaccuracies in transducer readout
22 p4040 A70-43587

Pointing systems for balloon-borne telescopes in astronomical investigations
22 p4041 A70-43649

High performance reaction pointing control systems for sounding rockets, using proportional control of differential thrust and adaptive control of thrust magnitude
[SAE PAPER 700783]
24 p4415 A70-45861

POINTS

Close spaced material points motion stability in gravitational field of attractive center using Liapunov theorem, assuming nongravitational forces action on points

03 p0524 A70-13369

POINTS [MATHEMATICS]

NT INFLECTION POINTS

Optimal control problems concerning vector determination and trajectory of point motion toward target in n-dimensional phase space

01 p0053 A70-11028

Monograph on stochastic theory and cascade processes, discussing branching phenomena, point processes, electromagnetic cascades, extensive air showers, polarization, population growth, etc

01 p0134 A70-11327

Nonlinear differential equations analysis based on weighted linear approximation applied to singular points and trajectories in phase plane in friction problems

09 p1727 A70-22665

Geographic coordinates of intersection points determined directly on sphere, noting reduction on ellipsoid and adjustment for surplus intersections

09 p1670 A70-23441

Ill conditioned linear two point boundary value problems solved by Riccati transformation avoiding forward integration

10 p1909 A70-24059

Adjointness in nonadjoint boundary value problems, extending Neuberger symmetry study to obtain expansion theorem for nonself adjoint p-point problems

10 p1910 A70-24606

Rotating spherical galaxy evolution, using equations of motion for mass points representing mass distribution

13 p2492 A70-29385

Nonlinear differential equations solutions in power series with indefinite coefficients, determining type of singular points

20 p3658 A70-39766

Singular points in elasticity theory solved by correct boundary value problem and homogeneous solutions theorem

20 p3728 A70-39894

Equations of motion of mass points connected by inertialess elastic couplings

21 p3933 A70-40615

Interpolation and smooth curve fitting based on local procedures and piecewise function

24 p4369 A70-45162

POISEUILLE FLOW

U LAMINAR FLOW

POISONING [REACTION INHIBITION]

Low temperature fuel cell materials impurity effects on catalyst poisoning, stressing sulfur elimination from rubber molding

10 p1832 A70-25043

POISONING [TOXICOLOGY]

U TOXIC DISEASES

POISONS

NT PHOSGENE

NT URETHANES

POISSON DENSITY FUNCTIONS

Optical position estimation model based on defining photon density profile center of gravity in noise, using photon Poisson process theory

04 p0652 A70-15337

Perseids time distribution, based on observations during meteor showers, contradicting appearance of homogeneous Poisson process

09 p1750 A70-22099

One dimensional Poisson production process under costly surveillance, considering maximum attainable income rate approximation

09 p1653 A70-22347

Markov renewal processes sums convergence to multidimensional Poisson process, discussing convergence conditions

12 p2260 A70-26884

Poisson shot noise process relationship with continuous stochastic intensity as sample function

12 p2203 A70-27418

Skeletal muscle force generation stochastic model based on motor unit, discussing Poisson distribution and dynamic force response

21 p3769 A70-41199

Threshold distribution of time intervals between atmospheric contradicting Poisson law

23 p4190 A70-44082

POISSON EQUATION

Summary representation formulas for solving boundary value problems for Helmholtz and Poisson equations in rectangle

03 p0518 A70-13076

Programming system for Poisson series manipulation on computer, writing subroutines in machine language

05 p0817 A70-16342

Boundary conditions and iterative procedures for plasma sheath problems, using matrix equation to represent differenced Poisson equation

06 p1123 A70-18295

Mathematical model for finite-density non-homogeneous Newtonian cosmologies, approximating solutions using coupled Vlasov-Poisson equations

08 p1581 A70-21740

Inductive flow measurement history, considering Maxwell, material and Poisson equations

15 p2735 A70-31823

Boundary value problem of two dimensional Poisson equation solution procedure with Hockney formulas, applying to unsteady viscous incompressible flow past flat plate

16 p2943 A70-33737

Dynamic systems stability in sense of Poisson, relating motions commutative and stable families

19 p3472 A70-38936

Rayleigh wave scalar electric potential analysis on piezoelectric medium, using iterative techniques for Poisson equation

22 p4074 A70-42967

Poisson kinematic equations solution of symmetric gyrost in viscous medium for free rotor and constant angular speed, using perturbation technique

23 p4220 A70-44560

One dimensional collisionless electron-proton plasma, obtaining exact electrostatic shock solution to Vlasov and Poisson equations

24 p4382 A70-45107

POISSON PROCESS

U POISSON DENSITY FUNCTIONS

U STOCHASTIC PROCESSES

POISSON RATIO

Stresses in plane elastic bodies analyzed by generalizing biharmonic stress function equation in polar coordinates, assuming constant Poisson ratio and nonhomogeneity

01 p0206 A70-11152

Mixed boundary value problem for viscoelastic body with constant Poisson ratio solved by variables separation method, proving convergence

02 p0390 A70-12802

Photoelasticity extension to plane elastic problems with stress state depending on Poisson ratio, discussing multiple connected body with nonzero surface tractions on internal boundaries

[SESA PAPER 1570] 03 p0583 A70-12884

Poisson ratio of elastomers determination for defining compliant surface fluid film thrust bearings behavior, considering method and error analysis

[ASME PAPER 69-WA/LUB-7] 04 p0712 A70-14751

Displacements and stresses obtained for elastic half plane with variable Poisson ratio under certain traction boundary conditions, using Fourier transform method

05 p0940 A70-16512

Fiberglass reinforced plastics creep behavior under axial compression, studying time dependence of elasticity modulus and Poisson coefficient

08 p1526 A70-21174

Total Poisson ratio derivation from stress-strain relationship with known variations of elastic and plastic Poisson ratios for particular strain-hardening case

10 p1956 A70-24096

Hollow homogeneous polymer cylinder thermoelastic stressed state, analyzing radial temperature and Poisson Coefficient variations

12 p2325 A70-27532

Computer program for two body problem literal series expansions using Kepler functions with Bessel and Poisson series operation

14 p2638 A70-30702

Plastic materials Poisson ratio and Young modulus measurements by triaxial compression method

17 p3089 A70-35048

Poisson ratio of elastomers determination for defining compliant surface fluid film thrust bearings behavior, considering method and error analysis

[ASME PAPER 69-WA/LUB-7] 19 p3434 A70-37602

POLAND

Photographic plate reduction method at Polish Academy of Sciences based on sufficient reference stars, correcting x and y coordinates

11 p2007 A70-26194

Report to COSPAR on space exploration research in Poland including satellite tracking, geodesy, meteorology and aerospace medicine

15 p2830 A70-31721

POLAR AURORAS

U AURORAS

POLAR CAP ABSORPTION

Sudden cosmic noise absorption /SCNA/ in polar cap during 7 July 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary

01 p0172 A70-11527

Time lag of commencement of PCA effect behind occurrence of Y-shaped phase of solar flares, tabulating data for several flares and particle effects

02 p0358 A70-12373

Microwave spectra of type 4 bursts at cm and dm waves compared to related PCA

02 p0359 A70-12774

Polar cap absorption midday recovery phenomenon analysis in northern and southern polar auroral regions showing increase in ionizing flux rigidity

04 p0682 A70-15729

High sensitivity particle spectrometer for onboard OV-1-18 satellite measurements of precipitating protons, electrons and alpha particles during PCA events

12 p2232 A70-27402

Polar cap absorption midday recovery phenomenon analysis in northern and southern polar auroral regions showing increase in ionizing flux rigidity

14 p2575 A70-30813

Ion effects on VLF propagation in earth-ionosphere waveguide during polar cap absorption events

16 p2859 A70-32933

Cosmic ray variations during PCA absorption, relating Forbush decreases to lower ionosphere ionization intensity increase

18 p3306 A70-36096

Polar cap absorption correlation with solar protons flux into magnetosphere, discussing diurnal and spatial variations and magnetic storm effects

19 p3411 A70-37492

Electron density measurements by rocket observation during PCA after solar flare of 25 February 1969, deriving effective loss rates in terms of recombination model

19 p3496 A70-37511

Earth surface pressure changes related to PCA of high energy protons

20 p3695 A70-39187

VLF signal phase and amplitude changes associated with PCA events and South Atlantic Geomagnetic Anomaly

22 p4023 A70-43292

VLF phase disturbances, HF absorption and solar protons in 1967 PCA events, using ionization model

24 p4314 A70-46128

POLAR CAPS

IR spectrometer on Mariner 7 Mars flyby recording sharp absorption near 3 microns at Martian southern polar cap

01 p0182 A70-10823

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

03 p0565 A70-13232

Ground observations synoptic distribution importance in studying magnetosphere, emphasizing polar caps

03 p0475 A70-13849

Jupiter observations /1966-1967/, discussing variations in size and position of polar caps and tropical belts

03 p0574 A70-13887

Martian polar cap spectra interpreted with laboratory measurements of water-carbon dioxide frost spectral reflectance

07 p1388 A70-19946

Polar cap magnetic field micropulsations simultaneous recordings at Greenland, Alaska, and Finland, noting seasonal variations

07 p1270 A70-20152

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

08 p1580 A70-21665

Magnetic spikes in polar cap region due to poleward shift of narrow westward electric current filament

08 p1491 A70-21716

Solar protons and electrons spatial and angular distributions over polar caps by USAF-OAR satellites 1966-70A, 1967-72D and 1968-59A

13 p2482 A70-30073

Auroral and polar cap ionospheric electric fields and tensor conductivity elements using ion clouds data of Ba release experiment

13 p2402 A70-30080

Polar cap elementary magnetic disturbance relationship to auroral electrojet

14 p2570 A70-30215

Solar proton structure across polar cap and anomalous latitude cut-off explained by local pitch angle variations

15 p2792 A70-31672

Polar cap disturbance of 7 June 1969 due to small proton enhancement, describing detection by transpolar VLF phase measurement

15 p2794 A70-32295

Martian soil thermal conditions at south pole, considering polar cap annual variations and carbon dioxide sublimation

15 p2802 A70-32492

Mars visual observations with colored glass filters during opposition, noting southern polar cap shape irregularity and Martian atmospheric transmittance

16 p2974 A70-33658

Solar particle observations over polar caps, considering spatial and angular distribution measurements

19 p3494 A70-37484

Solar protons distributions in 1-30 MeV range over northern polar cap during 25 February 1969 solar event by ESRO 1 satellite

19 p3496 A70-37508

Interplanetary magnetic field directional variation effect on polar caps geomagnetic field, discussing polarity reversals 22 p4022 A70-43285

Polar cap ionization processes in F region, discussing effects of particle precipitation, solar radiation, electromagnetic field drifts, atmospheric winds and magnetospheric tail distortion 22 p4024 A70-43309

Martian soil thermal conditions, considering polar cap annual variations and carbon dioxide sublimation 23 p4240 A70-43914

Polar cap elementary magnetic disturbance relationship to auroral electrojet 24 p4331 A70-46290

POLAR COORDINATES

Tangent plane method and polar coordinates for lifting surfaces, calculating normal velocity at field point on surface carrying doublet distribution for incompressible flow [AIAA PAPER 70-78] 06 p0975 A70-18195

Elasticity theory two dimensional problem solution for circular segment in polar coordinates, applying Lure symbolic notation and Prokopov minimum potential energy principle 09 p1782 A70-23291

Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method 11 p1996 A70-25347

Biased measurement of angular coordinates of phase modulated signals under meter input quantization 11 p2012 A70-26806

Solar wind structure as function of corotating coronal inhomogeneities determined using perturbation equations for spherical polar coordinate system 12 p2292 A70-27179

Superposed converter magnetic field intensity normal component distribution as function of polar coordinate 13 p2348 A70-28659

Orbit calculation based on first integrals of two body problem in spherical coordinates 15 p2797 A70-31620

Statistical test of Melchior laws governing Chandlerian motion of earth pole based on polar coordinates 15 p2732 A70-32497

Earth to planet radar signal time delay in general relativity expressed in relativistic spherical polar coordinates of earth and planet 15 p2806 A70-32801

Meteor trails angular coordinates, using phase difference in pairs of spaced antennas with unequal base lengths 19 p3433 A70-38789

Synoptic charts of polar magnetic fields plotted in polar coordinate system for consecutive solar rotations 20 p3711 A70-40408

Angular coordinate during multilevel quantization of radar signal reflected from scintillating body on Gaussian noise background, applying maximum probability method 20 p3589 A70-40459

Oscilloscope polar coordinate displays for multidimensional analog signals, noting human detection capability 21 p3823 A70-40853

Statistical test of Melchior laws governing Chandlerian motion of earth pole based on polar coordinates 23 p4187 A70-43918

POLAR GASES

Polar gas phase dielectric under conditions of power saturation interacting with microwave radiation field in waveguide 09 p1728 A70-22908

Self diffusion coefficient for gaseous ammonia at specific temperature range, applying polar gases theory 13 p2453 A70-29800

Approximate formula for viscosity of binary polar gas mixtures confirmed for unlike cross sections 16 p2996 A70-33055

Polar gas rotational relaxation time calculation, comparing volume viscosity and energy equation definitions 19 p3473 A70-38266

POLAR IONOSPHERE BEACON

U BEACON SATELLITES

POLAR METEOROLOGY

Stratospheric circulation and temperature variations periodicity, discussing midwinter warmings, polar vortex breakdown and relations to D region anomalies and solar events 01 p0072 A70-10580

POLAR ORBITS

Lyman alpha auroral emissions observations made with narrow band sky scanning photometer mounted on earth-oriented polar orbiting satellite 04 p0741 A70-15107

Navy navigation satellite passes predicted by equations for rise and set times, elevation and azimuth in plane circular polar orbit about spherical earth 04 p0764 A70-15431

Cosmic ray knee interpretation using polar orbiting ionization chambers data from OGO-2/4 15 p2793 A70-31903

Air densities from polar satellites orbit analysis 24 p4329 A70-45550

POLAR REGIONS

NT ANTARCTIC REGIONS

NT ARCTIC REGIONS

Jovian polar zones enhanced optical transparency causes, discussing thin clouds and difference in molecular optical depth between north and south poles 01 p0180 A70-10531

Ionospheric F layer in equatorial, mid and high latitude regions for various major phenomena including anomalies, neutral air winds, photoelectrons, etc 01 p0073 A70-10585

Polar magnetic disturbances during IQSY characterized by SP field superposed on Sq field generated by ionospheric dynamo 01 p0075 A70-10599

Polar thermosphere temperature measurements from artificial clouds indicating geophysical-associated variations, nocturnal decrease and annual variations 01 p0077 A70-11201

EEG investigation of cerebral biocurrents during polar night-day cycle, studying central nervous system nonspecific automatic control mechanism dependence on ecological factors 01 p0030 A70-11466

Polar geomagnetic disturbances global current systems representation by prototypes of equivalent current systems 01 p0084 A70-11557

Polar ionic exosphere electric field polarization, considering positive and negative charges escape fluxes, electric potential, mean ion velocity, etc 02 p0289 A70-12108

Winter diurnal behavior of northern high latitude ionospheric electron density using temperature data from Langmuir probes 03 p0478 A70-13993

Intermediate ionospheric layer at high latitudes, discussing relationship to geomagnetic and auroral activity and F region continuity 04 p0678 A70-14974

Plasma transport models of polar ionosphere, discussing physical processes involved and effects on electron concentration, ion composition and speeds 04 p0679 A70-15113

Polar lower ionosphere, using radar VLF step frequency sounding to determine reflection phase height at given propagation path 04 p0680 A70-15115

Band shaped polar auroras widths from photographs analysis, noting wider bands for midnight hours and winter solstice 04 p0682 A70-15732

Fragmentary arc and band-shaped polar aurora configurations associated with corpuscular rays penetration into upper atmosphere 04 p0684 A70-15749

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets 04 p0684 A70-15751

Ionospheric effect sudden commencement parameters of magnetic storm related to distance from origin in polar regions 05 p0841 A70-16737

Ionized gas height scale changes in polar ionosphere obtained assuming Chapman type ionization distribution 05 p0841 A70-16738

Correlation function of auroral reflection radio signals with allowance for polar ionospheric scattering and pulse signal transmission and reception 05 p0841 A70-16741

Polar auroral region displacement ascribed to distant magnetic field disturbances, proposing calculation method 05 p0842 A70-16745

Horizontal electric fields relations to charged particle fluxes in polar auroral ionosphere 05 p0842 A70-16756

Polar aurora rays mean length diurnal variations determined from photographic and visual observations in Tiksi bay 05 p0843 A70-16763

Magnetic storm /14 September 1966/ observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth 05 p0843 A70-16764

Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations 05 p0843 A70-16765

Three dimensional model current system with magnetospheric and ionospheric sections connected by

currents flowing along geomagnetic field lines proposed for polar magnetic substorms 06 p1059 A70-18535

Magnetospheric plasmopause-high latitude electron density trough relations using satellite topside ionograms, noting local time and magnetic disturbance effects 07 p1270 A70-20074

Polar ion-exosphere model with open geomagnetic field lines, calculating electrostatic field for region 07 p1270 A70-20077

Simultaneous riometer and ionosonde measurements at high latitude suggesting absorption events due to cosmic noise scattering by auroral sporadic E 07 p1271 A70-20165

Quasi-trapped electrons precipitating at high latitudes measured from low altitude polar orbiting satellite 08 p1562 A70-21382

Hydromagnetic emissions in high latitudes relationship to storm sudden commencements 08 p1491 A70-21715

Chapman-Vestine and Birkeland-Alfven electric current systems equivalence in ground geomagnetic effect explained for polar magnetic storms 08 p1491 A70-21719

Dual inertial navigation transpolar flight to North Pole aboard KC-135 airplane, discussing performance, installation, etc 09 p1719 A70-22189

Meteorological observations of Mars polar regions, surface activity and atmosphere with astronomical telescopes during Mariner 6 and 7 flyby 09 p1754 A70-22500

Two phase process for electron precipitation during polar substorm observed from balloon measurements of X rays produced by precipitated electrons in atmosphere 10 p1932 A70-24490

Scintillation sudden inception in Faraday rotation in Sodankyl and Oulu, noting diurnal north-south frontier movements in polar ionosphere 10 p1884 A70-25262

Polar ionosphere inhomogeneous electron concentration by analyzing satellite signal amplitude fluctuations received by spaced interferometers 11 p2042 A70-25528

Polar ionospheric current and interplanetary magnetic field directions related from mean diurnal values of solar wind velocity 11 p2044 A70-25551

Atmospheric activity centers movements dependence on latitudinal variation of deformation force horizontal component, noting earth poles motion 12 p2265 A70-28224

Monograph on polar aurora with emphasis on solar wind and interplanetary magnetic fields, discussing substorms, particle acceleration in current sheet, etc 13 p2395 A70-28983

Polar ionosphere auroral oval position detection by satellite observations of naturally occurring VLF and man-made HF plasma waves 13 p2371 A70-29924

Trapped and polar proton and electron flux observations during 9 June 1968 magnetic storm 13 p2482 A70-30072

Polar storm simultaneous onset and development, using observational data for geomagnetic field and aurorae 14 p2570 A70-30214

Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites 14 p2570 A70-30223

Venus water presence from Venera 4 and Mariner 5 data suggesting polar seas and oceans saturated with hydrochloride and carbon dioxide as plant life source 14 p2637 A70-30365

Band shaped polar aurorae widths from photographs analysis, noting wider bands for midnight hours and winter solstice 14 p2575 A70-30815

Fragmentary arc and band-shaped polar aurora configurations associated with corpuscular rays penetration into upper atmosphere 14 p2576 A70-30833

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets 14 p2576 A70-30835

Polar ionospheric electron/ion density measurements by ESRO 1 satellite, observing dependence on Kp index 15 p2724 A70-31669

Polar peak F layer electron density around magnetic noon related to dayside aurora flux, comparing with soft particle precipitation 15 p2727 A70-31872

Quiettime cosmic ray ionization altitude dependence over polar regions from measurements by integrating ionization chamber on OGO-2 15 p2793 A70-31902

- Polar substorm activity associated with magnetopause position variation, using Imp 2 satellite observations 15 p2728 A70-31911
- Rocket measurements showing removal of electrons above mesopause in summer at high latitude 17 p3081 A70-35775
- High latitude magnetosphere structure, using two dipole model 18 p3312 A70-36168
- Temporal and spatial covariation of high latitude geophysical phenomena, using unified mechanism of solar plasma stream interaction with geomagnetic field 18 p3247 A70-36404
- F layer absence and nonuniform horizontal electron concentration of nighttime ionosphere at high latitudes, using Alouette 1 sounding 19 p3408 A70-37308
- High latitudes magnetospheric electric field structure, using electrostatic probes and artificial clouds 19 p3410 A70-37489
- Polar electrojet and VHF auroral radio wave backscattering correlation, discussing geomagnetic disturbances effect 19 p3376 A70-37498
- Trapped and precipitated electron observations at northern high latitudes in 45-450 keV range, using ESRO-1 satellite 19 p3496 A70-37515
- Geomagnetic field pulsations prior to polar magnetic disturbance onset, discussing solar wind role 19 p3416 A70-38588
- Polar stratospheric winter explosive warmings correlated with solar high energy charged particles injections 20 p3618 A70-39185
- Darkness adaptation of flight personnel in polar regions, discussing effects of physical and nervous strain, sickness and alcoholic intoxication 20 p3576 A70-40290
- Synoptic charts of polar magnetic fields plotted in polar coordinate system for consecutive solar rotations 20 p3711 A70-40408
- High latitude F region irregularity structure during magnetic storm from multistation scintillation observations of ATS 3 transmission 20 p3624 A70-40490
- Sporadic E layer ionization correlated with geomagnetic disturbances in northern auroral and polar regions 21 p3812 A70-40592
- Polar ionosphere inhomogeneous electron concentration by analyzing satellite signal amplitude fluctuations received by spaced interferometers 21 p3819 A70-41278
- Polar ionospheric current and interplanetary magnetic field directions related from mean diurnal values of solar wind velocity 21 p3819 A70-41301
- Synchronous satellites VHF signal fading attributed to high latitude scintillations, noting intensity at night and during magnetic storms 21 p3790 A70-41362
- Magnetotail magnetic field perturbations associated with polar magnetic substorms, using IMP-A and B satellite observations 21 p3882 A70-41720
- NO molecule gamma system in emission spectra of polar auroras in far UV by monochromator aboard Skylark rocket 21 p3821 A70-42261
- Ionospheric radio wave absorption above polar aurorae during solar activity minimum, discussing diurnal and annual behavior 23 p4162 A70-44058
- Polar ionosphere ion composition measurement by meteorological rocket-borne RF mass spectrometer 23 p4190 A70-44081
- High latitude geomagnetic secular variations determination by running 12-month means method, recommending data acquisition free of external sources effect 23 p4190 A70-44087
- FSRO satellites missions and payloads, emphasizing studies of earth magnetic and electric field environment and of polar region particle measurements 23 p4191 A70-44663
- Polar storm simultaneous onset and development, using observational data for geomagnetic field and aurorae 24 p4331 A70-46289
- Subpolar ionosphere electron concentration measurements for both hemispheres during solar activity by Faraday effect signal recordings from satellites 24 p4331 A70-46298
- POLARIMETERS**
- Electronic polarimeter using signal sampling technique and feedback to measure periodic retardation changes 02 p0297 A70-11918
- Polarimeter for atmospheric radiation with three optical channels enabling precision measurement of polarization 04 p0695 A70-15573
- Hertzian differential polarimeter-ellipsometer with single detector designed for multiwave oscillations analysis 10 p1888 A70-24477
- Solar magnetograph modified to simplify calibration, using polarimeter with special exit slit geometry 11 p2057 A70-26650
- Spectropolarimeter for measurements of polarization characteristics of atmospheric radiation in nanometer range 14 p2583 A70-30414
- Photographic polarimeter based on Savart and lambda/4 plates combination for linear polarization measurements of coronal and prominence emission lines during solar eclipse 20 p3627 A70-39092
- Battery operated electronic servo governed photoelectric polarimeter for airborne measurements of skylight polarization, discussing design and operation principles 23 p4199 A70-45006
- POLARIMETRY**
- Atmospheric pressure, optical thickness and Young particle size distribution of Mars atmosphere determined from polarization observations 07 p1385 A70-19421
- Integrated lunar disk wavelength dependence of polarization using photoelectric polarimeter, tabulating results 09 p1759 A70-22910
- Martian soil surface anomalies observed from polarimetric analysis of light diffused by Hellas region 10 p1943 A70-24708
- Magnetically sensitive Fe lines usefulness to solar polarimetry, observing absorption coefficient dependence on temperature variations 12 p2303 A70-27706
- Bragg reflecting crystals for spectroscopy and polarimetry in X ray astronomy 13 p2489 A70-28904
- Jupiter microwave spectrum from polarimetric observations and previous data 14 p2648 A70-31088
- Photoelectric and polarimetric observations of comet 1968 c Honda in BV system, noting dust scattering role in emission 19 p3515 A70-37657
- Triple polarizational astrophot observations of comet 1968 c Honda, noting dust component- Wolf number agreement 19 p3515 A70-37658
- Photoelectric polarimetry of dark unipolar type H sunspot in terms of value and direction of magnetic field vector 20 p3712 A70-40413
- POLARISCOPES**
- Warped wave front viewpoint in analyzing object plane resolution, contrast and location in polariscopes 07 p1280 A70-19236
- Stress analysis using transmitted light polariscope and Mach-Zehnder interferometer for frozen-stress slice 12 p2325 A70-27620
- Hologram interferometry with birefringent objects, showing advantages over polariscope and classical interferometers 17 p3086 A70-35013
- Isoclinic parameter determination from intersection points of secondary isochromatics lines in photoelastic analysis, discussing polariscope theory and imperfect quarter wave plates error effect 23 p4198 A70-44910
- POLARITY**
- Penumbra forms and magnetic polarity distribution relationship in sunspot groups 01 p0184 A70-10955
- Atmospheric space charge magnitude and polarity below 50 km based on rocket probes 04 p0675 A70-14437
- Atmospheric space charge magnitude and polarity below 50 km based on rocket probes 13 p2392 A70-28462
- Statistical heliographic latitude dependence of dominant polarity of interplanetary magnetic field, using photospheric synoptic chart 13 p2492 A70-29195
- Earth dipole field disk dynamo model, studying connection between polarity intervals and precession effects 14 p2638 A70-30619
- Geomagnetic activity dependence on angle between earth-sun and hourly averaged vectors of interplanetary magnetic field 24 p4405 A70-45523
- POLARIZATION**
- Second quantization exciton theory in amorphous disordered materials, discussing hamiltonian, boson annihilation operators and electronic polarization 14 p2627 A70-30693
- POLARIZATION [CHARGE SEPARATION]**
- NT ELECTROLYTIC POLARIZATION**
- Polar ionic exosphere electric field polarization, considering positive and negative charges escape fluxes, electric potential, mean ion velocity, etc 02 p0289 A70-12108
- Diffusive transport term in hydrodynamic equations describing flow over strongly ablating entry objects, discussing charge separation and pressure diffusion 03 p0405 A70-12926
- Slow electrons elastic scattering by diatomic hydrogen molecule, analyzing cross sections in two center prolate spheroidal coordinates emphasizing polarization effect 03 p0528 A70-14179
- Charge separation effects in boundary layer between cold streaming plasma and perpendicular magnetic field with relativistic electrons 04 p0727 A70-14997
- Potential distribution outside ideally reflecting charged sphere immersed in resting plasma described by nonlinear integral equation, allowing for polarization 08 p1432 A70-21090
- Electrode structural parameters effect on polarization characteristics of air-hydrogen cells to obtain optimum performance, reliability and service life 10 p1831 A70-24471
- Sideband instability and trapped particle charge density response of large periodic Bernstein-Greene-Kruskal waves in collisionless plasma 14 p2623 A70-31039
- Hall, polarization and Pedersen charged particle drift velocities in static magnetic and time dependent electric field 14 p2624 A70-31046
- Potential gradient effect on charge separation mechanism during interaction of polarized snow crystals with ice sphere 15 p2769 A70-31445
- Stress corrosion cracking of alpha-Ti alloys at room temperature, suggesting cathodic polarization promotion of film buildup 17 p3113 A70-34369
- Ferroelectric radiation detectors theory and applications, considering polarization changes due to temperature increase from absorbed radiation 17 p3082 A70-34649
- Electrical polarization effects on discharges in individual auditory nerve fibers following current application to cochlear partition 17 p3033 A70-35609
- Maxwell-Wagner migrational polarization resulting from free ions or electrons drift in dielectrics and semiconductors, considering relaxation time 18 p3298 A70-36595
- Polarization electric field in drifting ionospheric inhomogeneities, examining role of longitudinal currents 18 p3252 A70-36987
- Ionospheric electric field formation from polarization of electron density inhomogeneities under anisotropic conditions 18 p3252 A70-36988
- Ionospheric electric field origin theory in terms of charge separation due to neutral wind drag 22 p4016 A70-42785
- Planetary unipolar electric generator system theoretical model based on polarization charges deposition by solar wind 22 p4100 A70-42790
- Electrode and electrolyte additives effect on corrosion and polarization of alkaline zinc electrode 22 p3965 A70-43417
- Ni/sulfuric acid AC voltage polarization curves for anodic dissolution region 24 p4364 A70-46220
- POLARIZATION [SPIN ALIGNMENT]**
- Spin exchange theory for collisions between atoms extended to include target polarization 04 p0722 A70-14672
- Elastic and inelastic scattering of proton beam from Ne 20 measured for cross sections to interpret polarization data 04 p0723 A70-15636
- POLARIZATION [WAVES]**
- NT CIRCULAR POLARIZATION**
- NT ELLIPTICAL POLARIZATION**
- Geomagnetic field influence on extensive air shower radio emission, discussing frequency dependency and signal polarization 01 p0069 A70-10281
- Galactic water vapor radio sources spectral observation suggesting correlation between time variation and polarization 04 p0747 A70-14547
- Refractive index profile analysis for hypergeometric functions solutions for vertically polarized electromagnetic waves propagating in horizontally stratified isotropic media 04 p0647 A70-14616
- Parasitic cross polarization lobe elimination in radiation patterns of variable profile antennas by curved conductors, including confirmation for large radio telescope 05 p0820 A70-16253
- Monopulse radar signal detection efficiency with fully polarized reception taking into account target with fluctuating polarization 05 p0813 A70-16270

Satellite relay systems to provide polarization discrimination in antenna main beam to double spectrum for communications

05 p0815 A70-16661

Polarization insensitive phase shifter for phased array antennas, discussing limitations, design optimization and experimental results

06 p1019 A70-17508

Two port isotropic antenna excited by independent noise sources for uniform power radiation in all directions and polarizations

06 p1021 A70-17574

Polarization interference filter as laser resonator frequency selector, showing Q factor measurable within spontaneous emission line

06 p1082 A70-17771

Moving plasma column scattering of obliquely incident microwaves, assuming arbitrary polarization for incident plane wave

06 p1124 A70-18608

Polarization and absorption of radio waves in ionosphere using Appleton-Hartree equations, calculating LUF as function of sunspot number

07 p1229 A70-19160

Signal polarization and fading near LUF, describing spatial variations of wave amplitude in terms of angular spectrum

07 p1230 A70-19168

Field strength prediction for vertical horizontal broadside and horizontal end-on HF antennas, noting necessary polarization corrections

07 p1232 A70-19177

Crystals nonlinear permittivity related to temperature-time Green function for electromagnetic radiation, determining crystal polarizability by light-exciton method

07 p1335 A70-19868

Electrodynamic plasma accelerators fast particle generation mechanism during entrainment, studying polarization field potential structure

08 p1549 A70-20506

Faraday rotation in pulsars and in interstellar medium, discussing position angle drift, polarization changes and pulse fine structure

08 p1564 A70-20553

Plane E-polarized wave diffraction by slit in conducting screen using Fredholm integral equations of second kind

08 p1461 A70-21004

Polarization of interacting atoms resonance fluorescence and coherence transfer due to excitation exchange, considering electrostatic dipole-dipole and electromagnetic radiative interactions

08 p1548 A70-21341

Galactic latitude dependence of polarization and Faraday rotation of extragalactic radio sources at centimeter wavelengths

08 p1577 A70-21534

Radio sources linear polarization measurements at 6 cm wavelength, noting intensity changes with polarized flux and position angle

08 p1578 A70-21535

Laser display systems, discussing mechanical, diffractive and refractive beam deflection techniques, electro-optical polarization devices, holographic displays, etc

08 p1499 A70-21687

Polarization-optical studies of large deformations in nonlinear theory of elasticity and plasticity, considering procedures based on photoelastic coatings and transparent models

09 p1768 A70-22120

Polarization diversity reception effects on VHF telemetry signal from low altitude satellites

10 p1832 A70-23919

Helical propagation in multivalley semiconductors of n-Ge type, obtaining polarization anisotropy

10 p1928 A70-24842

Polarization regularities of Pc 1 oscillations interpreted from propagation along ionospheric waveguide centered at F 2 layer

11 p2043 A70-25543

Polarization effects during HF EM wave interaction in plasma, discussing plasma scattering effects in polarization transport equations

11 p2004 A70-25937

Solar microwave bursts polarization reversal mechanism, considering radiating electrons gyrosynchrotron absorption

11 p2106 A70-26617

Fluctuations of polarization induced fading periods in short wave transmissions of Soviet earth satellites, showing relation to ionospheric inhomogeneities

11 p2047 A70-26788

Very low frequency radio noise in ionosphere, magnetosphere and solar wind, using multiple receivers to measure mathematical relations between direction magnitude and polarization characteristics

12 p2184 A70-27574

Microwave solar bursts intensity and polarization measurements at 17 GHz, discussing chromospheric flares and X ray emission

12 p2293 A70-27592

Transmission coefficient for perforated screen related to orientation of rectangular and cross shaped narrow openings and field polarization during normal wave incidence

12 p2191 A70-28174

Pulsars linear polarization Stokes parameters measured, noting PSR 2045-16 radiation beamed into hollow cone centered on magnetic pole

13 p2487 A70-28631

Quasi-monochromatic radiation field polarization representation and transformation of state, including instrumental effects

13 p2451 A70-28829

Wave polarization effects on ionospheric HF radio wave transmission and reception in communication and broadcasting networks

14 p2550 A70-30650

Auroral echoes polarization with horizontal and vertical Yagis, discussing aerial patterns

14 p2578 A70-31240

Polarization role in radiation scattering by planetary atmosphere, considering luminance variation and Rayleigh scattering

14 p2651 A70-31302

Radar echo signal amplitude probability distribution during fully polarizational reception

15 p2696 A70-31517

Third harmonic generation using hot electron nonlinearity characteristics of semiconductors, considering plane-polarized electromagnetic wave nonlinear interaction with sample

15 p2783 A70-31970

Concentric polarization Fabry-Perot duochromator for spectral line displacement measurements applied to ion drifts in hollow cathode plasma

15 p2737 A70-32042

Faraday rotation in pulsars and in interstellar medium, discussing position angle drift, polarization changes and pulse fine structure

15 p2805 A70-32708

Backscattered radiation depolarization during illumination of aqueous medium by linearly polarized laser beam

15 p2753 A70-32861

Electromagnetic field intensity measurements in focal region of wide angle spherical reflector antenna illuminated by polarized plane wave

16 p2872 A70-32976

Radar and DC pulse signatures of multiple reflection from dry, damp and wet earth for vertical and horizontal polarization

16 p2861 A70-32977

Antenna system with linear polarization direction electronically changeable in microseconds

16 p2873 A70-33265

Pulse structure, polarization, time varying features and tight beam emission by pulsar model using finite thickness interfaces

17 p3153 A70-34532

Axially symmetric parabolic reflector with incident linearly polarized plane wave, determining Poynting vector behavior

17 p3043 A70-34615

Partially polarized wave with log-normal distribution law of component envelopes, investigating statistical characteristics of polarization parameters

18 p3228 A70-36624

Polarization splitting of EW and NS Alfvén oscillations in axisymmetric magnetosphere

19 p3409 A70-37319

Raman line coherence degree and polarization rate measurement, applying Wolf matrix

19 p3443 A70-37359

Radio polarization of quasars with and without absorption line spectra

19 p3523 A70-38605

Triangular ring laser polarization, using discharge tube with Brewster angle windows in optical circuit

20 p3639 A70-39084

Small angle of rotation measurement of coherent radiation polarization plane, discussing technique for increasing sensitivity and accuracy

20 p3643 A70-39759

Pulsar observational data and theories, discussing main pulse shape, wavelength, polarization, fine structure distance estimates, intensity and scintillations

20 p3706 A70-39935

Transmission line modal analysis for nonlinear polarizability in optical and quasi-optical waveguides

21 p3784 A70-40564

Polarization regularities of Pcl oscillations interpreted from propagation along ionospheric waveguide centered at F 2 layer

21 p3819 A70-41293

Wave polarization effects on ionospheric radio wave transmission and reception

21 p3790 A70-41361

Polarization of radiation reflected and transmitted by earth atmosphere, calculating scattering matrix for aerosol size distribution model

21 p3820 A70-41725

Stellar polarization measurements in Magellanic Clouds, tabulating position, magnitude, spectral type,

POLARIZATION CHARACTERISTICS

percentage polarization and electric vector position angle

21 p3922 A70-41979

Quasi-equispaced traveling wave slot arrays with below sidelobe crosspolarization, considering computer designed X band prototype

21 p3800 A70-42050

Micropulsations polarization characteristics from statistical spectrum analysis

23 p4185 A70-43837

Radar backscattering cross sections of horizontal and vertical polarizations for thin rectangular plate near grazing incidence

23 p4166 A70-44976

Pulsar radiation polarization, examining mean pulse profiles, frequency, position angle and rotational effects

24 p4403 A70-45404

POLARIZATION CHARACTERISTICS

Polarized and unpolarized impulsive solar centimetric radio bursts spectral peak interpretations

01 p0168 A70-10253

Radiometric method for calibrating loss of multimode antenna-feed components with linear or circular polarization, deriving calibration and error analysis equations

01 p0050 A70-10711

Jovian decimeter radiation polarization during 1966-1967 apparition compared with cyclotron model predictions

02 p364 A70-11793

Polarization characteristics of pulsars, noting stable average and time varying component

02 p3371 A70-12242

IR observations for position of hypothetical Seyfert-like nucleus explaining M82 polarization pattern

02 p3372 A70-12246

Multicolor Venus photography, discussing anomalous markings association with anomalous UV polarization

02 p3378 A70-12557

Total electron content (TEC), time delay and polarization errors on one way path through ionosphere, discussing measurements and predictions

02 p0293 A70-12568

Ionosonde spiral antenna for HF polarization studies

02 p0269 A70-12584

Spectral polarization characteristics phase variations used for classifying lunar surface features

03 p0565 A70-13234

Linearly polarized radiation in Na-glass laser obtained without energy loss by placing glass plates in resonator at Brewster angle to axis

03 p0499 A70-13257

Magnetic structure of type 4 solar outburst from continuous record of 80 MHz image and polarization

03 p0558 A70-13587

Polarization diversity provided to parallel plate antennas in airborne radar applications by orthogonal vector processing

03 p0452 A70-13967

Photoelectric polarimetry of samples of lunar maria, terra, lavas and chemicals for wavelength dependence of polarization, comparing to Mercury, Mars and asteroids

03 p0576 A70-14082

Helicone antenna /axial mode helix combined with conical horn/ compared to conical horn in pattern and polarization characteristics

04 p0655 A70-14662

Temporal isolation between pulsed orthogonal polarization state laser beams, showing selection dependence on sampling time

04 p0701 A70-15032

Polarization nature and changes evaluation of radio echo signals reflected from polar auroras

04 p0682 A70-15730

Nonlinear theory of elastic dielectrics with polarization gradients, obtaining jump conditions and field and constitutive equations by variational principle

05 p0882 A70-16092

Polarization transfer equations for electromagnetic waves propagating in inhomogeneous magnetized plasma solved analytically for homogeneous magnetized plasma

05 p0890 A70-16570

Flux densities from quasars 3C 273, 3C 279 and 3C 454.3 and Seyfert galaxy 3C 84, measuring linear polarization, discussing time variations in sources

05 p0918 A70-16926

Polarization loss for elliptically polarized antennas, using curves based on Hatkin equation

06 p1019 A70-17504

Polarization level of outgoing short wave radiation calculated along solar vertical in aerosol containing multiply scattering atmosphere

06 p1097 A70-17829

Geomagnetic micropulsation amplitudes and polarization along meridional profile analyzed from simultaneous ground station recording

07 p1268 A70-19463

Polarization anisotropy effect of laser cavity on neodymium glass laser output power

08 p1510 A70-20513

Red giants and supergiants intrinsic radiation polarization characteristics

08 p1569 A70-20826

Polarization of laser medium consisting of colliding two level molecules with velocity dependent mean free time

08 p1512 A70-20992

Pulsar NP 0532 average polarization parameters measured at 430 MHz, discussing variations of precursor and main pulse and flux of interpulse

08 p1578 A70-21549

Spectral polarization characteristics phase variations used for classifying lunar surface features

08 p1580 A70-21667

Vacuum-UV monochromators polarization and effective transmittance measurements, comparing characteristics of parallel and pyramidal biotite polarizers

08 p1546 A70-21791

Crab Nebula activity from telescopic plates, illustrating polarization structure on composite plate

09 p1750 A70-21999

Phase variations in polarization parameters of eclipsing binary Z Vul during polarimetric studies for interstellar polarization component

09 p1751 A70-22156

Elevation patterns of vertically polarized elements above circular finite ground screens directly on soil, discussing steering illumination

09 p1634 A70-22700

Solar eclipse coronal polarization and intensity measurements, discussing equipment, calibration, photometric reduction and results

09 p1757 A70-22736

Integrated lunar disk wavelength dependence of polarization using photoelectric polarimeter, tabulating results

09 p1759 A70-22910

Reflected solar radiation polarization over land, sea and cloud surfaces to determine atmospheric pollution

09 p1747 A70-23603

Pulsars pulse shapes and linear polarization measured, observing rapid change of polarization direction in double pulses

10 p1936 A70-23901

Metals, alloys and galvanic couples corrosion rates in synthetic seawater measured by polarization technique

10 p1887 A70-24044

Solar magnetic field measurement emphasizing circular and total polarization characteristics

10 p1939 A70-24275

Electrode structural parameters effect on polarization characteristics of air-hydrogen cells to obtain optimum performance, reliability and service life

10 p1831 A70-24471

Outer corona brightness and polarization during total solar eclipse from satellite photographs

10 p1947 A70-24988

Geomagnetic variations dominant polarization direction seasonal dependence based on magnetotelluric field observations, discussing micropulsations and LF cases

11 p2044 A70-25557

Icarus asteroid positions, UVB magnitude, brightness, colors, light curves and polarization, noting stony-iron composition

11 p2113 A70-26470

Poincare sphere application to automatic polarization forms measurements and two/three dimensional photoelasticity by scattered light

11 p2142 A70-26633

Polarization properties of radar channel with random parameters, relating observation range with transmitting-receiving antennas and target fluctuations

11 p2012 A70-26815

Resonant nonmonochromatic radiation effects on quantum system, deriving expressions for active medium nonlinear polarization, susceptibility and gain

12 p2245 A70-27304

Polarization of extragalactic radio sources and supernova remnants emphasizing instrumental effects

12 p2309 A70-27894

Hanle effect in single mode He-Ne laser, observing spontaneous emission on different spectral lines and estimating lifetimes of Ne excited states

13 p2424 A70-28598

Plane electromagnetic wave reflection at interface of two semiinfinite dielectric media in relative motion perpendicular to incidence plane, noting polarization change

13 p2365 A70-29102

Polarization of strong radio pulses from pulsar NP 0532 in Crab Nebula

13 p2492 A70-29269

Gas laser active medium nonlinear polarizability calculations with allowance for resonance emission capture effect on atomic velocity and population distributions

13 p2427 A70-29284

Radio waves attenuation anisotropy in sea ice by comparing vertically and horizontally polarized signals

14 p2546 A70-30132

Spectropolarimeter for measurements of polarization characteristics of atmospheric radiation in nanometer range

14 p2583 A70-30414

Polarization nature and changes evaluation of radio echo signals reflected from polar auroras

14 p2575 A70-30814

Venus radar anomalous features, examining rotation period, polarized and cross polarized scattering properties and topography

14 p2647 A70-31079

Visible polarization signature for remote sensing of soil surface moisture, noting invariance to partial shadowing in plowed or rough soils

15 p2724 A70-31667

Geomagnetic micropulsations horizontal polarization characteristics relationship between stations in southern and northern auroral zones

15 p2725 A70-31859

Polarization characteristics of solar radio waves reflected from coronal waves in meter wavelength range

15 p2802 A70-32485

Line formation in solar magnetic fields with allowance for absorption emission and scattering processes, discussing Hanle effect and atomic level polarization

15 p2804 A70-32617

Annular lasers energy, polarization, radiation loss and frequency characteristics dependence on phase shift due to anisotropic plate introduction

15 p2753 A70-32860

Earth magnetic field Pc 1 micropulsations polarization characteristics examined in narrow frequency bands

16 p2897 A70-33299

Radar mapping in heavy rain with orthogonal transmit and receive polarization, using backscatter and attenuation to define maximum operating altitude

16 p2863 A70-33434

Lunar millimeter wavelength thermal radiation measurement noting surface roughness effect on polarization

17 p3171 A70-35559

Partially polarized wave with log-normal distribution law of component envelopes, investigating statistical characteristics of polarization parameters

18 p3228 A70-36624

Geomagnetic micropulsation amplitudes and polarization along meridional profile analyzed from simultaneous ground station recording

18 p3250 A70-36937

Diurnal variations in polarization axis direction of Pc 1 pulsations

19 p3410 A70-37333

Photographic polarimeter based on Savart and lambda/4 plates combination for linear polarization measurements of coronal and prominence emission lines during solar eclipse

20 p3627 A70-39092

Electro-optical crystal resonator loss anisotropy, determining natural frequencies and polarizations

20 p3642 A70-39755

Geomagnetic variations dominant polarization direction seasonal dependence based on magnetotelluric field observations, discussing micropulsations and LF cases

21 p3820 A70-41307

Polarization characteristics of pulsar NP 0532 strong pulses at 430 MHz, using dual circularly polarized line feed

22 p4105 A70-43228

Micropulsation Pc-1 phase and polarization comparisons concerning L to R wave coupling in ionosphere

22 p4024 A70-43313

Antenna polarization and terrain depolarization effects on radar ground return, calculating echo pulse from smooth and rough terrains

22 p3990 A70-43327

Micropulsations polarization characteristics from statistical spectrum analysis

23 p4185 A70-43837

Polarization characteristics of solar radio waves reflected from coronal waves in meter wave length range

23 p4240 A70-43909

Polarization of short period oscillations Pc2-Pc4 dependence on time of day, oscillation type and geoelectromagnetic field activity

23 p4190 A70-44086

Continuum polarization at solar limb at various wavelengths, using source functions

23 p4246 A70-44754

Polarization properties of radar channel with random parameters, relating observation range with transmitting-receiving antennas and target fluctuations

24 p4311 A70-45187

SbSI semiconductor single crystal repolarization parameters temperature dependence, noting anoma-

lies in permittivity, spontaneous polarization and dielectric loss tangent

24 p4389 A70-45208

Circular polarization time evolution during solar microwave impulsive bursts

24 p4401 A70-45319

Solar flares X ray emission polarization measured by Thomson scattering instrument on Intercosmos-1 satellite

24 p4396 A70-45321

POLARIZATION CHARTS

U GRAPHS [CHARTS]

U POLARIZATION [WAVES]

POLARIZED ELASTIC WAVES

Single crystalline mercury elastic constants calculated from propagation velocity measurements of polarized sound waves

19 p3486 A70-37770

POLARIZED ELECTROMAGNETIC RADIATION

NT POLARIZED LIGHT

NT SYNCHROTRON RADIATION

X band radar with horizontally and vertically polarized antennas to compare sea clutter suppression by decorrelation and constant alarm rate receivers

03 p0451 A70-13935

Elliptically polarized microwave oscillations conversion to linearly polarized oscillations with polarization plane in original orientation

04 p0655 A70-14608

Faraday modulator for polarized laser radiation, eliminating analyzer by oblique magneto-optical active element, converting angular modulation into amplitude modulation

05 p0858 A70-16251

Polarization transfer equations for electromagnetic waves propagating in inhomogeneous magnetized plasma solved analytically for homogeneous magnetized plasma

05 p0890 A70-16570

Three dimensional electromagnetic scattering from thin walled conducting circular tube of finite length normally incident with E or H polarized plane wave

05 p0816 A70-16987

Mutual coupling between waveguides radiating through conducting ground planes with orthogonally polarized propagating modes described by first order analysis

06 p1020 A70-17562

Power reflection and transmission coefficients for polarized electromagnetic waves incident on plasma slab moving along magnetostatic field

06 p1008 A70-17566

Scattering and depolarization of plane horizontally polarized electromagnetic wave from slightly rough lossless dielectric layer, using small perturbation theory

06 p1010 A70-18019

Signal polarization and fading near LUF, describing spatial variations of wave amplitude in terms of angular spectrum

07 p1230 A70-19168

Polarized and unpolarized emission measurements of W 44 supernova remnant with radio telescope, showing results for eastern portion of source

07 p1383 A70-19405

Polarization structure of electromagnetic wave scattered by slanted two dimensional statistically rough surface of finite conductivity

08 p1456 A70-20573

Scattered field from rough ionospheric irregularities or earth surface for arbitrary polarization of incident wave

08 p1456 A70-20574

Electrical and magnetic polarizability coefficients in theory of diffraction at small apertures by formulating bilateral variational principles

09 p1631 A70-22150

Electromagnetic waves propagation in nonlinear medium, investigating polarized plane wave incident on vacuum-plasma interface in magnetic field

10 p1844 A70-25156

Refractive index profiles method for vertically polarized electromagnetic waves in horizontally stratified magneto-plasma extended to anisotropic media, noting relevance to ionospheric propagation

11 p2011 A70-26555

Discrete extragalactic radio sources integrated linear UHF polarization values, discussing optical identification and radio spectral index correlations

11 p2117 A70-26656

Polarized Lyman alpha radiation emitted in electron collisions with atomic and molecular hydrogen and by electric field quenching of metastable atom

13 p2455 A70-29221

Dipole antenna arrays feeds design and performance for spherical aberration correction, discussing polarization mismatch

16 p2871 A70-32955

Paraboloidal reflectors aperture fields from stereographic mapping of feed polarization pattern, illustrating electric and magnetic dipoles and Huygens sources

16 p2871 A70-32962

Partially polarized wave with log-normal distribution law of component envelopes, investigating statistical characteristics of polarization parameters 18 p3228 A70-36624

Thomson theory of arbitrarily intense elliptically polarized plane electromagnetic wave scattering by free electrons, solving electron equations of motion 18 p3267 A70-36649

Extragalactic radio sources polarization variations at 8 GHz based on expanding source type model, noting synchrotron self absorption depolarization 18 p3317 A70-37002

Polarized electromagnetic wave diffraction by semiinfinite symmetrical obstacles in rectangular waveguide, calculating transformation coefficients for wide frequency range 19 p3378 A70-37729

Double asymmetric grating with thin ideally conducting strips, describing incident E-polarized electromagnetic wave diffraction 19 p3378 A70-37744

Diffraction amplitudes in plane H-polarized electromagnetic wave incident obliquely on grating with closely spaced conducting rectangular bars, obtaining transmission coefficient 19 p3378 A70-37745

Optical activity of nonenantiomorphous biaxial crystals with mirror planes, investigating polarization plane rotation 21 p3850 A70-41934

B-V and U-B colors and B and V polarization calculation in single scattering for slab model reflection nebulae with dielectric or graphite grains 22 p4103 A70-42984

Intrinsic polarization from Thomson scattering in binary systems with tidal distortions, taking into account gray atmosphere, axial rotation, gravitational interaction and radiative interaction 22 p4103 A70-42988

Radar astronomical polarization measurements for lunar echoes by exploiting ionospheric Faraday rotation with linearly polarized antenna 23 p4165 A70-44964

Dipolar resonant scattering of H-polarized plane waves by axially magnetized plasma column with perfectly conducting core 23 p4228 A70-44977

POLARIZED LIGHT

Polarization level dependence of dye lasers emission on angles between direction of forced radiation and pumping laser resonator axis 01 p0113 A70-11037

Twilight sky polarization data in visible spectrum obtained by high altitude balloon-borne photoelectric photometers 01 p0079 A70-11219

Power losses in ruby laser with polarized spontaneous luminescence determined as function of laser parameters and light polarization 03 p0502 A70-13747

Thermodynamics of radiation and photosynthesis, discussing Ross-Calvin maximal efficiencies, Duysens method, light and dark conditions and polarized light 03 p0428 A70-14011

Lunar regolith and polarized component of earthlight observations by Surveyor 7 TV camera 04 p0752 A70-15061

Polarization effects of helium-neon laser emission at 3.39 micron wavelength investigated in longitudinal and transverse magnetic fields 04 p0702 A70-15227

Airglow and skylight polarization measurements at twilight compared for possible relationship 05 p0837 A70-15927

Successive small birefringences undergone by polarized light ray crossing photoelastic model represented by rotations in equatorial plane on Poincare sphere 06 p1168 A70-17918

Light intensity and polarization in twilight sky atmosphere at solar depressions 07 p1263 A70-19047

Fundus oculi in polarized light, investigating light intensity variations and polarization pattern in yellow spot 08 p1444 A70-20748

Polarized light study of fundus oculi facilitating early diagnosis of various optical nerve and yellow spot diseases 08 p1445 A70-20749

Polarized light electroreflection from GaAs single crystal, noting useful signal linear dependence on electric field 08 p1556 A70-21124

Narrow band detector for polarized light in far UV based on plasma resonance 09 p1676 A70-22650

Polarization-optical cinematographic method for study of mechanical stresses during dynamic loading 09 p1680 A70-23174

Magnetophotoelastic model applied to plates bending stress analysis, deriving polarized light propagation equations 09 p1728 A70-23447

Nb and Nb alloys activation in polarized light by etching technique, observing grain contrast improvement 10 p1906 A70-25229

Honda 1968c comet head light polarization measurements, noting correspondence to scattering on dust particles 12 p2300 A70-27499

Sky radiation scattering and polarization functions for various solar altitudes at Lomnitzer Peak observatory 12 p2294 A70-27674

Chandrasekhar polarization upper limit in early type stars noting effects of thermal absorption, wavelengths and effective temperature 12 p2303 A70-27675

Extragalactic objects polarization due to synchrotron radiation superimposed on stellar radiation, discussing Seyfert galaxies nuclei 12 p2307 A70-27869

Raman spectrum of lithium formate monohydrate single crystal in polarized He-Ne laser light, discussing crystal structure 13 p2425 A70-28714

Electronic heterodyne astronomical spectroscopy, using lasers for absolute monochromatic flux and polarization measurements on star-like objects 13 p2408 A70-29473

Autocorrelation of coherence characteristics of polarized components of light scattered at curved rough surface, showing nonadequate Kirchhoff approximation 15 p2749 A70-31555

Optical polarization, discussing radiation intensity and state measurement by two beam interferometer 15 p2736 A70-32035

Polarized light scattering angle relationship with Mueller matrix elements for polydisperse systems of irregular randomly oriented particles 15 p2775 A70-32040

Scattered light rosette using three polarized light beams intersecting at surface point to evaluate photoelastic stress data 15 p2739 A70-32320

Long period variable stars light polarization as function of brightness and wavelength, discussing molecular scattering and nonthermal emission 15 p2808 A70-32879

Solid state laser polarization mechanism, considering isotropic and anisotropic cavities 17 p3106 A70-35103

Planetary surface inhomogeneities detection by reflected and transmitted light polarimetry, using symmetry principles 18 p3319 A70-37057

Electronic absorption spectra of single crystal praseodymium acetate tetrahydrate in natural and polarized light 19 p3488 A70-38742

Light polarization during twilight at zenith from photoelectric recordings, noting intensity decrease with altitude 19 p3417 A70-38770

White dwarf star circular polarized light, indicating strong magnetic field 20 p3701 A70-39001

Laser interferometer system unwanted reflections elimination and intensities control in each arm by linear polarization method 21 p3823 A70-40820

Liquid crystal smectic C phase temperature dependent tilt angle, using conoscopic observation and circularly polarized light 21 p3862 A70-41322

Refractive index complex part effect on polarization and radiance of reflected and transmitted light for continental haze and nimbostratus cloud models 21 p3847 A70-41724

Low pressure supersonic wake measurement by differential interferometer in double pass polarized light (SMPT PREPRINT 95) 22 p4036 A70-43060

Laser light polarization and depolarization during backscattering from aqueous suspensions 23 p4215 A70-44271

Radiative transfer equation solution for polarized light in Rayleigh scattering atmosphere with absorption, using singular eigenfunction expansion technique 23 p4219 A70-44402

Battery operated electronic servo governed photoelectric polarimeter for airborne measurements of skylight polarization, discussing design and operation principles 23 p4199 A70-45006

POLARIZED RADIATION

NT POLARIZED ELASTIC WAVES

NT POLARIZED ELECTROMAGNETIC RADIATION

NT POLARIZED LIGHT

NT SYNCHROTRON RADIATION

Polarization of nonspherical plasma emission region in thermal X ray stars 02 p0357 A70-11787

Polarization observations of Saturn in UV and visible regions compared with Jupiter data, noting multiple scattering 02 p0368 A70-11818

High intensity pulsed laser radiation scattering by free electrons, studying linearly polarized incident radiation 02 p0312 A70-12276

Cosmic X ray observations by rockets and balloons noting polarization and line emissions of various sources 02 p0359 A70-12789

Linearly polarized radiation in Nd-glass laser obtained without energy loss by placing glass plates in resonator at Brewster angle to axis 03 p0499 A70-13257

Longitudinal magnetic field effect on output power and emission polarization of CW Ar laser employing Brewster windows 03 p0500 A70-13529

Flash lamp illuminated ruby laser operating with ordinary or extraordinary polarization, measuring gain or absorption 03 p0502 A70-13954

Interstellar polarization by graphite-silicate grain mixtures, observing variability in wavelength dependence of polarization for various models 03 p0577 A70-14218

Intensity, spectrum and polarization of gyrosynchrotron radiation from magnetosheath plasma electrons distribution 04 p0749 A70-14594

Anomalous Doppler shift interaction between positive ions and right-hand polarized EM waves propagating at small angle to interplanetary magnetic field 05 p0905 A70-15761

Cerenkov radiation in infinite anisotropic electron plasma linearly polarized in magnetic field having linear electron distribution moving with uniform velocity 06 p1120 A70-17538

Radiation from nonlinear polarization sideband in Ar lasers, discussing anomalous beat notes and mode locking phenomena 06 p1083 A70-17949

Plasma polarization shift for resonance line of ionized He in shock tube due to negative space charge 07 p1348 A70-19273

Solar protuberance radiation polarization in Ca I 4227 A line, discussing depolarization and electron- and photoexcitation 07 p1384 A70-19416

He-Ne single frequency laser output characteristics at various active medium pressures noting emission polarization 08 p1511 A70-20517

Red giants and supergiants intrinsic radiation polarization characteristics 08 p1569 A70-20826

Ionizer design for hydrogen atom beam ensuring storage of polarized protons, using electron beam for ionization 09 p1732 A70-22846

Polarized radiation transfer through inhomogeneous semiinfinite atmosphere by matrix perturbation method, giving nonlinear singular integral equation 10 p1933 A70-24985

Polarization of solar scattered radiation measured by radio probes for aerosol particle concentration and size distribution as function of altitude 10 p1884 A70-25253

Solar radio emissions of types I, II, III and IV activity and polarization during 18-26 May 1967 observed by narrow-band timesharing polarimeter 12 p2294 A70-27711

Cold variable stars intrinsic polarization model proposing light scattering in circumstellar dust shells 12 p2307 A70-27865

Polarization effect on radiant heat transfer between simply arranged smooth plate surfaces 13 p2523 A70-29993

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization 15 p2749 A70-31451

Volcanic blankets aerological investigation by polarization and spectral techniques, determining brightness distribution of reflected solar light 15 p2803 A70-32495

Backscattered radiation depolarization during illumination of aqueous medium by linearly polarized laser beam 15 p2753 A70-32861

Transverse magnetic field effect on CW argon laser operation with linearly polarized radiation 15 p2754 A70-32866

Pyroelectric IR radiation detector based on materials polarization changes associated with temperature changes 16 p2905 A70-33154

Super and sub specular maxima in angular distribution of polarized radiation reflected from roughened dielectric surfaces [AIAA PAPER 70-861] 16 p2999 A70-33906

Taurus X-1 X ray emission polarization, using rocket-borne polarimeter 17 p3150 A70-34845

Radiation polarization measurements of natural underlying surfaces in centimeter range, noting dependence on sighting angle 18 p3250 A70-36967

Variable radio source linear polarization at 8 GHz, examining degree, position angle and flux density 18 p3317 A70-37001

Gas laser radiation depolarization coefficient as function of radiation energy, cavity anisotropy and operating transition type 19 p3444 A70-37445

Polarization in inverse Compton effect for arbitrary photon and electron distributions, discussing monochromatic photon beam 19 p3524 A70-38696

Optical emission conversion from solid state lasers into far IR region by nonlinear polarization with difference frequency generation 19 p3448 A70-38741

Thermally induced stress birefringence effect on linearly polarized CW YAG-Nd laser 21 p3834 A70-40566

Continuum polarization at solar limb at various wavelengths, using source functions 23 p4246 A70-44754

Linear polarization of sunlight scattered by Venus atmosphere, giving data for integrated disk and equatorial region 23 p4246 A70-44756

Polarized maser emission from interstellar hydroxyl and water related to nonlinear weak magnetoplasma 24 p4381 A70-45258

POLARIZERS

Vacuum-UV monochromators polarization and effective transmittance measurements, comparing characteristics of parallel and pyramidal biotite polarizers 08 p1546 A70-21791

Rectangular waveguide with cross shaped slot as polarizer ensuring circular polarization over wide frequency range 09 p1652 A70-23649

POLAROGRAPHS

U POLAROGRAPHY

POLAROGRAPHY

Polarographic probe for wall studies of turbulent flow velocity and direction by measuring maximum reduction current on redox compound microelectrode 01 p0062 A70-10664

POLES

Earth poles motion influence on latitude, longitude, azimuth and geocentric rectangular coordinates of points determinations on earth surface 03 p0473 A70-13187

Geomagnetic dipole field disturbances by trapped particles, calculating self consistent equilibrium configuration for ring current dipole moments 15 p2727 A70-31905

Feedback gains for repeated eigenvalues in Simon-Mitter pole allocation algorithm 16 p2941 A70-32986

Astronomically determined latitude longitude and azimuth reduction to common epoch, discussing secular nonperiodic pole motion due to crust drift 18 p3323 A70-37144

POLICIES

Future U.S. aerospace power in terms of military technology and defense policies and attitudes 05 p0960 A70-16633

POLISHED METALS

U METAL POLISHING

POLISHING

NT ELECTROPOLISHING

NT METAL POLISHING

Workpiece temperature during asymmetrical plane polishing by wheel face, deriving temperature distribution formulas for maximum heat source intensity 07 p1291 A70-18828

POLITICS

Aeronautics and astronautics sociopolitical aspects, discussing German scientific and industrial organization, American-European technology gap, taxation for research, etc [DGLR-69-1] 04 p0788 A70-15181

Midwestern political economy and federal R and D funds distribution, surveying bidding practices and NASA contracts for five year period 07 p1428 A70-19733

International legal and political aspects of earth resource surveying by satellite remote sensors, considering U.S. policy [AIAA PAPER 70-331] 09 p1793 A70-22862

Criticism of public administration aspect of Edwards Report, noting parliamentary and constitutional difficulties in some proposals 11 p2153 A70-25857

Earth Resources Satellites political background, investigating international implications 20 p3739 A70-39060

POLLUTANTS

U CONTAMINANTS

POLLUTION

NT AIR POLLUTION

NT WATER POLLUTION

Combustion research prospects, considering turbulence and flame stabilization, pollution control, flame self acceleration, subsonic/ supersonic flow combustion and flame diagnostics 11 p2150 A70-26376

High temperature energy systems with plasma reactors and inductive MPD converters, discussing spacecraft propulsion and ground based pollution-free power generation 15 p2791 A70-32278

Clean, rough vacuum, discussing cleanliness criteria and pollution avoidance via contaminant-free pump 19 p3358 A70-38494

POLYACRYLATES

U ACRYLIC RESINS

POLYAMIDE RESINS

Unlubricated wear characteristics of polyimide resin sliding against carbon steel in air, noting effects of surface temperature, bearing pressure and velocity 01 p0103 A70-10448

Solid glass sphere reinforced nylon resins properties, processing and applications, noting tensile and impact strength and heat distortion 01 p0128 A70-10772

Polystyrene and polyamide stress relaxation graphs, considering tensile stresses and temperature effects 04 p0712 A70-15101

Surface recession of low density phenolic nylon in arc heated air using stagnation point models, noting char removal processes 04 p0787 A70-15602

Polyamides chemical welding using HF heating to obtain optimum temperature distribution and to activate polymer reaction with crosslinking agents 06 p1091 A70-17316

Phenolic nylon ablative thermal effectiveness in arc heated nitrogen, air and nitrogen-carbon dioxide streams [AIAA PAPER 70-154] 06 p1183 A70-18233

Antifriction reinforced plastics based on polyamide fibers in epoxy phenolic resins, determining optimum ratios to obtain desired mechanical properties 09 p1710 A70-23675

Polyamides /nylons/ stress cracking by metal halides and halide-like salts, investigating effects of nylon temperature, moisture content, concentration, etc 10 p1907 A70-24224

Polyamide and secondary amide mode compounds stress cracking by metal halides using IR and nuclear magnetic resonance techniques 10 p1907 A70-24299

Nylon 6 polyamide tensile stress cracking by metal thiocyanates in aqueous and nonaqueous solutions, comparing results with cracking by metal halides 10 p1907 A70-24300

Quartz-polyimide for missile radome exhibiting low dielectric constant and thin wall for use over broader frequency range 13 p2417 A70-28664

Phenolic nylon ablative thermal effectiveness in arc heated nitrogen, air and nitrogen-carbon dioxide streams [AIAA PAPER 70-154] 23 p4282 A70-44520

Caprolon B mechanical properties, comparing properties to other polyamide resins for use in machine parts fabrication 24 p4367 A70-45503

POLYATOMIC GASES

NT DIATOMIC GASES

Radiative lifetimes and total transition probabilities measured in polyatomic gases using phase shift method and electron beam excitation 03 p0441 A70-14009

Nonlinear rarefied Couette flow with heat transfer in polyatomic gases, using kinetic theory of gases [ASME PAPER 69-WA/HT-39] 04 p0781 A70-14803

Coupled relaxation dependence on translational and vibrational temperature and number of modes in polyatomic gases, noting molecular dissociation 12 p2276 A70-27797

Quantum mechanical Boltzmann equation for atomic gas of composite particles, considering excited level degeneracy 14 p2619 A70-30651

Fluidic oscillator molecular weight of flowing mono- and polyatomic gases, discussing frequency dependence on pressure drop and temperature 17 p3081 A70-34515

Kinetic equation for rarefied polyatomic gases derived from Liouville equation 17 p3138 A70-35728

POLYATOMIC MOLECULES

NT DIATOMIC MOLECULES

NT TRIATOMIC MOLECULES

Matrix elements of nonadiabatic perturbation emphasized in semiempirical theory for evaluating polyatomic molecules radiationless rate constants in terms of electronic-vibrational state 04 p0722 A70-14699

Molecular vibration energy distributions of polyatomic molecules, formulating energy criterion valid for nth order general case 08 p1511 A70-20597

Polyatomic molecules radiationless transition rate statistical analysis, suggesting role of Franck-Condon principle in determination of nonradiative decay rates 16 p2858 A70-34014

Thermal diffusion of isotropic, nonisotropic and multicomponent mixtures with monatomic and polyatomic molecules, considering kinetic theory and experimental results 17 p3197 A70-35537

POLYBENZIMIDAZOLE

Polybenzimidazole /PBI/ resin-bonded solid film lubricants composed of molybdenum disulfide, antimony trioxide and PBI resins [ASME PAPER 69-LUB-15] 01 p0101 A70-10390

POLYBUTADIENE

Polybutadiene-ammonium perchlorate solid propellant microscopic failure analysis under uniaxial tension 09 p1741 A70-22424

Polybutadiene-ammonium perchlorate solid propellant BPT-1 mechanical properties viscoelastic analysis under constant strain rate tension 09 p1742 A70-22425

POLYCARBONATES

Constant stress creep and recovery behavior experiments of polycarbonate under combined tension and torsion stresses in weakly nonlinear range 01 p0130 A70-11083

Nonflammable coatings for polycarbonate to meet NASA safety standards, discussing alkali silicate and arc plasma deposition of glass and ceramic oxide [WSCI PAPER 69-34] 06 p1092 A70-17977

Polycarbonate ductile fracture measured for strain energy release rates and plastic zone size and shapes to correlate with existing theories and experimental data 07 p1321 A70-20041

Polycarbonate fatigue fracture surfaces and striation feature 12 p2259 A70-27168

Fiberglass content effects on reinforced polycarbonates long term dimensional stability during compression and tension creep tests 12 p2259 A70-28298

Fatigue life and long term strength of polycarbonate components in pneumatic pulsating pressure equipment described by power and exponential equations 13 p2440 A70-29784

Polycarbonate plate fatigue crack propagation, discussing length due to repetitions, striation number relationship to cycles, and stress intensity 16 p2941 A70-34335

Polycarbonate thin walled cylindrical shells mechanical and material stability under torsion 17 p3127 A70-34656

Graphite fiber reinforced polycarbonate composites interfacial adhesion improvement by controlled thermal treatment 20 p3652 A70-39168

POLYCRYSTALS

Polycrystalline rocks elastic constant and nonelastic behavior, discussing Voigt, Reuss and Hill averaging methods 01 p0071 A70-10446

Polycrystalline Mo ductility at low pressures in tension at ambient temperature, discussing H type embrittlement mechanism 01 p0121 A70-11234

Tensile tests of polycrystalline Nb-H alloys at low temperatures, noting cooling rate effect on ductility in terms of microstructure 01 p0122 A70-11240

Sputtering yield of amorphous and polycrystalline targets bombarded by energetic ions or recoil atoms calculated by integrodifferential equations derived from Boltzmann transport equation 02 p0343 A70-11885

Ingot and powder metallurgy polycrystalline Be flow and fracture behavior and microstructure pressure dependence at room temperature 02 p0317 A70-12318

Polycrystalline material tensile failure at high temperature, discussing intergranular cracking, shearing, etc 03 p0508 A70-13155

Polycrystalline Co strength and plastic properties tested at various temperatures and strain rates 03 p0510 A70-13352

Ductile-brittle transition temperature relation with grain size in polycrystalline Mo as function of annealing temperature 05 p0862 A70-15907

Structural changes in polycrystalline Al subjected to HF fatigue, using transmission electron microscopy 06 p1084 A70-17127

Fatigue crack growth in polycrystalline Mo at room temperature under cyclic loads observed along grain boundaries 07 p1314 A70-20013

- Structural elements reliability determination simulated by microinhomogeneous polycrystalline medium under thermal stresses and in stationary nonuniform temperature fields
09 p1778 A70-23085
- Nonisothermal loading model of polycrystalline material, investigating tangential stresses in slip direction and plastic deformation using linear strengthening law
09 p1779 A70-23102
- D-pattern changes of helium ions irradiated polycrystalline Mo and Ni specimens, observing line splitting
09 p1707 A70-23197
- Dispersion effect on accuracy of measuring polycrystalline samples electronograms by comparator using statistical method
09 p1682 A70-23392
- Ultrasonic vibrations effects on microstructure and mechanical properties of polycrystalline titanium during phase recrystallization
10 p1903 A70-23863
- Bi polycrystalline film grown by vacuum deposition on amorphous substrates investigated for electron microscope beam effects
12 p2285 A70-27261
- Polycrystalline molybdenum desorption of adsorbed hydrogen, oxygen and water by electron impact
12 p2182 A70-27679
- Polycrystalline lanthanides and metals resistance to deformation under compression and tension at different temperatures and strain rates
12 p2257 A70-28273
- Polycrystalline Al microstrain distribution nonuniformity under creep and static tension
14 p2595 A70-30173
- High temperature elastic moduli in polycrystalline Al rods from propagation velocity of elastic waves generated by Q switched laser [SESA PAPER 1641]
15 p2759 A70-32304
- Flow stress and dislocation density dependence on temperature in polycrystalline molybdenum
16 p2930 A70-33085
- Polycrystalline NaCl-KCl solid solution alloy, considering high temperature creep under constant compression stress
16 p2961 A70-33275
- Dislocation diffusion effects on strength of whiskers and fine grained polycrystals
16 p2934 A70-34327
- Unalloyed polycrystalline Ti fatigue tests, observing cyclic stresses effect on twinning
17 p3116 A70-34393
- Strain gage measurements of elastic properties of Ti sheet alloys, computing polycrystalline properties from single crystal values
17 p3121 A70-34433
- Crack initiation in wrought polycrystalline Be sheet, investigating three point loaded bend fractures of powder and ingot samples by optical and electron microscopy
17 p3122 A70-34551
- Temperature and strain rate effects on polycrystalline Al strength
17 p3124 A70-34655
- Single and polycrystalline indium arsenide preparation methods and quality control
17 p3143 A70-35119
- Electron impact desorption kinetics of ions and neutrals from polycrystalline W surfaces, using cylindrical magnetic spectrometer
18 p3225 A70-36321
- Microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability
19 p3484 A70-37565
- Crystal dislocations and microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability, noting eddy currents role
19 p3484 A70-37566
- Elastic-plastic behavior of fine grained fcc polycrystals based on single crystal slip data, satisfying displacement compatibility, equilibrium condition, etc
19 p3538 A70-37792
- Transparent ceramic armor fabrication using dense polycrystalline magnesia
19 p3437 A70-38422
- Nb single and polycrystalline thermal properties at high temperatures
20 p3648 A70-39639
- Solid bodies statistical creep analysis, assuming macroscopically homogeneous isotropic polycrystallinity
20 p3725 A70-39866
- Polycrystalline aluminas under thermal shock, investigating strength decrease and subcritical crack formation
22 p4059 A70-43413
- Stress-strain curves of polycrystalline metals and composites using single crystal elastoplastic model
24 p4425 A70-45779
- changes in creatine phosphate concentration and lactate/pyruvate ratio
02 p0232 A70-11717
- POLYESTER RESINS**
Unidirectional carbon and glass fiber reinforced polyester resins dynamic characteristics under torsional and flexural vibration, showing damping independence of cyclic stress amplitude
03 p0514 A70-13111
- Tetrabromophthalic anhydride (TBPA) in polyester and epoxy resins, studying fire retardant capabilities by comparative combustion tests
05 p0811 A70-16584
- Polyester resins characteristics, use, properties and manufacturing methods, discussing molded and reinforcing materials
05 p0811 A70-16602
- Compression strength of polyester resin reinforced with hard drawn and softened steel wires, discussing variations from predicted performance
07 p1320 A70-19954
- Flame-resistant trichloromethyl-containing polyester-styrene system, describing curing characteristics at room and higher temperatures
10 p1907 A70-24066
- Photoelastic stress analysis, discussing holographic interferometry for main stresses separation and polyester resins application to birefringence pattern superposition elimination
15 p2815 A70-31809
- Smooth surface polyester premix and sheet molding compound technology applied to reinforced plastics industry
16 p2917 A70-33364
- Reinforced plastic for aircraft parts, investigating low viscosity polyester resins of styrene crosslinking type
20 p3656 A70-40028
- Sources of variability in laboratory carbon arc weathering of light stabilized polyester resin
22 p4059 A70-43080
- POLYESTERS**
Linear aliphatic polyesters unit cell dimensions and crystalline densities
03 p0517 A70-13808
- Burning and degradation mechanism of polyester propellants correlated with mass regression rate dependent on surface temperature
11 p2099 A70-25990
- Gas and environmental temperatures, flow rate and sample geometry effects on limiting oxygen index in acrylonitril-butadiene-styrene copolymer, polystyrene and polyester
13 p2439 A70-29261
- Zero birefringent blend consisting of rigid and flexible polyesters with viscoelastic mechanical and optical response [SESA PAPER 1669]
15 p2765 A70-32318
- High temperature aromatic polyester Ekonol, discussing fabrication, properties and potential applications
21 p3842 A70-41136
- Linear aliphatic polyesters, calculating conformational contribution to heats and entropies of fusion
22 p3981 A70-42501
- Linear aliphatic polyesters melting point, fusion heat and entropy correlations to molecular parameters
22 p3982 A70-42502
- POLYETHER RESINS**
NT POLYMETHYL METHACRYLATE
Glass fiber reinforced polyether composites long time strength under plane stress
07 p1321 A70-20187
- POLYETHYLENES**
Polyethylene and polypropylene mechanical behavior under tensile and compressive loads and subject to hydrostatic pressure, obtaining tensile nominal stress-strain curves for various pressures
03 p0517 A70-14201
- Prestrain effect on waves propagation along slender low density unoriented polyethylene rod, indicating uniform phase velocity change over audio frequency range
07 p1248 A70-19237
- Thermal conductivities of glass reinforced polystyrene and polyethylene plastics measured over range of glass concentrations and sizes
07 p1320 A70-19958
- Polyethylene extended chain crystals melting process via electron microscopy and differential thermal analysis
12 p2258 A70-26896
- Longitudinal waves propagation in polyethylene bar using Boltzmann-Volterra equation, constructing dynamical stress-strain diagrams by viscous-elastic standard body model
12 p2328 A70-28276
- Diluent resins properties for blending with glass fiber reinforced high density polyethylene concentrate
16 p2935 A70-33353
- Mechanical properties of composite materials reinforced with ribbon fibers consisting of stainless steel and polyethylene ionomer resins
16 p2988 A70-33366
- Relative sensitivities of polyethylene shielded net radiometers, noting role of reflective white paint partial covering
18 p3261 A70-37087
- POLYGONIZATION**
Relieving microstrains in Ni powders by cold compaction at room temperature using X ray analysis, discussing polygonization process
01 p0117 A70-10161
- Polygonized and cellular Be structures formation, examining temperature, strain, annealing and material purity effects
15 p2758 A70-32122
- POLYGONS**
NT PARALLELOGRAMS
NT RECTANGLES
NT TRAPEZOIDS
NT TRIANGLES
Linear isothermal response of viscously damped thin homogeneous polygonal plates subjected to uniform dynamic loading, calculating forced solutions by numerical integration
03 p0601 A70-14318
- Optical polygon calibration by interferometric method using He-Ne laser light source
07 p1297 A70-19227
- POLYHEDRONS**
NT OCTAHEDRONS
NT PARALLELEPIPEDS
Duality theorem for complex quadratic programming over polyhedral cones
07 p1238 A70-19356
- Hidden-line determination for computer-drawn polyhedra using edge classification scheme for CRT display applications
09 p1641 A70-22966
- Surface, volume and body center temperature of convex polyhedrons under steady heat transfer
15 p2825 A70-31624
- POLYIMIDE RESINS**
Polyimide resins and composites state of cure determination by thermomechanical analysis (TMA)
11 p2069 A70-25807
- Low dielectric constant quartz-polyimide for radomes, considering curving methods
16 p2936 A70-33368
- Polyimide resin as matrix for glass fabric reinforced laminates
16 p2938 A70-33383
- Graphite fiber reinforced polyimide composites with low void content, high strength and modulus
16 p2938 A70-33384
- High strength graphite fiber reinforced polyimide resin composites fabrication
17 p3127 A70-34560
- Graphite-polyimide composites development for high temperature environments, discussing mechanical properties
19 p3455 A70-38425
- Polyimide resin vacuum thermal decomposition, using mass spectral and differential thermal analysis
21 p3783 A70-42133
- Thermally stable polyimide resins for carbon fiber composites, noting high temperature strength, oxidizing resistance and electrical insulation properties
22 p4058 A70-42478
- POLYIMIDES**
Cable involving woven multiconductor arrangement and aromatic polyimide insulations to connect thermal moon probe with transmitter for temperature measurements on lunar surface
05 p0798 A70-16034
- Polyimide prepreps reinforced with glass, carbon and graphite, describing processing characteristics, properties and applications
17 p3127 A70-35419
- Polyimideazopyrrolone films relative thermophysical properties, noting polymers thermal stability dependence on carbonyl groups percentage
21 p3783 A70-42132
- Book on polyimides covering synthesis and conversion processes, thermal and chemical stability, physical properties and applications
22 p4058 A70-42625
- POLYMER CHEMISTRY**
Ionene polymers, investigating cyclic and linear compounds and reaction products from tetramethyl-diaminoalkanes and dibromoalkanes using NMR, IR and mass spectroscopy
06 p1004 A70-17511
- Dicationic crosslinking agents isolation and characterization and formation of polymers with ionic crosslinks
06 p1004 A70-17512
- Air sample removal from hermetically sealed cavities during studies of toxic gas emanations from polymeric materials
07 p1221 A70-19516
- Gaseous pyrolysis products detection and identification during eruption from polymeric surfaces subjected to flash heating by time of flight mass spectrometer
07 p1319 A70-19887

POLYMER PHYSICS

- Propellants chemistry based on chemically cross-linked binder 07 p1360 A70-19909
- Extended chain polymer crystals temporary superheating before final melting, discussing hexagonal selenium crystals data 11 p2069 A70-25803
- Polymer structure and cross-link density effects on thermal analysis of phenol-formaldehyde polymers pyrolysis products 11 p2069 A70-25804
- Air sample removal from hermetically sealed cavities during studies of toxic gas emanations from polymeric materials 11 p1991 A70-26115
- Epoxide ring reactivity and crosslinking related to adjacent electrophilic and electronegative groups, considering epoxy resin technology 16 p2936 A70-33357
- Aromatic polymers synthesis for good thermal stability, describing single and double stranded chains 21 p3782 A70-42127
- Organic spiro polymers synthesis for thermal stability by condensation of aliphatic spiro tetraamines and aromatic dianhydrides 21 p3782 A70-42128
- Thermal stability of polymers based on aromatic diamines and isomeric dibenzoylbenzenes 21 p3782 A70-42129
- Thermally stable arylsulfonimide polymers incorporating 1, 2-disulfonimide group 21 p3782 A70-42130
- Heterocyclic polymer BBB properties, discussing IR absorption studies of structure 21 p3783 A70-42131
- Polyimide resin vacuum thermal decomposition, using mass spectral and differential thermal analysis 21 p3783 A70-42133
- Aromatic polysulfone thermomechanical behavior by torsional braid analysis, discussing structure, synthesis, thermal stability, radiation effects, etc 21 p3783 A70-42134
- Poly(perfluoroalkylene oxides) preparation and curing, considering molecular weight and thermal stability 21 p3783 A70-42145
- Book on polyimides covering synthesis and conversion processes, thermal and chemical stability, physical properties and applications 22 p4058 A70-42625
- Octadecatic anhydropolymers of amino acids, describing production by thermal condensation, heteropolymerization and panpolymerization 22 p3983 A70-42875
- IR absorption spectra of high-cis forms of deuterated polyisoprenes 23 p4157 A70-44274
- Photoelimination reactions of macromolecules, emphasizing intermediate pathways heuristic description via energy level diagrams 23 p4157 A70-44391
- POLYMER PHYSICS**
- Extended chain crystals of hexagonal Se temporary superheating before final melting, presenting melting equation 01 p0126 A70-10222
- Fluorocarbon polymer coatings, discussing role of fluorine content and carbon bond in chemical inertness, degradation resistance, thermal stability and low surface friction [SAE PAPER 690645] 05 p0868 A70-15842
- Frictional drag reducing polymer solution injection into boundary for turbulent pipe flow, discussing Reynolds number, injection rate, injection points and concentration 06 p1032 A70-17215
- Polyelectrolyte complexes formed from combined water soluble and negatively charged polyelectrolytes 06 p1005 A70-17513
- Long chain molecule additive effect on drag reduction in turbulent flow of aqueous polymeric solutions [ALAA PAPER 70-56] 06 p1037 A70-18030
- Matrix optimization of boron filament reinforced polymers for short duration high temperature aerospace applications 08 p1530 A70-21891
- Raman and IR spectrum analysis of polywater indicating impurities role in anomalous properties 11 p1994 A70-25655
- Viscoelastic polymeric materials tensile failure under multiaxial loading 12 p2321 A70-27205
- Weather effects on plastic properties, discussing weathering interactions with plastics and polymer degradation 12 p2259 A70-27206
- Microdefects as centers of disk shaped destructive cracks in polymer dielectrics under laser irradiation 13 p2437 A70-28621
- Polymer optical properties in terms of interaction matrix coupling monomers, applying to polypeptide alpha helix, beta sheets and polyproline helices 14 p2544 A70-30118
- Long chain molecule additive effect on drag reduction in turbulent flow of aqueous polymeric solutions 17 p3066 A70-34525

- Optical properties of amorphous polymers, considering one state calculations for flexible polypeptides in solution and disordered regions of films or proteins 21 p3780 A70-41702
- Heterocyclic polymer BBB properties, discussing IR absorption studies of structure 21 p3783 A70-42131
- Polymers low temperature relaxation behavior, discussing molecular structure, crystallinity, copolymerization, etc 21 p3844 A70-42135
- Amorphous and partly crystalline polymers low temperature thermal conductivity and heat capacity 21 p3844 A70-42136
- Polyvinyl alkyl ethers multiple transitions at low temperatures, using linear variable differential transformer 21 p3844 A70-42137
- Diluent molecules effect on polymers relaxation behavior at cryogenic temperatures from internal friction measurements, noting loss peaks shift 21 p3844 A70-42138
- Gaseous and liquid fluorine exposure effects on nitroso rubbers at ambient and cryogenic temperatures, using impact tests and IR spectroscopy 21 p3844 A70-42140
- Polymers as cryogenic adhesives, evaluating role of chain structure below glass transition temperature 21 p3783 A70-42142
- Isothermal kinetic rates of polymer swelling and dissolution, using thermomechanical analyzer 22 p4059 A70-43078
- Isothermal kinetic rates of penetration of polymer by spherical indenter, using thermomechanical analyzer 22 p4059 A70-43079
- POLYMERIC FILMS**
- NT MYLAR [TRADEMARK]
- Optical transmission spectra of polypeptide films showing exciton structure near 1600 A for alpha and polyproline II helices 02 p0345 A70-12723
- Plastic film precise perforation using carbon dioxide laser and optical tooling permitting double exposure to laser beam 03 p0497 A70-13565
- Thermoplastic polymers adhesion to glass fibers determined by measuring force necessary to pull fiber from flat film of polymer 06 p1091 A70-17317
- Series emittance thermal control coatings of polymeric dielectric films overlaying reflectors vacuum exposed to UV, X ray and proton radiation [ALAA PAPER 70-64] 06 p1106 A70-18069
- High purity pinhole free films /parylene/ applicability as barrier coating to keep semiconductor surface free from moisture, ions and contaminants 11 p2099 A70-26395
- Polyimidazopyrrolone films relative thermophysical properties, noting polymers thermal stability dependence on carbonyl groups percentage 21 p3783 A70-42132
- POLYMERIZATION**
- NT COPOLYMERIZATION
- NT DIMERIZATION
- Adiabatic calorimeter for exothermic chemical reactions determining heats of polymerization, curing rate and thermal decomposition rates as temperature function for high energy propellants 04 p0688 A70-14711
- Hydrogen sulfide participation in vinyl polymerization investigated for reaction mechanism 05 p0810 A70-16051
- Mechanical methods locking studs, discussing chemical locking based on hardening of resins by polymerization 06 p1076 A70-17437
- Peptide formation by stepwise tetramer-mediated condensation of alpha-amino acid as possible prebiotic process 07 p1204 A70-19202
- Two body collisions reaction mechanisms with small heats of reaction for Be and Al gaseous oxidation, noting low free energy properties of polymerization 10 p1928 A70-24089
- Polymerization reaction kinetics investigated with differential scanning calorimeter at isothermal conditions, determining heat of polymerization 11 p1994 A70-25810
- Methyl methacrylate and other vinyl monomers polymerization activation by low sulfur dioxide concentrations, noting inert solvents effect 14 p2544 A70-30246
- Amino acids asymmetric polymerization on clay minerals, discussing aspartic acid and kaolinite experiments 19 p3455 A70-38030
- Octadecatic anhydropolymers of amino acids, describing production by thermal condensation, heteropolymerization and panpolymerization 22 p3983 A70-42875

POLYMERS

- Temperature-time-variable stress-strain state of polymer structures, solving creep equation by linear model with rheological properties 01 p0211 A70-11426
- Polymers yield criterion determination using Hill method exemplified by polyvinyl chloride, discussing effects of transversal anisotropy and rheological properties 02 p0320 A70-11740
- Polymers development for ablative heat shields, aeroshell structures, antennas, insulators, electronic packaging, etc, to meet Mars and Venus atmospheric entry requirements 02 p0382 A70-12525
- Synthetic polymers properties and processing, discussing thermoplastics, elastomers, thermosets, etc 02 p0322 A70-12715
- Polymers application as engineering materials, discussing properties, physical states, etc 02 p0322 A70-12716
- Integral equation solution in viscoelasticity theory based on creep tests with polymer containing elastic inclusion, improving convergence of approximations method 02 p0390 A70-12801
- Interactions between adhesive polymers and fillers, emphasizing reinforced plastics composites properties [ONERA-TP-733] 03 p0516 A70-13644
- Variable strain bending form design for determining environmental craze resistance of polymers 04 p0713 A70-15375
- High temperature polymers including polybutadiene, polyphenylene sulfide, polysulfone, polybenzimidazole, etc 05 p0869 A70-16038
- Micromechanisms of fracture in metals and polymers before plastic deformation onset, discussing macroscopic polymer properties from microstructure and molecular structure 05 p0937 A70-16365
- Nontoxic method of immobilizing protozoan *Tetrahymena pyriformis* and bacterium *Escherichia coli* in acrylamide polymers, discussing microorganism viability 05 p0802 A70-16477
- Polymers with high temperature oxidation resistance, discussing problems caused by aromatic heterocyclic structures and manufacturing methods 05 p0873 A70-16604
- Pulsed supersonic plasma jets induced surface ablations and cracks in polymers, using X ray and IR analysis 06 p1091 A70-17763
- Crack self healing in aluminum foil-polyvinyl acetate sandwich structures 07 p1315 A70-18713
- Thickening of fluids with tetrafluoroethylene polymer to provide physically and chemically stable grease type lubricants for military applications 07 p1292 A70-18863
- Abrasive wear of polymers subject to plastic and elastic deformation, considering papers, metal gauze and rough metal surfaces 07 p1296 A70-20003
- Dynamic mechanical properties of filled polymers as function of filler concentration, particle agglomeration and ratio of particle to polymer modulus 08 p1527 A70-21335
- Polymeric materials flow at tube entrance, discussing pressure drop and flow birefringent patterns at tapered and sharp entrances 08 p1486 A70-21861
- Volatile toxic products outgassed by polymer construction materials, discussing physico-chemical classification of outgassing reduction methods 09 p1709 A70-22085
- Ammonium perchlorate-polymer mixtures combustion rates with/without cobalt oxide additions, studying ignition temperatures of stable flameless burning 09 p1787 A70-22108
- Temperature field and heat conduction equation for two layer polymer cylinder multiply heated from within, considering material decomposition 10 p1966 A70-23870
- Amorphous polymers thermal conductivity measured at 0.4-4 K, observing similar temperature dependences 10 p1906 A70-23979
- Velocity measurements with Pitot tubes in polymer solutions /polyethylene oxide/ in water, noting viscoelastic properties effect on measured pressure value 10 p1887 A70-24093
- Macrolon elastic-plastic strain model, studying stress-strain relationship and optico-mechanical properties 11 p2128 A70-25385
- Polywater electronic structure model, proposing hydrogen bonds resembling short strong bonds in FHF⁻/ions 11 p1994 A70-25656

Anomalous water /polywater/ dielectric constant and effective parallel conductance, suggesting hydrosol classification

11 p1994 A70-25657

Thermal Analysis - Conference Worcester, Mass., August 1968, Volume 1, Instrumentation, organic materials and polymers

11 p2069 A70-25801

Gruneisen ratios for polymeric materials, comparing values determined by ultrasonic and thermal studies

11 p2069 A70-25805

Polymeric materials thermal degradation kinetic parameters using combined mass spectrometric and thermogravimetric analysis /MS-TGA/

11 p2069 A70-25806

Thermal protection polymers ablator efficiency evaluation using high vacuum DTA cell coupled to high resolution mass spectrometer

11 p2070 A70-25813

Polymer shells lasting stability mathematical simulation, discussing similarity criteria of nonlinearly and hereditarily elastic materials

12 p2259 A70-27528

Hollow homogeneous polymer cylinder thermoelastic stressed state, analyzing radial temperature and Poisson Coefficient variations

12 p2325 A70-27532

Glass- and quartz-fabric reinforced polymers for high temperature microwave insulation, evaluating electrical and thermal aging properties

12 p2259 A70-28149

Polymer-metal adhesive joints rupture characteristics, considering polymer in solid or structurally fluid /elastic/ state during tests

12 p2244 A70-28341

Fracture kinetics model for polymers emphasizing quantum effects even at room temperature

13 p2510 A70-28670

Linear high polymers heat capacity measurements theory emphasizing simple mechanical systems and contribution of lattice vibrations

13 p2438 A70-28997

Teflon and fluoropolymers relative toxicity due to thermal degradation at 370 C, testing carboxy nitroso rubber, Kapton polyimide film, perfluorated polymers, etc

13 p2439 A70-29260

Transparent polymeric materials failure under neodymium-glass laser radiation in free generation mode

13 p2427 A70-29300

Polymer materials fatigue strength and deformability testing in vacuum, air and gas atmospheres at low and high temperatures, subjecting to cyclic loading

13 p2385 A70-29428

Turbulent flow theory of dilute linear polymer solutions in smooth and rough tubes based on Reynolds equation

15 p2719 A70-31491

Macromolecular polymer based heat resistant materials

15 p2765 A70-32264

Zero birefringent blend consisting of rigid and flexible polymers with viscoelastic mechanical and optical response

15 p2765 A70-32318

Volatile toxic products outgassed by polymer construction materials, discussing physico-chemical classification of outgassing reduction methods

15 p2766 A70-32681

Polymeric binders adhesion to glass fibers as function of type and chemical structure

16 p2938 A70-33379

Reinforced polymer composites design for aircraft structures [ASME PAPER 70-DE-67]

16 p2939 A70-33518

Polymeric materials fatigue tests, investigating correlation between crack propagation and stress intensity factor

17 p3127 A70-34624

Structural members of isotropic and anisotropic polymers, investigating creep behavior under simple stressed state

17 p3192 A70-35740

Polymers dynamic properties in hyperelastic and vitreous states as function of temperature, using torsion pendulum method

18 p3263 A70-36469

Polymers industrial applications in textiles, building materials, furniture, aviation, automobile industry and packaging

19 p3455 A70-38700

Thermoresistor parameters of organic semiconductor polymers with conjugated band system, plotting temperature and EV characteristics

20 p3595 A70-38966

Transparent polymers stress-strain state induced by elastic waves, using model with space and time dependence of laser beam

20 p3654 A70-39248

Smoke chamber measurements of opacity developed in polymer pyrolysis or combustion, including Materials Smoke Obscurity Index /MSOI/

20 p3736 A70-39404

Chemical and physical factors effect on smoke evolution from polymers

20 p3736 A70-39405

Toxicity problems from burning or heating of polymeric materials, discussing laboratory experiments and standardized toxicity testing procedures

20 p3579 A70-39406

High strength and stress corrosion resistant materials, considering Ti, Ni, Al alloys, metal-matrix composites and polymers

20 p3655 A70-39666

Polymeric materials yielding and fracture behavior under uniaxial and multiaxial fields, plotting octahedral shear stress

20 p3656 A70-39949

Thermally prepared poly-alpha-amino acids catalytic activity after long term dry state storage, suggesting enzyme activity role in biological evolution

21 p3772 A70-40713

Free vibrating reed apparatus for polymer low temperature internal friction and Young modulus measurements, discussing polystyrene properties

21 p3827 A70-41464

Holographic photopolymer recording systems, discussing sensitivity, reconstruction, fixing, etc

21 p3829 A70-41926

Polymers in space research - ACS Conference, Pasadena, July 1968

21 p3781 A70-42126

Carbon fiber reinforced polymer /CFRP/ failure mechanism, discussing nondestructive testing, destructive and cyclic loads

22 p4058 A70-42476

Dynamic melt properties of polymer blends, using orthogonal rheometer measurements

22 p4058 A70-43076

Dynamic elastic moduli of model two phase continuous composites, using polymer and metallic foams

22 p4059 A70-43077

Cyanoacrylate and anarobic polymer single component adhesives performance

22 p4046 A70-43120

High modulus carbon fibers production and properties describing polymer chains intermolecular structuring by pyrolysis and strength increase by fibers stretching at 2700 C

24 p4366 A70-45166

Polymers strength and stiffness properties, considering different molecular chain alignments as related to elastic modulus

24 p4366 A70-45173

Polymer crystal lattice defects and vacancies diffraction patterns observation and interpretation, using optical transformations

24 p4353 A70-45566

POLYMETHYL METHACRYLATE

Polymethylmethacrylate block breakdown under focused pulsed laser radiation in free emission regime, noting light absorption during crack development

02 p0314 A70-12813

Polymethyl methacrylate fuel for hypersonic air breathing propulsion systems, studying ablation, mixing and combustion processes

03 p0603 A70-12942

Transverse vibration of viscoelastic polymethyl methacrylate column with initial curvature under periodic axial load, determining amplitude- frequency curves

[ASME PAPER 69-WA/APM-13]

04 p0772 A70-14915

Transmission losses of plexiglass radome measured as function of frequency and antenna elevation angle, determining material dielectric constant

06 p1019 A70-17505

Transparent polymethylene methacrylate and polystyrene stressed state effect on failure characteristics under laser beam irradiation

08 p1526 A70-20936

Thermal decomposition of ammonium perchlorate and polymethylmethacrylate mixture thin layer between Ti plates in vacuum

09 p1741 A70-22109

Hypersonic wind tunnel testing of Plexiglas and nylon hemispheres instrumented with strain gages and thermocouples, comparing with calculated strain, temperature and ablation

13 p2520 A70-28727

Teflon and polymethyl methacrylate sublimation breakdown in plasma jets, using electric arc heated argon, nitrogen, air and oxygen

15 p2765 A70-32103

Shock propagation in Al fiber/polyethyl methacrylate composite, calculating pressure, densities, internal energies and particle velocities

17 p3182 A70-34556

Polymethyl methacrylate rupture during omnidirectional compression under laser radiation, showing pressure effect on microdefects and cracks

21 p3841 A70-40644

Polymethyl methacrylate glasses microcracks removal by dry friction

21 p3841 A70-40645

Compressive and rarefaction shock wave propagation in polymethyl methacrylate, fused silica and sapphire, using laser interferometer measurements

22 p4031 A70-43020

Specific heat of amorphous polymethyl methacrylate and polystyrene by pulse method below 4 K, comparing Debye and acoustic values

24 p4367 A70-45598

Fracture mechanics of craze growth of stressed polymethyl methacrylate in methanol

24 p4368 A70-45778

POLYMORPHISM

Polymorphic transformation effects on oxygen diffusion rate in alpha and beta phases of Ti, considering temperature effects and activation energy

04 p0707 A70-15211

Alloying elements effect on polymorphic alpha-beta transformation temperature of Ti systems, discussing heat resistance

07 p1307 A70-19555

Physical metallurgy, discussing metals, intermetallic compounds and polymorphic metals properties, single crystals production, etc

12 p2257 A70-28272

POLYNOMIALS

NT DYADICS

NT HERMITIAN POLYNOMIAL

Linear physical chains with Sturm-Liouville characteristic polynomials used for natural frequency determination of coupled harmonic oscillators or electrical analog

01 p0142 A70-10520

Mass action low-polynomial optimization analogy, illustrating optimal temperature determination in chemical reactors in series

01 p0143 A70-10925

Digital computers for calculating coefficients of electronic circuit functions polynomials, developing algorithm

04 p0659 A70-15205

Exact polynomial solution Saint Venant flexure of pretwisted rectangular plate treated as shallow hyperbolic paraboloidal shell

05 p0928 A70-16056

Algorithm for factorizing polynomials over finite fields usable with computer

05 p0876 A70-16312

Waveform-shaping transfer function rational polynomial approximation method with application to network problem in PCM communications

06 p1007 A70-17459

Finite element method using cubic polynomials over triangle as trial functions for solving second order boundary value problems in linear theory of elasticity

07 p1324 A70-19075

Algebraic criterion for polynomial with complex coefficients having all zeros in certain regions of complex plane

07 p1324 A70-19201

Geopotential fields expansion on 500 mb surface for hemisphere in terms of Chebyshev polynomials along meridian and trigonometric polynomials along latitude

07 p1329 A70-19648

Fourth order polynomial RC-RL decomposition conditions

07 p1326 A70-19686

Orthogonal polynomials in three dimensional contact problems without friction, discussing construction of kernels over finite and semiinfinite intervals

08 p1594 A70-21634

Polynomial force model supplementing reduced gravity model in determining accuracy of near equatorial, near synchronous and near circular satellite orbits

09 p1762 A70-23256

Three stage variable shift iteration algorithm for calculating zeros of polynomial with complex coefficients

09 p1712 A70-23419

Trigonometric interpolation of polynomials by Lagrangian type orthonormal functions, noting satellite geodesy applications

10 p1909 A70-24185

Simultaneous singular integral equations approximate solution in orthogonal polynomials

10 p1909 A70-24603

Asymptotic behavior of polynomial root locus in presence/absence of time lag, outlining procedures for constructing root locus diagrams

10 p1910 A70-24845

Polynomial model of uniform target motion for smoothing and extrapolating coordinates and parameters using independent radar range and velocity readings

10 p1843 A70-25136

Bessel generalized polynomial series convergence and summability on contour of convergence region

11 p2071 A70-25521

Coefficients for finite difference methods of numerical integration of products of Fourier and ordinary polynomials

11 p2074 A70-26848

Dynamic systems absolute stability, optimality and passivity algebraic criterion in terms of real even polynomial coefficients

12 p2261 A70-27412

Liapunov functions construction through conversion of differential equation with polynomial nonlinearities into auxiliary exact differential equation using algorithm

12 p2262 A70-28070

Algorithms based on Newton formula for polynomial interpolation and numerical differentiation

13 p2441 A70-29100

Bifurcation and stability analysis of point mappings with polynomial succession function, using parametric diagrams

13 p2383 A70-29751

Algorithm for improving approximate quadratic factor of polynomial with real coefficients using iterative method

14 p2600 A70-31227

Reduction procedure for determining sign definiteness and semidefiniteness of higher order real polynomials

17 p3129 A70-34954

Hurwitz matrix of real Hurwitzian polynomial, discussing relation between eigenvalues and zeros locations

18 p3279 A70-36062

Polynomial and logic theories of dynamic systems, explaining linear and nonlinear elements of automatic control systems

19 p3392 A70-37447

Ordinary differential equations piecewise polynomial approximation using subpartitioning to liquidate residuals

19 p3458 A70-38356

Elasticity theory equations polynomial solutions for use in boundary value problems

20 p3726 A70-39874

Polynomial tensor functions generated by vector functions in space of invariants, noting applicability to isotropic media

20 p3728 A70-39895

Polynomials with interval coefficients, presenting Newton Raphson algorithm for real roots error bounds

20 p3659 A70-40133

Recursive test for nonnegative polynomials using modified Routh scheme to determine real positive zeros

22 p4063 A70-43332

Linear methods for approximate solutions of ordinary differential equations and Fredholm integral equations by polynomials

23 p4211 A70-44249

Approximations by spline functions and polynomials, discussing modulus of continuity

24 p4369 A70-45126

Necessary and sufficient conditions on coefficients of real nonnegative polynomial p/ω , obtaining algebraic criterion for stability, optimality and passivity of dynamic linear systems

24 p4322 A70-46156

POLYPHENYL ETHER

Sliding wear of bearing Al lubricated with polyphenyl ethers in boundary region tested by pin and cylinder wear machine producing continuous record

05 p0854 A70-15910

POLYPROPYLENE

Glass-reinforced polypropylene for structural applications, investigating time/temperature dependent creep characteristics

01 p0128 A70-10773

Chemically coupled glass-reinforced polypropylene, studying short term physical properties, creep rupture and deformation, dynamic failure, etc

02 p0322 A70-12605

Polyethylene and polypropylene mechanical behavior under tensile and compressive loads and subject to hydrostatic pressure, obtaining tensile nominal stress-strain curves for various pressures

03 p0517 A70-14201

Small angle X ray scattering pattern of polypropylene drawn at various temperatures in closely spaced draw ratio values through neck region

03 p0517 A70-14202

Dynamic compressive properties of polypropylene, polystyrene bead and extruded polystyrene foams tested at given strain rate under room temperature

08 p1527 A70-21329

Polypropylene window proportional counter on board sounding rocket for cosmic soft X ray measurement

15 p2741 A70-32530

POLYSACCHARIDES

NT CELLULOSE

NT GLYCOSENS

UV radiation effects on mucopolysaccharide compounds in tears and on cornea epithelium of albino rabbits

01 p0037 A70-10860

Acid mucopolysaccharides in distal segments of medullary substance of kidneys of rodents under high ambient temperature, showing stable morphological characteristics

07 p1204 A70-19141

Ionizing X radiation influence in lethal and sublethal doses on cerebral hyaluronic acid in mice and guinea pigs

14 p2536 A70-30186

Biochemical heterogeneity of corneal mucopolysaccharides (glycosaminoglycans), using extraction without proteolytic enzymes

24 p4304 A70-46344

POLYSTYRENE

Liquid nitrogen evaporation in PSB foam polystyrene vessels compared with glass vessels for cryogenic application

02 p0305 A70-11875

Polystyrene and polyamide stress relaxation graphs, considering tensile stresses and temperature effects

04 p0712 A70-15101

Light collecting properties of polystyrene scintillator designed for counting particles of electron-photon showers generated by high energy cosmic ray particles

05 p0846 A70-15944

Thermal conductivities of glass reinforced polystyrene and polyethylene plastics measured over range of glass concentrations and sizes

07 p1320 A70-19958

Transparent polymethylene methacrylate and polystyrene stressed state effect on failure characteristics under laser beam irradiation

08 p1526 A70-20936

Dynamic compressive properties of polypropylene, polystyrene bead and extruded polystyrene foams tested at given strain rate under room temperature

08 p1527 A70-21329

Crystallite orientation distribution function refinement procedure, considering application to isotactic polystyrene

09 p1631 A70-23446

Gas and environmental temperatures, flow rate and sample geometry effects on limiting oxygen index in acrylonitril-butadiene-styrene copolymer, polystyrene and polyester

13 p2439 A70-29261

Stress analysis of polystyrene plate weakened by doubly periodic system of equal circular holes

15 p2817 A70-32166

Anthracene, polystyrene and stilbene for scintillation counters measuring cosmic ray protons, analyzing dosimetric properties

17 p3151 A70-35352

Specific heat of amorphous polymethyl methacrylate and polystyrene by pulse method below 4 K, comparing Debye and acoustic values

24 p4367 A70-45598

POLYSULFIDES

Tuned resonant test for measuring damping characteristics of lead and asbestos filled epoxy-polysulfide copolymer

08 p1527 A70-21336

POLYTETRAFLUOROETHYLENE

Polytetrafluoroethylene wear tested by rubbing cylindrical rod flat ends against glass plates, determining sliding contact pressure effects

06 p1077 A70-18403

Sliding friction and wear of polytetrafluoroethylene ball bearing filled with graphite investigated for irradiation effects

06 p1077 A70-18404

Thickening of fluids with tetrafluoroethylene polymer to provide physically and chemically stable grease type lubricants for military applications

07 p1292 A70-18863

Ablation products and high temperature boundary layer chemistry of polytetrafluoroethylene (Teflon) in arc jet streams using mass spectrometer

07 p1319 A70-19886

Stress relaxation in polytetrafluoroethylene (PTFE) at various compression deformations and temperatures, considering residual stresses degree

07 p1321 A70-20228

Silver/polytetrafluoroethylene water-repellant air-breathing cathodes for fuel cells with alkaline electrolytes, discussing pressure compatibility

10 p1829 A70-24454

Concorde engine bay thermal insulation combining stainless steel foil and polytetrafluoroethylene film, considering noise level, engine fire conditions and molten Ti globules penetration

18 p3346 A70-36345

POLYTROPES

Variational approach to structure of rotating polytrope with symmetry about axis of rotation in postNewtonian approximation of general relativity

02 p0338 A70-11778

Relativistic generalized gravity theory, studying polytropic models

09 p1754 A70-22458

Secular stability of rotating polytropes in relative equilibrium, isolating bifurcation point by calculating lowest sectorial modes for various sequences

10 p1937 A70-23946

Synchronous close binary stars primary component structure, using rapidly rotating polytrope method

23 p4250 A70-44816

Solar oblateness calculation based on Stockly differential rotation law application to polytropes

23 p4253 A70-44835

POLYTROPIC PROCESSES

Self similar wave solutions of continuity and momentum equations for two dimensional unsteady isentropic motion of polytropic gas

02 p0278 A70-11998

Radiation effects on polytropic atmosphere convective instability using method of disturbances

09 p1753 A70-22456

POLYURETHANE FOAM

Temperature dependence of diffusion coefficient for carbon dioxide filled rigid polyurethane foam, using Fick law

02 p0321 A70-12524

Foamed-in-place polyurethane for form fitting pilot helmet shock absorbing liner noting medical applications

07 p1218 A70-19015

Fire performance of spray applied rigid urethane foam applied as storage vessel insulation, noting continued functioning until destruction

09 p1710 A70-23345

Rigid fire-retardant polyurethane foams obtained from phosphonopropionate polyols, discussing physical properties and shelf stability tests

10 p1907 A70-24063

Solid and foam polyurethane creep stress, using multiplier for foam stress for comparison

11 p2141 A70-26601

Closed cell polyurethane foam for cryogenic insulation, determining thermal conductivity and net heat flow by analytical model and test

23 p4280 A70-44367

POLYURETHANE RESINS

Airline aircraft finishes for protection against corrosion, air pollution, discussing paint application and polyurethane technology

03 p0497 A70-14053

Polyurethane rubber time- and temperature-dependent visco- and photoviscoelastic coefficients using two dimensional strain and stress wave propagation photoviscoelastic analysis

03 p0599 A70-14243

Paint technology findings and recommendations for airline aircraft surface finishes emphasizing use of polyurethanes

05 p0869 A70-16106

Polyurethane propellant binders burning rate, studying siloxane moiety effects

07 p1358 A70-19330

Polyurethane-based solid rocket propellants, discussing catalyst modification, mix viscosities, moisture embrittlement, etc

07 p1360 A70-19910

Solid and foam polyurethane creep stress, using multiplier for foam stress for comparison

11 p2141 A70-26601

Polyurethane and metal surface layers deformation related during sliding friction in presence of liquid media, noting friction coefficient-deformation relation

12 p2244 A70-28284

Nonaggressive liquid media effect on residual strains and phase transformations initiation and development in polyurethane parts operating in lubricants, discussing wear resistance

13 p2439 A70-29431

Elastic and optical properties of polyurethane rubber under large deformation using natural stress concept derived from stress-strain linear relationship [SESA PAPER 1608]

15 p2821 A70-32319

Extinction pressures of polyurethane propellants increased by presence of AP, AP coated with silane and KP [AIAA PAPER 70-657]

16 p2963 A70-33619

Linear compressibility assumption incorporated into third order multiple integral representation of nonlinear creep of polyurethane, reducing time independent kernel functions

17 p1386 A70-34972

Polyurethane swelling in liquid media, measuring surface orientation effects during chemical machining on stress strain state

20 p3654 A70-39249

Epoxy and polyurethane adhesives stress-strain behavior in lap joints, examining bond thickness and cryogenic temperature effects

21 p3844 A70-42139

Polyurethane adhesives differential thermal analysis, rebound resilience and tensile properties at cryogenic temperatures

21 p3844 A70-42141

Resilience and tensile properties of polyurethane adhesive at cryogenic temperatures measured by differential thermal analysis

23 p4209 A70-44275

POLYVINYL CHLORIDE

Polymers yield criterion determination using Hill method exemplified by polyvinyl chloride, discussing effects of transversal anisotropy and rheological properties

02 p0320 A70-11740

Creep and recovery of polyvinyl chloride reinforced by oriented cotton fibers, considering roles of fiber density and stress magnitude

03 p0516 A70-13499

Polyvinyl chloride plastisol propellants consisting of fine solid oxidizer and powdered metal, discussing composition, propellant flow, curing time and temperature dependence

07 p1360 A70-19908

Thin circular cylindrical polyvinyl chloride plastic shells tested under axial compression and end-shortening conditions for buckling

12 p2324 A70-27473

Polyvinyl chloride sheet steel manufacture, properties and welding methods

22 p4045 A70-42479

Polyvinyl chloride /Novodur/ mechanical properties application to structural model testing

24 p4367 A70-45445

POLYWATER

Polywater properties, discovery and preparation

23 p4150 A70-44224

Venus polywater hydrosphere, discussing vapor phase, surface temperature, evolution, observations and model data

23 p4242 A70-44260

PONDEROMOTIVE FORCES

Ponderomotive meter for laser energy and power measurement, discussing mechanical design and elimination of radiometric and convection disturbances

03 p0500 A70-13481

Laser pulse energy ponderomotive meter using mechanical action exerted by light on movable sapphire plate in air at atmospheric pressure

09 p1700 A70-23657

Ponderomotive forces of plane electromagnetic wave incident at arbitrary angle on metal grating, based on diffraction results

19 p3377 A70-37723

PONTRYAGIN PRINCIPLE

Two point boundary value problem arising from Pontryagin maximum principle application in optimal control, describing solution based on combined existing methods

03 p0460 A70-13699

Pontryagin principle applied to minimum structural weight design problem in optimal control theory with state and control inequality constraints

[ASME PAPER 69-WA/AUT-1] 04 p0769 A70-14832

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle

04 p0661 A70-15011

Terminal states and time specifications influence on optimum control systems, using Pontryagin principle for boundary value problems application

05 p0824 A70-15874

Time-variable constrained control matrix optimization using Pontryagin principle applied to minimal time transfer, payoff and rotation maximization

07 p1247 A70-20024

Pontryagin principle for thin vibrating plates under mixed boundary conditions, examining optimal control

14 p2660 A70-31205

Pontryagin stability criterion interpretation for systems with time delay in parameter plane, using computer oriented method

16 p2882 A70-33046

Optimal control problem solution methods, comparing Euler-Lagrange equations, Pontryagin principle, dynamic programming and invariant imbedding

17 p3057 A70-35589

Noisy stochastic pattern recognition system, determining optimal measurement sequence by discrete Pontryagin maximum principle

18 p3234 A70-36337

Computerized Pontryagin stability analysis of nonlinear multiple delay systems

18 p3235 A70-36477

Pontryagin stability for distributed delay or parameter systems, using Brin criterion

18 p3235 A70-36478

Control error effect on performance index in Pontryagin principle calculation of optimum control

19 p3394 A70-38501

Sufficient condition for optimal control with continuous nonlinearities, using Pontryagin maximum principle

19 p3394 A70-38717

Optimal control problem for plant including dynamics and input constraints parameters treated by calculus of variations and Pontryagin maximum principle

21 p3801 A70-40899

Maximum principle for discrete systems of recurrence equations, applying Pontryagin principle

22 p4073 A70-42696

POPULATION INVERSION

Population inversion induced in middle channel of cascade gas laser, using probability method

01 p0106 A70-10059

He-Ne laser amplifier photon density, bandwidth and gain as functions of inversion and excited Ne atoms density

01 p0114 A70-11357

Atomic configurations population inversions of astrophysical interest, assuming excitation by electron

collisions, solving rate equations for level populations by computer

02 p0341 A70-11794

Steady state inversion coefficient for active substance in quantum paramagnetic amplifier with push-pull pumping determined by nonstationary methods

03 p0455 A70-13088

Supersonic plasma jets studied spectroscopically, determining atomic levels populations, population inversion conditions, electron temperature and concentration distributions, etc

03 p0531 A70-13254

Vibrational relaxation and optimum population inversion of carbon dioxide molecules under unsteady conditions during pulsed electron excitation, discussing laser output increase

03 p0528 A70-13408

Population inversion coefficient as function of optimal impurity concentrations and efficiency of ruby quantum paramagnetic amplifier in 3 cm range

03 p0499 A70-13457

Population inversion distribution effect on resonator losses of Nd-glass laser, showing threshold limits

03 p0500 A70-13527

Superfluorescence losses in large aperture disk laser systems using Monte Carlo method, determining maximum population inversion from enhanced photon flux density considerations

03 p0503 A70-14209

Pulsed Ar ion lasers at high currents, measuring plasma parameters, electrical conductivity, electron temperature and density for inversion mechanism

04 p0703 A70-15617

Operational characteristics, spectroscopy and inversion mechanisms of noble gas ion lasers in light of plasma theories and atomic data

[AIAA PAPER 70-82] 06 p1083 A70-18236

Unified model for pulsars involving electron population inversion and laser type transition

07 p1375 A70-18893

Argon ion CW lasers, discussing design, inverse population, plasma, radiative transition probabilities, pumping, frequency spectra and active medium

07 p1298 A70-19642

Upper cesium levels population inversion during cesium discharge plasma decay

08 p1550 A70-20848

Neodymium-glass laser under action of electron beam investigated for population inversion

08 p1512 A70-21204

Population inversion in neodymium glass impurities in four level laser dependent on electron beam intensity and energy

08 p1512 A70-21205

He-Ne laser investigated for He and Ne population inversion as function of discharge parameters

09 p1694 A70-22006

Mode coupling and intensity pulsations observed between two 6328 A He-Ne lasers through nonlinear gain characteristics of inverted population

09 p1699 A70-23363

Population inversion generation through gaseous oxides mixing with nitrogen flow thermally excited

09 p1700 A70-23569

Molecular densities and population inversion pulse shape in working gas in mixture with thermally excited auxiliary gas

10 p1920 A70-25112

Population inversions in rapidly expanded flows of nonequilibrium gases, discussing kinetic processes in cooled mixtures of shock heated nitrogen and carbon dioxide

11 p2041 A70-26572

Population inversion effect on angular divergence of neodymium glass laser radiation, observing energy independence for refractive index of medium surrounding active rod

12 p2250 A70-28154

Q switched CO-HE laser IR fluorescence, considering population inversion recovery by vibrational energy transfer

13 p2423 A70-28496

Energy resonances between laser levels of carbon dioxide and diatomic and triatomic molecular impurity species, discussing population inversion due to superelastic collisions

13 p2425 A70-28622

Carbon dioxide molecular vibrational energy levels above carbon monoxide-oxygen premixed flame, discussing vibration modes leading to population inversion and relaxation time variance

13 p2455 A70-29132

HF and DF continuous chemical lasers output power, obtaining population inversion by deuterium molecules diffusion into F atoms supersonic free jet

14 p2593 A70-30273

Chemical energy conversion in lasers, discussing vibrational inversions in diatomic and multiatomic molecules and chain reactions

16 p2927 A70-33233

Helium to electron excitation ratios for population inversion in helium-neon laser

19 p3445 A70-37758

Argon ion laser inversion saturation at large current densities due to upper working levels depletion

19 p3449 A70-38744

Convergent-divergent nonequilibrium nozzle flow numerical solution by time dependent technique, investigating rapid vibrational nonequilibrium supersonic expansion of gas mixture with population inversion

20 p3609 A70-39655

Metastable excitation levels in np/4 configuration for population inversion, discussing free electron collisions, forbidden line intensity and flow density pressure

20 p3642 A70-39751

Gas and semiconductor diode lasers construction and operation principles, discussing terminology, Boltzmann distribution function, excitation methods, population inversion, etc

20 p3643 A70-40535

Carbon monoxide vibrational population inversion in product molecule produced in free burning carbon disulfide/oxygen flame

21 p3950 A70-41708

Lasing transitions time delay in carbon monoxide laser under pulsed electrical excitation, attributing inversion to anharmonic decoupling

22 p4048 A70-42330

Approximate lasing condition from coupled rate and radiative transfer equations, determining population, energy density and power output

22 p4050 A70-43006

CW chemical lasers operation from partially inverted transitions of HCl, HF and DF molecules in subsonic flow

22 p4050 A70-43008

Al-27 NMR saturation effects on ruby electron cross relaxation and inversion

23 p4230 A70-43932

Flow-through carbon dioxide lasers population inversion relation to individual gas components and electron velocity distribution functions

24 p4352 A70-45458

POPULATIONS

Ar ion laser with high discharge current density observed for working level populations by simultaneously measuring power gain and spontaneous emission lines intensity

01 p0106 A70-10063

Slitless spectrograms of chromosphere obtained during 1962 eclipse to determine H level populations decrements, self absorption in Balmer lines and chromosphere model

01 p0175 A70-10245

Rotational temperature of molecular nitrogen Vegard-Kaplan bands determined from auroral spectra, including variations in vibrational levels populations

[AFCLR-69-0542] 01 p0076 A70-10873

Inter census population estimate by air photos, topographic maps and local and state census of population and housing

10 p1878 A70-24737

Census analysis and population data acquisition using aerial photography

14 p2576 A70-30978

Carbon monoxide-nitrogen system vibrational distribution of populations and kinetics in fundamental and harmonic regions, investigating vibroluminescence

21 p3837 A70-41718

PORES

U POROSITY

POROSITY

Rhenium powder sintering activated by palladium additions producing low porosity

01 p0117 A70-10158

Hydrogen, oxygen and nitrogen effects on gas shielded arc weld porosity of Ni, comparing MIG and TIG processes

02 p0310 A70-12543

Porosity in graphitized polycarbylonitrile-based carbon fibers determined from surface area increase during heat treatment in vacuum

04 p0711 A70-14400

Pyrolysis effect on infinite slab subjected to front heat flux, attributing increased porosity to mass loss

[WSCI PAPER 69-27] 06 p1178 A70-17978

Normal shock waves produced in argon and helium flow by holder with variable downstream porosity, measuring DC moments, component velocities and density

06 p1051 A70-18342

Prestrain effect on cavity formation at grain boundaries causing creep strength decrease

07 p1307 A70-19392

Mold canting effects on nonporosity of Al alloys flat castings noting decreased metal losses

08 p1517 A70-21134

Porosity formation in Al ingots made by semicontinuous casting, considering metal grade and purity, gas content and homogenization conditions

08 p1505 A70-21136

Weld porosity in TIG welding of technical Ni in ternary mixtures of Ar with H, O and N

08 p1518 A70-21345

Al weld metal compositions and hydrogen content effects on weld porosity, locating hydrogen in weld by radioactive tracers

08 p1507 A70-21485

Porosity and intergranular crack formation in tungsten fusion welds using electron fractography

11 p2059 A70-25666

Metals purity, gas content and porosity effects on nature and size of material zone affected by laser beam treatment

12 p2250 A70-28219

Early Precambrian chert porosity and permeability, investigating hydrocarbon content origin

13 p2400 A70-29863

Hydrogen oxygen fuel cells, demonstrating matching of power source and load, charge transfer, porosity, Nernst equation and electrochemical water synthesis

14 p2533 A70-30533

Argon-arc welds porosity mechanism in Ti welding

17 p3098 A70-34443

Effective pores size, volume and surface area in refractory materials, using impregnation rate measurement

18 p3277 A70-36467

Graphite modulus of elasticity as function of temperature, considering effects of moisture content in pores

18 p3278 A70-36470

Porosity effects on mechanical properties of high strength Al alloy weldments

18 p3265 A70-37204

Porosity effects on mechanical properties of Al alloy gas tungsten arc welds, noting strength loss proportional to cross sectional area loss

18 p3265 A70-37205

Porous matrix explosions during sublimation of dusty ice with nonvolatile particles

19 p3471 A70-37659

Metals purity, gas content and porosity effects on nature and size of material zone affected by laser beam treatment

20 p3643 A70-40094

Gas porosity in fusion welds of chemical vapor deposited W, noting formation of microfissures due to pore linkup

22 p4046 A70-43149

POROUS BOUNDARY LAYER CONTROL

Steady convective motions in horizontal fluid layer bounded by porous walls of various temperatures at supercritical Rayleigh numbers, noting nonlinear convection equations

04 p0673 A70-15237

Variational problem of determining optimal heat transfer from gas flow to porous plate boundary layer

08 p1597 A70-21176

Two layer model of burning in turbulent boundary layer on porous surface for carbon monoxide oxidation reaction

18 p3346 A70-36268

Steady incompressible turbulent boundary layer form on permeable curvilinear surface with uniform suction, assuming small pressure gradients

22 p4011 A70-42803

POROUS MATERIALS

Heat transfer coefficients for mesh simulating porous parachute cloth, measuring Nusselt number as function of sonic Reynolds number

01 p0004 A70-10292

Rarefied gas flow through ultrafine porous filtering media used to predict flow rate

04 p0666 A70-14755

Graphite foam reinforced by carbonized high polymers used for fabricating highly porous heat and corrosion resistant material

04 p0712 A70-15178

Low temperature oxide film effect on porous titanium carbide impregnation by liquid steel

07 p1311 A70-19805

Steel balls impact on polyurethane foam, porous rubber and fiber materials, noting effects on both pellets and targets

09 p1769 A70-22123

Massive blowing from porous cone with embedded shock wave in supersonic flow, assuming inviscid and conical injected flow field

09 p1662 A70-23216

Titanium sponge secondary structure obtained by magnesiothermal reduction of concentrated Ti-containing chloride melts, discussing temperature effect on porosity

09 p1709 A70-23783

Molecular, viscomolecular and laminar gas flows in tubes and porous bodies at low pressures

10 p1869 A70-24287
